## Tech Selected As Army Training Site September Will See 2200 Men Here

### Exes In Service To Be Annual Feature

Students Asked For Names Of Techsans Not On Honor Roll

THE 1943 issue of La Ventana will do honor to Texas Tech graduates and other ex-students serving their country at home and abroad in the Army, Navy, Marines, Coast Guard, WAACs, WAVES, SPARS and other service organizations.

Kara Hunsucker, editor of the yearbook, announced this week names of all former students which can be obtained will be published in the annual. She urged all persons, including students, faculty and friends of Texas Tech, to send her the names of all ex-students they know who are in the armed forces.

"It is not necessary we have the home addresses or service addresses of the men and women," Miss Hunsucker said. "But we do want as complete a list of names as is possible. We want to slight no one and are anxious to honor everyone who is in service."

The Tech Alumni association has kept a card index of servicemen and servicewomen since the outbreak of the war. The college also has compiled a list and has it posted in the sallopp of the Administration building. However, neither group feels the list is at all complete, since former Techsans are joining the armed forces daily and many of them, long since departed from Texas, have not kept contacts with the college sufficiently to permit listing.

The list already contains more than 2,000 names, Edwin Settle, secretary of the Alumni association, states, and is changing from day to day.

Hunsucker said eight pages of La Ventana for 1943 will be devoted to listing of the men and women in service, with no effort to tabulate addresses because of the constantly changing conditions.

She asked names of ex-students now in service be left with a member of the La Ventana staff or at the Alumni and Ex-Students office on or before Wednesday, February 17, when the list will be compiled. Persons unable to bring the names in person to La Ventana or the Alumni office are asked to mail the names to either organization immediately.

"These eight pages of names of the men and women of Texas Tech who are serving the nation in the armed forces are expected to be considerable," Hunsucker said. "It is the purpose of the staff to make this wartime yearbook a record for the years to come of those at Tech and those who have been here. Because the former Techsans now on interest in the battlefields or in training have performed a great service, not only to the nation but to the college, we wish in some small way, to pay them honor in every way we can."

### ESMWT Sponsors Radio Course To Be Under Bullen

A course in Radio Engineering Fundamentals (Pre-Radar) under the ESMWT is to start on Texas Tech campus Feb. 18. Prof. C. V. Bullen is educational supervisor with Kenneth Dowell as his assistant.

The students taking this course are employees of the Army Signal Corps and are being sent to Lubbock on a civilian basis.

The course is to upgrade radio technician trainees, both men and women so they may satisfactorily meet advanced requirements in the Signal Corps Service. To enroll a person must have successfully completed the Radio Technician trainee course or be a high school graduate and able to pass the selective test satisfactorily.

The course lasts 12 weeks, 48 hours each week with some time spent in outside preparation.

A complete new laboratory and office space is being equipped in the basement of the engineering building to take care of the course.

### Arizona State Is Teaching Studes Use Of Nature

One of the most important educational developments at Arizona State Teachers college in recent years is a long-range conservation program carried on in the training school and throughout the college.

Instigated in 1937, the program is designed to teach men to make the best possible use of the many natural resources of this country.

A better situation for such a program could hardly have been found. Student teachers and children from the training school have as their laboratory one of the largest Ponderosa pine forests in the world, vast areas of grazing and fertile farming lands. In addition, Arizona has an important system of conservation dams and irrigation canals. Mining is one of the chief industries, and there are many reforestation centers, reclamation projects and mining bureaus.

With this background, and believing that conservation is essentially an education program, the college pioneered in offering in 1937 a course for teachers in soil and water conservation, in developing the next year a conservation unit for the second grade, and in 1939 in offering a course for teachers in forest land use.

The courses were developed in close cooperation with the forest service and the soil conservation service, with lectures by experts and field members in these services.

During the last two years the whole program has been continued by bulletins and lectures to teachers in the southwest and an exchange of ideas through correspondence by elementary teachers of the region.

Results of the program so far have been highly successful in arousing in the college students an understanding of the need for conservation and a desire to learn all aspects of the problem to take into the teaching field. (ACP.)

### Geological Award Receiver To Be Named In Future

The student who is to receive the annual West Texas Geological Society award will be selected in the near future, however, it will not be announced until commencement. Each year this award is given to an outstanding June or August graduate with a B. S. in geology, or petroleum engineering with geology option.

The award consists of a two-year paid associate membership in the American Association of Petroleum Geologists, one of the largest societies of this type in the world. Also, a short sketch of the winner's life and his picture is published in the official bulletin of the association.

