Murray honored for Tech service

By BABS GREYHOSKY UD Reporter

Friday's Board of Regents meeting marked three changes in command for Tech officials.

Dr. Grover Murray, who steps down as president Aug. 31, was presented a commendation for his 10-year service to the university.

Dr. Judson Williams from El Paso moved from his vice chairman position to chairman of the regents. Williams

Civic Center

replaces Clint Formby from Hereford who served as chairman for two years. Robert Pfluger, regent from San Angelo, is the new vice chairman.

Accepting the commendation from the regents, Murray congratulated the board on its selection of Dr. Cecil Mackey as his replacement and pledged full support to Mackey in the

Mackey was in attendance for the

Friday meeting that convened first as the Board of Regents for the Tech School of Medicine.

Dr. Richard Lockwood, vice president of the Health Sciences Center, told the board the Med School was considering a request from Thomason General Hospital in El Paso to lower the amount Thomason must pay in faculty salaries.

The El Paso affiliate serves as a training ground for Tech medical students. The hospital was to pay \$400,000 in salaries to Tech faculty members teaching at Thomason, but financial difficulties have forced Thomason to request monetary assistance from the Med School.

Though no official announcement was made during the meeting, officials later said lowering Thomason's faculty salary fee seemed the only possible solution.

Dr. George Tyner, dean of the Med School, said Thursday night that a solution must be worked out or Tech will lose Thomason as part of the teaching program, and, as Tyner said, "we can't afford to lose the hospital."

In other medical business Friday, Dr. Thomas Nicholas, chairman of the Med School's family practice department, announced the development of a program to train medical students in rural medicine.

According to Nicholas, a rural clinic being developed in Shallowater would be used as the training facility.

Proposal to charge admission to the Ranching Heritage Center aroused concern in regent Bill Collins, who opposed the idea.

Dr. Charles Hardwick, vice president of academic affairs, explained that, because of high cost of special maintenance for the grounds, the RHC must charge admission or the center will be

In light of the alternatives, the board voted to charge adults \$1 and children over 6 years 50 cents. A special \$3 rate will be charged to families.

Jim Reese, associate dean of Graduate School, said the admission probably will not go into effect until September.

Hardwick also responded to questions from the board concerning upgrading the admission requirements of entering students. Under the present system, a student may be admitted into Tech regardless of his college entrance examination score.

In other areas, the board:

-Voted to name the new swimming pool the Tech Aquatic Center.

-Voted to contract for the teaching of Karate during the 1976-77 school

-Voted to approve plans, implement work and receive bids on the Tech Bookstore.

Here kitty...

Lions, tigers and other assorted creatures lined the street in front of the Lubbock Coliseum Saturday as Ringling Brothers and Barnum and Bailey Circus came to town with their Greatest Show on Earth. Betsy Hill and her husband Randy,

GOP war of nerves marks pre-convention

KANSAS CITY, Mo. (AP) — Ronald Reagan sprung another surprise Tuesday in the pre-Republican convention war of nerves his strategists hope will overcome President Ford's slender lead in tallies of delegate

The latest unexpected move from the Reagan camp was a request to allow Sen. Richard S. Schweiker of Pennsylvania to testify before the convention platform committee. Gov. Robert D. Ray, the Ford ally who heads the committee, responded immediately that the panel would be delighted to hear from Schweiker, the liberal Republican whom Reagan has tagged as his choice for a running mate.

Then, as suddenly as the request had been made, Schweiker's office informed Ray that the senator had a schedule conflict preventing his appearance. Schweiker said he would submit a written statement outlining his views.

At the same time, Ford strategists scored a preliminary victory when the party rules committee voted to require delegates to abide by state laws requiring them to support primary election winners. Reagan had opposed the rule. His strategists hoped to convince some delegates bound to Ford to abstain during early balloting. The issue will come up again before the convention rules committee where Reagan has more support.

Since the convention vanguard arrived in Kansas City on Sunday, the Reagan forces have sprung a rapid fire series of surprise moves designed to keep Ford off guard and to weaken the President's hold on party and convention machinery.

John Sears, Reagan's campaign manager, asked the party rules committee on Monday to require Ford to name his choice for vice president before the balloting begins for the presidential nomination.

Ford strategists responded that the President still might ask Reagan to be his runningmate, an offer he couldn't make until after the presidential balloting.

At the White House, Press Secretary Ron Nessen was asked about the Sears' proposal and the response from Ford strategists.

"The President's forces are operating with the intention of promoting party unity," he said.

