

## Tech to participate in War Moratorium

By PAT NICKELL  
Staff Writer

On more than 1,000 university campuses across the nation today, students opposed to the war in Vietnam are participating in an anti-Vietnam War Moratorium Day in the hope that public opinion will be the force to get the United States out of Vietnam.

Today's activities will begin at 8:30 a.m. with a daylong silent vigil in Memorial Circle in respect and memory of 45,000 American dead. Faculty and students will conduct a symposium in the Union Ballroom from 10:15 a.m. to 4:30 p.m. consisting of five hour-long panels.

Ministers from Lubbock churches will conduct the concluding program tonight in the "Free Speech Area" behind the Union. The day will end with a candlelight procession to the Memorial Circle.

SENATOR RALPH YARBOROUGH, sent the following telegram, in support of the movement:

"It is my hope that the nation-wide movement against the unconscionable war in Vietnam will reach such massive proportions as to break through the wall of separation that keeps the White House and its occupants isolated from the feelings and ideals of the American people. I support a moratorium movement if it is kept peaceful, non-violent, and lawful, respecting the rights and views of those who do not take part in the moratorium. While I cannot be with you in person today, I am with you in spirit. This war was legally and morally unjust from the beginning. I have never made a statement approving it and I rejoice that the conscience of the people, like a sleeping giant, is awakening and demanding disengagement in South Vietnam. I hope for the most massive turnout in Texas or United States history today. The last two presidential races have been won by the candidate in each instance whom the people believed was most likely to bring peace in Southeast Asia. It is time the hopes of the people were realized."

**SUPPORTERS OF THE** moratorium have urged suspension of classes and business activity today, but at Tech no classes have been officially dismissed. Marches and rallies are scheduled at the University of Texas in Austin, at Trinity College and San Antonio Union College in San Antonio, and in Dallas. Officials at Texas A&M have refused to support the moratorium and warned against student demonstration.

Texas Department of the American Legion and Veterans of Foreign Wars have urged Americans to fly American flags today in a silent counteraction to the demonstrations.

**ENDORSED BY THE TECH SENATE,** the Moratorium Day has also gained approval of its activities from the administration in a memorandum issued by Dr. Owen Caskey, vice president for Student Affairs. Original plans for the construction of white crosses on campus were not approved.

A schedule of the day's activities follows:  
10:15 Opening remarks  
10:30 History panel—Dr. Ben Newcomb, Dr. Alwyn Barr, Dr. James Harper  
11:30 Panel of mixed disciplines—Dr. Ivan Little, philosophy moderator; Dr. Charles Hartwick, philosophy; Dr. Jacquelin Collins, history; Dr. William Oden, government; Dr. William Portnoy, electrical engineering  
12:30 Business and economics—Prof. Ted Taylor, Dr. Roger Troub, and Dr. Carlton Whitehead  
1:30 Social Sciences—Dr. Evelyn Montgomery, sociology; Dr. Richard Kreslin, anthropology; Dr. Dennis Cogan and Dr. Charles Halcomb, psychology  
2:30 Government—Dr. Lawrence Mayer, Dr. Martin Kyre, Dr. Neale Pearson  
3:30 Student panel—"Student Involvement: What is Happening and Why"—Moratorium leaders Susan Preston, Arthur Yarish, John Hughes; Tech senator Tom Walsh, and Student Association President Jay Thompson  
7:30 The Interdenominational Program of readings, folk music, and audience participation conducted by ministers from Lubbock churches and campus ministries, concluded with a candlelight group procession to the Memorial Circle.

## Counseling Center provides assistance

By LAURIE NIPPER  
Staff Writer

Choosing a lifetime career is a decision which requires careful planning, objective reasoning and often, professional assistance.

A relatively unknown phase of student services at Tech is the Counseling Center, located in the Psychology Building. The center offers a trained staff of workers for vocational, academic and personal counseling.

Adopted by the University in 1957, the center is now under the jurisdiction of the vice president of Student Affairs, Dr. Owen Caskey. Prior to 1957 the center was operated by the Veterans' Administration and supported solely by funds from counselees.

**THE COUNSELING CENTER** is open to all Tech students and there is no charge for its services. One of its main responsibilities is in the area of testing. Aptitude, mental ability and achievement tests measure one's specific knowledge in a subject.

## Queen forms due today

Entries are due today at 5 p.m. for the Homecoming queen elections. Applications must be turned in to the Ex-Student Office before this deadline because it will not be extended.

10 semifinalists will be chosen in the first election on Oct. 22. In the second election on Oct. 29 five finalists will be chosen with the Homecoming queen announced at the Homecoming game. Governor Preston Smith will help crown the queen at half-time.

Candidates must be a junior or senior, single and a full time student. Other requirements include a grade point of 2.0 or better and attendance to all Homecoming activities.

The campaigning must consist only of word of mouth. Each entry must be accompanied by a wallet-sized photo. Only one organization may sponsor an entrant.

Equally important are the interest inventories, personality inventories and study habits inventories which attempt to complete the student's "profile." These tests are used to measure a student's various levels of interest and to serve as a guide in his selection of a vocation.

One such internationally known test employed at Tech is the Strong Vocational Interest Blank. It was created by Professor Edward K. Strong, Jr., of Stanford University using the theory that "men successfully engaged in a certain occupation would share a discoverable pattern of interests which would distinguish them from men in other occupations."

In taking the actual test, the student is asked to indicate a personal reaction to 400 items, ranging from school subjects to types of people. Answers are compared with those of representative vocational groups.

**BOYS ARE GIVEN APPROXIMATELY** 50 occupational scores; girls, about 30. Grades indicate the degree of similarity to successful members of those occupations—the higher the grade, the higher the similarity.

The psychometrist, Mrs. Marjorie Kuntz, estimated that she had administered tests to two-thirds of the approximately 900 students who have come to the counseling center this year. "The rest," Mrs. Kuntz said, "come and maybe do nothing but see a counselor; somehow just talking it over seems to help."

Mrs. Kuntz recalled that last year questionnaires were sent to students who failed to complete the total counseling program. Results showed that many students had been able to resolve their problems individually after one counseling session.

**TEST RESULTS ARE** available within 10 days after the initial testing and it is at this time that the student reports for his second conference with his counselor. During this time, test scores and inventory results are interpreted.

"One of the main problems," added Mrs. Kuntz, "is that many students wait until the end of the semester to take advantage of the Counseling Center's services."

The Moratorium Committee at Tech is an ad-hoc group sponsored by the Channing Club of the Unitarian-Universalist Church. Other sponsoring groups are the University Young Republican Movement, New Democratic Coalition, Lubbock Ecumenical Council for Social Concerns, Wesley Foundation Student Steering Committee, United Campus Ministries, Student Action Organization, and American Friends Service Committee.

## Senate seats filled today

Elections are being conducted today to select 22 new senators to the Tech Student Senate.

Voting places are set up in the Business Administration, Administration, English, C&ME, FL&M, and the Tech Union from 8:30 a.m.-4:30 p.m.

Voting will also be in the Law Library from noon to 1 p.m. and in the dormitories from 5:30-6:30 p.m.

IDs will be required to vote.

**CAMPAIGN SPIRIT**—Mitzi Sutton, center, seems to be surrounded by campaigners yesterday as she crosses the campus. A home economics major from Dallas, she is followed on the last day of campaigns by Nancy Craig, Houston home economics major,

left; Steve Jarnigan, business major from Phillips, and Steve Bean, business major from Fort Worth. Senate and freshman cheerleader elections are today. (Staff photo by Bruce Ott)

## Budget of Tech center compared with others

(Editor's note: This is the second in a two part series concerning the counseling center, its problems, its operation and a comparison of it to similar facilities in other institutions.)

By CHARLES REINKEN  
Staff Writer

To determine how the University Counseling Center's budget compares with those at other large universities in this area, inquiries were made from five schools: The University of Texas at Austin (35,000 students), Oklahoma State University (17,500), Oklahoma University (17,000), Louisiana State University (16,000) and The University of Arkansas (11,000).

