

# Navy V-12 Exam To Be Given April 2

## Faculty And Students Donate \$1690 To Red Cross Campaign

### \$124 Of Student Contributions Is From Army Group

#### Faculty Tops Quota Set For Them; Give Over 1000 Dollars

When the booths closed on the campus Saturday afternoon, Tech students and faculty members had contributed \$1690.94 to the "mercenary" drive of the Red Cross. Officials expressed satisfaction with the way both students and faculty responded to the call and called it probably "the most successful financial drive of its kind" in the history of Tech.

An intense drive was conducted here Wednesday and Thursday of last week with almost all campus clubs maintaining a booth at strategic points on the campus. When this part of the drive closed the total contribution was \$1,430.23. A student and faculty committee decided to keep the booths open during the two remaining days of the week when the above amount was taken in.

At the close of the drive, faculty members had contributed \$1,058.22 while students had contributed \$632.72. \$124.22 of the latter amount was contributed by the Pre-Flight students as a group.

The campaign was equally as great a success in the city and county of Lubbock who almost doubled the goal which was set for them. Incomplete returns from all sources Saturday afternoon show that \$38,041.65 had been collected in Lubbock county which is \$23,000 more than the quota set.

Of this amount, \$18,961 was donated in Lubbock, \$3,406.42 in Slaton and \$15,711.91 in rural areas. Not included in the Lubbock county totals is \$3,913.61 which was contributed by the South Plains Army Flying School, part of which was collected at a benefit carnival given at the school. The Lubbock Army Flying School contributed \$2,858.90 which is not included in the total either.

George P. Kuykendall, county chairman of the Red Cross, expressed thanks to the citizens of Lubbock County for their cooperation in the drive and also expressed the appreciation of the Red Cross to the campaign workers.

He stated that although the intense drive was over, contributions from those who have been overlooked or those who were not able to contribute at the time will still be taken and appreciated. Persons who cannot bring in their contributions may dial 5511 and someone will come to take their donation.

All returns were incomplete and some workers were still making a canvass of their territory, not having completely covered it during the four day drive of last week.

## Animal Husbandry Research Enters Its Second Stage

An experiment conducted by the animal husbandry department, to compare the value of two protein supplements in fattening rations, entered its second phase Sunday when four lots of calves were placed in fattening pens.

The calves which had been wintered under different conditions will stay in the fattening pens from 90 to 100 days. While they were in the stocker period, the animals in lots 1, 2, and 3 were fed cottonseed meal and alfalfa hay with different types of roughage. Lot 4 was given unharvested milo feed, an acre to a calf. Roughage for the animals of lot 2 was sorghum silage, and for lot 3 was buffalo and grama grass.

Greater gain was shown by the calves in lot 4, fed on unharvested milo. This lot was divided Sunday into two pens of ten head each. One lot will be fed cottonseed meal and the other peanut meal.

Because of the difficulty encountered in obtaining workers to harvest the feed, Prof. D. L. Stangel, head of the animal husbandry department explained, the calves were fed unharvested milo. Results were satisfactory.

"Mexico in Color" was the theme of the movie shown at the Home Economics club meeting Tuesday night in the Administration building.

"The Home Economist in the Farm Security Administration" will be the subject of Miss Gertrude Brent, district home management supervisor, as she speaks before the senior lecture group Wednesday.

## Blood Bank To Be Sponsored Here By Lubbock Club

A Walking Blood Bank will be sponsored by the Business and Professional Women's club of Lubbock. Tech students will be given a chance to have their blood typed and be put on a list as available for their particular type of blood if it should be needed.

This bank has no connection with the blood bank the Student Council is seeking to establish on the campus. The blood is for the local hospitals in cases of emergency when they have no blood available in a certain type. The doctors can consult the names of the people who have been typed and offered to give their blood if ever it should be needed.

Those who wish to put their names on the list must register and have their blood typed. After this is done they will be given a card showing that they have offered their blood and their type. This card must be presented to the Red Cross and is then listed for use in case of an emergency.

Registering has not begun but will begin around April 1. Final details will be published at a later date.

## Another Chinese Course Is Begun

Registration for an Introductory course in Chinese language has started and will continue through March 25. It consists of 18 hours of instruction extended over a six-week period.

The class meets twice a week in the evenings in room 206A of the Administration building. No college credit is given for the course and a small fee is charged.

People interested should contact Dr. Ling, Research Fellow in Child Development, between 5 and 7 p. m. or after 9:30 p. m. by telephone number 2-3812.

Dr. Ling has arranged this course for people who can plan no further than six weeks ahead. Students can go from this course into a fighting unit which is also a six-week course.

## New Films Added To Tech Library

Several new films have been added to the Tech film library. They are "Price of Victory," "Dover," "Price of Freedom," and "Air Raid Warden's Report."

Vice president Henry A. Wallace explains the ideals for which we are fighting in "Price of Victory." He also gives a condensed version of the speech he delivered before the Free World association on May 8, 1941.

Taken at Dover, England, the film "Dover" depicts the spirit of a fighting Britain.

"Price of Freedom" emphasizes the importance of buying war bonds and stamps.

Information civilians should know in the event of an air raid is given in "Air Raid Warden's Report." This film also describes the position of an air raid warden in the defense set-up.

## ASME To Hold St. Patrick's Day Celebration March 17

The ASME Student Branch will hold its annual St. Patrick's Day celebration March 17th at 10:30. They will give another plaque corresponding with the others in front of the Engineering building.

The first one was placed there in 1935. St. Patrick is the patron saint of all engineers. And on his day the ASME has seen fit to pay tribute to him.