Long before the Republicans headed for Kansas City, party elders feared the GOP platform sessions would become a battle ground for fractious ideological debates among conservatives, moderates and liberals.

Sen. Jesse Helms of North Carolina, a conservative and strong supporter of Reagan, was scheduled to appear before the platform committee Wednesday, and members of his staff

prepared planks expressing conservative stands on issues ranging from abortion and busing to detente and the Panama Canal.

Sources close to Helms said the conservatives were prepared to carry their fight to the convention floor if the platform committee refuses to go along with their views.

A spokesman for Ray said the request for time for Schweiker came from Reagan's representatives at the platform hearings.

An appearance by Schwieker and Helms on the same day would have provided the clearest evidence to date of how far the Pennsylvania senator has been willing to alter his views since being named Reagan's choice for vice president. Some conservative supporters of Reagan rebelled at the choice of Schweiker, whose voting record is one of the most liberal in the Senate.

Reagan chose Schweiker in a move he hoped would help him pick up delegate support among moderate and liberal Republicans in the Northeast. But the ploy also contained the danger of costing the former California governor backing among conservatives.

The latest Associated Press delegate survey, based on binding requirements or stated preferences, gave Ford 1,105 to 1,033 for Reagan, with 121 uncommitted. A total of 1,130 votes are needed for the nomination.

The continuing survey has shown no dramatic shifts in strength since Reagan's announcement that he would designate Schweiker as his running mate.

Meanwhile, more names surfaced of individuals under consideration for the second spot on a ticket headed by Ford.

The latest tally of individuals asked for health and financial information by Ford aides included seven senators, two governors, two cabinet members and two ambassadors. Among the names were Treasury Secretary William Simon, Sens. Robert Dole of Kansas and Charles Percy of Illinois, Lowell Weicker of Connecticut and James Buckley of New York, Gov. Christopher Bond of Missouri, and William W. Scranton, U.S. ambassador to the United Nations.

Former Texas Gov. John B. Connally has been prominently mentioned as a possible running mate for Ford. He has discussed his prospects for being on a Ford ticket with the President, but Connally has not said he has been formally asked for information.

Two senators who had been under consideration by Ford said they'd remain in the Senate. They were Edward W. Brooke of Massachusetts and Bill Brock of Tennessee. Scranton also said through a spokesman that he was not interested in the job.

Simon appeared before the platform

committee and said the Democratic party platform adopted last month in New York City "might well add another \$22 billion in annual government spending."

Simon accused the Democrats of following "discredited policies of spend-spend, elect-elect, inflation, controls, bigger and bigger govern-

By contrast, he said, Ford's fiscal and monetary policies "are moving us in the right direction and confidence in the economy at home and abroad has been restored."

The first two days of testimony before the platform committee were dominated by Ford supporters, including members of his cabinet as well as party bigwigs such as Sens. Dole and Hugh Scott of Pennsylvania.

But the pro Ford atmosphere is likely to change on Wednesday when Helms testifies. A copy of the draft planks the con-

servatives plan to offer was obtained by The Associated Press and it included the following:

-"We oppose the negotiation of any treaty with Panama which would in any degree impair or relinquish United States sovereignty and control over the Panama Canal Zone." Reagan made control of the canal a major issue in his campaign. He contended Ford was negotiating a treaty with Panama under which the United States eventually would lose control over the canal. -"It is essential that the Republican platform include a strongly worded plank critical of the illusions of detent." The proposed plank would say the United States "must not be deluded by such vague notions and concepts as detente which too easily can become facades behind which the United States, whether we wish to admit it or not, is accommodating itself to Soviet dominance in particular and to totalitarian Communist hegemony in

-"We are irrevocably opposed to busing for racial balance." The plank also would favor a constitutional amendment barring the use of busing for integration.

-On abortion, the proposed plank would say "the only way that the life of the unborn child can be protected is to amend the United States Constitution to prevent abortion on demand and to affirm the concept of right to life on the federal level."

will provide a first-rate convention center for visiting organizations and local groups, according to Civic Center Director Mickey Yerger. The \$24 million center is scheduled to be completed in mid-February. A 51,000 square foot exhibition hall capable of seating more than 5,500 Harrises

BY ANDY DAY

not granted mistrial

In a startling series of revelations at an unprecedented post-verdict inquiry, one alternate juror testified that the youngest member of the jury panel fashioned a "hangman's noose" out of cord or string.

In addition, five of the 16 jurors and alternates said they saw another man build a miniature gallows in a jury room on which he hung the Harrises in effigy.

