HIGH STANDARDS FOR A NEW SCHOOL

To fully appreciate the standards and high qualities of a school from which one graduates he must get out into the business world, with no pull whatever, only his college degree, and apply for a job. If he has had experience or if he is recommended by one of the companies' friends then all right he will probably be given a trial. But with just a diploma for recommendation its quite different. There must be more than just four years of college behind that sheep skin. There must be proof that other graduates from this school have been successful and competent business men and women. There must be proof that the graduates, as executors have shown that they are capable and worthy of their positions. They must have proof that the curriculum of the school is so fixed that at the end of the four years the student is thoroughly trained to face the practical business world. To the graduate of the older colleges and universities, all of this has already been proven by those who have gone out before. Their reputation has already been built. For the graduates of the younger schools it is a problem and it is through their initiative, their stickability and perseverance that the young school must rely upon to build for them the same reputation. It is like trying to sell a new invention, a new modern convenience to the public. Until it is proven worthy, or until it has, through its own qualities, proven itself capable of fulfilling its duties, people will not buy it. They have to be shown. The same thing goes for the new college in that the people will not accept it as being successful until the graduates prove the ability, and the knowledge that they have gained is of high standard. This is a problem for Tech, only six years of age, is quite young in comparison with some of the other schools in the state. A few graduates have gone out into the business world from Tech, and they are helping to build a firm foundation for the future graduates. However, much can be done by the students from the freshmen to the seniors in Tech today. Each student can help in obtaining higher standards, and higher ideals for the school. However small this may be it will certainly have its effect.

ARTIST COURSE TICKETS

It is 1940. The conversation has turned toward grand opera. Marie Tiffany is being discussed. And someone says, "I had a chance to hear her sing once when

I was in college for only twenty cents. I did not take advantage of the opportunity."

Unusual Party Is Given By W. A. A.

As one of the most unusual parties of this year, was that given by the W. A. A. Thursday evening in the gymnasium. The hall was decorated in red and black stream-

ers and Japanese lanterns. The party carried out the theme of an evening in a night club, with various types of entertainment, while members of the organization wore special costumes. The program consisted of a violin solo by Josephine Winslow; tap dances by Sophie Sproule; tap and toe dances by Kitty O'Connor, and a song by Virginia Smallwood. Music was furnished by the Rhythm Stompers, a local colored orchestra. Between dances, guests were served punch and cake. The entertainment was given in honor of the freshman girls, and any others who might be interested in the activities of the W. A. A.

Do those three statements need editorializing? They do not. That is enough said under the condition that Tech students realize values, appreciate good music, and are coming to college to get the most out of what the institution has to offer. Then why, the question arises, have only three hundred and eighty-two students out of the almost two thousand enrolled bought an artist course ticket? Possibly when they registered, freshmen and transfers did not understand the meaning of the artist course. That has since been explained in Orientation and at convocation.

But there is another reason probably more plausible. Since the average student runs a bit short of funds during registration, he puts such things off until later. But don't put it off any longer. The first concert of the year, given by a thirty-six piece Mexican orchestra, will be given this month. So buy your ticket now, and hear this concert and four others given by world famous artists.

Both Pocket and Desk Pen Now in One

Only Parker Duofold SAVES PRICE OF A SECOND PEN Offers This Combination PEN GUARANTEED FOR LIFE

As a Pocket Pen
Getting the Parker Duofold is now like getting two Pens at the price of one. Attaching a tapered end converts it into a Desk Set Pen. Removing the taper restores it to a pocket Pen.

Either way, you save the price of a second pen. You have only one Pen to fill instead of two. And whether you write at your desk or on the go, you always have your favorite point.

You have a non-breakable Permanent barrel that holds 17.4% more ink than average, size for size—that is jewel-like in lustre, color, and beauty. And most of all—the famous Duofold* bonus point that writes with Geo. S. Parker's 47th improvement—Pressureless Touch.