The person is to be chosen by a committee of six whose qualifications are laid down by the West Texas Geological Society. They are: Dr. Patton, head of the geology department; Dr. M. A. Stainbrook, geology professor; Dr. W. I. Robinson, associate professor of Geology; Godfrey Cadra, member of the Society of Petroleum Geologists and Engineers; Thurman Pinkerton, member of Sigma Gamma Epsilon; and J. H. Chanin, member of neither of these organizations.

The award is made on a five point basis: scholarship, general ability, initiative, personality, and quality as an associate member.

The award last year went to Charles Renfro of Lubbock.

### Dean Mary W. Doak Named To Advise WAAC At Tech

Dean of Women, Mrs. Mary W. Doak, has been appointed faculty advisor for the Womens Army Auxiliary Corps for Texas Tech. The appointment was made by President Clifford B. Jones on authorization by the Director of WAAC, War Department, Washington.

Dean Doak's duties in this capacity will be to distribute information to the faculty concerning the WAAC organization.

### War Encourages Model Airplane Builders At Tech

The present war has given model aircraft builders numerous new types of planes to construct. In the schools throughout the nation young men are building models of the up-to-date combat planes. This conception is most noticeable on the Tech Campus in Sneed Hall, where at least seven men have models under construction.

They are Frank Pool, Curtis P-40; Bob Hayes, B-25; Ed Hart Rankin, Curtis P-40; Olin Sparks, P-38; George Richards, Messerschmitt; Jack Graham, P-38; and Glenn Johnson, Douglas Dive Bomber. Work is taken up at every spare moment, and it continues late into the night. The boys help each other and are enthusiastic in their work. Sandpapering, shaving cutting of Balsa wood keeps the freshmen busy cleaning out rooms.

These models can be used by the government for study, experimentation, and instruction. They are practically all that the pre-flight student sees in his courses that resembles an airplane, and flight instructors use them extensively in teaching.

### Reservists Given Nod For Transfer

Unassigned Enlisted Reservists enrolled in colleges as Juniors or seniors with major study in electrical engineering or electronic physics may now transfer to the Electronics Training Group, Office of the Chief Signal Officer, Dr. H. L. Kent, administrative assistant, made known today.

Those unassigned reservists who can qualify academically and desirous to transfer to the Electronics Training Group may secure application forms for such transfer at the office of Dr. Kent, room 215 Administration Building.

Students in advanced courses of ROTC are not eligible for transfer to this group. This transfer of unassigned reservists is to be entirely voluntary and merely an opportunity for unassigned reservists to choose the Signal Corps as a particular branch of service in which they prefer to serve.

### 55 Tech Girls Pledge To Five Women's Clubs

Fifty-five Tech coeds wore corsages designating them as spring semester pledges to the five girls' social clubs on the campus Tuesday.

Ko Shari pledges, who wore white carnations tied with turquoise and silver ribbons, are Alice Bell, Margie Hackbart, Betty Huckabee, Helen Mixon, Selma Mullins, Ganelle Patty, Pat Rawlins, Nelle Reach, Nancy Rozelle, Nell Stanford, Betty Steele, Mary Louise Vernon, Mary Jean Webb, Shirley Womack and Francine Young.

Thirteen DFD pledges, who wore Pernet roses, are Betty Ballard, Sue Cooke, Ruth Cockerham, Betty Davis, Joy Dodge, Merly Johnson, Maxine McAllister, Rita Mooney, Kathleen Palmer, Merrilyn Snider, Mary Krin Watson and Melba Welch.

Pledges to Las Vivaranchas club were Colleen Allen, Irma Bugh, Sarah Davidson, Rachel Ireland, Alice Johnson, Mary McKenney, Audrey Milton, Evelyn Meyers, Maxine Poe, Corinna Scroggins, and Joy Stanley. They wore corsages of white carnations tied with purple ribbon.

Las Chaparritas pledges, wearing sweetheart roses, are Edyle Hill, Margie Gerber, Mary Helen Pirtle, Wilma Robertson, Margaret Keene, Lucille Rowland, Joyce Rives, Earlyne Reid, Donella Bucy, Mary Wells and Madelyn Weath.

Sans Soule pledges, who wore white roses tied with gold and white ribbon, are Frances Crowther, Diana Defee, Mary Lou Gobeber, Elizabeth Hurlbert, and Louise Ince.