Harlan Dowell, Chairman of the ASME, is to be the speaker at the unveiling. Bernard Wilder was chairman of the arrangements committee.

It is the duty of Freshmen to keep the plaques shined.

## Stangel Is In Fort Worth

W. L. Stangel, head of the animal husbandry department, is attending a meeting of the Texas Hereford association in Ft. Worth today.

Prof. Stangel is a director of the association.

## H. E. Group Has Cleanup

The Home Economics club started their cleanup Saturday. They cleaned the flower beds around the Home Economics building and have the ground ready to plant.

This cleanup had been planned for previous Saturdays, but had been put off due to weather conditions and student activities. The work will be continued next Saturday.

## President Jones Kills Rumor Of Tech's Folding

In order to kill a rumor circulating around the campus, President Clifford B. Jones has made a definite statement to the student body saying that Texas Tech will continue as a center for civilian education.

The rumor stated that Texas Tech would no longer function as a school for educating the civilians, as in pre-war time. The doors would be closed for the duration to the present student body, no further degrees would be conferred and that there would be no summer school, all of which is not true.

"These statements are wholly groundless and we wish to emphasize the fact that any person who persists, for ulterior purposes or otherwise, in circulating such rumors, is doing this college and the war effort an incalculable injury," President Jones stated Monday.

Plans have been made to carry on the regular college courses, both summer and long sessions, which is deemed necessary for the war effort in better qualifying students for military service.

President Jones stated there was no immediate need by the army for the dormitory now occupied by civilian boys and, as far as is known, there will be no need. Also the dormitory occupied by the girls will continue to be used for housing girls through long terms and summer sessions.

The plan, as discussed at the meeting would probably work so that a curfew hour would be set at approximately 10 o'clock each night. At that time, all unaccompanied juveniles, probably younger than 17, would be required to be off the streets. Those who persisted in remaining after that time would be picked up by police and taken to their homes where a report would be made to their parents.

Investigations have been made into the matter previous to this time and have continued, in most instances until after midnight and sometimes until early in the morning. Reports made by investigators showed that these youngsters have been loitering on the streets and frequenting night spots.

Possibilities that the problem might be tackled through a curfew ordinance was discarded when the city attorney expressed the opinion that such an ordinance would not be valid. A similar ordinance, adopted in Graham, has been held unconstitutional.

However, the council agreed that the problem might well be handled through curfew statutes which police would enforce. Such a plan has worked successfully in several cities. Waco has had a successful plan of this sort.

Reports included places where dancing was continued after midnight in the city and one report included a high school boy who became such an expert with dice that his winnings enabled him to invest in a substantial amount of war bonds.

They included, however, mostly reports of girls who were observed in and around city hotels and down town night spots.

Members of the commission were all agreed that some measure must be taken to cope with the problem, which seems to be growing.

## Dr. Bernice Moore Speaker On Campus During Week

Dr. Bernice M. Moore, consulting sociologist of the Hogg Foundation of the University of Texas, addressed groups of teachers and students Saturday.

Saturday morning she spoke to women's leaders and seniors regarding their relationship to war. She was guest speaker at a luncheon meeting of the Lubbock County Home Economics association at the Hilton hotel, speaking on "Women and War Work."

Hale, Wesley Hamilton, Stephen O. Hastings, Amos H. Howard, jr., Glen Ivy, James C. Kuykendall, Robert Kent, William C. Lane, Devereille Lewis, Robert Edward Moore, John Frank McLesky, Paul McCollum, Gerald Nobles, W. D. Price, Bob Renner, Raymond Renner and Walter Schlinkman.

Twenty-one pledges will enter Soci club. They are: James Victor Allen, L. M. Austin, W. B. Blankenship, Robert S. Cartwright, John Collier, L. V. DeLorenzo, I. C. Enochs, jr., Jack R. Hamilton, Alvin Hanley, Jack B. Horton, Don Kleinschmidt, LaFayette C. McKay, Shirley Medlin, J. Larry Miller, Paul L. Payne, Stephen Payne, Charles Reese, J. P. Settle, Curtis Sewell, jr., R. L. Williams and Bob Roper.

Wranglers have turned in the following signed names as pledges: Francis Bearden, W. O. Boswell, Tommy Breeding, Troy Caldwell, Earl B. Christy, Gerald Crowder, F. Marion Fox, Gus Gallagher, Hoke Holbrook, Robert L. Horton, Billie Kerr, Virgil Miers, J. D. Milner, W. D. Parrish, J. C. Powell, Chauncey Trout, James Venable and Clay Wood.

## College Students Under 17 Facing City Curfew Law

10:00 Or 10:30 Will Be Hour Designated For Youth To Retire

Teen age college students may soon have a curfew facing them which was not passed by the dormitory or college administration. For resolutions recommending that curfew regulations be put into effect in Lubbock were adopted unanimously by members of a citizens' committee at a report meeting with members of the city commission in the council office last Monday night.

Members of the commission promised that the matter would be given thorough study in an effort to discover the best method of coping with the problem which has arisen concerning the teenagers and younger boys and girls who loiter about the streets late at night.

The plan, as discussed at the meeting would probably work so that a curfew hour would be set at approximately 10 o'clock each night. At that time, all unaccompanied juveniles, probably younger than 17, would be required to be off the streets. Those who persisted in remaining after that time would be picked up by police and taken to their homes where a report would be made to their parents.

Investigations have been made into the matter previous to this time and have continued, in most instances until after midnight and sometimes until early in the morning. Reports made by investigators showed that these youngsters have been loitering on the streets and frequenting night spots.

