Blood drive planned

Tau Beta Pi, the engineering honor society, will sponsor a blood drive Feb. 21, according to Jimmy Fitzgerald, president of Tau Beta Pi.

The drive will be conducted from 8 a.m. to 5 p.m. in the Engineering Student Lounge at the Engineering Center, Fitzgerald said. Though the drive is aimed primarily at the College of Engineering, anyone is welcome to donate, he said. To avoid potential overcrowding of the lounge, persons planning to donate should call Fitzgerald at 762-3173 or contact a member of Tau Beta Pi. Fitzgerald said, however, an appointment is not necessary.

If the blood drive is successful, Fitzgerald said, similar drives may be conducted every semester.

Referees plane found

WIMBERLEY, Texas (AP)—Rescue workers, struggling through the brushy Hill Country of Central Texas, reached the wreckage Tuesday of a light plane and removed the bodies of two Southwest Conference basketball referees.

Investigators from the Federal Aviation Administration were trying to determine the cause of the crash.

The plane, which carried Jerry Neely of San Marcos and Bill Horlen of San Antonio, had been missing since it took off last Friday night from the Lower Rio Grande Valley where the two men had refereed a basketball game in Edinburg.

No flight plan was filed, but Neely, the pilot, reportedly planned to fly to San Marcos, from where Horlen would drive to Waco to referee a Saturday night Southwest Conference game.

When the men failed to arrive in San Marcos early Saturday, a search was begun by the Civil Air Patrol.

Late Monday afternoon, a CAP plane spotted the wreckage of the single-engine Cessna 177 from the air and a helicopter from Fort Sam Houston in San Antonio confirmed the two men were dead inside.

Ground teams, however, were unable to reach the crash site until Tuesday morning. They had to plod through cactus-studded, craggy terrain to reach the scene about 15 miles northwest of San Marcos.

"The plane did not burn. It looks like it just nosed down into a hill," said Lt. Tom Todd of the Civil Air Patrol.

Rescuers reached the plane about 8:30 a.m. The bodies were removed at mid-morning and taken to a funeral home in San Marcos.

Horlen and Neely were among 42 referees approved to officiate Southwest Conference basketball games.

Nelly, a Jacksboro native, was an associate professor of physical education at Southwest Texas State University in San Marcos.

Horlen, the brother of former major league pitcher Joel Horlen, was a baseball coach at Jay High School in San Antonio and a counselor at Holmes High School.

Funeral arrangements for the two men were pending.

Carter okays sale of planes

WASHINGTON (AP)—President Carter, in a major policy shift, has decided to allow the sale of warplanes to Egypt for the first time, while supplying Israel with more advanced jet fighters, the State Department announced Tuesday.

An arms package headed for Capitol Hill also tickets some five dozen of the U.S. Air Force's prime fighter, the F-15, for oil-rich Saudi Arabia. Congress, which has 50 days to veto any of the items, is certain to question both the Egyptian and Saudi shipments.

Rep. Lester L. Wolff, D-N.Y., immediately announced he will introduce a resolution to veto the sale of F-15s to the Saudis.

In announcing the planned sale, Secretary of State Cyrus R. Vance said they "will not alter the basic military balance in the region." Vance said the sales would be carried out over a period of several years.

He said the U.S. commitment to Israel's security remains firm and that Carter's decision reflected Israel's needs. As for the Egyptian arms sales, he said the United States has a basic interest in responding to Egypt's "legitimate needs."

And Vance said tribute to Saudi Arabia, noting its "immense importance in promoting a course of moderation" in Middle East affairs and in petroleum policy. "We believe their request is reasonable and in our interest to fulfill," he said.

Meanwhile, a key Israeli legislator argued to U.S. congressmen that their approval of American jetfighters for Egypt would risk destabilizing the Middle East and jeopardizing peace.

Moshe Arens, chairman of the Israeli Parliament's committee on foreign affairs and defense, said the planes would give surrounding Arab countries a commanding air superiority over Israel. Arens made the remarks in a briefing to the House Armed Services Committee.

Population growth declines

WASHINGTON (AP)—The rate of the world's population growth has unexpectedly peaked and is now actually declining, according to reports from population experts Tuesday.

The decline was attributed mainly to "a sizable and generally unexpected decline in fertility in the poor countries of the world," according to Nick Eberstadt, an associate at the Harvard Center for Population Studies.

"This fertility decline is good news for the world-especially the poor world," Eberstadt told the annual meeting of the American Association for the Advancement of Science.

Eberstadt reported that the rate of world population growth had reached a peak of 1.9 percent per year "somewhere around 1970" and was down to 1.7 percent in 1977.

"The drop in fertility means that world population will stabilize sooner and at a lower level than previously expected," according to the Eberstadt report.

By the year 2000, Eberstadt said, the world's population may rise from its present 4.1 billion to between 5.5 billion and 5.8 billion. Previous United Nations population projections estimated the world's population for that year of 6.5 billion.

In another report, W. Parker Mauldin of the Population Council in New York, said the decline in the birth rate has been accelerating. The drop in birth rates between 1970 and 1977 in less developed countries was three times as great as the drop between 1950 and 1970.

However, total growth in population will continue well into the next century, with the figure reaching perhaps 10 billion before the year 2100, Mauldin told a news conference. He noted that there had been no declines in the growth rate in Bangladesh, Pakistan, Nigeria and nearly all of Africa.

WEATHER

Weather for Lubbock and vicinity will be cold, with highs in the mid 30s and lows in the upper teens. Lubbock is under a snow warning, with accumulations of up to four inches expected. A travelers warning is in effect.

Tech Court upholds RHA removal of Willier

By ILENE BENTLEY
UD Staff

The Tech Supreme Court supported the removal of Doug Willier as president of Sneed Hall in a statement which was given to Residence Hall Association members and Sneed representatives Monday night. The court also upheld RHA's removal of Willier as a member of RHA.

RHA removed Willier from office Jan. 18 because he had missed five council meetings.

Willier had abandoned his duties both as a member of the RHA and as the president of Sneed Hall, the court decision stated.

Willier is not prohibited, however, from again becoming a member of the RHA, or an officer in a residence hall, or both through an election the decision stated. Rob Shive, chief justice, said if Sneed chooses to re-elect Willier as president, his presidency will be accepted.

Shive said that the court interprets Article VII, Section three of the RHA by-laws as granting sovereignty to RHA over the dorm councils. Yet Article VII, Section three, needs to be rewritten by RHA, the opinion stated.

"Yet we (Tech court) feel that they (RHA) overstepped their authority," Shive said. "They were capricious and

arbitrary in this particular instance."

Section three of Article VII states, "Each Hall Council shall have authority in its residence hall as is delegated by its constitution and is not reserved to the RHA Council by this constitution and by-laws."

The present attendance criteria as outlined in the RHA Handbook was also found to be vague and open to conflicting interpretations, the decision stated. According to the handbook, work, study and activities pertaining to school are excused absences, if they are unavoidable.

Executive officers of the RHA were said by the decision to be capricious and, to a degree, unable to interpret their own attendance policy.

The decision states that "the Executive Committee of the RHA acted arbitrarily and unwisely in its removal of Doug Willier. That the attitude of several members of the Executive Committee on the evening of Jan. 18, 1978, was not conducive to a fair and impartial hearing was manifestly evident to the court. Consequently, the court advises the RHA to completely rewrite its attendance criteria and to institute a process of appeal to which recourse can be had in matters of Executive Committee disciplinary action."

Tech Supreme Court finds itself as not only an interpretive body but as an investigatory body as well, the decision said. Therefore, it is the duty of the court to investigate and decide upon all matters which are pertinent to the case at hand, according to the decision.