### Photography Class Shows Pictures Taken In Fall

A group of pictures taken, developed, enlarged, and printed by the members of fall semester journalism photography class are on exhibit this week in the front hall on the first floor of the press building.

Photographs on display are representative of the class's work. Unassigned class members did all the necessary laboratory work in connection with making the pictures. Subjects include college life, buildings, live stock, pets, characters, studies, and commercial shots.

Each of the 20 members of the class turned in pictures on the above subjects and also shots of babies and pictures with a defense theme.

### Navy Takes Cook And Cox As Material Inspectors

Olene Cook and Louise Cox, February graduates in Clothing and Textiles in the Home Economics division, have accepted appointments as junior inspectors of Navy material in the Navy.

Miss Cook is stationed in Denison and Miss Cox is in Taylor. They are working in the Office of Resident Inspectors of Naval Materials, United States Navy.

### Gift Collection Of 58 Pictures Now On Display

Replica Of Fan Of Marie Antoinette In Museum Exhibit

American Landscape, a picture by George Inness (1868) is the most outstanding picture in an imposing group of 58 which will be on display at the West Texas Museum on the campus throughout the month of February.

The 58 pictures are in a famous gift collection, Texas Tech as a member of the American Federation of Arts, now has the collection for display.

Little Girls At School by Francis Bonvin is a study on a quiet scene in a convent and the gentle people who lived there.

Bonvin was a French "little master" of the period of Corot and Millet, and was completely touched by the revolutionary movements which occurred in France during his life-time. This painting is typical of his works of still life and interiors with subdued lights and shadows.

Members and contributors are urged to attend the exhibit and express their opinion as to which ones shall be purchased.

From local collectors on the South Plains has been gathered another interesting and rather unusual collection of relics which should interest museum guests.

A collection of fans and shawls was placed on display in the West Texas Museum the first part of this week. The items being shown were loaned by local collectors.

The display of fans includes some Chinese fans of the type used in the 1st century A. D. Both Chinese men and women used beautifully painted and embroidered fans as part of their costumes.

Several black lace fans represent the 18th century when Marie Antoinette, as Queen of France, used a fan to hide her ugly teeth. After this time women of both the new and old world continued to use the fan as part of their costumes until World War I and the advent of the "Jazz Age."

Some of the most unusual fans are the ostrich feather fan with carved ebony sticks of the type used in the gay nineties, "fobs" fan which was used by men in England in 1800, and a courting fan used by a swain to fan his lady. A Chinese fan used by servants to fan their mistresses has a span of almost four feet.

The display of shawls includes paisley shawls which were woven on hand looms in Scotland between 1820 and 1870 and a hand embroidered and fringed silk shawl made in Venice, Italy.

The specimens represent Spain, Czechoslovakia, China, France, Mexico, America, England, Italy, Scotland, the Louisiana Creoles and the Indians.

### New Mexico Is Convention Host

S. S. McKay, professor of history, has recently been appointed by President Clifford B. Jones to represent Texas Tech as official delegate to the first South West Conference on post war reconstruction problems.

Prof. McKay will leave today for the University of New Mexico for the conference of faculty and students to be held there Feb. 11-13. Texas, New Mexico, Arizona and Colorado will be represented and eight nationally known figures will act as principal speakers. Among these are Mrs. Eleanor Roosevelt and United States Senator from Pennsylvania.

Topics to be discussed at this convention are problems of post war students, problems of post war soldiers, political problems after the war, post war economic problems and social conditions after the war. Prof. McKay has been chosen to speak on Post War Political Problems.

### Engineers Elect Spring Officers

Spring semester officers were elected at a meeting of the Tech Engineering Society Monday night. President of the society is Houston Schweitzer.

New officers elected are: vice-president, George Acton; treasurer, Jesse May; Secretary, Charles Epplein. Speakers for the engineering banquet are: freshman representative, Olin Sparks; sophomore representative, Bob Slater; junior representative Creed Coffee; and senior representative, Harlan Dowell.

Plans for the seventeenth annual engineering banquet were discussed. It is to be held in women's dorm No. 2, on March 6, Col. Henry A. Finch, commanding officer at Camp Barkley, Abilene, will be the principal speaker. Members of the engineering society and dates are invited to the semi-formal banquet.

### Elementary Food Course Not To Be Offered Unless More Girls Enroll In Class

Unless more girls sign up for the elementary course in meal planning and table service it can not be offered, according to Miss Margaret W. Weeks, dean of the Home Economics school.

This course is being offered for non-home economics students and can be taken without any prerequisites.

