# Regents approve eight-part water use plan

By ROBIN RYNN CHAVEZ University Daily Reporter

table beneath the Texas Tech campus while finding an efficient use for available water resources was ratified Saturday by the Tech Board of Regents.

The recommended budget for the project, which will be paid for with money appropriated by the Texas Legislature, is \$750,000. The board selected Parkhill, Smith & Cooper, a local engineering firm, to design a water management system based on an eight-part plan developed by Tech's water management director Marvin Dvoracek.

water levels beneath the campus, protect existing buildings and reservoir is to enhance use and management of sewage effluent. structures, maintain ground water levels at a "safe" level and Total storage capacity will increase to about 70 days' storage A water management plan designed to curtail the rising water manage all water resources available to Tech, including ef- and will reduce the frequent overflow situations previously fluent from both campus and city sewage, efficiently.

The plan recommended a new 30-million-gallon sewage effluent reservoir, six more observation wells, two "dewatering" wells (one near Memorial Circle and the other near the Student Recreation Center), enhancement of water monitoring groundwater. The plan also recommended a study of the feasibility of using that water in cooling towers and the addition of more employees.

The overall objectives of the plan are to lower the ground 
The purpose of the new 30-million-gallon sewage effluent

Planners believe the addition of six new observation wells will create a better and more representative network for water management, both qualitatively and quantitatively. The proposed locations for the wells are essentially along the south propercapabilities and a study of the quality of Tech's wastewater and ty line of Tech where no means for water level measurements

> The primary purpose of the dewatering wells is to obtain an overall lowering of the water level beneath the campus. Water

pumped from these wells would be used for lawn irrigation near the sites.

A study to determine the feasibility of using Tech's water resources for cooling tower makeup water, thus reducing the level of water purchased from the city of Lubbock, is included in the plan. If the study shows the plan would be feasible, a well field, collection and treatment facility would be designed and constructed to switch the water source for Central Heating and Cooling Plant 1 cooling tower water from the city to Tech's own water resources.

Tech officials originally asked for \$1.47 million from the state for the project, but Gene Payne, finance and administration vice president, said he believes the new budget will be adequate.

# Town's residents oppose moving church to Tech

By JEFF EUBANK University Daily Reporter

Plans to move a 73-year-old church building from the small Texas town of Mentone to the Texas Tech Ranching Heritage Center have some of the 12 townspeople upset, but an official with the center said last week he was unaware of opposition to moving the church to Lubbock.

"We (Ranching Heritage Association) thought the people of Loving County were favorable to the idea," said Alvin Davis, Ranching Heritage Association executive vice president. "They did not make known any opposition to the move.

"The first mention of the opposition came when we traveled to Mentone to give a program about the Texas Tech Ranching Heritage Center, and give the purpose and intent for moving the church," he said. "We were only there to present a program. It was not a decisionmaking meeting."

Davis said a majority of the people present at the program wanted the church moved. Others were in favor of the move if the church is replaced by another building.

Two Tech Ranching Heritage Association supporters have agreed to finance a new building for the citizens of Mentone, Davis said.

Sissy Keen, who helps run the only cafe in the small desert town of 12, is adamantly against moving the church.

"I am very much against the move unless Tech has another building ready to put down when they move our church," Keen said. "I want to see the church stay on home soil. We have very little in this town, and we do not need another vacant lot. We use the church often for candlelight services.

"I would not agree to using the school as a replacement for our church. The school is for teaching kids reading and arithmetic, not worshiping God," Keen

Davis said he does not think sufficient need exists to replace Mentone's only church building.

"The church is hardly used now," he said. "Also, there is a vacant school building in Mentone that could be used instead of the church.

"It would be different if the townspeople ever used the church," Davis said. "I am a church-goer, and if the church was used for church services I could really feel for them."

The Loving County Commissioners Court will make the final decision about moving the church, Davis said. The move should come in the next several months if the go-ahead is given.

Keen said she plans to attend the commissioners meeting with her stepdaughters and anyone else she can persuade to attend in order to protest the church's removal.

"It would be nice if the decision were mutually good for everyone involved,"

## Syrians accused of attempting to divide Lebanon

By The Associated Press

BEIRUT, Lebanon — Druse leader Walid Jumblatt set up a council to administer Chouf province, and an adviser to President Amin Gemayel Sunday accused Jumblatt's Syrian backers of plotting to split Lebanon into separate

Christian militiamen, meanwhile, freed about 200 Druse women and children after several weeks' captivity.

Jumblatt announced Saturday that he was forming an eight-man "civil administration committee" to run the dayto-day affairs of Chouf province "in the emergency circumstances ... until the return of central government insitutions."

He told reporters in his Chouf mountain home at Mouktara that the committee would later act as a "pressure block" for the Druse in the central government's management of social, economic and administrative affairs.

Farouk Jaber, a political adviser to Gemayel, told reporters after emergency government meetings Sunday that Syria was using Jumblatt to partition Lebanon into cantons, or separate states.

"I believe there is an attempt to partition Lebanon on a canton basis," Jaber said. "The action taken by Mr. Jumblatt falls in the long-term strategy of the Syrian government to extend its hegemony over parts of Lebanon."

Gemayel met with Prime Minister Shafik Wazzan and former President Camille Chamoun, and Chamoun told reporters afterward that he too thought Jumblatt meant to divide Lebanon on the basis "federal cantons."

"The most urgent questions is whether this applies to the Chouf only or to all other Lebanese areas," he said.

"This defies the resolutions of the Islamic confederation (of Lebanese Moslem leaders), which said 'no to federation, no to confederation and no to partition," Chamoun said.

"Those whom he announced as the administrative committee are true sectarians (with loyalties to their religious sects instead of Lebanon)."

The Christian Voice of Lebanon radio reported brief artillery exchanges around the town of Baasir in the southern Chouf mountains Sunday, and Beirut Radio said gunmen kidnapped four internal security policemen and two employees of the state electicity company just south of Beirut airport.

## Counselor says job planning helps

Editor's note: This is the first in a two-part series on careers. Part one discusses the services offered by the Texas Tech Career Planning and Placement Service and the availability of jobs in certain fields. Part two will discuss what employers look for when recruiting and how students can increase their marketability.

By ALISON GOLIGHTLY University Daily Reporter

Although some students are discouraged by the competitiveness of the job market, Texas Tech Career Planning and Placement Service (CPPS) personnel say jobs always exist in any field, no matter how tight the job market. They admit, however, that some fields have more openings than others.