Possibilities that the problem might be tackled through a curfew ordinance was discarded when the city attorney expressed the opinion that such an ordinance would not be valid. A similar ordinance, adopted in Graham, has been held unconstitutional.

However, the council agreed that the problem might well be handled through curfew statutes which police would enforce. Such a plan has worked successfully in several cities. Waco has had a successful plan of this sort.

Reports included places where dancing was continued after midnight in the city and one report included a high school boy who became such an expert with dice that his winnings enabled him to invest in a substantial amount of war bonds.

They included, however, mostly reports of girls who were observed in and around city hotels and down town night spots.

Members of the commission were all agreed that some measure must be taken to cope with the problem, which seems to be growing.

## Victory Garden Will Be Planted

Girls living in the Home Management house are making plans for a Victory garden to be planted back of Casa Linda. They plan to furnish vegetables for the house this summer and to can any left over food.

They plan to raise the following vegetables: tomatoes, cabbage, and pepper plants, with perhaps others added later.

This is a group project and the girls will keep an expense record to see whether home gardens really pay.

Receiving my United States citizenship has been reported missing in my life. I look very much forward to be back at Texas Tech by the beginning of summer school.

With many regards, Yours very sincerely, Ted

## WICC Gives Tea For Loan Library

Women's Interclub Council will have their annual silver tea to night from 7:30 to 9:30 in the home of Mrs. Clifford B. Jones.

In the receiving line will be Mrs. Jones; Miss Bonnie K. Dyrstarr; Winifred Woods, Las Vivarachas; Willouise Humphries, D. J. Sara Daviss, Sans Souci; Frances Gary, Ko Shari; Kathryn Weath, Las Chaparritas; and Gee Waltz, interclub council president.

White roses around a silver bowl will decorate the table. Mrs. Mary W. Doak, Mrs. Juanita Price, Mrs. Eleanor Chitwood, and Mrs. J. G. Allen will pour.

The house party will be made up of Elizabeth Ballew, D.F.D.; Rowena McKinley, Ko Shari; Rueby Tom Rhodes, Las Chaparritas; Dorothy Lou Emmit, Las Vivarachas; and Ophelia May Beall, Sans Souci.

This tea is held each year to obtain money to maintain the loan library for women students who work.

## Geology Grad Reported Missing Since March 4

Capt. W. M. McCarty, Jr., 1939 graduate from the geology department, has been reported missing in overseas duty since March 4, his parents, Mr. and Mrs. W. M. McCarty, 1309 thirteenth street, were informed last week.

He was a bomber pilot, having handled the B-17F, the newer modified Flying Fortress. In December he received the Air Medal and the Oak Leaf Cluster. He was made a captain in February.

McCarty is the first graduate of this department to be reported missing.

Displayed in the hall of the architectural department are photographs for the collection of the department. They are on Romanesque architecture of the eleventh, twelfth, and thirteenth centuries.

Names of 143 college boys were released this week by the Dean of Men's office as pledges for the men's social clubs during the coming semester.

The Centaur and Silver Key clubs lead the seven men's clubs with twenty-five potential members added to their rolls. The Kemas club was a close second with twenty-four pledges to their credit.

Twenty-five pledges are being taken into the Centaur club. They are: James E. Bledsoe, jr., Truett C. Bales, Jimmy Carmack, Walter T. Clark, Gene Clark, Ralph Earhart, Benoy Gattis, Thorp Gillespie, James M. Hall, Billy Joe Haire, Wayne Hise, Edward Kline, Paul Larson, Carroll H. Martin, Buster Melton, Jack Thornton Myers, John Porcher, Ray A. Peevey, Jacob G. Rathmell, Randolph Rutledge, L. D. Stevens, jr., Warren White, Jimmy Witt, William Wright, and Finley J. Hamman.

The fifteen new pledges of the College Club are: Earl J. Cantrell, Jack DeVore, James W. Donaghey, William Scott Donaghey, John Wiley Gillespie, Harold Lee Grigsby, Joe W. Haygood, Billy Clifford Johnson, Luther F. Loveless, Sam-

pie McGehee, Douglas Renner, Jack Kenneth Stewart, Mack Verdyhen, John Coyle White, and Terry Wilson.

Kemas club will pledge the following twenty-four boys: J. Edgar Bowden, Kenneth Bishop, James P. Bowlin, Bill Horace Gatlin, Charles W. Heard, Bill Hickey, Herschell Hinson, W. Kenneth Hodge, Victor Hooper, Hugh Jackson, Richard Jackson, Perry E. Johnson, Sherman Lippman, Frank McFarland, Billy Morrison, Raymond Alvis Newton, Robert N. Oliver, Howard M. Phillips, Robert A. Priest, Howard Schmidt, Philip Snider, Chauncey Taylor, A. D. Toon and Dixon Wagner.

## College Students Under 17 Facing City Curfew Law

10:00 Or 10:30 Will Be Hour Designated For Youth To Retire

Teen age college students may soon have a curfew facing them which was not passed by the dormitory or college administration. They included, however, mostly reports of girls who were observed in and around city hotels and down town night spots.

Members of the commission were all agreed that some measure must be taken to cope with the problem, which seems to be growing.

## Men Under Twenty Years Are Eligible

Must Be In Upper Two-Fifths Of Class; Be Physically Fit

By MARY SMITH  
Toreador Staff Writer

EXAMINATIONS for entering the Navy V-12 program will be given at Tech April 2 between the hours of 9 and 11 a.m. The purpose of the V-12 program is to produce officers for the Navy, Marine, and Coast Guard. The plan contemplates that college training will be carried on while the men are on active duty, in uniform, receiving pay, and under general military discipline.

