Massive quake shakes Europe

BUCHAREST, Romania (AP) — At least 600 deaths were reported Sunday in shattered Bucharest and areas of Romania and Bulgaria hit by the latest of a series of deadly earthquakes in southern Europe.

The government said Friday night's massive quake was known to have killed 580 people in Romania, including 508 in Bucharest alone, and injured 3,214.

The Communist party newspaper Scinteia said the toll was likely to be higher. Western diplomats said American medical students helping in hospitals estimated as many as 3,000 might have been killed in the disaster, which rocked Europe from Rome to Moscow Friday night.

To the south in neighboring Bulgaria, 20 were reported dead and 165 injured, most in Danube Valley towns along the Romanian border. Yugoslavia

Romania's southwestern neighbor, reported one man killed and 100 injured.

Bucharest, a city of 1.5 million, is about 120 miles south of the Friday quake's epicenter in the Transylvanian Alps and was apparently the scene of the heaviest damage.

The earthquake struck about 9:30 p.m. Friday night and its force was measured at 7.2 on the Richter scale, making it one of the strongest ever recorded in Europe.

Agerpress, the state news agency, said 2,900 apartments had been evacuated as workers continued to search debris for victims.

President Nicolae Ceausescu inspected ruins in Bucharest and, after he found that a new computer center and 16 wrecked apartment houses had been poorly built, demanded an investigation "for the guilty to be most

severely held responsible," Agerpress said.

The Romanian quake was the latest in a series of earthquakes which had already taken some 4,000 lives in southern Europe since last May.

It came less than four months after a quake killed some 3,000 people and destroyed 109 villages in eastern Turkey. The Turkish quake struck Nov. 25 in an area around the Anatolian Fault, a seismologically sensitive area where tremors had killed 8,000 in the 10 previous years.

About 1,000 people were killed and 70,000 left homeless in a series of earthquakes that struck northeastern Italy beginning May 6. By the time the quakes subsided, there had been more than 240 of them.

The Turkish and Italian earthquakes and earlier Guatemalan quakes that killed 23,000 made 1976 the most deadly quake year since 1970, when 67,000 people died. Tens of thousands more were believed to have died last year in Chinese earthquakes, but no official death toll was ever released.

Robbery deterrent

Jury incomplete following session

By TERRI CULLEN
UD Reporter

Despite an approximately six-hour session Saturday, the jury in the Robert Lee White capital murder case is still incomplete.

Ten jurors, five men and five women, have been impaneled to date in 137th District Court. Four of the ten were selected Friday.

Judge Robert C. Wright had ordered the Saturday session in hopes of having the 12 jurors seated in time to start testimony today.

Bobbie G. Patterson, a Tech Business Administration Academic counselor, was one of the jury members seated Friday.

Even though two of the jurors, including Patterson, are known personally by Criminal Dist. Atty. Alton Griffin, the two said they would not let their personal relationship with Griffin influence them during the trial.

White is indicted for the 1975 shotgun slaying of former Tech employe Warren Andrew McKay.

The bodies of McKay and his wife Odessa, 55, were found murdered on a road near New Deal.

McKay was a custodial worker until 1972 and his wife had worked in the University Bookstore.

According to the indictment, the murders were committed during the course of a robbery. For this reason, White, the second of three men to be tried for the crime, is being charged with capital murder.

As each of the four new jurors was picked, cheers were heard from the other sequestered jurors in the jury room.

Since Tuesday, 43 potential veniemen have been individually questioned by the prosecuting and defense attorneys.

Each side is allowed 15 preemptory strikes without stating a reason as they try to fill the 12 slots on the jury. The state has already dismissed two potential jurors and the defense has challenged six. Dismissals for cause are unlimited.

Individual examination of potential jurors will begin at 9 a.m. today in order to choose the final two jurors. If the remaining jurors are impaneled, testimony could still begin sometime today.

RHA election tonight

Residence Halls Association (RHA) executive elections will take place in all dorms tonight. Signs in the dorms tell residents the location and hours of the elections.

Voting will take place during each dorm's evening meal hours. Most of the voting tables will be located near the cafeteria area but residents should check signs to be certain of the exact location. Residents must have meal tickets to vote.

Candidates running in the election are president, Don Hase; vice president of men, Ron Lewis, Chuck Mundy and David Stall; vice president of women, Julianna Baumgardner and Kathy Cox; treasurer, Ray Martin and Gary Shields.

Weddington: 'ERA chances poor'

By MELISSA GRIGGS
UD Editor

The chances are poor that the national Equal Rights Amendment (ERA) will be ratified by enough states to make it part of the Constitution

before the March 1979 deadline, said Rep. Sarah Weddington in a press conference Friday.

Weddington, a long-time advocate of women's rights, was in Lubbock Friday to speak during Tech's Home

Economics Awareness Week. She also addressed the Women's Law Caucus and the Lubbock Chapter of the National Organization for Women.

Weddington said Nevada and North Carolina, which recently rejected the ERA, were states heavily counted on by ERA supporters. Weddington also said ERA chances are hurt since many state legislatures don't meet in 1978, which means this is the year they must ratify the amendment.

Eight states have not acted on the amendment. Thirty five of the necessary 38 states have ratified it.

Weddington said failure of the ERA will be a "tragedy in principle."

She said if the ERA fails, the courts will let down on women's rights rulings. "The courts are affected by public sentiment," she said. "The courts will see failure to ratify the ERA as meaning the public doesn't want equality for men and women."

But Weddington said she thinks most people support the principle of equal rights for men and women.

"Even the opposition is not in disagreement with the principle," said Weddington. "But too much time has been spent by ERA backers emphasizing working women and not enough time emphasizing women in the home. Many women feel their own personal lifestyles and the role of the homemaker has been put down by the women who support the ERA."

She said opponents have also used scare tactics.

"We are living under the ERA in Texas and none of the dire consequences opponents predicted have happened," she said.

Texas' ERA may be in trouble. There are currently two resolutions before both houses in the Texas legislature to rescind Texas' ratification of the ERA. "The strongest sentiment in the house regarding the ERA is they don't want it to come up," she said. "But if it did come to a vote, I am confident, we have the support to maintain it."