Classes meet from two to four on Thursday, and two to five on Tuesday with Miss Mayme Twyford, associate professor of foods and nutrition, instructing.

This course has not been offered the past two years, but it was felt many girls in other divisions might be interested in a basic course of this sort.

Reward for the best essay will be a medal presented by the club. All copy must be turned into the club by April 1 to give sufficient time for judging before the close of the spring semester.

The committee to judge the copy will consist of the faculty members of the department of journalism. They are Prof. Cecil Horne, head of the department; Mrs. Louise C. Allen, assistant professor and sponsor of Theta Sigma Phi; and Clark H. Schooley, assistant professor of journalism.

### Residents Of Womens Dorm Hold Meeting Mon. Night

Members of Women's Dorm I met in the lounge of the dorm Monday night for the first house meeting this semester. Elections were held to fill vacancies made by students who graduated at mid-term and those who failed to return to school.

Nancy Binford was elected vice-president to replace Rose Marie Martin; Ruth Connelly, secretary to succeed Frances Graves; and Lucy Jean Coates, freshman representative to fill the vacancy left by Shirley Slaughter.

Senior students living in the dorm remained after the house meeting to discuss the problem of senior privileges.

### Dorms Not To Be Occupied Until Contracts Signed

Much speculation has been offered on the campus as to when boys will have to move out of the dormitories, in order to make room for the soldiers who will be trained in Texas Tech.

H. L. Kent points out that the college authorities have no idea when the students will be moved and that they are reasonably sure that it will not be in the near future.

It is certain that no units will be sent until after the War Department makes a contract with the college. This will take time because a large number of colleges have been included in the new program. The Army will have to induct a number of men that are in the age group, and give the new men screen tests to determine their ability. Their educational advancement will be considered. The men will be segregated according to their individual qualifications.

Dr. Kent says that the two major problems: that of making contracts with the colleges, and that of testing the inductees, make it safe to assume that it will be months before the program can be undertaken.

### Phi Upsilon To Make 2400 Masks

Phi Upsilon Omicron is sponsoring the making of surgical masks for the Red Cross, every Monday, Wednesday, and Friday afternoons from two to five and Wednesday nights from seven to ten in annex E of the home economics building.

Phi U. offered to make 2400 for the Red Cross and they are to be finished as soon as possible. 100 masks must be completed this week.

Each afternoon 24 girls can be used. White uniforms or cotton dresses, and a yard square of white wash material are required for the lab. All girls are eligible for this volunteer work.

Erlene Dowell is chairman of the committee.

### W. P. Clement Is On Committee

W. P. Clement, registrar, has recently been appointed by President Clifford B. Jones to act as institutional representative of Texas Tech on the State Committee on Classification and Accreditation of High Schools. The position was formerly occupied by the late A. W. Evans.

The committee meets once a year with high school supervisors in a discussion of subjects to be taught in the various high schools. The courses are approved by college officials participating at these meetings.

### Founders Day To Be Celebrated

An after dinner tea will mark Founders Day of the Omega chapter of Phi Upsilon Omicron, Feb. 10, 7:30 p.m. in the home of Misses Margaret W. Weeks and Mable Erwin.

Miss Erwin will talk on the standards of Phi U. members, and Miss Frances Urban will give a history of the organization.

Invitations have been sent to 28 alumni and honorary members.

Texas Tech was the first school in Texas to get a chapter of this national society. The Omega chapter was founded in 1937.

### Miller Visiting Campus On Seed Business Today

Mr. R. V. Miller, chief of the Field Seed Certification board located in Austin is attending business concerning seed certification for the state on the campus today.

With him is Mr. Linden Jones who is in charge of the state seed testing laboratory in Austin. He is visiting the branch laboratory here.

### College To Serve Dual Role As Civilians, Cadets Train

By MARY SMITH  
Treador Staff Writer

### Engineers Add New Machines To Their Equipment

Several new machines have been added to the textile department and some of the old machines are being converted into modern machinery.

The new equipment includes a combing machine for long staple cotton. Finer threads can be made from long cotton.

Prof. L. E. Parsons, head of the textile department, states that it is possibly the only combing machine of this type west of the Mississippi, and it is the only one in the State of Texas.

One of the roving machines is being converted into a modern long-draft roving machine. This makes a complete long-draft spinning system. A rotoconer has been added which winds combs of yarn, and a creel which simplifies warp making.

