

500 Hear Nationally - Known Poet

By CHARLES RICHARDS
Treasurer Editor

A nationally - known poet kept almost 500 students and faculty members literally rocking in their chairs Thursday night as he talked to them on a familiar topic—Americans.

SPEAKING in Tech Union Ballroom, Louis Untermeyer equally renowned as a poet, critic and anthologist — prepared the group for his talk by saying he never finished high school. "Now you know how valueless what I say will be," he quipped.

The English language is constantly changing, Untermeyer

said in getting to his subject, "Do Americans Speak English?" He pictured the English language as two languages — one spoken in England and an almost entirely different one in America.

"IN ENGLAND, for example, a man doesn't run for office; he

stands for office," Untermeyer explained. "And he doesn't bathe himself when he takes a bath either. He bathes himself when he takes a bathe. Instead of getting a raise in salary, the Englishman gets a rise."

He told of difficulties in getting what you want in England

because of the language barrier.

"You don't ever ask for garters in England" if you're a man, he said. "You'll get something pink and feminine. You ask for sock suspenders. If you want suspenders, you don't ask for suspenders; you'll get something pink again. Ask for braces.

Suspenders go from the waist down and braces go from the waist up."

COMMENTING on garbage cans, Untermeyer said in England they were called dust bins. "It's a place where all the dust has 'been' for a long time, I suppose," he said, drawing more laughter.

Speaking of his biggest embarrassment, Untermeyer said he was once asked to sleep in an outhouse. He firmly refused until he discovered in England an outhouse was a "little cottage, set aside from the house."

Balloting Set In SC Runoff

The election season comes to an end today after Techsans go to the polls to cast votes in the Student Council representative runoff balloting.

Election officials urged Techsans to take a greater interest in today's election which determines the majority of members in student government.

Voter turnout has dwindled steadily since the presidential election, when approximately 4,500 persons voted.

Final Tabulation

The final tabulation of the Arts and Sciences representative voting was completed Thursday.

In the runoffs for the 15 A&S positions are Lee McElroy, 464; Bill Honey, 429; Chris Hernandez, 415; Keitha Davis, 351; Sara Cox, 329; Bill Dennis, 321; Jerry Gibson, 318; Lester Hess, 316; Nancy Shoemaker, 310; Holly Hunt, 305; Judy Price, 302; Nina Koeph, 299; Barry McNeil, 293; Jodi Conway, 264; Ann Courtney, 261.

Others In Runoff

Barbara Sue Owen, 261; Myla Henderson, 256; Donna Heath, 255; Jane Batson, 251; Roland Anderson, 248; Joe Waller, 243; Bill Abraham, 240; Elaine Walter, 234; Rita Reynolds, 233; Vicki Pharr, 223; Ashley Wisdom, 220; Anne Moore, 217; Patti Liner, 214; Stan Jones, 212; Judy Glover, 205 and Jim Hackney.

Mistake On Ballot

Due to a ballot mistake, Jim Hackney's name did not appear correctly on the voting list, so he has been included in the runoffs.

Tech Senior Named Top ROTC Cadet

A Texas Tech senior, Gerald Brown of Fort Worth, has been selected by the national Defense Supply Assn. as one of the 10 most outstanding ROTC cadets in the United States.

Two other seniors, Ramey Joel Brandon, Bovina, and John Allan Unger, Houston, have been selected as distinguished military students for the academic year 1962-63.

BROWN, A RANGE management major in the School of Agriculture, was presented a certificate and medal by Dr. R. C. Goodwin, Tech president, in ceremonies Wednesday.

He has been president of the ROTC Assn.; executive officer of the Association of the U.S. Army, Tech company; and commander and advisor of the Tyrian Rifles drill team. Brown is presently a member of Tyrian Rifles, Presbyterian Council and the Society of Range Management.

COL. WILLIAM M. BROWN, professor of military science, described Cadet Brown (no relation) as "one of the most outstanding ROTC students to be commissioned at this college. He has an excellent personality and is highly regarded by all of his associates."

The DMS winner, Brandon, is an accounting major and is a member of the Double T Assn., honorary athletic organization.

UNGER, WHO ALSO received the DMS badge, is a personnel management major and is president of Seaboard and Blade, army ROTC honorary society.

Selections for the DMS award are based on academic and ROTC standings. Final selections were made by Army officers in the Tech ROTC program, with the concurrence of the dean of business administration.

Both cadets are eligible for regular Army commissions upon graduation.

KICKOFF RODEO—A downtown rodeo parade Thursday preface beginning of the annual Tech Rodeo, to continue through Saturday. A record number of entries were due to participate. Shown inset is Carol Ann Norman, announced as rodeo queen in ceremonies prior to Thursday's competition.

—Staff Photo

Tech Rodeo Begins

Naming of a rodeo queen, a parade and public appearances by cowboy star Rex Allen Thursday highlighted activities preceding the opening of the annual Tech Rodeo in Municipal Coliseum.

Carol Ann Norman, Plainview, was crowned queen in opening ceremonies Thursday, after she was named in an all-school, penny-a-ballot vote. Sponsored by Pi Beta Phi, Miss Norman will reign over the three-day event, to end Saturday night.

A record 183 entries were scheduled to participate, Bill Barrett, Tech rodeo team member, indicated.

Variety Of Events

Cowboys from 11 member colleges in the Southwest Region were slated to participate in a variety of events from bull riding to calf roping. Girls' teams from each of the colleges were also scheduled to compete in barrel racing and goat tying.

