Faculty Council to consider pass-fail proposals today

By IRA PERRY UD Reporter

Revision of Tech's pass-fail policies and discussion of faculty - student participation in the selection of a new Tech president will dominate Tuesday's meeting of the Faculty Council at 3:15 p.m. in the University Center Ballroom.

Also listed on the agenda for discussion at the meeting are council charter revisions, a charter discrepancy, a final examination recommendation and the consideration of a media-teaching aids center.

Council members will hear a report from Dr. Charles Burford and a statement from Student Association President Bob Duncan concerning six proposed revision articles to Tech's pass-fail policy.

DUNCAN WILL be the first student ever allowed to address the council. Duncan will read a written statement presenting student views on the revised articles. The Student Association is supporting all six revision articles.

Major changes in the policy will move the deadline for declaring a course to be graded on a pass-fail basis back to four weeks prior to the last day of classes.

Professors will not know which students are taking the course pass-fail under the recommendations.

Restrictions limiting the number of hours that can be taken pass-fail to five in any regular session or six hours in a summer session will be removed if the recommendations pass.

clauses restricting the number of hours satisfying general degree requirements that may be taken pass-fail to nine will be changed to allow 12 hours to be taken pass-fail under general degree requirements.

Under the proposed recommendations, each major and minor area will be allowed to designate courses that may be taken pass-fail and to designate courses that may be taken only on a pass-fail basis.

Current restrictions do not allow major or minor area courses to be taken pass-fail.

MEMBERS WILL vote on the

recommendations at the meeting, however, no changes will go into effect until next fall, according to Dr. Mary Dabney, Executive Committee chairperson.

Council members will also hear a report on the faculty - student participation process in the selection of a new Tech president.

Executive Committee members appointed a committee at their last meeting to study the situation and bring

recommendations on selection criteria and the selection process to the council.

THE COMMITTEEE'S report will be presented by Dr. Benjamin Newcomb. With the council's approval, the recommendation will be presented to the Tech Board of Regents at the Dec. 5

Faculty Council members will vote on a resolution approved by the Executive Committee in December of last year forbidding examinations other than bona fide make-up tests to be given during the last week of classes.

The feasibility of establishing a media - teaching aids center at Tech will also be discussed. The center would provide audio-tutorial teaching services, practical application of classroom subject matter, and teacher aids.

Members will also vote on several revisions to the Faculty Council charter.

Students suggest plan for president selection

By GEORGE JOHNSTON UD Reporter

A plan for student input into the selection of a new university president was developed by Student Association officials and Tech students in a Monday afternoon meeting.

In the plan, suggestions for representatives for each phase of the selection process are presented.

The selection phases included criteria for a new president, screening, selection and hiring.

THE HIRING will be left completely to the Board of Regents, under the plan. At the meeting, students suggested that the criteria should be developed by representatives from the Men's and Women's Athletic Councils, the Faculty Council, students, the administration, the Board of Regents and the Ex-Students Association.

SA President Bob Duncan said the athletic councils should be included because the councils are a major part of the university.

JULIE MARTIN, SA vice president for internal affairs, said the athletic councils should not be represented because the president will be hired to conduct the academic affairs for the university.

Duncan replied that the athletic councils spend a major amount of money each year and all bowl bids

come through the president's office.

Duncan objected to administration representation, saying the purpose of the university is to serve the students and faculty and not the administrators.

Also, Duncan said, the administration will not be interested because they will be leaving when the new president comes into office.

RUTH FOREMAN, Residence Halls Association president, said administration input is needed because administrators would know what makes a good president.

Duncan said that in reality everyone should be included in developing the

"Even the janitors," he said.

THE STUDENTS also recommended that the screening and selection phases be staffed by three student representatives and three representatives from the Faculty Council.

Martin said the Board of Regents should not be involved with the screening and selection because they would not have the time.

The screening and selection committee would choose 10 applicants according to the criteria proposed earlier, according to the plan.

The committee would then invite the

10 applicants to Lubbock for interviews.

AFTER THE interviews, the committee members would travel to the

applicants' campuses to get student and faculty comments about the applicants.

The committee would then submit five applicants to the Board of Regents for their consideration in hiring the new president.