Several new testing machines have also been added. They include: a fade-ometer which tests the fastness of color in a garment to sunlight, a launder-ometer for testing the fastness of a sample to laundering and the amount of shrinkage, and an abrasion tester which in some cases can indicate the wear of a garment. On this machine four samples can be tested at once.

### Phi Upsilon To Make 2400 Masks

Phi Upsilon Omicron is sponsoring the making of surgical masks for the Red Cross, every Monday, Wednesday, and Friday afternoons from two to five and Wednesday nights from seven to ten in annex E of the home economics building.

Phi U. offered to make 2400 for the Red Cross and they are to be finished as soon as possible. 100 masks must be completed this week.

Each afternoon 24 girls can be used. White uniforms or cotton dresses, and a yard square of white wash material are required for the lab. All girls are eligible for this volunteer work.

Erlene Dowell is chairman of the committee.

### Home Demonstration Agts. Of District To Meet Here

Home Demonstration Agents of this district will meet in the Home Economics building Monday at 10:30 a.m. for a Home Improvement School.

Miss Kate Adell Hill, district agent and Mrs. Bunice Clayton, specialist in home improvement of extension service, will conduct the courses. Miss Mabel Erwin, head of clothing and textile department, will assist with lectures and demonstrations.

The school will be concluded Wednesday afternoon.

### College Calendar

Wednesday, February 10	Last day to register or add a course
Thursday, February 11	Social Clubs Colloquium, C101 AWS, 5, 220 Student Council, 7:15, 210 Senate, 7:45, 221

## Red Raiders To Clash With Tall Team Friday Night

### Bufs Favored In Week-end's Games

#### West Texas State Meets Tech For Third Time This Season

ON FRIDAY and Saturday nights of this week, a Texas Tech Red Raider team will take to the hardwood floor to try and even a score with the West Texas State Buffaloes. The "tallest team" recently played host to the Lubbock quintet, and defeated them in two games of a series. This week-end will see a Raider team that has been victorious in a majority of its games, since meeting the Buffs on their home court, take to the floor with a determination to avenge the losses sustained at Canyon a few weeks back.

In the opening game of the Canyon series, the Raider five was too eager, and before the half ended, the entire starting five had fouled out of the game. With second string men playing the remaining twenty minutes, the Raiders dropped the game 78 to 61.

The following night, the visitors again tasted defeat at the hands of the Border Conference champions. Height proved to be more than the Raiders could conquer during their two games there, even though they have a team that averages over six feet themselves. This time the score at the end of the game was in favor of the home team, 50 to 43.

When the two teams squared off against one another this Friday night, it will find the Buffs just back from a tour of the East. While on this tour, the Texas boys dropped three games, partially due to the illness of their captain, Bill Stockman, and one of their ace scorers, Charles Johnson. Approximately 15,000 fans saw the Buffs play in Madison Square Garden, where they lost to Long Island University.

The Raiders will be set to continue a winning streak they have been on for the past few weeks. Returning from a two game series with the Hardin-Simmons Cougars, they will be determined to overcome the Buff's height with a bit of snappy floor work, and emerge victorious.

Fans are expected to pack the gym to see the renowned West Texas boys play. As the Hardin-Simmons-Tech football game is the classic of West Texas each fall, so is the annual West Texas State-Tech basketball game one of the finest fans are able to see. Tech is always fighting for a win, and the Buffs are always the same impressive, sharp-shooting team.

Tech students are asked to sit on the west side of the gym, and also to enter by that door. The band will be on the same side, and a section will be marked off for the Saddle Tramps also. Admission will be 55 cents for civilian spectators, while soldiers will be admitted for the usual 25 cents.

Having outgrown its office space occupied since 1922, headquarters for the University of Michigan ROTC is now housed in a former fraternity house.

A new method of rebuilding faces with celluloid, under living skin, has been developed at Tulane university school of medicine.

Villanova college traces its lineage directly to the colonial foundation of old St. Augustine's church in Philadelphia.

New York City college's institute of film techniques is offering a new course in audience reaction.

### Tarbox Receives PH For Service

Elmer Tarbox, former Tech football star, has been decorated with the Purple Heart somewhere in China, it was officially announced this week.

A delayed dispatch from China said Brig. Gen. Claire L. Chennault last Tuesday pinned decorations on Capt. Tarbox, another officer and four enlisted men in an air base hospital. All the men had been wounded in action.

Tarbox was wounded by anti-aircraft fire during the bombing of Japanese-held Mengmao, China, December 27. Although in severe pain from bullet wounds in the legs, he stayed at his post and assisted the co-pilot to bring the bomber safely home, it was said.