Weinglass predicted the disclosures will ensure reversal of the Harris convictions on appeal. The Harrises were acquitted Monday on six counts of assault, but were convicted of two kidnapings, one robbery and two car thefts.

LOS ANGELES (AP) - William and Emily Harris' trial judge, ignoring sworn accusations of prejudice and perjury against a jury member, refused to grant a mistrial Tuesday and

allowed the jury's verdict to stand.

completion soon people is the main feature of the structure. Utility outlets will service as The Lubbock Memorial Civic Center many as 193 exhibition booths in the hall. The hall is equipped with a sound system, TV booth, lighting, portable staging, dressing rooms and concession stands.

The Civic Center also will include a 1,429 seat theater. The theater will be equipped for lectures, concerts or fully

staged theatrical productions. The banquet hall will be available for formal dinners and meetings. The hall

includes a 2,700 square foot kitchen and scullery and seating for 1,500 persons. Nine to 12 meeting rooms can be arranged according to placement of

sound proof partitions. Meeting rooms will accommodate from 75 to 250 per-Local organizations must use the center as well as outside interest

groups for the center to be a success, Yerger said. "The taxpayers will wonder why

they're paying for the complex if they never use it," said Yerger. Yerger said the Civic Center can

accommodate many kinds of functions. "The center is tailored more towards conventions and meetings," said Yerger. "We will seek out meetings and trade shows. But when sororities and fraternities or such organizations have functions—we want to talk to

The center will retain full concession rights. Liquor, wine and beer will be

available to groups requesting it. Yerger said rock concerts, possibly the greatest source of revenue, will be held in the exhibition hall. He said no alcholic beverages will be served during concerts.

Rental fees for the multi-functional facility have not been established. Yerger said city officials will establish rates by the end of August.

Mackey reception

New incoming Tech President, Cecil Mackey and his wife attend yet another reception to get acquainted with the Tech community. Pictured with the Mackeys is Glen Cary, president of the Ex-Students Association, who were cosponsors of the Friday afternoon event with the Board of Regents. (Photo by Darrel Thomas).

Higher education: initiative's the idea

If you've ever tried to impress an old high school classmate with this line, "I've been accepted at Texas Tech," your ego might suffer a mighty blow when you receive this response, "Big deal, so has everyone else that has ap-

And that's essentially the truth. As indiscriminate as it sounds, everyone who applies to Tech as an entering freshman is accepted.

It doesn't matter if you're rich or poor, white or any deviation thereof, you can become a Red

It also doesn't matter if you scored less than 800 on your Scholastic Aptitude Test (the usual cutoff point for Texas universities) or you

scraped through high school by the skin of your teeth.

BASICALLY, THE only requirements are that you be able to fill, out an admissions application, have your health status professionally confirmed and submit a

Editorial

high school transcript and SAT scores. At Friday's Board of Regents meeting, Dr. Charles Hardwick, vice president of academic affairs, responded to questions from the board

concerning admissions. Hardwick first outlined for the board some figures concerning entering freshmen from high

OF 4,000 students, 3,000 would have been accepted if Tech used an 800 SAT cutoff. Both the University of Texas and Texas A&M use 800.

Some of the remaining 1,000 would have been accepted because of good high school grades. The rest of the students probably would not get into Tech, said Hardwick.

This latter category of students has been

town) and get an apartment."

defined as the "marginal group."

REGENT FRED Bucy of Dallas contends that if the university can identify these marginal students, assign them a minimal class load and render them extra attention, the sincere students who are willing to work for an education will eventually be weeded out from those who do not belong in college.

I think Mr. Bucy's idea has its merits, because I'm sure some student, somewhere, has an eagerness for a college education and could really make something of himself once provided the opportunity.

But that's like saying we all could have thought of Einstein's theory of relativity if we'd been given enough time and money.

THE FACT IS, not that many education eager people with low SAT scores and a crummy high school record abound. If they were not producing for 12 years when theings weren't really that rough, what gives anybody the idea a college campus — where challenges supposedly are multifold — is going to spawn a breed of bookworms?

My attitude may sound harsh, but I think we all need to question the insistance of academicians to continue helping the borderline D-F student. When are the borderline A-B or B-C students going to cash in on some extra at-

If you stop and think about it, Steve Sloan uses more discretion when selecting a football team than the dean of admissions does when selecting a university population. I understand that Tech has a weak academic recruiting program, but I don't think this "come one, come all" attitude is the way to alleviate the situation.

