

# Election Fills Council Posts In 3 Schools

Representatives to next year's Student Council were elected for the Schools of Engineering, Home Economics and Agriculture Monday.

Election of representatives for business administration and arts and sciences was invalidated Monday by the elections committee of the Council and rescheduled for Wednesday.

The action was taken, according to Janis Jones, Student Assn. secretary and elections committee chairman, due to omission of some names on the ballots for the two schools in retyping the ballots last Saturday.

Four candidates for two home economics representative spots will also go into a runoff Wednesday.

It was also announced Monday by Miss Jones that all candidates for engineering and business administration representative vacancies in the March 1 election, since ruled invalid by the Supreme Court, had withdrawn their candidacies for the posts.

In a runoff Wednesday for senior vice president, the other election position invalidated by the Supreme Court's action last week, are Gayle Mullanax and Ted Ferguson.

Going into the runoff Wednesday for home economics positions are Jan Barton, Linda Kinard, Judy Rutledge and Jane Sessums.

Their votes Monday were Miss Barton, 36; Miss Kinard, 44; Miss Rutledge, 34; Miss Sessums, 45.

Elected Monday to the Council were Jerry Casebolt, 40 votes; Robert Hejl, 43 votes; and Richard Sharpe, 46 votes, for the School of Agriculture.

Seven engineering representatives elected were Kenny Abraham, 216 votes; Jerry Avery, 241; Dick Perkins, 167; Myles Sadler, 189; John Ward, 191; John Wehrle, 195; and David Wight, 151.

# Service Gives Honors

By ANN BALZER  
Toreador Staff Writer

A salute to superior achievement came Sunday to top Tech students at the All-College Recognition Service in Municipal Auditorium.

Dr. R. C. Goodwin, recognizing outstanding attainments in scholarship, leadership, and athletics, congratulated honorees who, he said, often merit but too frequently fail to receive attention.

Scholarship recognitions fall into four categories: those recognized for the first time, individual; those honored for the second time, class recognition; those honored for the third time, school recognition; and those honored for the fourth time, college recognition.

Thirteen seniors who have been on the school honor roll every semester were presented gold scholarship keys. Those receiving college honors include Eleanor C. Brown, William E. Case, Sandra P. Cox, Linda M. Hawkins, Linda Dennis Price and Lynn C. Skelton, Arts and Sciences.

Others are Suzanne Stafford and Franz Lothar Helbig, Business Administration; Don L. Cannon, David C. Osborne and Milton F.

Schramm, Engineering; and Barbara Nan Durham and Lynell E. Fouts, Home Economics.

The top-ranking students from their respective schools are Agriculture, Richard Sharpe, junior; Arts and Sciences, Linda Dennis Price, senior, Dorcas Pettigrew Turner and Beatrice K. Young, sophomores; Business Administration, Anita R. Smith, sophomore, and Bobby Charles Switzer, junior; Engineering, Jerry L. Yoes, junior; and Home Economics, Judith Ann Cowger, sophomore, and Barbara Nan Durham, senior.

College Awards Board recognized Ralph W. Carpenter, Crop Judging Team, James Thomas Davis, Home Economics Club and Phi Upsilon Omicron, Janis Jones, Brenda Brister Pate, Jan Lee Pfluger, Sigma Tau Delta and Mickey Story.

Others include Texas Tech Bands, Texas Tech Engineering Show, James William Turner, Tyrian Rifles Howitzer Section, Wayne Underwood and James Robert Wheeler.

In his address, Dr. Goodwin told the students, "I express not only to you but to all Tech students our sincere appreciation for their part in making Tech not only a bigger, but a better college—one of which we may all be proud."

# Classes Dismiss For Von Braun

DR. WERNHER VON BRAUN

All 10 a.m. classes will be dismissed Wednesday to allow students and teachers to attend the all-school convocation in the Municipal Auditorium featuring Dr. Werner von Braun, noted leader of the U.S. rocket development program.

The German-born scientist will fly to Lubbock from Huntsville, Ala., and should arrive here about midnight, according to James G. Allen, dean of student life.

"A reception for all interested persons will follow Dr. von Braun's talk," Dean Allen added. This reception will be held in the Auditorium.

Von Braun has addressed several colleges and universities across the nation in the past three years. In a recent address to the students and faculty of Florida Presbyterian College, Dr. von Braun spoke on the U.S. space programs and told why the government spends so much money on space research and development.

In an article published by Florida Presbyterian College, von Braun expressed his views on the immense cost of research and development. "You cannot put a price tag on a thing like the discovery of the Van Allen Belt, for example, which was made by our first Explorer."

"The subject of Dr. von Braun's speech tomorrow is a mystery," said Dean Allen. "I can promise one thing, though—it will be interesting."

The 48-year-old von Braun is director of the Development Operations Division of the Army Ballistic Agency at Redstone Arsenal, Ala.

