

Carr works for Tech voice in city affairs

By TONY BATT
UD Reporter

On the night of March 13, Tom Carr was driving his car around Lubbock to release some of the tension of election eve. In the front seat was a portable radio and suddenly it beamed a news bulletin.

"...And in the runoff for the vice president for external affairs, the winner is Debbie Lansford." The announcement was erroneous and moments later a correction was aired but this made little difference to Carr, who abruptly discovered himself driving on the shoulder of the road.

"I nearly had a wreck," he said. "I felt a lot better when I heard the correction because ever since I've been here I've wanted to hold this office."

Carr earned the right to become the Student Association's external vice president after defeating Lansford by the slim margin of 153 votes. Lansford contended that Carr received too much free publicity and transformed this allegation into a campaign issue.

"I know that I was involved in a very controversial race but most of the controversy was between the candidates," said Carr. "I don't think the students were aware of the talk about free publicity and I know that I have not been hampered by any student resentment since I took office."

Perhaps Carr's biggest asset going into the election was his familiarity with Lubbock's city government. Since last October he has voluntarily served as the Student Senate's representative at city council meetings and intends to maintain close contact with the council in his new post.

"I'm very excited about the new officials on the city council," said Carr. "Mayor (Roy) Bass is conservative but I think he has to be in some areas. I have spoken with him and he has already indicated to me that he wants to address the Tech Student Senate."

Politically, Carr is probably the most conservative officer in the SA's executive branch. He and SA President Bill Allen, a devout liberal, have been known to clash on various issues while serving as student senators.

Carr is not flamboyant socially either. He enjoys participating in fraternity activities; his chief hobby is attending to his two large aquariums, and he has been dating the same girl for six years.

Upon graduation, Carr hopes to enter law school and then practice in a "middle-sized" metropolitan area, specifically his native Fort Worth or Lubbock.

"I know quite a few influential businessmen in Fort Worth," said Carr. "And I also know a lot of influential people here in Lubbock. My aim is to practice law in one of these two towns."

Right now, Carr is concentrating on making the new housing guide available to Tech students by May 1.

"We've had numerous requests for the housing guide and I hope that it will be available to the students before they leave for the summer," he said. The booklet was prepared by former external vice president Robert Grinsfelder and Carr said this year's guide should be the best yet.

"Robert did a great job on the housing guide and I think he did a good job in establishing this office," said Carr. "I just hope I can develop a cabinet that will work as efficiently as his did."

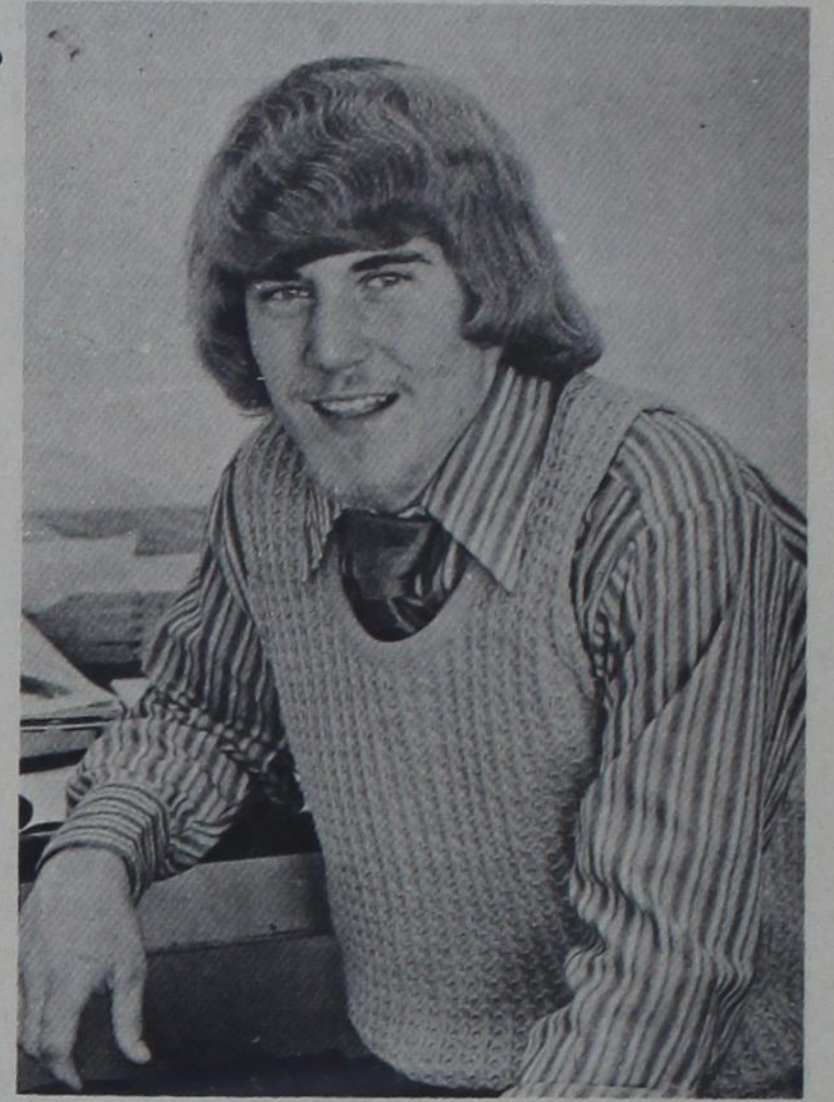

Carr is seriously considering reviving the shortlived Student Association book exchange and also plans an attempt to operating a food co-op for students.

"I got the idea for the food co-op at a recent Student Association convention in Fort Worth," he said. "North Texas State is running a co-op and it's been very successful for them."

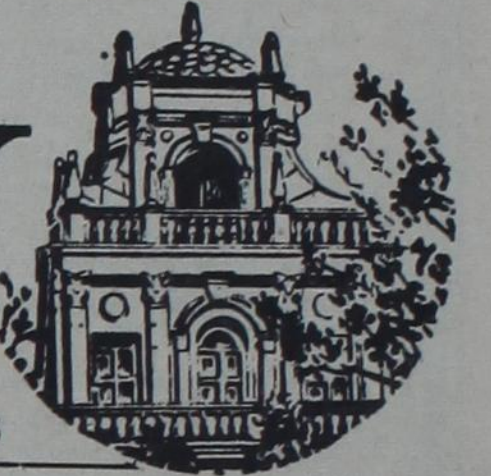

"I plan to try to set up a place where students can buy bread and other things to snack on at a lower price than at the surrounding grocery stores. The co-op would also open up more jobs for students."

The new external vice president says that the goal of his term is to make Tech students more aware of student and city government.

"We need to firmly establish students into the workings of city government," says Carr. "Whether Lubbock likes it or not."

Idris Traylor Man of Year for 1973-74

Student Senate adviser Dr. Idris Traylor Jr. was announced as 1973-74 Man of the Year by members of the La Ventana staff at a regular session of the Senate Thursday night.

Traylor came to Tech in 1965 after receiving his doctoral degree from Duke University. He is presently associate professor of history, director of academic affairs, and deputy director for the International Center for Arid and Semi-Arid Land Studies (ICASALS). In addition to his academic duties, Traylor also serves as faculty sponsor for five student organizations.

In 1972, Traylor became the first Lifetime Honorary Sponsor of the Student Senate. He has received the Golden Key Honor from the National Board of Delta Phi Epsilon, the professional foreign service fraternity, and the Knight Commander's Accolade from Kappa Alpha Order, the social fraternity for which Traylor is sponsor.

Traylor has received awards for his outstanding teaching abilities from both faculty and students. In 1971, Mortar Board, senior women's honorary, presented him with a Faculty Recognition Award for his outstanding work at Tech. He is now Mortar Board sponsor.

Traylor is also founder of the Tech chapter of Omicron Delta Kappa, a national leadership and scholastic honorary fraternity.

Man of the Year

Dr. Idris Traylor Jr. receives the Man of the Year award for 1973-74 from Myrleen Parlette, La Ventana Tyme editor. Traylor

was given the award for outstanding contribution to Tech. The La Ventana staff chooses the recipient each year.

Murray sends message from Niger

Tech President Grover E. Murray was allowed Thursday to cable home his first message to the University and to his family after he and five other Tech officials were in Niger, Africa during a coup.

Glenn E. Barnett, executive vice president, received the telegram from the American embassy in Niger saying that the group would be delayed coming back because of "specific requirements."

Murray and his group were in Niger to make a feasibility study for development of human, land and water resources for that drought-stricken area.

The group had not previously been allowed to communicate with the University or their families. There were no reports of

violence during the military takeover.

Murray said the project on which the team was working "is proceeding well."

He said, "Specific requirements necessitate remaining in Niger several additional days." The group had planned to return April 23.

Present in Niger along with Murray were Dean Anson Bertrand of the College of Agricultural Sciences; Dr. Frank B. Counselman, director of the International Center for Arid and Semi-Arid Land Studies; Dr. Robert C. Albin, an animal scientist; Dr. Donald F. Burlzaff, Chairman of the department of range and wildlife management; and Dr. Rex Kennedy, an agricultural economist.

Presentation, speakers highlight tenth session of Tech Student Senate

By TONY BATT
UD Reporter

Amidst the presentation of the Man of the Year award and two guest speakers, the 10th session of the Tech Student Senate conducted its first regular meeting Thursday night.

Legislation passed included two resolutions and one bill. Senate President Anne Moseley referred four bills to committees for consideration.

Prior to the legislation, however, Dr. Idris Traylor, the recently announced lifetime sponsor of the Senate was presented with the Man of the Year award by the editors of La Ventana.

"I'm really at a loss for words," said Traylor upon accepting the award given last year to Tech President Grover Murray. "I would like to say that I accepted this award very humbly but I am also deeply grateful for having received it."

Following the Traylor presentation, Jack Martin, president of the Texas Students Association, addressed the Senate. Martin informed the Senate about programs which are being pursued by the association, including a planned statewide referendum in September among the group's 30 colleges.

"If the Texas Constitutional Convention has completed its work by September, we hope to have a statewide referendum to find out how the students feel about the new constitution," said Martin. "This way we can let the people of Texas know how Texas students feel."

Dr. Charles Burford, faculty sponsor of the ninth session of the Tech Student Senate, then addressed the new group of senators. Burford praised the ninth session for its support of the registration of Gay Awareness and the "clean elections this past spring." But he also criticized the Senate for allocating "too much" money in the area of academic recruiting. "You must make the administration respect you and be willing to talk with them," said Burford. "I would suggest that you try your hardest to increase your influence in the distribution of students' allocation fees because it's your money."

After Burford's speech, the Senate elected a new president pro tem. Charlie Gonzales, Shannon McWilliams, and Keith Williams were nominated for the post with Williams narrowly defeating Gonzales 20-19 in a runoff.

The Senate then got down to the business of legislation, passing a resolution in support of Bob Vint who is running for the state legislature. A voice vote was taken and several senators declared they were opposed to the resolution.

The Senate also passed a resolution supporting the continuation of legislation providing for three legislative aids to facilitate the Student Association Code.

The only bill passed included an appropriation of money for the three executive officers during the summer months.

Sissy criticizes Briscoe for 'dilly-dallying'

By CHUCK LANEHART
UD Reporter

Frances "Sissy" Farenthold Thursday night criticized Governor Dolph Briscoe's "dilly-dallying" and "flip-flopping" on public issues and urged reform for Texas' property tax and public education systems.

Speaking before a crowd of about 600 at the Koko Palace, the Democratic candidate for governor said Briscoe is oblivious to the need for property tax reform. She noted that 25 to 33 per cent of all real property in Texas is not even listed on the tax rolls.

"THERE HAVE BEEN proposals in the legislature to move these tax matters along," she said. "But not one finger has been lifted by the incumbent to move it along."

The former state representative from Houston said Texas ranks 49th among the states on the parity between what is spent on rich children in rich school districts and poor children in poor school districts. She called Texas' education of Mexican-Americans "shameful."

However, she said "We can't move effectively into public school finance reform until we clear up the property tax system."

"The present state administration pays lip service to public education being the cornerstone of our democracy."

FARENTHOLD TOLD the audience that the Texas government continues to disregard the rights of some Texans and related a recent Prairie View incident in which students were not allowed to register to vote by the local county tax assessor-collector.

"When I learned of this, I talked to members of the governor's staff to see what could be done. But no one in that office interceded and the tax assessor-collector continued to refuse to register students." The case will go to the Fifth Circuit Court of Appeals.

Farenthold criticized Briscoe's "flip-flops" of his stance on the issues of parimutuel betting and regulation of telephone companies.

"The fundamental state issues don't grab headlines," she said. "The incumbent has said there are no issues in this campaign. Maybe there are no issues to him, but there are issues to you and to me."

Gov. Briscoe addresses 'old-fashioned rally'

By BOB HANNAN
UD Reporter

Gov. Dolph Briscoe, addressing an "old-fashioned political rally" Thursday at Southpark Inn, said top priority must be given to securing new sources of water for arid regions of the state.

Briscoe also said he was proud to take the record of the last session of the legislature to the voters, as it was only the second time in 20 years the requirements of the budget were met without adding new taxes.

GREAT PROGRESS HAS been made in education, he said, with an additional \$800 million devoted to education without increasing taxes. More than half of that money went to public education and bilingual education, where it was "long overdue and badly needed," Briscoe said. He also cited improvements in adult and kindergarten education and a "greater emphasis on career orientation" in education.

Agriculture and agriculture-related issues were mentioned by Briscoe. An out-of-state source of water must be secured for water-deficient regions of the state, Briscoe said. The situation must be met now, or otherwise, it will be a problem 25 years from now, he said.

He commented on the energy situation, saying, if action had been taken in that area 10 years ago, it would not be a problem now.

Briscoe cited the productivity of the Lubbock area as a factor in achieving a favorable balance of payments with other nations. Such agricultural sites are needed for the increased world-wide demands of food and fiber, he said.

SAYING THE TEXAS Democratic Party is "more united now than at any time in the party's history," Briscoe asked those present to be a part of the party's processes.

