Annual Balfour Trophies Are Presented To Tech Band Fraternity And Sorority

Balfour awards were presented to Tech chapters Alpha Omicron of Kappa Kappa Psi and Beta of Tau Beta Sigma during a joint concert with the Lubbock High school and Tech concert bands Similay in the Senior high auditorium.

Threadured by Prof. D. O. Wiley, officers of the Alpha chapter of KKP at Oklahoma A & M in Still water presented the awards to Johnie Peebles, president of TBS, homorary band sorority, and Jim Wallace, president of KKP, homorary band fraternity. The officers were Keith Churchill, president; Charles Billingsly, vice president; John Bill Jones, secretary; Ted Merrick, treasurer.

Tech Campus Cancer Drive Continues; Student Booths Open Today In Dorms

The Cancer drive on Tech campus will continue through Saturday with donations being asked from faculty and students, announced Bill Whittington, chairman of the campus drive.

Faculty members are being contacted individually by members of the committee, said Whittington. Students may make their contributions at booths which will be open at noon today in each dormitory.

The following persons are in charge of contacting faculty members: Master Sgt. L. J. Roper, ROTC; Fred Mueller, Speech and Extension; Fenton Harding, Engineering; Dr. Roy Male, Library; Dr. Chester McKinney, Chemistry; Dr. Chester McKinney, Chemistry; Dr. Administration.

John Harding, second floor Administration.

Texas Technological College, Lubbock, Wednesday, April 25, 1951 No. 51 Vol. XXV

ROTC Rumors Prove Ungrounded

A Student council investigation committee reported Monday night "rumors" saying high pressure methods bad been ased by mili-tary science insructors in selling tickets for a recent Tech Military association dance, were "entirely ungrounded and untrue."

Business manager Bob Schmidt has announced that Thursday at 5 p.m. will be the deadline for campus organizations to submit requests to the council for allocations. After study of the various requests, the budget committee will draw up a proposed budget for the 1951-2 school year.

Headed by Bobby Garner, the committee interviewed a cross-section of military science students and insructors. In no case did they find evidence that students were "forced" to buy tickets or that threats of lower grades had been made.

made.

"The military science department and organizations within the department are to be commended for their wholehearted support of the college and their efforts to promote greater school spirit among ROTO cadets." Gener said.

Other business of the meeting, attended by newly elected representatives, included adoption of a proposal that next year's out-of-town game trip be made to Dallas September 29, when Tech will play Texas A&M.

Bob Schmidt reported that the

Texas A&M.

Bob Schmidt reported that the 1951-1952 budget will probably be brought before the council for approval at its next meeting.

Mary Byars Turner and Matina Zanga, who attended an International Foreign Students convention Friday and Saturday at the University of Texas, reported the proceedings of the meeting to the council and made recommendations for improving Tech's system of orientation for foreign students on the campus.

Juniors Will Meet Today For Discussion Of Prom

Bill Bales, president, has called a junior class meeting for 5 p. m. today in Ad 320 to discuss plans for the Junior-Senior prom May 12.

Committee reports will be given and all class members are urged to be present.

Engineering Show Called Success

relerates that it was really a success.

Attendance estimated at 11,000 is thought to be a new record. It beat last year's attendance mark which is believed to be the highest before this year.

Winning exhibits will be announced May 7. The prizes composed of a \$50 first prize, \$25 second prize and a plaque going to the first place winner, will be awarded to the exhibits deemed by the unknown judges to be most original and most appreciated by the public. Names of the judges will also be announced May 7.

"I would like to thank the college for its splendid cooperation," and Ramer. He added that it was through this cooperation that the show was a success.

TCC TO MEET TOMORROW

Tech Chamber of Commerce will meet at 7:30 p.m. tomor-row in C101 to elect officers for next year and to have the final vote on the constitution-al amendment affecting elec-tion of the club business man-ager.

KAM Show Sets **Entries Deadline**

Deadline for entries in the annual Kappa Alpha Mu print show is 5 p. in tomorrow. Prints can be turned in at 3711.

Entries will be judged Friday night by a committee, and will be hung Saturday in the Museum for an indefinite time.

Anyone enrolled in Tech is eligible to enter the national honorary photographic organization's show. Prints must be 8x10 inches or larger, mounted on 16x20 inch salon mounts.