The best financed of these is the center at the University of Texas, with state funds amounting to \$325,000, supplemented by an \$18,000 grant from the Hogg Foundation.

Dr. Ira Iscoe, director of the UT center, added to his statements about the center's finances: "Our whole purpose here is not to coddle students; our purpose is to get them off the ropes and into the center of the ring. We figure that it is a positive experience coming to us, and basically we are more and more emphasizing mental health rather than mental retardation."

**LSU'S CENTER, WITH FUNDS** of \$167,000, had the second largest budget of the schools surveyed. The LSU center's services are available to those students who have not accumulated more than 30 academic hours with a "C" average. This currently amounts to about 5,000 students.

## Frosh elect yell leaders in assembly

Freshman cheerleader elections will be held tonight at 6 p.m. in the Ballroom of the Union.

Attendance and voting for the election will be restricted to freshmen, said Joe Parker, president of the Freshman Council. He said that no one will be admitted after 6 p.m. Also, no one may leave until the tryouts and voting are finished.

Each freshman must have his ID to vote and may vote for three girls and three boys.

The results of the election will be posted tomorrow morning on the door of the Student Senate office.

The 20 finalists trying out for cheerleader were chosen from 45 candidates who appeared Sunday before a screening board.

The ten girls that are finalists for freshman cheerleader are: Lynda Lyons, Nick Papaila, LeAnn Ayers, Ellen Sheppard, Devora Lewis, Linda Lee Cook, Lynn Alderson, Carol Miksch, Tricia Johnson and Pat Bland.

The boys in the cheerleader finals are: T-Bo Smith, Don Jochen, Tim Daniel, Glen Wilson, Earle Farrell, Mark Hyer, Anthony Roffino, Dan Royal, Jim Windler and Bob Sowden.

All other students are counseled by psychiatrists and psychologists associated with the student health center.

At OSU, OU, and the University of Arkansas, the counseling centers had budgets of \$60,000, \$51,000, and \$16,000, respectively.

At all the schools surveyed a total of more than 97 per cent of the counseling centers' funds were from direct appropriation by the respective state legislatures.

When informed of the findings of the survey, Dr. James E. Kuntz, director of Tech's University Counseling Center, said, "This pretty well confirms what I had already supposed. I have never understood why other schools can get money from the legislature for their counseling centers, and Tech can't."

**WHEN ASKED WHY THE** legislature cut the center's funds from the budget, Dr. Glenn Barnett, executive vice president, said the legislators tend to feel this is "a very personal type of thing, which should be paid for on an individual basis."

Barnett added that in his opinion overall counseling funds have not been reduced, but that some of the departments and colleges have added full-time academic counselors to their staffs, lightening the load of the Counseling Center.

Kuntz added, "The reason for the Counseling Center staff fighting such a vigorous battle for increased counseling services is because we know what the needs are, whereas many other people are too far removed from the scene to realize that a great many students are in serious trouble."

"If one were to count the value of the psychological and other services provided by the center in terms of money, forgetting for the moment all the frustrations,

heartaches, and perhaps emotional breakdowns of students and others due to education and vocational mis-choices and personal problems, it is truly astounding.

**"THE DEAN'S OFFICE ESTIMATES** that a year at Tech costs at least \$2,000 and the Auditor's Office estimates that the taxpayer contributes \$600 toward each student's school year here at Tech.

"If we can help 1,000 students in a school year to avoid making the mistake of selecting a wrong major and thus losing a year, then we will have saved the taxpayer \$600,000 and the students \$1,400,000.

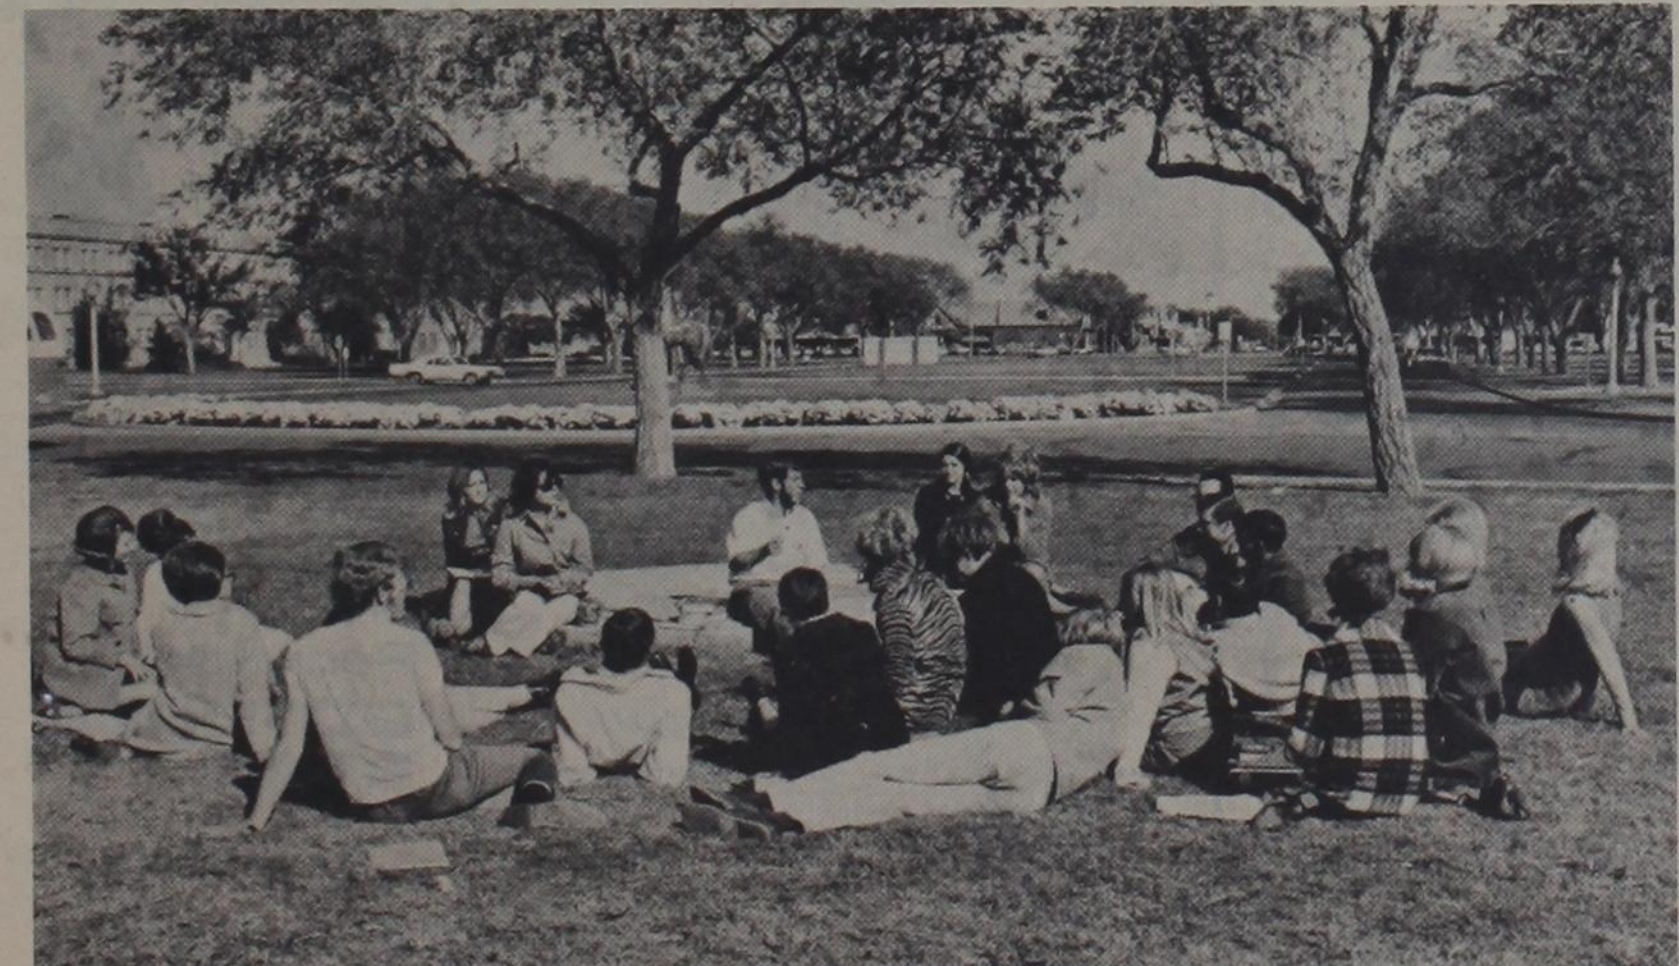

"Many students who come to the center are almost completely academically incapacitated due to being emotionally disturbed. Although we have no intentions of becoming a mental hospital, students with these sorts of problems are with us and will continue in increasing numbers to be with us. They cannot be asked to leave school because they are wasting the taxpayers' money."