The War Department has announced that the army will participate in the examinations at the same time as the navy so as to accommodate those applicants who prefer service in the army. However, no information has yet been received as to the nature of the program to be set forth by the army. Dr. H. L. Kent, liaison officer and administrative assistant, has asked young men who are interested in the army program to wait until they are notified in the college paper or notice is posted that this information has been received to apply for the examination or ask questions about the proposed army program.

As yet the application blanks which must be filled out before taking the examination have not been received. Students will be notified through the college paper or by posted notice when they arrive.

This examination will be open to college students who are in the upper 2-5 of their classes and to high school students who plan to graduate in May or June or who have already graduated and have not entered a college or university. Before taking this examination, which will be in the form of a general intelligence test, those young men interested must fill out application blanks to be secured in Dr. Kent's office as soon as the blanks arrive. Candidates taking the examination are under no obligation to the army or navy if they are not selected. It is assumed that high rating students will be chosen for the specialized training.

The application blank secured must be filled out and signed by proper officials. High school students must have their principal's signature stating the date of graduation. Young men graduated from high school and not attending college must also have the principal's signature and the date the former graduated from high school. High school students may take the examination along with college students in the designated room which will be announced on or about March 27.

The following groups are eligible to take this examination: a. High school and preparatory school graduates who will have attained their 17th but not their 20th birthdays by July 1, 1943, regardless of whether they are now attending college.

b. High school and preparatory school seniors who will be graduated by July 1, 1943, provided they will have attained their 17th but not their 20th birthday by that date.

c. College students who will have attained their 17th but not their 20th birthdays by July 1, 1943, and who are now continuing their education in an accredited college or university.

Further qualifications are: a. Be a male citizen of the United States.

b. Be morally and physically qualified for this program, including a minimum uncorrected visual acuity of 18-20 for each eye.

c. Be unmarried, and agree to remain unmarried until commissioned, unless sooner released by the Navy Dept.

d. Evidence potential officer qualifications, including appearance and scholarship.

Any eligible person not taking the test at this time will not have another opportunity to qualify for this training program within the next six months. Men now enlisted in any branch of the armed service.

See NAVY V12, Page 4

## Ruth Day Awarded Sears Scholarship For Agriculture

Ruth Day, freshman animal husbandry major, is one of the four girls in the United States that has ever received the annual Sears Roebuck scholarship award.

Each year \$100 scholarships are awarded by Sears Roebuck to freshman agriculture students on the basis of scholarship, leadership, personality and business ability. Twenty of these scholarships go to Tech students.

Miss Day is the first girl to be awarded a Sears Roebuck scholarship in Texas, Texas Tech, or the South. Girls have been given awards in Missouri, Nebraska and Ohio.

The girl is the daughter of a Roame rancher and has the ambition of being a rancher herself.

Sears Roebuck formerly offered a \$200 scholarship to the outstanding sophomore and a \$600 scholarship was awarded to a graduate student. These two, however, have been discontinued for the duration.

The Sears Roebuck annual dinner for their scholarship students will be given April 1 this year. Time and place for the dinner have not yet been decided.

## Two Instructors Appointed Here

Two full-time instructors have been hired for the Pre-Radar course on Tech campus. They are R. R. Beasley, graduate of the University of Missouri and E. H. Wilde, graduate of the University of Michigan. They received their bachelor degrees in electrical engineering.

A part-time instructor has been added to the staff. He is T. A. Gilliland, a laboratory technician who received his training in the Signal Corps Radar school.

There will be 28 students for the next section of the Pre-Radar course arriving to begin classes Thursday. They will go on the night shift.

## St. Clair Bullen Visit San Angelo

O. A. St. Clair and C. V. Bullen recently made an inspection tour of Tech-sponsored ESMWT courses in San Angelo and Abilene.

St. Clair opened an Industrial Engineering course at Abilene with 23 present. It is being taught by R. E. Kennedy of West Texas Utilities. In San Angelo he visited a course at the San Angelo Junior College in Engineering Drawing, which will be completed March 26. Thursday St. Clair is going to Amarillo to start a course in Engineering drawing.

Bullen inspected work in Abilene in Parts I and II of Radio Engineering Fundamentals. In Abilene he made tentative plans for a new class in Part I upon completion of Part II about the first of May.

In San Angelo Bullen inspected Parts I and II of Radio Engineering Fundamentals. A change was made in the instructors.

Continuation Of Ideals...

INCESSANT murmurings are growing louder by the hour and day of Texas Tech's drastic change. Students are beginning to wonder, and they have good cause for such, whether it is worth the continuation of their education to keep trying in the present environment.

The largest howl of the year, and a good many students left school permanently when the pre-flight students occupied our dormitories and moved students out into the streets. This seemingly was "the straw that broke the camel's back."

Students have come to believe that Tech is far past the last stages. Like a drowning man, the college is going down for the last time, and may not be able to rise again.

These few, in the minority by far, have given up hope of ever returning to a Texas Tech of gay night life, crowded classrooms, and a business-like crowded campus.

This is what we are here to prevent. Let us remind students that the size of the student does not make the school, but the quality does. We admit that size helps considerably during normal times.

To return to the term quality. The army may get our football team, our basketball team, cause track to be discontinued, and reach deep into our personnel; but that is no reason to give up and quit.

For those years students have been allowed to sit back and let the campus leaders run the school. Most of the student body does not know over one or two classes in the student constitution. They have enjoyed life at Tech because they had no responsibility on their shoulders other than passing their studies.

