

IFC All-University mixer held

The All-University mixer, sponsored by the Inter-Fraternity Council, was held Friday afternoon in the Merchants Building at the county fairgrounds. Proceeds between \$450 and \$500 are

expected, and will be donated to the American Heart Fund. Last fall, the event raised \$475, which was donated to the Lubbock United Way. (photo by Paul Tittle)

## Speculation growing on Briscoe's choices for new Tech Regents

By CHARLEY BANKHEAD  
UD News Editor

Speculation is growing as the time nears for Gov. Dolph Briscoe to fill three vacancies on the Tech Board of Regents.

The terms of Frank Junell, Trent Campbell and Charles Scruggs expired Jan. 31. Briscoe is not expected to make an announcement concerning new appointments until Friday or later.

Sources and Briscoe aides have hinted the governor might reappoint Scruggs, a friend and Briscoe supporter, to another term. Scruggs, an editor for "Progressive Farmer" magazine, has taken up residence outside Texas.

A "Progressive Farmer" employe at the Dallas office of the magazine told The University Daily Scruggs now works at the magazine's main office in Birmingham, Ala. An employe at that office confirmed this. Scruggs could not be reached in Birmingham for comment on his possible reappointment.

George Lowrance, a Briscoe aide, told the UD that he or the governor knows of no residency requirements for regents of state colleges in Texas.

"As far as I know," said Lowrance, "if Mr. Scruggs has the time and desire to serve, I don't think his residence would be any problem."

Junell and Campbell previously have indicated a desire to step down as regents and devote more time to their work. Junell is a banker in San Angelo. Campbell is an executive with Mosher Steel in Houston.

The names of several Lubbock men have been mentioned among those the governor is considering to fill the vacancies. They include Don Workman, a vice president with First National Bank; Charles Guy, former publisher of The Avalanche-Journal; Dub Rushing, a local businessman and investor and unsuccessful mayoral candidate; and Lee Stafford and Leroy Elmore, local realtors. None of these men was available for comment late Friday.

Two other persons mentioned prominently in the speculation are Anne Armstrong and Trent Root.

One source has been quoted as saying Armstrong's name definitely will be submitted to Briscoe for consideration. She is a former chairwoman of the Republican Party and the highest-

ranking woman in Richard Nixon's Administration. For this reason, Armstrong is not given much chance to be appointed.

Root is an executive with the Dallas office of Texas Power and Light. When reached at his office Friday, Root said he had not been approached by any Briscoe official about the appointment.

"The first time I heard about it was from the A-J reporter I talked to," said Root. "If anyone knows anything, I would appreciate it if someone would let me in on it."

Root, a Tech graduate and former president of the Ex-Students Association, said he would definitely be interested in an appointment if one were offered to him.

"I go back a long time with Tech," said Root, a 1949 graduate. "My father was dean of business administration at one time, and I have a daughter at Tech now. I would certainly be willing to serve as a regent."

Briscoe has made no official statement concerning the appointments. Governor's aides have said Briscoe has been presented many names and will consider each one before making a decision.

## Griffin refuses to comment on charges against his office

By MELISSA GRIGGS  
UD Reporter

Lubbock Criminal District Attorney Alton R. Griffin refused to comment on a recent article in the Avalanche-Journal accusing his office of inconsistencies and irregularities in the prosecution of criminal cases.

In the article, Griffin's office was criticized for its failure to file charges on the theft of a cotton stripper from Bryant Farm Supply, despite the fact Bryant general manager H. A. "Red" Rivers discovered the stripper on a Lubbock County farm. Rivers matched the serial numbers, identified the trailer the stripper was on and notified the sheriff's department.

According to Rivers, a 26-year employe of Bryant Farm Supply, the stripper was stolen Jan. 15, 1974, from the company's Clovis Road location. Rivers circulated more than 200 flyers to farm implement dealers in the area, notifying them of the theft and asking them to call him if anyone tried to buy accessories to mount the stripper. Rivers, a private pilot, said he flew more than 2,000 miles looking for the stripper.

Rivers said he found the stolen stripper Oct. 9 on a south Lubbock County farm.

After matching serial numbers, Rivers called Lubbock County sheriff's deputies who took pictures for evidence. After the sheriff's department had the evidence, Rivers took back the stripper. He said the farmer on whose property the stripper was located did not protest.

Sheriff Department officials presented the case to the district attorney's office where it was referred for

prosecution.

"Five days after the material was turned over to the District Attorney's office, I called to see what was going on," said Rivers. "They told me I didn't have a case. When I asked whether they had questioned the man as to where he had gotten the stripper and if he had picked it up or it was delivered, Griffin said he could not ask him those things."

Rivers said the man who owned the farm claimed he purchased the stripper for \$5,500 cash, had no receipt and could not remember the seller's name.

"If the man is innocent, I don't understand why he won't tell us things," said Rivers. "If he purchased it from the thief, it is the thief we want to prosecute, not him. One thing I thought was rather suspicious was that the man hired an attorney immediately after we found the stripper. If he was innocent, he would only have to tell the sheriff's department where he got it, not hire an attorney."

"I worked with the sheriff's department and we gave Griffin's office everything it needed to pursue the case but for some reason, the district attorney's office just blocked the case. I don't expect their office to do anything now. In fact they are not in the position to do anything. They took a stand by not doing anything and now to do anything different would be to admit they were wrong and should have taken care of the matter. I was just surprised at the way things were handled by the district attorney's office."

"If Griffin's office is not doing its job, as it clearly did not in this case, there is a hole in the public's need for protection. Griffin did not do his best in this case and it could happen on others, too."

The office just does not pursue things far enough," he said.

In another case, the article said Griffin's office filed felony theft charges nearly two years ago against an airport security guard, blocking the guard's efforts to sue the Lubbock Police Department for police brutality.

Charges against 26-year-old James Douglas Brown were filed March 30, 1973. But at the time of the story (Jan. 12), court records revealed the case had never been presented to a grand jury for action or dismissed.

Brown was dismissed from his security guard position at the Lubbock Regional Airport after Mrs. C. J. Dixon of Beeville reported \$80 missing from her purse in the passenger lobby. Brown, who denied taking the money, was questioned by two detectives at police headquarters.

The former security guard claims he suffered facial, hand and back injuries when a detective shoved him into a door facing on the second floor of the police station. Brown said he had been treated at least twice since his release from custody for chronic back injuries and wears a supportive brace.

Brown and two attorneys he had contacted regarding the case believe the theft charge was purposely kept pending for leverage until it was decided whether Brown would file a civil suit for police brutality.