## SMU tickets on sale soon

Tickets for the SMU game will be available starting tomorrow at 8 a.m. and will continue till noon the following Wednesday.

1,845 student and faculty tickets are available for the game, which will be played in Dallas on Oct. 25. The tickets will be sold at the Tech Athletic Office.

Student tickets will sell for \$3 with the presentation of IDs. A student may present a maximum of two IDs. Each ID will allow a student to purchase one half price ticket and one full price ticket.

**MODERN EDUCATION**—A marked-up desk and four walls do not necessarily characterize all classes at Tech, as was proved yesterday by Frank

Barefield, instructor of sociology and anthropology. He conducted his Sociology 439 class outdoors. (Staff photo by Bruce Ott)

**BALLOON SALE**—Theta Sigma Phi members Lynn Green, Sarah Raney and Kathy Rhoads blow up balloons to be sold by the women's journalism honorary at Saturday's game. The balloon sale is an annual Theta Sig-sponsored event held at the Dad's Day football game. (Staff photo by Bruce Ott)

## Moratorium moves to end war

The Vietnam Moratorium today moves to end the war in Southeast Asia.

In considering the Moratorium, several conflicting interests come to mind. Some people complain about Tech's administration cracking down on Moratorium plans. To the contrary, the administration and the Moratorium leaders seem to have worked reasonably well together.

The only thing disallowed by the administration was the erecting of white crosses on Memorial Circle. The main purpose to be served by putting crosses on the Circle would be to attract public attention to Tech's Moratorium.

However, some Moratorium people have been saying that they were not allowed to use the crosses to honor war dead, even though that is the assumed purpose of Memorial Circle. This is partly true.

From a practical point of view, the administration probably feared that the crosses would blatantly offend someone who was opposed to the Moratorium.

Though crosses could be used to honor war dead, the Moratorium was most seriously hampered for the realistic reason that the crosses could not be used to attract attention.

By and large, the students received all the other things they requested. One major problem was that the administration was having difficulty communicating to the students because several students came in with various requests, saying they were wanted by the Moratorium.

When the situation was finally corrected, definite

leaders of the Moratorium had been selected, and those individuals dealt with the administration. The problems began to disappear. Most of the requests made by the selected leaders were accepted by the administration. Those who think otherwise probably do not know what the Moratorium leaders actually requested.

Now, Tech has an opportunity to take part in the Vietnam Moratorium. It is an acceptable way to protest the war.

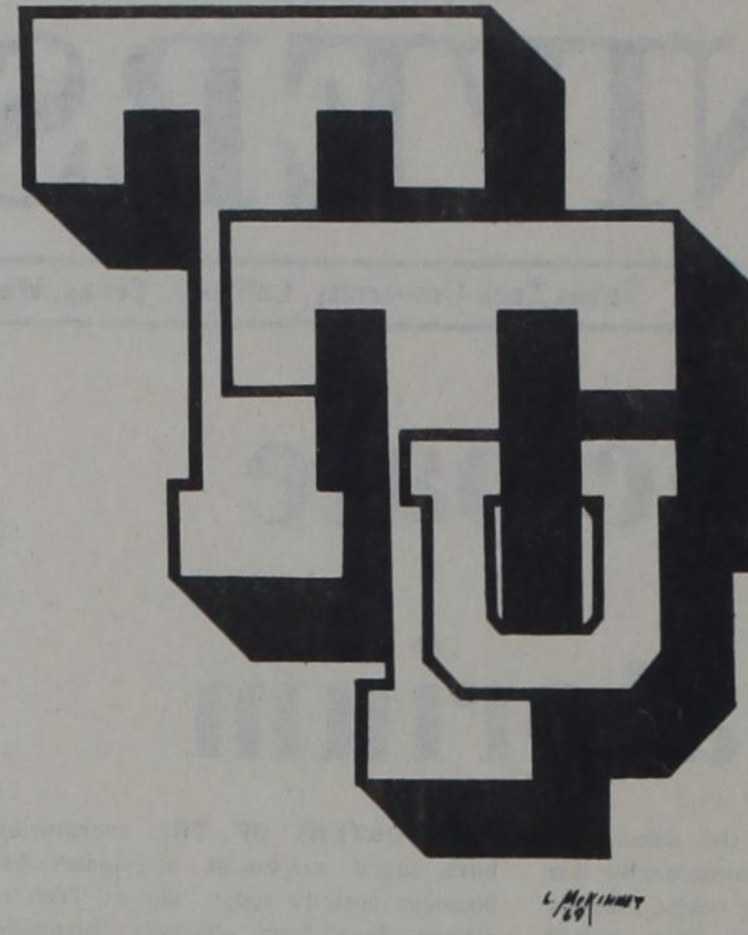

It seems unusual though that so many people are convinced that they have all the facts needed to direct our country in the conducting of a war. Maybe that will be a goal of the symposium — give people the facts that they need to make a decision.

But, who will go to the symposiums? Most of the people who attend will probably already have preconceived ideas about the war and will gain very little from the discussions.

This is not meant to take anything away from the Moratorium. It seems likely, however, that people will not respond rationally to what they hear at the symposiums.

On the other hand, such things as Moratoriums are needed by society just to give people the opportunity to participate in thought provoking, reasonable, crucial controversy.

Though we do not agree with many of the Moratorium's proposals, we hope that something will be gained at Tech, due to today's Moratorium.

**PROPOSED DESIGN**—Larry McKinney, Lubbock sophomore, proposes this design for a new symbol for the university calling for the addition of the "U" as a new and integral part of the emblem. Response to the symbol suggested by a Tech professor last week was small and unanimously negative.

# Constitutional revision

Editor's note: The following is the proposed constitutional amendment which appears on today's ballot with candidates for Student Senate.

PRESENT	PROPOSED
Article II Legislative Section 2.	Article II Legislative Section 2
Composition: The Student Senate shall be composed of: 1. Representatives elected from each academic school, by the students enrolled in that school, and in proportion to the number of students in each school. The proportion of representation shall be determined annually by the Student Senate, at least one month before the elections are to be held. Each academic school shall be entitled to at least one member of the Senate.	Composition: The Student Senate shall be composed of: 1. Representatives elected from each academic school, by the students enrolled in that school, and in proportion to the number of students in each school. The proportion of representation shall be determined annually by the first meeting following the announcement figures for the Fall Semester. Each academic school shall be entitled to at least one member of the Senate.
Article II Legislative Section 7	Article II Legislative Section 7
Committees: 1. The Senate shall have the following standing committees: Allocations, Elections, Judiciary, Rules, Academics, Public Relations, and Campus Facilities & Affairs.	Committees: 1. The Senate shall establish standing, special and select committees as from time to time deemed necessary and expedient.

# Letters To The Editor

## Alternative exists to negative approach used by Moratorium sponsor

As you know, the New Left forces are building toward a number of demonstrations against the war in Vietnam.

The first major campus demonstration of this "Fall Offensive" is set for Oct. 15. Other moves against the war are scheduled for mid-November, with the protest culminating in a giant march in Washington on Nov. 15.