During the meeting, the students recommended that students interested in becoming a member of the screening and selection committee be available during the summer and fall of 1976. Students also recommended that only those who have been at Tech for at least two years, and have a working knowledge of the administration's roles should be considered.

DAVID BURGESS, a pre-law major, said the final choice would be left for the regents and he hoped they would choose the new president from the recommendations of the screening and selection committee.

"I hope we don't have a situation like at UT (University of Texas at Austin)," Burgess said.

At the beginning of the meeting, Duncan said the recommendations would not be official but they are to show the Board of Regents how the students feel the selection process should be conducted.

A resolution passed by the Tech Student Senate concerning the selection process was the official statement from the SA, Duncan said. Mr. Pig

Most students would be shocked if Piggly Wiggly's Mr. Pig walked into one of their classes. Those, however, in Dick Cooke's retail advertising class simply recognized Mr. Pig's presence as a good advertising scheme. Jim Savage, advertising manager of Piggly Wiggly and Shoprite Foods, spoke to the class Monday. (Photo by Darrel Thomas)

Carrillo receives sentence

CORPUS CHRISTI, Tex. (AP) — State District Court Judge O. P. Carrillo was sentenced Monday to five years in prison, five years probation and a \$22,000 fine for his conviction on federal income tax charges.

handed down the sentence after denying a motion for a new trial for Judge Carrillo and his brother, Duval County Commissioner Ramiro Carrillo. Ramiro Carrillo was sentenced to

U.S. District Court Judge Owen Cox

Ramiro Carrillo was sentenced to four years in prison, five years probation and a \$20,000 fine.

THE TWO BROTHERS were convicted Oct. 2 in federal court here of charges of conspiring to file false income tax returns and of filing false income tax returns.

Judge Carrillo still faces an impeachment trial in the Texas Senate, where he is accused by the Texas House of charges of official misconduct. The state Judicial Qualifications Commission also is studying Judge Carrillo's conduct.

The Carrillos remained free on bond

The Carrillos remained free on bond Monday pending a decision on whether to appeal.

DURING THE trial, government prosecutors contended the Carrillo brothers conspired with Arturo Zertuche, a cousin, to set up a sham business at Benavides called Zertuche General Store. Prosecutors said the store was used to conceal what would have been illegal, conflict of interest sales to some Duval County governmental agencies.

The government argued that income reported by Zertuche as income to Zertuche General Store was, in fact, from sales made by the Farm and Ranch Supply Store, a Benavides firm owned by the Carrillo brothers.

Male birth control pill more plausible as men realize responsibility

By RICK SAIGLING UD Reporter

What if men could get pregnant?
What if men could take birth control oills?

A male birth control pill is in the experimental stages, according to Dr. Reagan Gibbs, director of student health, but has not been approved for the public market.

THE DRUG must be 100 per cent effective, 100 per cent of the time, Gibbs said, before it will be sold on the market.

The male birth control pill has been under study for several years, he said, but researchers are still looking for other methods.

"We have had a call or two requesting the male birth control pill," said Shirley Mayfield, executive director of Planned Parenthood.

MAYFIELD DOUBTS that men would take the pill if it were available.

"We have had a number of men who come in for vasectomies (surgical excision of the vas deferens to induce permanent sterility)," she said, "but that's the only type of male contraception we offer."

Coitus interruptus (purposely interrupting the ejaculation of semen into the vagina to prevent conception) is another popular method of male contraception, Gibbs said.

"Now silicone can be injected into the male to prevent sperm transportation," he said.

e said.

ABSTINENCE IS another method of

male contraception, Gibbs said, but it also causes many psychological problems such as tension and anxiety.

Family Planning of Lubbock supplies free condoms for males and birth control pills for females, but refers males to private physicians if they are interested in the experimental male birth control pill.

The original efforts to prevent pregnancy were on the male's part through use of the condom, Gibbs said.

MALES TODAY are aware that birth control is partially their responsibility, he said.

"The psychology of the male is that it's the woman's problem to prevent pregnancy, not the man's," Gibbs said. "We're certainly more conscious today of the fact that it's both the man and the woman's responsibility."

"Personally, it takes two to tangle,"
Mayfield said, "so it's both of their
responsibility."