We must all pitch in and do our best for the continuation of a Tech of which we are, have been, and shall be, proud of. This is no time, this is definitely not the place, for "defeatism."

If those men on Wake Island had given up when their more competent fighters were killed in the first onslaught, where would that have left the United States. That is a very simple question. We would have been subject to immediate attack by our enemies.

Tech has no direct enemies, but indirectly the same solution could be placed to apply on our problem. If we give up now, we are lost. If we keep fighting for the continuation of traditions, ideals, and customs that have been handed down to us through past student associations, then we are doing our best for Tech.

Band Concerts...

AFTER several weeks of preparation, the Texas Tech Matador band gave its first concert of the spring series in the Tech gymnasium Sunday afternoon.

But the audience which heard the concert should put the look of shame on the face of every Techsian. Not more than 50 students came to hear it. Just why Techsians refused to patronize the concert given by the Number One college band of the Southwest is a little hard for us to understand.

The program was free, the weather was fine, and the event was long and well publicized. A concert of similar nature in most places would have cost listeners several dollars in admission price.

It is difficult for us to accuse Techsians of having no appreciation for efforts of this sort after we have seen the way they jam the high school auditorium for artist courses and visiting lecturers. But their actions in this instance say nothing less than that.

Townpeople and people from surrounding towns comprised most of the audience Sunday afternoon. No doubt the boys in the band and Prof. Wiley himself felt deeply the lack of support which the students gave their own band.

A number of concerts will be given in this spring series and they will all be on Sunday afternoon. A band stand is being erected from which the programs can be given. We would say that this is needless expense if the Tech students can show no more appreciation and no more interest in their own band organization than they did in this first program.

We promise you that your time will be well spent and that you will enjoy every concert, as well as adding a lot to the cultural appreciation of every student on the campus.—(E.Y.O.)

Publication of "Writing From Observation," a textbook in freshman English, written by members of the Wayne university department of English, is announced by

From Other Campuses...

CINCINNATI, Ohio.—(ACP)—There may be more coincidence in the fact that the birthdays of Abraham Lincoln and Geo. Washington both occur in February, for they are among notable of American history who may have achieved greatness because of the part weather played in their pre-natal development.

This opinion is expressed by Dr. Clarence A. Mills, University of Cincinnati authority on effect of climate and weather on human progress. He holds the James T. Hardy professorship of experimental medicine in the university's college of medicine and is author of the recent volume, "Climate Makes the Man."

"Climate and weather do some surprising things to mankind," Dr. Mills said. "They dominate his rate of growth, his vitality and energy for thought or action as he lives from day to day; but their influence begins even before he is born."

"Few people realize that a child conceived in summer heat has only half the likelihood of entering college that is enjoyed by youngsters conceived in winter cold."

"People conceived in late winter or spring tend to live longer and to be most likely to achieve greatness. 'Who's Who' volumes list a heavy preponderance of persons conceived in this favorable time of year."

CAPITAL to CAMPUS

ACP's Jay Richter Reports from Washington

TO NIMBLE-WITTED gentry with acquisitive instincts, it's a rare ill wind that fails to suggest a road to easy wealth.

The ill wind of Washington's wartime overcrowding is no exception. Many a government recruit is learning the search for a room to rent may lead to the door of a pretty racketeer.

According to the Washington U. S. Attorney's office, here's how hundreds of newcomers are victimized. The new arrival checks his bag at Union Station and begins the room hunt. Hours later he finds a landlord who says he'll have a room available next day and a week's rent in advance, please.

The jubilant room hunter pays, pockets a receipt and departs rejoicing. Next day he returns. "No room here, sorry," says the landlord. The room hunter shows his receipt, asks for his money back. The landlord points to the receipt. It says "no refund after 10 hours."

The war worker is out \$5, \$10, or more—and still homeless. That's small stuff. Big-time operators mult home seekers of as much as \$200, deposit on purchase of a home.

Few college students ever buck a racket like this. But they are old hands at the perilous, complicated business of renting rooms and living in rooming houses. They could give lessons to women war workers now living in rented rooms for the first time.

To help them with their problems, the Women's Bureau of the Department of Labor prepared a list of do's and don'ts for roomers and landladies, complete with an epigram from Emerson: "Life is not so short but that there is always time enough for courtesy."

EXPERIMENTAL DRAMA. WPB isn't known as a patron of the experimental drama, but it's keeping an eye on an experiment among New England college theatres that involves—of all things—a logging project.

Since the experiment concerns reduction of the manpower shortage for winter logging operations, however, WPB has a legitimate interest. Matter of fact, WPB wrote the script. It's "Woodman, Chop That Tree," a dramatization of the

conceived in the first quarter of the year, ten in the second, only four in the third (summer heat), and six in the fourth.

The thoughtful parent may well give serious consideration to these forces affecting his unborn progeny, if he would give them all possible advantage in life."

CLAREMONT, Calif.—(ACP)—Izue Hisanaga will finish her college work at Oberlin college in Ohio this semester and will get a diploma—from Pomona college in Claremont.

Miss Hisanaga, who matriculated here, is from Hilo, Hawaii. When the evacuation order followed Pearl Harbor, the entire Pomona college student body and its brass band turned out to bid her farewell.

President E. Wilson Lyon of Pomona college forwarded her B.A. degree to Oberlin, for presentation by proxy.

She has two brothers in the United States army. Sgt. Bennie Hisanaga, former Pomona college football captain, and Kazuma Hisanaga. Bennie, said to be the only Japanese-American ever to captain a mainland college football team, plans to be an instructor in physical education after the war.