Parker Duofold
PEN GUARANTEED FOR LIFE '5 7 '10

★ Point-smiths Paid a Bonus
Eleven merciful inspections are given each Parker Duofold point. Then we pay a bonus to our point-smith who made it. Points are rejected if they fail even one inspection, and the point-smith pays us a forfeit. Yet, 7 out of 8 points earn a bonus, because we limit each man to a given number a day.

Matadors Trounce New Mexico Aggies In Second Game Of Season

New Mexico Aggies Shaded By Powerful Matador Crew On Muddy Field Saturday

Touchdowns Made in Fourth Quarter By Brothers And Doose; All Players Show Fine Form

"Rome was not built in a day," either was Texas Tech's football team, but if they made as much progress in the building of Rome as Pete Cawthon has in the building of a polished eleven, they undoubtedly must have hit a fast pace.

Last Friday the Matadors shaded the New Mexico Aggies to a 14 to 0 count. The Cawthon men outlasted the visitors in almost every department of the game. Although the tilt was played in a cold drizzling rain, and the best brand of football could not be displayed by either eleven, the Matadors proved to be above the Mexicans calibre by the score and summary of the game.

Aggie Line Strong. A staunch and stubborn Aggie line held the Bull Fighters away from their goal for three quarters. The work of Mechem, Aggie end; Captain Sanders, guard, was particularly outstanding. Newcomer showed a good brand of football at tackle and Parker put up a nice battle against the powerful Jack Durham at the pivot position. Seby proved to be the Aggies' outstanding and most consistent groundainer.

Several Stars. In the Tech line-up, there were several stars. Doose seemed to be the most potential man in the backfield. His crashing drives at the line and the reliable way in which he backed up the line, had plenty to do with the score. He is almost sure to see plenty of service at the fullback position this season. Woolbridge, as the general, ran the plays almost to perfection. In the second half, Franz distinguished himself as a runner and punter. Time after time, he skirted to ends for nice runs and under the weather conditions, his punts were superb. Late in the game Brothers tucked the ball under his arm and fought his way through Aggie tacklers for 15 yards and a touchdown. Moffett, setting in the fray late, showed amazing speed even on a slippery gridiron. Hodges played his usual good brand of football. Several times he threw the Aggie ball-toters for a loss. The line showed improvement over the last fray and with the powerful Jack Durham as their leader, held their own against a heavy New Mexico line. The points after touchdown were both kicked by the educated toe of Buddy Brothers.

Score in Fourth. It was late in the fourth quarter when, after several advances almost to the Aggie goal, Doose plunged over for the first touchdown of the game. Within three minutes later, the Matadors had received the ball deep in the Aggies territory and Brothers had carried several tacklers over the goal line for the second counter. The educated toe of Brothers accounted for both the points after touchdown.

The Summary:
Tech First downs—8
New Mexico first downs—2
Touchdowns: Tech—Doose and Brothers.
N. M. A. & M.—0
Points after Touchdown: Brothers—2.

El Toro

BY JAY TIMMONS

With the New Mexico Aggies onslaught behind the Matadors and a team functioning like a real college team should function their interests are pointing ahead to the tilt with the McMurry gridsters. Line faults are being rapidly ironed out. Scrimmage with the Fresh is making for better signal acquaintance, so when that McMurry squad lines up in front of the Matadors McMurry's hopes to conquer for the first time in history, will blur at the sight of the crimson charge.

El Toro pauses to congratulate the student body of Alma Mater for their splendid showing, orationally speaking made in the game with the Aggs. As I said before the Clarion voices which you so enthusiastically lent to the fighting Matadors Friday did come back two fold, Townspeople although few as they were noticed it and even the village chronicler had a few words to say about it. That's the old fighting spirit. Keep it going.

Much was said about our Yell Leader in the Sunday edition of the Lubbock newspaper but I think that if the height of feeling at the shirt tail parade was passed into the blood of any of us we would have said, provided we got the opportunity, practically the same thing our Yell Leader said. His spirit is undying and his every word is sensed with a keen hope that the Matadors shall someday gain that limelight they deserve so well.

Offside playing on the part of one or two of the Matadors showed only the eagerness with which the boys are playing this year. Even signals are not fast enough for them when they are down on the line. They are ready to go and they're going. Watch them.