Female birth control pills may cause abnormal blood clotting, which can be fatal, Barbara Seaman said in her book "Free and Female." Laboratory tests conducted on animals, showed that the pill may cause cancer or speed up the course of existing cancer, she said.

"I THOUGHT birth control pills were safe," said a Lubbock wife of five months.

Women were the ones wanting an oral birth control method, she said, so they should not complain about being the guinea pig.

"I'm sure that men would take the pill because they don't want to get girls may pregnant anymore than girls want to get pregnant," the woman said.

"I'd take the pill if tests show that male oral contraceptives weren't any more dangerous than the female pill," said one male Tech student.

MANY WOMEN are "too chicken" to try out the birth control pill, he said, because they think it might hurt their health somehow.

Women are taking a chance with their health by taking the birth control pill, said one Tech woman. "Certain side effects have developed

from the pill — like blood clots, weight gain and if taken continuously, are thought to make a woman unable to produce children," she said.

Most of the women were willing to try out the birth control pill because they were taking it for their own safety, said one junior woman.

Many women would rather take a chance and risk their health, rather than become pregnant, she said.
"I THINK that a few men would take

the pill, if it were available for them, because the girl's the one that's going to have to worry about getting pregnant, not the guy," she said.

"My wife is on the pill, but if she

"My wife is on the pill, but if she weren't, I'd feel it was my place to take precautions," said a Lubbock man who has been married for two years. He said he used the prophylactic before he and his wife were married.

"If there were no harmful side effects, yes, I'd take the birth control pill," said one male Tech student. He said that both the man and the woman should be responsible for birth control since they are both participating in an event that could cuase the birth of an unwanted child.

BIRTH CONTROL is the responsibility of both the male and the female.

especially if they're not married, said a 29-year-old Lubbock man.

"If people are committed to each

other, then the vasectomy is the best way of contraception," said one Tech woman.

Many men won't have vasectomies because they have a fear of being castrated, she said. "You have to work it out with each

couple, if the woman can't take the pill," said another male Tech student. He said that he would take the male birth control pill if it were on the market.

"I DON'T think I would take it since the female birth control pill causes so many side effects and blood clots," said another Lubbock man. "It's the girl's responsibility of getting pregnant. She goes to the gynecologist and knows what's best for her."

It's up to the girl to use a contraceptive method, according to one male Tech student questioned. The student said he would use the male birth control pill if it were available.

"I always ask the girl if she's on the pill and then hope that she's telling the truth," he said.

Changes in pass-fail policies recommended

RECOMMENDED CHANGES IN the passfail policy, if approved by the full Faculty Council today, will serve to increase educational opportunities.

Two improvements in particular allow students greater opportunity to experiment with courses outside their academic specialty.

Students now have to declare pass-fail at the beginning of the semester, before they have had any opportunity to evaluate their potential in a certain course. By extending the declaration deadlines, a student can see what his best efforts will bring him, and possibly discover that even though the course is outside his major field of study, efforts on his part can secure a desirable letter grade.

ANOTHER PROPOSED change will remove the 24-hour limit on courses taken pass-fail. Instead, the 24-hour limit will apply only to degree-plan courses.

Here again, the proposed change affords the student an opportunity to experiment outside his academic specialty, without fear of punishment. If a civil engineering major wants to study the American novel, he could do so, and by studying the subject pass-fail, not be concerned with damaging his grade-point.

Passage of other changes will basically demonstrate a respect for students. One change would require that professors not know the status of persons taking a course pass-fail. Accordingly, a professor would grade all students equally, without prejudice.

Another would remove the limits on hours taken pass-fail per semester. A determination on hours taken pass-fail in a semester is a determination best left to the individual student. If, through a freak of registration, a student has to register for 15 hours of courses he wanted to take pass-fail, he should be able to take the courses pass-fail.

Another recommended change is that students be allowed to take 12 hours, instead of 9, pass-fail in courses that satisfy general degree requirements. As required courses often take a student away from his academic talents, the change would better allow students to satisfy degree requirements without damaging their grade-point.