The court found itself forced to reprove publicly an d

The court found itself forced to reprove publicly and officially certain members of the RHA for their "reprehensible conduct" during the course of the proceedings of the court, the decision said.

"Their contemptuous behavior betrays a total disregard and lack of respect for the administration of justice," the decision stated.

Shive defined "contemptuous behavior" as being the members' general attitude at the trial.

"They weren't conducive to cooperate," Shive said. "They also denied that the Tech court has the authority to do more than just interpret."

On the "afterthought" of the decision, the court stated that it is absolutely necessary for the fair representation of the student body that a strong central government be recognized and supported by all of the student organizations.

"It would be ludicrous and self-defeating for any organization to compete with or deride the ratified government of this university," the decision stated. "To do so would indicate a smallness of character and a lack of political integrity that has no place in the true representation of student interests."

After the court adjourned, Tim Mills, Sneed representative, said he was unhappy with the court's interpretation of Article VII, Section three.

"We want our dorms to have some power," Mills said. Our hands are tied this way. There's been a great deal of mismanagement of RHA's part."

Mills said he would like to urge residents to open their eyes and see what is going on in RHA.

"The residents need to carefully read any amendments before they decide to pass them," Mills said.

Willier said he will run for president of Sneed Hall again in a few weeks.

"This semester has been great fun," Willier said. "I'm a good president."

Tech court members who made the decision are Shive, Hank Clements, Pat Evans, Robert Hammer, and Bill Van Fleet.

Renovation efforts draw praise from jail official

By KIM HOVDEN
UD Reporter

Cooperation between the Lubbock County Sheriff's Office and the County Commissioners Court about Lubbock City County Jail renovation efforts was praised by Guy Van Cleave, executive director of the Texas Commission of Jail Standards, in a speech here Tuesday.

Van Cleave was speaking to League of Women Voters members in conjunction with the league's 58th birthday.

"Though the jail is not in total compliance with state standards, it is certainly because the structure will not permit it. They (Commissioners and the Sheriff) have shown great initiative in getting plans underway for their new structure," Van Cleave said.

The former Colorado sheriff also lauded the hiring of a jail administrator, Gary McGrew, for the success in implementing "a complete set of operational programs in the Lubbock facility."

"You have to be fair, but firm, with the inmates and I think this has been

Part of that operational program was allowing prisoners to watch television.

"We don't think we're going to build a Hilton Inn...but where can you find as much supervision and as much discipline as with one TV set," Van Cleave said.

achieved," he said.

"Prisoners should be treated in a humane way in hopes the victims will someday be treated the same," Van Cleave continued.

The director said it was "a shame we're having to build a new jail instead of a new library or swimming pool," but felt society has an obligation "to take care of its own."

Van Cleave and his six field inspectors examined 100 county jails for a profile "to see how things were coming along" when the commission was established in June, 1976.

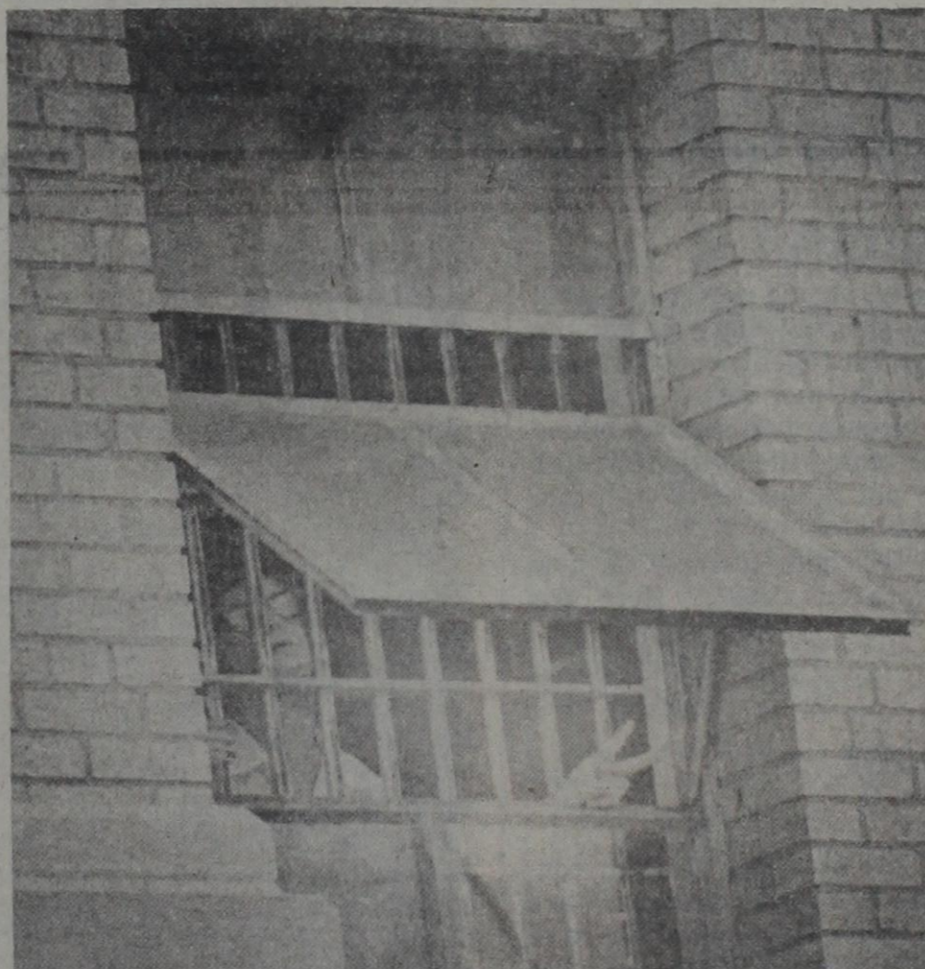

"You can't believe how deplorable some of those jails were and some have not been improved yet," the director said.

Van Cleave said he was "very disappointed" in the lack of training required to become a Texas jailer and also was surprised by the lack of provisions for emergencies such as a fire.

"I don't believe we as officials fulfill the mandate when we allow things like this to happen," the director said.

"We do have all the authority to close a jail but it will have to be the ultimate. We haven't even thought about closing one," he said.

Van Cleave hinted that better training for prospective jailers might become mandatory after the next legislative session.

Not the Hilton

Meeting disappoints farmers

WASHINGTON (AP) — Representatives of the American Agriculture movement expressed disappointment with their meeting with President Carter Tuesday and vowed to "go back home and cut production by 50 percent."

"We got no encouragement from the administration," said Bud Bitner of Colorado, one of the three spokesmen

for American Agriculture present during the 50-minute meeting. "Whatever we accomplish, we're going to have to do it on our own."

"We'll just go back home and cut production by 50 percent," he said.

"The American Agriculture movement had all of four minutes to explain our problems to the president," added Gerald McCathern of Texas.

WPS acquires office

Women's Protective Services, an organization to aid battered men and women, acquired an office location and established a mailing address during their monthly meeting Monday night.

The office will be manned by either one or two workers from the CETA (Comprehensive Employment and Training Act) program.

A volunteers' training program will be initiated Saturday by Margaret Elbow, co-chairperson. Volunteers will be instructed on topics such as the violence syndrome, active listening, legal ramifications faced by the agency and by battered women and how to act as a referral service.

The group also made plans for a committee to compose a letter to be

mailed to various organizations asking for donations. The letter will be followed by a phone call or visit from one of the WPS members.

In response to an article in The University Daily, several Tech students volunteered money and clothing, according to Susan Olbekson, co-chairperson.