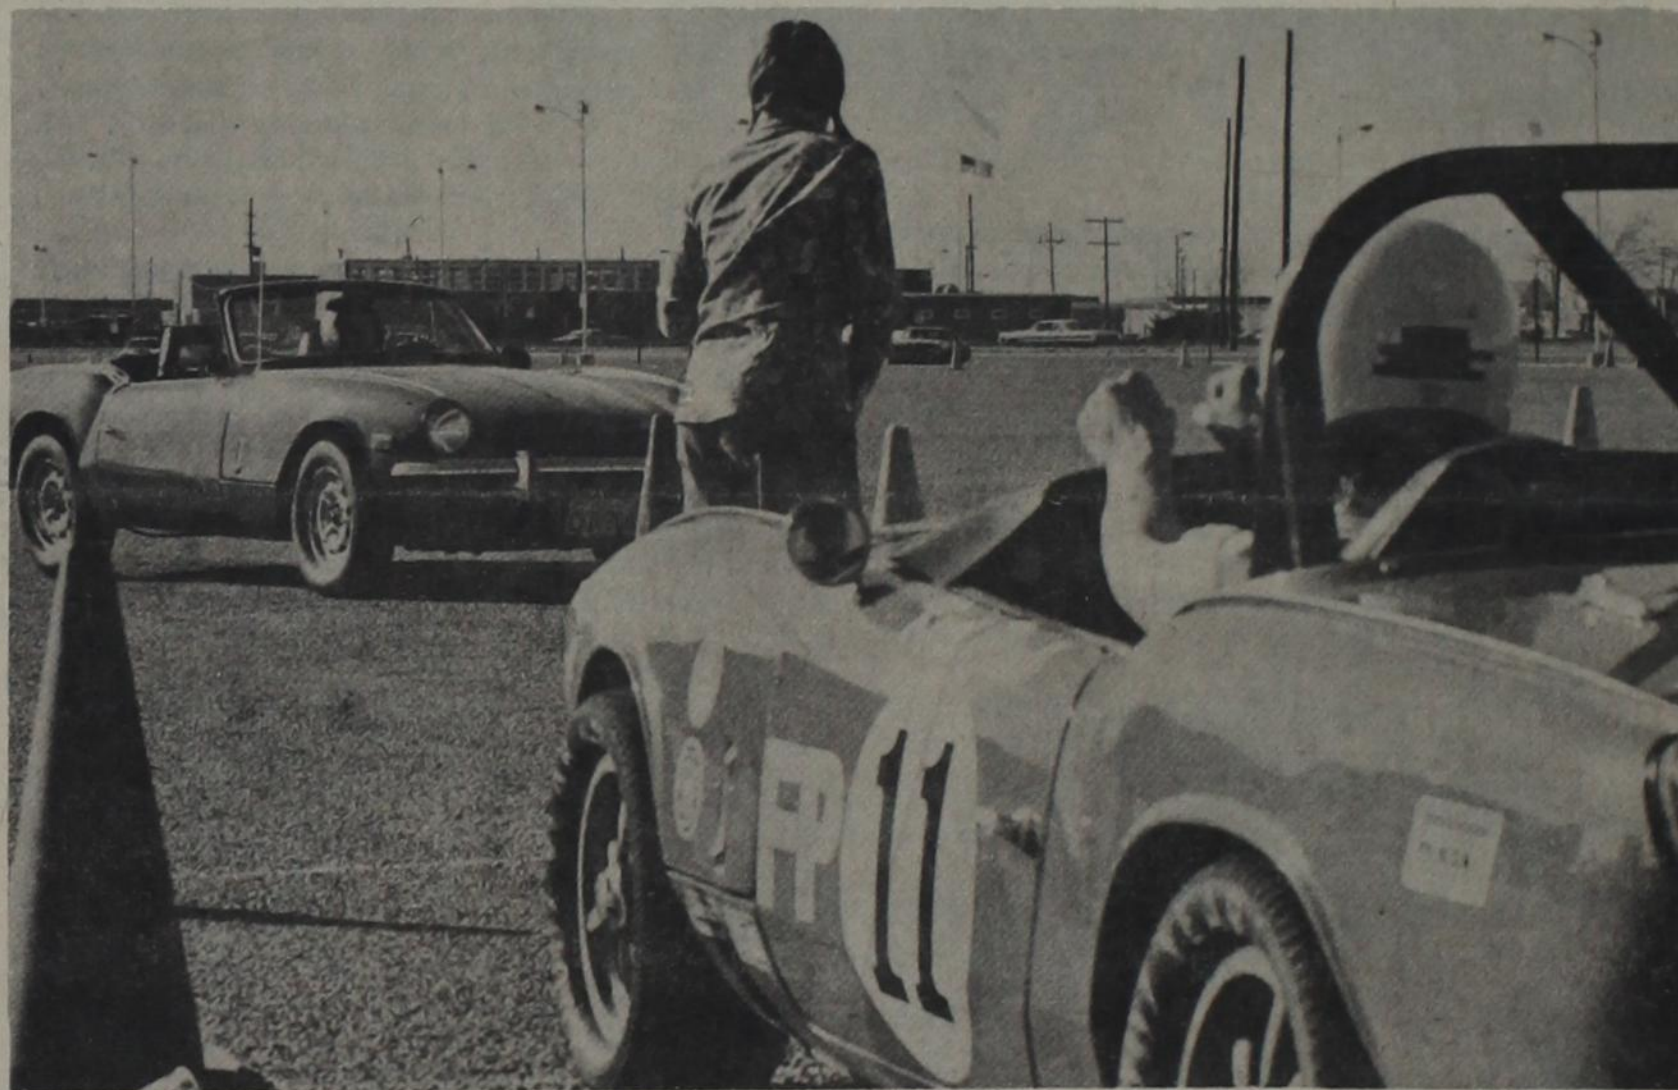

Shortly after the story appeared, an examining trial was ordered by Brown's attorney. Justice of the Peace Charles E. Smith ruled sufficient evidence had not been introduced to bind the case over for grand jury action and ordered it dismissed. Brown did not file a suit for police brutality.

However, as Brown was leaving the courtroom he was re-arrested for a misdemeanor check case. Lubbock police detective Doyle Nelson, one of the officers who had questioned Brown before and had appeared as one of the state's two witnesses in the theft case, arrested Brown.

After being arraigned before County Court-at-Law Judge Denzil Bevers on the check charge, Brown was placed under \$500 personal recognizance bond. The misdemeanor check case was filed Sept. 18, 1974 in connection with a \$20 check allegedly given to Furr's Supermarket Feb. 4, 1974.

In another case, according to the story, Griffin's office refused either to collect or prosecute a \$158 worthless check paid to Bolton Products Co. by a Lubbock mobile home manufacturing company. James Bolton, whose firm builds cabinets for mobile homes, said he began trying to either collect the check or prosecute it in early October.

An assistant district attorney assured him that Griffin personally was handling all action and the check would be filed. Bolton said the charges still have not been filed.

Start and finish

Driver Kent Clark, with car number 11, awaits his turn Sunday at the slalom course in the Coliseum parking lot as an unidentified car approaches the finish line. The event was

sponsored by the South Plains Sports Car Club and was the first event of the year in sports car competition held around the state. (Photo by Paul Tittle)

## Teacher evaluations yet to appear in print

By JOHN CAMP  
UD Reporter

The Student Association's teacher evaluations, which had been promised to the students before spring registration, have yet to appear in print.

Debbie Lansford, executive director of the SA's academics division, said all evaluation forms had been turned over to the Computer Center before Christmas. Under agreement with Prof. Burle Hubbard, the Computer Center was to have all forms keypunched and ready for publication before Dec. 26, Lansford said.

Also as part of the agreement, Lansford said she and each of the participating instructors were to receive computer printouts which have not arrived. Approximately 300

teachers allowed the SA evaluation of their classes.

Hubbard said the forms are "all taken care of and will be done within a few days." Hubbard explained the late completion of the forms by saying that over the holidays the Computer Center closed and he had been sick with the flu. "It is now just a matter of computer time."

Lansford expressed deep regret that the evaluations were not available to the students before spring registration as she had promised. "I am real sorry — I stayed home all Christmas calling and checking on the forms. I sure learned a lot."

According to Lansford, the forms were transferred to the Computer Center Dec. 19, and she had agreed with Hubbard to have the keypunched forms

returned Dec. 26. "We needed to have them to the printer before Jan. 8 for production by Jan. 14."

While the evaluations are still being

processed, a bill for \$471.45 arrived in the SA office. The bill calls for payment of a nickel for each of the 9429 cards. The unpaid bill waits on SA President Bill Allen's desk.

Although delayed, the SA officials plan to continue efforts to produce the evaluations for the students in time for summer school registration. Lansford said the SA will probably wait and publish a comprehensive set of evaluations to include this semester's and last semester's. "There is no longer any rush, but we do want to have them out by the summer session," Lansford said.

## Many young Americans didn't vote

WASHINGTON (AP) — Four of five Americans between the ages of 18 and 21 stayed away from the polls in the 1974 midterm elections, the Census Bureau reported Sunday.

Among all categories of voters nationwide, only those approaching retirement age bucked the pattern of massive apathy toward last fall's balloting, according to bureau statistics.

Besides young people, minorities and women showed the least interest in the congressional elections and the selection of governors and local officials.

Overall, only 45 per cent of a record 141 million eligible voters reported going to the polls last Nov. 5. Many of the estimated 76 million who stayed home said they were either uninterested or disliked politics in the post-Watergate era.

The preliminary Census Bureau report was based upon interviews of more than 100,000 eligible voters questioned two weeks after the election.

Comparisons are difficult, but the report showed that not since 1958 had such a high proportion of those eligible chosen not to vote. In that recession year, only 43 per cent of those eligible

turned out.