A FINAL RECOMMENDATION is that certain major or minor courses be taken passfail, and that certain courses be taken pass-fail only. Designating certain courses as pass-fail courses would require approval at the dean's level. Such a safeguard would prevent the student from not being challenged in his

In sum, the proposed changes do not harm the academic process nor would they lessen the quality of the school's academic training. Rather, the changes would serve to widen the academic benefits a student can receive at this institution, by allowing him to experiment with a wider range of educational opportunities. The six

Conflicting election reports

AS ANYONE WHO has read the ramblings of this reporter can testify, it's tough to make sense of the 1976 presidential election. Faced with a dozen candidates contesting in 30 primaries for the nominations of what are laughingly called the two major parties, plus a pack of others waiting to run as independents in the fall, most of us political reporters are reduced to incoherent mumbles about the unprecedented uncertainties and manifold mysteries of the plot that is about to unfold.

It is doubly welcome then, to find that there are some writers who can cut through the maze with admirable intellectual boldness and say with confidence that they understand what's

Two such pieces are in print this month, and they can be commended unreservedly for those who want some grist for the political mill. One is an article in the November issue of the Washington Monthly callled "The Two-Party Pork Barrel," by Walter Shapiro, an editor of that magazine. The other, appearing in the Nov. 13 issue of the Congressional Quarterly weekly report, is by staff writer Warden Moxley, and called "Post-Industrial Politics: A Guide to

IN ADDITION TO being commendably clear and concise, the Moxley and Shapiro pieces have the additional virtue of presenting absolutely opposite interpretations of the political forces shaping the 1976 election.

Moxley summarizes in four pages the views of those who believe with sociologist Daniel Bell that we have entered a "Post-Industrial Society," with a politics distinctly its own. In this view, the explosion of technology and education has produced a "new class" of political activists, rooted in the schools, the universities and the upper reaches of the governmental bureaucracy.

Opposing them are the older or lesseducated adherents of traditional values --Richard Nixon's "silent majority."

The new class lines, focusing on social issues, have split both the old parties, which have been aligned along economic divisions. The

patronized.

schisms in the old parties, along with the obiquitous force of television, have fragmented voting patterns -- leading to ticket-splitting and divided government.

WITH THE PROLIFERATION of primaries and the emphasis on volunteer workers dictated by the strict new campaign finance laws, those on both sides of this new class struggle with the most intense moral convictions about the rightness of their positions have become dominant in the presidential nomination process. The true believers of the Left and Right have replaced the consensus-seeking politicians of the middle who controlled the convention halls, with the result that each party is pulled toward the more extreme edge of its own shaky coalition.

Seeing this, and sensing the growing public rebulsion with party politics as such, an increasing number of ambitious politicians are looking at the possibility of winning the presidency without a party nomination. Not just George Wallace, but John Connally, Eugene McCarthy and such "third force" Republicans as Tom McCall of Oregon and Charles McC. Mathias of Maryland sense that the game is changing so fast that there may be an opening to the White House for them.

After presenting this analysis, Moxley does not attempt to guess precisely where it will all end. But his argument emphasizes the dissolution of the "built-in stabilizers" in American politics and strongly suggests that the 1976 presidential election is "likely to depart from form as few elections before it ever have."

SHAPIRO, ON THE other hand, says he knows what will happen in 1976 and why. He sees no departure from the status quo. The voters will elect, once again, a Republican president and a Democratic Congress, in order to assure "the tangible benefits they couldn't get if one party controlled both the White House and Capitol Hill."

Shapiro asserts that the pattern of divided government which has prevailed for 13 of the last 23 years is a rational scheme by which the voters maintain "the politics of permanent pork barrel."

As he sees it, voters expect Republicans to protect the "military pork barrel" with big defense budgets and Democrats to provide the "social pork barrel" with big domestic budgets. By dividing government between them, the voters get the supposed benefits of both.

"If the Democrats controlled both the White House and Congress," he writes, "the military pork barrel might be threatened. Conversely, if the Republicans somehow managed to obtain a congressional majority to go along with their hold on the presidency, the continuation of the social pork barrel might be jeopardized."

THUS, SHAPIRO CONCLUDES the outcome in 1976 is a certain continuity of the status quo, and Moxley argues it is unpredictable but must be notably different. Where the latter sees nothing but forces atomizing old coalitions, the former sees a monolothic popular majority assuring its economic interests by the maintenance of a particular form of divided govern-

Russian Roulette-Crosswalk Style

To the editor:

A couple of years ago at Texas Christian University, the students were faced with having to play Russian Roulette - Crosswalk Style, because the city council refused to do anything about the situation. The problem was solved when one of the regents was hit and almost killed in a crosswalk.