HAVING A CUTOFF SAT or ACT score, whatever the figure is, also helps a prospective student estimate the calibre of people who attends an institution. Specific requirements also give students a hint as to the degree of difficulty

UNDER THE current procedure for

in attending certain colleges and universities. Cornell University has an SAT requirement of about 1400. I'm not intending to suggest Tech should adopt anything similar, but when you apply to Cornell, you know what you're getting

College is an individual's choice. Maybe some peer and parent pressures are present, but the decision to attend is ultimately the student's. If higher education is in the future plans of a person, the thought should not be treated flippantly until the registration date.

"AFTER ALL, if I bomb my SAT, Tech will always take me." That should not be the idea. Initiative should be the idea. If someone has enough initiative, or pride in himself, to prepare for higher education, the SAT will not be a barrier. High or relatively good scores will be an automatic result.

In this free country of ours, an educational opportunity definitely should be available. But let's be honest, some person's idea of an educational opportunity is getting a fair chance at an MRS. degree.

That's great, but if she couldn't score higher than a 650 or at least turn out decent high school grades, maybe what she's looking for isn't an educational opportunity, but a job with a congressman.

Steve Carter

Common coat hangers deserve careful study

Controversies have dominated the Tech campus through the summer-controversy concerning the dean of the Law School, the Med School and who is going to pay Grover Murray's salary when he retires as president.

We have diverted our energy to matters such as these while our energy should have been devoted to more scholarly interests. Many fields of scholastic endeavor have been overlooked because of controversy over matters of trivia.

One vital study that should concern us is the courtship, spawning habits and migratory patterns of the common coat hanger.

VERY LITTLE is known about the subject and a lot of what is thought to be fact is merely folklore.

It has been generally assumed, for example, that coat hangers breed in dark closets. The reason for this assumption is ob-

vious. If you remove all coat hangers in a closet except two, you will find within a few days that there are as many hangers in there as before, and probably more. This indicates that something is going on.

But a housewife in Idalou reports she left only one coat hanger in her front hall closet and went to visit her sister in Hale Center for two weeks. When she came back there were 63 If we rule out parthogenisis, reproduction without fertilization, which is almost unheard of in Idalou, where did they come from? Surely this calls for investigation.

AN INTERESTING study of this matter has been done by a professor at South Plains College, who left a wooden and a wire hanger in a closet in his guest bed room closet for one week. When he later checked, there were 57. All except the original wooden hanger were wire coathangers.

Obviously there had been no crossbreeding or the Mendelian law would have taken effect and you would have had some wire hangers, some wooden hangers and some hangers of both wire and wood, which is the way it worked with blue eyes, brown eyes and fruit flies, as everybody knows.

Unless we can learn more about the reproduction of the coathanger, the species could suffer the same fate as the carrier pigeon. The carrier pigeon was also used in large numbers by the fashion industry, and because of a lack of information about their rate of reproduction they became extinct. The same fate could befall the coat hanger. What will happen to us all then? Where will we keep our clothes, roast our marshmallows, open our car doors when we lock our keys in the car? I shudder to think of life in such a world.

NOT ONLY do we know absolutely nothing about the reproduction habits of the coat hanger, we know little about their migratory patterns.

Coat hanger migration was discovered in 1967 by a South Plains professor who took two coat hangers to his office to study their reproduction under controlled conditions. He placed them in a dark closet which he then locked. After 48 hours he unlocked the closet. Both were gone.

Is there a homing instinct in these little

devices? A grant to study the homing instincts could fund the capture and banding of coat hanger flocks. Hangers would then be in offices to see if they would return to the domestic closet from which they were captured.

MANY PEOPLE believe not. They feel that the coat hangers find the atmosphere of a residence more congenial than they do that of a place of business.

Nor do coat hangers care much for hotel rooms. Look into almost any of your closets and you will find hangers from the Antlers Hotel in Colorado Springs, the Connor in Joplin, the Bellview-Stratford in Philadelphia, the Istanbul Hilton-places you have never been. How do they get there? Nobody knows.

Unless we learn why coat hangers migrate and what process they use to do it, we will be unable to protect them from extinction.

WE MUST learn if the Alaska pipeline, the Concorde or the ozone layer will have any effect on nature's noblest of all creatures, the coat

We all have a stake in the future of the coat hanger, unless we can learn more about their reproductive and migratory instincts, the coat hanger could be extinct within our lifetimes.

Do you want your children to never experience the excitement of roasting marshmallows over an open flame?