If the job market in a particular area is extremely competitive, that should tell the student he needs to get started sooner so he will be able to find the type of job he is seeking, CPPS Director David Krauss

Students who are trying to find a job in a competitive field should use all the services available to them through career planning and placement, Kraus said.

Many jobs are available in fields such as computer science, electrical engineering, management information systems and accounting, Kraus said. CPPS Assistant Director Gerry

Phaneuf said demand also is increasing for service-oriented careers such as restaurant and hotel management and

Although some students may decide to go into a particular field because of demand, by the time they graduate and start looking for a job the job market may be saturated.

"Enrollment patterns sometimes lag behind demand," Kraus said. For example, about three years ago there was a high demand for geology and petroleum engineering majors, but now the job market is competitive.

Although there also are many openings in education, particularly in math and science, education majors may not be able to be as selective about salary and location as students in other fields, career counselor Mary Simon said.

Because the job market is changing all the time, students must stay in touch with the job market, Kraus said.

The CPPS helps students keep abreast of changes in particular fields by providing a current list of job vacancies.

"Lots of students see us only as a placement service," Phaneuf said. However, the office provides other services to students and ex-students, such

as career counseling, seminars and workshops.

Seminars are open to students in all academic areas. Seminar topics include interviewing techniques, preparing resumes and job-hunting strategies.

"We're helping people develop lifelong skills," Phaneuf said.

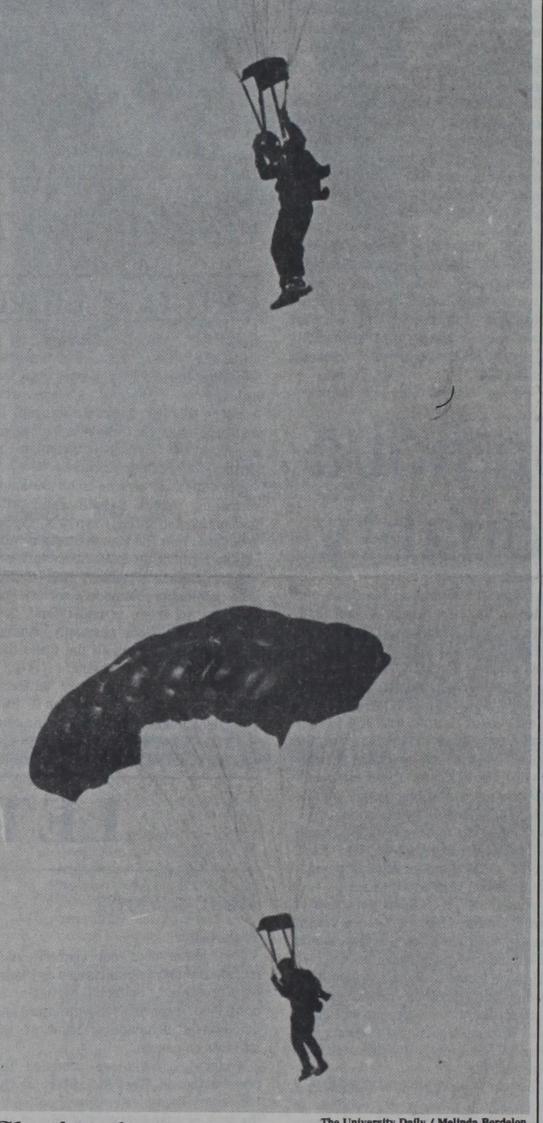

The career planning and placement counselors try to help students recognize

"Anyone within a year or so of graduation should come to the placement office and fill out some forms," Kraus said.

Credential files, which include a summary of past employment and educational background, are established for all students who register with the office. The information then can be provided to any prospective employer. Registered students also have the opportunity to interview with on-campus recruiters.

Normally about 2,000 students register with the office per year, with the percentages of registered students varying in each college, Kraus said.

"We've seen an increase in the past few years of students utilizing our services," Simon said.

Chuting down

The University Daily / Melinda Bordelon

Two U.S. Army paratroops are shown in the final stage of their descent during the parachute demonstration at the Reese Air Force Base open house Sunday. The crowd pleasers managed to land "right on target" in front of the reviewing stands, in spite of high winds.

Sweet Victory

## Tech 3, A&M 0

## Raiders lead the SWC after downing the Aggies

By JOHN KELLEY University Daily Sports Writer

The scene was one that needed to saved. Maybe in a yearbook or at least in the mind. It was something that needed to be remembered, so that 50 years Force 31-30. from now, you can say that you were

The Texas Tech Red Raiders were seen the last two editions of Tech footmoving the football in the simplest of ball easily could understand the situafashions. They took the ball with 3:47 remaining on the clock and called running play after running play. Tech pick- would have been short. Last year, ed up three first downs.

Emotion ran through Jones Stadium like water through a pipe. The coaches were cheering each first down. And it wasn't the smug-type coaches' cheer. These guys were jumping up and down, waving their arms as if they had shelled easily. How many times does a team out \$11 a ticket.

The players could have stepped directly off the field and onto a set to do a toothpaste commercial. And the fans got the best treat of all, watching the Raiders win at home for the first time since Sept. 18, 1982, when they beat Air

With each first down a new emotion came into focus. At first disbelief, then All of it seemed so insignificant, too. joy, then relief. But anyone who had tion. Two years ago, the Raiders would have lost the ballgame - the field goal something would have gone wrong maybe the Raiders wouldn't have been able to erase the last 3:47 from the clock with a sustained drive.

> This year, though, Tech won a game that could have been lost - and lost score three points and win? Maybe the

Raider offense should have scored more. But that wasn't the point. Tech won in spite of a few deficiencies.

The Raiders did get a field goal, and they did run out the clock to defeat Texas A&M 3-0 Saturday night.

"This win is going to help our football team," said Tech coach Jerry Moore. "We have the confidence that we have lacked for awhile, and I see some good things happening for us down the road."

One good thing has happened to the Raiders already - their 2-0 record in league play has them resting in first place in the Southwest Conference. The Aggies, meanwhile, fall to 1-3 on the year, 0-1 in conference play.

## LISD policy bad for all students

#### **ROBIN FRED**

With their policy of prior restraint over high school student newspapers, administrators with the Lubbock Independent School District are making a mistake that ultimately affects the education of all Lubbock high school students.

The policy of having principals read every page of the student newspapers before they are printed allows school officials to prevent students from writing about issues like school prayer and busing. Any subject that might cast a bad light on the schools can be stifled very efficiently when students are not allowed to discuss the topic.