She said five women called her last weekend needing assistance. "Luckily I was just a referral agency last week, everyone who needed help had a place to stay," Olbekson said.

Persons wishing to volunteer may write Women's Protective Services, 1220 Broadway, Suite 1405, Lubbock, Texas, 79401.

Democrats first

Congressional aspirants comment on issues

EDITOR'S NOTE: State Senator Kent Hance and Lubbock Minister Morris Sheats are candidates for the Democratic nomination from the 19th Congressional District. For the past 44 years, this 17-county area has sent George Mahon to Washington. With Mahon's retirement, the 1978 election is being called one of the South Plains' most important campaigns of the century. Today, the two Democrats give their views on one foreign and one domestic issue. Their Republican opponents' positions on these questions will be published Thursday.

By LARRY ELLIOTT
UD Reporter

Morris Sheats

UD: Do you support the Panama Canal treaties, and if not, what are the reasons for your opposition?

SHEATS: No, I do not support the Panama Canal treaties for these reasons:

The military reason I do not believe the treaties give us enough guarantee for canal usage in wartime.

The economic reason. There is a \$295 million loan to be made to Panama by East Coast banking establishments if the treaty passes. Our American businesses will pay for these loans through increased canal fees.

The ethical reason. The Panamanian government has changed hands 59 times since 1903. The present government leans toward a Castro-type leadership. For us to appease this type of leadership is a detriment to our position as the world's leader for free democracy.

UD: What are your specific plans to help farmers, and American agriculture in general?

SHEATS: Something must be done before I take office in January 1979 to help our farmers. After I am elected, my plans are to work for regional target prices. Right now, commodity target prices are based on 14 spots over the nation. Our West Texas farmers with their 17 inches of rain per year, cannot compete with the 30 inches of rain in many parts of the country because of increased cost of irrigation fuel.

I will work for priority discounts for fuel used in agribusiness.

I will work for a parity level based on an average cost of production plus a reasonable return through ASCS (Agricultural Stabilization and Conservation Service) office figures.

I will work for increased world commodity markets by elevating the position of USDA (United States Department of Agriculture) commodity salesmen around the world.

UD: Do you support the Panama Canal treaties, and if not, what are the reasons for your opposition?

HANCE: No, I do not support them and I think the vast majority of people in this area do not support the treaties. I have made these beliefs known to our two U.S. senators who will be voting on them. I think the objection of people in our area is that the treaties would dilute our effectiveness in maintaining control of the canal in case of war or embargo.

Some of my opponents don't realize what is involved in the political process. One of them issued a press release some time ago which I think he did to make the public think he would have an actual vote on the treaties. As a member of the House you will not have a vote on the treaties. You might have a vote on some of the transfer later on, or some of the courts that will be established, but you will not have a vote on the actual treaties.

Also, one of my opponents said he would sue the members of the Senate (for a vote on the canal question). He talked about a group of congressmen who thought it would be a neat idea to sue the Senate over that. I think some of those people did sue, and the Supreme Court said they didn't have any standing for that lawsuit.

I knew early in the game it would be a dumb House member that would sue a U.S. senator. If members of the House voted no to the appropriations for the canal, they have a right to vote the convictions of their district. I would vote against the transfer funds myself, but to file a lawsuit against the U.S. Senate is not very smart.

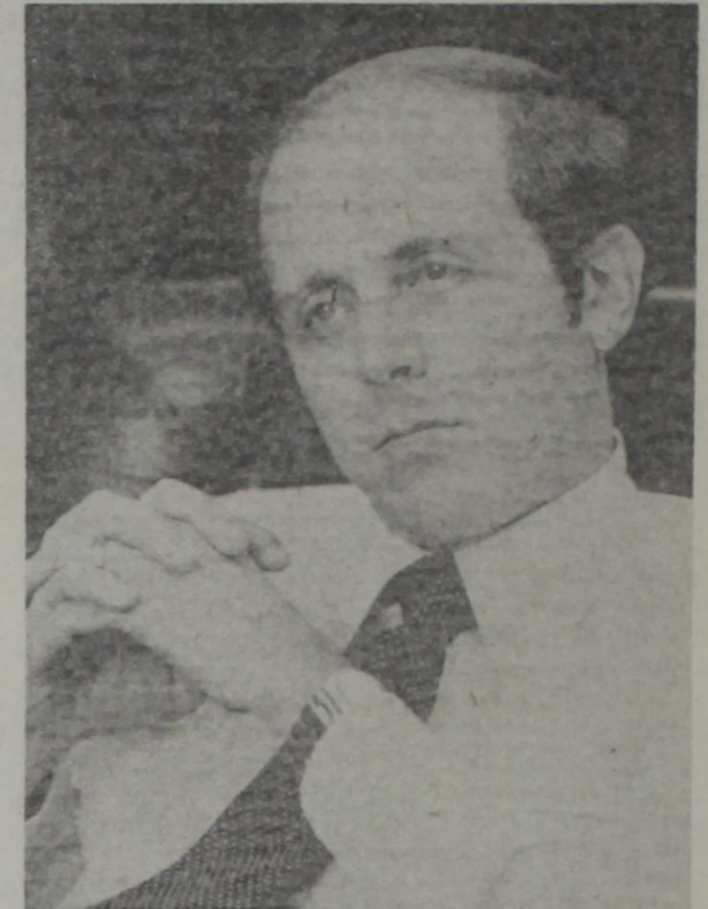

UD: What are your specific plans to help farmers, and American agriculture in general?

HANCE: The first thing I have been doing in this present situation is to make sure all the officials I have any contact with in

Washington are well aware of the plight of the American farmer, especially the farmers of the American Southwest who have been so hard hit.

Second, I would bend over backwards to get some amendments to the present farm bill in Congress passed that would up the loan and target price right now. That would have an immediate effect on the market price for agricultural products.

After election to Congress, I will work to amend the farm bill and change it so people in agriculture will have a chance at a reasonable profit.

Kent Hance

Thoughts on student rights and human rights

Enough is enough

To the Editor:

Enough of this bull about "student rights." How long are you planning to remain a student? What is really at issue here is CITIZENS' RIGHTS! After all, we are citizens from now on, and how we let OUR government treat us is going to be a sore point until the inevitable happens.

To those establishment types who would deny the impact of "student-citizens," I would remind them that Texas has no income tax, and the property taxes on real estate are not paid for higher education. Therefore, my five percent sales tax payments are just as significant as anybody else's, and the general state revenue fund into which my sales tax (and auto license tax, and other miscellaneous state-charged fees) go is no different from the fund for millionaires' taxes. SO, whose university is it? It's mine just as much as any other taxpaying, voting citizen of Texas, that's whose.

In addition, there has been a long-standing principle of separation of church and state in our democratic society, which, as I understand it, precludes the state from dictating mores and attitudes. If the university can exclude the offering of invocations at university functions because of that separation principle, then I want the freedom to choose what my social conduct on STATE property will be without the pressures of the Southern Baptist Convention or ONE of its ministers influencing the rules.

Somehow, I think the emphasis is being

misdirected. We should not be chanting "student's rights;" we should be responsibly exercising our citizen's rights, and vote for the governor who will appoint regents responsive to the university community, and vote against the politicians who have already demonstrated their "high regard" for the young, the unwealthy, and the citizens who are not mainstream good ole boys in Texas politics.

After all, if we let them trample us now, they will continue forever. "1984," Here We Come!

Larry Young

Idle screaming

To the Editor:

The screams of the students of Tech concerning "the total disregards of our rights" are becoming sickening. I am amazed that you have become so self-centered, so short-sighted, that you refuse to see past your next pitcher of beer. You refuse to see the vote of the Board of Regents as nothing more than a personal vendetta against you. The facts state otherwise.