Although he did not specifically mention the Watergate affair, Briscoe said people should not let their discouragements about politics at the national level cause them to forget the importance of the individual.

Briscoe said he is optimistic about the future of Texas.

There are many reasons for his optimism, Briscoe said, and one is his belief that Texans are working together better than ever before. Gaps between age groups are being bridged, he said, as are gaps between rural and urban groups.

Jim Farr

LEGAL RAP

Education, succinctly speaking, is the primary objective for a column of this nature. However, I must admit that recently I have devoted verbalism to warnings of the consequences of violations of the new Texas Penal Code. The code itself states that one of its purposes is to give fair warning of what is prohibited and of the consequences of violation.

It was in September that I pointed out that I would direct a major part of my efforts toward helping students prevent problems. It is for that reason that the last two editions of *Legal Rap* examined portions of the new criminal law.

Of course, this discussion by no means adequately covers the Code; I am only devoting space to those problems that students appear to confront most frequently. I have used the expression, "Texas Penal Code" several times. It is simply that body of law establishing a system of legal prohibitions and penalties; in other words, the criminal law. It is the 1974 Code that so significantly alters that system.

A discussion on the danger of complacency concerning prosecution of marijuana offenders under the new drug law drew a large response; however, in the past three days six students have been the victims of searches and several were actually busted. Most of these cases resulted from careless disregard of the recent rash of drug raids.

I followed that discussion with a review of the latest law defining theft offenses which includes passing worthless checks. Just this morning, a student called to relate to me a local store was turning over a check to the district attorney's office. He was surprised to find that this action could result in criminal prosecution.

Today, I intend to continue this series on the 1974 Texas Penal Code with another problem area that seems to concern students. It is the rule that governs criminal responsibility for the conduct of another.

Interestingly enough, many students who get into trouble do so together. Roommates are often busted together, or good friends may both find themselves in trouble because one shoplifts while the two are on a joint

shopping venture. It is certainly not unusual in a student community for several friends to get together; drink a few beers, and join in some illegal conduct. It is possible for someone to be responsible for the criminal misconduct of another?

The answer is yes!

Everyone knows one is responsible for his own criminal conduct, but it is also possible for a person to be criminally responsible for an offense committed by another; several elements are involved.

Soliciting, encouraging, directing, aiding, or attempting to aid another person commit an offense makes both parties responsible for the offense. It is even possible for a person to become criminally liable if he fails to make a reasonable effort to prevent the commission of the offense. It is not necessary that the party who solicits, aids, encourages, or fails to make an effort to prevent a crime be in the actual vicinity of the criminal act. Status, not position, determines a person's liability as a party.

For example, a student who solicits or encourages his roommate to shoplift a couple of tapes from a discount store is criminally responsible even if he remains at home. Likewise, if they are together and one person shoplifts the other could be equally responsible if he fails to report the act.

In a prosecution in which an individual's criminal responsibility is based on the conduct of another, it is no defense that the person accused of committing the act is acquitted or for some reason granted immunity from prosecution.

It appears that the new code destroys the old distinction between accomplice and the principal, and establishes the rule that a person may be convicted of a crime when he is responsible for the conduct of another although he did not actually commit the offense.

In my opinion, what the law really does is to equalize criminal responsibility, and it removes the necessity of determining who committed the act and who was an accessory. Friends arrested together may find that it is all for one and one for all.

"DON'T I HAVE ENOUGH TROUBLE WITHOUT YOU UPSETTING RONNY LIKE THIS?"

WASHINGTON merry-go-round

by Jack Anderson

Washington globetrotters

WASHINGTON — Spring has smitten members of Congress with a familiar old virus called wanderlust. Once again, they are setting out from Capitol Hill in droves to explore the world.

Such is the scope of the great migration that it can be said the sun never sets on Congress during the tourist season. The unabashed King of the Road, despite the stiff competition, is California's Rep. Richard Hanna, a diminutive Democrat and former vaudeville dancer, who occasionally does a softshoe onto the House floor.

He has shuffled around the East, both Far and Near, so frequently that the bellhops know him on sight. The New Year had scarcely passed this year before he was off again, visiting such distant exotic spots as Indonesia, Yemen and Saudi Arabia.

Now he is preparing for another junket this month to Egypt, Kuwait and Saudi Arabia. But for Hanna, this is merely an average year of globetrotting largely at the taxpayers' expense.

He took his first trip to the Orient in 1967. Two years later, he arranged four overseas odysseys to Europe, Latin America and the Far East.

In 1970, he managed just one trip to Asia. But in 1971, he visited South America, the Far East and Europe. In 1972, he got to Europe in April, to South America and Asia in August and to Europe, the Middle East and Far East in November and December.

While he was in Japan, Hanna demanded the full, red-carpet treatment, including a request for a military helicopter to lift him over the traffic jams that lesser tourists must cope with in Tokyo.

He went overseas three times in 1973, going all the way to the Soviet Union and Africa. He was in Cairo when the October war exploded and the airport was shut down. But this didn't slow down the veteran vagabond. He hopped a train to Alexandria, boarded an Egyptian freighter and made his way to Greece.

Hanna is merely the most peripatetic member, however, of the Washington Globetrotters. Here are the travel plans of some others:

—This weekend, a delegation of 63 persons — congressmen, their wives and staff members — will fly by

military plane to the Far East for a trip that has been postponed twice because of the energy crisis. The official excuse is to exchange visits with legislators from South Korea and Nationalist China.

The expedition will be led by House Democratic leader Thomas "Tip" O'Neill who will take along his daughter, Rosemary. The group will also bring their own "physician in attendance," Adm. Carey Freeman, who will be provided by the Navy. Each traveling congressman, including the ubiquitous Richard Hanna, will be permitted to spend up to \$75 a day in U.S.-owned foreign currencies.

—Sen. Vance Hartke, D-Ind., just returned from a jaunt, with his wife and daughter, to the Far East. Arrangements were made for him by the State Department, according to official cables, including an "elephant ride, sightseeing tour and gem shopping" in Ceylon.

—Cabinet officers, too, like to travel. Treasury Secretary George Shultz has announced his intention to leave government. But this hasn't prevented him from taking a jaunt to South America. Now again on Monday, he will head for Australia, Indonesia, Singapore and Malaysia where, according to a spokesman, he will "talk about general economic matters." In Jakarta, Shultz will be joined by — guess who? — Rep. Richard Hanna, who will ride the secretary's plane to Malaysia.

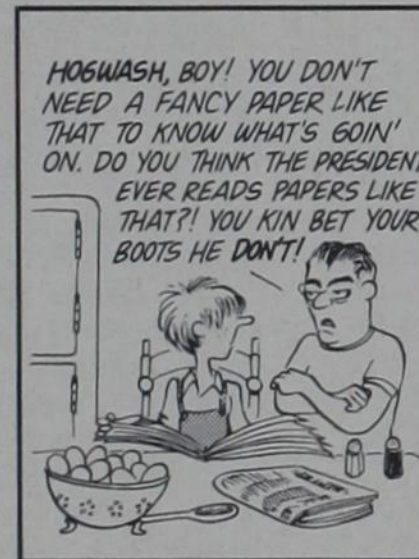

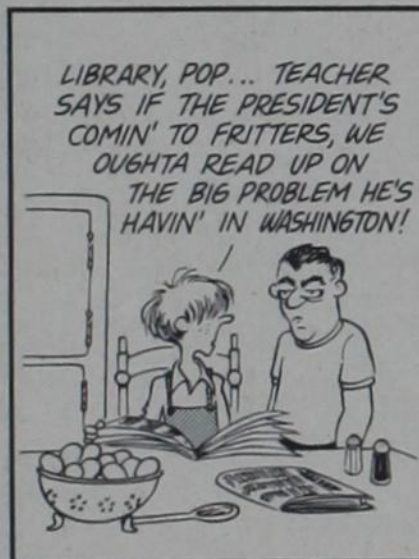

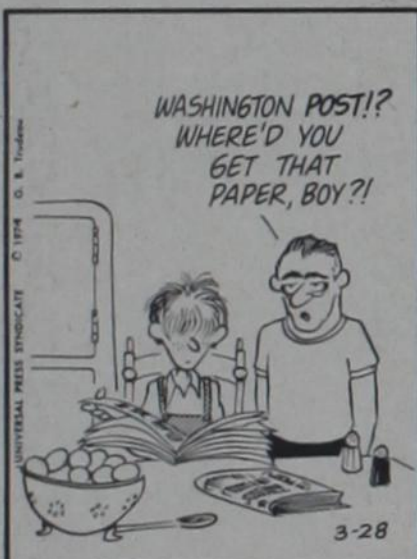

—Agriculture Secretary Earl Butz, who is supposed to occupy himself with farm problems at home, has departed for Thailand, Hong Kong, the Philippines, Taiwan, Japan and Korea. His last stop will be Hawaii, where he will spend a couple of days inspecting pineapple, papaya, sugar cane and cattle farms. "You'd be surprised how much agriculture there is on those tiny islands," said a spokesman.

About letters

Letters to the editor can be mailed to "The Editor", University Daily, Journalism Building, Texas Tech University, Lubbock, Texas, 79409. Letters should be typed on a 65-character line, double spaced. Although hand written letters will be accepted, typed letters will receive preference in publishing. All letters should contain the name, address and telephone number of the author. This information can be withheld from publication upon request.

NEWS BRIEFS

San Francisco police search for killer

SAN FRANCISCO — Police officers swept through the streets of San Francisco on Thursday, conducting unprecedented searches of black men in their hunt for the killer or killers of 12 white persons. Police officials reported that, although there was some resentment, most persons subjected to searches understood the reason and hoped it would uncover what Mayor Joseph L. Alioto described as "a mad killer." In announcing the stop-and-search procedure Wednesday, Alioto appealed to the black community to cooperate. He said officers would question persons who resembled a composite of a slender, black, mustachioed man made from witnesses' descriptions.

Stans says he never helped Vesco

NEW YORK — Former Commerce Secretary Maurice H. Stans told a federal court jury Thursday: "On my oath, I never did anything to help Robert Vesco, and I never asked anyone to do anything." Stans, 66, and former Atty. Gen. John N. Mitchell, 60, are accused of conspiring to obstruct a Securities and Exchange Commission fraud investigation of Vesco, an international financier, in exchange for a \$200,000 cash contribution to President Nixon's 1972 re-election campaign. They also are charged with lying to a grand jury in an effort to conceal the alleged deal.

Hearst glad FBI, police on case

SAN FRANCISCO — Randolph A. Hearst said Thursday he was thankful the case of his kidnapped daughter, Patricia, 20, was in the hands of police and the FBI and called U.S. Atty. Gen. William B. Saxbe "irresponsible" for branding her a common criminal. Besides Hearst, editor and president of the San Francisco Examiner, FBI Director Clarence M. Kelley also took exception to the statement that Miss Hearst appeared to be a willing participant in a violent bank robbery Monday by members of the Symbionese Liberation Army, which claims to have kidnapped her 2½ months ago. "We will be guided by the facts and not by any opinion," he said, adding that the FBI and the U.S. attorney's office in San Francisco were pursuing the case on the assumption that Patricia "is the victim of pressure or coercion."

Marijuana may decrease fertility

BOSTON — Men who smoke large amounts of marijuana run the risk of decreasing their fertility, according to a report coauthored by noted sex researcher William H. Masters. The report, published in the New England Journal of Medicine, was based on research at the Reproductive Biology Research Foundation in St. Louis, headed by Masters. Tests on 20 men who smoked from five to 18 "joints" a week for 18 months or longer showed that 35 per cent had noticeably decreased sperm counts. Blood levels of the sex hormone testosterone also averaged 44 per cent lower in the drug users than nonusers.

Judge orders Nixon to surrender tapes

WASHINGTON — A federal judge ordered President Nixon on Thursday to surrender tapes and documents of 64 conversations to be used in the Watergate cover-up trial involving men who were once his top lieutenants. The subpoena was served on the White House a few hours after it was ordered by U.S. District Judge John J. Sirica. The President has until May 2 to comply. There was no immediate word whether the White House will comply with the latest legal effort to wrest Watergate information from the President. Deputy Press Secretary Gerald L. Warren said "the matter will be considered by the special counsel."

Save Now during Varsity's Spring Book & Record Sale

Here's your chance to save on books for yourself or for gift giving ... everyone appreciates a book of their favorite hobby or interest ... you'll find you can make substantial savings of hundreds of books on almost every subject and on a wide variety of record sets and singles.

FAMILY CIRCLE DIET & EXERCISE GUIDE. By Mary Milo (Beauty Editor) and the Family Circle Food Staff. More than 200 diet recipes, desserts that don't say diet, calorie-counted meal plans, diet tricks and treats, figure-firming exercises and spot reducers. Bonus—nutrition chart to hang on your wall. Lavishly illustrated over 25 in Full-color. 148 pages with index. \$14.95. Special Value 2.98.

FAMILY CIRCLE GREAT CHICKEN RECIPES. Edited by Nancy Mecht. Offers over 200 recipes for one of the best buys in your meat market. These kitchen-tested chicken favorites include one-pot specials, oven-easy ideas, superb dinners from leftovers, make-ahead, and low-cost company meals. You'll also find nifty recipes for soups, gravies and sauces, as well as ideas for the "sauté" in you. Lavishly illustrated in Full-color and B&W. 148 pages with index. \$14.95. Special Value 2.98.

FAMILY CIRCLE GREAT GROUND-BEEF RECIPES. By Family Circle Food Staff with Anne Fletcher. More than 350 ideas for hamburgers, meatloaves, casseroles, cookouts, meat balls, and gourmet recipes. Lavishly illustrated with over 30 photographs in Full-color and many black & white. 148 pages with index. \$14.95. Special Value 2.98.

FAMILY CIRCLE GUIDE TO BEAUTY. By Mary Milo (Beauty Editor). 36 How-to hard-to-find hair conditioning and coloring, secrets of the new make-ups, help for skin problems, skin-analysis chart, and more. Over 100 exercises. Contains over 40 Full-color photos and many black & white. 140 pages with index. \$14.95. Special Value 2.98.