The dangerous practice hurts all students in the Lubbock schools.

Students have a right to know what decisions are being made that will affect them and why those decisions are being made. Ironically, the same high school students who are being told they should learn about the political system in order to be good citizens also are being told that they cannot be trusted with knowledge of some of the political decisions that affect them the most.

But the journalism students, more than anyone else, suffer from being denied the right to report on vital issues. Life is not all a bed of roses, and if the students ever make it into the "real" world of professional journalism, they will not be prepared to deal with the situations they are asked to report on.

The University Daily offers a scholarship program for entering freshmen at Texas Tech who want to obtain some early experience on a college publication. responsible.

This year applications were received from students from across the state but not one Lubbock high school student

That graduates of the Lubbock high schools display no interest in pursuing careers in journalism is not surprising. They have no idea what journalism involves, and they may feel unprepared to work on college newspapers because they have not been allowed any useful experience in high school.

In all fairness, student publications at the high school level should not be completely unharnessed. They should be directed by competent instructors who know what journalism is all about. But they should not be censored by administrators who simply want to keep students ignorant of controversial issues that affect them.

Maybe the administrators are afraid of immature handling of school issues by student reporters. Maybe they are trying to guard against students using newspapers to slander other students by means of gossip columns or whatever.

But in schools as large as the five Lubbock high schools, one has to believe that enough mature, capable students can be found to produce the small papers (with the proper guidance, of course). Surely a handful of students from each school are worthy of a little trust.

If LISD administrators sincerely want to improve the quality of education in the city's high schools, they should begin by assuming that at least some students are capable of learning. Students who are not allowed to take on any responsibility will have a hard time learning to become

## Use of troops in Lebanon should be examined

©1983 N. Y. Times News Service

BOSTON — As the Reagan administration slips this country deeper into the fighting in Lebanon, anyone who wonders whether there are dangers in that process ought to have a look at an important new book. It is "Vietnam: A History," by Stanley Karnow.

Even those of us who think we know something about it will read with fascination and horror Karnow's graphic account of how the United States involved itself in that disaster. Successive administrations took military steps to deal with political problems in a society that they did not begin to understand. And they took the steps gradually, surreptitiously, assuring us all the while that nothing was really changing.

First there were military advisers, then U.S. air bases. On March 8, 1965, President Johnson sent two Marine combat battalions ashore at Danang to protect the bases. The marines began active that year the White House said there had as detached peacekeepers. American been "no change" in their "primary mis- "advisers" in uniform have been seen the United States to appear as the protecsion" of protecting bases — but they did with government forces in the front-line tor of that government holds obvious have "discretionary authority" to support Vietnamese forces. The next month have shelled the Druse militia. Johnson sent 44 more battalions for what was now an American war.

Might we be heading for another Viet- earth. Dozens of sects and parties and nam in Lebanon? Involvement on such a private armies work out their wrath scale seems unlikely. But there is every reason to fear self-inflicted wounds of a lesser but still significant kind, both that same incremental way, accompanied by deceit and ignorance.

The Marines went into Lebanon on Sept. 29, 1982, as part of a multi-national force that was seen as playing a symbolic role. President Reagan said there was "no intention or expectation that U.S. armed forces will become involved in hostilities."

Now there are hostilities, sectarian Maronite government. fighting so severe that Reagan has called it a civil war. U.S. forces have interven-

village of Souk el-Gharb. U.S. Navy ships The politics of Lebanon may be the most complicated and the ugliest on

upon each other. Syria, with a historic interest in Lebanon, has always played a part. Each population group gets outside military and political. For the American help where it can, without compunctions military role in Lebanon is growing in of ideology. Thus in modern times Syria has intervened both for and against the Maronite Christians. The very issue today — the reason for

the fierce sectarian warfare - is President Gemayel's failure to carry out his promise to create a government of all interests. The Druse, supported this time by Syria, are fighting for what they see as survival: protection from a sectarian

# El Salvador economy in serious trouble

By The Associated Press

OZATLAN, El Salvador - A short jet hop from Miami, babies die daily from simple, curable ailments. People live lives without work, without clean water, without electricity or latrines. Families who survive on rice, beans and corn are learning to do without the corn.

And the dismal life of Ozatlan, a mud-wall town in the green uplands of eastern El Salvador, is multiplied hundreds and thousands of times in similar "pueblos" across Central America.

"Things are worse now than when I was a boy," Ozatlan's 43-year-old mayor tells a visitor. "At least then people had work."

The leftist uprisings that unsettle Central America are

## Maine votes Tech computer lab opens

By ROBIN RYNN CHAVEZ University Daily Reporter

The world is changing, and with the dedication of a microcomputer learning laboratory at the library Saturday, Texas Tech has joined the ranks of universities leading the march in what the Carnegie Foundation calls the fourth great revolution.

Lauro Cavazos, Tech president, said the microcomputer laboratory has been a great success since its doors opened

"During its operation, 99 classes have used the laboratory," Cavazos said.

Booking a time for lab use is becoming more and more difficult, however, and the lab already is booked through the Bucy said. second summer session of

#### Freshmen awarded scholarships

Nine Texas Tech freshmen have been awarded \$500 scholarships from the area of accounting in the College of Business Administration.

Scholarship qualifications include high school grade point average, achievement test scores and interest in accounting. Recipients include Rebecca Anderson, Sheila Bailes, Denise Brown, Matthew Buescher, Thomas Reagor, Sabrina Shepherd, Sharon Shoemaker and Donald Venhaus.

### Floods leave seven dead

**By The Associated Press** 

helicopter flying to rescue a mother and baby crashed in five feet of water Sunday, killing two men and bringing the death toll to at least seven as floods from desert rainstorms washed away houses in security state prison east of southern Arizona.

More rain pelted the state Sunday, the day after helicopters plucked people from rooftops in Tucson and Clifton and Gov. Bruce Babbitt declared a statewide of emergency and urged emergency.

Floodwaters from a week of rain poured ceiling-deep through 200 homes in Clifton. Five-hundred people were evacuated in Tucson as roads disappeared under water, and hundreds more people were stranded.

Two Navy crewmen were killed Friday when a bomber went down in a crash that authorities believed was storm-related, and a family of four was washed away after scrambling onto the roof of a pickup truck near Ash Fork. Two bodies from the family were recovered Saturday.

in a Phoenix automobile collision that officials blamed on the rain.