This university (as are all state-supported schools) is governed by the Board of Regents as a trusteeship of the state. They were appointed by a freely elected government, and must take into consideration the will of the people of this state. Their vote reflected the will of the majority of taxpayers who finance the Texas educational system.

Anyone who has lived on campus has seen a result of mixing alcohol and the Tech student-vandalism. Repair of these "playful" acts of destructiveness are requiring ever increasing amounts of money. I can see nothing but vandalism. Repair of these "playful" acts of University Center ever be allowed to see alcohol. The slightest chance of the UC, library, or any campus building being vandalized is totally unacceptable to the taxpayers of this state.

If the students would be willing to pay 11 percent for their education: tuition, fees, books, housing, utilities, construction, and main-

tenance, maybe then the students can have their precious alcohol. But since the people of Texas provide for the great majority of the cost of your education, stop your whinning, get on with your education, and condescend to the will of the people, as expressed in the vote of your Board of Regents.

Sincerely,
Michael Jay Shrewsberry

Turning to human rights

To the Editor:

Sorry, folks. This one's not about the pub. It's about something more basic than just students rights. It's about human rights and the worth of the individual.

In the UD of Jan. 26, Messrs. Tongier, Wilson, and others asked the question, "What contribution have gays, illegal aliens, and liberals made to our country?" These writers apparently expect their readers to answer none. My answer is, a hell of a lot.

A liberal, according to Webster's New Collegiate Dictionary, is "one who is open-minded or not strict in the observance of orthodox, traditional or established forms or ways." But this definition, we would have to count as liberals such great American leaders as Jefferson, Jackson, and Lincoln. It was liberals in more recent years who led the civil rights movements of the '60s. Out of this group came those who pushed for an end to U.S. involvement in the Vietnam War, a conflict most Americans now agree was immoral. And it was the liberal thrust that instigated changes to make it more difficult for individuals to use government agencies to further their own careers and hinder

the careers of others.

What have illegal aliens contributed to our country? Probably not much in the sense in which the writers were speaking. After all they do not vote, nor do they participate in the free enterprise system. They are, moreover, victims of that system. Of course they come voluntarily, but most Americans are willing to exploit them for the cheap labor they provide and for consequently lower food prices. This is the contribution, for which they are repaid by no social security or unemployment benefits, no right to public education for their children, and the constant threat of deportation.

Now we come to everyone's favorite scapegoat, the gays. Such impartial researchers as Kinsey have estimated that at least 10 percent of American males are either exclusively homosexual or have engaged in at least one homosexual act. This would suggest that there are gay doctors, lawyers, teachers, and even gay construction workers, truck drivers and maintenance personnel, who lead the lifestyle they are comfortable with, without forcing it upon others not comfortable with it, and who contribute their professional services, pay taxes and otherwise work positively within the system.

Finally I would like to pose a counter question. What, besides spread hate and intolerance, have such conservatives as Barry Wood, Anita Bryant, William Buckley and Ronald Reagan done for the U.S.? It is my firm belief that the only voice which does not deserve to be heard is that which seeks to stifle the voices of others.

"It's this newspaper's business to raise constructive hell."

DOONESBURY

by Garry Trudeau

Whatever the reason, 'soft' drinks still a favorite

By KANDIS GATEWOOD
UD Reporter

Maybe it's the dust, maybe it's the Lubbock water or maybe it's Tech's desire to "be a pepper," but something causes Tech students to drink more than two million bottles of soft drinks every year.

Each student drinks an average of one-fourth a pop each day, according to figures released by the Purchasing and Contracting office.

"We drink more than the University of Texas and lots of other campuses," said John Taylor, purchasing officer. "UT sells in cans for 25 cents and they just don't sell as many as Tech. Then, too they're selling beer and other things," he said with a grin.

Taylor said 90,159 cases of soft drinks were consumed on campus in the 1976-1977 school year.

"We've got the volume for sure," he said.

Taylor attributes the high consumer rate to the prices. "We've managed to keep the price down," he said. "But the vendors claim they are not making that much money... they just give us a guarantee to keep us stocked, and the university keeps them on the ball."

Taylor has managed contracting and purchasing for about 20 years. He said he can remember when Cokes were five cents.

"Then we had to raise the price to six cents," he said. "That's when we got sales tax."

The prices started jumping to 10 cents and are now 15 cents, he said.

"Oh, students always quit buying anytime the prices change, but it doesn't last long," Taylor said. "They always see that they (drinks) cost more somewhere else."

Prices may have to be raised in September, but Taylor said he won't be sure until later in the year.

Tech makes about \$33,000 from soft drink sales each year. 43 percent of the money goes to the residence halls and 50 percent goes to the campus for intramural sports and women's sports, Taylor said. Seven percent goes for Tech Medical School.

Sometimes complaints are heard in the classrooms because the bottles are always being knocked over and spilled on the floors.

"We use the bottle-method because it would be a big mess to use the cans," Taylor said. "Heck, they spill just as much, make just as much noise and they're just as expensive."

"With as many as we sell, it would cost thousands every year to clean up the trash," Taylor said. "Cups are a big problem, too."

"Medical school tried the cup machines, but they didn't like it," he said. "And then too, the university voted down cans."

Besides being in the soft drink business, Tech sells about \$32,000 in candy, snacks and cigarettes.

"We just raised the prices of those, but the vendors are saying it barely covers the cost. "But it's a service and I imagine we'll keep with it."

Groups open campus office

The two major government-sponsored volunteer services, the Peace Corps and VISTA, have opened a joint office on the Tech campus, according to representatives Dennis McCarthy and Cliff Hores.

The office, located in room 104 of the Animal Science Building, is primarily an information office, according to McCarthy, who mans the office. However, the office also serves as a recruiting center for students interested in joining the Peace Corps or VISTA, he said.

McCarthy, a graduate student in animal science and ex-Peace Corps volunteer, stressed that the main function of the office is to answer questions students have about the Peace Corps and VISTA. The present location of the office is only temporary, McCarthy said. A permanent office in the Animal Science Building will be established soon, he said.

The office hours are 12:30 p.m. to 5 p.m. Wednesdays, McCarthy said. He plans to expand the office hours soon. The telephone number is 742-2825, extension 29.

said, though other fields are open. McCarthy said he expects soon to have a list of jobs available in the corps.

The Peace Corps and VISTA are divisions of ACTION, a federally-funded full-time volunteer program. Peace Corps and VISTA volunteers are paid a monthly living allowance, Hores said.

The Peace Corps offers a two-year program in developing countries, Hores said. The primary purpose of the corps is to develop a cultural exchange between the United States and developing nations, and to share skills and training with the people of those nations. The Peace Corps emphasizes skills training, health, education, business and agriculture, Hores said.

VISTA offers a one-year program in low-income communities in the United States, Hores said. VISTA is "social service oriented," Hores said.

Influence seminar planned

Citizens interested in being involved in national, state and local governmental actions are invited to attend a "Legislative Influence Seminar," Wednesday night (Feb. 15), 7:30 p.m., in the Tech Administration Building, room 202.

Speakers will include John Baize, Agricultural Committee staff assistant to U.S.

Representative W.R. Poage of Waco; Joe Hubenak, state representative of Rosenberg, and chairman of the House Agriculture and Livestock Committee; and Kent Hance state senator of Lubbock.

The seminar is co-sponsored by the Student Council of the College of Agricultural Sciences and the Vocational Home Economics Teacher Association of Texas, Student Section.