If the national ERA does fail, what is the next step for the women's movement?

"I don't think we've really faced that question yet," said Weddington. "We still keep hoping it will pull through. But if it fails, we will continue to work to improve the quality of life for men and women."

Weddington said the women's movement will be less at the national level in the future and devoted more to local issues: job equality, inequities in insurance rates and placing women in political offices.

Weddington, who argued the 1973 case before the Supreme Court which declared Texas abortion law unconstitutional, said abortion will continue to be a political issue.

"There will always be opposition to the abortion decision," she said. "But all of the polls show the majority of Americans approve of the current situation."

She said there were 13 measures in the Texas house and senate to change abortion laws but none of them got out of committee.

Weddington said she supports legislation to grant state aid to teaching hospitals. She also supports Rep. Froy Salinas' bill, which would require the Texas legislature to meet once a year.

Actions, services suggested to prevent rapes on campus

Rape is often involved in the punchlines of off-color jokes.

But it is no laughing matter when there have been two attempted rapes, one rape, six indecent exposures and two assaults (one with acid) on Tech students in the past two weeks.

WEDNESDAY NIGHT the Residence Halls Association approved a resolution presented by representatives from Gates Hall to recognize the assault problem and to get better lighting and more security for the total campus.

Copies of the resolution have been sent to President Cecil Mackey, Dr. Wade Thompson, Bill Haynes and Cliff Yoder from Housing, The University Daily, KTXT-FM and the Physical Plant, according to Ann Springer, Gates RHA representative.

Don Hase, RHA vice president of men and unopposed candidate for RHA president, said the resolution was first brought to his attention before the Wednesday meeting by the Gates representatives.

"ALL WE (RHA) can do is investigate because we have no power per se," Hase said. "But we can bring it to the attention of the administration and get it out in the open."

Hase said he does not know how long it will

take the administration to increase security measures.

Karen Gunter, Horn Hall president, said measures have been taken to increase the lighting problems on campus. Lewis Jones, dean of students, went with some campus and non-campus organizations on a walk to discover paths frequently taken and determine dark spots.

"I DOUBT it will be very long before we get lighting," Gunter said.

Jones said the walk was taken Feb. 21 and the results of the walk have been reported to Dr. Robert Ewalt, vice president for Student Affairs.

Lighting up the campus is not all of the solution to the problem. Dorm residents can take measures to insure safety.

ONE RELIGIOUS organization, Campus Advance, has offered an escort service for Tech females. A phone call to 765-7115 will bring a male and a female with identifying arm bands to walk with a student any place on campus.

Times and places can be set up in advance and the service is offered from sunset to midnight.

However, less than 10 people have used the service since its opening at the first of the semester, according to Ron Arthurs, member in charge of the escort service.

ALSO, SIGMA CHI little sisters are willing to reopen sales of cans of mace, according to Ginger Gurs, little sister in charge of sales.

Sigma Chi's have sold about 300 cans, but

still have 200 or 300 cans left, Gurs said. They cost \$4.95.

"They work really well," Gurs said, "They can stop a 300-pound man six or seven feet away. I've never had one go off in my purse."

ONE SMALL PROBLEM remains even after all the lighting is installed and all the mace cans are sold.

If people insist on doing things like keeping wing doors open in the dorms after hours, jogging around campus by themselves after dark, and taking leisurely strolls around campus to sit behind the Chemistry Building to watch stars at 2:30 a.m., nothing will help.

And at the rate campus violence is increasing, something had better help.

Watch out for number one. It's an old piece of advice but, in this case, a very good one.

Editorial

RHA: your voice

The Residence Halls Association (RHA) has been under fire recently for its handling of the cable TV issue. Many claimed the RHA was not truly representative of its constituents, the students in the dorms.

The RHA also played a vital role in getting policies changed to allow sophomores to live off campus next year. Questions are also being raised by administrators and regents about dorm visitation policies and the RHA may be called upon to provide some answers. The everpresent alcohol-in-the-dorms issue is sure to involve RHA efforts in the future. These and other issues show the RHA is more influential than some may think.

Today students living in the dorms have the opportunity to select the RHA's executive officers. It is unfortunate only one candidate is running for president, but there are interesting races for the other positions.

To the administration and the Board of Regents, RHA officers are the voices of the dorm students. By voting in today's elections, students have the opportunity to insure the voices are the ones they want speaking for them.

On Dooley, Carter, Dorms

Venomous drool

To the Editor:

In response to that bit of venomous drool appearing under the title "Bleacher Bums & Orange Alums" in Tuesday's paper:

If our sports editor is so intimidated by expensive athletic facilities and ostentatious alumni that he believes the proper response to the irritations of a female fan is that he "should have smashed her face," I suggest that we stop sending him to such places before he injures someone.

W. C. Lorenz

Good President

To the Editor:

I'd like to congratulate the American people for their wise decision in choosing Mr. Jimmy Carter as their 39th President of the United States. Mr. Carter's letter to Mr. Sakharov showed to the whole world that America deserves to be called the Leader of the Free World.

I have been studying in Tech for more than two years. I think Tech is great and the Raiders are fantastic. Like most of you, I've also come to Tech for an education, a degree and a job. But most of all, I've come to see a great nation, to see her beautiful sons and daughters, to learn and to appreciate the great American Democracy at work. I've followed closely all the way from Jimmy-Who to Jimmy-you know who I'm talking about. I thought that he'd win and he did. Yes, he has come a long way.

As a student back home in Hong Kong then, I heard so much about those 'march-for-peace, march-for-equality...'. Hence when I first arrived in the United States, I thought there would be plenty of actions to see...

True, I've seen a lot of smiling faces and friendly hands and I appreciate all the friendship that I have in Tech. Yet, there is something that makes me feel uneasy; how come Nobody is talking about Utopia any more? It seems that nobody wants to speak about the American Spirit and nobody cares to share the American Dreams. Instead, I happen to see more and more 'gay-talks' going on. Some may refer such 'gay-activities' as 'unmatched-thrill' or 'ultimate-fantasy', but I think it is a 'damn shame' even to

bring up such topic. And then Jimmy Carter came and talked about 'compassion, honesty, and love'. Yeah, that is what America needs and what the world needs. I have always regarded Mr. Carter as a man of vision, a man who dared to dream and have paid the price to make his dreams (and the millions who share his dreams) come true.