FAMILY CIRCLE HOME DECORATING GUIDE. Ed. by Carolyn Kishop. Editha Richards. Shows you 100's of ways to decorate with your head & hands, rather than your pocketbook. Within its 128 pages you'll find new and exciting suggestions for all your "living" rooms—indoors and out. There are priceless ideas for window treatments, space-saving furniture arrangements, storage ideas and ways to develop color schemes. Over 75 rooms illus. in Full-color. 128 pages with index. \$14.95. Special Value 2.98.

SPORTS GREATS. THE MEN WHO MADE IT GREAT. Baseball, Football, Basketball, Hockey. Short biographies of the greats of all the major team sports from Ty Cobb and Babe Ruth to Johnny Bench, Roberto Clemente and Vida Blue, from Jim Thorpe to Joe Namath, Jim Knick and Larry Conka, from Hank Luisetti and George Mikan to Kareem Abdul Jabbar and Walt Frazier. From Howie Morenz, Maurice Richard and Gordie Howe to Bobby Orr. With special sections on up and coming players. A must for every fan. \$14.95. Special Value 2.98.

A POPULAR HISTORY OF WITCHCRAFT. By Montague Summers. This is one of the most terrifying studies of the occult ever published. Mr. Summers has a wonderfully good time in describing its nefarious orgies with a "goulish gusto". \$14.95. Special Value 2.98.

2065. ATLANTIS DISCOVERED. By Lewis Spence. This author, best known for his Encyclopaedia of Occultism, wrote over 200 books on Atlantis, of which this is the most important. Here he brings together the facts from many sources which prove that Atlantis really existed as a great civilization. 270 pages. \$14.95. Special Value 2.98.

YOUR PSYCHIC POWERS & HOW TO DEVELOP THEM. By Hereward Carr and Gordon Howie. The psychic force in man can be systematically trained. The author trained himself & many others in how to banish fear; the human aura; telepathy & clairvoyance; automatic writing; crystal gazing; spiritual healing; precognition. A book in which these precious teachings are summarized. \$14.95. Special Value 2.98.

WEBSTER'S NEW WORLD DICTIONARY of the American Language. This famous College Edition has the largest word stock of all college dictionaries. The modern record of words and phrases, with clear and comprehensive definitions, essential pronunciations, complete etymologies—all in large, clear type. Over 142,000 entries—more than 1,200 illus.—1,740 pages.—Thumb-indexed. \$14.95. Special Value 2.98.

Mel Torme's THE OTHER SIDE OF THE RAINBOW with Judy Garland on the Dawn Patrol. 2nd Printing. Warm, objective, compassionate portrait of Judy Garland during her last important moments of triumph in the exciting, funny and frustrating Judy Garland Show. 20 superb photos. \$14.95. Special Value 2.98.

TOUCH THE EARTH. By T. C. McLaughan. A self-portrait of Indian existence in the United States today. The book recounts the nature and fate of the Indian way of life and how it now attempts to revitalize itself as an affirmative cultural force in today's society. \$14.95. Special Value 2.98.

ROGET'S THESAURUS. The book no home library should be without. Synonym and antonym collection of over 1,000 English words and phrases. The 100,000 words include synopsis of categories, classification of words, complete index. Key words shown in bold type. 448 pages. \$14.95. Special Value 2.98.

PRINTS AND DRAWINGS. A PICTORIAL HISTORY. By Goffred Lindemann. An impressive visual survey of the world of prints and drawings. 394 illustrations including 213 in FULL COLOR representing all the major graphic artists from Durer to Rembrandt to Picasso are well represented. A Very Special Value at Only \$12.98.

PORTRAITS OF NORTH AMERICAN INDIAN LIFE. By Edward S. Curtis. The monumental classic capturing the spirit of the Indian lifestyle. This collection contains over eighty full-size (15x17) portraits, each suitable for framing. Each photograph preserves the beauty and pathos of Indian life. A must for collectors. \$14.95. Special Value 2.98.

THE OLYMPIA READER. Edited by Maurice Girodias. This anthology gathers a rich harvest of the great, the near-great, and the inimitable Olympia entertainments, with emphasis on excerpts that have never appeared in this country; a section from The Ginger Man satisfyingly elaborate in the American edition, a gamy translation of Zazie never printed in America, and many more. Taken together, it constitutes perhaps the best existing collection of the ribald and erotic. Henry Miller, J. P. Donleavy, Bertolt Brecht, Genet, Frank Harris, William S. Burroughs, and over twenty more famous Olympia Press authors are represented. \$15.00. Only 5.98.

MARY MARTIN'S NEEDLEPOINT. By Mary Martin. With the same outgoing enthusiasm that has made her the great beloved star of Broadway, Mary Martin gives here an offstage account of the pleasures of needlepoint that will make still more converts to the most popular kind of needlework being done in America today. She has illustrated how-to section written especially for beginners, but containing much anyone needs to know to work on designs that range from simple first efforts to the most complicated projects. The secret is that only minor variations on one basic stitch are used even for the most complex designs. 37 full-color plates, 54 black & white photographs. 14 how-to drawings. \$15.95. Only 5.98.

2064. INTRODUCTION TO ZEN BUDDHISM. By D. Suzuki. A double volume, containing both the title work, which outlines the key elements in Zen, and the author's Manual of Zen Buddhism, a compilation of the literature every Zen monk reads. The two make the ideal introduction to Zen at the hands of the greatest exponent of Zen to the Western World. 366 pages. \$15.98. Only 3.98.

2059. ILLUSTRATED ANTHOLOGY OF MAGIC AND ALCHEMY. By Emile Grillo de Givry. 364 plates and illustrations accompany the text of France's greatest scholar of the occult make this oversized book a splendid gift for anyone interested in witchcraft, magic or alchemy. 356 pages. \$15.00. Only 4.98.

HOUJINI: A Magician Among the Spirits. By Harry Houdini. One man's magic may be another man's spiritualism. But not to Houdini. To the master magician of them all, spiritualism was a fake. Follow Houdini on his way to sciences & meet the spiritualists of his time while he tells you something of the most modern spirit manifestations. \$15.00. Only 2.98.

A HISTORY OF CHESS. Ed. by B. H. Wood. Chess, perhaps the most popular of our pastimes, is a fascinating subject for study. With innumerable illustrations accompanying the lively text, even the non-player could not fail to be fascinated by this history from the origin of the game to the mysterious East, with all the intrigue associated with its evolution. Photos as we know it today. Profusely illustrated with typed color photographs & hundreds of black & white photos & drawings. Special Value 1.98.

THE GOLDEN TREASURY OF CHESS. The most famous collection of chess masterpieces ever published. Includes the games of Bobby Fischer, Petrosian, Spassky, Evans and Reshevsky. \$14.99. Only 1.98.

409 FABULOUS FACES. By Larry Carr. The most sumptuous film guide ever published. Includes over 1,000 rare photographs, many never before in print and a 16-page color section of priceless old movie magazines. Four Fabulous Faces is a lavish testimonial to the ageless beauty of our extraneous needs to dress. Gloria Swanson, Greta Garbo, Joan Crawford and Marlene Dietrich are featured. \$14.98. Only \$14.98.

DOWN THE COLORADO. Diary of the First Trip Through the Grand Canyon. Pictographs & Epilogue by Eliot Porter. Contains John Wesley Powell's dramatic journal of 1849 when ten men in four boats swept down the raging Colorado River over rapids considered impassable, to chart the unexplored river and its surrounding canyons. Includes a page gallery of four color photographs by America's foremost photographer of nature. 104"x14". \$13.00. Only 12.98.

A DICTIONARY OF THE OCCULT. Ed. by Julian Franklyn. A dictionary encyclopedia devoted to encyclopedic essays on major subjects, including: Alchemy, Astrology, Black Magic, Buddhist Occultism, Chinese Occultism, Devil Worship, Fairies, Ghosts, Occult History, Occultism in Ancient Greece & Rome, Spiritualism, The Vampire, the Werewolf, White Magic, & Witchcraft. \$14.95. Only 2.98.

CREATIVE CARVING. A fully illustrated, step-by-step guide to the rich and exciting art of carving. Beginning with wax, soap and fruit, you will learn to create sculptures with a paring knife; then familiar with the carving process, advance to more sophisticated forms of this art. Over 200 photographs. 15 in full-color. \$14.95. Only 3.98.

2403. CREATING WITH PLASTER. By Dona Z. Meilach. Written by an artist and art teacher, this is an extremely good do-it-yourself book because of the clarity of the instructions, the simplicity of the materials, and the illustrative photographs. 150 B&W photos. \$14.95. Only 2.98.

2140. CREATING ART FROM FIBERS & FABRICS. By Dona Z. Meilach. From artists and craftsmen throughout the world are gathered an assortment of ideas on how to transform fibers and fabrics—single cords, yarns, satins, and wools into an array of artistic expressions. Over 240 black and white photographs and color plates. \$14.95. Only 3.98.

CONTEMPORARY LEATHER: Art & Accessories. By D. Meilach. From types of hides, selection of leathers, and tools & their uses through stitching, forming, collages, sculpture, leather macrame, knitting, sandblasting, clothing, furniture, more. 263 illus. 12 Full-color. Softbound. \$14.95. Only 1.98.

COMPLETE HOME DECORATING. By Connie Dodds Devitt. Editorial Director. Ideas for much more substantial fare than the mental suggestions for windows, walls and floors. Color concepts, how-to directions, space saving and more. Hundreds of photos, many in full color. \$10.00. Only \$3.98.

COMPLETE CROSSWORD DICTIONARY. Easily read with cross reference, bold face entries, 200,000 definitions. Divided 3 ways: by alphabetical order, subject in encyclopedic form and by number of letters in word. 448 pages. \$14.95. Only \$1.98.

THE COMPLETE WORKS OF SHAKESPEARE. All that Shakespeare ever wrote in a complete edition (2 inches thick) following the arrangement of the First Folio of 1623 with "Pericles" the poems and sonnets appended. 1,100 Double-Column pages: ribbon bookmark. Special Value 2.98.

CHILDREN'S STORIES OF THE BIBLE FROM THE OLD & NEW TESTAMENTS. Ed. by B. Bradford Spalding. Profound, & Jewish religious consultants. Beautifully illus. with superb watercolor. 33 old testaments & 54 new testaments. Stories & selected Psalms for all faiths. \$14.95. Only \$2.98.

Bruno Bettelheim's THE CHILDREN OF THE DREAM: Communal Child-Rearing and American Education. 7th Printing. "The children of the dream" are the first new generation to be born and brought up on a kibbutz. A masterful analysis based on intensive research and a pioneer's first-hand knowledge materially change our society and our world. \$14.95. Only 1.98.

CHAMPIONSHIP SELLING. By Hugh S. Bell. The plans, techniques and methods of getting the sale started on a favorable basis—how to make a good sales talk and how to finish the race and get the order. \$14.95. Only 1.98.

CALDER. Intro. by H. Harvard Arnason. Photographs & design by Ugo Mulas. Presents a full survey of Calder's growth from his mobiles and stables, wire & circus sculpture, to his recent striking architectural and theatrical designs. Traces the life & career of the artist who made sculpture "move". Includes revealing comments by Calder himself. Lavishly illustrated. \$14.95. Only 3.98.

BRENDAN. By Ulick O'Connor. An oral story of Brendan Behan, Irish writer, rebel, and alcoholic whose passionate temper & life style made him a legend in his own time. 28 photos. \$14.95. Only 1.98.

THE BOOK OF CRAFTS. Edited by Henry Pluckrose. An introductory guide to the crafts. Imaginative people who wish to rediscover the satisfaction of making something with their own hands. Over 20 fields are discussed from clay and modeling, collage, copper enameling, glass, leather, mobile, puppets, sawing and wood carving. Each chapter begins with a description of the tools used for the material of process under discussion and then moves into basic how-to methods. Over 200 photographs. \$14.95. Only 3.98.

THE BOOK OF WEREWOLVES. With an Account of a Terrible Superstition. By Sabine Baring-Gould. Werewolves are human beings who change to animal form through magic & lust for the flesh of other humans or animals. The tradition is one which goes back to the dawn of history. A horrifying book which demands serious consideration. Includes all the important film stars and campaigns interviewed. Included are ads for the famous star vehicles "Nobody's as Good as Bette Davis When She's Bad!" Academy Award pictures, series films, cartoons, a fascinating study of Disney promotions, etc. Illustrated with nearly 800 vintage examples creating a nostalgic treasure-house of cinema memories and a reference gold-mine of adroit advertising. \$14.95. Only 5.98.

2597. THOSE GREAT MOVIE ADS. Edited by Edward Z. Epstein and Eleanor Clark. Introduction by Judith Clark. Traces the development and growth of the movie industry—from the nickelodeon days to the present, from Nicky Peckford to Myra Breckinridge—with all the important film stars and campaigns interviewed. Included are ads for the famous star vehicles "Nobody's as Good as Bette Davis When She's Bad!" Academy Award pictures, series films, cartoons, a fascinating study of Disney promotions, etc. Illustrated with nearly 800 vintage examples creating a nostalgic treasure-house of cinema memories and a reference gold-mine of adroit advertising. \$14.95. Only 5.98.

1507. THE BOOK OF BLACK MAGIC & CEREMONIAL MAGIC. By Arthur Edward Waite. Practical magic that you can get nowhere else. Original magical texts that do not exist in any other English translation. The famous author's best book on the subject and perhaps the best book ever written about it. Illustrations include hundreds of magical figures of all kinds. \$12.98. Only 3.98.

1508. THE BOOK OF VAMPIRES. By Dudley Wright. This book is much more substantial fare than the revival of interest in the vampire theme in movies, with infinite variations on the Dracula story. It is the first serious study of vampirism in the English language with assembled reports of vampires from all ages and from countries all over the world. The best general introduction to a weird subject! \$18.95. Only 2.98.

1500. THE BHAGAVAD GITA. Translated from the Sanskrit by Mohini M. Chatterji. The meaning of Hindu existence is the theme of this ancient Hindu scripture, dating from the centuries before Christ. The Gita finds an answer which is directly relevant to our own times. \$17.95. Only 3.98.