Von Braun came to the U.S. after World War II and began his career in rocket research and development for the Army. In this role he developed the Corporal, Redstone, and Jupiter missiles. Von Braun was also instrumental in the launching of the U.S.'s first satellite.

After launching this satellite von Braun continued his work in space exploration using the Jupiter ICBM missile. Von Braun's current project is the Saturn, which will be used to take up men and equipment.

# Council, Court Act On Voting Problem

An already highly confused situation concerning spring elections at Texas Tech reached the point of "who's on first" Monday afternoon with developments from both the Supreme Court and the Student Council.

In the first action announced, Chief Justice John Stokes of the Supreme Court said there would be a "court session" at 6:30 p.m. Wednesday in the Aggie Auditorium to consider two petitions presented to the Court.

One of the petitions is signed by 58 names and protests the holding of the spring elections on dates other than those specified by the Constitution.

The other is from the Student Assn. executive officers and re-submits the election rules for the spring, asking the Court to waive Sect. 500 of Art. V of the Constitution. The petition states the Council's reasons for requesting the waiver.

In the other development Bill Dean, Student Assn. president, announced that an amendment had been found which was approved by the student body in an election on Feb. 19, 1959, which would change the Sect. 500, Art. V, of the Constitution, a section around which much of the recent controversy has centered.

Dean said the Toreador on Feb. 7, 1959, carried a story which said the amendment would change the section, which provides for election of Student Assn. officers, representatives and cheerleaders. The amendment provided that "there shall be in each spring semester a general election divided into two parts; the first for the purpose of electing the Student Assn. officers, the second, no more than a week later, for the purpose of electing all Student Council representatives and cheerleaders. . . . the entire election is to be concluded by the first week in May."

According to the Feb. 28, 1959, issue of the Toreador, Dean said, the amendment was approved by the student body in the general election.

Concerning the search for the amendment, Dean said Monday that "this is typical of the way our Constitution has been handled in the past and we had to dig into the files of the Toreador to find this one. This is another reason why we want to revise the Constitution."

TECH DEBATERS MOVE INTO SEMI-FINALS

. . . in the Texas intercollegiate television debate tournament, "Young America Speaks." They are, from left, Dr. P. Merville Larson, speech department head, Kip Glasscock and Harry Neuhardt, debaters, and Jack Wyatt, program moderator. (See story, page 3.)

## HKN Initiates Nine Members

The Gamma Nu chapter of Eta Kappa Nu, national electrical engineering honor society, attended a dinner at the Holiday Inn Restaurant following the initiation of nine new members Saturday night.

Dr. Sylvan Thomas, head of the Tech physics department, was guest speaker at the dinner. He spoke on "The Demands of Modern Society upon Higher Education."

The new society members are Pat Faris, Gerald Galbraith, John Hicks, Bill Leverich, James Moeller, James Pybus, Richard Tarrant, Lynn West and Roy M. Williams.

Membership in Eta Kappa Nu is based upon outstanding character and scholarship achievement. Junior and senior electrical engineering majors with 2.0 overall grade averages are eligible.

**FIRST PLACE HONORS**  
... were won Saturday by the Tech Angel Flight in drilling competition at Baylor University in Waco. Sweepstakes honors were won by the the Texas University Angel Flight.

## Student Convocation

Hear Dr. Werther von Braun tomorrow, Wednesday, March 22nd at 10 a.m. Dr. von Braun is the author of "First Men To The Moon".

Price \$3.95

Available at

## Junior Serves As AWS Head

Ouida Daugherty, Tech junior from Grand Prairie, will serve as president of the Association of Women Students next year.

Other newly elected AWS officers are Judy Martin, first vice president; Glenda Johnson, second vice president; Kay Porter, third vice president; Rowena Williams, secretary; Nancy Jo Mankins, treasurer; Anne Weaver, judiciary; and Bette Davis, IAWS.

## A-ASA Chooses Khorsheed Prexy

Fuad R. Khorsheed was elected president of the American-Arab Student Assn. recently.

Other officers elected were Dale Hodges, vice president; Beth Young, secretary; and Mosaed Samil, treasurer.

Prof. John Guilds, of the Tech English department, will speak on Arabic countries at the next meeting of the association at 7:30 p.m. Wednesday in the workroom of the Tech Union.

## MEMOS

### MAJOR-MINOR CLUB

The Tech Major-Minor Club will meet at 7 p.m. today in Women's Gym 106.

### SONG LEADERS

There will be a meeting of fraternity and sorority song leaders for the interfraternity sing-song at 4:30 p.m. today in the library of the Music Bldg.

### INTERNATIONAL INTEREST COMMITTEE

The speech by Dr. Raczhowshi, Polish minister of finance, scheduled for 7:30 p.m. today in the Tech Union, has been cancelled.