OMAHA, Nebr.—(ACP)—Three different speedup plans for students who enter the armed forces have been made available at the University of Omaha. Pre-induction review courses in urgent military subjects are now being offered, plus stepped-up courses in the regular academic field. These may be finished in

We Need Your Cooperation—

A Techsan Speaks

—By Barnett

WHEN the present editor of this publication took over the reins to guide The Toreador for the coming semester and later became editor for the approaching year, an editorial was written stating our policy.

Also in this editorial was a statement hoping for the full-fledged cooperation of students and faculty. We asked that every person connected with the college be free with opinions, suggestions and criticisms. Since that time drastic changes have occurred in this department.

Our reporting class, normally consisting of some fifteen to twenty members, has dwindled to seven members, and your editor. Many persons will assume that there is nothing so drastic in this fact. If they think so, we invite any one of them to accompany any one Toreador reporter on his regular beat.

This is not an apology for the amount of news that has been placed in Toreador columns in the few weeks that we have been in office. It is written in the hope that more help will be given Toreador reporters in the future. We realize that everyone on the campus has more to think about, and more to do, than in past years. Yet, many of these persons are complaining of the content of passing issues of the paper, and we believe that if they see so many mistakes in our columns they should be willing to give aid to the problem.

We, and this means your editor especially, are completely at a loss as to the answer to this problem. Everything in our knowledge and power has been done to remedy the situation with no degree of success. The time has at last arrived where ignoring facts will do no good. Something must be done, and done immediately.

We are asking not only the cooperation of members of the student association, and Tech faculty; but solicit also the suggestions and help of these persons. This newspaper is your paper and to keep it so we need your assistance.

Sarcastic remarks directed toward this writer will accomplish nothing. So many of these are received daily that it has been learned to ignore most of them as idle talk. What is wanted, and needed, is serious, business-like statement of fact. We can accomplish nothing when students refuse to be serious about the present conditions.

When reporters come to you for news, give them a little added boost. Some of them are new at their jobs and have had no chance for previous experience. The present emergency deems it necessary for us to work under difficult conditions and we are trying to make the most of what we have on hand. When you have knowledge of some event that you think will be interesting to the rest of the student body, do not keep it to yourself, or spread it around the campus by the "grapevine." Tell some staff member about it, and it will then find its way into the paper.

Perhaps your little news item will not make a banner story, but small insignificant stories turn into good "yarns." Do not feel slighted if your pet story does not turn up on page one, or perhaps is not even in the paper. We are doing all we can to get every bit of campus news into the paper that we can, and occasionally little bits of news escape our notice. It is not done purposely, but through oversight on the part of your editor.

This column may seem the futile effort of an incompetent person, but we feel that it is due more to lack of interest in the welfare of this publication than to the competency of any member of the present staff. We have offered no apologies in the above paragraphs for mistakes in past issues of the Toreador, for we feel that those are natural when a nervous, relatively inexperienced, and new regime takes over. We are asking for your aid in the continuation of a newspaper on this campus that is a mouthpiece of the students, and a newspaper that they will want to read; not one they will glance

at at the University of Colorado after his recovery, then became dean of law at Washington University in St. Louis and the University of Iowa.

Doris Nesbit Is To Be Home Ec Ed. Instructor

Miss Doris Nesbit of Arkansas has replaced Miss Johnne Bowles, assistant professor of home economics education, who is on leave to work with the state department in Austin.

Miss Nesbit received her B. S. degree from Oklahoma A&M and her M.S. from Iowa State. She has taught in the University of Nevada and the University of Maine.

She will be here until June 1. Miss Bowles will be back for the second semester of summer school.

## Aggies Down Steers To Win Laredo Meet

### Farmer Iron Man Cops Honors For Personal Scoring With 8

THE Texas Aggies stole the show and upset the defending champions at the Border Olympics eleventh annual meet last week-end in Laredo. The Farmers from College Station downed their ancient rivals, the Texas Longhorns who were defending the title, by scoring 32 points while the Steers accounted for 29.

Bill Henderson, most versatile athlete in College Station history, once again brought his name to the lips of Aggie rooters when he scored eight points to place as high man in the college-university division. His victory in the javelin throw was a major upset, in that he beat Wiley Cheatham, Texas ace, by three feet. Cheatham was defending champ in this event.

Pete Watkins, a fellow Aggie, was also a great contributor to the Aggie total. Watkins leaped six feet seven inches to win high jump, and set a new Border Olympic record. This topped the mark of six feet six inches set by Cox of Texas in 1940.

Thomas Jefferson of San Antonio won, as expected, in the high school division. This was the third straight title the Mustangs have captured. Texas Interscholastic league champions, the San Antonio Invaders, scored 28 points to take the trophy easily. Breckenridge placed second, but was far behind the winners; the Bucks scoring but ten points.

Two records fell in the high school division, the 440-yard relay mark and the half-mile or 880-yard run. Jefferson knocked their own record off one-tenth of a second to set a new low in this event. Bradford of Jefferson ran the half mile in 2:06.1, one-tenth of a second under the record of Joe Vajdos of Karnes City in 1940.

The Olympics had a new division during the meet, the military, and this was won by Hondo Flying school with 23 points. Brooks field of San Antonio was next with 19.

The feature of the new division was the one man team from Columbus, Mississippi Army Flying school, William Pope was the name, and he was formerly a member of the Texas Christian Horned Frog thinly clad squad. Pope scored 15 points to win individual honors in that division. He was also top scorer of the meet.