The Oct. 15 demonstration is being organized and directed by the Vietnam Moratorium Committee, a radical anti-Vietnam, anti-administration national committee. The purpose of the Oct. 15 demonstrations, according to the organizers, is to "maximize public pressure to end the war by encouraging the broad cross-section of Americans to work against the war."

"The method is a recurring moratorium on business as usual to allow concerned citizens to spend that day participating in anti-war programs in their local community."

The Vietnam Moratorium Committee has been

characterized as weak on politics but strong on organization. The group, organized by former

of the Vietnam Moratorium Day activities on Tech's campus.

Many groups have agreed to sponsor the Moratorium Day Committee AFTER they listened to the complete plans. Most of the hostility to the Moratorium has vanished because of our dignified and balanced plans for that day.

We plan a silent vigil to mourn our war dead, a symposium of prestigious faculty presenting different views on the war and a night program conducted by Lubbock and campus ministers.

This will be a non-violent peaceful and lawful day of events that does not break any school rules. So to deny us the opportunity to present different views on the war would be to deny free speech.

David Holland  
Vietnam Moratorium Committee

Eugene McCarthy backers, has called for immediate withdrawal of U.S. troops from Vietnam.

The committee is also encouraging teach-ins and is asking university officials to close down schools in support of the moratorium. Spokesmen for the moratorium here in Texas have stated that well over 100 colleges and universities have pledged to suspend classes Oct. 15.

According to an Article in the New Left paper the "Guardian" (Sept. 27, 1969), David Hawk, a member of the Vietnam Moratorium Committee predicted 400 campuses would be shut down Oct. 15.

The article further stated that the committee is working with even farther-to-the-left groups for a second school stoppage on Nov. 14. And this strike will take place on high school campuses as well as colleges and universities.

The Young Americans For Freedom do not question the right of students to boycott classes for any cause they choose, but we do question the effect of this strike on efforts by the Nixon administration to end the war.

President Nixon, at his Sept. 26th press conference, said, in direct response to a question about the effect of the moratorium:

"Now, I understand that there has been and continues to be opposition to the war in Vietnam on the campuses, and we expect it. However, under no circumstances will I be affected whatever by it."

One group you can be sure WILL be affected by it is the communists representing the northern half of Vietnam at the Paris Peace Talks. And if this is the effect of the dissidence, the Moratorium will have unwittingly

acted to further delay negotiations to end the very war they protest.

In an AP story, Vice-President Agnew pointed this out: "Think about this: A protest to the President for a war he did not start and never stops trying to conclude; who has reversed troop involvement and who is withdrawing 60,000 American soldiers; who has cancelled the draft for the last months of this year and cut deeply into the military budget; who has offered every conceivable compromise to the enemy."

"Only the President has the power to negotiate peace," Agnew said. "By attacking the President, the protestors attack our hope for peace. They weaken the hand that can save."

Agnew said demonstrators should instead protest against "the North Vietnamese, who have rejected every peace move at the conference table. They should protest the Viet Cong's slaughter of thousands of South Vietnamese whose only sin was their ability to teach and heal."

"Those are rational targets for responsible protest. And responsible protest of this war is important," he said.

The YAF also questions actions by universities that decide to close down on Oct. 15 in support of the moratorium. When the student pays his tuition he enters into a contract with the university. Any action by the university to suspend classes is a violation of that contract.

It is easy to generate opposition to such generally unpopular issues as the draft and the war in Vietnam. Sen. John Tower stated his concern on Oct. 4, 1969, that in

our search for peace we may become so frustrated that we grasp blindly towards our goal of withdrawing troops as a panacea. It is much harder to present solutions to these problems.

As to the war, the United States should either win it or get out. And as to the draft, the YAF proposes as a POSITIVE ALTERNATIVE to conscription, replacing the draft with a voluntary military. A POSITIVE ACTION brochure is available from YAF, Box 4438, Tech Station, explaining the hows and whys of a voluntary military.

Only through POSITIVE ACTION programs such as the ones sponsored by YAF can the students on our campus know that an alternative does exist to the negative approach used by the sponsor of the Moratorium.

Robert Prettyman,  
Chester Chapman  
Young Americans For Freedom

# Student Senate Candidate Platforms

The following is the continuation of the platforms of Student Senate candidates in the election today.

Voting booths are located in the Business Administration Building, the Ad Building, English Building, C&ME Building, FL&M Building and in the Union.

Voting at these locations will be from 8:30 a.m. to 4:30 p.m.

Polls will also be set up in the Law Library from noon to 1 p.m. and in the dorms from 5:30-6:30 p.m.

The following platforms are from candidates from the Colleges of Engineering, Home Economics, Education, Business Administration and from the Graduate School.

## College of Engineering

RENE FREEMAN

The following points form the basis of my platform which I will endeavor to see enacted if elected:

1. Improved football game seating for students by having both a reserved section and an unreserved area. Students would be admitted on I.D. but purchase a reserved seat for a small fee.
2. Extensive SUB expansion
3. Expansion of intramural facilities
4. Improved parking conditions for both on and off campus students.
5. More and better academic recruiting
6. More research grants for faculty and graduate students.

GARY WIMMER

As a senior at Tech, I am very concerned with our universities shortcomings and faults and for this reason I have decided to run for the Student Senate. I am

deeply and sincerely interested in making changes in many areas and if elected, I would devote my utmost attention to doing so. In particular, I am concerned with and do support increased student participation and membership in student-faculty committees, improved parking facilities, commencement reorganization, advanced placement exams, and an investigation of bookstore prices and practices.

## College of Home Economics

LYNN KROHN

If I am elected to the Student Senate, I will work to establish a better line of communication between the student body and the Student Senate.

This would lead to prompt action on issues of major concern to students.

Another issue of major importance that I would force my attention upon, would be the parking problem that Tech now faces. The way in which this can be accomplished is when ample space is provided for students who have purchased parking permits.

I hope I will have an opportunity to work with these issues and the many more that will arise in the future.

SUSAN CLAYTON

I, Susan Clayton am running for senator of Home Economics. I feel the need to represent student opinions concerning the individual and his involvement with our university as a whole. Serving as AWS representative and member of the Home Ec. Student Council, I feel I could link the College of Home Economics, the student and the government. This council offers me the opportunity to view wishes of freshmen, upperclassmen and graduate students. My contact with students includes Student Union membership, where I feel the need for expansion of Union work. Because of my activities, I feel capable of representing student ideas from the College of Home Economics as well as the student body concerning government, housing and activity expansion.

TERRY BYERLEY

I, Terry Byerley, want to work for you the student. I want to broaden the scope of Home Economics, and to strengthen our programs. Our school has not grown proportionately as fast as the other schools on campus. We need a larger building and new facilities to meet our growing enrollment. I want to have our money working for us the students. As a Junior I have had

experience in the realm of student government, and I hold an executive office of an organization on campus. I have the time if you the student are willing to give me the chance.

## College of Business Administration

ROBIN CASH

Our University must offer opportunities and programs open to major universities so that you may widen your education and experiences.

1. Draft counseling - to receive unbiased advice from expertly trained students on how best to serve the country.

2. Open dorms for those students who desire them.

3. Open dorms for those students who desire them.

3. Make the free speech area more active by moving it to a more conspicuous area, i.e. Memorial Circle.

4. Revise medical fees - either lower them or improve clinic, i.e. discount prescriptions, birth control and drug information.

5. To organize the pass-fail system and get it started in BA courses

BILL SEWELL

If elected to the office of Student Senator in the College of Business Administration, I pledge my full and undivided attention in solving the problems facing this college. I will endeavor to seek expansion of the Student Union Building; I will try to gain more liberal housing regulations; I will strive for better Student Senate as well as senate-faculty relations. If elected Senator, I will pledge my full support in any moves to secure more funds for operation of the S.U.B. These generalized planks are not simple idle words, but definite commitments on which I base my campaign Platform.