The lowest figure historically was 32.5 per cent in 1942 when millions were away at war.

Comparisons before 1966 are inexact because not until that year did the Census Bureau begin to ask people if they voted and why. Earlier figures from other sources counted actual votes measured against the known voting age population.

By that method, also acknowledged to be slightly inexact, the 1974 figure for total turnout was 39 per cent, six percentage points below the Census Bureau's finding.

## Spring semester enrollment increases for Army ROTC

By EABS GREYHOSKY  
UD Reporter

Sometimes a semester can mean all the difference, and that seems to have been the case with the Army ROTC program at Tech.

In a story published Dec. 21, using statistics concerning the fall semester, the enrollment figures of the Army ROTC program were not very encouraging.

One month later, after the beginning of spring semester, the outlook of Army ROTC has changed faces and appears to be on the upswing, according to Lt. Col. George Kimbro, associate professor of military science.

"After checking our figures, we found that the spring enrollment has increased a little more than 10 per cent over last fall's enrollment," said Kimbro. "In addition, we have eight girls in the program now, as opposed to only two last fall."

Kimbro attributed the student number increase to the fact that the ROTC department is circulating more information concerning its program. Arts and Science counselors have also made additional recommendations for ROTC careers to students who are undecided about a future.

"A combination of these factors and an increasing enrollment has made the spring semester look very promising," said Kimbro.

# Time waits for no one

Robert Montemayor

Sometime ago — four years back in fact — a Tech organization decided to petition and poll students as to their desires concerning the possibilities of new construction for campus recreational facilities.

Considering the pathetic existing facilities, students were quick to mount a campaign to obtain from the University pledges that more and better facilities would be in the future construction plans. Committees were formed to investigate the needs.

Needless to say, students were inspired by all the talk and many were already visualizing an ultra-modern, multi-sports area which could suitably serve all students. On top of all this, the Tech Board of Regents allocated approximately \$2 million for new facilities. Progress was being made.

**HOWEVER, A FEW SNAGS** in the planning were encountered. First off was the problem of deciding which facilities would receive priority attention. According to the original survey, which was conducted by the Saddle Tramps, the Campus Recreational Facility Use Study showed that of the approximately 750 polled the first type facility desired was one for swimming.

Sixty two per cent wanted a swimming facility. A mere two percentage points back were those who wanted plans for more basketball courts... preferably the indoor type. Tennis, football, bowling, handball, golf and baseball were other sports which drew more than 40 per cent support from students.

Today, after countless drawings and reports, our original \$2 million has of course taken a pounding because of the country's staggering economy. And so far, our ultra-modern, multi-sports area has only eight new tennis courts and four more combination foot-soccer-baseball fields. However, the

new additions do not amount to more than \$500,000 of total sum.

Where is the rest of the money?

**IT'S TIED UP IN A SWIMMING POOL** which has seen more revisions than I would care to indulge in. One pool plan, which was greatly liked by everyone, was shot down when the estimates were found to be approximately \$800,000 over the limited budget. And if you were to call either Vice President for Student Affairs Robert Ewalt, or Director of New Construction Norman Igo to ask how the pool plans are going, you most likely would get a response like, "We're still working out the details and should be ready to go to the Board at anytime now."

Even if the Board were to accept the final drawings for the pool sometime this spring, the most probable date the pool would be ready would be late in 1976... if that early. And with every month which passes by, revisions in the pool's construction budget are needed because of the inflation hassles.

**EWALT, WHO HAS BEEN** a Tech administrator for only a year and a half, has been expectingly optimistic, though it is clear that the recreational facilities have hung over his head as a nagging headache. He is even careful to choose his words when talking about the pool. "Potentially, we could have the pool ready for the students by 1976," he says. "Potentially?"

"We could have the bids ready for Board approval in March," he said. "It is still a priority item. And there are still some other problems." The other problems he talks about is specifically the costs we will run into for the maintenance of the pool.

"It's going to take people to man that pool," Ewalt said.

"Many have not even considered how much it will cost to keep the pool in good shape." Though Ewalt is not certain how much money maintenance may take, in the 1974-75 Allocation of Student Service Fee Income estimates, Ewalt had budgeted \$12,598 for the "aquatic center."

"Of course the pool wasn't ready for this year, but I did have to make some estimate... though I don't really know if that figure will be enough," Ewalt said.

**IF THE POOL IS BY SOME** good fortune finished next year, students at this time nonetheless should be thinking about what other facilities they could possibly beg from the Regents. The \$2 million was a nice start, but by no means is that sum going to be enough.

Unless students keep lobbying with Ewalt and other Tech administrators, we may find ourselves with no other plans beyond those of the "water hole" we have presently on the drawing boards. What's more, if the thrust for new plans is not a concerted effort it may be that much more difficult to acquire anything.

Some of the regents have already stated openly that our building progress at Tech is beginning to level off... that we have built as much as we really need to. Again, another barrier for students to contend with.

If students are indeed interested in obtaining more facilities in the future, they will do good to look at the past history of our present recreational programs. Time has been the most, single glaring problem... along with administration red tape. And it may even appall students to realize that their future recreational plans were plans which should have been initiated yesterday.

Have a good day.

# Washington merry-go-round

## Senate's own spies

by Jack Anderson

WASHINGTON — Members of Congress have raised an almighty howl over the FBI's practice of keeping files on them. But what they don't know is that one of their committees also collected derogatory information on Senators and Congressmen.

The Senate Internal Security Committee not only maintained folders on Capitol Hill figures but leaked juicy tidbits from the folders to right-wing publications.

Staff members "chortled with delight" when their material appeared in print, witnesses have told us. The victims of these smears, invariably, were liberal legislators whom the staff didn't like.

Sources with access to the committee's secret files recall seeing folders on the following Members of Congress:

Rep. Bella Abzug, D-N.Y., Sen. Birch Bayh, D-Ind., Rep. Ronald Dellums, D-Calif., ex-Sen. William Fullbright, D-Ark., Sen. Jacob Javits, R-N.Y., ex-Sen. Tom Kuchel, R-Calif., ex-Sen. Howard Metzenbaum, D-Ohio, the late Sen. Wayne Morse, D-Ore., and Sen. Charles Percy, R-Ill. Files were also kept on several others.

Last spring, whispers about the Senate Internal Security Committee's titillating files reached the Senate Rules Committee, which polices the other committees. Chairman Howard Cannon, D-Nev., confronted the veteran chief counsel, Julian Sourwine, behind closed doors.

Did the staff maintain derogatory files on Members of Congress, Cannon demanded. Sourwine solemnly denied the existence of any such files.

After he got out of the hearing, witnesses report, he rushed back to his committee hideaway and began systematically to purge the derogatory material from the files. The witnesses claim "up to 40 folders" were pulled from the filing cabinets.

The folders on some lawmakers were filed under their own names; others were filed under the names of their home states. For the most part, the folders contained derogatory newspaper clippings.

Of course, the Internal Security Committee also kept files on hundreds of other people, including such celebrities as songstress Eartha Kitt, actress Jane Fonda and the late Martin Luther King. There was a particularly thick folder, say our sources, on myself.

We asked Chairman James Eastland, D-Miss., about the spying on his colleagues. This would be a violation of the traditions of the Senate, which Eastland has always respected. "It was not done with my knowledge," he declared firmly. "I wouldn't have permitted it."

Sourwine denied the whole thing. "We have never kept investigative files on any Senators," he said. The Senate Rules Committee can learn the truth, of course, by putting the staff members under oath.

Footnote: We have also established that the Senate Internal Security Committee sometimes issued as its own work reports that were actually written by the CIA and the FBI. Reports castigating security risks, both real and imagined, were slipped to the staff usually on plain paper by both agencies. Then the committee would publish them, with only minor changes. Again, Eastland told us: "I know nothing about that."

