President faces struggle over proposed cuts

By The Associated Press

WASHINGTON - President Reagan Sunday sent Congress advance copies of his \$848.5 billion budget for 1984, and Democratic and Republican leaders agreed he faces a major struggle over proposed cuts in social programs, a \$30 billion increase for defense and standby tax increases.

"There will be a bipartisan effort to protect" social programs from deeper cuts, declared Rep. Dan Rostenkowski, chairman of the House Ways and Means Committee.

cut defense spending" below Reagan's recommended level, said Rostenkowski, D-Ill.

Sen. Pete V. Domenici, chairman of the Senate Budget Committee, said: "From my standpoint I believe we can find some additional savings" in the defense budget.

In general, Domenici defended the president's budget as "very responsible."

But he conceded, "It may be picked apart in details."

this year and \$189 billion in 1984 — will be released

"I also think there will be a bipartisan effort to formally today, but the administration already time that Congress goes home." was deploying senior officials to defend the budget.

> Treasury Secretary Donald Regan said Congress eventually will come around to the president's view when it discovers the size of the spending cuts and tax increases needed to bring deficits down.

look at what we have suggested, that the alter-The budget — predicting a deficit of \$208 billion natives are such that they will come back to what we have, that we will get most of our budget by the

He said the Reagan administration's decision to was as big a cut as could be made in the military during the next five years.

Reagan's budget calls for curtailing spending pensions would be frozen for a year, though. on programs such as food stamps, welfare, sub-"I think in the long run when they finally take a sidized housing, and nutrition programs for separately on television, also agreed Reagan prochildren, as well as providing a six-month delay in bably will have to accept changes in standby tax cost-of-living increases for the blind and disabled

of Medicare and Medicaid.

In addition, Reagan wants an actual reduction cut back \$55 billion in defense spending authority in spending on hundreds of domestic programs taken as a group. This so-called freeze would be budget. The amount is a reduction in Reagan's applied unevenly, though, with spending on prooriginal plan for increasing military spending grams such as Head Start increasing and funds for Amtrak cut below 1983 levels. director. About 75 students are expected said. to enroll in the program by next fall. next five years.

Home Economics, said the new program is supported by the hospitality industry and the Texas Tech University colleges of Business Administration and interdisciplinary base for the program.

Hospitality employment options include the management of restaurants, hotels, resorts and lodges, and managing food services in hospitals, schools and universities. Other career choices include sales, purchasing and marketing in hotel- and restaurant-related businesses.

"The program was started because people in the community contacted Dean Haley with the idea," Hayes said.

Tech will be able to provide welltrained employees and continuing education services to the hospitality industry through the RHIM degree program, Haley said.

Forty percent of all food money is spent away from home, Hayes said.

Approximately 20,000 hospitality managers are needed each year in the United States, Hayes said. He said col-

leges are producing only 6,000 a year.

The average RHIM graduate has three to five job offers with \$16,000 the average starting annual salary, Hayes said. A Hotel and Institutional Management statewide shortage also exists with 1,900 (RHIM) has been approved by the Coor- restaurant managers needed each year,

Hospitality industry officials estimate The College of Home Economics pro- almost 85 percent of Texas students gram will lead to a bachelor of science seeking bachelor's degrees in hospitality degree. Dilapidated room

The Laboratory Theater on the Texas Tech University campus remains in use despite the fact the building has been declared a fire hazard. The College of Arts & Sciences is investigating the hazard,

and a report on the condition of the building is expected by Wednesday. The building formerly was used for speech communication

Fire hazards being investigated

Condition of Laboratory Theater to determine building's use

By DAVID WEBSTER University Daily Staff

Lawrence Graves, dean of the College of Arts and Sciences, is investigating possible fire hazards in the Speech Building. The outcome of his investigation will determine whether the building will continue to be used as the Texas Tech University Laboratory Theater.

"I am now waiting on the report of the fire marshal, and he is waiting on the report of the electrician," Graves said.

He said the report could result in the Lab Theater being closed or restrictions being placed on how the building is to be used.

"We hope that we can continue using the building on a temporary basis, until the new facilities can be built," Graves said. "If we can, the fire marshal may put certain restrictions on the building's use which we will have to comply with and will comply with to the letter.'

Graves said he did not know what

have to wait for the report," he said. The report should be completed by Wednesday.

According to Graves, plans exist to replace the Lab Theater building with an addition to the University Theater. He said the addition could be completed in a year.

Graves decided to investigate the Lab Theater after he was questioned by The University Daily Jan. 26 about possible life safety hazards in the building.

Richard Weaver, director of theater, department of speech and theater arts, had expressed concern about safety in the Speech Building prior to the interview with Graves. "That building has been condemned for five years," he said, "The wiring is awful. The wiring is dangerous. We have had two small

Weaver said one of the dimmer switches that controls the theater lighting was in poor condition. "It arcs, shorts those restrections would be. "We'll just and sputters," Weaver said. "Last year

it caught fire during a performance. They put it out with a fire extinguisher and went on with the play."

Weaver said he is aware of the danger but said he believes he has to continue use of the building. "The plays produced in the Lab Theater are the heart and core of our program," Weaver said. "If we shut down the Lab Theater we might as well shut down theater at Tech.'