Mr. Carter wrote to Mr. Sakharov saying that 'because we are free, we can never be indifferent to the fate of freedom elsewhere...'. Right on, Mr. President! America, with all her abundant resources, unmatched technical know-how and most of all, her freedom-loving people remains and should always remain the Cornerstone of HUMAN DIGNITY AND FREEDOM!

Francis Au

Confused

Dear Editor:

I am confounded. 1) The Board of Regents is concerned about keeping the dorms full. 2) The Board of Regents is demanding dorm rules and procedures meet the demands of their life style instead of students' life style. Am I the only one confused?

David B. Chapman, Sr.

Russell Baker The old gang

(c) 1977 N.Y. Times News Service

Presidents come and Presidents go, but real power in Washington rarely changes. This is why it would be naive to anticipate Jimmy Carter's turning the ramshackle of American life back into Columbia the Gem of the Ocean. Despite the press's myopic obsession with the White House, President's still must dance to the music of the power structure encasing them. Although Mr. Carter is new, most of the power centers he must deal with are old, experienced, cunning, entrenched and intractable.

They do not yearn to be born again. They like the country the way it is. And why should they not? America works for them. It has worked successfully for them for a generation and more, through Republican White Houses and Democratic White Houses. Their aim is to keep it working for them.

What is ironic about the Carter position is that after so much ballyhoo about change, the great powers that created the society so unsatisfactory to the multitudes are returning to Washington almost intact. To be sure, there are scattered casualties. The F.B.I., in which power was built on political terror, has been stripped of its epaulets. Texas, which was one of the most formidable powers in Washington for 30 years, has lost some of its clout. In its golden age, Texas ran the Senate Foreign Relations Committee, the House of Representatives, the Senate, the Treasury and the White House. Sometimes it controlled two or three of these power centers simultaneously.

Among the rest, the old gang is back in good health. The great powers in Washington have long included the South, the suburbs, oil, munitions, big business, big labor, lawyers and the press. All are back as powerful as ever, and most of them are prepared to resist with ferocity any incursions on their power.

This being the case, what may we anticipate? Continuation of a disproportionate share of Federal goodies going to the "Sun Belt." Continuation of policies that keep cities poor and

Continuation of policies that keep cities poor and consumption at the expense of public transport. Continuation of most-favored-taxpayer treatment for the oil folks and of otherwise letting the oil people do what they say is good for us. Continuation of free-spending military-industrial boondoggles, of a discriminatory Laurel-and-Hardy tax system, of environmental pollution, of the aggrandizement of the press and of the lunatic rule by lawyers, the people who really run Washington. To cite but a few inevitabilities.

SOMEONE WILL object that this is excessively pessimistic. Perhaps so, but it is based on a judgment of how real power works in Washington. The South and the suburbs have the votes in Congress to have their way, whereas the North and the cities, always ineffectual in Congress, have continued to lose power. The Northeast is unrepresented in the Carter Cabinet, and though it has the Speaker of the House, it has little else in the way of political muscle on the Potomac.

Oil, munitions and big business are powerfully entrenched in the chief Congressional committees dealing with taxes, corporate law, environmental affairs and disposition of the taxpayer's wherewithal. Most powerful among these is the Senate Finance Committee, long notorious as an eleemosynary shelter for fat cats and virtually impregnable to White House assault.

In brief, those that had power still have power, and those that didn't still don't. If President Carter is of a mind to redress the ballots, he will need the courage of David attacking Goliath. So far, there is no suggestion that he is so recklessly disposed. His pre-Inauguration maneuvers suggested a politician with a firm grasp on the old power realities. Even the blacks, who are thought to have provided his victorious margin over Mr. Ford, got little more than leftover crust when he cut the pie.

DOONESBURY

NEWS BRIEFS

Trapped miner freed

TOWER CITY, Pa. (AP) — Ronald Adley, a feisty coal miner trapped deep inside a mountain for the longest five days of his life, squirmed to freedom Sunday and was taken to a hospital in good health.

Several hours later the bodies of two more coal miners were located, bringing to four the number killed by the underground flood that trapped Adley last Tuesday.

Five more miners remained missing. Efforts to locate them continued but no new signs of life were reported.

"Pass the jackhammer over to me," Adley commanded as his rescuers burst through the last inches of a 50-foot wall of coal and quartz that had served as his prison door.

Then the 37-year-old miner put the finishing touches on a shoulder-wide escape tunnel and wiggled his five-foot-seven frame through. He thanked his rescuers with slaps on the back and a few jokes.

Postal subsidy to increase

WASHINGTON (AP) — More of your tax money would go to subsidizing the Postal Service if industries that do business through the mail get their way.

Numerous industry groups have called for higher postal subsidies at recent hearings of the Commission on Postal Service, which is scheduled to make recommendations by March 15 on the future of the mail agency.

The appeals for taxpayer funds have reached the point that Postmaster General Benjamin Bailar is urging taxpayers to also communicate their views to the commission.

"Otherwise, we run the risk of having these postal issues - which affect all of us - being addressed only by special interest groups which have an understandable but nonetheless parochial interest in postal matters," Bailar said recently.

Health week features free examinations

Free health examinations and demonstrations will be available to anyone interested in them during Tech's Health Awareness Week Monday through Wednesday in the University Center Ballroom, according to Dr. Betty Tevis, division coordinator of health, physical education and recreation.

Examination times are 12-5 p.m. Monday, 10 a.m.-7 p.m. Tuesday and 9 a.m.-4:30 p.m. Wednesday.

The program is co-sponsored by Student Health and the Division of Health Education of the department of health, physical education and recreation.

The health examinations include blood pressure check, tuberculosis test, diabetes and anemia test, instruction on self-examination of the breasts, a hearing and vision

test, instruction on dental flossing and correct dental hygiene, blood type test and a height and weight check.

Adobe home

Lockney farmer builds adobe dream house

By RICHIE REECER
UD Staff

It's energy efficient, moldable to conform to today's more artistic trends in architecture, cheap and readily available. And it's been around the Southwest since before there was a Southwest.