**WASHINGTON WHIRL** — After three attempted crashes at the White House, the Secret Service is worried that someone might use stolen weapons in an assault. The helicopter used in one of the attempts, for example, was stolen from nearby Fort Meade, Md. Yet at Andrews Air Force Base, even closer to the White House than Fort Meade, a secret Air Force inspection has turned up serious breaches of security in ammunition storage areas. Corrections were made within days after the report was submitted... A few nights ago, a chauffeur-driven government limousine pulled up to a tennis club in the Washington suburbs. Out stepped Deputy Attorney General Laurence Silberman, who played a few hours of tennis and then climbed back into his limo. It was warmed up and waiting for him. A Justice Department spokesman explained that Silberman puts in a "long day" and doesn't have time to drive home for his car before playing tennis... After President Ford's State of the Union address, Vice President Nelson Rockefeller cracked to friends that he had heard about a hundred presidential speeches, but this was the first time he had sat through an address watching the back of the President's head...

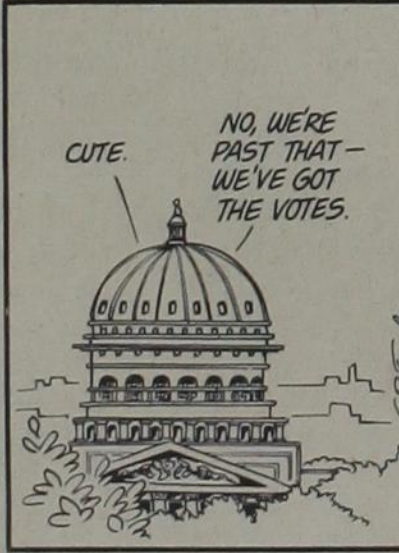

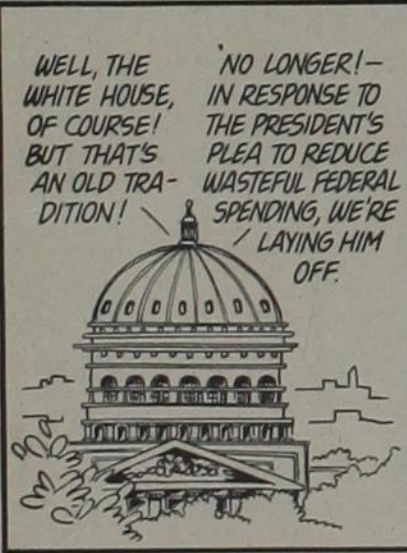

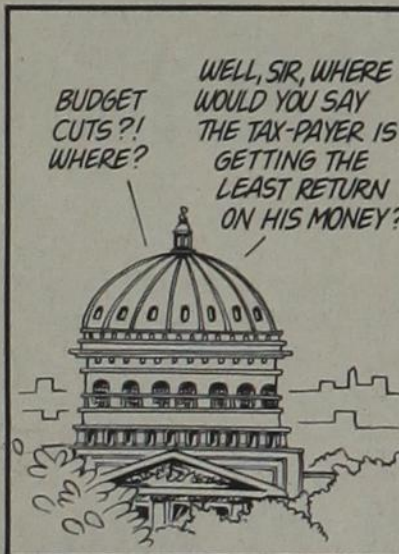

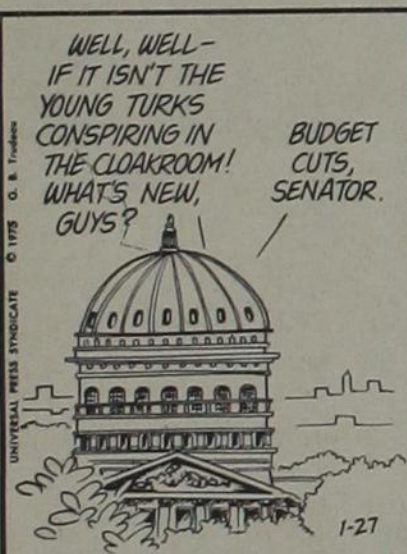

**CORRECTION:** In a recent column, we listed Rep. Dominick Daniels, D-N.J., as one of the Congressmen who uses a secret fund to finance his newsletter. Our typist inadvertently copied the wrong line from the Congressional Directory. It should have been Congressman George Danielson, D-Calif., whose name appears below Daniels' listing. Our apologies to Daniels, who doesn't publish a newsletter because the cost is too high.

"OF COURSE I BROUGHT THEM WITH ME—HOW DO YOU THINK I GOT IN HERE?"

**R. B. Wiesen & Co. Inc. Presents**  
A Seminar on Financial Planning

Money management has become an intricate part of every person's life. The accumulation of assets, their preservation and distribution can only be accomplished through personal financial direction.

R. B. Wiesen & Co., Inc. is presenting a seminar at the Southwestern Public Service Ready Room in Monterey Center Wednesday night, January 29, 1975, starting at 7:00 P.M. We believe this seminar will be of interest to both husbands and wives. The subjects that we will discuss will include:

- The pro's and con's of Investing in Mutual Funds, Common Stocks, and Real Estate.
- How to possibly get a 20 to 30 percent increase on your savings account.
- Understanding Life Insurance and what part it should play in your financial future.

There is no cost to attend. Because of limited space, reservations must be made to attend. There will be a drawing for a door prize. To make reservations, call 797-2436 or evenings 799-0845. Bring your friends with you. We hope to see you.

# Murray reveals new appointments

The appointment of Dr. George F. Meenaghan as dean for research at Tech's University Complex was announced Saturday by President Grover E. Murray.

At the same time, Dr. Murray announced the appointment of Dr. James E. Halligan as chairman of the Department of Chemical Engineering, a post Dr. Meenaghan has held since 1969. Both appointments become effective immediately.

Meenaghan served half-time during the fall semester as director of Research Services, and his appointment to the newly created position of dean for research reflects, Dr. Murray said, the academic growth of Tech.

"We have attained a program in new sponsored research of approximately \$5 million, and we hope to develop this to a level of \$10 million in the foreseeable future," Dr. Murray said.

Dr. Murray said that Meenaghan's responsibilities would include the development of more incentives for research, the strengthening of liaison between the university complex and funding agencies, and the improvement of the internal research structure at all levels, from departments through the administration.

While Dr. Murray expressed satisfaction with the record of research growth — from \$1.8 million in 1970-71 to the \$5 million program in 1973-74, he emphasized that there still is potential for development.

"We cannot be content with maintaining a creditable record," he said. "Our faculty and graduate students have more to offer through research, and it is important that the university support their efforts."

Dr. Murray said Meenaghan would continue as the director of Research Services and will, in addition, devote about one-third of his time to teaching and his own research.

Both Dr. J. Knox Jones, vice president for research, and Dr. William R. Johnson, interim vice president for academic affairs, emphasized the important relationship between research and teaching.

Jones said that the new deanship will be of special value to the academic community because of the increasing need for interdisciplinary research programs.

"The complexity of problems in a modern society makes it mandatory," he said, "that individuals with varying areas of expertise work together to find solutions to those problems. Bringing about this necessary inter-action among disciplines will be one of the especially important aspects of Dr. Meenaghan's work."

The impact of an active research program is felt at all student levels, according to Dr. Johnson.

Halligan was selected as chairman by the unanimous vote of the faculty in chemical engineering, according to Engineering Dean John R. Bradford. He received the Distinguished Teaching Award in 1972 and, in the same year, was named outstanding engineering teacher by Tau Beta Pi engineering honorary fraternity on campus. This month he was honored for his research by the Livestock Environmental Services Committee.

His principal research efforts, in conjunction with other faculty members, have been in the areas of separations using liquid membranes and of solid waste as an energy source — on which he and colleagues reported in 1974 to the Governor's Energy Advisory Council and the use of cotton wasties in the control of oil spills. His research has often been interdisciplinary and frequently a cooperative effort with other faculty members.

Dr. Meenaghan is a co-investigator with Halligan and others in the cotton wasties project. Although his research interests are varied he has had a continuing interest in water pollution problems. He will continue to teach at his own request.

Meenaghan is a member of Tech's Athletic Council, chairman of the Faculty Development Leaves Committee, vice-chairman of the 50th Anniversary Activities Committee, and has served, among other assignments, as faculty sponsor of the Student Senate and on the Steering Committee of the Institutional Self-study Committee.

Meenaghan, whose degrees were earned at Virginia Polytechnic Institute, came to Tech from Clemson University.

Halligan

Meenaghan

# Student involved in Antarctic research

A Tech grad student in biology is currently on his second trip to Palmer Station on Anvers Island in the Antarctica to do scientific research involving the Antarctic fly.