If we are going to make any progress in our own problems with the city about the crosswalk I suggest we use the same method that TCU used except we blindfold our regents, thereby increasing their chances of getting hit. Unfortunately, most of the regents would not be cooperative.

Seriously, we can get alumni and parents to put pressure on the regents by simply writing a letter asking the regents to protect the students and see what they can do about the situation. Chances are that we would speed up and get needed improvements in the crosswalks. The addresses of the Regents can be found in the Tech directory.

Women law students air complaints

To the editor:

THE WOMEN'S LAW Caucus recognizes that the problems enumerated below have been encountered daily by the law students at Texas Tech School of Law and that the problems should be brought to the attention of the professors in an attempt to resolve them; thus, the necessity of this letter.

The Women's Law Caucus recognizes that some of the problems encountered consist of:

1. The subject matter presented in the several calsses represents a lack of recognition of women as law students, as citizens and vital contributors to the community in that hypotheticals tend to perpetuate such myths as: men in business v. women as housewives, men as supporters v. women as dependents and incompetents, men as offenders v. women as victims, men as aggressors v. women as the seductresses, etc.

2. The subject matter presented in the textbooks also tend to perpetuate the same

3. A patronizing attitude toward women law students on the part of some professors has been recognized both by male and female law students alike.

IN LIGHT OF THESE problems, the Women's Law Caucus views the following as possible solutions:

1. To increase the awareness of both the professor and the class by presenting women in hypotheticals in business, as supporters, as agressors, as capable professionals, etc.

2. To request that professors exercise awareness in selecting texts for use that portray women in business, in non - stereotyped situations, etc. To further request that the

To the editor: After several days of reading about the big bowl bid controversy and the displeasure of a couple of kid coaches from somewhere north of Gruver, Texas, with an old man from Alabama I feel I may have a solution to the problem.

The problem is that Oklahoma and Nebraska don't feel there is a remaining bowl big enough for the loser of the Big Eight "Battle of the Titans". To solve their trauma, simply make a bowl for their loser, right here in Jones Stadium (if it's big enough for Billy it's big enough for Barry or Tom). After all, Dallas has the Cotton Bowl, Pasadena the Rose Bowl, Miami the Orange Bowl, and now Lubbock can have the

The time to create such a bowl is as ripe as the cotton in the fields around Lubbock. To begin with, Tech could serve as competition for the Big Eight loser (since they don't appear to be going anywhere else), and a nationally televised "Tournament of Dirt Parade" could be run down Broadway, using the leftover floats from the Homecoming Parade which are still scattered about the town. In addition to this, the mayor could declare it "Red Day" again to spark pep and enthusiasm from the frantic fans (which would please TTU's, OU's, or NU's athletic supporters).

Aside from the Maid of Cotton Lint Pageant, the Saddle Tramps would sponsor an apple turnover eating contest in honor of the Red Raiders, which would be followed by a S.A. sponsored beer drinking contest to be held in honor of the Tech Board of Regents. To conclude the week-long festivities and anti-climatic bowl game, a concert would be held in the plush magnificent Lubbock Municipal Coliseum, starring The Nitty Gritty Dirt Band.

Of course the OU-NU loser would have to meet the stipulation that it guarantee the Dust Bowl committee the sale of the 6,000 tickets entrusted to them before the game date of April 1. This date has been chosen not only to avoid conflicts with semester exams but also to ensure that the contest will be held during the peak of the dust season.

So till someone figures a way to keep "The Bear" out of the Sugar Bowl (or Orange, or Cotton, or etc...) I offer this simple solution to keep Tom and Barry happy, Steve busy, and students out of the bars and on the streets so that they may play tag with the cars on University

NEWS BRIEFS

Mandel named in indictment

BALTIMORE (AP) - Marvin Mandel, who succeeded Spiro T. Agnew as governor of Maryland in 1969, was named Monday in a 24-count federal indictment accusing him of engaging in a "corrupt relationship" with five other persons.

Indicted along with Mandel were three close friends and political campaign fund raisers, W. Dale Hess, Harry W. Rodgers III and Irvin Kovens, considered one of the most influential men in Maryland politics.