Tech Fire Marshal Charles Whittler confirmed the building was condemned in 1978 for "life safety hazards." He said some work had been done on the building since 1978 but he did not know to what extent.

"It's (the Speech Building) not as bad as it was a couple years ago when we first started out on this thing," Whittler said. "It still has a lot of problems, but it takes a little time to get to all of them." Whittler is investigating the possible problems in the building and will report his

findings to Graves by Wednesday. Fred Weymeyer, associate vice presi-

dent for Administrative Services, said the administration is aware of the problem.

"We've been aware of the life safety hazards for quite some time, have gone back in and redone the wiring in a lot of the areas to bring them up to code," Weymeyer said.

Weymeyer said he is aware problems still exist in the building, but he said the building is scheduled for demolition at the earliest date possible.

"The decision was made five or six years ago to put minimum maintenance dollars into the building because everyone knew that it was going to be demolished. Now on that basis we have done very little on it," Weymeyer said.

"If you've got a '69 model automobile you know that it's not going to be around much longer," Weymeyer said, "so, you're not going to put good dollars into it if good dollars are hard to come by and maintenance dollars are very hard to

Armed band of 100 men kidnap, kill refugees in southern Mexico

By The Associated Press

MEXICO CITY - An armed band of 100 men in peasant clothing "presumedly from Guatemala" killed four Guatemalan refugees and kidnapped a fifth in southern Mexico near the Guatemalan border, the government said Sunday.

A statement from the Interior Ministry published in the government newspaper El Nacional said the Mexican Commission for Aid to Refugees is conducting "an exhaustive investigation" of the border violation and killings, which reportedly occurred Wednesday.

The Guatemalan government, meanwhile, denied on Sunday press reports that Guatemalan soldiers crossed into Mexico and killed the refugees.

The killings are the latest in a series of border-crossing viola-

tions by armed men reported in Mexico's southernmost state of Chiapas, where some 30,000 Guatemalans live in refugee camps, according to estimates by the United Nations.

The commission said, according to witnesses, "about 100 people, dressed in peasant clothing and carrying rifles, and coming, presumedly, from Guatemala," entered the refugee camps "La Hamaca" and "Rancho El Rosario" in the Montebello Lakes region, killed four refugees and kidnapped a fifth.

The statement identified the dead as Pascual Tadeo Perez, Tomas Felipe Vicente, Tomas Pascual Petrona and Francisco Lopez Tomas, all of Guatemala. Jose Jorge Perez, also Guatemalan, was kidnapped on the same day, the statement said. The five were living in Mexico under "a transitory immigrant" status, the government said.

The commission said it was collecting testimony in the area where the incident took place.

club Friday night. See LEGEN-DARY, page 6.

Common cold cure

Russell Baker

© 1983 N.Y. Times News Service

There seemed to be several fish hooks lodged in my throat. All teeth in the upper jaw throbbed with pain and unaccustomed to pressure behind the eyeballs threatened to pop them right out of the skull at any moment. I went to the cold?"

in a plastic one," he said, "but it wouldn't help your head cold one bit. I suggest you take two aspirin, and go to

The bed was a furnace made of sheets; the pillow, and iron vise clamped against my head. From the bedside telephone I reached a second doctor.

"I see, I see," he said. "You're burning up and your head is being crushed. Now, one thing we can do for you is to create a new baby in a laboratory pan, but that's not going to relieve cold miseries, is it?"

"I don't want a baby manufactured in a lab, and I don't want a plastic heart either. I want help."

a chill," he said.

Until that instant the idea of catching a chill had not crossed my mind, but immediately after hanging up I felt my body temperature drop 40 degrees. On the phone, the third doctor offered a wide range of possibilities.

"If your brain stops working, we can keep the rest of your body functioning on life support systems, for another 20 or 30 years," he said. "We can also give you a liver transplant if your liver gives out. Alternatively, if you become suicidally depressed, we can brighten you up with some quite miraculous drugs."

"What can you do for a bad cold?"

He hung up. The night that ensued was a thousand hours long. Phantasms appeared at the foot of the bed and jeered. One was my grandfather, dead these 75 vears passed.

"Didn't I always tell you, boy, that man would find it a lot easier to travel to the moon than to cure the common

"How could you possibly have told me "I could take out that old heart and put that? You died 20 years before I was

"And didn't I tell you there'd come a day when doctors would start prescribing plastic hearts instead of mustard plasters, and second-hand livers instead of camomile tea, and that when that day came and you went to them with a bad cold they'd offer to make you a baby in

the laboratory?" Released from nightmare by dawn, I stood beside the bed and discoveed that Gestapo agents had spent the night beating the backs of my legs with iron bars. What was more disturbing, my entire head was becoming liquified.

"Whole head seems to be undergoing watery meltdown, eh?" remarked the "Stay well covered up and don't catch doctor I'd picked at random out of the Yellow Pages. "By George, you might be a candidate for the first head transplant. Could make us both famous if it worked. Even if it didn't I'd get a lot of ink for pioneering a process that's bound to come sonner or later."

> At this stage I was perfectly willing to try a head transplant. "Tell me something more about your symptoms," the doctor said.