Any number of pictures may be entered under news, feature, industrial or pictorial, according to Bill Weaks, club sponsor. Name and picture data should be on the back and title on the front. The picture must not have been made prior to Jan. 1, 1950 or entered in any KAM show before.

Los Cam Pledges Re-Paint Rec Hall; Adelphi To Do Green Room Saturday

Clubs which have not turned in dave a place to hold their activities when the Student Union building was a place to hold their activities when the Student Union building was in use," said Dick Gamble, Localier Agriculture; Mrs. Dick Richards, Gym; Whittington, Journalism. SOCIETY

Women's Social Clubs To Receive Panhellenic Representatives Tonight

By MARY ANNE KELLEY Toreador Staff Writer

"Most national sororities are anxious and eager to come in at Texas Tech if the social clubs here are interested," said Mrz. W. R. Anthony, representative of Lubbock Panhellenic.

Mrs. Anthony stated that no written rule has been found stating that national sororities are forbidden. If the administration is willing and the clubs are interested, the next step is for the clubs to petition the nationals, when added.

GIT YO' CANDLES, LADIES --- CAN'T SEE D'BOOKS 'TH OUT CANDLES

Let Us Have Light . . .

That time of the semester is fast approaching when students will be flocking to the Library as small, dark bodies of bugs gather around a light. But the situation will be in reverse if the lighting situation in the library remains the same. It will be as if large, light bodies are flocking to a huge, dark abyss.

Reflections from the whites of students' eyes almost give off more light than do the electrical appliances in the Library. Much research must necessarily be done within the Library, since reserve books cannot be taken from the building except at night. No wonder libraries have reputations for producing sleep, if they are all lighted as Tech's is. Even Kathleen Windsor's latest literary effort would have the effect of chloroform or a Brahm's lullabye if it were read under one of the Library lights.

The lights in some parts of the building make it almost impossible to ascertain the color of the book covers, much less whether the contents of the book deal with the Chinese dynasties or the cause of malnutrition in white rats.

Unless some sort of proper and adequate lighting is installed soon, it may become necessary for Tech to offer a course in braille and for the books on the shelves and in the stacks to be punched with the braille instead of printed in type that can't be seen anyway.

Help Conquer Cancer . . .

Help Conquer Cancer.

"Died: Mary Brown, age 21, recent graduate of Texas Tech, of cancer."

The notice in the obituary column did not read exactly as the above; her name wasn't Mary, and she died four years ago, But it illustrates how close cancer comes to the campus. Quick detection seems to be the most important factor in conquering cancer. But immediately after detection, treatment must take place. Today there are but three recognized methods of treatment: surgery, x-ray and radium. The American Cancer society is seeking funds this week to continue research—the research that may mean life to families or friends of Techsans.

Research is costly, but if even some of today's methods of cancer treatment had been known, Mary might be alive and one of Tech's active alumnae. When surgery is impossible, and x-ray and radium likewise, little hope is left for the cancer victim. Constant research will bring new treatments, but money is needed to speed that research.

Representatives of the American Cancer society are asking for donations today and for the rest of this week. Think of the funds that are needed to find cures for the disease that may affect the bloodstreams of a small child, the bone marrow of a teenager or the flesh of an adult. Think of Mary.

Dig deep and help the fund with a dime, quarter or dollar.

Four-Faced Womanhood
...

Have you noticed the haggard, worried look in a coed's eye recently? Well, maybe it's because she has found out about the publication of the Faculty Committee on Women's Education at Indiana university.

Not only must a woman be two-faced, she must be four-faced! According to a bulletin recently published by this committee, the college woman of today should educate herself to be all of the following: a woman of culture and charm; an intelligent leader in a democratic world; an efficient earner in her chosen field; the maker of a successful home.

In keeping with these four qualifications of an educated woman of today, a recent magazine says it makes true the famous wisecrack about a man's needing four wives—one to cook, one to keep house, one to take care of the children and one for social life.

Social life.