Hurricane moves up coast

(AP) - Tropical storm Belle flooded New England with heavy rains Tuesday, as she moved north, leaving her hurricane strength behind, along with overflowing basements and roads, power failures and relieved East Coast decorator Myrna Verner to According to Norman Igo, "People who are used to residents.

Five to eight inches of rain was expected in Connecticut, already drenched by earlier downpours not connected with Belle. Six inches was predicted for Vermont. The biggest atmosphere of learning and as much as a \$1 million (as in first," said Verner. "In two or problem was the threat of floods.

"Just say that most of the major roads are closed, think grey," said Verner. "I School of Medicine). washed-out or under water," said a spokeswoman at the Vermont Civil Defense headquarters in Montpelier.

There were scattered evacuations in New England, most

of them for brief periods.

The storm had been moving up the East Coast in the Atlantic for three days with winds up to ll0 miles per hour, sending high winds and waves ashore from the Carolinas northward. Early Tuesday morning, the powerful heart of the storm went ashore for the first time, striking Long Island and bringing the New York metropolitan area its first major hurricane since Donna killed 36 persons in 1960.

 The impact of the hurricane was not so bad as expected, although it was severe enough to knock out power at one time or another for more than half a million persons and cause serious flooding in areas. After leaving New York, Belle quickly lost strength and was officially downgraded to a tropical storm as it moved through Connecticut before dawn.

AMA admits false reports

WASHINGTON (AP) - The American Medical Association (AMA) submitted false reports to the Postal Service for 4½ years, allowing it to underpay postage bills by as much as \$450,000, an AMA lawyer says.

The admission of the false reports and underpayments was made in an Aug. 13, 1975, letter to the AMA legal department from Lee M. Mitchell, an attorney for the AMA. The Associated Press obtained a copy of the letter, and campus telephone service each room and not to each

Mitchell confirmed its authenticity. The letter is among the AMA documents given to the University Center (UC) Blue Off-campus students who Postal Service by an unidentified man believed to be a former AMA employe. The Postal Service announced last month after receiving the documents that it was reopening an investigation of possible fraud by the AMA.

Mitchell's letter to the AMA legal department advised fice, according to Jim manager of the Bell business

"The AMA may be charged with having submitted false reports of JAMA (Journal of the American Medical Association), the organization's weekly magazine circulation to the Postal Service in violation of the United States Criminal Code."

Speeding car kills four

CORPUS CHRISTI, Tex. (AP) - Funeral services are planned Wednesday for four young people while police piecetogether details of an accident in which a speeding car plowed through a group of 50 to 100 youngsters, killing four and injuring a dozen others.

Officers detained a 16 year old boy in connection with the students to dial direct long case and said manslaughter charges were being considered. Two of the dead were sisters.

The accident happened around l a.m. Monday when a students were issued billing Young. large crowd of young people spilled from a Boy's Club dance in time to witness a minor collision between two cars a block away. Police say 50 to 100 of them milled around the accident scene where three persons had sustained minor injuries.

Moments later a speeding car bulldozed its way through the crowd, scattering broken bodies like bowling pins. "It was a slaughterhouse," observed off-duty deputy Wally Rodriguez. "It was horrible. It was the worst thing I've ever witnessed in 16 years as a deputy sheriff."

Rodriguez said the death car dragged three youngsters down the street, one of them 430 feet.

UT reports requested

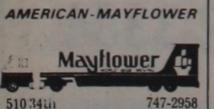

AUSTIN (AP) — Atty. Gen. John Hill ruled Tuesday that University of Texas regents must make public a report on the UT system nursing school and several other documents relating to their decision to shut it down.

All the documents were requested by the Daily Texan, the UT Austin student newspaper, which invoked the Texas Open Records Act. System administrators rejected the request. The nursing school was

dissolved on March 26, and the regents reaffirmed their decision in May. Various campuses of the UT system will operate their own nursing schools after Sept. 1. Regents said the main reason for dissolving the system school was to save \$300,000 a year in administrative costs. Some also said the school was not providing enough emphasis on patient case.

The Texas Nurses Association has filed suit to overturn the regents' decision.

> COPIES MAY BE PICKED UP IN THE STUDENT ASSOCIATION OFFICE.

If you need help finding apartment complexes or need help in your consumer

purchases this guide can really help.

SEATTLE-In this West Coast city, the future is here—and if you don't go crazy hitting your touch tone phone 36 times to pay a \$15.32 bill, it works.