> I told him the Gestapo had beaten the backs of my legs through a thousand-

"Sounds to me like it's just a cold," he

Just a cold? I was willing to undergo a head transplant, and he called it just a

"I'm offering to put my head in your hands," I said. "If it works you will go down in the annals of medicine as the man who discovered the cure for the common cold."

Sorry, he said. Nobody in medicine had been interested in the common cold in the past 30 years. If his colleagues caught him working on it, he would be laugh out of the profession for pursuing unglamorous research.

"Just suffer agony for a few days and you'll soon be good as new," he said.

In mid-afternoon my head abruptly stopped gushing away through eye slits and nostrils and an immense but invisible chain was suddenly cinched tightly around my chest. Death seemed imminent. I was gasping for a final breath of air when a research professor of medicine, an old friend of mine, dropped in for a chat.

"Of course you feel like you're dying," he smiled, "but, statistically speaking, death in these cases is very rare." While I went purple with coughing, he chatted about the latest developments in genetics. Did I know, for example, that by putting a rat gene into a mouse, science could now produce a mouse twice as big as mice normally are?

I offered him a chance to help mankind. "Take a gene from a mouse with a head cold and put it in me," I urged, "and maybe you can produce a man with a cold 10 times smaller than he used to get."

"In medicine," he explained, "Nobody gets the big ink for work on the common cold. Just take a couple of aspirin and get

LETTERS TO THE EDITOR

To the editor:

Early last semester, the College of Engineering began its search for a new dean. Since that time the field has been narrowed to four finalists who will be visiting the campus during the next four

On this visit, the candidates will meet with the interim dean, the search committee and members of the administration, as well as the faculty and students.

I emphasize students because the engineering student body will have the opportunity to ask questions of each of the candidates, and hear the candidates' views on issues regarding engineering education, in general, and at Texas Tech, in particular, as the candidates visit the campus.

I would like to encourage the students to attend these meetings with the candidates. After all, the students do have some voice in the selection process and a vested interest in the next appointee.

The first dean's candidate, Anthony L. Hines, will be free to speak to the student body at 1:30 p.m. Tuesday in the I.C. Lankford Lab in the new wing of the Electrical Engineering Building. Schedules for the remainder of the candidates will be posted in each of the departments. Please attend.

Chuck Graves President, Engineering Student Council and member of the Engineering Dean Search Committee

Editor's note: The following letter is a copy of a letter sent to J. Knox Jones, chairman of the Engineering

I have learned that the search committee for a new dean of the College of Engineering has selected four final candidates to fill the position. While I am glad that progress is being made in locating John Bradford's successor, I am astonished that the interim dean, Jimmy Smith, not even is being considered.

As president of Tau Beta Pi, the honors society for the College of Engineering, I wish to represent the views of my fellow students who feel that Smith made significant contributions as assistant dean under Bradford and has continued his accomplishments as interim dean.

I realize that you prefer a candidate with research credentials, being vice president of research. But consider this: The University Daily ran an article Jan. 27 that stated the College of Engineering had been granted more research funds than any other college on campus. Certainly Smith can be cited responsible for a portion of this allocation to improve engineering research at Tech.

Perhaps "new blood" in the College of Engineering would be beneficial, but I feel that the search committee is mistaken in overlooking the qualifications of Smith as a candidate. I hope that you will consider my view as an engineering student who is concerned about the future of the College of Engineering at Texas Tech.

> **David Hudson** President, Tau Beta Pi

To the editor:

I don't intend for this to be an advertisement, but I would like to make Tech To the editor: students aware they can fight increased service charges and minimum balance requirements imposed recently by a large downtown bank.

After calling most of the banks in Lubbock and the surrounding area, I have come to the conclusion that all but a few are catering to those people who can afford to plop down \$2,500 in a checking account earning 6 percent interest. It a majority of society has adopted. The seems those people with less money subsidize this policy by paying increasingly higher service charges or maintaining

minumum balances for which they are paid no interest.

The notice informing me of the charge (to be effected less than two weeks after ting responsibility for our actions. Let's the notification) reads, "we, like make no mistake about the issue, aborthousands of businesses across the na- tion is the destruction of life. Ration and countless other financial institu- tionalistic man, having given up the tions, have had to re-evaluate our pro- methodology of antithesis (if a thing is duct's pricing structure" (my em- true, the opposite is not true), has forced phasis). How long will inflation have to to a non-unified concept of knowledge, remain at 3 percent before sellers agree and a resultant total antithesis between to stop inflating the prices of the pro- rationality and meaning. Through synducts they sell (re-evaluate their pro- thesis (the combination of the partial ducts' pricing structures)?

Many of us believe that when prices generally go down, re-evaluation should bring a lower price. Many of us also believe that whenever higher price structures are put in place, they are immutable. Inflation has taught us as a nation one thing, and the sellers know it:

"If people believe that inflation is inevitable, we can raise prices at will and blame it on the bugbear inflation," and the people do not let them down. Imagine what would happen if a large block of buyers said, "No, the price is too high," and voted that way by not spending their money at that place.