Texas teams of the Southwest Conference did not fare so well with their eastern and middle-west antagonists last week end. The Ponies came nearest to the path of glory by allowing only one touchdown and scored by the error of a Pony charge. T. C. U. played a scoreless

The game with the Simmons Cowboys on a wet field which may mean something to football dopsters interested in the Matador. Prog squabble to take place the 24th.

Student Activity tickets are still being sold and especially since the Matadors have shown such a fighting spirit. Remember it will be a good thing to have at the T. C. U. Stadium in Fort Worth. It may save the Ten Dollars in trouble to get seats. Track Meets, Artists courses, The Toreador to which you have no right unless you have a Student Activity ticket, and other just plenty interesting things you will want to see.

Cheri Cass, the home of Charley horses, loose teeth, battered noses, skinned shins, not to mention other bruises and hardens parts of the football man's anatomy, is the scene of study and quietness during the dark hours. We're not only going to have some real football players but some scholars too. I'd hate to be a fellow back in the old home town taking advantage of one of these huskies by courting his best weaker sex friend. That's my idea of unintentional suicide.

I pause a moment to rehearse the Ten Commandments of the true football player: 1. You must be a fighter, fierce and aggressive, though clean. 2. You must tackle low and deadly. 3. You must interfere as you would have them interfere for you. 4. You must use your hands continually on defense. 5. You must always get the charge on your opponent. 6. You must encourage and never grumble. 7. You must never talk back to coaches or opponents. 8. You must follow the ball at all times. 9. You must develop speed. 10. You must keep training.

These commandments were handed out to the Matadors at the beginning of training this fall. They have voluntarily adopted them as their code of ethics, so if you see a good chance for a true Matador to throw dirt in the face of an opponent who has been playing a rather shady game, remember the Ten Commandments.

Christianity now ranks third among the religions of India, there being 5,000,000 Christians in the country.

Collegiate Notes

By MILDRED PRICE

Dances at other colleges seem to be quite different from those given at Tech. We notice in The Pine Log from Austin Teachers College at Nacogdoches, that the students have just recently held their first all-college dance. No admission was charged, which is an unknown privilege in Tech, and guests were allowed to stay a little later than usual, dancing being over not long after eleven. Students are only allowed two all-college dances during each term. These rules seem rather formal and strict to most of the Tech students, and we can really appreciate our freedom when we think of them.

Slimes at Rutgers University, New Brunswick, N. J., certainly have a hard time. Three hundred and fifty freshmen were assembled by the soph for the annual "pegrade" up College avenue. Fresh were made to roll up one trouser leg, reverse their coats, hold their dinks in their teeth, then twist, roll, somersault, hop, jump, and crawl up the street until they reached the athletic field. There the sophs changed their tactics, forcing the exhausted first year men to wrestle among themselves, and, by means of wild body motions, to imitate an egg in the process of frying. Foot races followed, after which a fire hose was turned on the wretched crew, and they were left to their fate.

It was announced in a recent issue of The East Texas Commerce, Texas, that six moving picture films will be shown to the student body and all others interested. The films will show the stroke analysis of internationally known tennis stars.

Student Opinion

Editor's Note: Contributions to this department will be welcomed by the staff. These should be brief and should bear the writer's name.

So far this year the pep rallies have been unusually well attended. Increasing interest has been shown due to the recent reorganization of the entire Athletic staff and the complete change in the attitude of the athletes and student body. There is apparently nothing to prevent Texas Tech's having a great football team this season, regardless of what games they may win or lose. It is going to be a team that will command the admiration and respect of the southwest. It has already won the heart of the student body and the students are giving the team their undivided support. They are genuinely proud of the fighting spirit of the Matadors and are showing this pride by attending the pep meetings. Not only that but they have also liberally supported Tech's first uniformed band in their efforts to obtain the uniforms and the band is reciprocating above all expectations.

With all due respect to those students who are compelled to work during pep meetings, there are numerous students who do not attend these meetings for various reasons. Some feel that pep rallies are trivial and that they have larger and more important social engagements to fill. There is no greater institution in the state of Texas, save the churches, than Texas Tech and nowhere is there a social group that is superior to the men and women who attend that institution. Vain indeed is the man or she who socially feels that he or she is socially above the student body or that his or her social status will be jeopardized by attending pep rallies.