### Meeting Held Friday To Set Date For New Course

A meeting was held Friday night to arrange the time and place for the new course in Electrical Engineering 234, Elements of Radio, prerequisites for this course are E. E. 233 or by consent of the instructor. It is the application of principles covered in E. E. 233.

E. E. 233 is being repeated; this course is called Elements of Radio, and is opened to students who have had college trigonometry. Anyone interested should contact Prof. C. V. Bullen.

Pre-flight training has been added to the course of study at Western Maryland college.

### "A Night To Remember"

Captain Bill Stockman will lead the West Texas State Buffaloes against the Red Raiders on Friday and Saturday night of this week. The "tallest team" has defeated the Raiders in two previous games this season.

### Golden Gloves Begin Today In Cowtown Arena

The annual Texas Golden Gloves tournament opens today in Fort Worth, with approximately 160 fighters, seven of which are former champions. Only two will be defending titles they held last year.

Three of the others have outgrown their former weight divisions, and two others are competing for the first time since they won their championships in 1941. Tom Attra, lightweight champion both here and at Chicago last year, will be back in the same division. He is now a private at Brooks Field and won in the San Antonio district.

Jose Andres of Fort Worth, fly-weight division winner in 1940 and 1942, is ready to defend his laurels. One of Andres' opponents will be Jesse Spivey of Ellington Field, who was state champ in 1941.

Morris Carona, state and Chicago champ last year is back from the Beaumont district, but this time Carona has grown into a welter. Dick Menchaca, Texas and Chicago bantam champion in 1941 who kept out last year because of illness, is back but he will be seeking the featherweight crown. Menchaca won his title at Temple.

The lightweight class will have two former champions. Arlo Royce of San Antonio, last year's feather winner, and Hubert Gray of Wichita Falls, who won the bantam class in 1942, both have grown into 135 pounders.

Three 1942 champions did not enter the district eliminations this year. They are Lt. James Olcott Phillips, who has been commissioned since fighting as a corporal from Camp Bowie last year; Pvt. Eli Kativh, who represented Fort Bliss; and Marvin Bryant of Dallas, who has turned professional.

## Tech Emerges Victorious In "Sugar Game" With Birdmen

### LAFS Grab Early Lead But Raider Pace Is Too Fast

#### Techsians Are Paced By Banks As They Win Easily 62 to 50

The Texas Tech Red Raiders submerged the Lubbock Army Flying School beneath a 62-50 score Saturday night in the highest scoring game here this season.

The soldiers' offensive enabled them to get off to an early lead, but the Techsians, by use of their fast break, soon gained the lead never to be headed again. The LAFS did pull up late in the game, however, when Polk Robison sent in his second team.

William Bank, with 12 points, and Garland Head, with eight led the Raiders to a formidable half time score of 28-17. Banks went on to become the high point man for the Techsians with 14 points, and Roy Williams, scoring 10 points in the second half, came up with 13 and second place honors. George Allen, who leads the Tech

team in scoring, collected 10 points also in the second half. Williams and Allen kept the Robison men in the lead through a fast and rough last half.

The Tech aces, however, did not steal the spotlight entirely; because Norman Volz of the LAFS who turned in the best floor game of the night. Volz, former Raider, collected 14 points with long arching shots. Leon Reese, ex-Abilene Christian college performer, and Prior, also an ex-ACC ace helped Volz with the scoring duties by making 10 points each.

This game gave the edge to the Raiders in games won. The Techsians took the second game from LAFS 37-22 after dropping the first 35-34. Saturday's game was the last for Tech with the service teams.

Last night's box score:

Player	FG	FT	PF	TP
Nabors, f	4	1	2	9
Banks, f	6	2	3	14
Williams, c	6	1	2	13
Allen, g-f	6	1	2	12
Head, g-f	5	0	2	10
Rogers, g	1	0	0	2
Churchill, f	1	0	0	2
Long, f	0	0	0	0
Cox, c	0	0	1	0
Richards, g	0	0	0	0
Martin, f	0	0	0	0
Totals	29	4	11	60

  

Player	FG	FT	PF	TP
Reese, f	5	0	0	10

Riddle, f	1	1	3	3
Prior, c	4	2	2	10
Volz, g	7	0	3	14
Smith, g	2	0	1	4
Dixon, f	1	0	1	2
Newell, g	1	0	1	2
Garwood, g	2	0	2	4
Sapp, f	0	1	0	1
Totals	23	4	13	50

Officials: "Stumpy" Hamilton and Hope Haynes.