# Tareyton delivers the flavor...

**DUAL FILTER DOES IT!**

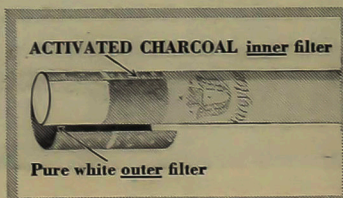

**THE TAREYTON RING MARKS THE REAL THING!**

Here's one filter cigarette that's really different!

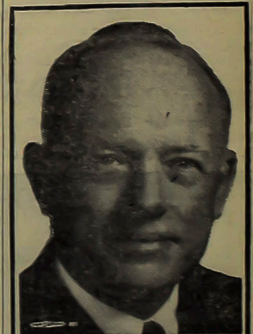

The difference is this: Tareyton's Dual Filter gives you a unique inner filter of ACTIVATED CHARCOAL, definitely proved to make the taste of a cigarette mild and smooth. It works together with a pure white outer filter—to balance the flavor elements in the smoke. Tareyton delivers—and you enjoy—the best taste of the best tobaccos.

# Roger Williams Plays In Auditorium April 5

By **BILL MCGEE**  
Toreador Staff Writer

Roger Williams will present one of the year's entertainment highlights for Techs at the Municipal Auditorium April 5.

Sponsored by the Tech Union, the young pianist, who shot to the top of the hit parade with the 1955 recording of "Autumn Leaves," will present a varied, two-and-one-half hour program of pops, stand-

ards, classics and novelty arrangements.

**WILLIAMS'** repertoire ranges from boogie to Bach. As a change of pace, he may play one song with his right hand, another with his left, and whistle a third at the same time. His ability to play two pianos simultaneously has brought loud approval from audiences from coast to coast.

One of the all-time top recording instrumentalists, Williams has made 20 long-playing albums, several of which have been best-sellers.

Being the type of performer who likes to "meet the people," Williams will probably extend an invitation to the audience to gather backstage for introductions and autographs.

"**MUSIC** is an art that can express the composer's and performer's feelings and still be fun," says the popular pianist. He studied music at Julliard and holds a master's degree in music from Drake University.

Williams picked out tunes by ear on the family piano at the age of three. He was writing original compositions a few years later.

Also a graduate in electrical engineering, Williams designed and built an electronic piano which plays automatically and has an important part in his performances.

Ticket sales began Monday in the Union lobby. No seats will be reserved and prices are \$1 for Tech students, \$1.50 for other students and \$2 for general admission.

## Tech Union Needs Gambling Dealers

Volunteers are wanted to act as card dealers, roulette and dice table operators at Tech Union's Frantic Funfare on April 29, from 7-11 p.m.

Interested students should call the Program Council Office in the Tech Union (PO 3-2192) and leave their names with Jane Gentry, program director.

# Tech Debaters Defeat Houston In Second Win On TV Series

By **JEANNIE BOOKOUT**  
Toreador Staff Writer

Across a speaker's podium as well as on the basketball court—Tech downed the University of Houston twice in the last weekend.

**COMING** up with a winning score and \$1,000 from the Sinclair Refining Company for Texas Tech's scholarship fund were debaters Harry Neuhardt and Kip Glasscock. Questioning from the audience were Darlene Collins and Arthur Skibell.

The victory put Texas Tech into the semi-finals of the Texas Intercollegiate Television Debate Tournament, "Young America Speaks." Tech had previously defeated Abilene Christian College in the debate tourney.

When the debaters were asked how they felt during the contest, Neuhardt replied, "By the time you get up there you are convinced that you're right and they're wrong and your main objective is to convince the judges." He added however, that he was somewhat "awe-struck" by it all.

**FOR THE** Tech debaters, winning means days and days of work

and planning. "They work hours every day," declared Dr. P. Merville Larson, debate coach and speech department head. He added that to win the debaters must read and discuss more about the subject than the opposing teams in order to have better speeches.

"The professors at Tech have really helped us out a lot," commented Glasscock. "Dr. Woods of the history department and the entire staff of the government department have given invaluable assistance."

Tech had the affirmative side of the question, "Resolved: that the President of the U. S. should be elected by a direct vote of the people." Said Dr. Larson, "The debate was pretty well determined during the crossfire and the questioning from the audience."

**IN SPEAKING** about the televised tournament Neuhardt said, "The farther I thought we were

behind the nearer I got." Glasscock declared, "I thought we were behind this time."

It seems that the apprehensions from the debaters came from the fact that a girl cheering for the Houston team "screamed" every time the scores were rung up. Only the television and studio audience can see the scores.

"The girl kept screaming—more and more elated. We thought uh-oh," laughed Neuhardt.

The debate team will meet Hardin-Simmons for another televised contest in Dallas on April 2. Glasscock and Neuhardt will hold the affirmative on "Resolved: That the U.S. should discontinue direct economic aid to foreign countries." Miss Darlene Collins and Franz Helbig will question from the audience.