What is this miraculous building material? Adobe.

And Lockney farmer Bill Sherman, who completed a new adobe home last year, is a firm believer in the stuff.

Sherman, who farms in the Lone Star community, 12 miles north of Lockney, began construction on his house in June 1975. Eight months later, in March 1976, the house was completed, and Sherman, his wife, and his five children moved into their new home.

Sherman decided to build an adobe house because he and his wife Mary had always wanted one. Sherman had no previous experience with adobe before he began construction on his own house.

"In traveling to New Mexico, we had seen a lot of adobe architecture, which made us want to build an adobe even more," Sherman said. Much more do-it-yourself construction work, especially in adobe, is done in New Mexico than in this area, Sherman said.

Some of the advantages of adobe, according to Sherman, include strong insulation qualities, readily available materials, and sculpturing possibilities.

Adobe has the capacity to store heat very efficiently

because of its great weight and density, Sherman said. An adobe house is thought to be more economical, in terms of heating and cooling costs, than a conventional house.

Soil from Sherman's land was used in making the adobe. However, the sand needed for the mixture was hauled from gravel pits in the area. The use of adobe requires more labor than do conventional materials, according to Sherman. Sherman also said the materials used are much less expensive than conventional materials.

The house was in the planning stages about three years before construction began. In November 1974 Sherman discussed construction of the house with David Smith, the eventual designer-builder of the house. Smith, a 1969 graduate of Lockney High School, graduated from Rice University in May 1975 with a degree in architecture. Smith had a particular interest in adobe.

Being able to participate in the construction had been one of Sherman's major concerns when planning the house. He wanted his family to be involved. Sherman described the construction of his house as "an experience for the kids to go through that they would remember all their lives."

"I wanted to be a part," Sherman said. "I enjoyed the work. It was a challenge." Sherman said he could save money by participating and he could oversee construction of the house as well.

Only two people who worked on the house could be described as "professional," Sherman said. The two were a carpenter, who worked on the house in the later stages of construction, and a plasterer, who applied several coats of cement plaster to the finished adobe walls. The remainder of Sherman's work crew were unskilled, in terms of house construction. Sherman did all the plumbing work in the house himself, as well as much of the electrical wiring, along with help from Smith.

The adobe blocks used in construction of the house were made by Sherman and his workers. "We made several hundred adobes, trying to come up with a block that was suitable," Sherman said. Sherman began experimenting with the adobe in April 1975. After finding the proper mixture of ingredients, Sherman began mass-producing the blocks. Sherman said 800-1,000 blocks per day were produced through parts of May and June. A total of approximately 20,000 blocks, each weighing about 30 lbs., were produced, Sherman said.

The finished house, situated in the midst of Sherman's 90-acre pecan orchard, is a one-story, 5,000 square-foot structure in the traditional Mexican-Indian adobe style. The house was constructed in an H-shape, with the five bedrooms in the north wing. The living room area, kitchen-dining area, Sherman's office, and the garage are in the south wing of the house. A balcony overlooks the living room, which has a 15-foot ceiling. One ascends to the balcony by means of a spiral staircase in the southwest corner of the living room.

Ample evidence of Sherman's fondness for exposed wood exists throughout the house. The crossbeams (vigas) which support the roof are all highline and telephone poles which have been reworked. All the ceilings in the house are exposed wood. Some ceiling areas are redwood, some oak, some pine, and some Kuring wood. The Kuring wood is imported from Malaysia, and was obtained by Sherman from a company in Lockney.

The floors in the house are brick, except for the bedrooms and the living room. Nearly all the light fixtures in the house were made in Mexico, Sherman said. Other fixtures were made by Sherman.

The front door of the house, which opens into an enclosed front courtyard, was hand-crafted in Albuquerque, N.M. One of the back doors, which opens into the rear patio, was hand-crafted in Mexico.

Sherman said he really didn't know why so few adobe houses are built in West Texas. A few old adobe houses have been built in the area, Sherman said. He said the lack of adobe construction in this area could probably be attributed to differences in tradition and culture, as compared to New Mexico. Sherman said he thought there would be an increase in adobe construction in West Texas. He said the increase would probably come as a result of concern for energy conservation. Ten or 15 people who have come to look at his house have expressed a desire to build adobe homes, Sherman said.

Regarding future plans for the house, Sherman said, "Right now, we plan to add some solar heating for the house this summer."

Memorial services scheduled

A memorial service for Dr. Doris Ann Horton, professor of health, physical education and recreation at Tech, will be conducted at 2:30 p.m. today, in St. John's United Methodist Church. Rev. Ted Dotts, pastor, will officiate.

Dr. Horton, 46, died at 9:53 a.m., Friday, in Methodist Hospital after a brief illness. She had been a member of the Tech faculty since 1967.

Members of the family have suggested that no flowers be sent and that memorials go to a scholarship fund which is being established or to the donor's favorite charity.

Funeral services will be conducted at 2 p.m. Tuesday, in the Wasson Funeral Home chapel, Siloam Springs, Ark. Burial will be in Siloam Springs.

Tech officials said Delta Psi Kappa and Major Minor Club are making plans to establish a scholarship fund in Horton's memory.

Fungi system topic of seminars

"Fungal Ultra Structures" will be the topic of the seminar sponsored by Tech's department of biology, according to Dr. Caryl E. Heintz, assistant professor of Biology. Dr. Charles Bracker, professor of Botany and Plant Pathology at Purdue University will speak to all interested students today - Friday, from 4:30 p.m. - 6 p.m. each day. The lecture will be in room 106 of the Biology Building.

Dr. Bracker is one in a series of professors sponsored by the biology department in their "distinguished visiting professor's series," Heintz said.

Anthropology lecture planned

Richard Leakey, famous anthropologist whose recent discoveries in Africa have pushed man's emergence as a recognizably human being back three million years, will speak Wednesday at 8 p.m. in the UC Theatre.

Discoveries by the Leakey family have shattered the long-standing theory that man first emerged as a recognizably human being a few hundred thousand years ago in Asia as the beetle-browed, upright form known as Homo erectus.