This state's largest mutual savings bank has gone operational with a system-complete with talking computer—that allows customers to pay bills by phone. No checks, no signatures, no 13 cent stamps, just punch away at the phone and it's done.

"WE WENT INTO electronic banking to compete for our future livelihood," says Bruce Baker, senior vice president-marketing at Washington Mutual Savings Bank. "Commercial banks have been drawing customers from thrift institutions so we realized we had to offer a payment service as close to a checking account as we

Washington Mutual kicked off its Passcard Plus account, as it's called, in 23 of its 33 statewide branches in May and will put it in the remainder this fall. About 1,600 consumers now pay \$2 a month for the convenience of paying any of 1,600 merchants or credit card companies by phone. Fifteen bill transactions will, in postage stamp savings, cover the \$2 and the accounts also pay 514 per cent interest.

Those with dial phones at home or office simply call the bank, talk to a real live bank teller, give their secret pass-code number, tell who they want to pay and how much.

BUT THOSE WITH touch tone button phones get to leap into the world of "Logan's Run."

First, the bill payer in Seattle punches 464 4747 (7 digits). A soft female voice, the computer, says "Please enter your account number." That calls for nine more digits plus the 12th button on the touch tone phone (the #), the activator (you have now punched 17 digits). The computer repeats the number by voice, then asks for your secret pass code. That's four more digits and the # (or 22 digits total). The computer repeats it, then asks aloud for the payment code, a number for the store to be paid. That's four more digits and # or 27 numbers. There's a voice repeat, of course, and the request for the payment amount; say \$15.32 (the asterisk covers the decimal point and adds six digits running the total to 33). Sign off is 02 plus (#) (three digits, or 36 for the whole bill).

Of course, if the caller catches a mistake, he hits the asterisk, the computer cancels the entry and asks for the correct information. And if the phoner doesn't sign off (02 #) he can pay as many bills as he wants on one call.

THE BANK HAS a story about one customer who had one \$170 bill to pay, paid, but then forgot to push the 02 # signoff. The computer then asked for more bills and the customer, thinking the computer hadn't heard him the first time - or something - paid his \$170 bill again, and again, and again and again—five times in all. It took a while, but with a bit of human intervention, all was straightened out.

One of the bank's major goals is to lure new customers with Passcard Plus. "We feel that the average age of people who'll use Passcard Plus is 35. That's crucial because currently, industry statistics show that the average age of those who use thrift institutions is 55. And let's face it, the elderly are literally a vanishing breed so we need to be able to provide competitive advantages to new, younger customers," says Baker.

"Older customers seem reluctant to change their life style," he says. "They're used to dealing with paper and getting that cancelled check. The young, however, are eager to experiment. They grew up with computers and trust them." He anticipates that Passcard Plus users would keep \$1,500 in accounts "but we're discovering that the average customer keeps \$2,500 in these accounts," he

A LESS SUCCESSFUL forerunner of the pay-by-

phone service came in 1973 when Seattle-First National Bank introduced their In Touch program using touch tone phones as in-the-home computers to conduct six banking services. Sea-First lured 500 customers who paid \$6.50 a month. Only 100 merchants participated.

When the system failed a few months later, Washington Mutual and seven other thrift institutions formed a holding company and bought 51 per cent of Telephone Computing Services, designer of the In Touch program. Some of the partners, including Farmers & Mechanics Savings Bank in Minneapolis, have introduced programs already, similar to Passcard Plus.

"We determined that to be successful, we needed a base of 1,000 merchants. We now expect to have over 2500 by year end," Baker says. It costs merchants nothing to subscribe. They receive one check for all of the business transacted by the bank the previous day, plus a computer print out and tapes that can be run through the merchants' computers for automatic posting and updating.

...but not in Texas

By DEBBIE BANDY **UD** Staff

A checkless society might soon be possible for people in some states, but not in Texas.

Some states are experimenting with systems to allow bank customers to pay bills by entering codes on touch-tone phones, according to Dick Moore, senior accounts executive of Southwestern Bell.

"For now we will not see this type of system in Texas because state law prohibits branch banking, and in some cases banking by phone constitutes branch banking," said Moore.

The law states no bank can have a branch that is not physically connected to the main bank building, such as by an underground tunnel. Even drive-in banking windows must be connected to the main building, according to Reese Brubbs, assistant vice president, Plains National Bank.

"Texas is one of few states that has branch banking laws," said Grubbs. "As long as we have this law, there will be no system of paying by phone unless the individual stores pay the expense of the (computer) terminal. If the bank is not paying for the terminal, it is not considered branch banking."