The defeatist answers, "Yeah? Where else are you going to go?" This once, I can say that there is an alternative. There still is one bank in Wollforth which offers no service charge and no minimum balance requirement for Tech students, the convenience of an automatice teller machine (ATM) without charge (the downtown bank has found it necessary to impose a 25 cent fee for each ATM withdrawal or transfer and a 5 cent fee for simply inquiring of the machine your present balance) and deposit by mail or ATM. The ATM has locations throughout Lubbock

I am not associated with the bank to which I am transferring my money, but I sure would enjoy seeing people who are trying to offer a better product rewarded for their efforts. Remember how all this started? Banks came to you asking you to put money in them so they could make money off of your money. We are about to lose that distinction if we remain compliant.

David L. Nelson

A friend of mine recently found a clipping that depicted an abortion clinic. Along one wall of the reception room were dozens of aborted fetuses simply hung as ornaments and decorations. This concerns one of the lowest degredations imaginable: not only does it serve to lessen our concept of self-esteem, it becomes a reflection of the attitudes that

are meaningless. The American novelist Henry Miller is

RED ALERT!

attitude being that life and its pursuits

only an example of the nihilism that surrounds us. Miller is an anti-law writer. He smashes everything to pieces so that there is nothing left. Even sex is smashed. Man is reduced to a machine; man becomes only a zero, and nothing has any real meaning. I am nothing - one particular among thousands of particulars. No particulars have meaning, and specifically man has no meaning specifically the particular of myself. I have no meaning; I die; man is dead.

We as a society cannot afford to accept the consequences of what those who are advocating abortion accept so easily. Once this happens we begin rationalizing the philosophies of Fascism, thereby eliminating the crippled, the weak and the destitute. Consistency must be maintained throughout our approach in both theory and in practice. As a society, we'll abort the undeveloped fetus, yet on death row murders, rapists and thieves quietly laugh at capital punishment and our legal system.

Part of adult behavior involves acceptruths of a thesis and its antithesis into a higher stage of truth), we reason that life begins when a pulse appears, or when the thought process begins or when a child takes its first breath. The potential for life begins at the moment of conception, it does not lie in an arbitrary rule or other form of measurement that synthesis would have us acknowledge. Once that potential for life exists, we as individuals must accept our responsibilities or suffer the consequences of our actions.

Following the principles of Judaeo-Christianity: If there is no moral absolute we are left with hedonism (doing what I like) or some form of the social contract theory (what is best for society as a whole is right). However, neither of these alternatives corresponds to the moral motions that men have, nor to what men mean when they speak of morals. Without absolutes, morals as morals cease to exist, and humanistic man starting from himself has failed to find the absolute. We would say to the man who would destroy a romantic concept which has no base, destroy it indeed. But as individuals, we start with a personal beginning and therefore there is intrinsic meaning to personality, my personality, and other men's personality.

Stephen C. Folkerts

To the editor:

As I read through The University Daily, I was enraged once again over the large number of destructive, irresponsible children who have been turned loose on the Texas Tech campus. Every time I read about a group of these children destroying property on or surrounding the campus, I can't help but think these kids need to be back at home with their parents. Apparently they haven't learned to respect the property or rights of others, something that usually comes with maturity.

Throwing snowballs at each other is one thing, but when it comes to the amount of damage that is done, it becomes another matter entirely. This kind of behavior reflects poorly on the entire campus. Are Tech students so bored that they must resort to destruction for their "innocent fun"? And why are the University Police so ineffective?

NEWS BRIEFS New storms to hit Cable-car accident kills seven California today

By The Associated Press

LOS ANGELES - Californians filled sandbags and cleaned up debris Sunday during a brief sunny break in a series of punishing storms that killed at least 11 people and caused more than \$71 million damage.

The fifth storm in nine days, due to arrive later in the day, was expected to be milder than last week's fierce storms, but forecasters said yet another front brewing at sea was likely to slam the coast today and mark the beginning of yet another week of natural violence.

"We've been walloped by a storm every 30 to 36 hours since Jan. 21, and it looks like the pattern's going to continue through Thursday at least," said Glenn Trapp, lead forecaster for the National Weather Service in Redwood City.

Sunday's storm was expected to pass mainly through Northern California. Trapp said the storm expected today or Tuesday could dump up to 3 inches of rain along the coast with a potential for gale force winds up to 48 mph.

The weather service said problems with a faulty satellite which does not allow storms to be tracked during the night have resulted in uncertainty about the force of the next storm.

Preliminary figures from the state Office of Emergency Services showed 11 people kill-

ed in last week's storms, 33 homes and one business destroyed, 3,528 homes and 539 businesses damaged and more than 2,252 residents temporarily displaced.

One more home declared unsafe in Malibu Sunday brought to 15 the number of homes in that seaside community barely clinging to the beach, Los Angeles County sheriff's Sgt. Merlin Poppleton said. Four Malibu houses and the Paradise Cove pier were destroyed during the storms.

The fishing pier at Pismo Beach in San Luis Obispo County was leaning but still standing Sunday, police dispatcher Shery Lange said. The pier was one of many damaged piers, including the well-known Santa Monica pier, which was damaged

heavily. Many residents spent Sunday trying to undo some of the damage wrought by wind, rains and high tides that combined to rip apart piers, pull beach homes into the sea and flood low-lying areas.

Red Cross volunteers distributed mops, brooms, scrub brushes, buckets and disinfectant in Orange County, spokeswoman Debby Buckalew said Sunday. The storms had caused about \$11 million damage to homes on Sunset Beach, Surfside and Seal Beach.