Rock classicists

Emerson, Lake and Palmer represent the finer things in rock music as Lubbock will have an opportunity to see Sunday at 8 p.m. in the Municipal Coliseum. The show has not sold out and tickets are still available for \$6 advance at B&B Music and Al's Music

Machine. Lubbockites are urged to get their tickets soon as they will cost \$7 the day of the show. The Lubbock show is one of five Texas stops along ELP's mammoth world tour. The group plans to release its third live album soon.

Fodor's virtuosity enthralling

By ANA MORALES
UD Entertainment Staff
Violinist Eugene Fodor enthralled his audience Monday night as he gave an impressive performance with the Lubbock Symphony Or-

chestra. Fodor's clean and precise violin style won over those in attendance as he entertained the crowd with his virtuosity.
Choosing as his program Mendelssohn's "Concerto in E

Minor for Solo Violin and Orchestra" and Paganini's "Violin Concerto in E Minor." Fodor demanded undivided attention. While awaiting his cues, Fodor stood motionless, except for a wandering pair of

eyes, as he looked over the audience. Fodor would then check his instrument and bow, and then enthusiastically begin his part.
Fodor's performance seemed effortless, as his fingers glided nimbly over his violin. During breaks in each composition, Fodor would direct slight grins at conductor William A. Harrod.

Seldom does Lubbock see an artist with the talent and professionalism of Fodor. Although he has appeared with the Symphony before, Lubbock should consider itself fortunate that an artist of such magnitude should appear here.

The performance of the Lubbock Symphony Orchestra, seemed dwarfed by Fodor. The first selection, Wagner's "Overture to Rienzi," was performed with a great deal of control. The composition was played very precisely and successfully.

The second selection, Beethoven's "Symphony No. 7 in A Major," was not as well performed. Generally a lack of variety in dynamic intensity kept the performance of the symphony from being enjoyable.

In general, the performance of Fodor made the concert a very exciting experience. Fodor is one of music's brightest performers, and his program Monday night displayed why.

Von Daniken set for UC

By BEV JONES
UD Entertainment Staff
Author Erich Von Daniken will speak Thursday at 8:15 p.m. in the University Center Theatre as the UC Programs' Science Fiction Week guest lecturer. Von Daniken will speak on his new book "Von Daniken's Proof."

500 B.C.
A native of Switzerland, Von Daniken, 42, ended his formal education after high school. In his late teens, Von Daniken came to believe that archaeology, if viewed from a new perspective, might hold the key to man's development.
Von Daniken has studied the writings of the Biblical prophets and books of Tibetan lamas, has visited Stonehenge, the Easter Islands, cave drawings in North Africa, unusual markings in Japan, Italy, Australia and many other parts of the world in search of evidence of his theories.

NASA space engineer, supported Von Daniken's theory that Ezekiel's description of "fiery chariots" in the Bible to be an unsophisticated account of an advanced type of spaceship. Some of his speculations have been verified by Dr. Karl Kuhlberg of Aachen University in Belgium, and Dr. Herman Oberth, the father of the rocket. Von Daniken believes that in the coming years new knowledge and different perception of new generations will lessen the scientific resistance to his theories.
Tickets are \$2 with Tech ID and \$3 for the general public.

Some scientists have given Von Daniken support in his findings. Josef Blumrich,

Area weather called ideal for grapes

It is difficult to prevent grapes from turning into wine...unless they are dried to produce raisins...but that certainly does not mean that wine making is an easy process.

Starting with the right quality of grapes, wine making goes through a variety of chemical processes, both natural and artificial, and a great degree of control is necessary to produce the right kind of flavor and taste.

With monies provided by the state, two universities in Texas may come up with the right combination of grapes

and chemical processes to put West Texas on the world's wine maps.

Tech department of Chemistry, in collaboration with The University of Texas, is studying methods of manufacturing wine in West Texas. The grapes are produced by The University of Texas at Van Horn and shipped to Tech for chemical processing.

Preliminary research at Tech was done by Dr. S. Roy C. Mitchell and Clinton M. McPherson, both of the Chemistry department, and Robert R. Reed of the Plant

and Soil Science department. "We started in a very small way in 1972 with few grape samples, but our research has progressed enough to indicate a strong potential in West Texas for growing grapes and producing wine," Mitchell said.

Once Mitchell and his team complete their research it will be relatively easy to transfer results to a large scale operation because Tech is using industrial scale equipment to study wine making, or enology.

"West Texas has an advantage over other areas in growing grapes as there are fewer disease problems associated with the plant here, and dust storms are not a serious threat because grapes mature after April, when the spring dust season has ended," Reed explained.

The most important thing, Reed added, is to plant the right kind of grapes. Grapes take three to five years to

mature after planting and any change in the variety would delay production.

In the chemistry laboratories grapes are crushed, the stems are removed and the pulp is treated with sulphur dioxide to prevent growth of wild yeast. After inoculation with a wine yeast the pulp is allowed to ferment for several days, and then it is squeezed to separate the grape juice from the outer skin. After fermentation is complete, the juice is bottled and aged as red wine.

White wine, Mitchell said, is produced in a similar way except that the juice is separated from the skin before the fermentation.

Mitchell speculated that some day true West Texas wine may be produced in the area with use of barrels made of mesquite wood, readily available in the area. Commercial wine production in Lubbock County now uses American oak barrels for aging wines.

MOMENT'S NOTICE

RANGE AND WILDLIFE
The Range and Wildlife Club will meet Thursday at 7:30 p.m. in room 101 of the Range and Wildlife Building. Guest speaker will be Phil Smith, range ecologist for the Southwest Region. All members and anyone interested in becoming a member may attend.

NOON DIALOGUE
Dr. Cecil Mackey will be guest speaker for "Noon Dialogue" at the Wesley Foundation, 2420 15th St. at 12:30 today. Price of the meal is 75 cents.

ASCE
The American Society of Civil Engineers will meet today in room 154 of the Civil & Mechanical Engineering Building. The time has been changed to 5:45 p.m. Guest speaker will be Mr. Langmead from Chicago Bridge & Iron. Everyone is welcome and refreshments will be served.

SIGMA TAU DELTA
Membership certificates for fall 1977 initiates are available in the English Office. The Rectangle, national literary magazine for STD, is available in room 225, the coffee room of the English Building.

LEGISLATIVE SEMINAR
A Legislative Influence seminar sponsored by Ag Council and Vocational Homemaking Teachers Association of Texas will be Wednesday at 7:30 in room 202 of the BA Building. Legislative influences in city, state, and national levels will be the topic. All interested persons are encouraged to attend.

PRE-MED SOCIETY
Pre-Med Society will meet Thursday at 7 p.m. in room 112 of the Chemistry Building.

AIEE
The American Institute of Industrial Engineers will meet today at 7:30 p.m. in room 104 of the Engineering Center. Speaker will be Pete Fost of Continental Pipeline.

SADDLE TRAMPS
Tech's service, spirit and leadership organization will hold its second open smoker Thursday at 6:30 p.m. in the El Centro Room of the Home Ec. Building. Featured speaker will be Dr. Mackey. Dress is casual.

AMA
The American Marketing Association will meet Thursday at 7:30 p.m. in room 352 of the BA Building. Speaker will be Mike Robbins, in charge of marketing development at Owens Corning Fiberglass Corporation. All majors are welcome.

BA COUNCIL

The BA Council will meet today at 6:30 p.m. in room 256 of the BA Building.

PRE-PHARMACY
Pre-Pharmacy Club will meet today at 7:30 p.m. in room 321 of the Chemistry Building.

SOCCER TEAM
The Soccer Team will practice at 4 p.m. at the Soccer Field.

SAILING CLUB
Sailing Club will meet Thursday at 5:30 p.m. in room 117 of the old Chemistry Building. There will be a discussion of the spring break trip to Houston. They will meet at Stubbs afterwards. All interested persons may attend.