LOUIS KOWALSKI

1. Academic Recruiting: Applies to recruiting students to attend Texas Tech from surrounding communities and cities.

2. Expanding Student Government: In areas that would benefit Tech students.

3. I favor better intramural facilities and see a definite need for expansion.

4. I favor a definite expansion of the Union and its facilities.

5. I feel that students need to be more represented in the Code of Student Affairs.

BILL ZIMMERMAN

My platform is basically constructed on three planks. As a student of Texas Tech, it is quite obvious that the relationship between the student and the administration is in need of improvement. An answer to this problem could be to give the students more voice in school policy to prevent enactments of important policy during student absences.

I also believe that through an advisory committee a better understanding might be created between Tech students and the community.

Intramural facilities? They are crying for improvement. The things I have written here are planks for the concerned Tech student, not just me.

RICHARD BLACK

As far as Tech is concerned, I feel that there are several areas of interest that need to be expanded. For instance, academic recruiting has a foothold now, and given a proper

chance, can be of great help to Tech. I feel that a new Code of Student Affairs which would give students more representation and broaden the areas of representation needs to be seriously considered.

Also, with Tech's present rate of growth, the facilities of the Intramural Program and Student Union need to be greatly expanded. Finally, I feel that something along the lines of an Apartment Board and a Food Board need to be acted upon to insure Tech students of better housing facilities.

PHIL SWATZELL

1. Expansion of student government and student information

2. Favoring better intramural facilities.

3. More student parking.

4. Expansion of the Union.

5. Get more students represented in the Code of Student Affairs.

**CAMPAIGNER**—Last minute campaigning is going all over campus prior to the Student Senate elections today. Here Susan Crews, Ennis junior, gives her candidate's handout to Elaine Holmes, Pampa freshman. (Staff photo by Bruce Ott)

6. Most important issue: Academic recruiting. Tech is growing in size; by getting more students enrolled, we would take care of the dormitory problem.

GARY JUSTICE

My platform consists of six important items that have been discussed, but as of yet, are dying for lack of initiative. I will try to the best of my ability to see them implemented.

1. Off-campus housing for those having 64 or more hours.

2. Paving the muddy excuse for parking west of the B.A.

3. Immediate execution of the pass-fail system.

4. Optional finals for all classes.

5. Non-compulsory classroom attendance.

6. Improved and expanded intramural facilities.

BILL SCOTT

1. Enact legislation to promote rapid expansion of the Union

Building, by issuing private bonds or establishing a higher student activities fee over a prolonged period of time.

2. Solve the student seating problem by completing the concrete seats around the north end of Jones Stadium.

3. Appropriate Ex-Students Association funds to finance the Senate oriented Academic Recruiting Program around the state.

4. Use our Tech Computer Center to initiate and evaluate a program for teacher evaluation purposes.

MARK LEAVERTON

There are several programs that I think need to become a reality and which the students of Tech should be eager to support. I will specifically push academic recruiting - for who but Tech students could sell TTU better? I believe a Code of Student Affairs could get students more representation in broader areas. An Apartment and Restaurant Board would help new students secure "good" places to live and eat. With expanding enrollment there needs to be an expansion of intramural facilities and the Union. These proposals provide a chance for students to get together and work towards something that is worthwhile and important.

JIM DOUGLASS

In seeking the office of Senator, it is my sincere desire to bring the student closer to this University. Since we are a relatively young school, it is our responsibility to strengthen old traditions and to build new ones. Next to a diploma, I feel the best thing a student can carry away with him is a sincere love for and pride in his alma mater. Texas Tech will never be number one to others if it is not number one to ourselves. I promise to do all that I can to make this University a

JOEL NOLAN

1. The formation of an Inter Club Council for better communication and coordination of activities on campus.

2. Reduction in price of date tickets.

3. Enlargement of student seating at football games.

4. The planning and construction of new parking facilities in direct proportion to the construction of new buildings.

5. The completion of the entrance fountain in the very near future.

school anyone would be proud of. I can promise nothing more - nothing less.

GREG WIMMER

1. Parking—More spaces. Revise current fine system for parking violations.

2. Tech needs expansion of intramural and Sub facilities.

3. Revise registration - Complete pre-registration by computer.

4. I would like to see non-mandatory finals and class attendance.

5. Reserved seating for football and basketball games.

6. A student on the Board of Directors.

ROBIN L. ANDERSON

I am willing to work for the students of Texas Tech as an active voice in student affairs with special emphasis on:

1. Streamlined registration with computer census of courses needed or complete computer pre-registration at mid-semester with an increased number of drop-add days for necessary changes.

2. An accepted voting student member on the Board of Regents.

3. Printed lecture outlines for monster classes.

4. Improved relations with ex-students since they influence university affairs.

5. Continued development of an academic recruiting program.

5. Strengthened voice of Student Senate in university policy decisions.

## College of Education

CHRIS MILLS

I feel that serving on the Student Senate this past year has given me an insight into the workings of student government, and I would like to use the benefit of my experience in the coming year for the betterment of Texas Tech University. I am currently working on: 1. Upgrading Final Examinations 2. Class Attendance Act 3. College Councils 4. Pass-Fail System among other projects.

I would like to continue my work in these areas and participate in Academic Recruiting. I can accomplish this only with your support.

## Graduate School

KEITH WILLIAMS

1. Pass-fail options for graduate courses.

2. Professors' pay to brought to a level with teaching assistants' pay, so they may have the same economic benefits and pleasures we do.

3. Name-change (to Little Harvard University).

4. Restriction of campus riots to only those led by fully qualified (meaning apathetic) graduate students.

5. New editor for the U.D.

6. The usual penny beer, free sex (for you with your wife, anyway), etc., etc., etc.

WARREN WATSON

1. Initiation of the pass-fail system for all electives outside of the major or minor.

2. The construction of more student parking areas.

3. Stronger authority delegated to the student supreme court.

4. The origination of a student disciplinary board to deal with student law violations (dwi, etc.) instead of the administration.

5. Let all graduate students have first choice at reserved parking.

6. Monthly forums which Dr. Murray will definitely attend to answer student questions.

7. Moving the Tech Board of Regents meeting place to an auditorium where more than just 20-30 students may attend observe.

JIM BOYNTON

I feel that the Student Senate should present itself as a group truly dedicated to leading the Texas Tech student body. As a representative body, we should be both responsible to the majority and responsive to the minority. Responsibility implies involvement and the Senate should strive to involve itself in all matters that affect students: their education and future. This would definitely include an attempt to achieve an equitable student representation on all faculty-student committees which directly or indirectly affect student life.

## Applications for financial grants in AFROTC due

The deadline for applications for an Air Force ROTC four-year financial assistant grant for students who will be entering their freshman year of college during the 1970-71 school year is Nov. 14, 1969.

That reminder went out to students and their parents Monday (Oct. 13) from Brig. Gen. Benjamin B. Cassidy Jr., commandant of Air University's Air Force ROTC, and Col. Haynes M. Baumgardner, professor of Aerospace Studies at Tech.

An Air Force ROTC financial assistance grant provides for full tuition, laboratory and associated fees and an allowance for textbooks and includes a tax-free allowance of \$50 per month during the period the student is in school and on financial assistance grant status, Col. Baumgardner said.

Approximately 500 four-year financial assistance grants will

be awarded for the school year 1970-71.

All applicants for a four-year financial assistance grant must be qualified and agree to enter the Air Force ROTC program in a flying (pilot or navigator) category and will be expected to enter a flying training program upon graduation from college, he said. Only men who are qualified should apply for this program.

The Air Force ROTC financial assistance grants are also available to students at the second, third, and fourth year levels of the Air Force ROTC program. The student who is

enrolled in the four-year AFROTC program and makes application for a grant in college sophomore, junior, or senior year is not required to be qualified in the flying category.

All financial assistance grant recipients must be presently enrolled or accepted for admission in a college offering the four-year AFROTC program.

Interested students may apply by writing to Air Force ROTC, Office of Information, Maxwell Air Force Base, Alabama 36112.

The Department of Aerospace Studies, Tech, also is available for assistance.

Possibly 40 per cent

## Cotton damage still in question

Tech agronomists said the extent of the damage from the early freeze which struck the South Plains Monday likely will not be known for several days.