New Mexico State University is currently leading the region, followed by Texas Tech in second place and South Plains College, Levelland, third.

Standings are based on total points per six-man team, Barrett said. He explained the 183 entries saying that this is an "open rodeo," in which each school may bring as many cowboys as it wants. He said, though, that each school must select a team to compete in the region.

Rodeo Assn. Picks Teams

"These teams change all the time," Barrett said. Performances tend to vary as in any other sport, he continued, and the Rodeo Assn. picks each team on the basis of past performances, ability and several other factors.

Tech won the Southwest Region competition last year. Clyde Fort, a veteran rodeo performer, leads the Tech team after two rodeos. Fort competes in the ribbon roping, calf roping and steer wrestling contests.

Admission is \$2.75 for reserve seats, \$1.75 for general admission, \$1 for Tech students and 75 cents for children under 12. There is no charge for children under 6.

Louis Untermeyer Discusses Art, Southern Writing At Tea

By CARMEN RAY
Toreador Staff Writer

Louis Untermeyer, prominent poet and critic, was the guest of honor at a tea Thursday. Several faculty members and a few students formed the small group of listeners.

Starting out on a seemingly aimless course, Untermeyer began to speak of art. In a dry, flat voice he told of visiting the Washington Art Museum. "On one wall, there was a photograph of 164 Coca-Cola bottles. I know, I counted them. Might be good on a hot day."

Untermeyer continued to speak of the art displayed, and his listeners continued to chuckle.

Questions Southern Writing

Dr. John Guilds, head of the English department, asked if the critic thought that there was a basis for the fact that most contemporary writing is being done by Southerners.

Said Untermeyer, "I think this is just a Southern boast." After backing his statement with names, Untermeyer said that most prose writers were from the South. However, he added, this is no indication that any inherent value of Southern life makes for good writers.

Aycock Trial Ends In Hung Jury

The mock trial of Charlie Aycock, Tech student body president, ended in a hung jury Thursday. The jury, after voting 6-6 twice, reported to Judge John Compera that it could not reach a verdict.

Aycock was charged with assault with intent to murder with malice in the Monday shooting incident in which Jerry Parsons, student body vice president, was injured.

Chief arguments in the trial centered on the question of whether or not Aycock had entered the Union with the intent of murdering Parsons. Aycock said he had not, but rather had intended to meet another man, Jim Sharp.

Chief prosecuting attorney was Audrey Dednarz. Her assistants were Charles Gideon and Max Triplett. Chief defense attorney was Ron Suiter. His assistants were David Black and Sally Parks. Parsons claimed he could not remember what had happened Monday morning because he was intoxicated. His girl friend, Siddy Perrin, claimed he fell into a crouching position because of his intoxication and that he was incapable of harming Aycock.

Aycock had earlier testified that he thought Parsons was going for a knife, one he was known to carry, when he went into the crouching position and that he (Aycock) drew the gun, which he had just picked up at the gunshop, to scare Parsons away. He said he did not know the gun was loaded. Jim Smith, the clerk at the gunshop, testified to the validity of Aycock's lack of knowledge concerning the gun.

There will not be another trial, according to Judge Compera.

'I WAS ONLY INTOXICATED'—This claim was made by Jerry Parsons, student body vice president (with arm in sling), at the Pre Law Club's annual mock trial. Charlie Aycock, student body president, "shot" Parsons in the left arm when Aycock "thought he was going for a knife."

'Cyclers Line Up For '500' Deadline

DISPLAY TROPHIES—Jill Lobdill, Fort Worth junior, holds the 'Little 500' sportsmanship trophy and views the first-place bicycle race trophy with Steve Bryant, 'Little 500' publicity director. —Staff Photo

Today is the last day for entries in the annual "Little 500" bicycle race, sponsored by Circle K, Alpha Phi Omega, Saddle Tramps, and Womens Service Organization. Deadline for entries is 5 p.m.

Applications are available in the Student Council office. There is a \$5 entry fee. Any organization is eligible to enter.

Time trials for men's teams will be 2 p.m. Saturday at Memorial Circle. The race will be Saturday, May 4. Pit positions and numbers for men's teams will be determined by the times in trials Saturday; therefore, it is imperative that each team have at least two team members present.

Women's teams will determine numbers and positions by drawing.

Trophies On Display

Trophies for the race are on display in Tech Union. Permanent trophies will be presented to the first three girls' and boys' teams. A traveling trophy will go to the first-place boy and girl teams. Any team winning first place for three years in succession will be permanent owner of the traveling trophy. Sportsmanship trophies will also be presented.

Convocation for team captains will be 5 p.m. Wednesday in the Chemistry Bldg., room 101. This meeting is to familiarize team members with rules and regulations.

Lecture Series Opens

Rev. McGovern Discusses Religion

The opening of Tech Union's religious lecture series, "The Future of Religion," was inaugurated with the Roman Catholic representative, Rev. Thomas McGovern, giving his opinions.

Father McGovern pointed out the necessity of integrating the religious life more fully in the social realm during this era characterized by accelerated scientific and technological advances.

Spirited Discussion

After his lecture, a spirited discussion between members of the Christian, Jewish and Moslem faiths followed. Such topics as the possible harm done by Christian missionaries in non-Christian countries, the immediate questioning of the necessity of morality and

whether or not Christian theology will have to adapt to groups which are rejecting the uniqueness and divinity of Jesus Christ were considered.