KAPPA MU EPSILON
Kappa Mu Epsilon, math society will meet today at 7 p.m. in room 2 of the FLM Building.

RODEO ASSOCIATION
The Rodeo Association will meet Thursday at 4:30 p.m. in the Agricultural Auditorium. New members will be introduced and a film will be shown.

S.A. BOOK EXCHANGE
The deadline for those students who participated in the Student Association's Book Exchange to pick up books that did not sell is today at 5 p.m. The books should be picked up in the Student Association office and students must have their receipts and a valid Tech ID in order to pick them up. Those books that are not picked will become the property of the Student Association.

SPS
The Society of Physics Students will meet today at 7 p.m. in room 60 of the Science Building. Dr. Dunn of Mechanical Engineering will be speaking on the Crosbyton project. Refreshments will be served afterwards.

VHTAT AND AGGIE COUNCIL
VHTAT and Aggie Council are sponsoring a seminar on "How To Influence Your Government" in room 202 of the Business Administration Building at 7:30 p.m. today.

ALPHA EPSILON RHO
Alpha Epsilon Rho, the national honorary broadcasting society will sell computer made pictures in the UC from 9:30 a.m. until 3 p.m. Thursday and Friday. Pictures will be sold for \$2 and t-shirts with computer made pictures will cost \$6.

Credit exams offered

Credit by examination for History 231 and 232 will be given March 11 at 8:30 a.m. in room 104 of Holden Hall.

Applications may be picked up in room 131 of Holden Hall and should be filled out and returned by Friday.

Lecture to focus on architecture trends

"New Trends in Architecture" will be the lecture topic of Jack McGinty, immediate past president of the American Institute of Architects, who will speak at 8 p.m. today in the Chemistry Lecture Hall.

Rice University in 1957 and attended Princeton after practicing architecture in Austin for two years.

The lecture will end with a slide show on the Honor Award Houses selected by the AIA.

Lone Star presents the No Place But Texas Quiz.

Ok, Texas, this is your opportunity to become a member of the prestigious Lone Star Long Neck Club, absolutely free. Just send in ten correct answers, along with your name and address to the Lone Star Brewing Co., c/o Lone Star Long Neck Club, San Antonio, Texas 78297. (To find the correct answers, place a Lone Star to your mouth, this exam in your hand, then turn both upside down.)

- If you like deep-fried rattlesnake, what "no place but Texas" event should you attend?
- Where was country music great Lefty Frizzell born?
- Texas is the home of the only species of Xenarthra found in the U.S. What is the more common name for this species?
- What is Texas' smallest state park?
- What is the most commonly used letter in Texas cattle brands?
- Where are the world's two largest "beer cans"?
- What is the record, set in Luling, for the

longest watermelon seed spit?
8. What Texas city receives more sunshine than any other city in the U.S.?
9. When and where was the first Texas oil well drilled?
10. There's an unusual statue in front of the Somerville County courthouse in Glen Rose. What is it a statue of?

- The annual Rattlesnake Round-Up, Sweetwater, Texas.
- Coricana, Texas.
- The armadillo.
- Acton State Park. It's only 12 feet by 7.42 feet.
- 10-1/2 inches.
- regular cans of beer.
- "can" holds 1,650,000 San Antonio, Texas. Each
- Lone Star Brewing Company.
- The letter "S."
- 21 feet.
- A dinosaur.

RED RAIDERS and the great taste of Lone Star Beer.
No place but Texas.

Raider women bomb Angelo, 81-46

By LISA BURGHER
UD Sports Staff

If Tuesday night's game is any indication of what the west zone basketball tournament is going to be like, Tech's women basketballers will not have much trouble. The Raiders defeated zone foe Angelo State 81-46 in the Coliseum and boosted their record to an impressive 28-5.

The zone tournament is next weekend in Abilene, and, aside from Wayland Baptist College, Tech should be the strongest team there.

The Raiders started strong against ASU, as they shot 58 percent from the floor the first half. Tech opened up a 55-21

halftime margin, and the game was not much of a contest. However, the Raiders did let up when the second half started. Angelo State scored six points and held the Raiders scoreless the first four minutes. Tech scored only 26 points the second half compared with 55 in the first half.

Tech's D'Lynn Brown topped the scoring with 21 points, and Jill Owens netted 10 points. Mary Eudy scored 15 points to lead ASU scorers.

The Raiders host the Houston Cougars today at 5 p.m. in the Coliseum. The Raiders should have the edge over Houston; Tech has beat the Coogs three times this year, most recently last weekend in the Houston Invitational tournament.

Tech wrestlers floored

The Tech wrestlers experienced setbacks on two different occasions at the hands of Southwest Texas State University and Texas A&M during action this weekend.

Southwest Texas State handed the Tech wrestlers their first setback by tying the Raiders 19-19. In view of the fact that Tech won six of the nine matches, the tie was extremely disappointing for Coach David Hadden. Tech's individual winners were: Les

Davis at 126, Brad Gammons at 134, Brian Hendon at 142, Rick Alder at 167, Jay Lewis at 177 and Scott Rice at 190.

On Saturday, the Raiders traveled to College Station and wrestled the Aggies before the basketball contest between the two schools. Texas A&M defeated the Tech wrestlers 36-13. The Raiders who emerged victorious were: Mike Fester at 150, Jay Lewis at 167 and Scott Rice at 190. Rock Robinson and his opponent battle to a 6-6 draw.

Williams' injury prompts action

By CHUCK McDONALD
UD Assoc. Sports Editor

Starting forward Kent Williams will be sidelined probably for the rest of the season by an injury suffered in the A&M game last Saturday. Gerald Myers, head basketball coach has filed an official complaint with the SWC office.

According to trainer Mark Gilbert, Williams' jaw has been wired shut and will remain closed for six weeks. "There's a bar on the top and bottom of Kent's mouth with four wire loops on each side," said Gilbert.

"We've made a formal complaint with the SWC office because we felt

strongly there should be some kind of action taken to greatly discourage this from happening in the future," said Myers.

Myers also said that he contacted A&M head-coach Shelby Metcalf before he talked to SWC commissioner, Cliff Speegle.

"Shelby told me he was sorry and he regretted what had happened," said Myers. "He (Shelby Metcalf) didn't condone what happened, I told him what I was going to do and he said he didn't blame me."

The injury occurred in an incident away from the ball

when 6-7, 215-pound senior Willie Foreman threw an elbow into Williams' jaw. Williams collapsed to the floor in somewhat of a daze and left the game.

Tech trainers are working on a protective device for Williams to wear on his jaw but it is extremely doubtful that he will play again this year. Doctors have now diagnosed the injury as a fine-line fracture, meaning that although Williams did not suffer massive dislocation to the jaw, it was dislocated.

"I'm almost 100 percent sure he won't play again this season," said Myers.

"based on what the doctors said today (Tuesday). There are just too many things that could go wrong. For instance if he started bleeding internally and we couldn't cut the wires in time, he could suffocate."

Sophomore Thad Sanders will start for Williams for the rest of the season or until Williams can return.

"Video tapes of the game show that the blow that broke Kent's jaw was a lot more than incidental contact," said Myers. "There is no place in basketball for the type of contact that caused this injury."

Raiders stalk Cougars

By SID HILL
UD Sports Staff

The past few days the Tech basketball team has been distracted with the injury to guard Kent Williams' jaw. But, Raider coach Gerald Myers is hoping that his team will be concentrating on basketball Wednesday against the Houston Cougars.

"If we don't do a good job rebounding, defensively and attacking the press, we won't beat them (the Cougars)," said Myers on Tuesday afternoon.