Tech's catalog just off the presses lists quite a number of professions which would enable a woman to earn a living. And almost any of the home economics courses could be construed to contribute toward making a successful home. But just where our coeds are to learn to be "women of culture and charm" and "an intelligent leader in a democratic world" isn't known. Now you see that the worried look on the coed's face comes from wondering how she is to achieve the charm and culture of a Madame Chiang, the democratic leadership of an Eleanor Roosevelt, the earning ability of a Clare Booth Luce and the homemaking ability of a Betty Crocker.

Wonder what it takes to be an educated man?

long ago the ultimate in contests for men with the "Ugly Men" contests, the ultimate of contests for tests, the ultimate of contests for women has just arrived at Souther ern Methodist university—Miss Rag Mop. This contest is not what most people would think of. The girls entered do not look like raginess. The ragmop-theme comes from the old clothes the girls and their clubs contribute to the Y's annual old clothes drive.

Students in a clinical chemistry felass at Hardin-Simmons university are operating a free blood typing service offered to students. A small sample of blood is taken and in 24 hours a neatly typed card is returned, bearing the correct

West Of College Avenue

Good Profs Can't Be Judged By Set List Of Standards

Sarnard Pickel, dean of women at Jolumbia university.
Good professors must meet two essential requirements, she said. Superior intelligence and the temperament of a scholar are those essentials. She scoffs at the list of "essentials" re-recently compiled by an investigator, who believed in teacher training for professors. According to the investigator, the "ideal" professor is and does the following:

1. Inspires students to think for hemselves and to express their went ideas sincerely.

2. Is emotionally stable and maure.

e.

Has an infectious enthusiasm teaching that inspires students want to teach.

Is friendly, democratic, toler-

ant and helpful in his relations with his students.

5. Understands the problems most often met by college students in their work.

6. Organizes materials and prepares carefully for each meeting with class.

7. Regards himself as primarily a college teacher, rather than as a subject-matter specialist.

8. Takes broad, rather than departmental, views of education.

9. Leads students to take responsibility for planning and checking their own progress.

10. His behaviour reflects high ideals.

One by one Mrs. Pickel takes up the 10 qualifications the investigator prepared. Her thesis, and we agree with her, is that knowing his subject matter is the prime qualification of a good professor.

What help would teacher

What help would teacher training be in inspiring stu-dents to think for themselves? And why must a good profes-sor be emotionally stable? Mrs. Pickel points to her fav-

PAT'S PATTERS

The change will give Tech women more individual responsibility and freedom in regards to dormitory regulations. Members of the enew governing boards will be students elected by other students and will represent a definite group of women much as House of Representatives personnel are choices of persons in a definite district.

A hand of applause should be given to those who have brought about the change and a hope expressed that women will not abuse their new-found privilege.

After commending such a plan, we hate to toss a brick-bat, but was the dormitory women convocation Wednesday night necessary? It seems to us the plan could easily be explained to the women in dorm or wing meetings after closing hours.

The night of the convocation an outstanding speaker appeared on the college Rec hall lecture series. His audience was very small and composed mainly of faculty members.

composed mainly of latering beers.

Maybe the women would not have gone to the lecture, but forced convocation attendance could have killed any incentive to attend such a fine lecture.

* * * *
Velled reference—a remark
to a member of our staff by a

Although colleges throughout this part of the country reached long ago the ultimate in contests

colleague on the local dally newspaper, "I hear they pulled a La Prensa on you."

Something-to-think-about department—a small Panhandle town is now in the midst of a scandal. It seems the local school board found out how the high school ouperintendent voted in a recent school board election. As the individual's ballot was cast against candidates the board was running, they promptly made plans to fire him.

they promptly made plans to the him.

The superintendent learned of the plans and in order to save face resigned from his position.

Two questions might be asked, "How did the school government learn of the individual's move against them?" and "What right did they have to fire him?"

Morale of this small tale is two-fold: To those in positions of authority, the public usually finds out about any underhanded work you are doing.

The different we paraphrase

ut about any underhanded wor ou are doing.

To citzens we paraphrase the words of Frank Dennis, as-sistant managing editor of The Washington Post, "The govern-ed has always got to keep it's eye on government because dirty work may be afoot at anytime."

anytime."