Others accused in the indictment were William A. Rodgers, Harry Rodgers' brother, and Ernest N. Cory Jr., a Laurel, Md., attorney.

Mandel, 55, and the others allegedly devised and executed a scheme to defraud state agencies, according to a written statement issued by Jervis S. Finney, the U.S. attorney for Maryland.

Finney's statement alleged that Mandel worked on behalf of the ownership held by the others in Marlboro Race Track and in return received "valuable secret financial interests in two Maryland enterprises" owned by the others.

Jailed teachers freed

NEW HAVEN (AP) — Ninety teachers jailed a week or more for striking illegally were freed Monday after they agreed to end their walkout.

The teachers had to agree to stop their two week strike and return to work Tuesday before Superior Court Judge George A. Saden would release them.

Schools will open Tuesday, officials said.

The teachers were jailed Monday and Tuesday of last week after they refused to obey a back to work court order. They were among 800 of the city's 1,200 teachers who

walked out Nov. 10 in a contract dispute. Schools were open for the city's 20,000 pupils during most of the strike, but schools were closed last Thursday and Friday for negotiations and Monday to work out the teachers' release and details of the return to work.

Each of the 12 negotiators will have to pay \$250 fines a day for 11 days, totaling \$2,750 per teacher. The 78 other teachers were fined \$250 a day for seven days, for a total of \$1,750 per teacher. The National Federation of Teachers will pay the teachers' and union's fines, which total \$224,500.

Chinese indicate line of thinking

TOKYO (AP) — China, indicating the line it will take when President Ford visits Peking next week, said Monday that detente in Kremlin terms means "others should hand over to the Soviet social imperialists what they demand."

Chinese officials lectured Secretary of State Henry A. Kissinger on what they see as the dangers of detente with Moscow when he visited Peking recently to prepare for Ford's trip.

The theme was hit hard Monday in a commentary by the official Hsinhua news agency, which said Soviet leaders are claiming smugly that the Soviet bloc's international position has strengthened while the U.S. position has weakened.

It added: "The more alluringly they sing the lullaby of disarmament and detente in public, the more energetically they expand arms in secret.

"When the Soviet Union was outdone by the United States in military strength, they said that peace would be ensured only with equal security for both sides. Hence, the Soviet Union is 'justified' in expanding armaments.

Fire rages in Los Angeles

LOS ANGELES (AP) — Uncontrolled brush fires raged over the city's rural northern hillsides Monday, driving hundreds from their homes and casting a choking, sooty cloud of smoke over the entire metropolitan area

Officials said at least 40 structures, including expensive homes, suffered damage or went up in flames but fire fighters said the actual scope of the damage and danger was beyond ready assessment.

There were no reports of deaths but a half a dozen firemen were reported injured. They suffered from minor burns and smoke inhalation.

Officials said the 32,000 acre holocaust posed an exceptional danger. They said high winds gusting up to 70 miles per hour, temperatures in the 80s and low humidity with similar predictions in sight for the rest of the week were hampering the battle against the fires.

"We have no estimate of when we will gain control," a fire information officer said, saying that more than 1,000 men and scores of trucks, helicopters and planes were fighting the rampaging flames. Additional fire fighters were being brought in from as far away as Idaho and other Western states.

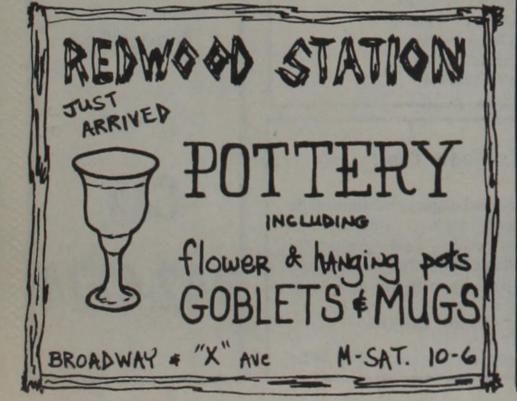

French begin canal completion

PARIS (AP) - The French government moved on Monday to start work on completion of a canal from the North Sea to the Mediterranean, a project going back to the dreams of the Roman Empire under Nero.