The Raiders, who sport a 10-3 conference ledger, should be worried about the fourth place Cougars. In their first meeting of the year Houston blasted the Tech squad by a 84-71 score and Myers is impressed by the Cougs.

"Houston is the biggest, most physical team in the conference. They handled us better in that first game than anyone else has all year."

"I'm distressed that we spent a lot of time on this Williams' thing, as naturally we have to. We've seemed real flat in our practices. After having an injury we could be real, the best thing we can do is just go out and beat 'em at basketball."

Myers will start the same lineup that has propelled the

Raiders to the third place slot in the SWC race, with the exception of Thad Sanders replacing the injured Williams.

"We'll put Sanders in Williams' position. Sanders fills the spot better than anyone else. He's our second best outside shooter next to Kent," said Myers.

Two other Raiders have suffered minor injuries, but will see action in the Cougar game. Mike Russell, who is the Raiders' leading scorer and rebounder, has been hampered by a jammed hand and Sanders is nursing a sprained ankle.

Russell is averaging 16.9 points per contest in SWC action and is bringing down 7.8 rebounds. Williams was next in scoring prior to the Aggie contest with a 13.4 average.

The other starters for Myers will be Joe Baxter at center, Geoff Huston at a guard slot and Mike Edwards in the forward spot.

Tommy Parks and Ralph Brewster will see extensive action in the contest, according to Myers.

Houston will counter with Charles Thompson, Cecil Rose and Mike Schultz. Cougar Coach Guy Lewis is undecided about who he will start in the guard positions. He will pick from the foursome of Kenneth Williams, Ken Ciolli, George Walker and Cedric Fears.

The leading scorer in SWC and non-conference action is Rose. The leading rebounder for the Houston squad is Schultz.

The Cougars bring a 19-7 overall record and a 9-5 conference slate into the Coliseum Wednesday.

Myers takes a philosophical look at the Cougar game. "When it's all said and done we just have to beat them on the court. Hopefully our crowd will give us an edge at the same time show a lot of class."

Permanent inkings today
Football head coach Rex Dockery and recruiting staff are supposed to re-acquire the signature of 24 graduates today, the national signing date.

As of Tuesday, Tech had 24 junior college and high school players' signatures on Southwest Conference letters-of-intent. To make those agreements binding, the national letters must be signed beginning today.
The latest signee for Tech is Vic White, a 6-3, 212-pound tight end-defensive end from Albuquerque, N.M. White was an All-City, All-District high schooler at Albuquerque Del Norte.

Pendleton reaps All-America honors

By GREG LAUTENSLAGER
US Sports Staff

Terrell Pendleton stood poised at the starting line before 15,000 spectators at the University of Illinois' Memorial Stadium. The experience was a bit unusual in the eight-year track career of the Tech Senior and pre-dental student. It was the finals of the 3,000-meter steeplechase at the NCAA Track and Field Championships.

DESPITE his appearance at the Champaign, Ill., track on the humid June afternoon, it was doubted whether Pendleton would even be competing in his senior season, for an early January foot injury forced him to red-shirt the indoor season and jeopardized his 1977 outdoor season. Nevertheless, Pendleton

returned to training in February and responded with authority, clocking 4:07.4 in the mile and anchoring the Tech distance medley to its first-ever relay victory at the prestigious Texas Relays.

Following a non-placing performance at the Southwest Conference Championships, Pendleton traveled to Knoxville, Tenn., in hopes of qualifying for the 3,000-meter steeplechase, an event that had supplied most of his collegiate success. Pendleton failed to qualify on this occasion, but returned one week later to dip one second under the qualifying standard and secure his second trip to an NCAA track Championships.

IN THE preliminary heats at the NCAA, Pendleton blazed an 8:44.7 clocking and

easily qualified for Saturday's finals. In his room the night prior to the finals, Pendleton "prayed to God for strength," and the following day his prayers were answered. In his fourth grueling steeplechase event in three weeks, Terrell Pendleton finished in eighth place, becoming the first Tech track and field athlete to reap NCAA "All-America" honors.

Naturally, Pendleton felt pleased about his "All-America" performance.

"I feel very honored to be the first," he said. "I felt fulfilled to achieve one of my goals. I was very happy to push the Tech track program forward some."

THE NCAA honor was certainly not the only achievement in Pendleton's eight-year track career, which

hadits beginning at Louisville's DeSales High School, where he captured two Kentucky state championships. As a Tech junior, Pendleton anchored the two-mile relay to victory at the United States Track and Field Federation Indoor Championships in Oklahoma City. He recorded one of the fastest 1,320 relay legs in the nation at 3:55, and culminated the year with an 8:40.6 clocking in the 3,000-meter steeplechase, the quickest time ever recorded by a Southwest Conference performer.

Pendleton began his final year in true form, placing second at the Southwest Conference Cross Country meet and capturing first place at the NCAA District VI Cross Country Championships.

BECAUSE OF his layoff during the 1977 indoor season, Pendleton has returned for the 1978 indoor year to compete in the Raiders' four scheduled meets. In those competitions, Pendleton won the mile at the LCC, finished second in the mile at West Texas with a personal indoor best of 4:07.8, and set a two-mile school record last Saturday at the Oklahoma Indoor Track and Field Classic with an 8:56.3 clocking. At the Southwest Conference Championships in Fort Worth Friday, Pendleton will round-up his collegiate career by anchoring the distance medley and two-mile relays.

Pendleton

Tankers stop TCU

Tech men's swim team defeated TCU, Tuesday afternoon in the men's gym. Although the meet was scheduled for last Saturday TCU was unable to arrive in Lubbock due to the fog.

In the 1000 freestyle event Eddie Gravis placed first and Mike Butler placed second, with times of 10:00.12 and 10:20.76 respectively. Tech also placed first and second in the 200 freestyle. Scott Kucel swam a 146.40, Steve Degenfelder swam a 153.20, and TCU swimmer, Tim Gallas, swam a 144.88, for third. In the 50 freestyle Allen Sutton captured first, Greg Good, second, and David Quill, third, with times of : 22.52, 22.88, and 23.04, respectively. In the 200 I.M. Cody Aufrich swam a 202.44 for first, Steve Kruger swam a 204.11, for second, and TCU swimmer Rich Peters third, with a 210.83 time. In the 200 butterfly Dan Redfern placed

first with a 159.52 time. Doc Marvin placed second with a 203.45 time, and Tommy Elsenbrook swam a 204.62, for third.

Allen Sutton captured first in the 100 freestyle, Steve Degenfelder, placed second, David Quill, third, and TCU swimmer, Scott Robb, fourth with respective times of : 48.48, 50.08, 50.09 and 51.86. Eric Muehlberger swam a 159.80 for first in the 200 backstroke, Steve Krueger swam a 206.58, for second, and TCU swimmer Mike Miller placed third with a 210.60 time. In the 500 freestyle event Scott Kucel placed first with a 451.57 time, Eddie Gravis placed second with a 453.06 time and in the 200 breaststroke event Bill Mason captured first, Cody Aufrecht, second, and TCU swimmer Rich Peters, third, with respective times of : 217.68, 219.72, and 222.62.

Golfers place 14th in tourney

By MIKE VINSON
UD Sportswriter

Battling inconsistent play and an uncooperative weatherman the Tech golf team compiled a 934-stroke total to place 14th in the Monterrey Invitational in Monterrey, Mexico, Feb. 9-14.

The top five team members from the fall round of play made the trip since inclement weather has prevented the Tech squad from playing any qualifying rounds this semester.

Golfers Mel Calender (229), Dennis Northington (232), Greg Jones (234), Jean Francois St. Germain (239) and Kent Wood (241) represented Tech at the tournament.