The Red Cross sheltered six families overnight, but closed down its emergency center because people did not want to stop working on their homes.

compared to 13,320 pounds in and commercial airplanes full the two-year period. of marijuana have been inin Houston, said marijuana 1981. Majority of inmates drank before committing crimes

By The Associated Press

WASHINGTON - Nearly one-third of state prison inmates in a pioneer federal survey said they drank very heavily just before committing the crimes leading to their imprisonment, the Justice Department said Sunday.

And 25 percent of the prisoners participating in the first nationwide survey of alcohol use by criminals reported drinking heavily each day during the year preceding their crimes, the department said.

"Applied to current prison population levels, this would mean that approximately 100,000 inmates had been drinking heavily every day or nearly every day during the year before confinement," the department said.

The heaviest drinkers were found to be repeat offenders, burglars, rapists and those convicted of assault, according to "Prisoners and Alcohol," a bulletin issued by the department's Bureau of

Museum interviews begin today

Two candidates for director of The Museum of Texas Tech University and chairperson of the Department of Museum Science will begin interviews on campus today.

The candidates are Clyde Jones, interim director of the Tech museum and interim chairperson of the Department of Museum Science at Tech, and John Mahlmann, chief executive officer of the National Art Education Association in Reston, Va.

The candidates were selected from 19 applicants by a search committee headed by Idris R. Traylor Jr., director of the International Center for Arid and Semi-Arid Land Studies.

Public hearing on alcohol set

The South Plains Association of Governments will have a public hearing in Lubbock County to obtain views concerning the most significant needs of alcohol abusers, alcoholics and their families.

These needs and concerns will assist in developing the 1983-84 Regional Alcohol Abuse Plan.

The public hearing will be at 7 p.m. Tuesday in the conference room of the South Plains Association of Governments, 1709 26th St.

Activities Fair begins today

An Activities Fair will take place in the University Center courtyard from 9 a.m. to 4 p.m. today and Tuesday. The fair is open to all students at no charge.

Any student organization wishing to participate in the Activities Fair may apply at the UC Activities Office, 742-3621.

Blood drive today in BA

The Business Administration Council will sponsor a blood drive between 8 a.m. and 6 p.m. today in the rotunda of the BA Building.

Donors of all blood types also are needed at United Blood Services blood center, located at 415 Ave. R. Blood center hours are 9 a.m. through 6:30 p.m., Monday through Friday.

UC offers locker rentals

The University Center is offering locker rentals on a long term or a per-use basis. The lockers, located in the UC, are accessible during UC business hours.

For more information, telephone the UC main office at 742-3636.

Girl Scout cookies on sale

Girl Scout cookies will be available at the Ex-Students Association Building between 8:30 a.m. and 4:30 p.m. weekdays for the duration of the Caprock Girl Scout Council cookie sale.

UC offers half-price pool

The games room in the lower west side of the University Center is offering half-price pool, snooker and billiards today through Sunday.

CAMPUS BRIEFS Literature Symposium discusses women

By JERRI McCRARY University Daily Reporter

Women may have come a long way in modern society. But in the world of science fiction, women are nothing more than helpless, oppressed creatures.

science fiction and fantasy said. literature was discussed last Wednesday through Friday by leading science fiction authors and critics during the 16th An-University.

posium was "Women Worldwalkers: New Dimensions in Science Fiction and Fantasy."

missing in Vietnam

By ROBIN FRED University Daily Reporter

Southeast Asia still are not France. accounted for, the president of Operation MIA/POW said recently.

senior Joey Doyle told a small group Thursday, on the 10th anniversary of the of those missing in action Paris Peace Accords, that almost 1,300 of those 2,500 men were known to be in enemy hands at one time. He camps. said he believes the Socialist Republic of Vietnam (SRV) knows the whereabouts of at least some of the men.

"I'm not naive enough to believe the Vietnamese cannot account for that many people," Doyle said.

The U.S. government spent \$190 million (\$3.4 million per hostage) in a failed attempt to release 52 American hostages from Iran in 1980 but has spent only an average of \$70 per man to locate missing Americans in Vietnam, he said.

Doyle said \$3.25 billion promised by former President Nixon to the SRV never was delivered, and the SRV now might use those missing

Americans as a bargaining chip with the United States.

About 1,600 Frenchmen Ten years after the sign- waited 15 years to return ing of the agreement that home after France ended its ended U.S. involvement in involvement in Indochina in the Vietnam war, more than 1954 and were returned only 2,500 Americans in after an agreement with

"French soldiers were used as bargaining chips in the 1950s and 1960s," he said, Texas Tech University "so why couldn't Americans be used in the 1980s?"

Doyle said although many probably are dead, he believes many still may be alive in Vietnamese prison

All but 10 of the men now unaccounted for have been classified by the U.S. government as "Presumed Finding of Dead" (PFOD) instead of "Missing In Action" (MIA), he said.

Doyle said U.S. citizens should become more active in trying to accomplish the return of Americans, alive or dead, from Vietnam by writing elected officials or the Vietnamese government. He said family and friends have a right to know if those missing in Vietnam

are alive or dead. "Family members especially deserve to know the answers to their questions," he said.