Brent Davis, son of Mr. and Mrs. Don W. Davis of Rule, is joining a group of American, British, Argentine and other scientists to study the small wingless insect, Belgica antarctica Jacobs, and its strategies for adaptation to the area's severe environment.

In addition to his contribution toward research financed by the National Science Foundation, Davis also expects to collect information to be used to

prepare his dissertation under the direction and supervision of Tech's Dr. William R. Atchley, associate professor of biology and statistics.

Davis said genetic basis of adaptation in polar insects has been studied in Arctic organisms; but little critical data is available for Antarctic organisms.

Genetic studies will be undertaken to examine the extent of chromosomal change and its possible relation to environmental variation and the possible occurrence of organisms "facultative parthenogenesis," which Dr. Atchley explained as females able to reproduce without the aid of males.

# MOVE aids local groups

Any Lubbock organization or club which needs help for its projects may now contact MOVE, Mobilization of Volunteer Efforts.

MOVE, a cleaninghouse for community projects, is sponsored by the Student Association, according to Tom Carr, SA external vice-president.

Organizations should

contact MOVE about their events so that MOVE can tell campus organizations and societies about the project and ask the Tech students to participate.

Carr said MOVE would like to inform Tech clubs about projects such as United Way and the Heart Association Drive.

# Senators quiz Mayor about Indiana

By JOANNA VERNETTI  
UD Reporter

Lubbock Mayor Roy Bass appeared at the Tech Senate meeting Thursday to answer questions, most dealing with the Indiana Ave. controversy, from the student senators.

"We need to maintain as much dialog as possible between the community and Tech," Bass said.

The senators questioned Bass at length about the expansion of Indiana Ave.

The engineers, who were chosen by Tech and the city, have recommended the expansion of Indiana Ave. through the Tech campus, Bass said.

The recommendation includes a proposal for a four-lane highway with two extra lanes for turning. Bass said the City Council favors building six lanes in the beginning rather than convert the two lanes later when traffic increases.

To justify the construction of a six-lane highway, 20,000 cars per day are necessary, Bass said. In a recent traffic survey, 16,000 cars per day used 19th and Indiana. Bass said, however, the use of the highway will increase when the Med School is completed.

By building the six-lanes initially, the cost of the construction would be reduced, Bass said.

Tech's financing of the Indiana expansion was also discussed by the mayor. The senators asked why Tech rather than the Texas Highway Department would finance the street construction.

Bass said the Highway Department funds were diverted into other areas when the expansion was delayed. Now the proposal includes Tech's financing of the construction. The City of Lubbock will maintain and repair the highway, Bass said.

The problem of pedestrian

safety on the crosswalks on University Ave. was a major concern of several of the senators. The students questioned the safety of the pedestrians having to cross the proposed six-lane Indiana highway.

Bass said he favored overwalks, but he said the Tech administration had never submitted a proposal to the City Council for overwalks.

The recent election with voters turning down a proposal to expand the number of seats on the City Council was also discussed. Bass said he favored the expansion of council seats. He noted the poor voter turnout both among city voters and Tech students. He said perhaps the voter apathy indicated that the expansion issue was not as important as many people had thought.

Bass said some of the priorities of the City Council this year would be water, gas and electric rates, the expansion of Indiana, tax on travel trailers and construction at the Lubbock airport.

Bass would not comment concerning the location of package liquor stores in the city limits.

The Senate conducted regular business after Bass finished answering the questions.

In other action, the Senate recognized the death of Grad Senator Gary Lambert, who died during the holidays. The

Student Association Conference Room had been renamed the Gary D. Lambert Conference Room in his memory. Senator Steve Williams was also named chairman of the rules committee.

# UC activities director does more than 'advise'

By WILLIAM D. KERNS  
Fine Arts Editor

Controversial, she's not. In fact, newly appointed University Center activities advisor Cheryl Kloesel at times seems to purposely avoid talking about any problems she's encountered with her new job or compare Tech's U.C. program with other schools.

"I really seriously have run into no problems thus far," she said. The facts are she is a woman of experience: a professional advisor who is already studying the Tech situation and, with an extremely positive attitude, making plans to extend "the growing arm of the University which is the University Center."

If anyone should be able to use the knowledge of other schools' programs to better Tech's, it is Kloesel. She attended and received her BA from the University of Colorado, taking time out for a year to attend Rheinische Friedrich Wilhelms Universitaet in Bonn, Germany. Majoring in International Relations and minoring in German and history, Kloesel received her degree and accepted the position of Assistant Director of Student Activities at the University of Kansas (KU). It's difficult to get her to compare the student programs of these two institutions.

According to Kloesel, such a comparison would not be valid because of (1) KU's location "in a small college town" and Tech being situated "in a medium size city" and (2) the different and unique interests which are typical of the West Texas area. After working at KU for five years and living in the Lubbock community for the past three (her husband being an assistant professor in Tech's English department), Kloesel did admit the overall KU program was "a little bit larger in scope" ... even though the two schools' student populations are "about the same."

For example, at KU Kloesel was very active with student travel services which assisted students in obtaining flights to Europe, international students IDs, youth hostel cards and, on the local front, charter tours to major athletic events (like the NCAA playoffs and the Orange Bowl), to mention a few. Asked to comment on whether it was feasible to initiate such a program at Tech, she responded "I hope so."

Elaborating, she added, "We are in the planning stages toward a student travel program. I'm in the midst of bringing the files up to date on what services are available. And we hope to be able to make such a program available in one to one-and-a-half years."

Perhaps more than anything else, though, Kloesel strikes the listener as being very high on film. Kansas may have had a "larger film program" with its four extension film series, but the fired up advisor insists "Film here (at Tech) is up and coming."

Kloesel cited the increasing membership in and the outstanding work being performed by the campus Cinematheque Film Society as proof of her claim. Again, seemingly unphased by the fact that "the money is not there" for such possibilities as bringing a director and his films to Tech, she appeared eager to discuss plans for even

more screenings of classical films here. "A film program can support itself," she added. But there are others which need help, and Kloesel was quick to reveal that she and her staff are quite willing to revamp the UC programs to suit student needs and wants. "Some programs have been here for a long time, but that doesn't mean they have to stay around. We're critically evaluating certain programs and asking ourselves 'do they deserve funding?'" Though nothing's definite as yet, she said, then added "certainly, some programs may not stay around."

It's necessary for some programs to earn income, if only to support others which bring in no revenue. But according to Kloesel, "the concert business is no longer a big money-making venture. The talent is too expensive, and the listeners are getting more and more selective. There aren't the great big names there used to be and there's no guarantee of a sellout." (With this, she did admit Elton John sold out at KU and tickets had to be placed on sale at 3 a.m. to accommodate the lines which had already formed.)

The end of last semester saw the UC sponsor a concert by Linda Ronstadt, a show which earned the UC a small profit (a first this year, but just enough to cover their losses on Jackson Browne).

## ROTC application deadline set

Officials of the Department of Military Science at Tech announced Friday that March 31, 1975, is the deadline for applications for the Army's two-year ROTC program.

The U.S. Army offers college men and women the opportunity to be commissioned as second lieutenants after two years of on-campus ROTC instruction. The program calls for a six-week ROTC basic camp after the sophomore year and the completion of the ROTC ad-

Planning activities

Cheryl Kloesel, newly appointed activities advisor at Tech's University Center, works in the office she dubs her "cubbyhole" on plans for an upcoming UC sponsored concert. UD photo by Paul Tittle.

But Kloesel agreed with UC program director Sid McQueen's statement that, what with all the national publicity the songstress had attracted at that time, she should have played to a capacity audience instead of just 2250 people. Thus, one of the UC's moves in 1975 will be toward less expensive, but nevertheless talented and quality musicians and vocalists. Yet another change will bring in no income, but is nevertheless

one which Kloesel deems needed. For "after two years of talking about it ... we've finally transformed the piano lounge into an area for art exhibits." The new advisor mentioned that "additional lighting is still needed" but insists that "next year we'll be able to bring in two-week art exhibits from off campus and other areas of the country." Still, with all the talk about new programs and upcoming plans, one could very easily remain confused as to what an activities advisor really does. What are her duties? Her limitations? Faced with this question, Kloesel could only laugh and say "What do I do? Well, I could tell you the story about having to move a concert at the last minute from a 12,000 seat field house to a 3,000 seat auditorium because ticket sales weren't good enough. Or staying up until 3 or 4 a.m. working with student programs."