Drs. Eugene Coleman and Clark Harvey said the damage to cotton and soybeans will possibly be as high as 40 per cent, depending upon the type and age of the crop; but even in some cases the freeze may be a "blessing."

The freeze was approximately three weeks earlier than the average killing date for this immediate area.

Irrigated cotton planted prior to May 20, with normal irrigation, is already 50-70 per cent open, Dr. Coleman said. "This is due primarily to the hot dry summer we have experienced. This cotton is not going to be greatly damaged, possibly 10-20 per cent," he said.

"The freeze has killed the young, luxuriant 'second growth' caused by recent rains on this cotton and this could be considered a blessing in disguise."

Late planted irrigated cotton has been damaged most heavily, he said. Cotton planted after June 1 is probably not more than 10-20 per cent open at this time and could possibly suffer 30-40 per cent damage.

"Early dryland cotton was 80-90 per cent open and the freeze simply defoliated the young, luxuriant top growth caused by recent rains and saved farmers the cost of defoliation," Dr. Coleman said.

Of soybeans, Dr. Harvey said "varieties that have maturity dates similar to the Lee will probably be reduced about 10 to 20 per cent. Other varieties, such as Hill, Clark, Patterson, and Hood, which make up 95 per cent of the acreage, should suffer no significant loss."

In range management

Sosebee named assistant prof

The appointment of Ronald E. Sosebee as assistant professor of range management at Texas Tech was announced yesterday by Chairman Joseph L. Schuster of the Department of Range and Wildlife Management.

Dr. Sosebee's primary concern this semester will be in the establishment of new research in brush control, said Dr. Schuster, who is project leader for the University's Brush Control Studies.

The ultimate goal of Sosebee's first research at Texas Tech, Schuster said, would be to find a means of complete control of mesquite.

Sosebee's previous work with brush control projects has been in New Mexico where he was a graduate assistant while working on his master's degree from New Mexico State University at Las Cruces. Work there involved mesquite, the creosote bush and the tarbrush.

Sosebee's bachelor's degree was earned at Abilene Christian College where he had a double major in range management and agronomy. He earned the doctoral degree in botany with a specialization in plant ecophysiology at Utah State University at Logan.

He previously has been employed on New Mexico's Jornada Experimental Range, Agricultural Research Service, U.S. Department of Agriculture, the Bureau of Land Management in western Colorado and with the Jones (Tex.) County Agriculture Stabilization and Conservation Office.

He is a member of the American Society of Plant Physiologists, the Ecological Society of America, the American Society of Range Management, the American Institute of Biological Sciences and Sigma Xi.

QUEEN CONTESTANT—Kay Marshall, junior home economics major from Fort Worth, looks over the route she will travel to compete in the annual Charolais Queens Contest in Kansas City. (Staff photo by Bruce Ott)

AICA queens contest

Coed competes for title

By CLAIRE GILLESPIE Staff Writer

Tech coed, Kay Marshall, will be traveling to Kansas City, Mo., Thursday to compete in the sixth annual Charolais Queens Contest, sponsored by the American International Charolais Association (AICA).

The AICA serves as the official promoter for Charolais cattle, a French breed which is relatively new to the United States. It was imported about 50 years ago and has gained in popularity during the last 20 years.

The contest for Miss Charolais, U.S.A., is part of the national Charolais Congress, being held in connection with the American Royal Livestock Exhibition tomorrow through Sunday.

Miss Marshall, a junior home economics major, will be traveling to Kansas City with her

parents, Mr. and Mrs. Lewis H. Marshall of Fort Worth. Marshall is the general manager of seven Charolais ranches owned by Howard Walsh also of Fort Worth.

Miss Marshall was selected to represent the Walsh ranches. Tech's first Charolais bull was donated by the ranch on which the Marshalls live.

Miss Marshall will compete

against approximately 20 other girls from throughout the nation. To be eligible, the girls must be 17 to 21, single, and be sponsored by members of AICA. Miss Marshall said, "Miss Charolais, U.S.A., will travel throughout the United States as a goodwill ambassador to promote the Charolais breed. Next September the winner will also fly to London, England, to attend the World Charolais

Federation meeting." The winner will be selected on the basis of knowledge about the Charolais breed, appearance, personality and poise. The head judge is the 1968 Mrs. America, Mrs. John Cochran.

The Charolais convention will include conferences and educational panels concerning new information and research about the Breed.

Smith to address Dad's Association

Gov. Preston Smith will be an honored guest and speaker at the annual meeting of the Tech Dads Association here Saturday.

Governor Smith will deliver an address at the Association's luncheon meeting in Tech Union, one of the day's special events leading up to the 7:30 p.m. football game in Jones Stadium between the Red Raiders and Mississippi State.

Gov. and Mrs. Smith are both graduates of Tech, as are their daughter, Jan (Mrs. Conrad Schmid), and son, Mickey, who now live in Austin. The family home is in Lubbock.

Parents of Tech students from across the state and nation are expected to be on hand for activities which will get under way at a registration coffee for Dads and their families from 9 to 11 a.m. in Tech Union with members of the Association of Women Students as hostesses.

The Association's annual business meeting will be held in the Tech Union Ballroom immediately following the 12:15 p.m. luncheon. The members of the Dad's families will be entertained at 1 p.m. program and luncheon in the Wiggins Common dining hall.

The Dads will be honored at the half time show in the game between Tech and Mississippi State when they will be asked to stand in a group salute. Presentations of engraved plaques will be made to the Youngest Dad, the Oldest Dad, and the Dad who has traveled the greatest distance to attend.

The Association's Trustee Dinner, traditionally held immediately prior to Dads Day, will be at 7 p.m. Friday in the Tech Union's Mesa Room. Dr. S. M. Kennedy, Tech vice president for academic affairs, will be the speaker.

WOMEN'S TENNIS Tryouts for the women's varsity tennis team will be at 6:30 p.m. Oct. 27 in room 106 of the Women's Gym. For information about the team, contact Dr. Coleen O'Connor in room 113 of the Women's Gym.

MORTAR BOARD Applications for memberships are available in room 117 of the Ad Building. Applicants must have 96 hours credit by next fall with a 3.0 overall. Completed applications must be turned in by Oct. 25 in room 117 of the Ad Building or to Lynn Cox in room 111, Weeks Hall.

AG ECONOMICS CLUB A meeting is planned for 7:30 p.m. today in the First National Bank Building. The meeting will include a tour of the bank. All Ag economics majors, wives and dates are invited.

SIGMA TAU DELTA Applications for membership in this national English honorary are available in room 218 of the English Building. Qualifications for membership are a 3.0 overall with a 3.25 in 12 or more hours of English. Applications must be filed by Oct. 21.

MORTAR BOARD Members will meet at 8 p.m. today in the home of Dr. Evelyn Montgomery, 2003-B 32nd St. Final plans will be made for the Mum Sale for Dad's Day.

MUMSALE Mortar Board is selling Mums for Dad's Day this week from 8 a.m. to 3 p.m. in the Union lobby. Mums are priced at \$2.50. They may be picked up Friday and Saturday from 8 a.m. to 5 p.m. in the Union.

TECH FINANCE ASSOCIATION Ken Anderson, Financial Vice President of T.I.M.E.D.C., will speak at the meeting scheduled for 8:15 tomorrow evening in the Union Ballroom.

BLOCK AND BRIDLE A Block and Bridle meeting is scheduled for 7:30 p.m. today in the Ag Auditorium.

ALPHA EPSILON DELTA Alpha Epsilon Delta, pre-med club, will meet tomorrow at 7 p.m. in room C2 of the Chemistry Building.

WSO Women's Service Organization will meet today at 7 p.m. in the Home Economics Building. All pledges are to meet at 6:30 p.m. in the BA Building. All actives and pledges are to attend the pep rally Friday night.

ETA SIGMA PHI Eta Sigma Phi, classical fraternity, will meet at 7:30 p.m. tomorrow in room 22 of the FL&M Building. A guest speaker from Morton High School will show slides from Home. Anyone interested can attend.