Americans listed as Darnell at helm of Lubbock DA office

By DAVID LEARY University Daily Reporter

New Lubbock District Attorney Jim Bob Darnell said he misses the courtroom but likes the administrative duties that go with his new job.

"I can see the end product of my work a lot better now," Darnell said. "But (the job) requires a lot more preparation and your stomach and nerves can sure take a beating.'

Darnell, who took office in January, said he has been evaluating personnel and procedures within the district attorney's office in trying to streamline its operations. As a result of his increased administrative chores, Darnell

said he anticipates spending less time in court, probably handling one case a month.

because they're the cases that get the most media exposure and people expect the DA to try them," he said.

A major change Darnell is making within the district at- decide.

Ithink you'll definitely see the drinking age kicked back up to 21. - Darnell

"I think the DA should handle the major cases that come up torney's office is revision of the plea bargaining system. He said is he formulating new guidelines for plea bargain offers he said will be more consistent with what juries would

"I think a common misconception people have of plea bargaining is that a lot of criminals are getting off easy. But without it (plea bargaining) we have to increase the paper work and personnel, so it's really a question of cost."

He said he has been in contact with state Sen. John Montford and state Rep. Nolan J. "Buzz" Robnett, both of Lubbock, trying

to work with them on remedies to specific crime problems. Darnell said he would like to see all persons convicted of murdering children under age 14 be given an automatic death penalty. He also said he favors disallowing probation for crimes such as murder, aggravated rape and aggravated robbery. Darnell said he supports stricter laws against drunken

"That's a hot issue right now. I think you'll definitely see the drinking age kicked back up to 21 and possibly bar hours reduc-

"You've got to remember that a lot of the people involved in drunken accidents are young people. A law like this would benefit them as well as others."

Legendary performer taking blues message to people

Hochie Coochie Man

Big Willie James Dixon pumped his songs as "Seventh Son" and "Little young. He began his profesarms, slapped his bass and sang such Red Rooster".

By RONNIE McKEOWN and KENT PINGEL University Daily Lifestyles Staff

When 68-year-old Willie Dixon took down his walking cane and headed out on the road recently, he had one mission in mind: taking a music and an attitude called the blues to the people of America.

"Most people have the blues - whether they're young or old — sooner or later," Dixon said in an interview preceding his performance at Sir William's Club Friday. "You get 'em and find somebody who's able to relate the type of life you live, things you've experienced and things you've suffered over a period of

"Naturally, you agree with them and admit that you have some of the same feelings. It gives inspiration to know you're not alone in the world in what you're doing," Dixon

The rotund musician seems to embody the look in his song 'Built for Comfort (I Ain't Built for Speed)." As he sat very comfortably in his wooden chair talking about what the blues meant to him, Dixon's form tapered out from his shoulders to his hips, not unlike the shape of the upright bass he uses to slap out his

Dixon ought to know about living and singing the blues. He was born in 1915 in Vicksburg, Miss. He was one of 14 children in the family raised on a farm. He worked with local spiritual groups on Saturday nights when he was sional music career in 1937 in

the blues capital. Chicago.

DIXON LEARNED the str- music business. ing bass and began working he formed his own band, the Big Three Trio. The Big Three Trio played clubs in the albums on Columbia and on then worked for Chess said. Records as a producer, composer, talent scout and arranger.

known as a major catalyst of terms just to be able to surblues music. He had written such songs as "Seventh Son," On Home," "I'm Your country blues bands at the Hoochie Coochie Man," "Little Red Rooster." "You Shook Me" and "You Can't Judge a Book By Its Cover."

Dixon has worked several years to promote the blues all over the world, through European tours, television appearances and several blues the blues because, Dixon said, revival performances.

moting the art form has been ing enough credit to the blues. his music. Many singers have covered versions of the rect this problem through an songwriter's musical art. The Rolling Stones have done "Little Red Rooster," Muddy Waters recorded "Hoochie to preserve the blues heritage, Coochie Man," Foghat redid "I Just Want to Make Love to You" and George Thorogood tists. The foundation plans to covered "The Same Thing."

"Had these fellows not done the music in one way or another, we'd never made retirement center. what money we had," Dixon

the royalty money from his his early career, Dixon wasn't

with the Five Breezes. In 1946 in the early days I didn't get any royalties for because I wasn't aware of all the facts of music. Not being aware, then Midwest and recorded three you know everybody's out there ready to take advantage OKeh labels through 1952. Dix- of you if they could," Dixon finally earned a tax-exempt

"IN ORDER TO SURVIVE myself and my family — I had to do a lot of things like get At this point, Dixon was rid of some songs on cheap vive," he said.

In the '30s, Dixon sold many "Back Door Man," "Bring It of his early works to passing rate of \$15 to \$20 outright with no royalties. Dixon said he has been able to recoup many of the songs since that time and he now has his own publishing

His songs haven't been enough necessarily to promote a lot of the artists making But his best work in pro- money on the songs aren't giv-

Dixon is attempting to cororganization he calls The Blues Heaven Foundation. The organization is designed offer assistance to old blues artists and educate young aroffer music scholarships and instruments for the underprivileged as well as set up a

"Being a blues artist makes it much harder to live. I know Dixon hasn't always earned from experience," Dixon said. "If you go to this place and lengthy list of song credits. In say, 'I want credit,' they say,

you say you're a blues musi-"A lot of those songs I made cian, it's like why did you even

come here in the first place." Dixon said Blues Heaven Foundation has been in the planning stages since about 1958. But Dixon has been working with the idea and has status for his organization.