Monday, Rev. Ralph Macy, the protestant representative, will lecture on "Prospects for Protestantism." Rev. Macy will speak at 4 p.m. in Tech Union Coronado Room.

Kline Will Lecture

Rabbi Alexander S. Kline will deliver his lecture at 4 p.m. Thursday in Tech Union's Mesa Room. Rabbi Kline will speak concerning "The Religion of the Future."

The religious series is sponsored by the Ideas and Issues Committee of Tech Union and is open to all Techsans.

Milestones . . . Graduation . . . keep the memory of these great days fresh for years — in portraits from Koen's

We have caps and gowns at both studios — come in soon, it is the best gift you can give MOM on Mother's Day — May 12.

It's the rich-flavor leaf that does it! Among L&M's choice tobaccos there's more longer-aged, extra-cured leaf than even in some unfiltered cigarettes. And L&M's filter is the modern filter—all white, inside and outside—so only pure white touches your lips. L&M's the filter cigarette for people who really like to smoke.

A Formidable Issue...

Improving higher education in Texas is the most formidable problem the Legislature must solve. Indeed, this problem may be the most serious one facing the people of Texas since the Civil War. Now, as in 1860, the future of Texas is the issue.

THE HOUSE has approved a big \$3,088 billion appropriations bill. It increases state aid to public education by \$40 million over the present biennium. Gov. Connally requested \$31 million more for education, but the legislators felt the state did not have the funds.

With the cut in funds which were deemed at least "adequate" for the improvement of education in our state, it seems paradoxical that at the same time the legislature is having revenue problems, the Senate would approve an increase in educational expenses — specifically the addition of San Angelo State College and Pan American College in Edinburg to the current list of 20 state-supported senior colleges.

WE CAN, however, be grateful that the Senate refused to consider expanding the list still

further by tacking on Webb State College in Laredo and Permian State College in Odessa.

If the House agrees with the Senate in approving the elevation to four-year support, Texas will find its education budget

stretched again. The older state-supported schools have yet to recover from the diverting of funds to beef up the University of Houston which becomes fully state-supported next fall.

Texas Tech, for example, finds itself getting less money than U.H. at a time when it needs a healthier budget than ever before.

THE HOUSTON Chronicle pointed out that: (1) Texas ranks eighth in 16 Southern states in professors' salaries, and all 16 Southern states fall below the national average;

(2) Texas is not improving professors' salaries as rapidly as the national average rate of increase;

(3) Texas is gaining a reputation for a lack of academic freedom, with Texas Tech now on the American Association of University Professors' censure list and Sam Houston State College coming up for a censure vote April 27-28 (only 11 colleges in the nation are under AAUP censure).

There are other problems, too. All facts are not yet known, so we can only begin to wonder how the stretching of the budget will effect research, classroom construction, academic enrichment plans like Tech's honors program, student-teacher ratio (currently 1-22.0 at Tech) and many, many other areas of education.

WE CAN only wish that we could say in Senate debate as did Sen. Martin Dies Jr. of Lufkin, "The only way to get better colleges is put more money into those we now have, not create new ones."

Bronson Havard
Assistant News Editor

Scarlet Scatterings...

by Charles Richards

The "censor" cry that has arisen over campus about the Great Debate over the Harbinger has filled our Letters to the Editor column, if nothing else.

It's been quite a spell since there has been any such controversy, and it's almost a welcome sight.

Richards

Not that we're for bickering and trouble constantly, but it's nice to see Texas Tech students can be aroused. Topics such as this are good if the matter is presented in such a light to make students think.

Where this particular case is concerned, it's pretty hard to get a story and base it on a solid foundation. Neither side seems to agree on any two points.

For sake of objectivity, the DAILY TOREADOR has tried to present both sides in every article or editorial we've printed, and each time one side or the other rises up in arms, asking us why we persist in printing lies.

In a conversation Monday with Dr. Roger Brooks — the man accused of "censoring" the short story that caused all the controversy — I was told he had absolute proof that he had rejected the short story for either awards or recognition before it went to Tech Press for publication.

So all our articles have carried this assumption, in interest of giving fair coverage to both sides.

Chandler Questions 'Rejection'

Arthur Chandler, one of the editors, told us Thursday he and co-editor Hunter Heath had advertised in advance that a first and second-place award would be designated in each category. Since there were only two entries in the short story division, the short story—written by David Sliagar—was automatically given second, by definition. If you want to stretch a point, it was also last place.

DR. BROOKS praised the first-place work heavily, but made no comment at all of the second story, according to Chandler.

Who are we to believe? In Tuesday's TOREADOR, letters came in supporting both sides and telling "just what happened." But they

conflicted in the same places. In our conversation Monday, Dr. Brooks asked that no more be said publicly about the Harbinger incident, that enough had been said.

One of the former editors asked the same thing late last week, saying he was being faced with pressure from a source he could not figure.

USUALLY, WHEN those in the public spotlight try to stop publicity on a subject it means one of two things:

1. They don't want the public to know what has or is happening; or
2. They don't respect the integrity of the press in giving a true report of the details.

Withdrawal Of Work Blocked

After the protest and resignation of the two editors, most of the other Harbinger contributors have said they are withdrawing their contributions. There's only one hitch.

EVEN AFTER DR. BROOKS called the printing plant and okayed the release, Mrs. Margaret Schrader — secretary of Tech Press — said the works had been "frozen" and could not be released. Again, this is according to Chandler.