In the college-university division, the Oklahoma Aggies finished third. Southwest Texas State came in fourth with Howard Payne fifth. North Texas State's Eagles team placed sixth. This was something new also, as the Dentonites are usually top contenders for the crown, being one of the top track and field teams in the nation.

In the military division Laredo Army Air field was third, Columbus, Mississippi Army Flying school was fourth and Moore field of Harlingen was fifth.

## Denton Teachers Place Third In College Tourney

The North Texas Eagles fought their way into the quarter-finals of the National Intercollegiate tournament before meeting defeat. They then returned to the victory trail to place third in the tournament.

Cape Girardeau Teachers won a thrilling 34-33 victory over the Maryville, Missouri, basketballers, in the championship finals to cop the title of the tourney.

Jack Behrens' long one-handed shot gave the winners their trophy. With but six seconds remaining Behrens aimed and fired the shot. The net swished as the second score dropped through the basket.

Maryville's Ed Johnson frantically heaved the ball to a teammate from out-of-bounds, but the game ended before the Bearcats had a chance to score.

The Texas boys from Denton triumphed over Murray State Teachers of Kentucky 59 to 55 in an overtime game in the final night of the college tourney.

Howard Shannon, jump-shot artist, proved the difference in the extra period, and brought the Lone Star state team into a victory with three baskets in that short period.

ashore, aviation experience particularly desirable, to teach at ground schools, induction and training centers, bases. Subjects include navigation, aerology (meteorology), power plants (airplane engines), flight theory, structures, recognition of ships and aircraft, radio codes and visual signals.

Other officers especially needed right now according to the Navy's announcement, are those men 25 to 40 years who can meet the general qualifications and in addition qualify as Communications Specialists. This means they must have a master of arts or Ph. D. degree in mathematics, English or foreign language. Research experience is likewise desirable; duties will be analyzing code messages both afloat and ashore.

As Educational Officers, men are wanted between the ages of 22 and 55 who have taught mathematics and physics, Diesel, mechanical, electrical or radio engineering, and sea going experience is highly desirable. These men are in officer and midshipman indoctrination schools, officer training centers and schools for enlisted personnel.

Needed also is another type of Educational Officer to plan, organize, administer and teach classes for which naval personnel has volunteered at outlying stations, advance bases, Naval hospitals, training stations and Naval districts. At least five years' experience is desired in teaching or teaching and administration, with emphasis on mathematics, physics, engineering and related sciences, or in foreign languages—Spanish and French, especially. Age requirements are 26 to 41.

Applications for these special billets should be made to the Branch Office of Naval Officer Procurement, 1530 Allen Building, Dallas. Successful candidate will be given appropriate commissions in the United States Naval Reserve.

## Manpower Trouble Faces Meyer As Training Begins

Perhaps Coach Dutch Meyer, TCU gridiron mentor, will possibly have to have all sixty minute men next year if he is to continue to coach a football team for that university. There is a possibility also that he will have to teach his 11 men all of the positions.

"The manpower situation is so uncertain that we've got to have a lot of men who can plug a hole on short notice," Meyer said. "We run a reasonable chance of having at least 11 men, I think, left out about 40 eligible for spring training, but what 11 that will be, no one can say. So we'll do a lot of experimenting during this thirty day workout. The boys will at least get a lot of tough physical conditioning, and that's what Uncle Sam is wanting."

Now after a week's workout,

## Howard Pope Is One-Man Squad

Howard Pope hitchhiked his way from Ft. Worth to Laredo to win individual honors for the track and field meet there. Pope, formerly a Texas Christian Horned Frog, scored fifteen points to lead individual scorers.

Pope has always been a lover of track, and has kept himself in condition despite his induction into the army. He is now a physical instructor in the Army air force stationed at Columbus, Mississippi. His plane was grounded in Ft. Worth due to weather, but Pope

## Southwest Baseball Continues With Three Contenders

Out of the once large Southwest Conference baseball picture there appears only three teams which will carry on the 1943 schedule for that conference. The teams will be Texas University, Texas A. & M. and Rice Institute.

The title will be disputed as sure as it was in any other year, but the Aggies are favored to gain the title this year. Southwest Conference baseball has always been well attended and the fans have been able to see a good brand of baseball played by the representative teams. Play will begin this year at College Station when the Rice Owls will meet the Aggies on March 26.

Each team will play two games at home and two on the road with the teams field with each one of the opposing teams. The schedule was drawn up by Ed Olle, business manager of the university athletic department, and approved by each of the colleges.

The approved schedule is as follows:

March 26-27—Rice vs. Aggies at College Station

April 2-3—Rice vs. Texas at Houston

April 9-10—Aggie vs. Texas at Austin

April 16-17—Rice vs. Aggies at Houston

April 21-22—Rice vs. Texas at Austin

April 30-May 1—Texas vs. Aggies at College Station.

The schedule has been arranged so as to permit play only on the weekends; therefore the students participating in the sport will not miss school and their studies will not suffer. At A&M it is impossible to be out of school without a good excuse since the army took it over.

Since these three are known for their heavy rivalries in the Southwest it is certain that a lively

was determined to be present when the meet got underway.

He won first places in the one hundred yard dash and the fifty yard dash. Despite his efforts, the Hondo flying school won the Military division of that meet.

schedule will be followed and the Southwest fans will not fail to see the same spirit prevail. The three schools are close together thus they will be able to carry on their conference schedule without major difficulties.

## WAR BOND QUIZ

Q. In what names may a War Savings Bond be issued?

A. War Bonds can be registered only in the names of individuals in their own right, in one of the following forms:

1. The name of one individual, or
2. The names of two individuals, as co-owners, or
3. The name of one individual as owner and the other individual as beneficiary.