Football men have to give up many pleasures, not occasionally but every day for months in order to play a tough game and make a favorable reputation for the school. Many students do not have the necessary intestinal stamina to give up these things for only thirty minutes, one or two nights a week during the football season. They don't have anymore place in the student body than a smoker or drinker has in the football team and that is no place at all.

The greatest social events of the college calendar are the pep meetings. Every fellow should see that he and his best girl miss none of these important gatherings. At these times he will come in contact with the cream of the college, those students who have enough character to be loyal to their school and their football team. Aside from the social side of pep meetings, each one should feel that it is not his duty but his special privilege as a student to attend.

If the student body loses its fight who is to blame if the team loses its own fighting spirit? Each student should realize that he is the twelfth man on the team that is supplying the entire team with fighting spirit and if he falls that he is just as much to blame for defeat as a football player who lays down and refuses to tackle his man racing toward the goal line. Most of the students realize this already. If you want to be one of the gang, a part of the college and if you want to share in the victories of the fighting Matadors in their glorious comeback, you won't miss another pep meeting this year.

A Reader.

Geology Graduates Locate Positions

That advantageous openings are to be found for well trained graduates of the Geology Department of Tech, is the opinion of Dr. L. T. Patton, head of the local department.

He cites the following positions which are filled by Tech graduates as ample proof of this statement: Delmar Oriswell, who took his degree in 1930 with a major in Geology, is engaged in individual oil development in Milan County, Texas. He is cooperating with a number of independent oil operators, and has taken a block of oil leases on which a test well will be put down.

Roy Lindley, also a graduate and a major in Geology was a prominent worker in the field trip taken the past summer in southwestern Colorado. As a result of his good work, he was employed as a science teacher in the high school of Pagosa Springs, Colorado. The fact that this high school is heated by volcanic water is a feature which is of special interest to the Geologists.

Fred Moore and Elliot Powers, both majors of the 1930 Tech graduates, have fellowships in the Geological Departments of the Universities of Virginia and Iowa respectively.

Other offers which have been received for trained Geologists include those from the University of Missouri; Ohio State University, and the University of Illinois.

Textile Graduates Get Employment

Every graduate of the Textile Engineering Department holds a position with a reliable company. Jack Maddox and Charles Woolbridge are in the employment of the Texas Power and Light Company of Dallas. Jack Maddox was president of the student body and president of the Engineering society. Charles Woolbridge was a football star and president of the Senior Class of 1930.

Clyde Williams at Akron Ohio; Julie Love at Rockmart, Georgia; Ray Thomas at Cartersville, Georgia, are employed by the Goodyear Tire and Rubber Company. Nat B. King was lured to Georgia by the Calloway Cotton Mills at La Grange. Rudd Hardesty is holding a good position with the Davenport Hosiery Mills at Chattanooga, Tenn.

According to Professor C. D. Brandt, head of the Textile Department, the demand for textile graduates exceeds the supply.

Because of the unusual amount of checks passing through the fiscal department, some of the officials are requesting the students not to write so many. It was reported that from 2,000 to 4,000 checks were passing through the department. "Try to make one check cover the whole day," is the slogan they have adopted.

New Military Course Given

Organized by Department of Physical Training to Enable Men Students to Absolve P. T. Requirements

Military Science 101-3 is the new course being organized by the physical training department, in order that men students may obviate physical training requirements this term. The class meets from 5 to 6 o'clock on Monday Wednesday and Friday.

According to an announcement made by Captain H. E. Killin, the course is not of a military nature, but instruction will be given in calisthenics.

Captain Killin is anxious to get some marchers, and some intricate non-military drills worked out. He also plans to give the class instruction in "butts manual", a drill in which broom sticks are used. He wants three hundred men to do the "butts manual" to band music between halves at football games.

Students who want to take this course are requested to see Captain Killin in his office in the basement of the administration building at once.