Pat Findley, junior home economics student, brings us a report of last Wednesday's suggested experiment. Of 12 Techsans she interviewed, five knew who both of their Senatorial representatives were, two knew the name of one and four didn't know either. About The Campuses

olood type.

orite professor who was very unstable. To be in touch with movable and shakable persons may change one's whole life, she says in defense of the un-stable.

stable.

As to qualifications No. 3, she ays, "Is it possible that professors should make their students rant to learn?" If a professor is appy in learning and teaching, ne natural course of events will ause his students to be inspired to do the same.

the natural course or events will cause his students to be inspired to do the same.

Instructors need not knock themselves out being friendly, unless they are naturally disposed to do so. She says her favorite prof, as he walked about the campus, was doing something more important than taking off hi shat; he was thinking under it.

And why shouldn't profs think their subject is all-important? Highly intelligent men, highly educated, know the world of which their prized subject is a fragment. But their intense interest in their own course is what fires students with enthusiasm to learn. You can be sure that the prof who gets so interested that he lectures overtime is probably well-informed and interested in his subject.

Giving an extreme case, the author tells of a teacher who dealt severely (and justly, she says) with a veteran who wanted to teach mathematics. After class the vet went to the teafner and said that he knew how to solve problems but he didn't understand the principles behind them. Instead of heping them, the professor said, "Oh, go away, don't bother me; I'm sleepy."

What a wise professor, the student had, Mrs. Pickel says, to 50

"Oh, go away, don't bother me; I'm sleepy."
What a wise professor, the student had, Mrs. Pickel says, to go to sleep instead of encouraging the man to try to be a professor of mathematics when he obv'ously had no mathematical bent.
Often the hard teachers are quickly judged as bad professors. But good professors give students glimpses into Promised Lands which they can never enter.
If those professors who pride themselves on their "snap" courses could hear students talk about them, they would shrink. As would the jovial, joke-cracking species who try to stay away from their subject, which they obviously don't know or don't like.
No, teacher training for colleges seems to be entirely superfluous.

toreador

THE TOREADOR, student newspaper of "exas Technological college, is published every Wednesday and Saturday on the Campus of Texas Technological college at Lubbock by the associated student of the college.

blood type.

About 50 or 60 students at Texas Western college staged a silent protest against the dormitory food recently and refused to enter the hall. Most of the participants in the strike were co-eds. A call was issued to the men at the college to refrain from eating, but the males chose to ignore it. The Prospector, college newspaper, says the strike was "foolish" and did not produce any "tangible results."

The Daily Texan of Texas university has decided that the punishment for small offenses today is indeed minor in comparison with the penalties of bygone days. A lad attending a prominent Mexican school in the middle 1800's had one unexcused absence and was suspended from school for 30 days. SUE HOLMES EDITOR

Democratic Campus Club

'Thankless' Organization Plans Baseball Diamond

By BERNA BARTLETT
Toreador Staff Writer
Tech is in line for a \$6,000 base-all diamond next fall—thanks to the efforts of an organization thich heretofore has been rather hankless.

the efforts of an organization which heretofore has been rather thankless.

The Tech Chamber of Commerce, possibly the most democratic club on the campus, (anyone paying the \$1 membership fee is automatically a member) is sponsoring and paying for the baseball diamond, complete with underground wiring. Construction is slated to begin immediately after this semester.

Originally the Business Ad club, the Chamber of Commerce changed to its present status and title in September, 1945. At that time members celebrated with a 2,000-pound watermelon feast. That's a lot of watermelon put the organization is planning on having more than 2,000 watermelons-pounds worth of members next fall.

Freshmen may or may not have seen Tech's movie, "Butures Unimited," tilmed by the TCC to give an inside view of social educational and religious advantages of Tech. This film, under auspices of the Tech Chamber of Commerce, is to be sent to outlying high schools and communities all over West Texas.

"Our whole purpose is to push Tech to the best of our ability," announced TCC president C h i p Wadley.

Plans for next year-include the acquisition of flashcards to be used by the student body at football games, said Frank Austin, See THANKLESS Page 8

Gridders Split For Roundup Game

received topins to the first four finishers in each event received ribbons. But by and large, most of the boys went home with little more than a pleasant day to remember. They'll be back next year, though, And it will probably be a better meet next year, It was better this year than last.

year. It was better this year than last.