Leakey was born in 1944 in Nairobi, Kenya, the second son of Louis and Mary Leakey. He is a third generation Kenyan, the grandson of missionaries to that country.

Dance review

Revolving Co. trapped

By BABS GREYHOSKY UD Reporter

If Kristina Gintautiene and the Revolving Dance Company had spent more time developing their choreography and less time figuring out lighting effects, their concert Saturday night would have benefited greatly.

technique that the other dances hid. The staging was good and the facial expressions excellent throughout. But the male dancers, although talented, still need work on lighter landings on their leaps, which sounded like thunder at some points.

Leakey received his practical training from his parents and has had no formal university education. He has been digging for fossils since he was old enough to hold a shovel and leading his own expeditions since he was 20.

Although lighting, costumes and special effects are all essential parts of any theater production, whether dance or drama, these should serve only to enhance the work, not

The opening number, a series of improvisations called "Plum Fun," was one of the few dances relying on dancing alone. The "transference" improvisation stood out as the best and most cleverly-developed in the series.

Leakey's lecture will be the only one in this area during his current tour of the United States.

The final number, a duet including Gintautiene, was swift-flowing with just a bit of stagnation in the middle. On the whole, the piece was performed almost flawlessly by both dancers. This dance was a good example of how special lighting in just one carefully chosen place can greatly enhance the dance without taking over the whole show.

In general, the concert choreography, if not obliterated by the constant use of lights and films, was not unified. In a dance with six dancers, there were sometimes six different dances going on. A blend of movement is difficult to achieve when everyone is doing something different. It takes a real master to achieve that unity. Too much of this motif was attempted, and, in most cases, the different steps only conflicted with, instead of complementing, one another.

Leakey is being brought to the United States by the Foundation for Research into the Origin of Man. Dr. Ordean J. Oyen of FROM's national advisory board said Leakey is touring the United States to raise funds for his explorations.

become the spectacle. Sometimes the technical wonders of a well-equipped theater can be tempting devices that trap performers in a maze of gimmickry. A dance should first be a well-pieced flow of movement. Most important, the dance should be capable of standing alone.

Dancing is hard work, by anyone's standards. But even after a lot of hard work, the dance can sometimes come off looking sloppy. The Revolving Dance Company, although equipped with extremely talented individuals, needed to merge its talents more effectively so hard work and long practices would not have been in vain.

Leakey is being brought to the United States by the Foundation for Research into the Origin of Man. Dr. Ordean J. Oyen of FROM's national advisory board said Leakey is touring the United States to raise funds for his explorations.

Several of the numbers in this concert would have been in serious trouble if all the University Theatre had to offer was a white spot light. Good examples of this over emphasis on gimmickry would be "Wind Study," "Parad" and "Materna." "Windy Study" was made with lights and little movement, although the beginning (bodies rolling onto state) was fairly effective. Wind offers an unlimited variety of interpretations; however, not enough creativity was implemented for this piece.

"Parad" looked like an experiment with a slide presentation, and I don't think it worked. Again, the dancers were relying on a special gimmick to pull off their dance, and the result was a lot of weird color patterns and steps resembling warm-up exercises.

"Materna," another dance and film routine, left me rather perplexed at the interpretation of this theme. And I'm still trying to understand the significance behind having a nude 6-year-old on stage for 15 seconds. The nudity in this case came across as pointless, not as a symbol of innocence.

The best piece by far was "Two Holidays with Five," which was choreographed to display the good individual

MOMENT'S NOTICE

SOCIAL WELFARE
Newly organized Social Welfare will have a meeting Tuesday night at 7:30 in the UC Coronado Lounge. All interested persons and SW majors are invited to attend.

PRE-MED SOCIETY
The Pre-Med Society will meet Tuesday night at 7 p.m. in room 112 of the Chemistry building instead of March 10.

CHI EPSILON
Chi Epsilon will meet today in room 153 of the Civil and Mechanical Engineering building at 7 p.m. All members and prospects should attend.

AG EC CLUB
There will be an Agriculture Economic meeting Wednesday night at 7:30 in the Range and Wildlife Management building.

LASA
Latin American Student Association will meet Wednesday night at 7 p.m. in room 207 of the UC. All members come.

PHI GAMMA NU
Phi Gamma Nu will hold a professional meeting Tuesday night at 6:30 in room 154 of the Business Administration building.

CSO
The Christian Science Organization will be meeting Tuesday night at 8 in room 208 of the UC.

TTU ASM
Dr. Charles Bracker will present a seminar on fungal ultrastructure entitled "The Enchantment of Fungi - An Inside View" at 4:30 p.m. today in room 106 of the Biology building.

AG COMMUNICATIONS
Ag Communications Club will meet tonight at 7:30 in Ag building room 315. There will be a guest speaker.

PRE-VET
The Pre-Vet Society will meet tonight at 7:30 in room 122 of the Animal Sciences building. George Elliott will speak.

YOUNG AMERICANS FOR FREEDOM
Young Americans for Freedom will meet Monday at 8:15 p.m. at 2108 65th Street.

SADDLE TRAMPS
Saddle Tramps, spirit organization, will host their third and final open smoker at 6 p.m. Wednesday in El Centro Room in the Home Economics Building. Tech head coach Steve Sloan will be the guest speaker. Dress is formal.

Tankers fifth in SWC meet

Last week, before the Tech men's swim team left for the Southwest Conference (SWC) Championship meet, Coach Jim McNally said, "I never do get butterflies before a conference meet, but this time I do have butterflies. I think we're going to do something great."

McNally must have had a whole swarm of butterflies in that stomach. And he obviously interpreted their presence correctly.

THE TECH tankers swam their "best," setting 12 school records, clocking 35 life-time best swims and capturing fifth in the SWC.

As predicted by McNally, SMU, Texas and Houston earned the top team standings. SMU totaled 673 points to capture its 22nd conference championship title in 23 years. Texas followed with 423 points and Houston with 371.

The fourth-place standing resulted from a close finish on the 400-yard freestyle relay (the last event of the meet). Arkansas touched-out Tech's relay of Eric Muehlberger, Steve Degenfelder, Mike Butler and Bill Mason to finish only two points ahead of the Raiders. Arkansas totaled 128 points and Tech 126.