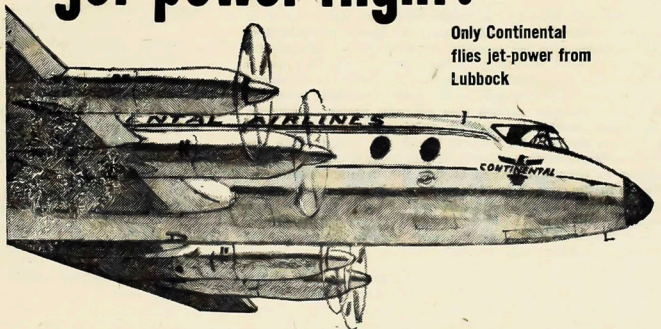

Any students living in the Fort Worth-Dallas area may contact Dr. Larson for free tickets to see the contest first-hand.

## Student Council Beat

Tomorrow morning the students of Texas Tech will once again have the opportunity to hear an "internationally" known speaker address an All-School Convocation. The speaker in question, of course, is Wernher von Braun. Von Braun is presently the director of the Development Operations Division of the Army Ballistic Missile Agency, at Redstone Arsenal, Ala.

He came to the United States and began a new career in rocket research and development for the Army. The team he formed is largely responsible for the very successful Army missile program today.

What he will have to say to you tomorrow will be informative and enlightening. And it will be current—vitality current. We want to encourage everyone who is interested to attend. We are not sponsoring a side-show tomorrow. There will be no door prizes and clowns. It is a mature presentation for mature students. Now if that shoe fits—wear it—and attend.

I have been asked to comment on the recent "uprising" between the student council and the supreme court regarding the spring elections and the constitution.

I have never intended (and do not intend now) to use this column as defense mechanism to fight my critics or the critics of the student council. The question in this case has been and is being covered in the Toreador. And like all disputes there are definitely two sides to the picture. I think simply a brief factual recount of the events leading up to last Wednesday would be sufficient for the purposes of this column.

To begin with, it was fully recognized by this year's executive officers that our constitution needed changing as early as last spring. During the summer a full evaluation was done on the constitution and as soon as school began a constitutional committee was appointed. This has all been discussed before in these weekly articles. At first the committee attacked the problem by amendments but when they reached the 50th amendment it was decided that the proper thing would be to completely rewrite this out-dated instrument. Therefore, the long and tedious job of completely rewriting our constitution was begun with the help of our advisor, Mrs. Coward of the Government department, and the Supreme Court. This type of thing takes months and, although almost finished, still lacks some finishing touches before being presented to the council for approval.

When the problem arose of planning spring elections Janis Jones fully realized that her election dates would not be in accord with the constitution so she asked the Supreme Court for approval of her dates in a formal statement. She received a formal reply that the court "pronounces the Election Rules for the Spring of 1961 Constitutionally valid." This was signed by Chief Justice John Stokes. With this document in hand Janis began carrying out the plans for the spring elections.

In an election held to fill vacancies in the council and to elect a new Senior Vice President the elections committee certified three candidates for election when there actually should have been a run-off according to the Constitution. This was a mistake and one that Janis admitted and intends to do something about. She indicated this to the court and their action in declaring said election invalid was entirely proper. However, when the court enacted its advisory opinion that the election of March 15 was also invalid because it did not comply with the Constitution the executive officers of the council called a council meeting to discuss matters. It was the recommendation of the officers to the council (which was unanimously passed) that the council ignore the advisory opinion because it was rendered in proceedings not approved by the council. The constitution also states that the court must submit proceedings to the council for their approval and this was not done.

So this is where we are today. These are the facts of the matter and it seems easy to see that it is going to be necessary for the court and the council to come to an agreement before anything constructive can be done for the students. I feel as though this will happen because the members of the court and the council are mature, straight-thinking people who have the best interest of the college and the students at heart. I have nothing but respect for John Stokes and the members of his court. Their actions in the past have always indicated that they possess mature judgement. This is why they were appointed. I'm sure their actions will continue to reflect this type of judgement.

## IN SPACE RACE

# Scientist Holds Key

Texas Tech students and faculty will have the opportunity Wednesday to hear at an all-college convocation the man who possibly holds the key to our success—or failure—in the space race with Russia.

He is Wernher von Braun, director of guided-missile development at the U.S. Army's Redstone Arsenal in Huntsville, Ala. Von Braun is in Lubbock at the special request of Tech's Student Assn. and he will speak on the subject that he has studied and experimented with since his early youth—rockets.

Von Braun was firing homemade rockets from a municipal dump in Berlin when only 18, and at 20 he was head of rocket development for the German army. At age 32 he had built the world's first guided missile, the dreaded V2.