### Drafting Course Will Be Under ESMWT Supervision

A paid learned course in Pre-factory aircraft drafting under the ESMWT program was started on Tech campus Feb. 1. There were 21 enrollees; 14 women and 7 men. There is room for five more students.

Instructor is H. Katz of the engineering department of Consolidated Aircraft. Classes are held eight hours a day, five days a week. Anyone interested should see Prof. O. A. St. Clair.

### Problem Presented By Shoes Rationing Rule

—By Kara Hunsucker

WHEN the government designated Stamp No. 17 in War Ration Book No. 1 as the "shoe stamp," it presented quite a problem for dormitory managers, and now 1300 dorm residents at Texas Tech are wondering how they'll get their next pair of shoes. The whole problem is brought about because sugar is included in the \$30 monthly room and board rent and shoes are not.

It would be hard indeed and a headache for Miss Craddock to release a book whenever a student wants to buy a pair of shoes, and would be virtually impossible to make students turn the ration books back in for the dorm files. Without the 1300 ration books on file, the dorms cannot buy sugar. So it remains for the local war price and rationing board to work out a satisfactory solution to the problem, in order that students may buy shoes and the dorms may buy sugar. The situation may become even more complicated in time as other articles are added to the ration list.

More than likely, the local ration board will issue "shoe permits" which will allow a student to purchase a pair of shoes, rather than release the hundreds of ration books to dorm residents. In any event, some method will be announced in the very near future.

In the meantime, Tech coeds, used to walking over the large expanses of Tech campus, and thus wearing out at least a couple of pairs of sport oxfords alone during the course of a year, are wondering how the new ration edict will affect them. We predict these changes:

1. A demand for shoes made of more durable materials, especially harder leather soles.
2. More half-soleing and retapeing, a boom for the shoe repairman.
3. With the better-constructed shoes will come more versatile ones—less flashy colors, fewer ultra-high heels, more year-round shoes.

### Collegiate Review

Tokyo radio says a new college "to meet Japanese requirements for leaders to work on the Asiatic mainland and in the southern regions under wartime conditions" will be opened shortly in buildings of the University of Shanghai.

Nicholas Murray Butler, president of Columbia University, has estimated the last war cost 30,000,000 lives and \$400,000,000,000.

Robert C. O'Neill, 18-year-old freshman at Rensselaer Polytechnic institute, won first prize of \$100-\$16.66 a minute—in the annual public speaking contest for freshmen at RPI.

Wisconsin senators and assemblymen may take over the University of Wisconsin fraternity houses to combat the war housing shortage.

Bernard Hubbard, Santa Clara university's Glacier Priest, thinks it would be a mistake to force the Japanese out of Kiska right now, since Kiska is "a rat trap."

Eight state colleges for women in the south report a decrease in enrollment of 13 per cent.

University of Minnesota has a library of 1300 rare volumes on magic.

Freshman Dorothy Quigley is helping finance her way through the University of Rochester by wielding a meat cutter as a butcher's aid.

Alexander Loudon, Netherlands minister to the United States, recently received the honorary degree of doctor of laws from Rensselaer Polytechnic institute.

Nearly three-fourths of the 365 students in the school of business administration at the University of Texas are enlisted in one or another of the military reserves.

Villanova (Pa.) college recently celebrated its 100th anniversary. Premeteorological training will be offered by the University of Michigan starting March 1 under direction and sponsorship of the army air force.

A portrait of Henry Clay, after an original by Samuel F. B. Morse, has been presented to the University of Kentucky by the Chesapeake and Ohio Railway Co.

Dr. Walter C. Coffey, president of the University of Minnesota, has been named to receive the American Farm Bureau federation's annual award for distinguished service to agriculture.

Winthrop college girls from education, sociology and physical education classes recently helped gather in the bumper crop of cotton.

### Tech Grad Is In Australia

J. O. Ellsworth, dean of commerce, has received letters from three Tech graduates from that division who are now serving in the armed forces. Ensign John E. Williams, graduate of 1941, now stationed at Galveston with the Coast Guard married Miss Charlotte Wilson, February 5.

James S. Atkinson, graduate of 1941 is now a lieutenant in the quartermaster corps stationed at an advanced base in Australia.

Ensign Sam W. Chisolm is stationed at Soldiers Field, Boston, Mass.

Pomona college will train 200 high school graduates, 18 to 21, for the army air corps in a basic pre-meteorological course.