Moore said Electronic Funds Transfer System

(EFTS) ultimately is what the phone companies want to have in cooperation with banks. With this system, customers could go to a merchant, buy something and have the funds transferred from their accounts to the merchant's account, without writing a check. The phone company computer would take care of all the problems of

getting the information to

the proper data base.

Phone companies and banks already cooperate on some systems. One is the National Share Data System (NSDS), which is offered to Lubbock banks, according to Grubbs. NSDS is an audio response system that allows bank officials to dial a computer through a touch-tone phone and input an account code to obtain a customer's

Another system is Transaction Phone, a communications terminal for credit and check verification at retail, banking and other business locations. The terminal (phone) collects and stores transaction information. To check a credit card, the card is inserted into the phone. The phone returns a code designating good or bad credit.

Moore said the phone in the store is called the Point of Sale terminal. A customer's check or credit can be verified at the time of the sale.

'Harry and Walter:' A team is born

By JOHNNY HOLMES UD Fine Arts Editor

Movie review

There have been some great teams over the years - the 1927 Yankees, Hope and Crosby, the 1966 Green Bay Packers, Simon and Garfunkel, Harry and Walter. Harry and Walter?

If that last famous pair seems a little not-so-familiar, substitute James Caan and Elliott Gould as an aspiring yet bumbling team of vaudevillians giving their all to show biz.

"HARRY AND WALTER like it before. GO TO NEW YORK" (now playing at the Fox) opens with the dynamic duo shuffling through their patented songand-dance routine in a small time tent show. As Walter plays an unsuspecting psychic a la the Great Carnac, the over - zealous Harry (James Caan) empties some country bumpkin's pockets, only to be embarrassingly nabbed. Walter jumps on Harry's case — all the way to the Concord Penitentiary.

But prison life is not so too much savvy. horrible for the new prisoners, safecracker, the princely joins them in the slammer. personal servants.

and endures great pain to get the safe. Walter. Walter is in love with AS EXPECTED, Michael she's in love with him.

AFTER SOME anxious who moments with a tube of stolen safecracking. Caine just looks nitroglycerine, Harry and sophisticated and moves like Walter perpetrate their own you'd expect a princely, turnversion of the Great Escape, of-the-century socialite might, and to to New York.

It all comes down to a race between Worth's notorious, luxurious forces and Harry, Walter and Lissa, as turn of the century Robin Hoods, to get to the uncrackable safe.

MY PLACE THE HAIR PLACE

off with a rather slow but sweet, sincere smile, Miss ends up is quite amusing. amusing Vaudeville routine. Keaton's enthusiasm for While not quite on a par with social reform almost rubs off. Some people might not like the Sunshine Boys, it makes But the best supporter in the this movie simply because the you wonder how these guys film is Guard O'Meara (Bert humor is quite dry at points starred in movies like "M-A-S- Remsen), who runs the prison and you've got to be on your H" and "Rollerball." Maybe it work detail and laughs at toes to catch all of it. A lot of it gets annoying because they anything and everything, is straight Vaudeville and if sing through the credits, but especially Harry and Walter. you're not fond of it, you might after you think about it, the "Harry and Walter" is more be bored, but if your sense of routine isn't so bad - than entertaining; it's pretty humor has any range at all, especially for actors like these authentic. The safecracking you'll be hooked. who've never done anything

CAAN AND GOULD make a pretty fair team, as far as that goes. They're certainly no Redford and Newman, but I would have never suspected James Caan in such a role. Caan is a crafty, enterprising performer who is determined to make it to the top, one way or the other. He comes across fairly natural, but a lot of credit must go to screenplaywriters John Bynum and Robert Kaufman, who gave the character enough but not

Caan fits his character more especially after New than does Gould, but it is England's most successful Gould who turns in the sterling performance as gullible Adam Worth (Michael Caine), straight man Walter. Gould's graphic expressions are great, Worth is Harry and Walter's and get even funnier as Caan hero. They idolize everything gets the pair into more about him and become his trouble. Gould always looks like he can't believe what's But they're not completely happening around him, but his starstruck. Harry, the wily true Vaudevillian character member of the gang, runs really blossoms during the across some plans of a sup- finale of the fateful operetta as posedly impenetrable safe, his cohorts attempt to crack

Tennis tourney slated

Playboy's 'Pigskin Preview' consistently rates Raiders 'X'

I was very proud of myself as I thumbed through the September issue of Playboy (for journalistic purposes only, I assure you). I wasn't even shocked my Miss September's foldout pose, or offended by her comment on how she hated sororities and fraternities.