The floods had already left two cities without adequate water supplies, and on Saturday the southeastern Arizona city of Clifton lost electricity, water and all phone service except one emergency line from a sheriff's office, said duty officer Veronica Minch of the state Department of Public Safety in Phoenix.

An unidentified woman an Air Force helicopter.

evacuations, warning the river would swell to 15 times its normal size.

The worst problems were in Clifton and Safford in mountainous southeastern Arizona, in Tucson in the usually bonedry south and in Prescott in the pine forests of northcentral Arizona, according to Babbitt spokesman Jim West. But wide areas were warned of flash floods as runoff from a week of heavy rain tumbled down creek beds.

The Department of Public Safety said a helicopter carrying pilot Thomas P. McNeff, 36, and paramedic Richard G. A woman was killed Friday Stratman, 27, crashed in floodwaters early Sunday as it rushed to aid a woman who had had complications in childbirth in Marana. All roads to Tucson were cut off by the floods, and the helicopter had been sent to take the woman and child to a Tucson hospital.

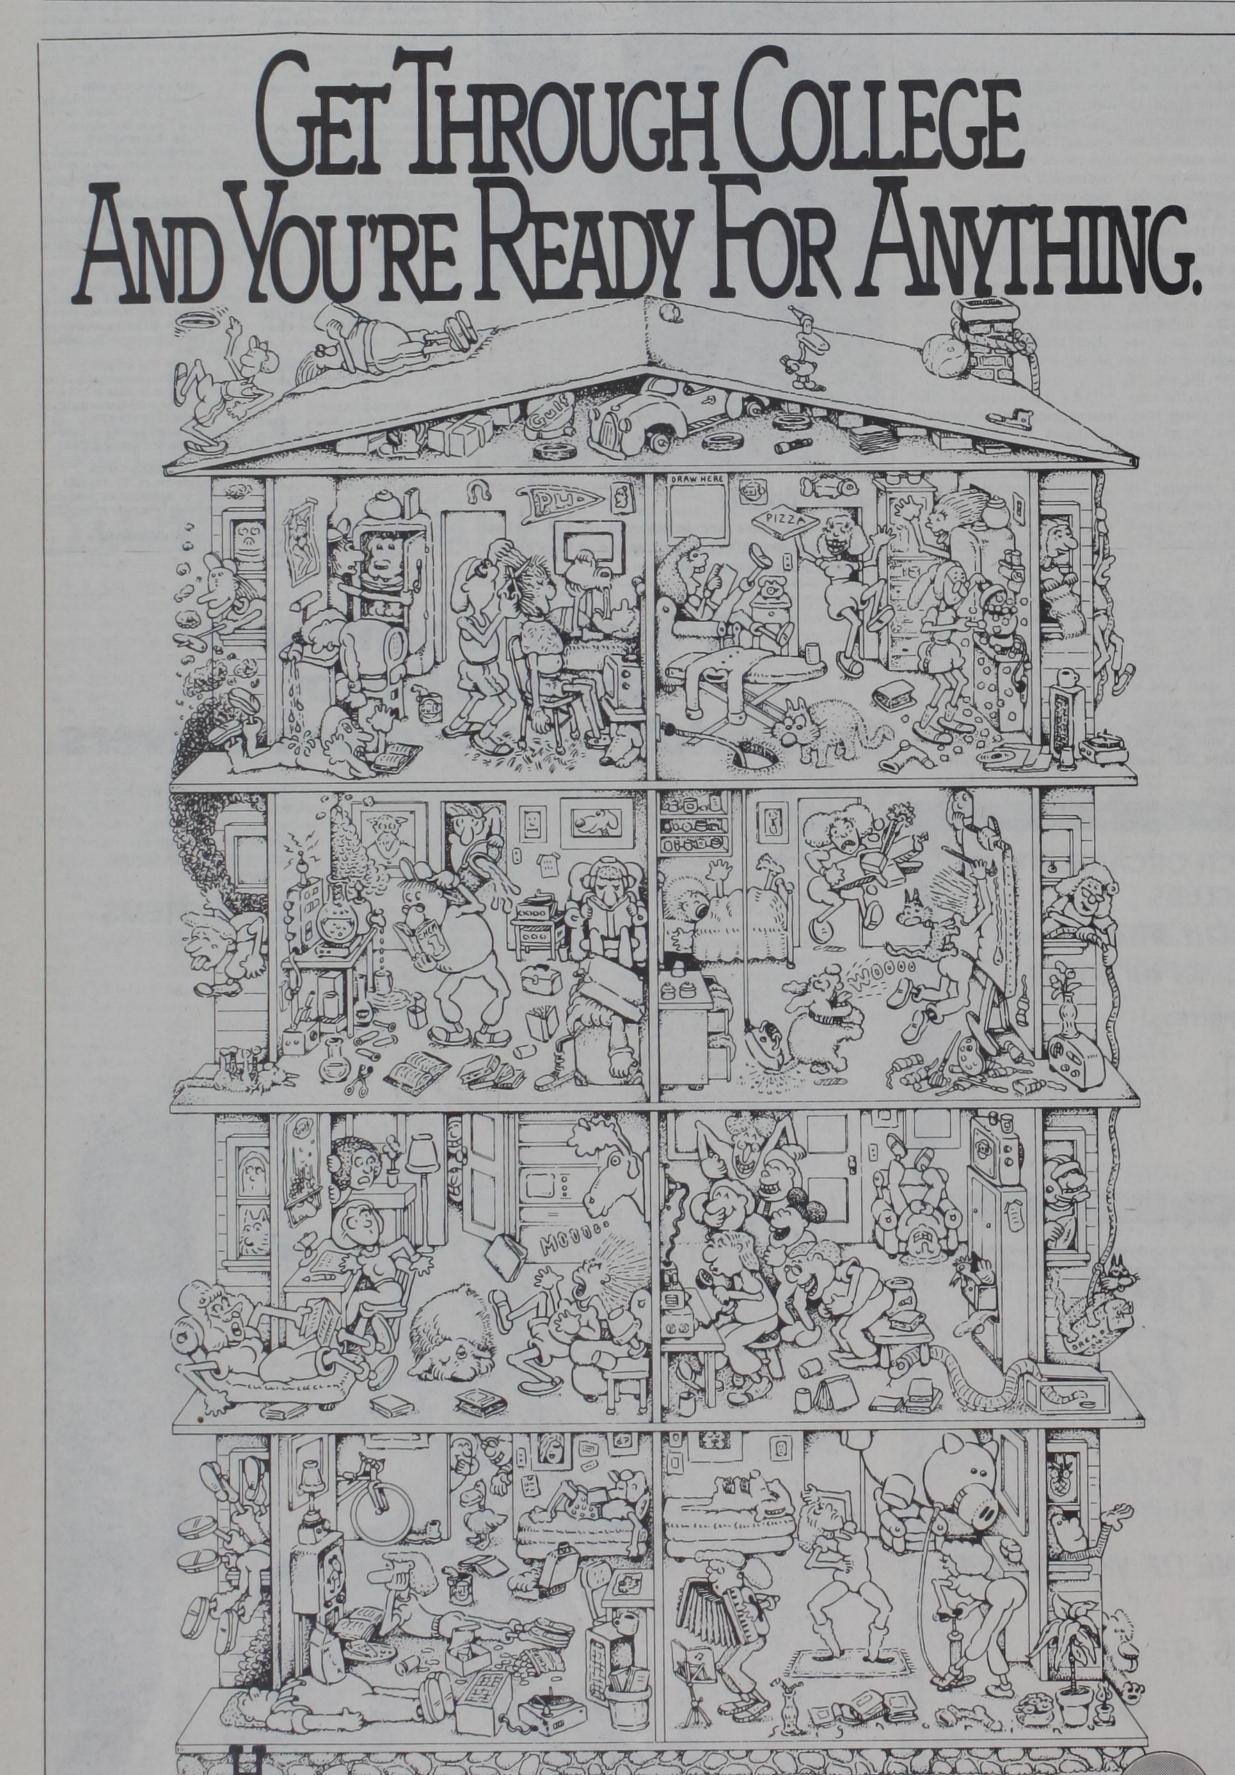

> After the floodwaters receded somewhat, the helicopter was found mired in about three feet of mud and one foot of water outside of Marana by

## Reaccreditation process under way

By DONNA HUERTA University Daily Reporter

Reaccreditation of the College of Home Economics is under way at Texas Tech, and Dean Elizabeth Haley said she is sure the college will have no trouble getting reaccredited.

The first part of the reaccreditation process began in 1981 when the College of Home Economics conducted a selfstudy and compiled the information into a five-volume document.

contained input from faculty, students and alumni about the college and its courses.

A team of visitors from the Council on Professional Development came to Tech last year to conduct an evaluation based on the submitted document. Haley said the team found the College of Home Economics to be in good

"Basically, their report was very, very positive of the college," Haley said.

The team studied the consistency of the internal administration of the college as well as faculty and student concerns and found that the college met all those needs quite well, Haley said.

The report said, "The sitevisiting team found internal consistency among campus administrators in perceptions of the College of Home Economics, and were particularly impressed by the

familiarity of campus ad- college. ministrators with home economics departments, faculty members and aspirations and concerns."

Haley said the team also was impressed by the college's advisory council, made up of alumni and business people. She said the team found that the advisory council is a supportive aid for the future in sent reports on research, to attracting development support from alumni and others.

The team also mentioned that the facilities in the college Haley said the document are up to date, functional, pleasant and conducive to learning, Haley said. The team, however, suggested that the older part of the Clothing and Textiles Building be refurbished.