### Decrease Of 300 Shown In ROTC Unit This Semester

The enrollment in the Texas Tech ROTC unit for the second semester has dropped from 650 cadets to 350 cadets, mainly because the students have gone into the service. Major Charles H. Swick says that the freshmen students, first year advanced students, and the special military unit mark the bulk of the decrease.

There have been no changes in the major cadet officers' positions. Cadet Colonel C. S. Neel, Cadet Lieutenant Colonel R. V. Skinner and Cadet Captain Regimental Adjutant V. J. Elkins, Jr. will continue in their present posts until graduation.

### Corey Expresses Need For Engineers In Armed Forces

Lt. Col. Alexander Corey of the Transportation Corps and Chief Civilian Personnel Division in a recent letter to President Clifford B. Jones, expressed the critical need for marine engineers, electrical engineers, statistical engineers, draftsmen, production analysts, production expeditors and administrative assistants.

Corey expressed the desire that these positions be filled by graduates of this institution. Persons interested in these offers may secure Standard Form 57 from the local Civil Service Board. This is to be sent to Civilian Personnel Division, Transportation Corp., room 46-719, Pentagon Building, Arlington, Virginia. All applications will be given immediate consideration.

The seventh graduate of the Geology department has been ordered to report for Officers Training in Meteorology in the air corps within a year from the Tech department.

### Election Date Set For Feb. 25

Only one candidate for the publications offices has filed a petition to date and the deadline set for the filing of these petitions is February 12.

P. B. Shannon, president of the Student Council, urges that all students who desire one of the offices, which include editor and business manager of the *Toreador* and La Ventana, file their petitions at the earliest possible date as the deadline grows near.

All seekers of these offices must have their petitions signed by 15 per cent of the student body and filed with the secretary of the Student Association 14 days before the election by a rule set forth in the student constitution. The election is to be held February 25.

### May 6 Set For Inspection Of Campus Military Unit

May 6, 1943, has been tentatively set as the date for the annual War Department inspection of the Texas Tech ROTC unit. Colonel Capton has been selected as the officer in charge at the inspection. Both the date and the officer are subject to change without notice.

### Tentative Prom Plans Made At Junior Class Meeting

Plans for the junior prom to be held Feb. 20 were discussed at a class meeting held Tuesday night in the Chemistry building. Arrangements were made for providing an orchestra and choosing the ballroom. To provide funds for the occasion, it was necessary for all junior students to pledge one dollar.

Prof. Fred Robson, instructor in engineering drawing has resigned to accept a position with Aircraft accessories company in Kansas City, Kansas. He is leaving February 13.

### Ex-Student Is Decorated In Air Corps

Olin Cupp, an alumnus of the college, visited with Alton Webb, also an ex-student, here the first of the week. Cupp, a captain in the air service, has seen action in India and China. He recently saw Elmer Tarbox and Stewart Sewell, ex-students now with Flying Tigers in China. Captain Cupp has been decorated.

Webb is a lieutenant at the Roswell Air School, New Mexico.

Names of all ex-students of Texas Tech now serving in any branch of the armed forces are needed for the 1943 La Ventana, in which as many names as can be obtained will be printed. Names must be submitted (addresses are not necessary) to any member of the La Ventana staff or to the Alumni and Ex-Students office by Wednesday, February 17, when the list will close.

New York university is in its 111th academic year.

**Civil Clinics Advocated At Penn State College**

Civil clinics, a combination of restaurant, library and clubhouse, are being advocated as adult education centers by Dr. Charles C. Peters, director of educational research at Pennsylvania State college.

"Persons could freely come to the clinics for analysis of the problems which face them, or simply to discuss over the coffee cup with their friends the current issues of the community or the national problems of the day," Dr. Peters contended. Trained counselors would be available to guide and advise those with personal problems, or lead group discussions.

"To the civic clinic there might be attached other community clinics—a cultural clinic, a health clinic, a social adjustment clinic, a birth-control clinic and marital clinic," he added.—(ACP).

**A Thought For Valentine's Day**

Once more through good St. Valentine We have the chance to say The kindly, friendly, loving thoughts That come to mind each day— And every near and dear one Deserves a SPECIAL CARD Especially worded to express The warmth of your regard,— There are many, many captions— Like—"From One Who Cares for You," For "Baby's First," for "One I Love," For all the family, too;— So when you're looking for the cards That suit you to perfection Without a doubt you'll find them In our new, complete collection!