TYRIAN RIFLES DRILL TEAM The Tyrian Rifles will meet tomorrow at 7 p.m. in room 22 of the Social Science Building. The drill team will have a practice tomorrow and all people in Army ROTC who are interested are invited to attend.

LA VENTANA PICTURES Make-up pictures to appear in the 1970 La Ventana are being taken through Friday for seniors. Freshmen, Law School students and graduate students. Picture sessions are from 8:30-11:30 a.m. and 1:40-3 p.m. at Avalon Studio, 2414 Broadway. Make-up pictures for sophomores and juniors will be during the week of Oct. 20-24.

RODEO ASSOCIATION The Rodeo Association will have a business meeting and present a film tomorrow at 7 p.m. in the Ag Auditorium. Members and pins must attend.

WENLEY FOUNDATION The Wenley Foundation will sponsor an "Indian Night" Friday night at 7 p.m. The meal will consist of food of India. After the meal speakers will give impressions of America, politics, and Hinduism.

ALPHA KAPPA PSI Alpha Kappa Psi, professional business fraternities, will present Dr. Vincent Luchsinger, department head of management, at 7 p.m. today in room 352 of the Business Administration Building. Guests will be Phi Gamma Xi, women's professional business sorority, although all interested students may attend. Dr. Luchsinger's speech will concern job opportunities.

"Mr. Roberts" auditions open

Auditions for the University Theater's Nov. 21 production of Thomas Heggen and Joshua Logan's "Mr. Roberts" are scheduled for today and tomorrow in the Theater.

The tryouts are open to everyone, who should come to the Theater from 4-6 p.m. and 7-10 p.m. either or both evenings.

Ronald Schulz will direct this World War II comedy, which as a play merited a long Broadway run, and as a movie, was feted with Oscars.

## Kaleidoscope Players

# Drama to open at Union

The Kaleidoscope Players' seventh return to the campus will open today at 7:30 p.m. in the Coronado Room, with "Dear Liar," the first of two programs. "Worlds of Shakespeare" will conclude the program tomorrow at the same time.

The Kaleidoscopes are the state theater of New Mexico, and operate both summer and winter stock companies in Santa Fe and Raton. They have also sponsored the opening of a school for the performing arts in Raton.

"Dear Liar" is a two-character dramatization of the relationship, through letters, of the renowned actress Mrs. Patrick Campbell and the acerbic playwright Bernard Shaw.

Stella Campbell shocked her high-born family near the turn of the century when she announced her plans to go on the stage. Her own worries were assuaged, however, when a host of favorable reviews encouraged her to greater achievements.

One dramatic critic, Shaw, stated in a review that "Mrs. Patrick Campbell is a wonderful woman," an opinion that was to remain unaltered for twenty years.

With Stella's reply to this review began a series of famous letters between the actress and the playwright, who worked together only once.

That occasion was "Pygmalion," and the two worked out a comedy that rocked London. The play marked the height of her career, and the heyday of Shaw's first popularity. In the ensuing years, their friendship grew, envisioned not only in their own letters, but also

in their writings to other people, and in their personal recollections.

This dramatization of those letters captures the spirit of these two engaging personalities, who were often at friendly wars with one another in a battle of wits.

"Worlds of Shakespeare," will portray two sides of the playwright - poet - actor's works - his plays and his poetry.

"Worlds" again will be acted by two performers from the company.

This Union-sponsored program is free to students with IDs.

## 'Easy Rider' to premiere with opening of Fox Twin

The Fox Theater will inaugurate the opening of its new twin cinema at 8:45 p.m. today with the premiere of "Easy Rider," a contemporary drama which won the Cannes Film Festival award this year as the best film by a new director.

Manager Ron Reid says that the theater will be called the Fox Twin, with an identical auditorium adjoining an older unit built a year ago.

The new theater is Fox Twin I, with the adjacent theater being the Fox Twin II.

"Easy Rider," directed by Dennis Hopper who is featured in the film along with Peter Fonda, was written by Fonda, who also produced. Hopper and satirist Terry Southern, author of "Candy" and "Dr. Strangelove."

This drama, advertised as the story of a man who went looking for America and was unable to find it, was filmed from coast-to-coast, and chronicles the saga of

two motorcycle men, hairy and free, who roam the roads in search of a national identity.

Fonda came to nationwide renown with the controversial film, "Wild Angels," a portrayal of a film that spawned a host of lesser imitators.

Hopper, known as a child star who later became interested in photography, turned to direction for the first time with "Easy Rider" and won kudos at Cannes for his efforts.

Location shots for the film

included the first filming ever permitted inside the Taos Indian Reservation.

The score for the movie is a compendium of rock, including recordings by Steppenwolf, the Byrds, the Band, the Holy Modal Rounders, the Fraternity of Man, the Jimi Hendrix Experience, Little Eva, The Electric Prunes, the Electric Flag and Roger McGuinn.

This Columbia picture, rated R, will be shown in an exclusive run at the Fox Twin I.

## Dressing rooms under renovation

Renovation of the dressing rooms for the Tech basketball team in the Municipal Coliseum is a joint project of the Tech Athletic Office, the City of Lubbock and the Saddle Tramps.

Basketball coach Bob Bass had the idea for the project when he saw the dressing rooms in April. Coach Bass said, "I felt that there was a definite need for an up-to-date dressing facility for the basketball team."

The City of Lubbock repaired the leaks in the roof to prevent leaking when it rained. It also tore down a wall and made two rooms into one large dressing room for the team.

The City put in new light fixtures which the Athletic Office furnished.

The Athletic Office is furnishing new lockers, carpet on the floor and a new dressing cabinet.

The renovation is a Saddle Tramps pledge project. The pledges are painting the dressing rooms and the trim. They are also painting the school emblem throughout the facilities. Lockers are being painted in the school colors.

Coach Bass said, "The new lockers and cabinets will enable us to lock up our equipment between games in the Coliseum. Before, when we had the old lockers, we had to remove our equipment from the Coliseum when another event was held in there."

The project, which began Sept. 1, will be finished Nov. 1.

**KALEIDOSCOPE PLAYERS** — In their seventh appearance at Tech the Kaleidoscope Players will open at 7:30 p.m. today in the Coronado Room of the Union. Pictured are Ben Zeller and Barbara Dekins who will be the cast of the two character play "Dear Liar."

## English prof receives theological study grant

Dr. Joseph J. Mogan, associate professor of English, has received a grant from the American Philosophical Society for a study of the theological controversy over free will and divine foreknowledge and its influence on secular literature of the 14th century.

Mogan received the grant in 1968 and is currently working on a report to be published in the American Philosophical Society

"Yearbook" in 1970.

The idea of divine foreknowledge, or predestination, appears often in the writings of Wyclif, Chaucer and Thomas U'sk. Mogan says the modern idea of predestination began with Saint Augustine in the 5th century and began to decline after the period of John Calvin.

Mogan specializes in the literature of the 14th century.