especially were impressed with the students of the college, Haley said.

The report states, "Overall, students have an extremely positive appreciation for the quality of teaching and advisement, the opportunities for professional growth, the humanistic approach of the faculty, and the physical facility of the College of Home Home Economics has main-Economics."

stating, "Students rate the college as the best home economics program in Texas and one of the best programs on the Texas Tech campus."

put from the students reflects the overall feeling of the see that the college is suffi- college is in good shape."

The team made a few suggestions for change in the college. Haley said the team suggested that the home economics faculty should meet more often as a whole.

"I think we meet more than we realize," Haley said. "We will try to meet more often, though, to allow faculty to prediscuss registration and advisement and to give new faculty members a better chance to have more interaction with the faculty of other departments."

Haley said the team was concerned that the college would have trouble pursuing and maintaining operations and management at The visiting team members reasonable levels. The team members thought the college will need more state dollars to maintain laboratories.

She said the cost of running a nutrition lab is about the same as the cost of maintaining a biochemestry lab. But the funding for the two labs at Tech are much different, she

"For years, the College of tained on the funding provid-The report continues, ed, but as we get more advanced we need more funding, just like any other college," Haley said.

> Haley said the Tech administration is supportive of

ciently provided for.

Haley said the college is doing well with additional funding. Last year external grants to the faculty increased by 32 percent. The college received 25 grants, totaling almost \$3 million, she said.

Haley said Mary Tom Riley, professor of home and family life, made most of the funding possible for the College of Home Economics and also is one of the leading people at Tech for outside fund raising.

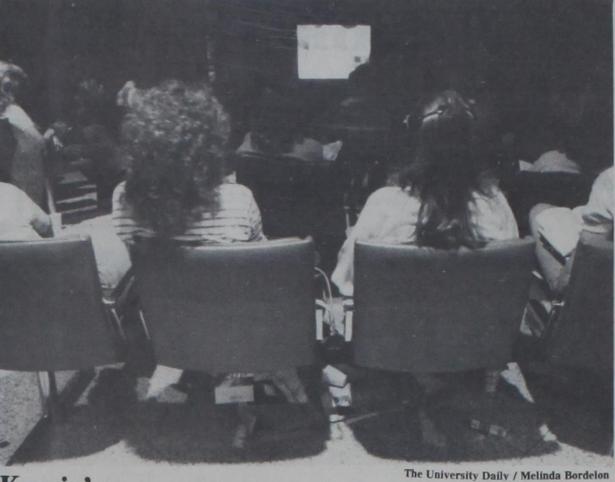

Haley said she also is proud of the college because of its active faculty. She said the faculty made 122 state, national or international presentations and published more than 100 articles last year.

"I think that's pretty good," Haley said. "We look very good as far as outside support funding."

Personnel of the College of Home Economics are in the process of replying to the report submitted by the committee and hope to complete the response soon.

The Council on Professional Development will meet in November to go through all of the material involved in the research and will then make a decision on the college's reaccreditation.

"I feel sure that we will be Haley said this positive in- the college and she said she reaccredited," Haley said. thinks the administrationwill "The research shows that the

## Trapshooter aims for the gold in international events

By JAN DILLEY University Daily Lifestyles Writer

Kelly Rogers keeps his eye on the birdie.

sues an interest of which even his dorm buddies are not aware. Rogers is a trapshooter, and he shoots to win.