Texas A&M, TCU and Rice took the next places with 89, 68 and 33 points, respectively. **THE SWC** championship meet was the first swim meet held in the new \$8 million Olympic swim center at the University of Texas.

Forty-five national qualifying times were clocked during the meet (the most recorded at a SWC meet) and most of the winning times were the top times in the country.

Tech's Eric Muehlberger said earlier in the season he was going to qualify for the NCAA meet in both backstroke events and place

in the top three at the SWC meet. He did.

Muehlberger clocked his best times, set school records, qualified for the national meet and finished in the top three in both backstroke events. In the 100-yard backstroke, he clocked :52.87 for a third place finish and clocked 1:53.99 on the 200-yard backstroke for a second place finish. Muehlberger also clocked his best times of 1:58.52 and :47.9 in the 200-yard individual medley and the 100-yard freestyle, respectively.

Senior Chad Eckhart followed close behind Muehlberger in the 200-yard backstroke. Eckhart clocked his best time at 1:55.94 for sixth place. He took 10th in the 100-yard butterfly with his best time of :54.57.

Tech's distance swimmers cut seconds off their best times to earn points for the Raiders. Eddie Graviss clocked a best time and a school record of 16:05.7 in the 1,650-yard freestyle for eighth place. Scott Kucel captured 11th in the event with a best time of 16:14.04.

Graviss also clocked best times and set school records in the 200- and 500-yard freestyle events, clocking 1:43.86 and 4:39.67, respectively.

KUCEL CAPTURED fifth place in the 400-yard individual medley with a time of 4:10.86, hitting his best time and setting a school record.

Mike Butler took ninth in the event with a best time of 4:15.77. Butler and Barker also clocked best times in the 200-yard individual medley (1:59.34) and the 200-yard breaststroke (2:15.89), respectively.

Cody Aufricht placed 11th in both breaststroke events and 12th in the 200-yard individual medley, clocking best times

and setting school records. He clocked 1:00.11 in the 100-yard breaststroke, 2:11.2 in the 200-yard breaststroke and 1:58.11 in the 200-yard individual medley.

Jim Marvin placed 12th in the 200-yard butterfly with a best time of 1:57.28. He recorded two more life-time best swims in the 100-yard butterfly (:53.5) and the 200-yard freestyle (1:46.9).

Other Raiders clocking best times included Bill Mason in the 100-yard breaststroke (1:00.8) and 50-yard freestyle (:22.38); Greg Good in the 100-yard breaststroke (1:01.27) and 100-yard freestyle (:49.4); and Tommy Elsenbrook in the 100-yard butterfly (:54.64), 50-yard freestyle (:23.67) and 200-yard butterfly (2:00.46).

BEST TIMES were also clocked by Steve Degenfelder in the 50-yard freestyle (:22.22), 100-yard freestyle (:48.74) and 200-yard freestyle (1:49.41); Brian Lambeth in the 100-yard freestyle (:48.31) and the 200-yard freestyle (1:48.04); and Britt Hull in the 200-yard breaststroke (2:19.27) and 500-yard

freestyle (4:50.82). In diving, Hugh White captured 12th place in one-meter competition.

The Raiders took sixth place on the 800-yard freestyle relay. The relay team of Marvin, Muehlberger, Butler and Graviss clocked 7:07.51, setting a school record.

The 400-yard medley relay of Muehlberger, Aufricht, Marvin and Butler won fifth with a time of 3:34.99.

SWC records set:
 100-yard freestyle relay: SMU (Davis, Veris, Burnett, Hess) - 3:00.72
 200-yard freestyle relay: SMU (Barton, Tuero, Hess, Davis) - 3:24.75
 400-yard freestyle relay: SMU (Sharp, Veris, Davis, Hess) - 6:41.71
 500-yard freestyle: Simon Gray (Houston) - 4:28.63
 200-yard individual medley: Richard Hess (SMU) - 1:53.23
 50-yard freestyle: Kim Davis (SMU) - 20.84
 400-yard individual medley: Peter Dawson (Houston) - 3:57.71
 200-yard freestyle: Andy Veris (SMU) - 1:39.36
 100-yard butterfly: Richard Hess (SMU) - 49.32
 100-yard backstroke: Tom Barton (SMU) - 52.08
 1,650-yard freestyle: Simon Gray (Houston) - 15:27.19
 100-yard freestyle: Mike Miles (Houston) - 45.16
 200-yard backstroke: Guy Hayette (Texas) - 1:52.40
 500-yard freestyle: Bart Day (SMU) - 2:06.16
 200-yard butterfly: Bill Glasstetter (SMU) - 1:49.06

Notre Dame defeats unbeaten SFU Dons

By Associated Press

Oh, well, nobody's perfect. In college basketball, that is.

The last of the major unbeaten, top-ranked San Francisco, fell from grace Saturday via a 93-82 licking at the hands of Notre Dame's unranked but experienced streak-breakers, adding another chapter to the lengthy book of athletic legends at South Bend, Ind.

Whether the setback cost the Dons the No. 1 ranking remains to be seen since runner-up Kentucky also lost, dropping an 81-79 squeaker to 11th-ranked Tennessee that

put the Vols in line for the Southeastern Conference bid to the NCAA Tournament.

San Francisco was shooting for a perfect 30-0 regular season and had to settle for 29-1 but the champs of the West Coast A.C. already had an NCAA berth in their pocket and still have a shot at the national championship.

Notre Dame's Duck Williams, who scored 25 points, paced a second-half surge that helped the Fighting Irish build a two-point halftime edge into a 79-66 bulge before a highly vocal crowd at South Bend.

Combs looks to soccer's future

By PAM BAIRD
 UD Sportswriter

A new future for the Tech soccer club may be at hand with the help of new soccer coach Richard Combs.

Combs works as a research associate at the Tech Textile Research Center and will coach the club in his spare time.

Combs came to Lubbock from Charlotte, N.C., last July. He has been officiating soccer for the last 11 years, has coached several junior soccer league teams and has worked in soccer camps.

Tech soccer club sponsor Dr. Charles Kellogg said, "Combs was active this fall with the local soccer program. He seems to know a lot of soccer."