DIXON BEGAN PUSHING the foundation on a trip he made to Washington, D.C. As a special introduction to the people in power there, he handed out copies of a single and performed a song at the Smithsonian Institute. The song was "It Don't Make Sense (You Can't Make Peace)."

"(The song) was just an idea to let the president, the Congress and the people of authority know what a majority of the public felt about the world and peace," Dixon said.

Dixon said the blues make true statements about life, and this new song is no exception. With the lyrical strength of his early material, Dixon got a standing ovation Friday with his performance of the lyrics, "You can take one man's heart and make another man live, you even go to the moon and come back thrilled, why you can crush any country in a matter of weeks, it don't make sense you can't make peace."

"Blues are the facts of life anyway," Dixon said. "Most people don't realize this because the blues are so old. They started singing the blues way back in slavery days 'What do you do?' If you say because of the feeling, inspiramusician, you can tion about what was going on.

to give you a message and tell the truth at the same time. Times change and people get involved in other things."

Dixon's performance at Sir William's verified his dedication for the blues. He counted in each song with his band The Chicago Blues All-Stars (including two of his own 14 children) by pumping his arms, then swaying and clapping before lending his deep voice to songs "You Shook Me," "Built for Comfort," "Pie in the Sky" and "Little Red Rooster."

THE CROWD'S WHOOP-ING YELLS of appreciation filled each gap in his songs, showing the mutual relationship Dixon believes is inherent between the blues artist and the audience.

Dixon's performance was a great promotion of the blues. He is playing many stops on ais current tour of the Southwest. With walking cane n hand and a sense of commitnent in his soul, Dixon is epaying the art form he nelped develop.

Dixon's parable on the blues showed his simple reason for taking his blues to the road:

"If you plant one seed, it grows up to be other things. If you just put one grain of corn in the ground you get only one stalk. But on that one stalk you get several ears and sometimes you bring in a lot of corn. Same way with blues songs — sometimes with one song you get a lot of corn if it's

With 41 seconds left and Tech holding on to a safe-as- eight and a dimly lit purgatory for the Bears. quicksand two-point lead, Quentin Anderson stepped to the free- From the ball handling of Bubba Jennings to the clutch They ran step for step with Reynolds, jabbing again and again in throw line with 5,800 fans making Heart O' Texas Coliseum shooting of Anderson, David Reynolds and Vince Taylor, the vibrate like the Rolling Stones live. And how did the first-year Raiders never lost heart. They never quit. And it paid off. The starter respond? By erasing the memory of two earlier missed victory, the first win on the road for Tech in 13 tries, leaves the free throws and sinking both shots.

And so, the Baylor Bears became the latest in the increasing much alive behind the SWC powers.

Tech defeated Baylor 58-57 Saturday night. Who are these Raiders anyway?

Coach Jim Haller's Bears certainly had no clue about Tech's WACO - It all boiled down to two free throws by an unherald- identity, save the extra-terrestrial footprints the Raiders left on ed player who rarely set foot on the court last year for Texas their backs. You see, the Bears made a fatal mistake Saturday Tech University. That is, after the Raiders went to the free- night before the contest ever began. The Bears took for granted throw line 19 nerve-wracking times in the last five minutes with a Tech team without a dominating center and two sharpshooting their collective backs against the wall. And you wonder why guards. Funny thing is, that Texas Tech team played like it had

string of last-minute victims claimed by the upstart Raiders, as But that doesn't mean there weren't a few nervous moments were not moving. We were sleepwalking."

for Myers and Co. Like about the entire 20 minutes of the second

After leading 26-25 at the half, the Raiders relied on the outminute mark of the second half.

But it was here the real game began. Baylor seemed to remember its 33-point victory over Texas earlier in the week and realized just what's supposed to happen on a basketball 5:20 mark of the second half. They double-teamed Jennings. hopes of a turnover. But Baylor's intensity proved its downfall as the Bears got into foul trouble and felt the burning singes of blocked an inbounds pass from 5-6 Baylor guard Ronnie Blake. Tech's 74-percent shooting from the line.

"We told the players that Tech was a good free-throw shooting team," Haller said. "We shot 35 percent (in the first half) and

Indeed. Not even Mr. Sandman could have brought the Bears out of their slumber.

Baylor bounced back following four Tech free throws by side shooting of Reynolds (high-point man for Tech with 21) and Reynolds and Taylor as Shakir hit one of his own and Baucham Taylor, who combined for 10 of Tech's 18 points before the five- sank a 20-foot jumper to cut Tech's lead to two at 55-53 with one minute remaining.

The Raiders broke the Baylor press, but the Bears quickly found the man they wanted to foul - Anderson. Haller called a time out to give Anderson just that much more time to think. But In the end, Heart O' Texas became heaven for Myers' band of court. Haller's Bears began an intense full-court press at the the tactic didn't work, as the Alabama native sank both shots. Tony Benford, not to be left out of the fun, hit a free throw of his own with 23 seconds left to preserve the victory.