The Raiders' consistency problem was apparent as Calender shot round scores of 75-75-79 while Northington shot 81-74-77; Jones, 82-78-74; St. Germain, 77-79-83 and Wood, 80-82-79.

"Consistency was definitely our biggest problem" coach Danny Mason said, "Part of the consistency problem was because this was the first tournament of the semester and a lot of it was the weather."

While Mason did say that he hoped for improvement in the Tech golfers' play later in the semester he was not totally unhappy with the Raiders' performance in Mexico.

"You have to realize the quality of the teams that

played in this tournament," Mason said, "Houston was there and they were the NCAA champions last year. Oklahoma State, last years' runnerup was there also and several other teams in last year's top 10 played."

Brigham Young University won the tournament with a team score of 863 followed by Oklahoma State with 874 strokes.

Third place went to the Oral Roberts squad with 897 and the Houston golfers shot a 900 for fourth.

The lowest individual scores for 18 holes on the par 72 course were 68 rounds shot by Bob Clampett from Brigham Young and David

Edwards from Oklahoma State.

Edwards also won the tournament Medalist award with a low total of 210, 6 under par for the 54 hole meet.

The Raiders next tournament will be March 10-11 when they travel to Laredo for the Border Olympics.

ABOUT HIS overall performance as a Raider trackster, Pendleton has mixed emotions, which explains his success over the 1978 indoor campaign. "I've had some very nice success, and I'm very satisfied with that. However, I don't feel like I've given all that I'm capable of. So I'm trying to make up for it as best as I can now."

Following college, Pendleton will return to his native Louisville, where he will begin his curriculum at a Kentucky Dental School.

This summer study at
PARSONS IN PARIS

This summer you can study in Paris with Parsons School of Design and earn nine academic credits.

The seven week program provides students with an opportunity to draw upon the rich heritage of art and design only Paris can offer. A major resource this summer will be The Pompidou International Center for the Arts, the world's most exciting new museum. Excursions to points outside Paris are also part of the program. All courses carry three credits and include Painting, Museum Painting, Drawing, Visual Concepts, Fashion Seminar, The Writer Among Artists, French History, History of Architecture, Interiors and Decorative Arts, The Medieval Mind as seen in Romanesque and Gothic Architecture and Sculpture, Academy and Avant Garde, and French Language.

The entire program, including nine studio and/or liberal arts credits, round trip air fare, accommodations with breakfast for seven weeks will cost \$1,600.

For more information and an application mail the coupon below or call (212) 741-8816.

Recreational Sports

Kneeing it

A LASA member tries his hand at kicking the ball with his knee. LASA defeated the SAEs for the All-University title 2-0 Monday. (Photo by Karen Thom)

LASA takes soccer crown

The Latin American Student Association beat Sigma Alpha Epsilon 2-0 for the All-University soccer title Monday.

Victor Tursios scored both goals for LASA which advanced to the finals by beating ASA 1-0, the Iranians, 1-0 and Cosmos West 2-1.

LASA was 3-3-1 for the season and placed second in its league, but swept through the tournament without a loss.

First aid class offered

Recreational Sports is sponsoring a free basic first aid course. The course is designed to teach the skills needed for emergency first aid care.

Anyone is eligible to take this course. No previous knowledge of first aid techniques is necessary.

Registration for the class has begun and will continue through Saturday. The class will be Saturday at 8 a.m. at the Aquatic Center. The one day class will teach basic first aid techniques.

Umpires needed for softball play

The Recreational Sports Office is in need of men and women umpires for the upcoming softball season.

Persons must attend and qualify from clinics conducted by the Recreational Department.

If persons qualify for the umpires role, they will be paid for attending the clinics provided he attends six of the eight sessions. In order to be paid, umpires must pass a written test. The stipend for softball umpires is \$3.53 per game. The number of assignments per week depends upon the umpire's availability and ability.

The clinics will be:

- Monday, 5 p.m.-UC Blue room
- Tuesday, 6:30 p.m.-UC room 208
- Wednesday, 6:30 p.m.-Men's Gym, room 207
- Thursday, 6:30 p.m.-UC room 208
- Feb. 27, 5 p.m.-UC room 208
- Feb. 28, 6:30 p.m.-UC room 208
- March 1, 5:15 p.m.-Intramural Gym
- March 2, 5:15 p.m.-Intramural Gym.

Recreational Sports Briefs

SWITCHING DATES—Deadline dates for track and field and swimming have changed. Track and field dates are due March 31 and the meet will be April 7 and 8. Swimming entries are due at April 20 and meet dates are April 25 and 27.

SOFTBALLING—A double elimination softball tournament will be in April. The tournament date is still undetermined. Games will consist of seven innings and will not be limited in time.

SLATED—Schedules for men's paddleball, racquetball, handball and horseshoe singles may be picked up at the Recreational Office in Building X-17.

MEETING WOMEN—Women's intramural sports managers will meet today at 5:30 p.m. in room 106 of the Women's Gym. Each organization should be represented.

ALL WASHED UP—Teams entered in Co-Rec Inner Tube water polo must have someone in attendance Monday at 5 p.m. at the Aquatic Center for an important rules meeting.

FLAG MEET—Women's intramural flag football tournament has been rescheduled for April. Date is still undetermined.

NOW OPEN—The Intramural Gym is now open until 11 p.m. on Saturday. The gym had previously been closing at 8 p.m.

JOGGING MAPS—Maps entitled "A jogger's guide to Texas Tech" are available at the Recreational Sports Office in Building X-17. The maps show routes around campus that joggers can run, with the distance of each run.

STICK 'EM—Recreational Sports is giving away bumperstickers which remind everyone to get involved. The stickers are white with black and red. The slogan on the sticker is "Join our circle of Fun, Play with us." The stickers may be picked up at the Recreational Sports Office in Building X-17.

LIFESAVING—Recreational Sports is sponsoring a free advanced lifesaving course in which skill will be combined with cardiopulmonary resuscitation. Brad Gray will instruct the class which begins Feb. 27 and will meet three nights a week. Monday will be the first day of registration. To register call the Recreational Aquatic Center at 742-3897 or 742-3896.

Meet entries due

Entries are due Thursday for this week's Saturday Morning "Live" that features "Guts Team Frisbee." Applications will be taken until 5 p.m. at the Recreational Sports Office in Building x-17.

"Guts Team Frisbee" is played by two teams, fifteen feet apart. A team tries to keep the other from catching the Frisbee, but it must be kept within a certain bounds. Points are scored if the defensive team drops the frisbee. The defensive team scores if the opposing squad tosses the Frisbee out of scoring lines.

Each team consists of three members. In last Saturday's badminton tournament, Jay Mohammad defeated Nawaz Basravi, 15-12, 7-15, 15-4 for the men's title while Tracy Olmo beat Kathy Gaillion 11-9 and 11-6 for the women's championship.

Free jogging class set

Females interested in joining a free jogging and exercise class can sign up at the Recreational Sports Office in Building x-17 or call 742-3351. The class will meet Monday and Wednesday at 4 p.m. beginning Feb. 27.

The class will stress combination of exercises and beginning jogging tips. The class will use Kenneth Cooper's Aerobic guidelines.

The class is open to all students, faculty and staff and will be taught by Sarah Lamont, a physical education graduate student.

Fencing club probable

An organizational meeting for persons interested in forming a fencing club will be today at 7:30 p.m. in the UC Senate Room.

Persons interested in starting the group are asked to attend.

Coming soon...

Deadlines for a variety of intramural activities are this week.

All entries must be turned in before 5 p.m. on the entry deadline date in Building X-17.