After World War II von Braun came to the United States where he became a naturalized citizen. Early in this decade he warned U.S. army officials that the future in military power lay in missile development. However, it was not until Soviet Russia fired its first Sputnik into orbit that the defense department gave von Braun the green light on full scale experimentation, development and production. Since then he has not only put the U.S. in the space race, but in some phases he has managed to surpass the Soviets.

It would be well worth the students' time to hear this forceful, dedicated scientist whose vision has not been stymied by red tape or short-sightedness. To hear him, would in essence, be a look into the future.

RON CALHOUN  
Editorial Assistant

## The Toreador Mail Call . . .

Dear Editor:

May I suggest that the Toreador devote a page, or whatever space is necessary, to print a copy of the present Student Association Constitution, and that this be made an annual tradition? Too few students know where they can read a copy of this document, and we cannot expect the constitution to be followed if we do not know its provisions.

What are the duties of leaders with respect to the constitution of their organization? I suggest that there are five:

The first is to compile and maintain an accurate, signed and dated, official copy of the constitution.

Second is to study the constitution until familiar with its content.

Third is to follow its requirements if humanly possible.

Fourth is to familiarize the people with the constitution and to make copies readily available to them.

Fifth and lastly is to propose amendments to the constitution if study and an honest effort to follow its requirements have indicated that such amendments would probably improve the constitution.

How well have these duties been carried out with respect to the Student Association Constitution during the present and past several years? As to the first item, there is no single, official copy of the constitution in existence, and to the best of my knowledge the copies presently available are not absolutely complete.

The familiarity of the student officers with the constitution requires a judgement I do not wish to make.

With respect to the third item, it is regrettable that the past year has seen a number of unnecessary violations in such areas as the counting of ballots, the selection of the head cheerleader, the selections of the student representative to the Athletic Council, the method of working out a revised constitution, and the failure to hold a rally for demonstrations by cheerleader candidates last spring.

I will make no further comment on the fourth item, but as to the fifth, I am happy to observe that some progress seems to be being made on presenting revisions to the constitution.

The preceding portion of this letter was written before the March 15th hearing of the Supreme Court took place. I presented these views primarily for the consideration of the incoming officers and members of the Student Council, and of the Supreme Court, and others who will be concerned with this matter next year.

No one group can take all the credit for the good work that has been done nor can any one group be blamed for the violations. In the light

of the present campus discussion I would like to suggest that the fact that some of the provisions of the constitution have been violated in the past does not excuse future violations, and the fact that some past violations cannot be corrected should not prohibit the correction of present violations either by constitutional amendment or by other reasonable means.

Our present problem, I believe, is not to place blame for past mistakes but to work out a present solution for the accomplishment of the five goals listed previously.

Yours truly,  
David A. Jones

Dear Editor:

Most students do not know what the various probable rulings of the Supreme Court on the current election could be. As I see the logical alternatives, none of them would be as bad as supposed by some persons.

The court could rule that the holding of the current elections on an unconstitutional date was justified. This is the ruling which would be preferred by the Student Council officers.

If the court found that the holding of the present election was not justified, there are two likely rulings, either or both of which the court might give:

First, that the voting for the present election would have to be held again on a constitutional date. This would not require new petitions, nor more posters, nor another rally, nor would it be likely to change the results of the present election if the Election Committee would establish a period of two weeks with no campaigning before the voting was held over.

The other possibility is that the court would rule that the present elections could be made constitutional by the passing of a constitutional amendment containing a change in the date of the spring elections to a less definite time, together with an enabling clause for this current set of elections.

Other rulings are possible; however, I don't believe any of them would be logical or very likely.

Sincerely,  
Robert Rodgers

Editor:

Considering that our school's name must be descriptive and recognizing that we are committed to noncommitment, marked by malleability, infested with insipidity and partitioned by pigmentation, we suggest the name Pastel University for Palefaces.

# Raiders Were Unexpected Victors

Basketball experts shouldn't blush because they didn't expect to find Texas Tech facing the Missouri Valley Conference champion, Cincinnati, in the National Collegiate playoffs at Lawrence Friday night.

By most of the criteria, Polk Robison's Red Raiders just were not a logical choice to win the Southwest Conference.

After all, the Raiders:

1) had only three lettermen re-

turning from a squad that tied for fourth the preceding season.

2) had no seniors.

3) lost more lettermen from the '59-'60 squad than any other SWC team.

4) lacked an experienced big man.

Just when the fourth deficiency appeared solved by the improvement of 6-9 Harold Hudgens, who previously had played only half of the '58-'59 season, he broke an ankle.

A few weeks later the leading freshman scorer from the previous season, discouraged by illness, left school.

Fortunately, Hudgens returned to action by the time conference play rolled around, although he wasn't in good condition until after mid-term. The Raiders were fortunate, too, in that they had no other injuries—except for a scalp wound suffered by playmaker Del Ray Mounts in the next-to-last game, with Rice.