So if you're looking for controversy, you're certainly on the right topic. Personally, I don't mind at all having controversy, although it does get a little tiresome hearing the same axes ground day after day.

It is distressing to have the complete story kept out of your grasp, however, and my chief desire now would be to get the two sides to agree on what happened. With all the contradictions involved in this question, it is apparent someone isn't telling the truth.

And the guilty party should be exposed as such. We have too many martyrs now.

Show Discount For Tech

Tech students are being admitted to "Mutiny on the Bounty," now showing at the Village Theater, for a reduced price of 75 cents.

Whether the discount rate is a permanent thing or just a passing favor remains to be seen. J. B. Rhea, manager of the Village and several other Lubbock theaters, set the special price. He said Wednesday the admission price had been lowered to give more students a chance to see the show.

Especially at this time of the year, when students finances are at a comparatively low

point such a move is a personal favor to many Techsians. The same show was presented in Fort Worth in January for \$2.25 per person.

We are glad to see someone is taking a step in this direction. Even as helpful as Lubbock has been to Texas Tech, this is something that has been needed for a long time.

We hope there is enough student turnout at the reduced rate to convince Mr. Rhea a reduction is profitable—for both him and Texas Tech.

Charles Richards
—Daily Toreador Editor

LETTERS TO THE EDITOR

'Poor' Judgement Cited

I would like to take the opportunity to express an opinion in regards to a letter to you from Mr. Wayne Hickman published April 25th.

I WISH to agree wholeheartedly with Mr. Hickman in his premise that you used very poor judgment in printing the letter you did in your election day issue, no matter what rationalizations your little defense mechanism pulls out of the air.

I guess we're lucky though, what can you expect from someone who's never lived more than 50 miles from Lub-

bock, except for 6 months in Seymour!

Glynn Baker
(Editor's Note: You're disregarding nine fine years at Aspermont and three at Jay-ton, both hovering near a 100-mile radius...)

A Potential Danger

"There is no censorship at Texas Tech." This is a valid premise until you consider the difference between the college press and the press at large.

IF YOU DON'T like one view of world or local news you can easily find a paper, magazine or TV show which expresses another. If you don't like the Dallas Morning News you can

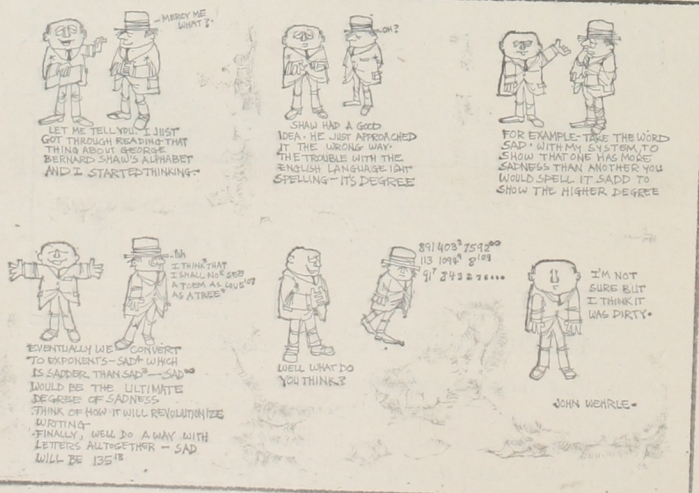

read the Times Herald or even the Fort Worth Press and get a different view of the situation.

The only organ concerned daily with Texas Tech is its "student" newspaper.

SINCE THE editor is omnipotent, he governs what you learn about Texas Tech.

Because the Toreador operates on a professional basis, the editor does have the right to include and exclude material, but there is a potential danger in a situation where the possibility of only one side of the news being presented, however objective the presentation of the news may be (sic).

John Wehrle

The Sigma Delta Chi AWARDS

Truth
Talent Energy

Section II. Lubbock, Texas, Friday, April 26, 1963 SDX Edition

Eleven Of Eleven Thousand...

For 1962-1963

Eleven individuals out of eleven thousand.

Yet these eleven have each contributed in a distinctively personal manner to the stature of Texas Tech.

Their exceptional efforts have won them a place in the third annual Sigma Delta Chi Awards, presented by the Texas Technological College Undergraduate Chapter of Sigma Delta Chi, worldwide professional journalistic society.

The Awards were conceived as a recognition of persons who in an unassuming manner have proven true to the three standards of Sigma Delta Chi—Talent, Truth and Energy. These were the criteria used by the Texas Tech Undergraduate Chapter in selecting the eleven persons to be honored.

In presenting the Awards, the Chapter hopes that the recognition of these eleven individuals may stand not only for what they have done, but also for the efforts of the many others who have demonstrated the qualities of Talent, Truth and Energy.

The Sigma Delta Chi Awards Issue is published by the Texas Tech Undergraduate Chapter of Sigma Delta Chi, professional journalistic society, as a recognition of outstanding service and leadership true to the traditions of Sigma Delta Chi—of Talent, Truth and Energy—by eleven exceptional members of the community of Texas Tech.

'No Luncheon' — Says Governor

The pudgy man conducting Governor-elect Connally through the exhibits punctuated his rapid explanations with dagger-like thrusts of his cigarette.

Connally, on campus to view the results of a two-year study of the Texas Parks System continually asked well-informed questions which were quickly answered by the gruff man. After about an hour and a half had elapsed the man asked Connally, "It's about noon, want some lunch?"