President Valery Giscard d'Estaing, ordering a goahead on technical studies and land acquisition, said the plan "puts the whole of industrial Europe in direct communication with the Mediterranean at a time when the countries of the Mediterranean and Persian Gulf are developing and industrializing."

The project parallels a projected 2,173 mile network of inland waterways running from the Dutch port of Rotterdam on the North Sea through the Rhine, Main and Danube rivers in Central Europe to Constanza, Romania, on the Black Sea.

About 61 miles of canals are left for completion in West Germany to finish the system to the Black Sea, and French experts say they could be finished by 1985.

Steelers blast Oilers 32-9

By MICHAEL A. LUTZ AP Sports Writer

Bradshaw's aerial artistry, could get to the ball. thunderous running by Franco Oilers Monday night.

16 passes for 168 yards, in- champions. cluding an 18 yard touchdown After Butler's field goal on 21 carries with touchdown and Don Hardeman's 22 yard T. Thomas stepped in front of runs of four and 13 yards.

Harris' first scoring run came high gear. in a 1:28 span late in the second period and all but knocked Houston out of the nationally televised game.

The victory gave the Steelers a 9-1 record and a one game lead over Cincinnati in the American Conference's Central Division. The Oilers, losing for the second time in three weeks to Pittsburgh, fell to 7-3, two games back.

FRENCHY FUQUA added a 13 yard touchdown run and Roy Gerela had a 30 yard field goal for Pittsburgh.

But it was the Steelers' defense as much as their offense, 'hat paved the way to victory. It sacked Oilers quarterback Dan Pastorini four times and limited him to 17 completions in 32 passing attempts for 172 yards.

And 59 of those yards came on one play, a toucidewn strike to Ken Burrough midway in the fourth quarter, when the game was already out of Houston's reach.

Indicative of Pittsburgh's domination was its first two points — a safety. Pittsburgh constantly forced Houston into long, third down passing situations and, in one of them, Pastorini stepped back into a "shotgun" formation, either for a pass or a quick kick.

Neither of them came. The ball was snapped past the

Gamecocks get bowl bid

The Tangerine Bowl Selection Committee picked South

ranked Redskins a 10-1 record.

Fem roundballers lose again

Tech's women's basketball team went 0-2 for the season, losing its second game of the season Friday night in San Angelo, 72-61.

The Raiders led for the opening 10 minutes according to Tech Coach Susie Lynch, but lost the lead in the final seconds of the first half due to three fast turnovers. Halftime score showed the Tech team lagging

behind, 34-29. They were never able to regain their early lead and stayed about five points behind the entire second half according to Lynch.

Despite the loss, Lynch cited the team for a "much improved offense that moved the ball better."

Jana Westerman led the team, scoring 16 points. Also in double figures was Leah Fowlkes with 11. Brenda Nasworthy led the San Angelo team with 21 points. Jill Owens led in rebounding with nine. Rhonda Askins had

Statistics show that the Raiders hit 47 per cent of their shots from the floor and 46 per cent of their free throws. The team had foul trouble, with Keller, Owens, Fowlkes, and Kim Field leaving the game in the final six minutes of play.

Next competition is Dec. 2 in Levelland against Souith Plains Jr. College.

Grapplers win season openers

The Tech Wrestling Club opened its season with a perfect 3-0 record this weekend, defeating North Texas State 29-14, Texas A&M 33-18, and Texas Christian 48-0 in a triple meet held at TCU.

Tech grapplers David Hadden, Mark Faris, and Steve Wilson all won all three of their matches. Freshmen Scott Rice and Joe Chappell, both of Amarillo, also went undefeated in three matches. Allen Atnip won two and had a draw.

"There's a lot of room for improvement," said coach Terry Anders, "but our performance was almost flawless. If injuries don't hurt us, the goal for state champions is definitely a goal that can be met."

The goal is enhanced by the fact that Tech defeated both A&M and NTSU who finished second and third in last year's finals. Richland, the defending state champion, lost to A&M earlier this year in a dual meet.

Tech's next major meet is the Richland Tournament at Richland Junior College Dec. 6 at 10 a.m. Tech will meet all of last year's finalists in the state competition.

Tech holds its own invitational meet Jan. 30-31 in the Intramural Gym. Sixteen teams from Texas, New Mexico, and Oklahoma will compete.