Anderson foiled the Bears again on the game's last play as he

The win came at a good time for the Raiders. After the heartbreaking loss to Arkansas and with Texas A&M on the slate today. Tech needed a victory in the worst way. And thanks to Daryl, Dr. J., Magic - and Quentin - they got it.

Riggins carries Redskins to 27-17 win

Naulls (6-4), Jimmie Gilbert (6-9), Roy Jones (6-7), Claude

Riley (6-10). TV: Tanner, Channel 34 Radio: KEND, KLBK, KTXT

TEAM NOTES

TECH — Finally won its first road game of t Baylor at the Heart O' Texas Coliseum ... Won both games from the Aggies last year, by scores of 68-64 in College Station and 91-82 in Lubbock ... The A&M game is the last contest before the first half of SWC play ends ... Got 21 points from David Reynolds Saturday night, but it was Tony Benford's only point of the game, a free throw with 23 seconds left, that provided the margin of victory ... Bubba Jennings has been in a scoring slump of late ... Vince Taylor has had two good

TEXAS A&M - In sole position of fourth place in the SWC after a 12-point victory over Texas in Austin Saturday ... Guard Tyren Naulls scored 14 of his 20 points in the second half as the Aggies overcame a 28-27 halftime deficit ... Posts Jimmie Gilbert and Claude Riley pulled down 18 rebounds between them and Gilbert had five blocked shots ... Coach Shelby Metcalf is the winningest coach in number of SWC victories. He had 180 during his 20 years as the Aggie mentor . A&M had eight steals while committing only seven turnovers Saturday

Don't count out 'Killer Frogs' yet

By The Associated Press

Don't kill off the "Killer Frogs" yet in the Southwest Conference championship basketball race.

With the first half of the season history for Texas Christian, the Horned Frogs posted a 6-2 record — good for at least third place.

The Horned Frogs survived Southern Methodist 68-67 in Moody Coliseum Saturday to complete the midway point of the season.

Houston, which is 7-0, and Arkansas 6-1, were idle Saturday and have at least a game apiece left in the first half of the campaign.

Arkansas, which played at Wake Forest Sunday in a non-conference game, completes the first half of its season Wednesday by hosting hapless Rice. Houston hosts Baylor on

Wednesday and plays at Texas A&M next Saturday on regional television. A & M could be

troublesome at home for the

Cougars.

The Aggies edged into fourth place Saturday with a 64-52 victory over Texas at the Super Drum behind

Tyren Naulls 14 second half

For TCU, it was the Frogs' sixth consecutive victory over SMU.

"This was our most nerve racking game of the season," said TCU Coach Jim Killingsworth after Darrell Browder's 20-foot jumper with 12 seconds lft had beaten the Mustangs. "The game was anybody's

"We wanted Darrell to get his best shot. He sure took a tough one."

It was the fourth consecutive loss by the Mustangs to TCU in Moody Coliseum.

"Beating them four years in a row in Moody really feels great for me," said Browder, who had a gamehigh 18 points. "I think those points at the end of the game were more meaningful to me than any of the other 1,600

points I have scored at TCU. "I told the team during the last time-out that I really wanted the ball in that spot. Our offense if or everyone but I really like to get the ball in that situation because I never think about missing

Browder has averaged 19 points in his career against

A shot at the buzzer by SMU guard Butch Moore fell away to give TCU the win.

sixth position host first round tournament games. FORWARD WANTS

Raiders challenge Texas A&M today

By MIKE McALLISTER University Daily **Associate Sports Editor**

Coming off its first road victory in 13 tries, the Texas Tech University men's basketball team will try to make it two in a row tonight as the Raiders travel to College Station to take on Texas A&M University. Game time is 7:10 p.m. at the Aggie madhouse, other-

wise known as G. Rollie White

Coliseum. Coach Gerald Myers' Raiders took their first step towards securing a homecourt berth in the SWC Post-Season Tournament by beating Baylor University 58-57 Saturday night in Waco. Tech previously had lost six games on opponents' courts and six games on neutral

Despite the win, the Raiders still are in an awful shooting slump, hitting only 35.8 percent of their shots Saturday. The Bears, though, could make only 44.7 percent of their shots, something Myers cannot expect to see tonight.

That's because the Aggies shot 67 percent from the floor

in their 64-52 win Saturday night over the University of Texas. The final score would have been by a wider margin if A&M hadn't missed 15 freethrow attempts.

Texas A&M is 10-10 on the year and 4-3 in SWC play. The Raiders are 6-14 and 3-4 in the conference, and if they can win today, they will have surprised a lot of people by playing .500 ball in the first half of SWC play.

The Aggies are led by guards Tyren Naulls and Reggie Roberts. Naulls, a transfer from UCLA, scored 20 points Saturday while Roberts, who once rejected a Jeff Taylor dunk shot, added 15.

Forward Claude Riley has not played up to expectations. Although he scored 13 points Saturday, many people who expected the 6-10 senior to be an NBA first-round pick are disappointed at his lack of domination in A&M's games.

After Monday's game, the Raiders will have five days before they start the second half of conference play Saturday night against Southern Methodist University.