Texas Tech won the title, its first basketball championship in four seasons of SWC play, by winning all seven games at home and taking four of seven road contests. For the entire season the Raiders are 15-10. (16-10 if a win over AAU team Phillips 66ers is included).

Coach Polk Robison credits the team's spirit with playing a large role in the championship. The Raiders trailed by 13 in the second half of the win over Southern Methodist in Dallas, by 14 in the second half of the triumph over Arkansas in Fayetteville, and by nine in the second period of the final triumph, over University of Texas in Lubbock.

The Cinderella-like basketballers captured third place in the Lawrence playoffs. One of 16 teams qualifying for NCAA playoff competition, the Southwest Conference champions were defeated by regional champion Cincinnati 78-55 and bounced back to edge University of Houston 69-67.

Harold Hudgens, the Raiders'

6-9 center from Ballinger, gained all-tournament honors in the two-day meet. He was the tourney's high scorer with 50 points in two

games, and his 20 rebounds against Houston were a one-game high, just four off the all-time record for the playoffs.

## Netters Start Play With ETS Deadlock

Texas Tech's varsity tennis team opened their season last Wednesday with a 3-3 tie with East Texas State.

The team composed of Daryl Allison, Dan Chrane, Jim Austin, Derald Breneman, and Ron Damron managed a 2-2 split in singles and fought to a 1-1 deadlock in doubles.

In singles Allison topped Wayne Hirst 6-2, 6-4, and Breneman bounced Steve Larrimen 6-2, 6-3. Chrane was defeated by Charles Ashcraft 6-8, 3-6, and Austin bowed to Jerry Hirst 4-6, 3-6.

Tech's Allison and Damron downed Wayne and Jerry Hirst 6-2, 5-7, 6-2, to obtain a split in the doubles division. Chrane and Austin were edged 3-6, 6-2, 6-3, by Larrimen and Ashcraft.

Coach George Philbrick said, "East Texas State had an edge in experience having previously defeated East Texas and Texas

Christian University. Our boys are inexperienced but we have good spirit and are working hard preparing for conference competition."

The Tech netters will resume play Wednesday when they entertain Abilene Christian College on the varsity courts. Southwest Conference competition gets underway April 10 with the Raiders hosting the Baylor Bears.

## Cincy-Ohio St. Meet For Title?

By DON WEISS

**Associated Press Sports Writer**  
KANSAS CITY (AP)—History could repeat itself in the NCAA basketball championships here this weekend.

In 1957, the last time the championship were held in spacious, imposing Municipal Auditorium, North Carolina—then rated the No. 1 team in basketball played second-ranked Kansas in the final. By the margin of a single point in the third five-minute overtime, the Tar Heels upheld the validity of the pollsters, 54-53.

Through the luck of the draw, No. 1 could be matched against No. 2 next Saturday when the NCAA tournament, which began a week ago with 24 teams involved, reaches its climax.

The way the Cincinnati Bearcats have been looking forward to a crack at Ohio State, it might take a triple overtime to pry them apart. Although they're practically neighbors, the schools haven't met in basketball since 1922.

The potential analogy goes a step further, too, since North Carolina in 1957 is the last team to have made it through a full major season of college basketball without a loss, Ohio State, with a carry-over 31-game winning streak, has a 26-0 record for the 1960-61 season and needs just these two giant steps to match the Tar Heels.

The farther smoke travels  
Air-Softened,  
the milder, the cooler,  
the smoother it tastes

## THIS ONE'S THE SATISFIER

This king sets a record for taste. Every satisfying puff is Air-Softened to enrich the flavor and make it mild. Special porous paper lets you draw fresh air into the full king length of top-tobacco, straight Grade-A all the way.

FOR FULL SLATE OF GAMES

# Diamond Crews Ready

Texas Tech's freshman baseballers inaugurate their 1961 season by entertaining South Plains College at 3 p.m. Friday on the college diamond south of the Coliseum.

Originally scheduled for last Friday, the game was postponed a week because of wet grounds.

Pitching for the Picadors will probably be either Ronnie Arrington or Morris Dudley of Lubbock or Frank Ray of Abilene.

Texas Tech starters also will probably include Bob White of Artesia, N.M., or Arrington at third base, Jim Harris of Lubbock at shortstop, Ronnie Ayers of Lubbock at second, Dudley or White at first base, Larry Mitchell of Lubbock in left field, Jimmy Wickham of Mesquite in center, and Glynn Baker of Fort Worth in right.