"No," said the governor-elect, "I'd rather stay here and see the rest of your project." And with that turned down a luncheon scheduled for him and his party because of his intense interest in the Tech-staffed parks project.

Elo J. Urbanovsky, Connally's host, had done it again. His energy and ability to inspire others had not only caused a governor to miss a meal but was the compelling force behind the extensive project which encompassed the history, present situation and future suggestions for Texas' parks.

"I characterize Urbanovsky with three words — talent, energy, forthrightness," said Dr. W. M. Pearce, academic vice president. "Many of us are able to dream something up, but Urbanovsky has the energy to see that it gets done." The talent of a near genius combined with the ability to inspire others with his ideas are a part of Urbanovsky's character.

"As head of park management, horticulture and entomology, Urbanovsky has built it into one of the top departments in the country," Pearce continued. He has developed an undergraduate program in park management which involves landscape design and urban planning plus a summer intern program which gives students employment in park departments throughout the United States and Canada. He has pioneered in the program of park administration in the Southwest.

"Schools all over the country send their graduate students here to study under Urbanovsky," Pearce said.

"The first thing Urbanovsky did towards grounds improvement at Tech was to change from native grass to the turf now blanketing the campus. The credit for improvement to the grounds goes to him. He was instrumental in planting trees, having them pruned, and planting much new vegetation," Pearce continued.

W. H. Butterfield, vice president for development, had this to say:

"Urbanovsky has done a great deal for Texas Tech in making its campus one of the most beautiful in this entire section of the country. In addition, the services he has rendered to communities throughout West Texas in their planning programs for beautification of their parks and other public areas have reflected great credit upon the college."

Coming to Tech in 1949 after serving as regional landscape architect for the Veterans Administration, Urbanovsky began teaching horticulture. In 1951 he became head of what was then called the department of horticulture and park management. Still head of the department, he is also Tech's landscape architect and serves as a member of the Campus Planning Committee.

Pope John VXXIII awarded the papal medal Pro Ecclesia et Pontifice (For the Church and Pontiff) to Urbanovsky April 5 of this year.

In 1961, Urbanovsky was elected president of the American Institute of Park Executives. In 1963 he was awarded the Cornelius Amory Pugsley bronze medal for leadership and dedication to principles of professional growth and preparation for public service.

ELO J. URBANOVSKY

G.E. Bowlers: 'Four Sharp Cookies'

Sunday, February 17, 1963—a day to be remembered.

On such day four young Texas Tech lads represented Tech with a show of breath-taking brilliance in losing to Drexel on the nationally televised G.E. College Bowl.

This scholar team was composed of David W. Watkins, Leroy B. Cebik, Robert Gary Gore and Dwight Young, team captain.

Although the team lost in its appearance on the show, witnessed by an estimated 30 million view-

ers, it brought to Tech country-wide recognition not only by being a participant but by its outstanding performance. The contest was called "one of the closest matches in the history of the College Bowl."

The opposing team was a delegation from Drexel Institute of Technology, a five-time winner of the Bowl.

A regular Sunday television show, the Bowl pits teams from two colleges before the nation to compete in rapid recollection of

facts concerning American and European history, American, English and European literature, philosophy, science, current events, music, mythology and the Bible.

For nearly three months the four boys worked diligently in preparing themselves after Columbia Broadcasting System invited Tech to participate in the Bowl.

"In my opinion this group of boys represented Texas Tech in a very fine manner, said James G. Allen, dean of student life, who accompanied the contestants.

"They represented Tech as being a truly intellectual and cultural institution and in every concept of the college phase. This was a team working for the college unselfishly," he said.

Dr. J. T. McCullen, English professor who helped in the preparation of the group, said that since we were in a world of advertising he was glad Tech had these boys in the contest.

"They did an excellent job as all four seem of very keen mind. "It was a sound group with poise," McCullen said, "which reflected in their ability to manage under stress."

Mrs. Ernest F. Morrison, Tech librarian who compiled much of the material the group used, said that she felt the boys knew most of the material she gathered but that it served as good reviewing in their preparation for the contest.

"I feel Tech was honored by being invited to the G.E. College Bowl," she said, "but the fine performance the boys gave was good recognition for the college."

I KNOW, I KNOW!—Among the Sigma Delta Chi Award winners this year is the G.E. Bowl team that represented the college on a nationwide TV hookup. —Staff Photo

Another person who assisted the "Quiz Kids," as they were often called, was Kay Kagay, Mortar Board president.

Miss Kagay said that the time spent by the four boys was reflected by the fine representation the group gave Tech at the College Bowl. "The boys spent much time in preparing themselves and as a result represented Tech very well," she said.

Mortar Board helped select the participants, and made out questions for the practice sessions held by the group.

Dr. G. G. Gardner, physics associate professor who also helped in preparing the quartet commented that the four boys indicated that they were of high caliber intellectually with both keen and broad interests. He summed his statement by saying, "all in all, they are four sharp cookies."

Watkins, 20-year-old physics major from Lubbock, is a member of Phi Eta Sigma, honorary fraternity for freshmen, the Tech Symphony Orchestra and has been on the college awards board.

Cebik, 23-year-old junior phi-

losophy major from Stratford, Conn., plans to teach in college and do some writing. He is a member of Phi Theta Kappa and the Tech Union Ideas and Issues Committee. Cebik is the only married member of the foursome.