KELLOGG, WHO is also an associate math professor, became acquainted with Combs while they were working with the local soccer league this fall. Kellogg asked Combs if he would like to coach the soccer club and Combs accepted.

"Combs seems like a pretty knowledgeable guy," said Tech soccer club president Marc DeChellis. "In the past, our coaches have been the same age as we are and it's been hard to have a player-coach relationship. Now I think we can finally establish that kind of relationship with Combs."

In talking about the development of soccer in Lubbock as compared with Charlotte, Combs said, "I think they're (Lubbock) a little behind but they're catching up fast. As far as the men in the local soccer program, they've done an excellent job promoting soccer."

Two of Combs' main problems in dealing with the soccer club are a lack of funds and lack of a field for practices or games.

COMBS SAID none of the fields at Tech are the correct size for soccer. A soccer field should measure 120 yards in length and 70 yards in width. A football field is 120 yards long

but it is only about 33 yards in width. Combs said the width makes a difference.

Of the fields at Tech, the track field comes the closest to meeting a soccer field's measurements, but the track field is still barely 60 yards wide. Combs said the wider field makes for better and more open play.

Combs said the club also has a hard time acquiring the use of a field, especially for games, because the track field is reserved for most of the spring semester. Combs said the club must take whatever field it can get.

The soccer club is not a part of the Tech Athletic Department so it receives no financial aid from the department. Any funding the club receives comes from the intramurals department. Combs is not paid for his contribution to the club and club members are playing without the aid of scholarships.

"I coach strictly as a labor of love," Combs said. "The team members play because they like the sport of soccer and enjoy playing it."

Combs said a problem also occurs because the club members must find the time to play soccer in addition to keeping up with their studies and working part-time to support themselves. Club members can't practice five days a week like they want to, Combs said. And even though the players have the skills needed, Combs said, the lack of concentrated practice makes it difficult to develop as a team.

"WE AT Tech ought to be working for soccer to become a sport under the Athletic Department," Combs said, "It is a fairly inexpensive sport to support."

Tech Athletic Director J T King said it is the policy of the university not to finance any program unless it is considered a full Southwest Conference (SWC) program with a SWC champion being declared.

Combs said the advantage

to playing soccer is that just about anyone can play.

"You can be average size and can develop skills and abilities and be able to play soccer," Combs said, "You don't have to be tall like a basketball player or fast like a track runner. But soccer is a sport that demands a lot of skills offensively and defensively."

"I think it will take the Athletic Department four or five years to see the potential of soccer," Combs said, "It's just going to take time to come under the Athletic Department."

SOCCER IS developing at different rates in different

parts of the country. Combs said soccer is well advanced on the West Coast, in the Northeast and in the big cities. Most of the Tech players are from the Dallas-Fort Worth area.

Speculation on how far soccer can grow in the United States usually takes the form of an argument on whether soccer may someday replace football in popularity.

"I'm of an opinion that soccer will in the far future equal football in popularity but it won't replace football," Combs said, "There is a place and room enough for both sports in this country."

Tech sixth in Border Olympics

LAREDO, Tex. (AP) — Gliding with the grace of a thoroughbred, Texas freshman Johnny Jones breezed to an uncontested victory in his college quarter mile debut Saturday night at the 45th annual Border Olympics.

A crowd of about 4,000 sat in cool, breezy weather, cheering the Montreal Olympian who coasted through the tape 10 yards ahead of second-place Geary Harris of Baylor.

TEXAS A&M held a commanding lead in the university division team race with 44 points after six events.

The Aggie discus men, paced by Tim Scott's winning toss, provided A&M with 16 points in that event alone, finishing first, fourth and fifth.

Baylor hurdler David Duncan was the first university division record setter Saturday night, speeding over the cinder track at Shirley field with a 13.8 clocking in the 120 hurdlers. A&M's Shifton Baker finished second and was also timed in 13.8.

JONES AND his Texas sprint relay teammates suffered a disappointing start

at this meet when a Longhorn got leg cramps that left Jones, a member of the gold medal U.S. 400-meter relay team in Montreal, well behind the pack by the time he got the baton. Lamar University won the event, with the Longhorns dead last.

Golfers lag in Crosby

Paced by freshman Rex Robertson and senior Neil Haddock, the Raiders managed a 14th place finish in the prestigious Bing Crosby International Invitational Golf Tournament.

Robertson and Haddock shared team low score honors with four-round totals of 319. Tech's other tournament entries, Chad Williams, sophomore, and Joe Moss,

junior, tallied 321 and 322 totals respectively. The foursome combined for a team total of 1218.

The tourney, played on the San Isidro Country Club course in Guadalajara, Mexico, was won by the Oklahoma State Cowboys with a team total of 1169. OSU also had the individual champ in medalist winner Lindy Miller.

Houston overpowers Tech; but Hogs are kings of SWC

By KIRK DOOLEY
Sports Editor

HOUSTON — The 26-1 Arkansas Razorbacks proved Saturday they are without a doubt the kings of SWC basketball as they shot past the Houston Cougars (for the third time this season) to win the second annual SWC Post-Season Basketball Tournament before over 15,000 fans at The Summit.

The Cougars, fresh off a 94-83 win over Tech Friday night were given a demonstration on how to overcome Houston's (Otis Birdsong) advantage. The Razorbacks produced three Otis Birdsong's.

Ron Brewer, Marvin Delph and Sidney Moncrief made fun of percentages as they pumped from anywhere and everywhere early in the game — without a miss — to give the Hogs a 10 point lead 16-6.

The hometown Houston crowd was brought back to reality when with 13:14 remaining in the half Arkansas missed its first shot.

Behind Charles Thompson and Birdsong, Houston made a steady comeback until a

Birdsong jumper at the buzzer gave the Coogs a 38-37 halftime advantage. At this point Brewer, Delph and Moncrief together were 14-of-18 from the field.

With 13 minutes left in the game Houston still led, now by six, 51-45, and Brewer came alive for the Hogs. The 6-4 star, named Most Valuable Player in the tournament, cranked up and hit 17 points in those last 13 minutes as the Hogs outscored Houston 16-4 at one point, and taking a 71-60 lead with less than five minutes remaining, and Arkansas coasted to an 80-74 win.