## Do you have to give up your identity to make it in a big corporation?

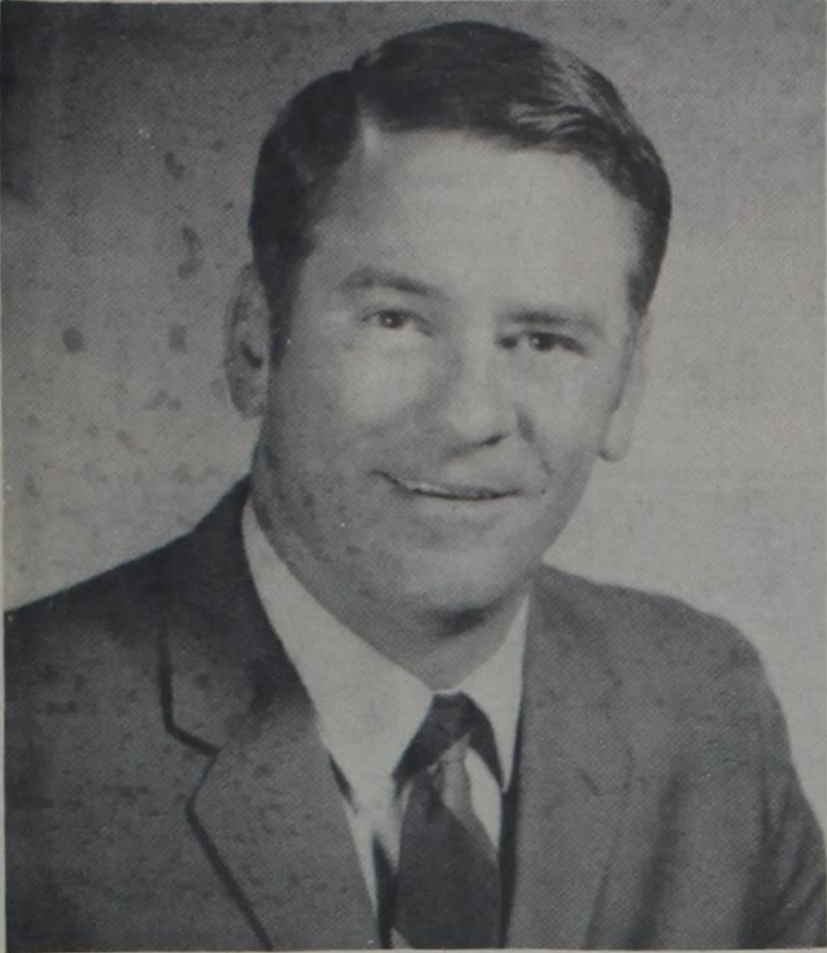

You've heard the stories: One big corporation forbids you to wear anything but white shirts. Another says it wants you to be "creative"—and gives you a 4-pound rule book telling you exactly how to do it. Yet another doesn't want you to buy a more expensive car than your boss because "it wouldn't look right!" Is this really happening in American business? Have companies become so rigid and fossilized that they're scared of people who don't fit the "norm"? Not this company. We are not hung up on trivia like that. The advances General Telephone & Electronics has made didn't come from people hiding behind organization charts and smiling at the right time. They came from people who used their brains: People who revolutionized picture-taking with the Sylvania flashcube, who developed the high-energy liquid laser, who came up with the sharpest color TV picture in the world, who pioneered instant electronic stock market quotations, and so on. We are looking for more people like this—people who aren't afraid to stand up and try themselves out. We are an equal opportunity employer: All you need to make it with us is a good head on your shoulders.

# Courtmen start practice; Bass meets Tech squad

**NEW COACH** — Bob Bass, head coach of the Tech basketball team, meets the Raider courtmen in workout for the first time today. Bass, who came to Tech from the Denver Rockets of the American Basketball Association, has seen his team only in films.

Under the new leadership of Coach Bob Bass, Tech starts fall basketball workouts today.

Bass, former coach of the Denver Rockets of the American Basketball Association, will greet eight returning lettermen. Also on hand will be four junior college transfers, four squadmen and two players from last year's freshman team.

Players are eager to start the workouts which are to run through the next seven weeks Bass said.

The first days will be spent on fundamentals and exploring the ability of individual players and then the team as a unit.

The returning starters are: guards Steve Williams (averaging 12.2 points per game) and Pat McKean (5.8); forwards Jerry Turner (9.7) and Steve Hardin (12.7). Also returning are lettermen Mike Oakes (6.0), Larry Wood (5.6) and Lee Tynes

(3.6). Four junior college candidates will join the squad this season. They are Greg Lowery (28.0) from Oklahoma Military Academy; Gene Knolle (26.0 and 19 rebounds) from Ranger Junior College; Steve Miller (10.0) from College of (10.0) from College of Southern Idaho; and Mike Boster from Shoreline Community College in Seattle, Washington.

Squadmen Dan Shelley, David Johnson, Roger France, and Jim Weathers will be on hand along with sophomores Jack Pierce and Mike Rogers.

"We will be small this season," said Bass, "but we could make up for it in speed and quickness. This will be my first time to look at the club; but from viewing the films, this is a hustling team."

Last season the Raiders were 11-13 for the season and 6-8 in Southwest Conference play.

## Optimistic spirit lingers from Red Raider victory

An air of optimism and spirit left from Saturday's win over A&M lingered over the Raider camp during yesterday's workouts, as J T King's Red Raiders prepared for their forthcoming encounter with Mississippi State.

"A win makes a lot of difference, especially if it's one of those rivalry games," commented King. "We had a pretty good workout, generally speaking, we had a lot hustle."

The Raiders focused their attention on two major weak points of the Tech game—quickness and endurance.

Tom Sawyer, senior quarterback, donned pads for the first time since the Kansas game in which he injured his knee. Sawyer was held out of contact drills, working primarily on strengthening his knee. King said that Sawyer should be able to see

limited action against SMU.

Jimmy Bennett, senior fullback, also saw limited action yesterday while recovering from a knee injury. Bennett is expected to be back to full speed by Saturday's meeting with Mississippi State.

King said of Mississippi State, "Our greatest problem will be stopping their offense. They have two good quarterbacks and one of the best split ends in the country."

## New York Mets take second

NEW YORK (AP) — The amazing New York Mets took another step toward their impossible dream Tuesday by stunning the favored Baltimore Orioles 5-0 for a 2-1 game lead in the 1969 baseball World Series.

The fourth game of the best-of-seven series will be played Wednesday afternoon at Shea Stadium, where a standing room crowd of 56,335 cheered on the Mets under partly cloudy skies and in warm temperature Tuesday.

Gary Gentry, 23, and Nolan Ryan, 22, each in their first World Series game, stopped the powerful American League champion Orioles on four singles and Gentry doubled in two runs for a 3-0 lead in the second inning.

But the real star was centerfielder Tommie Agee, the clutch player given much of the credit for the Mets rise from last place a year ago to the National League pennant this season.

Agee opened the game against Jim Palmer in the bottom of the

first inning with a home run for his first hit in the series, and then made sensational catches in the fourth and seventh innings that saved the day.

## Freshmen to try out

Candidates for this year's freshman basketball team are invited to work out in the men's gym today. Bob Bass, head Red Raider basketball coach, announced.

Bass said all candidates should bring their own equipment (including towels) to the men's gym at 6 p.m. today. Candidates also should bring their ACT or College Board scores, plus their rank in class.

Contact lenses are made of modern plastics which have entirely different characteristics than the tissues and fluids of the eye. Consequently your eye cannot handle this foreign object without help.

So, in order to correct for Mother Nature's lack of foresight, you have to use lens solutions to make your contacts and your eyes compatible.

There was a time when you needed two or more separate solutions to properly modify and care for your contacts, making them ready for your eyes. But now there's Lensine from the makers of Murine. Lensine, for contact comfort and convenience.

Lensine is the one solution for complete contact lens care. Just a drop or two of Lensine coats and lubricates your lens. This allows the lens to float more freely in the natural fluids of your eye. Why? Because Lensine is an "isotonic" solution, very much like your own tears. Lensine is compatible with the eye.

Cleaning your contacts with Lensine retards the build-up of foreign deposits on the lenses.

And soaking your contacts in Lensine between wearing periods assures you of proper lens hygiene. You get a free soaking-storage case with individual lens compartments on the bottom of every bottle of Lensine.

It has been demonstrated that improper storage between wearings permits the growth of bacteria on the lenses. This is a sure cause of eye irritation and, in some cases, can endanger your vision. Bacteria cannot grow in Lensine because it's sterile, self-sanitizing, and antiseptic.

Let caring for your contacts be as convenient as wearing them. Get some Lensine... Mother's little helper.

# Mother Nature never planned on contact lenses

## HE HAS ONLY ONE COAT!

That's right, it's warm in winter, hot in summer but of course it is very useful. We think he really doesn't care how he looks but we care how we look, or don't we? Doms Ltd. has coats and coats and more coats for you and it is getting fairly cold outside. Now, you don't want to wear the same coat all the time. Visit Doms Ltd. and see all of our single or double breasted sport coats, car coats, long coats, short coats, blazer coats, raincoats and coats and coats and more coats. C'mon! you know it, you really need more than just one coat.