Gore, 21-year-old junior from Lubbock, is a Spanish major who also looks forward to teaching in college. Gore has appeared on the Dean's Honor List, is a member of Phi Alpha Theta and has been president of the Student Education Assn. for two years. He is also a member of Capa Y Espada and has served as honor pledge and program chairman for Alpha Phi Omega.

Young, sophomore secondary education major, is the third member of the group who resides in Lubbock. The 18-year-old scholar has been named to the Dean's List three times. A member of the Baptist Student Union, Young has served on the Freshman Council and is now chairman of the Vespers.

Sigma Delta Chi salutes these four Texas Tech scholars!

A Busy Job

Holmes Sells Raiders For Twelfth Year

"Can you come back tomorrow?" the man asked, running his hands through a pile of papers. "I have to get this stuff done today and I don't have much time since we have a ball game at 4."

The phone interrupted him, and his rush routine became even more intense. "Hello! Yes, how are you?" he spurted in a hurry, smiling. "Uh-huh. Well . . ."

This scene Wednesday afternoon in the office of Bill Holmes, sports

If success is judged by the amount of respect earned from co-workers, then Holmes has done well at Texas Tech.

"Bill is a very capable individual in many, many fields, with sincere dedication to his family, church and Texas Tech," Head Football Coach J. T. King said this week of Holmes. "All who come in contact with him are impressed with his friendliness and wry humor."

His dedication to his job is shown by the long hours he keeps, without doubt in excess of any other employe in the athletic offices.

"His is a year-around job and you'll always find him behind a stack of statistics, trying to get information for persons interested in knowing about Tech," were the words of Charley Lynch, assistant basketball coach. "He's a truly dedicated person, and his job keeps getting bigger for him every year."

Further praise came from Gene Gibson, head basketball coach, who could name only one fault.

Working too hard. "If anything, he overpublicizes athletics here, not underpublicizes, in his eagerness to do a good job," Gibson emphasized. "We think Bill does an outstanding job of getting our men their just rewards, as far as news coverage is concerned."

The manner in which he is accepted by other sports writers is shown rather definitely by the fact that he was elected president of the Texas Sports Writers Assn. a couple of years ago.

Holmes was married in June 1955, and he and his wife now have three children, the latest of which arrived only three weeks ago.

BILL HOLMES

publicity director for Texas Tech, showed him as probably a thousand words couldn't—a busy man doing a busy job.

The sports publicity director for Texas Tech is in the midst of his 12th year "selling" the Red Raiders to anybody that is anybody on the athletic scene — including every major newspaper in Texas and other sports publicists all over the nation.

Just getting biographical data from Holmes is not the easiest thing in the world, as described above. For one thing it takes a well-trained athlete, practically, to keep up with him in his versatile position long enough to ask a question.

In addition, although he isn't exactly shy about it all, he's modest enough that you have to ask everyone else in the athletic offices before you can round up all the accomplishments he has achieved over the years.

It's Holmes' job to be on hand for all Texas athletic events at home, regardless of their importance. He then writes on their outcome, gives praise where it is due and begins on the task of writing an advance story on the next sports attraction on the schedule.

And he's been doing all this here since 1951, when he came from a similar position at McMurry College in Abilene. Two years prior to that, he was sports publicists at Texas A&I, his alma mater.

It was at Texas A&I that he began his writing career. A journalism major, he was sports editor of the college paper. After he graduated, it was perhaps only natural that he continue to follow the Texas A&I Javelinas from the position of publicity director for the college. Aside from this, he wrote sports three summers and a winter for the McAllen Monitor.

Kay Kagay's Deeds Make 'Most Distinguished' List

Texas Tech just can't do without its coeds, and especially Tech could not have done without its Kay over the past four years.

The Kay of course, is none other than Kay Kagay, the charming co-editor of La Ventana and president of Mortar Board.

Miss Kagay, has a list of achievements at Tech that places her among the most distinguished women ever to attend this college. Indeed, she has been recognized in Who's Who in American Colleges and Universities.

But what makes Kay so great is her wonderful personality. She has a rare combination of keen intelligence, leadership ability, gentle femininity and humility.

"Personally I have never known a finer person," Florence Phillips, dean of women, said.

Dean Phillips continued, "As president of Mortar Board, Kay's performance is unexcelled. She sees projects through effectively and with results. She makes thorough plans and sees that these plans are completed. Her work has been characterized by a high standard of excellence."

She added that for the first time this fall the regional conference of the Mortar Board was held at Tech and under Kay's direction the conference proved to be the best she has seen.

James G. Allen, dean of student life, said Kay is characterized by "absolute dependability, conscientiousness and quiet solid performance."

As president of Mortar Board, which sponsored Tech's participation in the G.E. College Bowl, Miss Kagay worked hard to pre-

pare Tech's team by spending many hours on research and planning.

Joyce Woody, co-editor of La Ventana with Miss Kagay, said,

She has a wonderful way with people and that certain something that everyone likes. Working with her has been an exciting and rewarding experience."

Among Miss Kagay's many activities at Tech, she is a member of Kappa Alpha Theta sorority and was president of Knapp Hall, 1961-62; a member of Junior Council, 1961-62; and editor of La Ventana's Post magazine for two years. She has worked on the yearbook since her freshman year.

Miss Kagay is a senior art education major with an outstanding grade average.

She is truly a woman who stands as a fine example for others of her sex. Devoted to whatever task she takes to heart and serene in its execution, Miss Kagay never rests until her work is done. Regardless of how heavy a burden she carries, she can always have a little smile and a twinkle in her eye when a friend comes by. And to her everybody is a friend.