Also on the squad are Johnny Boatner of Mount Pleasant, Hank de la Rosa of Lubbock, Foster Dudgeon of Tahoka, Carl Goode of Lubbock, Carlos Hendrick of Mount Pleasant, Louis Hart of Sulphur Springs, Jerry Jordan of Lubbock, Robert May of Fort Worth, Wendell Morgan of Aspermont, James Perry of Lubbock, Gary Schessler of Bellaire, Ken Thomas of Fort Stockton, Carl Toland of Odessa, Eddie Welch of Lubbock, Don Wise of Houston and Mike Woods of Tyler.

Charles Robinson of LaPryor, a Texas Tech physical education major, has been designated as freshman coach by Coach Berl Huffman. Robinson was a member of the Oriole organization.

Texas Tech's frosh schedule, still to be completed, includes also games with Odessa College Mar. 28 at Lubbock and Apr. 25 in Odessa, a return game with South Plains at Levelland Mar. 29, and a pair of doubleheaders with Amarillo College, Apr. 7 at Lubbock and May 2 at Amarillo.

Coach Huffman's varsity Red Raiders had a doubleheader with Panhandle A&M slated for today on the Tech diamond, but wet grounds caused a postponement of the games.

The baseballers make up for lost time next week, however, playing six games here—with West Texas State Monday and Thursday, University of New Mexico and University of Colorado Friday and Saturday, Friday the Raiders meet New Mexico at 9:30 a.m. and Colorado at 2:30 p.m. The times are reversed for Saturday.

The Red Raiders are undefeated in three starts. Texas Tech downed Highlands University by scores of 3-2 twice and by 4-3.

Remainder of Texas Tech's schedule has been announced by Coach Huffman:

Mar. 27—West Texas State at Lubbock.

Mar. 30—West Texas State at Lubbock.

Mar. 31—University of New Mexico (9:30 a.m.)

University of Colorado (2:30 p.m.)

Apr. 1—University of Colorado (9:30 a.m.)

University of New Mexico (2:30 p.m.)

Apr. 3—Highlands at Las Vegas, N.M. (two)

Apr. 4—Highlands at Las Vegas, N.M. (two)

Apr. 8—West Texas State at Canyon

Apr. 15—West Texas State at Canyon

Apr. 21—Oklahoma (Southwestern) State at Lubbock

Apr. 28—Panhandle A&M at Goodwell, Okla.

Apr. 29—Oklahoma (Southwestern) State at Weatherford.

## Red Raider Cindermen Prepare For Next Meet

With a fourth place finish to show for their efforts in Odessa last weekend at the West Texas Relays, the Tech tracksters prepare this week for Abilene Christian College's invitational meet Saturday in the Key City.

Coach Don Sparks Raiders gained only one blue ribbon in Odessa a surprising 22.3 broadjump by Bake Turner. Turner's effort was made more difficult by a 10-15 mile per hour wind.

Delbert Shirey, who recently set a new school record with a 14 foot pole-vault, cleared the mark again in Odessa. But Southern Methodist's Dexter Elkins won the event, becoming the first Southwest Conference trackster to go over 15

## Carpenter 'A' Wins All-College Crown

Carpenter "A" nosed out Carpenter "B" 47-45 last week in an exciting all-college basketball championship clash.

Don Ray Williams and Jamie Hamm paced the victors with 11 points each. Ken Caspari led Carpenter "B" with 12 supported by Gary Schessler and James Tom with 10.

Carpenter "A" was edged 60-57 by the West Texas State Terrors Wednesday night in their traditional intramural basketball championship series.

Mike Castleberry canned 12 for

the losers with Mac Marcom backing him with 10. Nutt of West Texas State took game scoring honors with 21.

Carpenter "A" travels to West Texas Wednesday to resume their battle with the Canyon entry. This has become a traditional rivalry between the intramural basketball champs of the respective schools.

The clash, which for four years has been equivalent to an intramural basketball world series, finds Tech entries holding a 5-4 edge.

In other intramural sports action, seven softball games were rained out and will be played at the end of the regular season schedule.

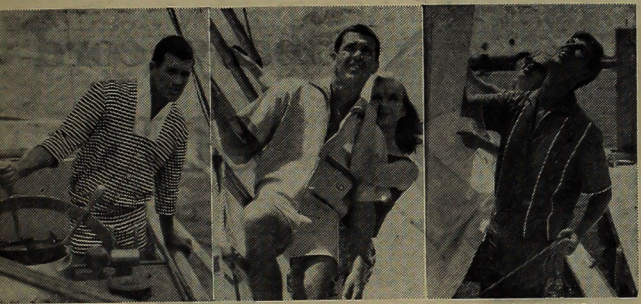

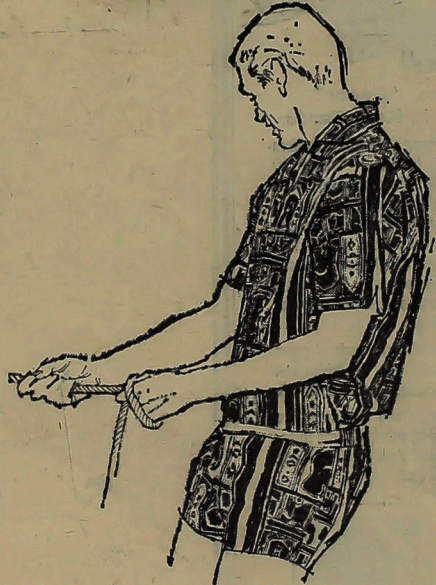

Bowling deadline for entries has been extended until March 25. April 8 will be the date intramural bowling will start.