THE BEST SUPERNATURAL TALES OF ALGERNON BLACKWOOD. This great author's own choice of the very best of his many tales of the uncanny, mysterious and macabre. 500 pages. \$17.95. Only 2.98.

BEST LOVED NURSERY RHYMES AND SONGS. Ed. by A. Baker. (In Public Library). Delightful treasury of cherished, charming stories—everything from Mother Goose to The Lion & the Unicorn—each story a bit more difficult to encourage reading progress. Magnificent volume illustrated throughout. \$14.95. Only 2.98.

ARCHERY FOR ALL. By Daniel Roberts. Discusses the variety of archery activities, the equipment needed, how to select the archery club, scoring and tournaments, and the history of archery. \$15.95. Only 1.98.

Dr. David Reuben's ANY WOMAN CAN Love and Sexual Fulfillment for the Single, Widowed, Divorced... and Married. The author of Everything You Always Wanted to Know About Sex presents an even longer, richer, more probing, and more penetrating, practical, and emotionally than his last volume. With this book anyone can learn how to win love and achieve a more vibrant, fulfilling sex life. \$17.95. Only 5.98.

TO PEKING-AND BEYOND: A report on the New Asia. By Pulitzer prize-winner Harrison E. Salisbury. A detailed and literate report resulting from traveling thousands of miles and talking with Chou En-Lai, Madame Chiang-Ling, Prince Sihanouk, farmers, students, city officials, steelworkers, ballerinas, and classical scholars. \$17.95. Only 1.98.

Alan Truscott's MASTER BRIDGE. By Question and Answer. The Bridge Editor of the NY Times presents significant problems for players at all levels save the complete beginner. Even experts will find the questions challenging. \$14.95. Only 1.98.

ART TREASURES IN THE BRITISH ISLES. Ed. by Myers & Copplestone. Visually stimulating survey of Britain's artistic heritage — from the mysterious monument of Stonehenge to the monolithic simplicity of the sculpture of Henry Moore, plus Britain's famous art collections. 265 illus. 122 in Full Color. \$14.95. Only 3.98.

ART TREASURES IN GERMANY. Ed. by Myers & Copplestone. Excellent survey of German art and architectural treasures from ancient Celtic jewelry & Roman ruins to northern Renaissance and the major contributions of modern German art. Surveys both art created in Germany and that in the great German collections. 259 illus. 127 Full Color. \$14.95. Only 3.98.

ART TREASURES IN ITALY. Ed. by Myers & Copplestone. From Bronze Age, the Etruscans & Romans through the glories of the Renaissance and into the modern era. A comprehensive survey of art in Italy, the masterpieces created there and those in its great collection. 286 illus. 136 Full Color. \$14.95. Only 3.98.

ART TREASURES IN RUSSIA. Intro. by Prince Dimitri Obolensky. The art treasures and masterpieces of Russia from ancient Scythian goldwork to the modern era; surveys both works created in Russia and those in Russia's great collections. 248 illus. 124 in Full Color. \$14.95. Only 3.98.

THE GOLD MINES OF CALIFORNIA. The gold boom includes California and its Gold Regions by Fayette Robinson, a typical guidebook which was rushed from the presses to sell to the forty-niners; and California in 1850 compared with what it was in 1949. With a Glimpse At Its Future. Destiny by Franklin Street. More recent and lacking the flamboyant historicism which marked most of the 1849 guides. illus. \$11.00. Only 2.98.

TEXAS: DREAM OF EMPIRE. A Human History of the Republic of Texas. By Lewis P. Hahn. Edward Weems. The story of the decade in which Texas was a sovereign nation, one of the most dramatic and least-known episodes in the history of this continent. Published at \$9.95. Now only \$3.98.

ART TREASURES IN SPAIN. Ed. by Myers & Copplestone. Surveys the magnificent art and architecture of Spain, from Celt, Phoenician & Roman eras through the glories of empire and into the modern era; covers the treasures created there and the great Spanish collections. 248 illus. 122 Full Color. \$14.95. Only 3.98.

CHINESE COOKING. Now within your reach is the old China and the atmosphere of the Orient. Here are the authentic recipes for Peking Duck, Foo yong, Tea eggs, chicken & pineapple, Tung Po pork, Chop Suey, fried rice, eight precious pudding. You will want to try all of them! illus. throughout in beautiful 4-Color photographs describing the delectable creations. \$14.95. Only 2.98.

SCANDINAVIAN COOKING. The Scandinavian climate reflects the countries' eating habits: Danish pea soup, cabbage-soup, baked Baltic herring, Swedish meatballs, Norwegian fish moid. And of course, smorgasbord is a feature on most daily menus. illus. throughout in beautiful 4-Color photographs describing the delectable creations. \$14.95. Only 2.98.

DUTCH & BELGIAN COOKING. The Low Countries and Belgium combine simplicity with refinement of taste. Try the mussels from the North Sea, Flemish and Flamandes, chicken soup, custards and a vast choice of recipes making use of fresh vegetables in season. illus. throughout in beautiful 4-Color photographs describing the delectable creations. \$14.95. Only 2.98.

SPANISH & PORTUGUESE COOKING. The particular location of the Spanish peninsula influences the menu in Spain and Portugal: paella, gazpacho, a cold tomato soup, stuffed green peppers, beef in Portuguese sauce, tapas, and many more. illus. throughout in beautiful 4-Color photographs describing the delectable creations. \$14.95. Only 2.98.

FRENCH COOKING. Some gourmets have a preference for French cooking. This book offers a special choice of recipes, including the traditional French soups, beef à la mode, the famous French sauces and desserts. illus. throughout in beautiful 4-Color photographs describing the delectable creations. \$14.95. Only 2.98.

THE LIFE, TIMES AND TRAVELING OF JESSE JAMES. Ed. by Frank Triplet, edited by Joyce Seal. The controversial biography of the most renowned outlaw of America's West. — Jesse James; published originally the month following Jesse James' death in 1882. — A biography allegedly relied heavily on two important sources: Jesse's wife and Jesse's ill-reputed distiller and collector of Western Americana. \$15.00. Only 3.98.

SOUTHWESTERN COOKERY. Indian and Spanish influences. A new anthology containing not only Spanish dishes from Spain, but also Indian transcribed from the Southwest by the settlement. illus. \$11.00. Only 3.98.

Satan man-made, says 'occult debunker'

BY GAIL ROBERTSON
UD Reporter

"Satan is man-made, just like Mickey Mouse," Prof. Owen Rachleff of New York University told a crowd of approximately 30 Wednesday night in the University Center Ballroom.

Rachleff, known as the "occult debunker," presented a lecture on "Superstition: The New American Disease" and explained to the small but interested audience how Satan had developed through the centuries. "The only way to prove something is a myth is to trace it to its beginning. Just as Mickey Mouse can be traced to a drawing board in the Walt Disney studios, Satan's development can be traced."

Rachleff said it was not until around 600 B.C. that the theory

developed that the world was a battleground between two equal forces, one good and one evil. The theory began in Persia where the Persian translation for the adversary god was hasatan. This is where the word Satan originates.

Prior to the development of this philosophy, Rachleff said people did not believe in one power of evil, but in many little demons.

He said the story of Lucifer's fall from heaven developed from a Greek belief that Venus was falling and escaping from Olympus. He said Milton's version of the story as told in "Paradies Lost" was first complete rendition of the tale.

Rachleff discussed the controversial movie "The Exorcist" and why he thought it was affecting people so deeply.

"The Exorcist" brings home the idea that one person's religion is another's superstition. People don't look at the movie as just another horror show because it deals with a figure they have been raised to believe exists, whereas they know personal stories such as werewolves and Dracula do not exist."

Rachleff said the rumors that Peter Blatty's book was based on an actual case of possession also influenced the psychological realm of the book and movie. However, Rachleff said he had interviewed one of the priests involved the exorcism Blatty based his book on. "The possession was of a young boy in 1940 and the original exorcist was not killed and did not suffer as in Blatty's version. Furthermore, the symptoms were the same as for epilepsy or

schizophrenic rage. The boy is now 34 years old and has a family," said Rachleff.

Satan has become a popular figure recently. According to a poll in 1964, Rachleff said 37 per cent of those surveyed believed in Satan. A poll earlier this year revealed that 48 per cent considered Satan an actual personality. Another 20 per cent said they halfway believed

Satan was real.

He said part of the reason for the increase could be explained in sociological terms, and used the present lack of credibility in the government as an example. "If what people thought was good turns out to be bad, then we start thinking that maybe those things that were bad are really good."

Rachleff said it is unwise to

believe in a real devil because it serves as an alibi for everything that goes wrong. He said some people even use the devil as an excuse for the Naziism of the 1940s. "That's dangerous."

He also said many clergymen try to discredit opponents of devil belief by saying the devil wants people to think he does not exist because it makes it easier for people to fall into his trap.

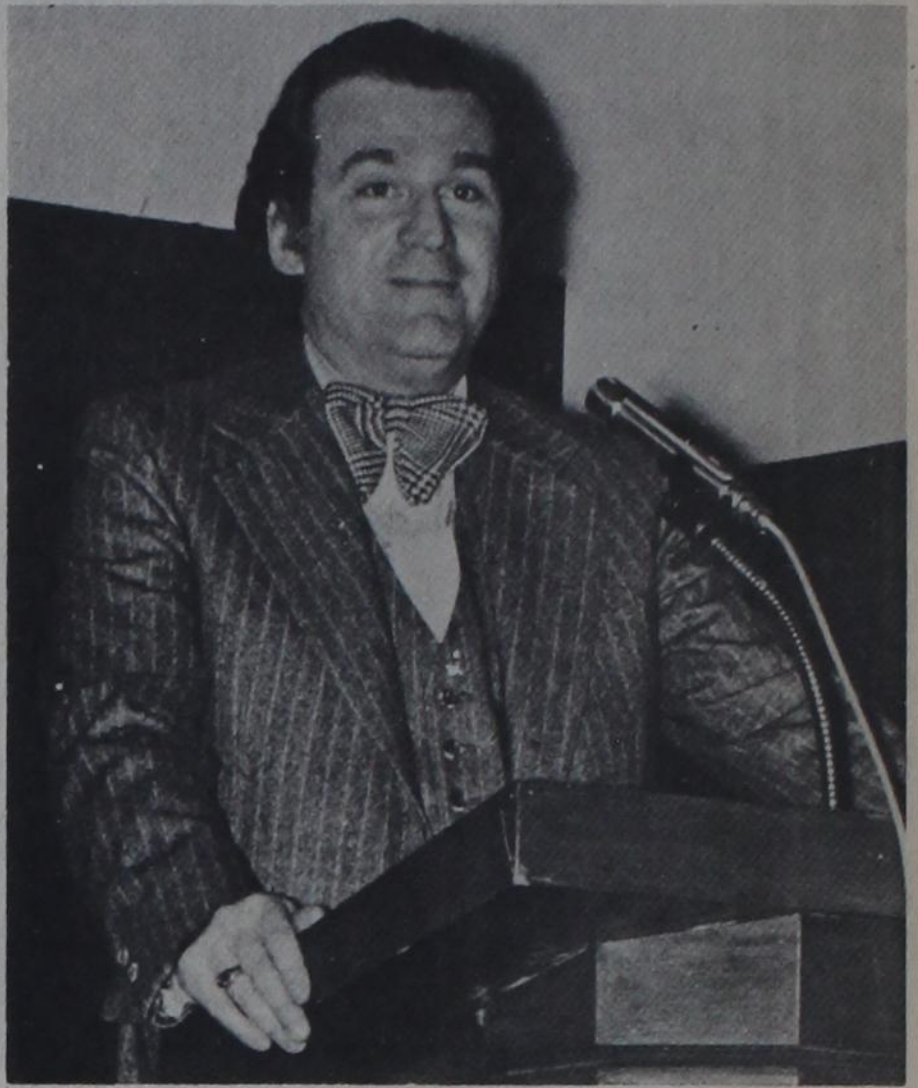

"To that I answer that I do not say the devil does not exist. I say he is a myth. Myths are realities, but they are not dependable realities," said Rachleff.

Of his own beliefs, Rachleff says he is an agnostic, and hastily adds that many people misunderstand the concept of agnosticism. "I realize that God is a reality, but He is so beyond man's knowledge that I do not see how anyone can claim to know him so perfectly. A religion like that is arrogant. Not understanding gives one a certain kind of faith."

During a discussion with the audience after his prepared speech, Rachleff suggested that if people could return from the dead they would make excellent witnesses in murder trials. "If you approach these beliefs with logical questions such as that, it is easy to discredit these superstitions and psychic happenings."

Rachleff teaches a course in "Witchcraft, Magic and Astrology" at NYU and has authored "The Occult Conceit" and "Sky Diamonds: The New Astrology." He also hosts a radio program, "All Things Weird and Wonderful."

Rachleff was sponsored by the UC Program Council.

'Occult debunker'

Owen Rachleff, professor at New York University, has been called the "occult debunker" because he tries in his lectures to dispel belief in superstition. He spoke Wednesday night in the University Center Ballroom.

"Dark Brown"

Two Whitharral High School students practice their parts in "Dark Brown" a one-act play to be presented in University Interscholastic League competition

this weekend. Tech is hosting Region I Conference of AAAA, A and B schools competing in literary and athletic events.

Tech to host UIL competition

Tech is serving as host for the University Interscholastic League, Region I Conference of AAAA, A and B schools this weekend.

Both literary and athletic events for the event will bring more than 2,250 participants to Tech, along with hundreds of parents, friends and classmates, according to Dr. Ray Purkerson of Tech's College of Education, director general of the spring meet.

Winners of the regional meet, one of four conducted in the state, advance to the state meet conducted in Austin during the first week in May.