We mentioned records being broken. Some of the times and distances which are the record here are slower than they are down state. The altitude makes the difference, for one thing. There is more oxygen as the state gets low-er. Too, track is an older sport in older sections of the state. Also, the weather permits longer periods of workout, often uninterrupted by inclement weather.

Each year the records drop a little lower at the Region I meet. What does that prove? Well, for one thing it shows that the schools are taking more interest in track and are giving their athletes more adequate coaching and workout facilities. Still, in most schools, especially the smaller ones, the situation is very much make-shift.

shift.

In the larger schools, good coaches are often handicapped by poor tracks. Lack of funds is a common complaint. But it is all improving. And as it does, track at the area's colleges should im-

If track at Tech doesn't improve, it will be no one's fault but the people who support athletics at Tech. All the Southwest conference schools and a great many other schools and a great many other schools are as fervent in their recruiting of track talent as they are with football players. Consequently, most any school in Texas can run circles around Tech. We intend by no means to discredit the coach and present members of the Raider cinder squad. They work hard and are a credit to the school, That doesn't change the overall to the school. That doesn't change the overall college program in its entirety. Approgram which builds only one sport and neglects the others, at least to us, falls considerably short of that goal.

Once again it is time to congratulate Paul Nolen, Tech's lengthy center. Paul received last to the school, That doesn't change the overall college program in its entirety. Approgram which builds only one sport and neglects the others, at the program of the program o

The fans of the area have shown their interest in the new program through financial contribution. We feel that they will be getting a sad bargain and will be sorely disappointed if they get nothing but a good football team for it.

We know it takes time

competition in Border conference play next year.

In a good football team for it.

We know it takes time to set up a good, well-rounded program.

We are not complaining at anyone, nor are we, as one of our crities put it, trying to belittle football in any way. We merely feel that in order for the opportunity which is at hand to be utilized to the fullest, all students and interested

O'Grady will be halfbacking for the Red team during the evening.

During the halftime, the Lubbock Sheriff's Possee will stage a pageant, featuring western music and scenery, around the theme of a roundup camp. Music during the game itself will be furnished by the Tech band under the direction of Joe Haddon.

Members of the Raider Red team are: quarterbacks Ju nr 10 or Arterburn and Moe Turner; half-backs Miller, Don Lewis, Jerry Fairley, Bill O'Grady, Norman Jones, Frank Graves, Garry Boyer, and Denton Lambert.

Fulbacks Andy Gardenhire and Don Douglas; centers Aubrey Phillips and Doug Weinke; guards Gerald Smith, Eddie Hodges, Jack Cockburn, and Buddy Barron; lackles Gene Hammill, Raymond Mitcham, David Brown, and Billy Leasure; ends Maurice Mullins, Garnett Reeves, Richard Jackson, and Lewis Crossley.

Members of the Raider White team are: John Moughon, Lee Erwin, and Johnson, quarterbacks; Walker and Sandy Welton, full-backs; halfbacks Bobby Close, Bobby Cavazos, Charlie Williams, Jim Turner, Don Raybourn, John Thompson, Gene Doss, and Bobby Clarke; centers John Paul Jones, Arnold Ratheal, and Pat Patterson.

Guards Vernon Whittaker, Carl Williams, J. J. Barlow and Hollic Davis; Joe Taylor, Jerrell Price, Arnold Ratheal, and Pat Patterson.

Guards Vernon Whittaker, Carl Williams, J. J. Barlow and Hollic Davis; Joe Taylor, Jerrell Price, Richard Dake, and Marland Ribble, tackles; ends William Sharpley, Gayland Walker, Paul Erwin, and Billy Wright.

short of that goal.

We intend by no means to discredit the coach and present members of the Raider cinder squad. They work hard and are a credit to the school.

That doesn't change the overall picture, however. Track, goff, tennis, swimming, and even basketh ball at times, are, or at least in the past have been, slighted.

Now Tech is in a position to bailed a complete, well rounded athletic program. The football outlook is the best in years. The coaching staff is excellent, the capable hands of Polk Robison should go far.

The fans of the

SPORTS QUIZ

By JOHN LEE

(Answer to last week's cartoon.)