Last year, Rogers took the silver medal home from the Benito Juarez Championships in Mexico City. Determination and stamina helped secure another silver medal during the World Moving Targets Championships last June in Edmonton, Alber-The freshman management information systems major pur- ta, Canada. Rogers shot a straight 100 and came in fifth the about right for peak performances in trapshooting," he said. following month at the National Sports Festival in Colorado

Next year, he will try for a spot on the U.S. Olympic team. Despite his recent wins as a junior contender, he estimates he has but "a decent chance" for the 1984 Los Angeles games. By 1988, however, Rogers will be in his prime. "Age 23 or 24 is just

In addition to representing the United States in international competition at the contests in Mexico and in Canada, Rogers has been a member of the All-America and Texas state trapshooting teams for the past two years.

Interest in the sport began three years ago with 4-H Club practices in high school. Eventually, Rogers advanced to higher levels and his participation branched out into international as well as American trap.

American trap involves competition in three events: singles, handicaps and doubles. Singles requires the shooter to take aim 16 yards from the trap house, but a shooter in handicap competition must move backward from the 18-yard line after he completes his shots. "The contestant may be moved back as far as 27 yards, a disadvantage for the shooter," Rogers said.

50 to 60 miles per hour, the objects travel some 45 yards, Rogers and four bronze medals. Against "tough competition," Rogers

trap move 90 meters or 100 yards at about 95 to 100 miles per angles, international trap is "a whole lot harder."

from skeetshooting because a trapshooter "does not know which American trap together. way the bird is going" once it is released from the trap house, Rogers said. A machine in the house moves from left to right, throwing the clay targets at designated intervals. Contestants The transition from live to simulated game and vice versa is not between the rounds.

Recently, Rogers visited the Olympic training center where he "learned some stuff about the mental game of shooting." Now, he attempts to get his senses focused on shooting one contest, trapshooters from some other countries are "too target at a time. He believes reflexes, eye-hand coordination, duration and stamina are the skills necessary for success in nient rules, other countries enforce discipline on their trap-

To get ready for the World Moving Targets Championships, he shooting in the different surroundings and under the varying climate conditions. On the day of the championships, there were 30 to 40 mph winds and, "It was snowing, raining and real cold,"

Despite the hostile elements, the United States team, one of He just might be shooting for gold.

#### Kelly Rogers

Two birds are involved in doubles trapshooting. At a speed of over 30 competing nations, returned with five gold, three silver fell shy of the gold medal by five hits, with his 177 for 200 coming Unlike their American counterparts, the birds in international in second to 21-year old Russian Demetri Monakove's 182 score.

Rogers' parents flew from Big Spring to Canada for the three hour. Because the targets are thrown at different elevations and days. Such displays of support have enabled the shooter to share his interest with his family. "They go with me just about Although it involves the same basic objectives, trap differs everywhere I go." Occasionally, Rogers and his father shoot

Before he started competing in trap, Rogers honed his shooting skills hunting dove and quail, a pastime he still enjoys. usually fire rounds of 25 targets with two- or three-hour breaks difficult for the marksman. "As much as I'm used to shooting the shotgun, I can follow the bird," he said.

> Trapshooting is a recreational pursuit which Rogers tries not to let become an obsession. As he discovered in the Canadian serious about it." In contrast to the U.S. team's relatively leshooters from an almost "military standpoint."

Anxiety during competition is one emotion Rogers tries to arrived in Canada a month before the contest to practice his avoid. Fortunately for the shooter, the sport is never really frustrating. "When you shoot a bad score, you have to forget it or it'll come back to hurt you in the next event," he said.

Considering his past record, Rogers should be right on target when he faces the competition at the Olympic tryouts next May.

#### APPLICATIONS NOW AVAILABLE FOR MISS LUBBOCK

Miss Lubbock Scholarship Pagean!

#### SCHOLARSHIP PAGEANT

Preliminary try-outs for the "Miss Lubbock Scholarship Pageant" will be held October 23, 1983, 1:00 P.M., at Briercroft Academy of Dance and Gymnastics, in the Briercroft Center.

Applications may be obtained at the following locations: Varsity Book Store, 1305 University Avenue, the Hair Hut, 3108 50th Street, Robert Spence School, in the Terrace Shopping Center, Maxine's Accent, in Briercroft Center. THERE ARE NO ENTRY FEES.

The finalist selected at the Preliminaries will then complete for the title of "Miss Lubbock 1984", on Saturday, December 3, 1983, 7:30 P.M., at the Municipal Auditorium. Deadline October 15, 12:00 P.M.

The new "Miss Lubbock" will receive a scholarship to Texas Tech University for the Spring and Fall Semesters, 1984, an \$800.00 cash scholarship, \$2000.00 wardrobe from Maxine's Accent, hair styling by Danny Cavarubbio of the Hair Hut during her reign, make-up by Brenda Becknell of Robert Spence School of Modeling, services of the Nautilus in Security Park, a pair of western boots, belt and hat from Boot City, dry cleaning services by Gordons of Lubbock, and weight control services from the Diet Center. The winner receives an all expense paid trip to Fort Worth, Texas in July, 1984, to represent Lubbock in the "Miss Texas Scholarship Pageant".

For further information contact Jack Geddes at 799-0336, after 7:00 P.M.

## Victory against Aggies leaves Raiders at top of SWC

Continued from page 1

The contest won't be recorded as one of the most flawless in the history of Jones Stadium. In fact, if the team in red hadn't won, 52,109 people might have left thinking they still were at the Kalf Fry. Practically everyone on the field, save the masked rider, was called for a penalty. Both teams finished with nine

After 60 minutes the only difference in the game was that Tech got in range for the right foot of Ricky Gann while

Gann's game-winner, a 51-yarder, came 27 seconds turned in a big play or A&M before halftime. At the time, it seemed ridiculous to think the kick would win the game.

thought that those three points would stand up to win over a team with the talent A&M has?" Moore said. "Our kids on defense just played a super ballgame. Any team that can penalties totaling 65 yards in shut out A&M has really played well."

Indeed, the three-pointer was the difference mainly because the Tech defense continually stopped the Aggie of-

passing. Each time the Ags threatened, the Raiders either

"Who would have ever seriously only once, reaching the Tech 33-yard line midway through the second quarter. But a penalty moved them back to the 39 and then linebacker Dwayne Jiles dropped Aggie quarterback John Mazur for a 12-yard loss, forcing A&M to punt.