Regional event directors from Tech are Dr. Ed Burkhardt,

track and field; Dr. William Bobo, men's tennis; Joyce Arterburn, women's tennis; Ed Strickland, golf; Jeannine McHoney, volleyball; Dr. Richard Weaver, one-act play; Dr. Vernon McGuire, debate; Dr. John Deethardt, informative speaking;

Dr. Richard Cheatham, persuasive speaking; Dr. Margaret McLaughlin, poetry interpretation; Dr. Keith Erickson, prose reading; Robert Rooker, journalism; Dr. Jeffrey Smitten, ready writing; Dr. W. P. Vann, slide rule; Dr. Samuel Lee, science; Dr. John Gilliam, typewriting; and Dr. Irol Balsley, shorthand.

The regional executive

committee is made up of Robert Ashworth, superintendent of the Amarillo public schools, and A. E. "Polly" Wells, superintendent of the Abilene public schools, for Conference AAAA; S. T. Hawkes of Crosbyton and Gerald W. Shelley of Seagraves for Conference A; Lamar Kelley of Amherst and Billy Key of Sundown for Conference B.

Tech members of the executive committee are Dr. Purkerson, director general; Dr. John Cobb, director of athletics; Dr. Richard Weaver, director of one-act play; Nat Williams, director of literary events; and Dr. Vera Simpson, director of speech contests.

Strip mining regulations given additional flexibility

WASHINGTON (AP) — Following complaints from the coal industry, the Interior Department plans to issue new strip mining regulations which will give strippers greater flexibility in restoring disturbed land.

The decision came after the coal industry fought an earlier proposal requiring abandoned strip mines to be graded to a slope not greater than 30 degrees.

The new regulations, sources said, will replace the 30-degree requirement with a more flexible standard calling for ravaged land to be restored to its original contour.

The Environmental Protection Agency called for a more stringent final slope standard in commenting on the original 30-degree requirement contained in tentative regulations published last year as part of an overall revision of its rules for mining on federal land.

Final regulations are expected to be published in the Federal Register within 30 days. They will go into effect 30 days after publication.

Andrew Bailey, chief of the mining operation branch of the Geological Surveys, said the 30

degree slope requirement has been dropped and a less specific provision substituted.

"We felt we could really be in trouble if we tied it down too strictly," Bailey said. He indicated the change was made to permit more flexibility for mining operations under varying conditions.

Bailey declined to discuss the changes in detail, but said the regulations have been substantially altered from the original proposals.

After the original regulations were published, Chairman Russell Train of the Council on Environmental Quality wrote to the department saying they were "notably deficient in dealing with the reclamation of coal surface mining."

Train asked that the department's mining supervisor be

given broader powers, including power to prohibit mining in areas in which reclamation would be impossible.

The revised regulations retrace standards drawn up in the 1930s which deal chiefly with health and safety. Bailey said the department decided they were needed because of changes in technology and increased concern for the environment.

They will apply on an estimated 760,000 acres of land leased by the Interior Department for coal mining and on Indian lands. The department has imposed a moratorium on coal leases pending a study.

Bailey said the outcome of the study will not affect the regulations, but they will have to be rewritten if Congress passes strip mining legislation it is considering.

Candidates in state races to speak at luncheon here

Nine candidates in the primary races for the state legislature will attend a luncheon at 1 p.m. April 24 in the Coronado Room of the University Center.

The luncheon, sponsored by the Tech chapter of the Texas Association of College Teachers, is open to students and faculty. The cost is \$2 and advance reservations may be made by contacting Betty Wagner, assistant professor of home and family life, at 742-5223.

Gene Hemmle, chapter president, said the candidates had been invited to deliver a brief speech. Hopefully the

candidates will accept questions from the floor, he said.

Candidates from all parties were invited, he said.

As of April 16, the two Democratic candidates for the state senator's place in Dist. 28, Kent Hance and incumbent H. J. "Doc" Blanchard, had accepted.

In the Dist. 75, Place 1 race for the House of Representatives, Republican David Sullivan and Democrats Delwin Jones, Elmer Tarbox and Bob Vint are expected to appear.

Incumbent R. B. McAlister and Jim Teaver, the Dist. 75, Place 2 primary candidates, have also agreed to appear.

Discounts possible for cash customers

NEW YORK (AP) — Express and retailers violated federal law by barring merchants from offering discounts for cash.

An American Express spokesman said the company did not agree in the settlement that it had violated antitrust law, but it undertook to notify the 87,000 merchants who accept its card that they are free to discount prices to cash customers.

The consumer group said Wednesday that it had obtained a settlement of a suit in which it alleged that a clause in the contract between American

Injured players to remain in Lubbock during summer

By MIKE HALLMARK Sports Editor

Many football fans on the South Plains have been very worried about the loss of some talented young Raiders to injuries which deny them precious spring practice time.

In an effort to make up for lost practice time this spring, Tech head football Coach Jim Carlen revealed Wednesday plans to keep five players in Lubbock for the summer to get them ready

for the fall football season.

"We have five boys right now that have torn ligaments that we plan to keep here and work with over the summer," said Carlen. "quarterback Tommy Duniven, defensive tackle Kim Bergman, offensive tackle Dayton Byerly, tailback Rufus Myers and tight end Leland Casey will all remain in Lubbock in an attempt to get them ready."

Carlen also said that defensive end Larry Hamilton and

offensive guard Charles Wittmer would be working out at home over the summer. Both were victims of torn cartilage.

Defensive end is the spot Carlen is most impressed with as contrasted with last spring. "Our defensive end play was poor last spring," said Carlen, "this spring Tommy Cones is outstanding and is all-conference material at one spot and freshman Thomas Howard and squadmen Louis Jones and

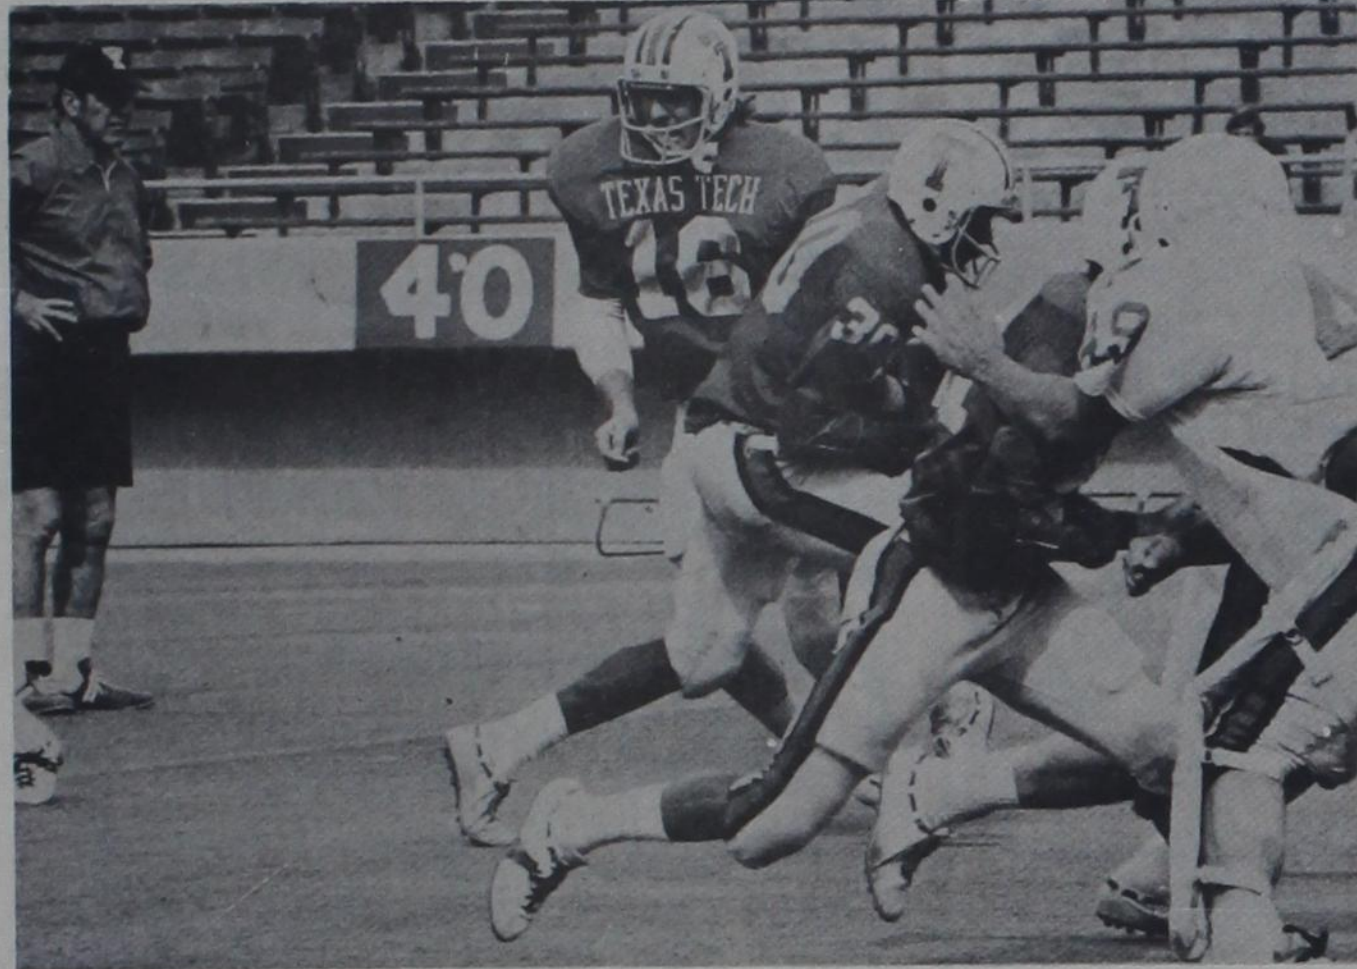

Wesley Schmidt are coming strong."

Running back is another position Carlen is pleased with as he returns some experience and talented newcomers. He singled out John Garner and Cliff Hoskins at fullback and Larry Isaacs at tailback as expected pluses. He then pointed to the play of Marc Pace and Jimmy Williams as the reason he was able to move Hoskins to fullback.

The running back situation would be even brighter if Myers is able to return next fall at full speed.

"Myers is the only one of the knee injuries I worry about for fall," said Carlen. "His was the worst of all. But, we can sure use him because you can never have too many running backs. Look at last year when we finished the season with our number four tailback (freshman Isaacs) in there."

A full scrimmage will be played Saturday in Jones Stadium beginning at 10 a.m. The scrimmage is open to the public.

Into the line

Tech tailback, Jimmy Williams, heads into the line after taking a hand-off from quarterback Don Roberts. Roberts and Williams are

two of the young players Tech Coach Jim Carlen will be counting on next fall. (see story above)

ABA drafting anyone in sight

NEW YORK (AP) — The American Basketball Association, armed with nearly 200 draftees — including high school sensation Moses Malone and 50 from the rival National Basketball Association — today sets out in its quest to become what Commissioner Mike Storen calls "the best basketball league possible."

The ABA has amassed its formidable group of draftees over the last 15 months, with most of its selections being made Wednesday. They included the '50 from the NBA in an unprecedented and open declaration of warfare, 79 collegians and the brilliant Malone, who averaged 35.8 points and 25 rebounds during the 1973-74 season in leading Petersburg, Va., H. S. to its second straight state championship.

Twenty other college players were selected in a secret draft last month, and 43 others are holdovers from three separate drafts conducted last year, beginning in January, 1973.

Each group contains some highly intriguing prospects, and now the ABA will begin

unloosening its purse strings in efforts to sign them.

Malone, the dynamic 6-foot-11, 210-pound teenager, has been swamped with various collegiate offers. When the Utah Stars surprisingly picked him Wednesday, it marked the first concrete move by the pros to lure him.

The ABA also has a shot at such All-Americans as Bill Walton of UCLA, David Thompson of North Carolina State, Marvin Barnes of Providence and John Shumate of Notre Dame — all of whom were drafted as undergraduates last year, but have not yet signed.

The ABA not only will be concentrating on signing the 142 collegians and one high school star it has under its draft wing, but also will be trying to entice the 50 NBA players it picked.

Among them were 1973-74 scoring champion Bob McAdoo of Buffalo, 1972-73 Most Valuable Player Dave Cowens of Boston and Atlanta's Pete Maravich, the scoring runner-up to McAdoo.

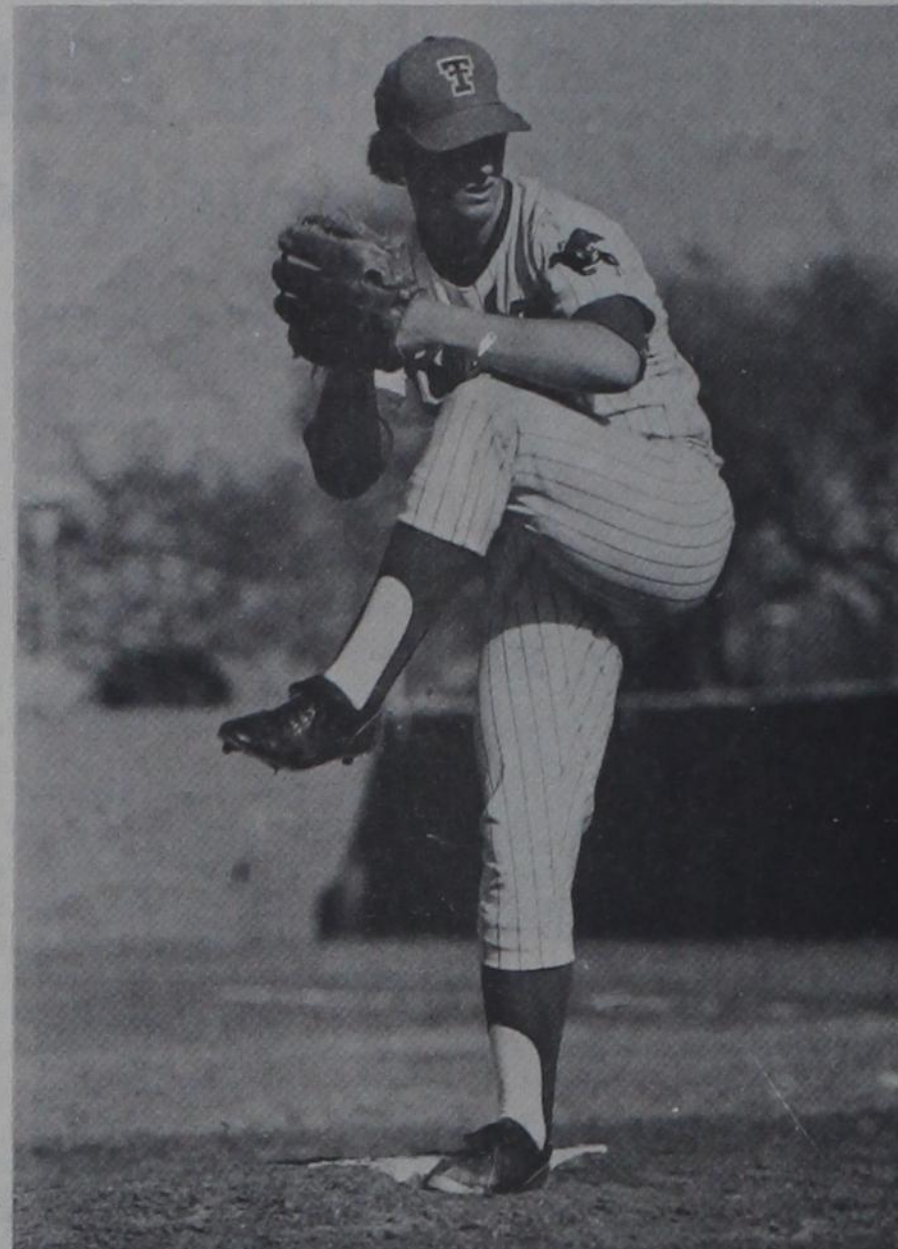

Baseballers face Razorbacks

By JEFF KLOTZMAN Asst. Sports Editor

An improved Red Raider baseball team is hog hunting in the hills this weekend as Tech battles Arkansas in a three game series in Fayetteville. Tech will play a single outing against the Razorbacks today, then wind up the series with a doubleheader Saturday.