Quickly laughing off the stories which obviously strike her as humorous now (but probably frustrating as hell back then), she added a more serious explanation. "I serve in advisory capacity to the Union Program Council, and work with four committees: Fine Arts, Film, Free University and International Affairs. ... I offer advice and help set up programs."

But her title of activities advisor is generally a pretty definitive one. She serves only in an advisory position and has no authority to make any committee act in any one way or another ... except that "all financial commitments have to be cleared through my office."

Kloesel said many people don't know that campus cadets receive \$100 a month plus approximately \$500 for the six-week advanced camp. That totals \$3,000 in financial assistance during the junior and senior years.

Additional information is available from the Department of Military Science at Tech, Room 10, Social Science Building, telephone (806) 742-2141.

## Moments notice

- LEADERSHIP BOARD**  
UC Leadership Board is now taking applications for new members through Jan. 31. Applications may be obtained from the UC Programs Office on the second floor.
- RIGHT TO LIFE**  
Right to Life of Lubbock will meet tonight at 7:30 p.m. to review a slide presentation from the Houston Right to Life.
- STUDENT ORGANIZATIONS**  
All organizations should turn their registration in to the Student Programs Office in West Hall 242 by Feb. 20.
- AED**  
AED is now accepting applications from interested students in room 114 of the Chemistry Bldg. Deadline is Feb. 4.
- LEADERSHIP TRAINING**  
Freshman and sophomore students interested in leadership training should come by the SA office in the UC.
- ALPHA PHI OMEGA**  
Alpha Phi Omega will conduct their regular meeting tonight at 7:30 p.m. in BA 55.
- MORTAR BOARD**  
Applications for Mortar Board, senior women's honorary, are now available in room 242 of West Hall. Deadline for turning in applications is 5 p.m. Jan. 31.
- LA VENTANA**  
Applications for staff positions on the La Ventana are now available in Journalism 211. All applications must be turned in by Wednesday, Feb. 5.
- ENGINEERING STUDENT COUNCIL**  
Engineering Student Council will meet tonight at 8 p.m. in the Engineering Student Lounge.
- WOMEN'S TASK FORCE**  
Women's Task Force will meet at 5418 17th St. Agenda will include election of officers for the new calendar year.
- OUTING CLUB**  
The Outing Club will meet at 8 p.m. Tuesday in BA 257. There will be a cross-country and downhill skiing trip to Taos this weekend. For further information call 747-8421.
- BSU**  
Baptist Student Union, 2401 13th St., will sponsor Serendipity Tuesday at 5:30 p.m. A 50¢ hot meal will also be served. Freshman and Executive Council members will be installed.
- SINGLES GRADUATE-FACULTY CLUB**  
The Singles Graduate Faculty Club will have a coffee tonight at 8:30 p.m. in the Blue Room of the Student Center. Everyone is invited.
- ALPHA ZETA**  
Alpha Zeta Officers, advisors and pledge trainers will meet in Agriculture 301 tonight at 7:30 p.m.

## Placement center

Schedules will be open for appointments, by majors indicated, on each Tuesday afternoon in the placement office, Room 252, Electrical Engineering Building, 12:30 p.m. Interview schedules will be available for signing on the following dates starting at 12:30 p.m. Tuesday in Room 211, Electrical Engineering Building for May and August, 1975; graduate students and alumni. December, 1975 graduates will sign on Wednesday, Jan. 29, at 8 a.m. in Room 252, Placement Service, Electrical Engineering Building.

- February 4**

AMERICA'S FAVORITE PIZZA

student, faculty or staff person wants to bring in a film, concert or speaker, we can help them. We want to coordinate further groups on campus. We have the experience."

Thus far, the UC has helped Tech's band by bringing in films for the high school students who visit every summer and has also helped the Philosophy Dept. bring the film "The Magus" on campus. The only demand has been that the UC break even on cost (usually accomplished by guaranteeing a certain number of students' attendance). However, the UC program office is concerned that not enough people realize that "organizations may even co-sponsor an event with the UC; all they have to do is submit their idea to the program council."

Indeed, active involvement seems to be the key phrase in the tiny office Kloesel has dubbed her personal "cubbyhole." As she phrased it, "We're all interested in programs ... and we can all sit back and gripe and think the programs stink. But students need to take part. No rule says a program has to stick around; no rule says new ones can't be started. But people need to get one initiated."

Such a work ethic is predominant. In fact, it's obvious the lady does a lot more than simply offer advice.

# Raiders gore Longhorns on last second shot

## Pic Johnson hits clutch basket

By MIKE HALLMARK  
Sports Editor

Pic Johnson provided the edge the Tech Red Raiders needed, enabling them to edge the Texas Longhorns 59-57 Saturday night in Austin. The win evened Tech's record at 1-1 in conference play and set the stage for their clash with unbeaten Texas A&M in Lubbock Tuesday. Texas remained winless in two starts.

Johnson did not start the game as usual due to a bout with the flu which had weakened him considerably. However, he entered the ball game with the score tied at seven apiece and took up the

slack left when center Rick Bullock got into foul trouble. Bullock's foul worries are peculiar to games with Texas as he fouled out of both games last season. The big Tech "Bull" was limited to only 13 points before fouling out with 2:06 remaining.

However, Johnson became the man of the hour, accounting for 20 points and 11 rebounds over the stretch of the game and provided the waning moment heroics that saw Tech through.

Things looked bleak for the Raiders when Bullock fouled out on Horn postman Rich Parsons. Parsons sank one free throw which brought the

score to 57-55, Texas, with 2:08 left on the clock.

Johnson switched into Bullock's low post position and was in the right spot for his big plays. Johnson hit a turnaround jumper to knot the score at 57 all but that gave the Horns the ball with 88 seconds on the clock.

Texas played stall basketball trying to set up one last shot and leave the Raiders without time for an answer. Longhorn guard Dan Krueger found a lane open on the right side and set sail for the winning goal with 20 seconds left.

But Johnson went up with Krueger and put a clean block on the ball which rebounded off to Tech's Grady Newton.

Tech took the ball down-

court and played catch until they could set up a shot. Naturally, they went to the hot man, Johnson, and Pic got open at the right side of the

free throw line. Johnson got the ball and put up a left-handed shot over Parsons. The ball went down through the basket and silenced the frenzied Austin crowd.

Texas set up a play with four seconds left but a double pass did not cover ground fast enough and they did not get the shot off before the buzzer.

Poor shooting typified the first half as Texas led 26-20 despite shooting 30.4 per cent. Tech connected on only 32 per cent in the first half and was hurt by turnovers. However, Tech blistered the bucket for 69.9 per cent in the second stanza to spark their comeback. Tech finished with an even 50 per cent while Texas hit only 37.5.

Bullock's foul troubles against the Longhorns upset Tech Coach Gerald Myers who drew two technicals after the Big Bull got his third foul with

9:45 left in the first half. "I was weak from the flu," said Johnson after the game. "I really didn't go up very high on the block of Krueger's shot. That really made it easier."

Tech's physical condition is questionable and a source of worry for Myers. Johnson's illness only begins the list as Bullock is still nursing an injured shoulder and forward Rudy Liggins has a sprained ankle to go with a shoulder which slips out of joint.

The Tech win was the seventh in a row for the Raiders in Austin's Gregory gym. However, Myers is worried about another statistic. The Texas Aggies have won three of the last six games played in Lubbock Coliseum which was once called "The Pitt". Myers has begun a campaign to restore the coliseum to its former "Pitt" status to try and break the aggies' stride Tuesday night. A&M leads the conference tied with Arkansas.

Savior

William (Pic) Johnson was truly a savior for the Red Raiders Saturday night in their victory over the Texas Longhorns. Johnson blocked a key shot and then scored the winning bucket (see Mike Hallmark's story above.)