But the Raider offense couldn't do much better. Tech again ignited the Raiders. showed flashes of excellence This time he kept the ball and even a powerful running around right end and then cut A&M's three-point specialist fense. A&M had only 149 yards game, but each time the back to his left, picking up 33 Alan Smith never had an total offense, 85 rushing and 64 Raiders got close to the yards before being run out of

might not have mattered.

teams move the ball when the well as we could have, but we pressure is on.

## Raiders survive despite no TD's

By CHIP MAY University Daily Sports Writer

Mix a swarming Tech defense, Ricky Gann's foot and 52,109 screaming fans and you have the deadly recipe that leads to the Aggies' downfall Saturday.

The difference in the 3-0 victory was Gann's 51-yard field goal with 27 seconds remaining in the first half. It was the second longest kick of his career, after kicking his longest against Baylor the week before.

"I can't believe that one field goal won this game," Gann said. "When I hit the 51-yarder I was sure that it would give our team a lift, but I didn't think it would be the difference in the game."

The fact that the contest turned into a defensive battle did not surprise Tech coach Jerry Moore. After hearing that Aggie coach Jackie Sherrill was making his team go back to the basics, Moore looked for "hard-nose, knock-them-off-the-wall football."

Almost every time either team put together a potential scoring drive, a penalty killed it. Tech and A&M each was penalized nine times for 65 yards.

"We stopped ourselves many times in penalties. It was ridiculous," Moore said.

Sherrill agreed with the Tech coach. "I thought we played hard on offense ... But penalties just took us out of any consistency on offense," he said.

Raider quarterback Jim Hart showed a new dimension on option plays when he rushed for 93 yards on 16 carries. Hart's efforts included runs of 58 and 33 yards.

"I feel good about the option game," Hart said. "I run a 4.7 in the 40 and I knew the A&M defensive backs run a 4.4 and 4.5, so I figured somebody better block for me. If I had been a little faster I could have scored on a couple of those runs."

Hart likened the Aggies to the Raiders last year. "They (A&M) were afraid not to lose. That's what happened to us last

The Tech quarterback didn't even see Tech's winning field

"I stay away from Ricky when he kicks. When he hit that field goal, I was talking to a coach about the game plan," Hart said.

Tech now looks in good form for the season. "I think we're on our way now. We're 2-0, we will have a conference game against Rice and two others at home. We could be 5-1 going to the Texas game. Everyone knows we can win now," Hart said.

## Gann drills game-winner to help regain confidence

mained on the clock when Ricky Gann lined Gann said. "I felt good about the game, up to attempt a 51-yard field goal Saturday night against Texas A&M.

The Texas Tech placekicker wasn't unfamiliar with the do-or-die pressure. Last year, the junior from Arlington booted two last-second field goals to lift the Red Raiders to victory. The right-footed sidewinder again came through for Tech, covering the 51-yard distance with about 10 yards to spare.

Only this time the heroics came with 27 seconds remaining in the second quarter not the fourth.

The timing of the kick, though, was not a factor. The second-quarter field goal was all the Raiders needed — and could get — in their 3-0 win against the Aggies.

"It feels good to win a game on my kick, especially when the kicker for the other

The score was tied and only 27 seconds reteam (A&M's Alan Smith) is so good," kicking-wise, during pre-game practice."

> The red-haired kicker, though, would be the first to admit that if the situation had been the same about three weeks ago, the outcome might have been slanted. Or at least hooked wide left. Gann missed his first two attempts this year but now has connected on four straight, including two of more than 50 yards. The problem at the start of the year, he says, wasn't so much with his foot as with his head.

> "I think the main difference now is that I've got my confidence back," Gann said. "I was really shaky at the start of the season. I just wasn't getting enough work, but we've been practicing the kicking game a lot lately. My kicking has been good all along." And especially good Saturday night.

#### You thought somebody had your ticket. Or at least somebody was in your seat. How could you be expected to sit in the six-inch space that was supposed to be your seat?

Don't complain, though. On eight other occasions Jones Stadium has been more crowded than on Saturday night. The attendance figure of 52,109 ranks ninth in largest crowds at Jones Stadium.

**NOTES** 

The Raiders and Aggies

never had to worry about be-

ing flagged for spiking the ball

in the end zone Saturday

night. The end zone was

visited about as often as A&M

ex-coach Tom Wilson visits

the Aggie athletic offices.

The 3-0 final score was the

lowest in Southwest Con-

ference play since the Raiders

beat Rice by a mere field goal

in 1970. The Raiders went on to

finish the regular season at 7-4

that year and earn a berth in

the Sun Bowl. They lost the

bowl game 17-9 to Georgia

The record crowd for the 47,000 capacity stadium is 55,008. That's how many people packed into the stadium to see the Raiders and Aggies play in 1977. About 5,000 people said the view from the bathrooms was terrible.

Tech may have set a record

for most personal best performances on offense without scoring a touchdown. Quarterback Jim Hart rush-

ed for 93 yards on 16 carries, easily his best rushing performance as a collegian. The quarterback ripped off runs of and 33 yards, but the Raiders still didn't score.

It got worse. I-back Dale Brown picked up 95 yards on 26 carries. Brown, who subbed for injured Robert Lewis, had 65 yards in two years before

the start of the 1983 season. Dennis Vance booted his second-longest punt against

the Aggies, a 72-yarder that pinned A&M at its two-yard

## Hard-nosed defense gives Tech three-point victory

By CHIP MAY University Daily Sports Writer

sive football game.

The Texas Tech defense admitted the Texas A&M Aggies into Tech territory only once in the 3-0 battle, and that drive ended on the Tech 43. For the second week in a row, the defense set the tone for the

Linebacker Kerry Tecklenburg thought Tech contained A&M's offensive line well. "We have a good field goal kicker and our defense held. They have a big offensive line, and I was expecting them to pass a little more," he said.

Tech coach Jerry Moore agreed with Tecklenburg on the size of the Aggie linemen. "If you suited silver and blue on their linemen, they would look like the Dallas Cowboys," the coach said.

Raiders to 25 yards passing but allowed 248 yards rushing.

"Their (Tech's) offensive line didn't do anything funny. We usually knew what they were coming with," said A&M said. defensive tackle Ray Childress. "We did a good job get in the end zone, did they?"

But the Raiders did come very close to crossing the goal just come in certain situaline. With fourth down and one tions. They're predictable," at the A&M one-yard line, Mazur said. "Sometimes they

## A&M

For the coach of the losing football team, Jackie Sherrill talked Saturday night like his Texas A&M Aggies had just won the Cotton Bowl. And he was serious.