Kal Segrist's diamondmen have peaked in the last two weeks, winning four of their last six outings. The Raiders also proved they could beat the big guns as they roughed up A&M last weekend, taking two of three outings. The Aggies came into the series ranked first in Southwest Conference warfare and ninth in the nation.

Against A&M, Tech scored 23 runs in 25 innings of play. Shortstop Ronnie Mattson and first baseman Gary Ashby were the top hitters for the Raiders in the series. Mattson was seven-for-14 against the Aggies and also scored five runs while collecting four RBIs. Ashby, a freshman from Lubbock Monterey, was four-for-10, scored one run and had five RBIs in Tech's 15-13 win Friday. Three of his four hits were doubles.

Wind-up

Tech pitcher, Steve Brock, in the midst of his wind-up against the Aggies last weekend where he got his first win. Brock and his Raider teammates will be in Arkansas this weekend to play the Razorbacks.

However, Davidson did pick up a save in relief of Brock. Davidson will be on the mound in the third game of the Arkansas series.

Randy Prince picked up his fifth win of the year in the first game of Saturday's double header pitching a six-hitter and winning 4-1. Prince will pitch against the Hogs in Saturday's opener.

Jon Davidson was tagged with his fourth loss of the year as A&M pounded him for 12 hits in winning Saturday's nightcap 5-4.

Tech's tentative lineup against the Hogs has Ashby at first, Bob Wiebe at second, Mattson at short, Robin Kilmer at third and Jim Boss behind the plate. Tech captain Jim Horton will be in left field, Larry Drown in center and Mike Bewley in right.

Tech is 7-11 in conference and 9-18 for the year.

Trackmen split forces

Tech's track team divides forces this weekend in search of a win as the mile, two-mile and distance medley relay teams will take part in the Kansas Relays while the rest of the team travels to Canyon to compete in the West Texas Invitational.

Injuries have clouded the Tech relay picture somewhat. Coach Vernon Hilliard is hoping that Joe Aldridge will be back from an injury and able to run his leg of the mile relay. If Aldridge is unable to run, Hugh Jones will be the alternate runner. The other members of the mile relay are Terrell Pendleton, Mark Freeman and William Pierson. Their best time of the year is a 3:14.2.

Luther Mays, Pendleton, Freeman and Jones comprise both the two-mile and distance medley relays.

Meanwhile, all are healthy for the field events set for Saturday at noon in Canyon. Tech's pole vaulters will be Bruce Williams and Casey Sanford. Both have cleared the bar at 14 feet.

Tommy McIntyre will compete in the long jump. His best is a 23-9. Bryant Huckaby will compete in the high jump. He will be trying to better a top of 6-7 $\frac{3}{4}$.

Tech's dash forces are depleted by the relay teams. Alan Anders will run in the 100-yard-dash. His top time is 9.6. Tony Harris will run in the 440-yard dash. His best is 47.8.

In the 440-yard intermediate hurdles Tech has two top men. Louis Pearl has run a 55.1 while Phil Sims has a 55.6 clocking.

Storm protection plans explored

By JAN MCDERMOTT
UD Reporter

While most people today are still saying that not much can be done if a tornado strikes, Tech's Institute for Disaster Research and the department of civil engineering are seeking to show that "it is possible to provide protection for people economically," said Dr. Kishor C. Mehta, associate professor of civil engineering.

The Wind Engineering Research Program has been operating since 1970 within the Institute for Disaster Research. Researchers are "working with basic documentation of wind-storm damage and wind and building interaction," Mehta said. Data is being collected on the frequency and intensity of tornadoes in specified geographic locations. Research is also being conducted into the

wind and pressure forces acting in a tornado.

Three degrees of protection are being explored, Mehta said. These are occupant, functional, and absolute protection.

Occupant protection research is centering mainly on designing in-residence shelter for houses and public buildings "because the most dangerous thing to do is to go outside during a tornado," Mehta said. Houses and other buildings should be designed to include an interior room as a shelter.

For public buildings, particularly schools, guidelines are being developed for occupant protection. "We want to do something to save the lives of children even if the school may be demolished," Mehta said.

Functional protection is required for such buildings as fire stations and communications centers, which must continue to function during and after a tornado. To provide such protection, these buildings must be designed to resist 95 per cent of the damage of tornadoes, Mehta said.

Absolute protection is essential to insure the safety of nuclear power plants. The most difficult thing to guard against are missiles hitting into the walls of a power plant. To a wind engineer, a missile is anything flying through the air, Mehta explained. And missiles may be traveling at speeds up to 100 m.p.h.

However, power plants may currently be oversafe, Mehta said. Money could be saved by eliminating protection from forces that do not act in a tornado. By more precisely defining the existing forces, such waste could be avoided, he said. But since absolute protection must be maintained, plants will be designed to be safe against tornadoes stronger than any ever seen, he added.

In designing buildings for increased protection from damaging winds, materials already in use will be used. All improvements are planned to be as economical as possible, Mehta said.

In some cases it will be possible to reinforce an area in

an existing building to serve as a shelter. This will be more expensive than incorporating shelter areas into new buildings.

The wind engineers will need to teach architects and engineers to design buildings that will be safe, using the information collected from the wind research, Dr. Mehta said. As a part of the education program, a short course entitled Engineering for Extreme Winds and Tornadoes will be offered at Tech May 14-17.

Another goal of the wind engineers will be to educate the public in safety measures to follow when a tornado strikes.

A history of tornadoes that have occurred across the nation is available for only the past 50 years, Mehta said. And good, detailed records have been kept for only eight years.

Since no one has ever made measurements inside a tornado, studies must be based on damage done by the storms, he said. As part of the studies being conducted at Tech, Mehta visited Xenia, Ohio, to survey the damages done by recent

tornadoes there.

Mehta studied six schools in Xenia which had been heavily damaged. Classroom windows were broken, and debris covered the rooms, he said. A significant finding was that the hallways were fairly safe and free of debris. The roofs of the cafeterias and gymnasiums had collapsed.

Another area being studied in the Wind Engineering Research Program is the possibility of obtaining energy from wind, Mehta said. Study in this area began only 10 months ago. So far the major activity has been a study of existing literature to establish a data base and avoid duplication of studies.

Lubbock sandstorm

Because of the drought West Texas is suffering, wind storms become sandstorms. These sandstorms can cause monetary damage as well as inconvenience. The Tech Wind

Engineering Research program is collecting data on windstorm damage and tornadoes in order to find ways to protect individuals and buildings.

Workshop to feature top dancers

Some of today's best-known teachers and choreographers will conduct Tech's Summer Dance Workshop in ballet, modern, jazz and tap dancing May 27 through June 14.

Heading up the professional staff will be Igor Schwefoff, former soloist with the Ballet Russe de Monte Carlo and the Original Ballet Russe, and Sheila Hart, soloist with the

Cobb-Marietta Ballet Company and instructor for the company's ballet school in Marietta, Ga.

Visiting artists will join Diana Love and Peggy Willis of the Tech dance faculty in conducting the three-week program of instruction. The professional staff will include Karen Steele and Manzell Senter of the Utah Dance Theater Company and Betty

Ferguson, assistant professor of dance at Southern Methodist University.

The workshop is being sponsored by the dance division of the women's physical education department in cooperation with the Division of Continuing Education. "Both day and evening classes will be offered," said Love.

Registration will be May 26 for non-credit courses and May

27 for credit courses in the dance studio in the Women's Gym. Persons may also pre-register for non-credit and evening classes. "Courses may be taken for credit by graduate students only," said Love.

Non-credit workshop courses include ballet, modern, jazz and tap dancing and dance repertoire, the last by invitation only. Evening classes will be offered from May 27 to May 31 in jazz and modern dancing, and from June 3 through June 14 in ballet and jazz.

Workshop fees are \$100 for ballet, modern and jazz in combination, or \$50 for either ballet or modern. Tap, which is offered in addition to regular classes, is \$50. Fees for evening instruction are \$3 per class.

Auditions for class placement will be May 26 in the Women's Gym, beginning at 2 p.m. for ballet students and at 3 p.m. for classes in modern and jazz.

Additional information may be obtained from Diana Love, Dance Division, Department of Health, Physical Education and Recreation for Women.

Bar investigating Nixon, Mitchell

NEW YORK (AP) — The City Bar Association is probing allegations of professional misconduct against President Nixon and former Atty. Gen. John N. Mitchell.

The investigation could lead to their disbarment in New York state, according to John G. Bonomi, the association's chief counsel.

Adult 'fun school' opens Monday

A "Fun School for Adults," with instruction in the use of water pistols, bubble gum and finger paints, will have its first session at 7 p.m. Monday in the Psychology Building.

A second and separate session will be at the same time and place April 24. There will be a \$2 charge to cover the cost of materials used. Information and reservations are available from the secretary for the

psychology department. Two-hour sessions will be conducted weekly for five weeks.

The idea was conceived by some graduate students in the Psychology department who had conducted play therapy with children and had found that, "We like to play in the playroom of the Psychology Building," said graduate student Pete Hampshire.

"Life is taken entirely too

seriously anyway," he said, and while the program can't teach anyone to have fun, it can exercise a person's ability to feel good.

Hampshire stressed the program is not an experiment or a therapy program. "We are doing it because it hasn't been done before," he said.

Four "fun directors" will run the program, Hampshire said, and will supervise such activities as playing with modeling clay, making ridiculous slogans about bothersome things in life, and show and tell. Clothing should be something that can be played in, Hampshire said.

Originally the idea had been to limit the program to parents. Hampshire said it was apparent that some of the children in their therapy program were not having fun because their parents couldn't have fun. But it was later decided to open the programs to any adult, Hampshire said, since college, among other things, is too "deadly serious."

Brides' father threatens to sue wedding stalker

FORT WORTH (AP) — The bride and groom stood solemnly before the altar, family and friends gathered around to witness the nuptials.

Suddenly, the bride's ex-boyfriend streaked nude among the family, the friends, attendants, the bride and groom and dashed outside the church into the car of a woman companion.

The woman driver wrecked the car down the road, however,

so the naked intruder leaped and streaked to another car driven by a man.

Police were in hot pursuit all the way but lost the stalker when they wrecked their patrol car.

Police said Wednesday that may not be the end of it.

Police said the bride's irate father has inquired about how to file a civil suit against the unnamed stalker.

Meats Lab aids students, public

By JOANNA VERNETTI
UD Reporter

The Tech Meats Lab offers benefits to both students and consumers. It provides students the opportunity to slaughter, cut and process meat, which is then offered for sale to the public.

"Our primary aim is to be a teaching facility," Dr. Boyd

Ramsey, associate professor of Animal Sciences, said. "We are able to combine teaching on both live animals and carcasses."

"We make no effort to offer meat for sale. We sell the products we use for research and teaching," he said.

The Meats Lab slaughters sheep, cattle and hogs from the Tech range. Before any animal is slaughtered in the lab, a federal inspector from the Department of Agriculture must be present. The inspector checks to make certain the meat reaches federal quality standards, and that the equipment is

clean, Ramsey said.