Q. May a Bond be registered in the name of a minor?

A. Yes.

Q. How can I buy a Bond by mail from agencies other than a post office?

A. Write to the Treasurer of the United States for an order form or send a letter with a check to the Treasury Department or to a Federal Reserve bank stating number and denominations of Bonds wanted and giving complete instructions as to the desired registration.

Q. Can Bonds be attached for debt in case of a judgment?

A. Yes. The right to receive payment of a Bond may be transferred through valid judicial proceedings, but only if the Bond itself is surrendered to the Treasury Department. See Treasury Department Circular No. 530, Fifth Revision.

Remember—the longer you keep War Bonds, up to 10 years, the more valuable they become.

WSS 707G U. S. Treasury Dept.

## ★ IN THE COAST GUARD ★

they say:

"SACK DRILL" — for take a nap

"FISH" — for torpedo

"FOUR-O" — for very good, or tops

"CAMEL" — for the favorite cigarette with men in the Coast Guard

## FIRST IN THE SERVICE

With men in the Coast Guard, Army, Navy, and the Marines, the favorite cigarette is Camel. (Based on actual sales records in Canteens and Post Exchanges.)

FOR RICH FLAVOR AND EXTRA MILDNESS, CAMELS ARE FOUR-O!

## THE "T-ZONE"

—where cigarettes are judged

The "T-ZONE"—Taste and Throat—is the proving ground for cigarettes. Only your taste and throat can decide which cigarette tastes best to you... and how it affects your throat. For your taste and throat are individual to you. Based on the experience of millions of smokers, we believe Camels will suit your "T-ZONE" to a "T."

Prove it for yourself!

## New under-arm Cream Deodorant

safely Stops Perspiration

1. Does not rot dresses or men's shirts. Does not irritate skin.
2. No waiting to dry. Can be used right after shaving.
3. Instantly stops perspiration for 1 to 3 days. Prevents odor.
4. A pure, white, greaseless, stainless vanishing cream.
5. Awarded Approval Seal of American Institute of Laundering for being harmless to fabric.

**Saved!**

**Tons of tin!**

For years telephone cables have been spliced in a very satisfactory way. But the solder joint contained 40 per cent war-vital tin.

So Bell System men devised a new type of joint which saves up to 80 per cent of the solder. A "Victory Joint" they called it.

The new technique has been adopted throughout the System with the result that 600,000 pounds of tin and an even greater amount of lead can be saved in a normal year's construction.

This is another example of the nation-wide cooperation of Bell System people in fulfilling their ideal—service to the nation in peace or war.

**Dorm Girls Entertain Pre-Flight Students**

—By Kara Hunsucker

MRS. Elizabeth Young had her hands full last week-end when pre-flight students swarmed the Women's Dorm—they were clamoring for introductions, and the house mother was acting as "go-between" for soldiers and dorm residents. The hall and dorm lounge seemed to be milling with uniforms, as girls came down to be "hostesses" to the boys during their off periods from 6:30 until 8:30 daily.

Most of these boys were from Barracks No. 1, who moved on the campus more recently, only to be placed under quarantine. Mrs. Young explained that boys in the first contingent found comparatively little trouble in meeting dorm girls, as a number of them are from Texas and a few had attended Texas Tech. In the new group, however, are many boys from far-away states who knew no one on the campus to introduce them to the girls.

During the two daily off-hours on week-days, the pre-flight students are restricted to the area within Nineteenth street and Avenue X; therefore, they swarm to the girls' dorm to spend the time talking in the lounge or for "coke dates" on the Avenue. There's almost no time for a bicycle ride around the campus.

"When the other boys are out of quarantine, they will again be anxious to be introduced to girls," said Mrs. Young. "We will make an attempt to help them feel at home on the campus, by introducing them to the coeds."

Indications of a threatened epidemic of measles during the past week remind us of about this time last year when dozens of students broke out with the illness. It also reminds us of the words of consolation clipped from an exchange.

- You have two chances
- One of getting the germ, And one of not;
  - And if you get the germ, You still have two chances;
  - One of getting the disease, And one of not;
  - And if you get the disease, You have two chances,
  - One of dying and one of not;
  - And if you die, Well, you still have two chances.

For the convenience of those students who want a quiet place to study in the crowded women's dormitory, the dining hall is now open each week-night from 7:15 until 10 o'clock. The study hall will be supervised each night by a member of Forum.

Inter-Club council is again sponsoring its silver tea tonight, this year in the home of Dr. and Mrs. Clifford B. Jones. All donations will be used for benefit of the council's loan library, by which needy students may rent books each semester at a nominal cost. It's a worth-while activity, and deserves support. Persons who

**Felicia Boulter Weds Bob Duncan**

Mr. and Mrs. Elmer Howard Boulter of 2604 Twenty-second street are announcing the marriage of their daughter, Felicia, to Lt. J. Robert Duncan, formerly of Henderson, on Saturday, March 6, at the post Chapel at Ft. Benning, Ga.

The ceremony was read by the post chaplain. The bride chose a dusty pink wool suit with brown accessories. She wore a corsage of brown orchids and carried a white Prayer Book.

Mrs. Duncan is a graduate of Lubbock high school. Until last week, she was a senior at Tech and a member of Theta Sigma Phi. She was majoring in journalism. Lt. Duncan was graduated from Henderson high school and is a former student of Tech, where he was a member of the Double T association. He is now stationed at Ft. Benning, Ga.

The couple will live in Columbus, Ga.