There could not be another more deserving. Sigma Delta Chi had no difficulty in selecting Kay Kagay to honor. We can but simply say to her, "We thank you."

KAY KAGAY

"Kay is a very creative and artistic person and this is so evident of her work on La Ventana this year."

Allison Not Surprised

"Daryl Allison is one of the nicest tennis players I have ever known." With this statement, Texas Tech tennis coach George Philbrick, summed up his feelings about his top singles court man. Allison is a senior physical education major from Lubbock, now winning his third letter in tennis at Texas Tech. Perhaps the most

outstanding honor to befall Allison occurred last spring when he teamed with sophomore, Beau Sutherland of Kerrville, and to everybody's surprise, except maybe Allison, they won the Southwest Conference doubles championship. To him, it was just another match that had to be won by fierce determination, devotion, desire and hard work.

A middle B student Allison takes his determination from the tennis courts into the classroom.

Fierce determination, devotion, desire and hard work are the major characteristics of Daryl Allison. According to Philbrick, "Daryl, being our number one player, always has to play the toughest players in a contest with another team. And most of the time these players have years of experience over Daryl, but this doesn't hamper him any. He stays in every match through determination and desire."

Daryl Allison is one of the best-liked tennis players in the Southwest Conference. He is a great sportsman and has a good attitude with teammates, other players and coaches. Philbrick has been com-

plimented more than once on the fine sportsmanship of Allison.

Athletic Director Polk Robison mentioned that tennis is one of the few individual sports, where one player's reactions must be gauged and anticipated by his opponent. Allison fits this pattern perfectly. He is a conscientious player, who thinks ahead of himself and his opponent, but never forgetting the present action.

Robison said, "I have always admired Daryl for his competitive spirit, and his desire to gain a goal — that of being a good student and a good tennis player."

Saturday, Texas Tech will encounter unbeaten SWC defending champ Rice in a match at the Texas Tech varsity courts. Tech has a two win-one tie record this season. And when the final singles match gets underway, an outstanding leader will take the court for Texas Tech, and through fierce determination, desire, hard work and an unusual brand of sportsmanship, not often seen in tennis, will play to the best of his ability against a man who has beaten him three times before. Daryl Allison will play his top game because he has the spirit it takes to overcome obstacles and make the hard look easy.

Sigma Delta Chi salutes Daryl Allison, for his proud leadership, his great sportsmanship and his unrelenting desire.

DARYL ALLISON

Ginger Butler Leads Academic Recruiting

Capable, dependable, faithful, outstanding, deserving and academic recruiting are all synonymous with Ginger Butler. These terms were used by practically everyone contacted concerning her contributions to Texas Tech.

Her endeavors with Tech's academic recruiting program seemed more prominent among her achievements, though many praised her work in other campus areas.

"Ginger has been a chairman of the Student Council's Academic Recruiting Committee and has done a real, real fine job," said Charlie Aycock, Student Assn. president. "This is only the second year there has been such a committee, and in any program in its young stages you seek someone to direct it who will not fall down, but make forward strides. With Ginger working on this program there has been a progressive increase in its development."

"Since academic recruiting is a long-range plan anyway," he continued, "the effectiveness of her work will not be completely evident for perhaps several years. This has, however, been a very successful and very lucrative year for the program, under Ginger's direction."

When officials representing that nationally televised program notified Dean of Student Life James G. Allen of Tech's acceptance for the Bowl, they referred to Miss Butler's

letter, according to Kay Kagay, president of Mortar Board.

"Ginger gets things done in a quiet, unassuming way," said Dr. Beatrix Cobb, faculty advisor to Mortar Board, "without your ever

GINGER BUTLER

knowing about it. Many leaders receive their recognition by being constantly before the group, but Ginger is different. I've found her to be a quiet, unobtrusive and very capable worker."

A geology major, Miss Butler recently received a three-year scholarship from the National Aeronautics and Space Administration. She plans to use it to obtain her doctorate at Tech, according to Dr. Alton F. Wade, geosciences department head.

"Ginger has maintained an overall grade point average of 3.5 and leads her class in this department scholastically," said Dr. Wade.

"Ginger met all the requirements for membership in Sigma Gamma Epsilon, the national earth sciences honorary fraternity," Dr. Yeats said. "All the requirements except one, that is—women are not accepted for membership."

Both Dr. Cobb and the geosciences faculty members emphasized Ginger's plans to obtain a doctorate in geology as being extremely unusual. Approximately 20 women have obtained such degrees in the US, estimated Dr. Wade.

A senior from Dallas, Miss Butler received one of the highest honors possible for a college student in the United States last fall when she was named to represent Tech in Who's Who in American Colleges and Universities.

For her contributions far above and beyond the call of duty, Sigma Delta Chi salutes Ginger Butler.

Harding Is Expert At Aiding Students

"Down through the years, the interest of his students has always come first for John Harding."

These were the words spoken by J. C. Chambers, immediate past president of the Ex-Students Assn., in regard to Harding, an

JOHN HARDING

assistant professor of economics at Tech.

Chambers added that Harding has been an inspiration to the thousands of students he has worked with in both classes and organizations during his long association with the college.

Student body vice president Jer-

ry Parsons spoke highly of Harding's work in their fraternity, Phi Delta Theta. Harding is currently serving as province president of the organization. He was faculty sponsor for Silver Key and has continued to serve in that capacity since its affiliation with Phi Delta Theta. Parsons said, "He has helped us more than most people realize. He is always ready to help with any problem that might come up."