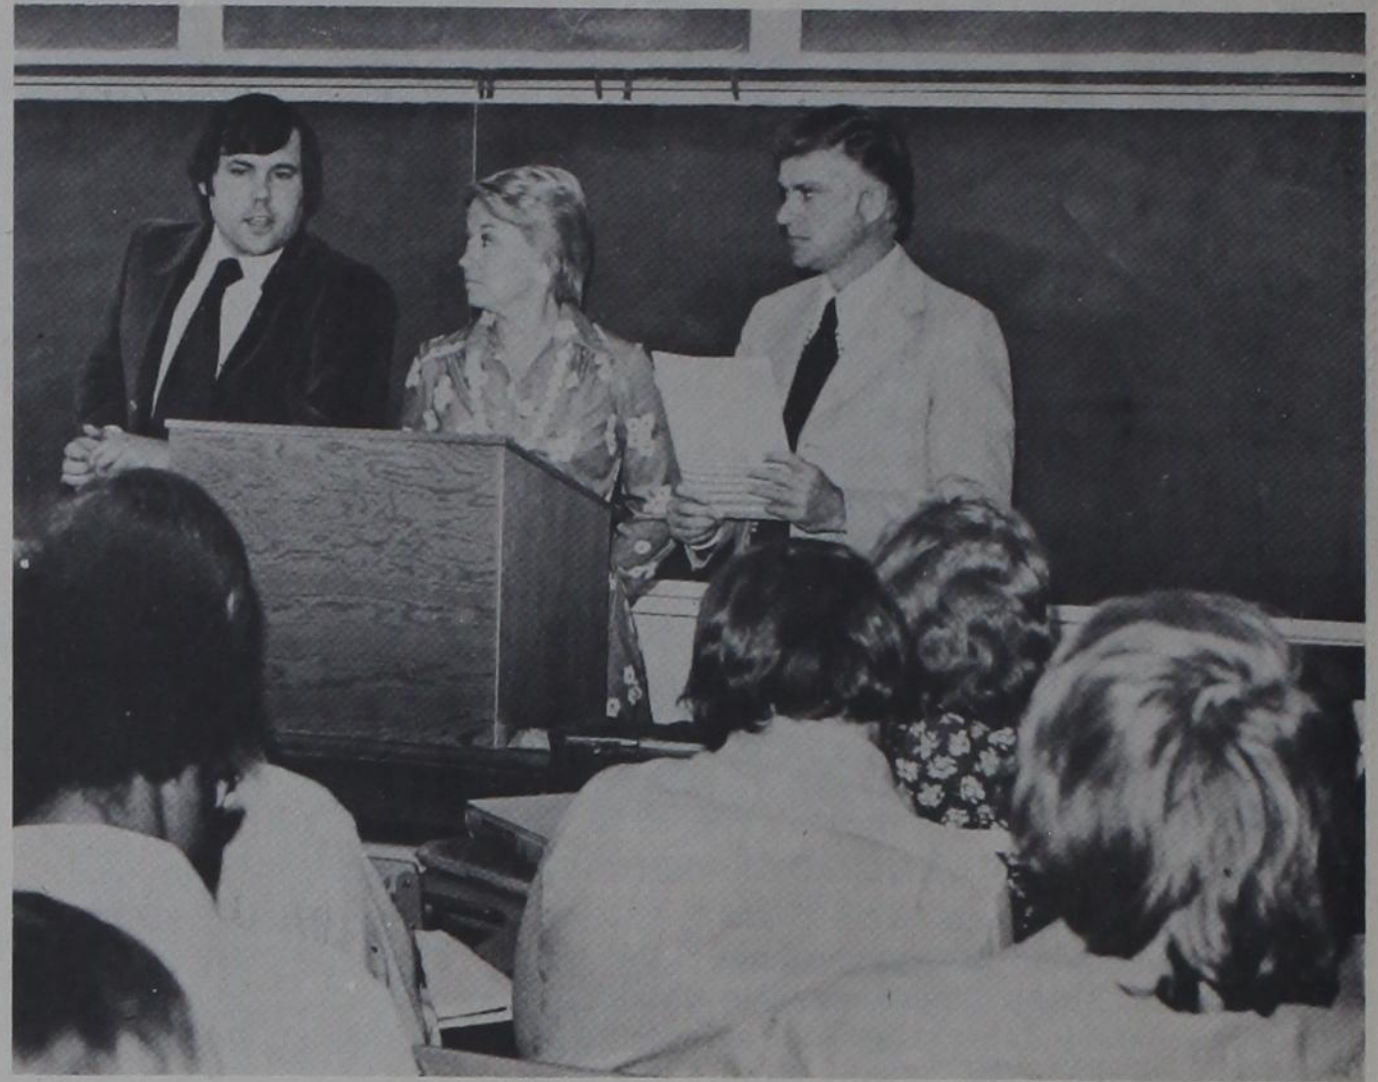

Before the animal is killed, students from the Animal Science classes have visually evaluated the live animal and estimated the fat, muscle content and quality of the meat.

The animal is then killed and the students are able to see exactly how accurate their estimates were. After the specimen is killed, the meat is transferred to the refrigerated locker room. "We age all beef in the cooler for two weeks," he said. Normally, the beef sold in the supermarkets is aged about a week. However, the lab's additional aging increases the meat's tenderness, according to Ramsey.

Labels on the meat are required to list the type of meat, weight, packing plant and descriptive name of the cut.

In the Animal Science classes, students practice cutting the meat and estimating the percentage of cuts that can be obtained from a particular carcass. After the meat is cut into the various sections, it is wrapped in wax and kraft-type paper and labeled. The lab also has facilities for curing and smoking the meat.

The meat is offered for sale on a first come, first served basis, and the lab does not advertise. Ramsey said customers call and check to see if any meat is available that day, because the supply is sporadic.

Industry speaks

Three representatives of the Association of Broadcasting Executives of Texas address a mass communications class at Tech, providing career advice for

students. Among the group were, left to right, John Smith, WBAP Radio; ABET Secretary Susan Kendall; and Jim Kumpf, H-R Television.

Use of talking trash can tested

BROOKVILLE, N.Y. (AP) — He talks, he sings, he makes slightly risqué suggestions and he swallows garbage.

He's Arthur, the talking trash can.

His inventor thinks a kind word from Arthur encourages people to fill him with garbage rather than dump it where it doesn't belong.

Arthur is the brainchild of Charles Hamad, 24, of Danbury,

Conn., a graduate student in psychology at C. W. Post College, and Dr. Jeff Corey, an associate psychology professor and Hamad's thesis adviser.

Arthur's voice is a tape cassette, activated when trash is stuffed into the 45-gallon can.

Hamad said he has five different tapes for Arthur. Several say, "Thank you," one plays music and another makes random noises.

And then there is what Hamad calls the "X-rated tape."

Hamad says it's "kind of corny, but says things like, 'meet me up in your room in 10 minutes with a wnip and a prune danish.'"

But Hamad says a simple "thank you" seems to work best.

Arthur is a standard plastic

trash can. There is a face painted on the lid, with blond hair, blue eyes and yellow teeth. The teeth surround a plastic mouth attached by a hinge, through which garbage is deposited.

When the mouth is pushed, the cassette is activated.

Hamad says he placed Arthur in a college dining hall for about four hours one day.

For the first hour, the cassette was turned off, and only 20 persons stuffed garbage in Arthur.

For the next three hours, the cassette was turned on and "a few hundred people" used Arthur, Hamad said.

But Hamad says Arthur has been used only for about 15 hours and more data is needed to confirm his theory that people are more likely to use trash cans if the can talks back, and to determine whether the novelty will wear off.

During 1973, 25 sheep, 85 cattle, and 175 hogs were killed at the lab. Before the carcass is divided into the various cuts, the carcass is weighed under water and above water. Ramsey explained that the more the carcass weighs under water, the less fat and more muscle the meat has.

After the meat is weighed, it is transported to the cutting room from the 38 degree Fahrenheit locker room. To meet cleanliness standards, students wear boots, aprons and safety helmets while preparing the meat. The cutting room is in-

pected by the meat inspector. Labels on the meat are required to list the type of meat, weight, packing plant and descriptive name of the cut.

In the Animal Science classes, students practice cutting the meat and estimating the percentage of cuts that can be obtained from a particular carcass. After the meat is cut into the various sections, it is wrapped in wax and kraft-type paper and labeled. The lab also has facilities for curing and smoking the meat.

The meat is offered for sale on a first come, first served basis, and the lab does not advertise. Ramsey said customers call and check to see if any meat is available that day, because the supply is sporadic.

Ramsey said he prices the lab's meat competitively with the prices at the local supermarkets; however, the lab sells all the beef boneless so prices are higher per pound than the local supermarkets.

"Our average customer likes steak more than the cheaper cuts," he said. Seventy-five percent of the carcass becomes retail market cuts.

The lab is also used for research projects such as determining the effects of the environment on the quality of meat produced.

Pros in telecom workshop

Students of telecommunications at Tech met face to face with the experts Wednesday to learn from industry.

A traveling workshop sponsored by the Association of Broadcasting Executives of Texas (ABET) met with classes to answer questions and offer career advice.

Heading the group was John C. Butler, executive vice president and general manager of KRLD Radio, president of ABET, president of the Dallas Ad League, and director of ABC Information Radio Media.

With him were: representing television, Jim Kumpf, H-R Television representing advertising agencies, ABET secretary Susan Kendall, the Stanford Agency, and Mark

Oken, media director, the Bloom Agency; representing sales, John Smith, WBAP Radio, and Jim Wilson, WBAP-TV.

Dr. Dennis Harp, a member of the Texas Tech faculty in mass communications, was coordinator for the workshop.

He said the annual workshop

was planned to take students beyond classroom theory and into the realism of industry.

"This concept serves both industry and students," Harp said. "Graduates are more likely to know that is expected of them, and education becomes more than an academic sequence of courses."

Symposium to open today on Chicano political role

The Tech department of political science is sponsoring a Political Science Symposium today, centering on the political involvement of Chicanos in this area.

The symposium will feature 16 speakers from throughout the United States, including three professors from Tech.

Registration will begin at 8:30 a.m. in the University Center.

The first of three panel discussions will start at 9:30 a.m. in the Mesa Room of the University Center. Topic of this panel will be "the Background

and Ideological Development of the Chicano People."

The second panel discussion, "Bureaucratic Involvement," will begin at 11:30 a.m. in the Mesa Room.

"Political Activity and Participation" will be the topic of the final panel discussion beginning at 3:15 p.m. in the Mesa Room.

A luncheon for the speakers is scheduled at the Ramirez Restaurant, 50th and H from 1:30 until 3 p.m. The public may attend this gathering, but no free food will be provided.

The Supreme Court said state officials have immunity for their official acts, but that it is a qualified rather than absolute immunity. The high court said the extent of the immunity must be determined in court.

The ruling on Wednesday came on an appeal by the parents of three of the slain Kent State students.

Immunity ruling called historic

CLEVELAND, Ohio (AP) — Dean Kahler says a Supreme Court ruling that state officials and Ohio National Guardsmen do not have absolute immunity

from damages in connection with the 1970 shootings at Kent State University is a "historical judicial act."

Kahler was one of nine students wounded by National Guard gunfire during a campus antiwar demonstration at Kent State on May 4, 1970. Four students were killed.

The Supreme Court said state officials have immunity for their official acts, but that it is a qualified rather than absolute immunity. The high court said the extent of the immunity must be determined in court.

The ruling on Wednesday came on an appeal by the parents of three of the slain Kent State students.

Phi Eta Sigma, an honorary for freshman men, elected and installed officers Wednesday.

Officers are: president, David G. Lewis of Phillips; vice president, Charles Edward Smith of Beaumont; treasurer, Carl L. Evans of Friona; secretary, Benjamin Barnett of Midland; historian Glen W. Harrall of San Antonio; and chairman of administrative committee, Darrall Dabbs of Brandon, England.

Installed as members of the administrative council were:

Randall Amonett of Wellington, Steve Beyer of Sinton, Daryl Halencak of Crowell, Robert Hughes of Amarillo, Russell C. Larid of Seabrook, Steven Myers of El Paso, Robert C. Waller of Albany, Randall Lynn Wilson of Lubbock and Steve Wilson of Lubbock.

William Frye, dean of the Tech Medical School, was guest speaker.

Greek, Turk forces readied

ATHENS, Greece (AP) — The armed forces of Greece and Turkey have been quietly put in a state of preparedness because of the controversy between their governments over oil rights in the Aegean Sea and Cyprus, informed sources reported Thursday.

Travelers arriving from Turkey reported "unusual military activity," including tanks and other armor in operation, on both sides of the 125-mile border.

The Greek navy also was

reported in a state of readiness. The government announced it was sending only one destroyer to take part in the North Atlantic Treaty Organization maneuvers that began today off the western Italian coast.

from damages in connection with the 1970 shootings at Kent State University is a "historical judicial act."

Kahler was one of nine students wounded by National Guard gunfire during a campus antiwar demonstration at Kent State on May 4, 1970. Four students were killed.

The Supreme Court said state officials have immunity for their official acts, but that it is a qualified rather than absolute immunity. The high court said the extent of the immunity must be determined in court.

The ruling on Wednesday came on an appeal by the parents of three of the slain Kent State students.

MOVIE WRAPUP

Lubbock screens feature some good holdovers

By WILLIAM D. KERNS
Fine Arts Editor

Not that many new shows have weasled into town this week... mainly because there are so many "big name attractions" doing good business in town already. But take note that this weekend will be the last chance to see a few of these. Let's take a look at the **Movie Wrapup** this week:

Arnett-Benson: "The Long Goodbye" — A new Elliot Gould starrer (well, new to Lubbock that is). Has received mixed reviews. Not critiqued as yet.

Cinema I and II: "The Exorcist" — You may not really groove too much on pea soup for week afterwards, but I guarantee that seeing this flick should test your will power to sleep without a night light. A real scare-thriller.

Cinema West: "The Spikes Gang" — Lee Marvin leads a posse of youngsters into a life of crime in the West. Not reviewed as yet.

Continental Cinema: "The Sugarland Express" — I never thought I'd label a Goldie Hawn movie one of the year's best, but there's no way to get around it. The movie is just brilliantly entertaining, and one able to get its message across without shoving it down our throats. A happy-sad story about dumb kids who accidentally blunder into a felony, with the sole intention of taking their child back.

Fox Twin I: "Blazing Saddles" — Director Mel Brooks called himself the "Jewish John Ford" after making this Western spoof. See the flick and you'll understand why. A very funny and very zany and very ADULT comedy.

Fox Twin II: "The Conversation": After reading some more reviews, I've come to the conclusion that this may be the best of the sleeper. Francis Ford Coppola's pet project, this film was years in the making—and critics are saying it's Gene Hackman's best performance... which is no small statement. Not reviewed as yet.

Lindsey: "Bruce Belt Jones" — The ads play up Jim Kelly's part in Bruce Lee's best flick, "Enter The Dragon." But when I reviewed "Dragon," I commented that he "may be an American karate champion, but he has a long way to go before he can consider himself an 'actor.'" After viewing the previews, this one looks like cheap exploitation and nothing more.