Being somewhat reassured, I bravely continued my search for something shocking. I found "The Girls of

Washington" look pretty much like secretaries to me. Even sex goddess Liz Ray looked humanly similar to most of the girls in my high school gym classes.

But the next pages were just too much. Pretty dirty of Playboy to say the least.

Granted, Lubbock may not be exactly what Hugh Hefner had in mind for the swinging site of his next branch office, but Tech's extra curricular activities aren't that bad.

According to Anson Mount, in his annual "Pigskin Preview" of college football, "Tech's depleted secondary will nullify any gains of maturity in the offense," and "Tech will look much the same as last year's edition.'

Picked a mediocre fifth place in the SWC, even the sixth, seventh, eighth and ninth picks (Houston, TCU, SMU, Rice) received a little more credit than the Red Raiders.

Apparently Mount's lack of interest in Tech is nothing new. Checking the last seven years of "Pigskin Previews" in the name of unbaised reporting, I found Mount's reports on Tech to be rather consistent—about fifth in the conference and rebuilding.

One really shouldn't complain though. Compared to his 1972 comments on Tech, this year's seem almost favorable. In 1972, Mount not only cut down our football team, but also the city of Lubbock.

Mount pointed out how our 1972 "limp extra-Conference schedule will prevent Tech from harvesting the worst record in the Southwest."

He then offered Tech's head coach some advice-"Coach Jim Carlen should have stayed at West Virginia."

Finally, trying to be helpful, he pinpointed Tech's problem in 1972 to be recruiting. "Few players are eager to spend four of their years in Lubbock," according to Mount, "where dancing and card playing are considered sinful, sex education a Communist plot and the primary diversions shooting rattlesnakes and smuggling illegal booze inside the city limits."

Tech ended up harvesting second place in the SWC that season behind Texas.

Which brings us to the question, what ever did sweet innocent Lubbock do to bring the wrath of Playboy International upon us?

A knowledgeable athletic source at Tech explained it this way. In 1965, when the names Donny Anderson and Texas Tech were household words, Playboy selected Anderson for their All-America squad. Each year the selected team's picture appears with the "Pigskin Preview." It seems when Anderson was invited to Playboy headquarters to have his photo made, Tech refused to excuse Anderson from classes so he could accept the invitation. Ever since, Playboy has held a grudge. If Tech felt college was more important than Playboy, then Playboy decided everyone else in the SWC deserves more attention than Tech.

So for those of you who take stock in pre-season predictions, don't lose faith. This prognosticator would like to leave you with a few predictions I can almost guarantee

Next August when the September issue of Playboy unfolds:

-Miss September will be the fold-out

- -Girls will be girls
- -Nudes will be nude
- -Donny Anderson still won't have his picture with the "Pigskin Preview" All-Americans
- -And Anson Mount will still pick Tech a rebuilding fifth or worse in the SWC.

ARMY ROTC IT'S MORE THAN \$100

Most young men and women don't participate in Army ROTC just for the \$100 a month they earn during their last two years of college.

It probably isn't even the convenience of earning a degree and guaranteed job as an Army officer after graduation.

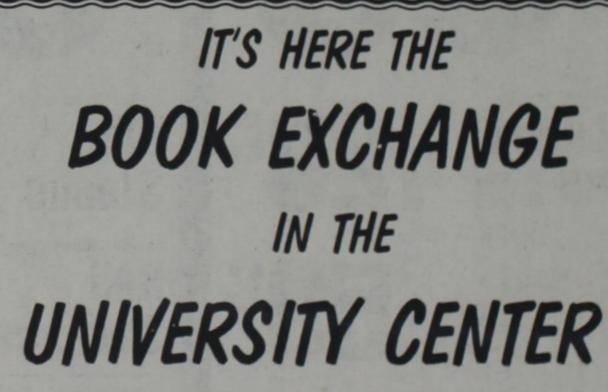

One reason is that Army ROTC develops leadership qualities that will be used later in a civilian career.

Another reason is that Army ROTC can provide up to 18 hours academic credit.

Army ROTC provides a social life and a sense of belonging. At Tech there are five extracurricular activities sponsored by the Department of Military Science.

Whatever your reason and whatever your major, Army ROTC has something to offer you! Come by the Department of Military Science, Room 10, Social Science Building or call 742-2141 or 742-2142.