Torreblanca

Continued From Page One

Torre will be principally of native compositions. With the orchestral numbers will be featured solo offerings by several of the most popular artists of Mexico. Among them will be Mario Romero, Mexico's most beloved soprano; Jose de Armas, famous tenor of the National Opera Company; the Charros Mexicanos, marimbists; Trovadores del Bajio, male quartet and Lupe and Rico, favorite dancers of Mexico City, in the colorful ranchero dances of the country.

Candle is sporting a new car. She and Liz can be seen sweeping by anytime. They were probably afraid that somebody would try to sell somebody another second hand "Gray."

Christine Carter should be speculating on wall street by the way she picks out the winning ball clubs.

The Editor Gets Some Mail

Dear Editor: I've always read the Toreador every single week since I've been in college and as yet I've failed to see anything in it about the horns of the Ugly Ducklings. You know who they are. They're the girls that hang out at the Duck Inn Dining Room over at 2410 14th street.

They seem to be the modern living proof of the old fairy tale about the ugly Ducklings which turned out to be a beautiful swan. Most of them are transfers but all of them are upper classmen.

That little girl that has been getting news stories for her Journalism class which have not been getting in the paper is Creta Herndon. She is a junior from the University of New Mexico and has been voted the best dancer in that school for two years. She is a member of Alpha Delta Pi sorority and lives at Fortales.

Another one that ought to be getting more stories in the paper is Sophie Sproule, the fancy dancing teacher. She lives at Galveston and is a special student in French. Chevlie Whitehill, besides the other honors she has won, transferred to Tech from a school in Indiana. (The other honor lies in the fact that she transferred.) Her home is in Wichita Falls.

To Organize Class In Chinese Friday

A class in the study of the Chinese language is to be organized by Dr. Alan L. Carter, head of the department of English. Dr. Carter is to be assisted by Chang We Au, a student in the college.

The class is open to students and faculty members who are interested in studying the writing of primitive characters and reading Chinese poetry and prose.

Some cop in Fort Worth must have thought Flop Marshall was Al Capone searching him to see if he had concealed weapons on his person.

Christine Carter should be speculating on wall street by the way she picks out the winning ball clubs.

Bridge Is Played By Las Chaparritas

Members and guests of the Las Chaparritas club were delightfully entertained last Tuesday evening in the home of Mrs. E. B. Adcock, 2601 19th street, with Misses Sylvia Wilson, Vonelle Glickerson, Zella Reigel and Mrs. Clarence Rollo as hostesses.

Bridge was played, and attractive appointments were in yellow and orchid, the club colors. Misses Glyds Grimsley, and Chevill Whitehill won high score for club members and guests, respectively, and Misses Johnny Glickerson and May Tom Simmons scored low.

Those in attendance were Misses Jean Shelley Jennings, Glyds Grimsley, Mary Lois Camel, Camille Stobaugh, Beth Wulfman, Elizabeth O'Connell, Faye Hunt, Inez Henzley, Lucille Harzog, Evelyn Harzog, Wilma Parks, Sarah Michie, Maxine Clark, Virginia Murray, May Tom Simmons, Brilla Mae Willis, Marjorie Ann Ainsworth, Tommy Murphy, Sue Barton, Lois Graves, Cecile Horne, Chevill Whitehill, Gertrude Standefer, Greta Herndon, Helen Byrthe, Ruby Sprulock, Mrs. Ed Allen, and Mrs. Harold H. Griffith, and the hostesses.

Amarillo Students Hold Club Meeting

Twenty Amarillo students attended the first meeting of the Amarillo club last Wednesday. The club held its initial meeting three weeks ago in Amarillo at the home of Miss Flora McGee, sponsor.

Ed Harris, president of the club, greeted the new members and briefly outlined the purpose of the organization. The club was organized five years ago in Amarillo, two weeks before the formal opening of Texas Tech, by Miss Flora McGee and others who were interested in the new college. This is the only organization on the campus older than the school. The purpose of the club is to promote a feeling of fellowship among the Amarillo students and to make new students feel at home in Lubbock.