## Tracksters shine in meet

By JOE GULICK  
Sports Writer

Tech's tracksters broke six meet records and tied another as they dominated the Lubbock Christian College Indoor Invitational Meet held Saturday.

Out of 14 events, Tech had nine first places, one second place, and two third places. Gary Price of Tech tied with Wayne Manser of LCC for high point honors, each having 7½ points. The mile relay trophy went to the Tech relay team.

Coach Vernon Hilliard said, "All in all, I'm pretty pleased with our young team." Hilliard said the weakest point of the meet for Tech was lack of conditioning. "We just aren't in shape," he said.

Tech relay teams took first places in the 880 and the mile relays and set meet records in both events. The 880 relay team, composed of Randal Hall, Tony Harris, William Pier-

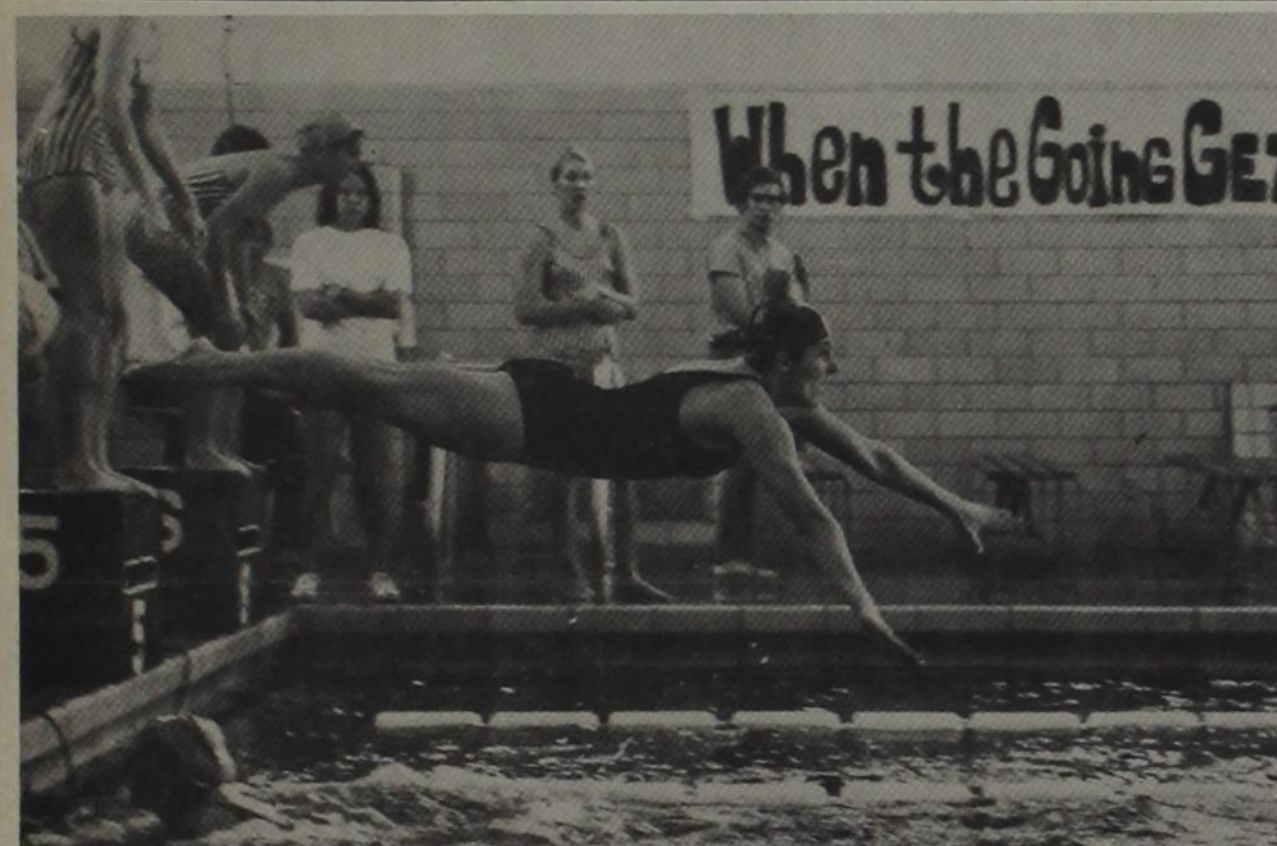

son, and Gary Price set a record of 1:31.2. The mile relay team of Hall, Harris, Pierson, and Phil Sims set a record of 3:25.4.

Tech took first places in two field events. Tommy McIntyre won the long jump with 21-3, and Bryant Huckaby took the honors in the high jump with 6-9¼. Huckaby's jump set meet and school records.

Records were set on the 880-yard dash with Wesley Stout running 1:57.5, and on the 1000-yard dash with Mark Johnson's run of 2:22.6.

Gary Price ran 6.1 on the 60-yard dash to cop first place and tie a meet record. Paul Sims took first place on the 60-yard high hurdles with 7.04.

Terrell Pendleton ran 9:27.7 on the two-mile run to set a meet record and a school record. According to Hilliard, it broke a 20-year Tech record.

Jumped gun?

Tech swimmer Gaile McNally spreads out in a dive in Tech's win of a meet here Saturday. She did not jump the gun as it appears, but was swimming the last leg of the Medley Relay which Tech won also.

## Raider fems take swim meet

By ANGELA SHEPHERD  
Sports Writer

The Tech women completely dominated their own swim meet here Saturday, compiling 336 points for the win. Second place winner was New Mexico State University with 193 points. The fem team won five of the 15 events and placed second in nine.

The team took both relays — in the 200-yard medley relay, Janet Calhoun, Pat Reeve, Susie Hines and Gaile McNally teamed up to defeat NMSU's team, while in the 200-yard free relay, the Tech team made up of Karen

Bussell, Calhoun, McNally and Hines took top honors.

Individual winners were Pat Reeve, 200 freestyle and 500 backstroke; and Susie Hines, 100 freestyle. Placing second were Bussell, 100 individual medley; Anne Moore, 50 breaststroke; Calhoun, 50 and 100-yard freestyle; Hines, 50 butterfly; Genie McKinney, 100 butterfly; McNally, 400 freestyle; and diver Laura Rasmussen, 3-meter diving.

Next competition for the team will be this weekend at Texas Women's University in Denton.

## Ticket exchange set up

The Student Association will sponsor a basketball ticket exchange today and Tuesday from 9 a.m. until 4 p.m. The exchange will be run one or two days before each home game.

According to Steve Beyer, director of student services, the ticket exchange will be similar to the present book exchange, and will apply to home games only. The tickets will be sold at a maximum price of \$1 to avoid scalping tickets.

Students may bring coupons to or buy them in the University Center and a list will be posted outside the SA office with the names of those students whose tickets were sold. Money for tickets sold may be picked up in the SA

office. Students must present a valid Tech ID in order to purchase a coupon.

# Recruiting '75-A big game of catch-up

Reservoir

New Coach Steve Sloan has found a reservoir of support in the Saddle Tramps and Raider Rustlers who volunteer to help with Recruiting. Sloan is leaning heavily on these students in his race to catch up. David Pierce, the Tramp shown here is in charge of Athletic Recruiting for the organization.

Head Coach Steve Sloan

By MIKE HALLMARK  
Sports Editor

Head Recruiter Mike Pope is a man with a lot on his mind these days. He thumbs through brochures of houses available in Lubbock as he waits for a plane to arrive with some high school athletes on it. He is a man without a home in the purest sense of the word.

His wife just sold his home in Florida (he came from Florida State) and he hasn't bought another in Lubbock yet. He really hasn't had much time to buy one since he has been on the road around the state of Texas most of the time trying to get players to consider signing with Tech and its new coaching staff.

"It's pretty hectic," said Pope, "I haven't been in Lubbock enough to really know it too well. However, the streets seem to be all numbered or lettered so I'm not having too much trouble."

Pope scoffs a little at the report carried by a wire service

about where the state's blue-chippers were considering signing. Tech was not included on any of their lists. "Those things are a little like the gossip magazines. There is enough truth there to make good reading. But like one kid visited here this weekend and I'd say it between us and Baylor yet they listed him as indecisive between Texas and Baylor. He hadn't even visited us when they talked to him.