LAST WEEK'S QUESTION: What Tech grid great scored 10 points in the last 15 seconds of play to send his team to the Cot-ton Bowl?

play to send his team to the Cotton Bow!?

ANSWER: Tech was playing its
last game of the regular season.
All over the state was heard the
cry. "Tech for the Cotton Bowl."
This was the 19th of November,
the opponent was New Mexico.
Much to the surprise of everyone,
the New Mexico eleven held the
Tech team to a 7-7 deadlock. Then
with 15 seconds lett, fullback Jodie Marck kicked a field-goal, After the kick-off, New Mexico threw
a desperation pass which was intercepted by Marck and run back
for a tonchdown. He then kicked
the extra point to bring his 15second total to 10 points. And
Tech was Cotton Bowl bound.

MICC League

The schedule for the men's social club league of intramural softball has been completed. Every team will play every oth-er team in the league once. The team losing the least number of games during league play will be de

declared victor.

The schedule is as follows—May 1—Centaurs vs, Wranglers, College Club vs. Los Cams, Kemas vs. Adelphi, Socii vs. Silver Key; May 2—Centaur vs. College Club, Kemas vs. Wranglers, Socii vs. Los Cams, Silver Key vs. Adelphi; May 3—Centaur vs. Kemas, Socii vs. College Club, Silver Key vs. Wranglers, Adelphi vs. Los Cams.

May 4—Centaur vs. Socii, Silver

vs. Socii, College Club vs. Kei May 9-Centaur vs. Los C Wranglers vs. Adelphi, Col Club vs. Silver Key, Kemas vs. cil.

In Saturday Border Conference Tourney

Tech's 4-man fencing team won first place honors in the Second Border Invitational Fencing tournament Saturday at El Paso in the Community Youth Center gym. Travis Smith, Bill Spinks, Don Olsen and Max Preston were the local team. Tech also placed first in last year's contest.

Other teams in the meet were University of Arizona, Tuscon YMCA, and an El Paso independent team.

Tech fought all three teams with all three weapons; The scores, with Tech's first, were:

	Foil	Epee	Sabre
U of Arizona	5-4	4-5	6-3
Tuscon YMCA	7-2	4-5	732
El Paso	9-0	5-4	8-1

Tech was presented with cups for first-place foil and first-place sabre, and a trophy for winning the tournament. On May 12 the same team will represent North Texas in the sectional finals at Dallas.

By coming through the regular season undefeated, Kemas is the favorite in the MICC play-offs.

The four teams gaining play-off borths were Kemas, Wranglers, Silver Key and College Club.

Silver Key and College Club.

Winners of the first round of the play-offs will meet to decide the league championship tomorow night. Wranglers and Kemas were matched and Silver Key played College Club to round out the semifinals last night.

The team winning first place honors in the league will gain the right to meet the Cherry Pluckers

Annual High School Judging Contest Set Saturday; 1,500 Students Expected

The twenty-third annual judging contest for high school vocational agriculture students will be held on the Tech campus Saturday, announced Ray Chappelle, general superintendent.

Approximately 1,500 vocational agriculture students and teachers are expected for the event with entries from 125 schools, said Chappelle.

Junior and senior students in Tech's agriculture department will act as sectional leaders and superintendents for the contests.

Deadline for entering the event is Wellowshop and heads of each include: is Welnesday. W. L. Stangel, dean of agriculture, will preside over the contests.

Raider Tankers Even Score With Odessa Wranglers

A Crossley jr., Teek graduate student who will receive a master's degree in entomology in June, Mrs. Crossley said. Selecting the Kansas award. Crossley plans to work there on an entomological chigger behavior as a manufacture of the control of the service or an entomological chigger on the species of nasal mite while doing research work with pigeons here. The entomological word a paper on the species which appeared in the Proceedings of the Entomological society in Washington, D. C.

Thankless—

publicity director. So far, the TCC has had bad luck with this venture, as an additional \$1.300 is needed for the budget.

"We hope to have that worked out by next year," Austin optimistically explained. Christmas decorations for the campus will be sponsored by this service organization just as they save been each year as well as the \$25 prize for the best dormitory decoration, Austin continued, but a larger membership and more student interest and support is on the 1951-52 agenda.

"We'll get more members if we have to start serving refreshments at meetings," he concluded.