E. B. Fincher, a senior majoring in Spanish, was elected vice-president for the coming year. Miss Mary Alice Griggs, a sophomore majoring in foods nutrition, was chosen secretary, while Miss Juanita Pool, a major in business administration, was elected treasurer.

Bridge-Dance Held By Centaur Club

One of the most delightful entertainments of the past week was a bridge-dance, given by the Centaur club Saturday evening at the Country Club.

Twelve tables of bridge were in progression, and high score went to Miss Marjorie Ann Ainsworth, among the girls, and to Mr. L. J. Halbert for the boys. A salad plate and coffee were served at the close of the games. Dancing was enjoyed from 10 to 12 o'clock with Frank Stone and his Collegians furnishing the music.

The guest list included Misses Dorothy Oxshier, Elizabeth O'Connell, Dorothy Griffin, Wilma Parks, Catherine Mitchell, Mona Gowan, Faye Foote, La Verne Yowell, Mary Cheauveaux, Donna Vaughn, Elizabeth Pickett, Chevill Whitehill, Christine Carter, Virginia Murray, Catherine Jamison, Marjorie Ann Ainsworth, Brilla Mae Willis, Martha Alice Penny, Frances Gunn, adn Messrs. L. J. Halbert, Walter Howard, Miller Storrs, Rob O'Hair, Felix Ballinger, Woodrow Wilson, Bill Youle, Wyatt Webb, and Dick Hoffman.

Members in attendance were Messrs Bob Taylor, Adolphus Smith, Bill Sewell, Dick Carter, Bruce Parks, Johnnie Cook, Trent Campbell, Murray Ballinger, Lonnie Langston, Foster Davis, Tom V. Watson, Roy Pryor, R. V. Willis, James Whitesides, James Harley, Dallas, Red Waller, Weaver Medlin, Bill Collins, and Wayne Castleberry.

Dr. and Mrs. C. M. Ballinger, Miss Anns Jo Pendleton and Seth Cummins were chaperones for the occasion.

Math Club To Meet Tonight

The Mathematics Club will hold its initial meeting tonight at 7.30 in room 206 of the Administration building.

Dr. Elizabeth Stafford, who has been on a leave of absence for the past two years, will be the principal speaker. Officers of the club for this year are: Laurine Bussey, president; Ola Reeder, secretary; Mr. Lonnie Langston, of the Mathematics department, is the club sponsor.

All students who are particularly interested in Mathematics are urged to attend the meeting tonight.

All-College Dance On Saturday Night

Saturday evening, October 11, is the scheduled time for the second all-college dance of the season, which will be held at the gymnasium. Frank Stone's Collegians are to furnish music for the occasion.

Important announcements have been made by the college which should be of interest to all college students who are interested in attending: No high school student shall be admitted.

Identification and guest cards must be presented. The latter can be secured from the office of the Dean of Women.

All Tech letter men are to be admitted without charge. Tickets for one hundred couples and seventy-five stags will be the limited number available.

The all-college dances are to be conducted in practically the same manner as in previous years, with charges as before, 75 cents for couples and one dollar for stags.

The schedule has been posted as follows: October 11, and 18; November 8 and 22; and December 6.

Virginia Bacon Is Hostess At Bridge

Five tables of bridge were in play Thursday afternoon when Miss Virginia Bacon was hostess to members and guests of the Sans Souci club at her apartment, 2216 15th street.

High score went to Miss Kate Boyd and low score to Miss Tom-mye Murphy. Miss Blanche Bradley received high cut.

The guest list included Misses Dorothy Rushing, Catherine Jamison, Blanche Bradley, Mary Lee Bardwell, Donna Vaughn, Hazel Ligon, Marjorie Leaverton, Virginia Connelly, Alma Spikes, Mary Lou Bayless, Ann Snyder, Jane Mast, Kate Boyd, Dorothy Oxshier, Christine Carter, Tommy Murphy, Sue Barton, Gertrude Standefer,

Y.M.C.A. Banquet At Hilton Hotel

Monday night at the Hilton Hotel, the Y. M. C. A. opened their program for the year with a banquet for all former members of H-Y clubs and those who are interested in Y. M. C. A. work.