Remember — the Aggies lost to Tech 3-0. Quarterback John Mazur played like a California beach boy in a Tahoka cotton field. The Ags were flagged nine times. Kicker Alan Smith never got a toe on the turf for a field goal.

And what did Sherrill think? "I was just happy with the total effort — it's the first time this year that we had a complete total effort. And that's the great thing."

Maybe Sherrill took a tip from his starting quarterback when assessing the A&M attack, which featured an offense that didn't score any points and gained 149 yards the entire game.

"I didn't have much of a chance to test Tech's secondary," Mazur said. "They have a good defense; they come with everything they've got. But if you can match them with physicalness and intensity, you can control them. They're predictable."

Who is this Kevin Murray, anyway? A freshman quarterback leading the Texas Aggies in their first SWC game of the season? You bet.

Murray is the man Sherrill turned to for some offensive excitement against Tech. The coach replaced Mazur with Murray midway throught the third quarter.

Although Murray finished with two completions in 10 attempts, the chance for a big play was there. You could feel it. And Murray provided it.

The lonely man on the A&M sidelines Saturday night was NCAA record-holding place kicker Alan Smith. For a man who booted six field goals against Arkansas State in a 38-0 Aggie win, Smith never had a chance against Tech. Some days, you can't win.

HAIRCUTS \$6.00 Guys and Gals 6th Street Hair Shop 2419 6th (on 6th off Univ.)

lofted the ball to Troy Smith. Smith went into the end zone, but the referee ruled that his It was an old-fashioned knee touched the ground right knockdown, drag-out, defen- before he went crossed the goal line.

#### **Tecklenburg**

Although both the A&M and Tech defenses controlled their opponents, penalties also were The Aggie defense did not a big factor in the lack of scorlook shabby either. It held the ing. Each side was flagged nine times for 65 yards, often killing scoring drives.

"Our offense was not very strong tonight, but the defense really picked us up," Hart

Aggie starting quarterback John Mazur said the Raider of stopping them. They didn't defense did what he expected them to do.

"Their (Tech's) defense will Tech quarterback Jim Hart hid what they had coming, but I almost always knew what was coming. We just didn't do a good of stopping them."

A&M coach Jackie Sherrill replaced Mazur with Kevin Murray with seven minutes left in the third quarter.

"I took Mazur out to give the team some spark," Sherrill said. "Murray provided it, but penalties kept us from sustaining anything. We just didn't use our heads."

Raider defensive end Mike Kinsey almost caught Murray for a safety in the fourth quarter, but at the last second the Aggie quarterback broke

"Coach (Jim) Bates said Tech has not shut out anybody in three years," Kinsey said. "We shot for that goose egg."

Women netters start fall season with 4 victories

The Texas Tech women's tennis team began its season on a winning note last weekend as it won four matches in Colorado for a 4-0 season record.

The Raiders defeated the U.S. Air Force Academy 9-0 Sunday to continue their undefeated string.

Tech won its first match of the year by defeating the University of Northern Colorado 8-1 Thursday. The Raiders then beat the University of Colorado 8-1 Friday in Boulder. Tech played the University of Denver Saturday and won

In singles action against the University of Denver, Lisa Lebold defeated Karon Honig 6-1, 6-4; Kim Davis (UD) beat Pam Booras 6-3, 6-1; Jackie Pichardo (UD) downed Lisa Roberts 6-4, 6-3; Robin Poston defeated Stacia Sanzari 6-4, 6-4; Julie Hrebec topped Dana

Ruzickova 6-1, 6-1; Debbie Novak beat Kerry Moriarty 6-1, 6-2.

In doubles play, Booras-Laura Scot defeated Pichardo-Davis 6-4, 6-3; Roberts-Poston edged Honig-Sanzari 6-0, 6-7, 6-2; Hrebec-Leah Mires beat Ruzickova-Lilos Rojoce 6-3,

The Raiders easily beat Colorado Friday behind strong singles play. In singles matches, Booras defeated Annemair Amaral 6-4, 6-0; Lebold beat Karen Firzgerald 6-2, 6-1; Roberts downed Karlin Ellefson 6-1, 6-3; Poston beat Chelly Bartlett 6-0, 6-1; Hrebec edged Linda Waterhouse 3-6, 7-6, 6-2; Novak beat Leah Nero 7-6, 6-4.

In doubles action, Poston-Roberts beat Amaral-Fitzgerald 6-3, 6-3; Hrebec-Mires downed Waterhouse-Nero 6-3,6-1; Ellefson-Bartlett beat Booras-Scott

The Raiders won five singles matches and three doubles matches against UNC to begin the season. Singles winners for Tech were Lebold, Roberts, Poston, Hrebec and Novak. Roberts-Poston, Booras-Scott and Hrebec-Mires swept Northern Colorado in doubles competition.

The squad will play its first home match at 2:30 p.m. Tuesday against Hardin-Simmons University.

Booras

Raider spikers beat Duke,

regroup for Hitachi team

team faced nationally ranked day and lost 4-15, 5-15, 8-15. competition last weekend during a road trip to Kentucky Tech played better than the and Tennessee and must be glad to be back in the Hub City

Tech defeated Duke University Friday in the opening had problems with passing round of the Tennessee Classic and service reception in the dle blocker position after at the University of Tennessee. But the Raiders then dropped four of five matches and saw their season record lowered to 11-15.

The Raiders beat Duke 15-11, 16-14, 11-15 and 15-3. 6-15 and 7-15. Tech's service reception improved after the first match, as the squad rallied from the opening game loss.

Yet the Raiders couldn't

Coach Janice Hudson said games, 5-15, 16-14, 9-15, 3-15. scores indicated, as the Raiders were point-for-point with the Lady Vols during the third game. The Tech squad first game.

The Raiders fared no better Saturday when they played Louisiana State University and lost in three games, 11-15,

Tech then lost in four games to Temple University, 15-7, an exhibition game at 8 p.m. 4-15, 8-15 and 10-15.

Tech took on the Lady Kats keep the momentum going of the University of Kentucky

The Texas Tech volleyball against Tennessee later Fri- on Friday, the first day of the road swing, and lost in four

> The Raiders had problems with their service reception in two games, according to Tech coaches. Karri Ohland was back in the lineup at the midmissing several matches, yet was not at full strength.

> The Temple match ended the Raiders' action in the tourney and leaves them with an 11-15 season record.

Tech now must prepare for today against the Hitachi Club of Japan at Coronado High