The top six teams in intramural athletics with their point totals are Sigma Alpha Epsilon (296), Carpenter Hall (276), Phi Delta Theta (268), Pi Kappa Alpha (254), Sneed Hall (246), and Sigma Chi (216).

## Murdough Receives Honor At Banquet

Prof. James Harold Murdough, head of the department of civil engineering, was named Engineer-of-the-Year March 13 at a banquet given in his honor.

The honor was bestowed on Murdough by the South Plains Chapter of the Texas Society of Professional Engineers. Prof. L. J. Powers, head of the department of mechanical engineering, presented the award.

Principal speaker for the banquet was Dr. George K. Schweitzer, who was also a speaker at the Religious Emphasis Week here a few years ago. Dr. Schweitzer is a distinguished nuclear scientist and is associate professor of chemistry at the University of Tennessee. He is also a research radiochemist with the University of Tennessee, radiological warfare chief for Tennessee Civil Defense, and director of health physics for

the Nuclear Service Laboratory.

Murdough has been head of the department of civil engineering for 34 years and has graduated more than 600 students from his classes. He is the author of "Elements of Dynamics," and co-author of "Elements of Statics," both used as textbooks.

He was a member of the original Texas Tech faculty in 1925, and is a member of several professional organizations, including Tau Beta Pi, the American Society of Engineering Education and the American Society of Civil Engineers.

Murdough received his bachelor's degree at the Massachusetts Institute of Technology and his master's degree at the University of Michigan in 1930.

### AIA Club Meets

The AIA club will meet at 7:30 p.m. Wednesday in the Architecture auditorium. The meeting is called for the election of officers.

Coffee will be served after the meeting.

### Registrar Readies Semester Grades

Mid-semester grades will be available to students and if possible, mailed home to the parents before the spring vacation, according to Don Renner, director of registration.

### Fourth Round Set In Speech Murals

The fourth Intramural Speech Tournament will begin at 7 p.m. Wednesday in the Aggie Auditorium.

The last tournament saw Gamma Phi Beta as first place winners with 299 points. Second place went to Phi Gamma Delta with 232 points. Kappa Kappa Gamma was third place winner with 198 points.

Fourth place went to Pi Beta Phi with 170 points. Tri Delta, 153 points, took fifth place. The Pre-law Club was sixth place with 105 points.

The last tournament will take place on April 19.

## 'Lost' Office Contains Toothpaste, Sliderules

Hundreds of items, ranging from toothpaste to sport coats, are lost by Tech students, faculty, and staff daily.

Many of these misplaced possessions find their way to one location—the lost and found office located in the Tech Union. The fate of these unclaimed articles is determined by members of the Beta Sigma chapter of Alpha Phi Omega service fraternity.

Students who lose textbooks may be delighted to learn that their books are purchased by the campus bookstore for resale at a later date. Many items which have been in the lost and found for a long period of time without having been claimed are auctioned off by A Phi O in a campus-wide auction. The money obtained by such an auction goes into the A Phi O Scholarship Fund.

Some unclaimed items, such as eyeglasses and cases, spiral notebooks and pencils and pens, are turned over to the Lions Club for distribution to needy children.

The latest undertaking of A Phi O is a campus-wide plea for students to put their names in text-

books and other articles which might be lost or misplaced. They particularly urge students to mark their names on sliderules, as the lost and found is literally overflowing with unclaimed sliderules.

The next lost and found auction is set for the second week after the fall semester begins. Gerald Bell was appointed chairman of the project, and Charles Libby is the faculty advisor. Other members appointed to the Lost and Found Committee are Joe Gearhart, Harley Hannsz, Fred Schoenfeld and Lyndell King.

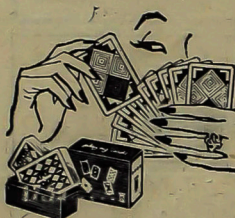

Students who have only recently lost items should check with the branch offices of the Tech Union lost and found which are located in the Ad Bldg., the C&O Bldg., the Science Bldg., the Textile Engineering Bldg. and the Aggie Engineering Bldg. Identification will be required of students claiming such valuable possessions as ice boxes, stoles, slacks and credit cards.

A Phi O will notify by postcard any student whose name appears on a lost article. Items may be picked up at the Union newsstand.