The main feature of the evening was an address by President P. W. Horu, who stressed the importance of Y. M. C. A. work to the individual as well as to the College.

J. I. Kilpatrick and Wayne Castleberry made brief addresses and Jack Boyd outlined the plans for the year's work.

Special guests for the banquet were President Paul W. Horn, Dean and Mrs. A. H. Leidigh, Dean W. J. Miller, Dr. John Dupre, Rev. Bradner Moore, J. I. Kilpatrick, David Au, and Mrs. Jack Boyd. Music was furnished by Mary Frances Gale and Lucille Huston.

The freshmen who were present agreed to meet again Wednesday evening October 8, to further their plans for the year.

Mr. and Mrs. C. W. Radliff are the proud parents of a big fine boy, both Mr. and Mrs. Radliff are former students of Tech, Mr. Radliff being a member of the first graduating class.

Dorothy Griffin, Greta Herndon, and Cornelia McCanne.

Music Written By Orchestra Leader

The "Collegians" dance orchestra has been found to contain writers as well as readers of music. They are now playing a new dance tune, "Baby, Not Me!", words and music by their director, Frank Stone.

There has been one change made in the personnel of the orchestra since school started. Emory Hollar, who has gone to medical school at Galveston, has been replaced at first saxophone by Oquin Meyers, a freshman from Lamesa.

MOVED TO NEW LOCATION
Professor Harry LeMaire, Tech bandmaster, has moved from his old location in the basement of the Administration Building. He is now in the old college book-store.

Mrs. H. W. Carpenter, who will be remembered as postmistress Minnie Scott, is now in school.

Dr. R. C. Goodwin Is Chemistry Head

Dr. R. C. Goodwin is the new head of the Chemistry department. Dr. Goodwin comes to Tech from Gainesville, Florida, where he has been an instructor in chemistry in the University of Florida for the last four years. Dr. Goodwin received his M. A. degree from the University of Texas, and his Ph.D. degree from Harvard.

The enrollment in the department this year is about the same as last year, but there is a fifty per cent increase in the number enrolled for advanced courses.

Captain Jackie Durham has just received a few cartoons of himself, a gift of a noted cartoonist of the south, who does not wish Jackie to be bothered with clipping them out of the papers.

We hear that Cecil Kirsey is also in receipt of a similar present.

1898 - SEVENTY-FIFTH ANNIVERSARY - 1920

123,000 tests a year

In the Crane testing laboratories, the weight arm of a specially designed machine measures the steadily increasing load suspended from a small cylinder of metal. Watching it intently is a man who has at his command instruments that measure to .00005 of an inch. The cylinder begins to yield; he notes the weight. It snaps; he notes the weight. Disengaging it, he measures the stretch and diameter at the breaking point. These tests form a part of the 123,000 determinations Crane Co. makes on its own materials every year.

63,000 of the tests are chemical; not one component from pig iron to limestone flux is charged in a Crane melting furnace whose suitability has not been determined by analysis. 60,000 are physical; not one hour's melt is drawn off in a Crane foundry whose physical properties—tensile, transverse, and torsional strengths, yield point, breaking point, elongation, and reduction of area are not known.

By such exhaustive tests and by researches of scientists in Crane laboratories, a vast body of authoritative data on metals and their properties has been collected. It is embodied in a book, "Pioneering in Science," which is an invaluable reference book for students. On request, we will send it to you.

Basil Hill Heads Tech Bobbin Club

The Bobbins club met last Wednesday night for the first time this year. Election of officers was held with Basil Hill as president; Frank Maddox, vice-president, and Cary Lodel secretary-treasurer.

Plans for initiation of new members from the Sophomore class were discussed, along with the outline of a program to be followed that will lead to entering Phi Psi Fraternity, which is the national fraternity for Textile Engineers.

The next meeting will be held next Wednesday night, and all persons interested in Textile Engineering are urged to be present.

LONDON, England.—(IP)—School kids back in the year 520 B. C. were compelled to write "lines" as punishment, C. Leonard Woolley, archaeologist, has revealed here.