Brewer hit 13-of-19 shots for 29 points, Moncrief added 22 points and Delph 16. The unsung hero for the night for Arkansas was 6-7 Jim Counce who held Birdsong to 21 points, almost 10 below his average.

"Brewer was the difference," said a dejected Birdsong after the game. "Or maybe I was the difference, I didn't do anything, I sure didn't play like an All-American tonight."

But the night before...

Tech was eliminated from the tournament Friday as Otis and team refused to let Tech control the tempo of the game. The fast-paced run-and-gun Cougar offense tore holes in Tech's game plan as the Raiders fell behind early 10-2. With 6:43 left in the half, the blistering Cougars held a 41-20 lead but the Houstonians could never throw the knockout punch.

Behind a balanced scoring attack, the Raiders gradually fought back to a 51-37 halftime deficit. The Cougars had hit 22-of-32 shots and had taken a 14-point halftime lead.

Tech sophomore guard Geoff Huston unexpectedly took control of the Tech offense in the second half as he dazzled the 12,000 fans with 17 points and some of his New York City moves.

Birdsong, who Thursday was named to the UPI first team All-American squad truly lived up to his title against Tech. They say he'll always get his 30 points but in a sparkling performance by Bird hit 15-of-26 shots and all eight free throws for 38 points, pulled down 10 rebounds (he's

a guard), made four steals and handed out seven assists. Led by this All-American performance, Houston defeated Tech 94-83.

Huston, who led the Tech rally in the second half, ended the night with 24 points and thousands of new fans. Mike Russell scored 21 points and pulled down 10 rebounds.

Gerald Myers said of the 20-9 Raiders after it was all said and done, "I've never had a team that played up to the capacity of its abilities like this one."

HOUSTON 74
Rose 1 0 0 2, Thompson 9 5 7 23, Schultz 3 0 0 6, Trammel 3 2 6 8, Birdsong 9 3 4 21, Williams 2 0 0 4, Cioffi 2 0 0 4, Winder 0 0 0 0, Roper 0 0 0 0. Totals 31 12 19.

ARKANSAS 80
Counce 1 2 2 4, Delph 7 2 3 16, Stroud 0 2 4 2, Brewer 13 3 4 29, Moncrief 6 10 13 22, Buckner 0 0 0 0, Schall 2 3 3 7, Trumbo 0 0 0 0. Totals 29 22 29.

Tech baseballers take two wins over Ags

By GARY SKREHART
UD Sportswriter

The Texas A&M baseball team mistook Sunday for a day of rest and watched the Raiders race by as Tech swept both games of a doubleheader.

The games were scheduled for Saturday originally, but were postponed due to the weather.

On Friday, the Raiders fell to the Aggies 5-3 in the first game of the three game series. On Sunday, Tech won the first game 7-6 in extra innings, then took the second

game 6-5 in 6½ innings. The Raider's record now stands at 8-9 for the year and 2-4 in conference play.

In Friday's game, Tech got off to an early lead — 3-0 by the third inning — then watched the lead evaporate into a 5-3 loss.

Doug House was tagged as the losing pitcher, leaving his season mark at 1-3.

The Raider baseballers seemed unaffected by the defeat Friday and came storming back Sunday. Johnny Vestal slammed his first home run of the year over the left field fence in the

bottom of the second inning of the first game. John Keller came in to score on the strength of Vestal's hit.

The Raiders lead 4-0 at the end of the second. Bryan Cowan had scored in the first inning when Gary Sims hit a single. Then Sims scored on a sacrifice by Scott Leimgruber.

By the seventh inning, the Aggies had put on an amazing comeback that tied the score 6-6. The Raider bats had been silenced for the past three innings.

The game was scheduled to go only seven innings, but the Aggies forced the game into extra innings.

The A&M baseballers had almost pulled off a stunning

come from behind win but the run that would have made the score 7-6 was nullified. Pinch runner Del Leasherwood failed to touch third base on his way to the would-be winning score. The missed base cost the Aggies their third out.

The score remained 6-6 until the tenth inning when Bryan Cowan hit a fly ball over second base to bring in the winning run by Raider out fielder John Keller.

In the second game of the doubleheader, the Raiders never relinquished the lead from the first to the last inning. But the Aggies gave the Tech baseballers a scare in the sixth inning.

As the sixth inning began, the Raiders held a

comfortable 6-2 lead. Then Aggie Bob Dulak scored on a single by Robert Bonner. Buddy Grobe came in on a sacrifice fly by Winston Whiddon. Kyle Hawthorne brought in a run with a triple.

The score stood 6-5. Shelton McMath came to bat for the Aggies with two outs and the fate of his team riding on his performance.

He hit a grounder that found him thrown out at first base. The Raider's Skipper Mills

was credited with the win. The freshman from Seagoville had held off the late A&M rally.

Women sixth in state

EDINBURG — After a first round loss to UT-Austin, the Tech women's basketball team rallied to finish sixth in the Texas Association for Intercollegiate Athletics for Women State Basketball tournament here Saturday.

The Raiders dropped the opener to UT, 90-72 Thursday night, then rallied Friday to take the next two games. The cagers whipped Texas A&I, 74-55 and topped Texas A&M, 69-50.

Saturday, Tech toppled Tarleton, 71-67 before losing the battle for fifth place to Houston, 75-54.

Coach Susie Lynch attributed foul problems as the major cause of the Raiders' losses. In the UT game, three players fouled out — one in the first half. In the Houston game, two Raiders sat the bench after their five whistles.

Karla Schuette led scoring for the weekend's games, totaling 87 points in the five outings. She led the Raiders with 24 against UT and with 21 against the Aggies. In addition, she netted 14 against A&I, 16 against Tarleton and 12 against the Cougars.

Behind Schuette were Cheryl Greer and Jill Owens. Greer, freshman scholarship athlete (who has been pouring it on scorewise lately), managed 79 points in the games. Jill Owens hit the basket for 76 despite fouling out in three of the five games.

Accounting for most of the remainder of the Raider points were Carol Dudensing, who made 57 points, and Phyllis Jones, who had 30.

The sixth place finish qualified the Raiders for the Regional tournament set in Louisiana later this month.