"If we only get ten players, if they are the right ten we will have had a great recruiting year. We have a lot of talented young players in our program now and can afford to plug some gaps rather than sign people wholesale. If we could get a certain ten players they could have every other player in Texas."

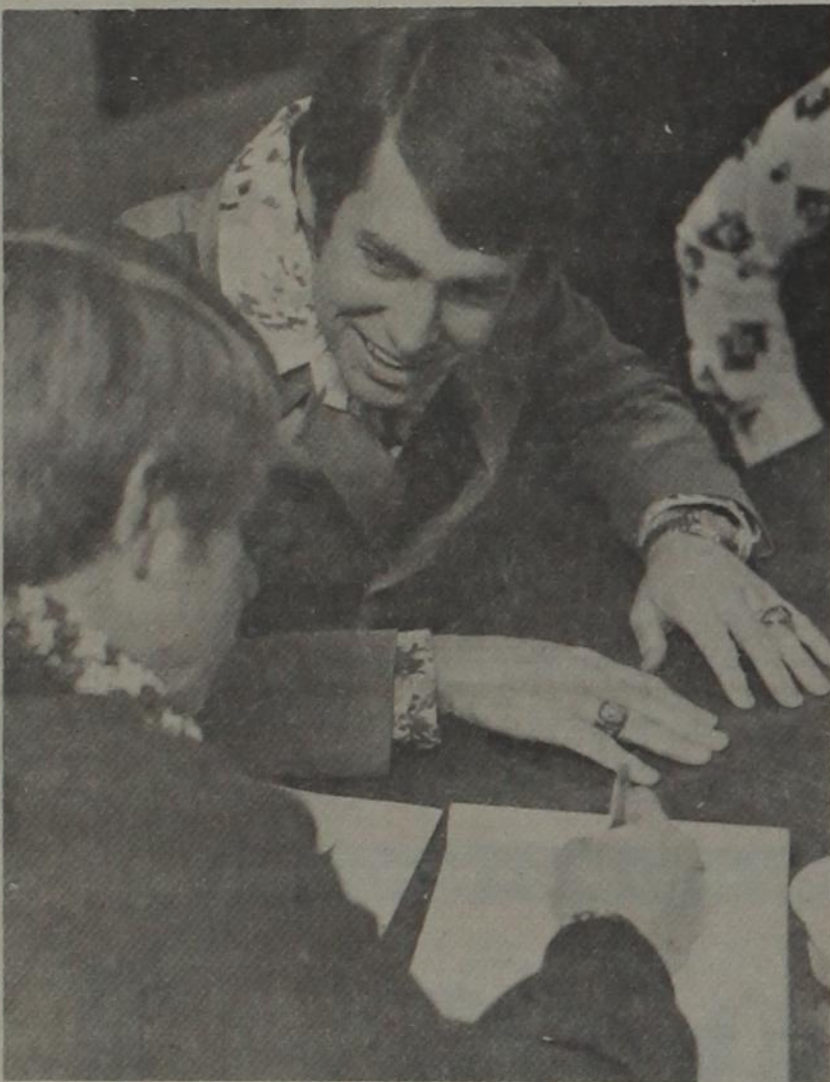

Pope has a big job still ahead with signing date Feb. 4 in trying to those "certain ten". In the meantime he's open to anyone with information concerning houses around Lake Ransom Canyon.

Another reservoir

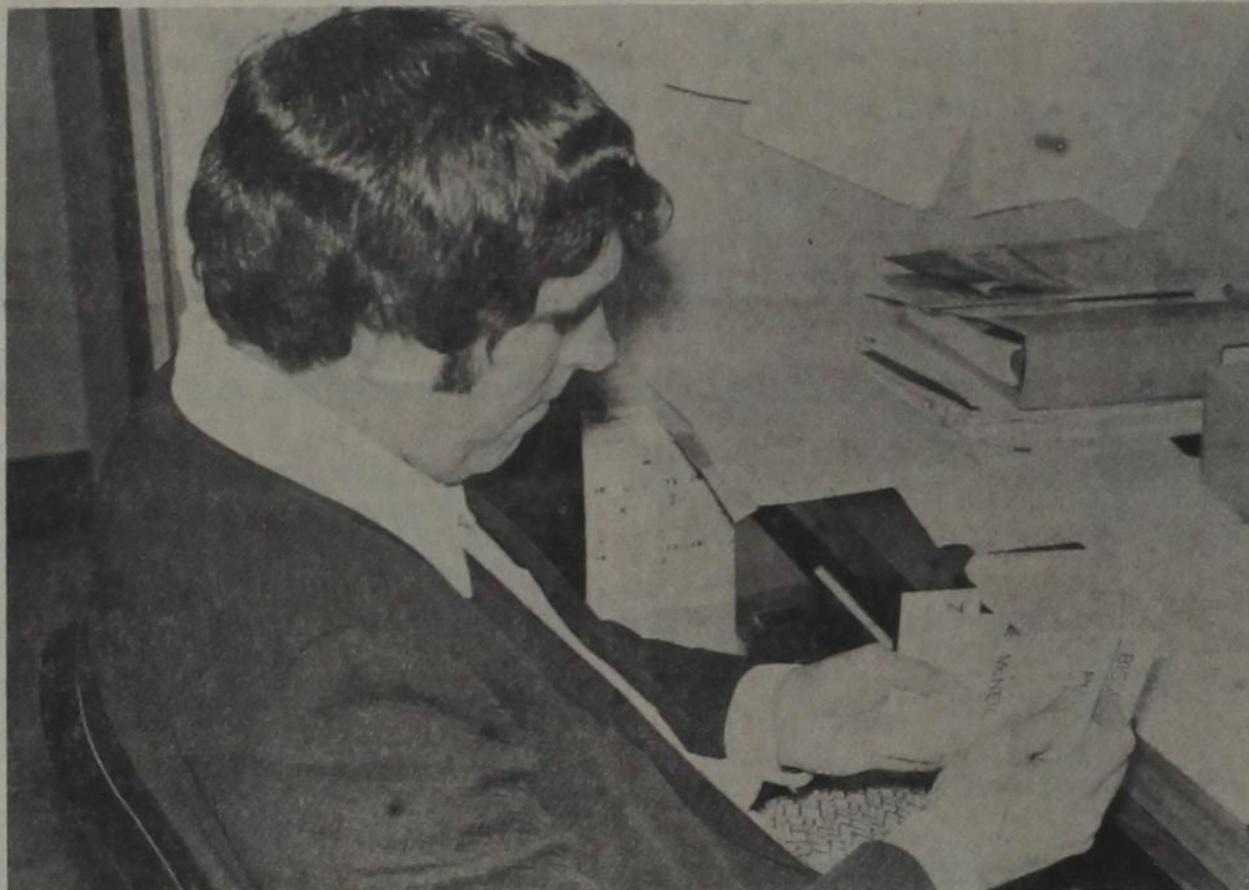

Another area Sloan is drawing support from is newly named Assistant Athletic Director John Conley. Conley, who coached under both J T King and Jim Carlen, has long been recognized as one of Texas' top recruiters. Sloan is depending heavily on this man's knowledge to help recruit in new territory.

photos by Norm Tindell

Brain Trust

During the big recruiting weekend that just passed a big meeting of the coaches was called to discuss recruiting. Here Sloan is shown meeting with members of his "brain trust", his coaching staff.

## After college, will you get the job you deserve?

Let's face it, things aren't equal in today's job market. Even with a college degree. But the Air Force has jobs that fit your college education, on an equal opportunity basis.

The Air Force is deeply involved to provide understanding for its people about the sensibilities and sensitivities of others. Doing its part to make things better. We're not perfect—yet. But brother, we are getting there.

There are many job opportunities open to you as an officer in the United States Air Force. You may consider being a pilot or navigator.

And don't overlook the Air Force ROTC Scholarship Program. Scholarships that cover full tuition, reimbursement for textbooks, lab and incidental fees. Plus an allowance of \$100 a month and flying lessons.

Apply, qualify, and enroll in Air Force ROTC at

**TEXAS TECH UNIVERSITY** by adding AER'S 116 or calling 742-2145 for More Information.