Showplace Four I: "Walking Tall" — What can you say about a flick that's been in town for seven months... except maybe that it's still here.

Showplace Four II: "American Grafitti" — I'm getting kind of sick of nostalgia and K-Tel record offers (get your million golden oldies: only a buck and a half!), but "Grafitti" is still going strong. This weekend may be its last tango at Showplace though.

Showplace Four III: "The Three Musketeers" — Really a marvelous film, and one the whole family can both see and ENJOY. Good acting and good laughs.

Showplace Four IV: "The Sting" — This one's a little slow in parts, but audiences still break out in applause during the poker sequence and the final surprise. And then, it's hard to ever find fault with Paul Newman.

University Center: "Slaughterhouse Five" — This is an excellent, but attention demanding, rendition of Kurt Vonnegut Jr.'s popular novel. It's directed by George Roy Hill, who was at the helm of "Butch Cassidy And The Sundance Kid" and the more recent "The Sting."

Village: "Electra Glide In Blue" and "White Lightning" — The former flick stars Robert Blake (a very underrated actor, even with his plaudits from "In Cold Blood") and is one I enjoyed thoroughly, even though it's a counter-takeoff on "Easy Rider." As for the latter flick, one chick told me the biggest thrill in it was when Burt Reynolds took off his shirt. Whoopee.

Winchester: "The Great Gatsby" — Not reviewed as yet, but the general consensus is that this is a flick the women love and the men sleep through. I've seen parts, but will reserve comments until I view the entire effort.

That's the movie wrapup this week, but next week should see some interesting openings. Showplace Four is getting "Conrack", which has an excellent performance by Jon Voight (you may see him nominated for an Oscar next year) and a reissue of Disney's amusing "Robin Hood." Another family flick, "Where The Lilies Bloom", is scheduled to open at the Cinema West.

But for this week's offerings, it's not hard to find a Best Bet. Got to be the new offering of "The Sugarland Express," a message film that can be taken for pure enjoyment as well. Worst of the lot: I don't think I'd be taking top much of a chance in awarding "Black Belt Jones" this honor.

Simon to face inflation challenge

WASHINGTON (AP) — The country's high inflation rate will replace the energy crisis as the number one challenge for William E. Simon, President Nixon's choice as his fourth secretary of the Treasury.

Nixon named the 46-year-old millionaire and former Wall Street investment banker to succeed economist George P. Shultz, who steps down in May after nearly two years at the Treasury Department helm.

Simon has served since December as head of the Federal Energy Office. The White House said he will be succeeded as energy administrator by his deputy, John C. Sawhill, 37.

Simon's appointment as Treasury secretary is expected to touch off a struggle among Nixon's economic advisers to gain a portion of the considerable influence over economic policy - making held by Shultz.

Nixon said he would take a more active hand himself in economic planning and will head the important Council on Economic Policy, a post previously held by Shultz.

Other positions held by Shultz

Monday showed his interest in this field in an important statement on U. S. foreign economic policy delivered to the United Nations in New York.

But Simon is said by aides to feel the major problem facing him as Treasury secretary will be the country's worsening inflation rate, which saw consumer prices rise 8.8 per cent last year, and at a 12 per cent rate during the first two months of this year.

Simon is said to generally support the approach to inflation followed by Shultz, including steps to increase agricultural supplies combined with conservative spending and money supply policies.

Like Shultz, Simon is cool to additional details on his thinking on ways of combatting inflation when he appears before the Senate Finance Committee for confirmation hearings, expected early next week.

Spaghetti-eating prize money used to finance hospital stay

TAMPA, Fla. (AP) — Mike Aprile says setting a world spaghetti-eating record started him on an eating binge that pushed his weight up to 478 pounds.

So, instead of taking a trip to Rome, he had to use his \$1,380 prize for a hospital dieting program.

"I was eating myself into the grave," Aprile, 23, said Thursday at Tampa Memorial Hospital. "It was suicide by the easy installment program. I just made up my mind to lose weight and here I am... hungry but determined."

Last December the robust cab driver consumed more than 6 1/2 pounds of spaghetti at one sitting to capture the title, which will be included in the next edition of the Guinness Book of World Records.

The previous record was a mere 2.1 pounds, set in 1970 by Tom Cresci at Dino's Restaurant in San Diego.

He blames the contest for fouling up his digestive system.

"Right after it, I was hungry three times as much. I started gobbling up things left and right."

"Two hours later I went home and had a steak," Aprile said. Within six weeks, Aprile said

he added 53 pounds to his already rotund 425-pound frame. His waistline expanded to 70 inches. At 5 foot 8, that made his girth greater than his height.

After consulting a doctor, who warned he was eating himself to death, Aprile decided to spend his prize money learning not to eat. In February entered the hospital for a three-month stay.

He is on a high protein diet, restricted to 400 calories a day,

no carbohydrates and plenty of water and exercise.

"I'm down to 404 pounds today," says Aprile, proud of his accomplishment. His goal is a trim 220 — if he can avoid temptation.

At Easter he visited a relative and devoured five pounds of goat meat and a huge portion of his Uncle Jimmy's homemade sausage.

"It's a fight," he admitted. "I slip a little."

Summer schedule set

Registration for Tech's first summer session is scheduled for 1 p.m. June 3 through June 4 in the Lubbock Municipal Coliseum.

Registration materials, including permit, student schedule card and dean's instructions, will be distributed to students from the second floor Conference Room of West Hall Monday through Friday. Hours of distribution will be from 1 to 6 p.m. daily.

The first summer session ends July 13 and the second summer term begins July 15 and ends Aug. 24.

Over education problem

AUSTIN (AP) — Fifty per cent of the high school seniors in 16 Texas communities say they plan to go to college, but only 20 per cent of the jobs that will be available in 1980 will require a college education, according to a study released Wednesday.

The problem of under-employment and over education will continue until those who influence students in their career choices give more realistic educational advice, said the advisory Council for Technical-Vocational Education in Texas.

The council said its study covered the career plans of more than 10,000 students.

Ranch Headquarters emphasizes authenticity to evoke past era

By LISA WARMAN
UD Staff
Texas Tech's Ranch Headquarters is creating and developing a living outdoor museum which reflects the Spirit of '76, especially for the nation's bicentennial celebration, according to Robert L. Snyder, director of Ranch Headquarters.

This 12-acre representation of the ranching business's progress is composed of more than 20 historic ranch structures. Its purpose is to allow its viewers a look at the age of pioneers, bold traditions, and the cowboy — America's most illustrious folk hero.

According to Snyder, the idea of Ranch Headquarters was first conceived in 1968, and a planning committee of ranchers and historians was appointed by Tech President Grover Murray, to survey existing structures and decide whether enough could be found and restored to make the program worthwhile.

In 1969, said Snyder, the Ranch Headquarters Association was formed for the purpose of locating, moving, and soliciting contributions for the buildings.

The first structure to be moved was an 1830 log cabin, once headquarters of the

French Count de la Baume's El Capote Ranch near Gonzales in South Central Texas. Since that time, 21 structures have been added to the display and others are being considered.

The process of moving the buildings is very tedious and involved, said Snyder. After a structure is carefully chosen according to its historical and illustrative value, and funds are secured, a foundation is laid, geographically oriented to the original site.

While still intact, the buildings are tagged. Each log, stone, and board is labeled with a number, its compass position, and part of the structure from which it is to be dismantled. Even the exact height and position of stones are recorded.

The structures are then hauled to their respective sites on the Tech campus. Wooden structures are usually hauled intact.

In particularly difficult cases, Headquarters hires professional masons to rebuild the structures for them, however, most of the time Tech workers do the reconstructing themselves.

Many of the original buildings and shallow foundations, if any, and although every care is taken to construct buildings exactly as they were, often minor and totally undetectable

provisions must be made. For instance, if a structure was built on uneven ground, steel rods are inserted into the original logs to straighten them.

Snyder said the buildings are restored with such authenticity that even the paint of the period with a simulated enamel and oil base is especially prepared, and nails are cut to match those in the 1890s. The only new materials used are window boards when the old ones are too decayed to use, and new materials are used when old ones render the buildings unsafe.

Furnishings are, as often as possible, ones originally used, and if this is impossible, careful research is conducted to furnish the rooms authentically, even to the eating utensils used.

Landscaping materials used are those indigenous to the area in which the building was first located, according to Snyder. The University has moved 40,000 cubic yards of soil in constructing earthen hills 8 to 18 feet high in their attempt to create historic settings.

Some of the most outstanding structures include Las Escarabadas, built in the late 1880s as division headquarters for the famous XIT Ranch, which will serve as

Headquarters chuckhouse, and the 1880 JA milk cooler which utilized shade, running water, and evaporation to preserve food.

The rare Walpole Windmill was hauled from Ulysis, Kan., and is the only structure to be brought from outside Texas. The great Waggoner Barn, built early in the century, will provide exhibit space for animals, and through equipment, interpret the ranching heritage of the Western Hemisphere.

Snyder said the Ranch Headquarters exhibit was first opened to the public in 1972 on a limited basis, and is now open with a limited program, although the formal opening is not scheduled until 1976. Public visitation is now scheduled on Sunday afternoons during summer months.

Homemaking course revamped

By SALLY LOGUE
UD Reporter

The senior home management course has evolved from the routine tasks of the daily operation of a household to the analysis of social issues and problems which influence the decision-making process of the modern homemaker, according to Martha Logan, associate professor of home and family life.

At one time senior women in the department of home and family life were required to live in groups in facilities provided by the University, she said. The girls were under the supervision of an instructor who watched over the activities they performed in the daily operation of a household.

"This course, which was offered for over 25 years, was

directed toward the operation and completion of daily homemaking tasks, rather than the decision-making aspects of a family," said Logan.

Logan said the old course was abandoned in 1971 because so many senior girls were married or already living off campus in apartments.

"Since the girls are already living off campus they can perform the tasks in their own homes and not in a University-provided residence," she said.

The new course titled "Decision-Making and Family Management," is a one-semester course.

It meets four hours a week, but the students often have a minimum of two hours of outside work, plus reading and working on community projects, said Logan.

"In the course we talk about all social issues and how they can affect the family unit and how the family can affect social issues," she said.

"The course gives students a chance to practice, among other things, family financial management, women's role in the labor force, and how laws affect the family decision-making process," said Logan.

An analysis of household production is also given much study in the course.

"Surveys show homemakers spend as much or more time in household activities as they did 20 to 25 years ago. Of course the character of these activities have changed. Now much more time is spent on child care, shopping, repair services, and general decision-making," said Logan.

"No family lives totally independent of the rest of the world," she said.

This course gives the girls a chance to do community work and learn how the family fits into society, she said. "It allows the girls not only to take from it, but to actually give of themselves."

Economy takes sharp dive

WASHINGTON (AP) — The nation's economy sank swiftly toward recession levels in the first quarter of the year, while inflation pushed prices upward at an ever-increasing rate, according to government figures released Thursday.

The Commerce Department said the country's Gross National Product dropped at a 5.8 per cent annual rate in the first three months of the year, the first decline in three years and the biggest drop since 1958. Inflation, on the other hand, soared at a 10.8 per cent annual rate.

The double-barreled dose of bad economic news came one day after President Nixon announced he was going to play a bigger role in economic policy making.

It also raised serious questions whether the United States would be able to avoid a recession this year, as Nixon has promised. A recession is technically defined as two consecutive quarters of GNP decline.

The GNP measures the total

value of output of the nation's goods and services and is considered the best index of the health of the economy.

The Arab oil embargo and energy crisis apparently were an important factor in the first-quarter economic decline.

The Commerce Department said the sharp cutback in auto production was one of two major reasons for the falling GNP. The other was a decline in home building, which has been hit by high interest rates.

The 5.8 per cent decline in the GNP growth rate in the first quarter compared with an increase of 1.6 per cent in the fourth quarter and 8.7 per cent growth in the first quarter of 1973 at the height of an economic boom.

The first-quarter drop was the biggest since a 9.2 per cent decline in the first quarter of 1958. The last previous decline was in the fourth quarter of 1970, when the GNP annual rate fell 4.8 per cent.

Over-all GNP in the first quarter increased \$14.3 billion, or 4.4 per cent over the fourth

quarter, to an annual rate of \$1,351.8 billion. All of the increase was due to inflation.

The inflation rate of 10.8 per cent showed the administration has a long way to go before meeting its promise of a much more moderate rate of price increases in the second half of the year.

The rate compared with an 8.8 per cent rise in the fourth quarter of last year.

Effort to cut red tape tangled in frustration

CARTHAGE, Tenn. (AP) — A man who decided to cut red tape by seeking flood damage relief straight from President Nixon was directed by a White House aide to an agency abolished in 1972.

Robert W. Austin of Carthage said when he called the White House and asked for the President, his call was transferred to a presidential assistant. Austin said the

unidentified assistant referred him to a Gen. Lincoln, director of the Office of Emergency Preparedness.

Austin said the aide told him Lincoln "was very close to the President."

Austin said that on a followup call to the President's office he was told that the Office of Emergency Preparedness was dissolved two years ago and Lincoln has since retired.

MOMENTS NOTICE

Cancer Craft Fair
Kappa Kappa Gamma sorority will have a Cancer Craft Fair from 10 a.m.-4 p.m. Saturday at the KKG Lodge, 2414 B. Broadway. Unusual hand-made crafts will be on sale with all proceeds going to the American Cancer Society.

IEEE
IEEE will have a picnic at Mackenzie Park from 3 p.m. to 8 p.m. today. All members and their guests may attend.

Christian Fellowship
Stan Henderson of Dallas will speak at the chapter meeting of Inter-Varsity Christian Fellowship at 7:30 p.m. today at University Ministries. Everyone may attend.

Latin American Students
The Latin American Student Association will have a dinner at 7:30 p.m. today at St. Elizabeth's Catholic Church. Tickets are \$2 and may be bought at the door or the office of International Programs.

BSU
The BSU will have an all-school picnic from 11 a.m.-4 p.m. Saturday at Mackenzie Park. There will be football, baseball, frisbees and homemade ice cream. Anyone may attend.