Jim Deen, Phi Delta Theta vice president, noted that Harding was always available to help out, whether it was fraternity or personal business.

Harding was instrumental in lining up the Community Service Day project for the chapter this year at a nearby boys ranch.

Until two years ago, Harding was freshman adviser for the School of Business Administration. At that time he left the post to become a full time instructor.

In addition to his college duties Harding is actively engaged in farming and ranching. He is married and the father of two children. Other college organizations to which he belongs are the Century Club and the Ex-Student's Assn.

Sigma Delta Chi is proud and honored to list the name of John Harding among its 1963 Awards winners.

For Union, MUN Work

Moeser Gains Recognition

Most people on the Tech campus have heard of John Moeser. However, many aren't quite sure if it's "Mow-ser" or "Me-ser."

Moeser has accomplished in two years — he is a sophomore — the work average student leaders

JOHN MOESER

take four years to do. A steady, dependable and imaginative worker in the Tech Union where he has found an opportunity to serve Tech, Moeser gained recognition from the student body this spring for his outstanding performance as chairman of the Union's International Interest Committee.

He was instrumental in initiating the first Model United Nations at Tech. His leadership as secretary - general of the Model U.N. has been cited by many Tech-sans as one of the main reasons why the program was such a great success. As chairman of the International Interest Committee, he spent many daytime and nighttime hours planning and directing the extensive program. His eloquent speaking during the event has marked him as one of the best orators on campus.

Presently Moeser is serving Tech as the Union's Public Relations Director — a job that requires time—and a member of the policy-making executive committee.

"John has done a tremendous job and has excellent grades. He has made the International Interest Committee a very important one in the Union," Mrs. Karen Moore, Union program director, said.

The Union has honored him several times with awards and achievement certificates. He was recognized at the All-College Recognition Service.

Moeser, a little, articulate guy who always seems to smile, gave a fine example of his character recently when student government and Union officers met to nomi-

nate people to the presidency of the Union. Upon being nominated, he withdrew his name. Later he told close friends that he felt he could do a better job for the Union and Tech as Public Relations Director.

A government major, Moeser is a member of Sigma Alpha Epsilon social fraternity, the Baptist Student Union and Phi Eta Sigma. He is mission chairman for the BSU this year, and he served as devotional chairman last year.

An enthusiastic person in the

classroom, Moeser can get deeply into political theory. Right now he is working on a research paper examining the pros and cons of political parties, especially their application to the university campus.

Because of John Moeser's contributions to building a greater Texas Tech, Sigma Delta Chi breaks with tradition to honor him. He is the first sophomore to be recognized by SDX.

By - the - way, it's pronounced "Me-ser."

TEAM AND COACH—The Texas Tech Crops Judging Team scored remarkable victories for the college in two top national contests. —Staff Photo

At Kansas City, Chicago

Crops Team Is Winner

Sigma Delta Chi congratulates Frank Burkhart, Joe Dwyer, Laval Verhalen and Royce Turner for their success in the National Collegiate Crops Contest in Kansas City and the International Collegiate Crops Contest in Chicago.

These men have brought distinction to the agronomy department at Tech. They were the winners of twin national championships in crop judging and dominated the national judging.

Coach Cecil Ayers, professor of

agriculture, said, "We certainly are proud of the accomplishments of the boys. Out of the last 15 years we have had teams to win both meets, but never by such a sweeping margin. This was the best of many good teams I have coached. They set a record to be proud of."

Burkhart, of Vernon, graduated last semester and is now employed at the Lubbock Lindsey Seed Granery. While a student, he was a member of the Agronomy Club and held the office of president last fall.

Turner, Muleshoe senior, is now working on the family farm at Muleshoe. While in college, he was a member of the Agronomy Club and held the office of vice president.

Verhalen, Knox City senior, was second place in the individuals of Kansas City's seed analysis competition and was top winner in commercial grading at Chicago. He is also the all-time high man in the Chicago's contest history.

On winning this honor, Verhalen said, "I'm absolutely speechless, it was quite an honor."

Verhalen is also a member of Phi Kappa Phi, scholastic honorary; the Newman Club and the Agronomy Club, where he has held the positions of vice president and corresponding secretary.

Dwyer, Lubbock junior, was an alternate at the crops judging contests. He is a member of the Agronomy Club and is president of Alpha Zeta agriculture fraternity.

These are the agronomy department's men of distinction.

SDX Strives To Raise Journalistic Standards

Sigma Delta Chi, professional journalistic society, is a professional society for men engaged in journalism, dedicated to the highest ideals in journalism, and is comparable to those professional organizations serving the fields of medicine and the law.

Raises Standards

In this unique role, Sigma Delta Chi constantly endeavors to raise the standards of competence of its members, to recognize outstanding achievement by journalists and to promote recognition of the fact that journalism is a true profession.

Founded In 1909

The fraternity was founded at DePauw University, Greencastle, Indiana, April 17, 1909, by ten undergraduate students. A non-profit, voluntary association, it now has a world-wide membership of men engaged in virtually every

field of journalism. Its membership extends horizontally to include men engaged in the communication of fact and opinion by all media, and it extends vertically to include in its purposes and fellowship all ranks of journalists.

—From "Toward a Better Understanding of Sigma Delta Chi."

Purpose Of Sigma Delta Chi

1. To associate journalists of talent, truth and energy into a more intimately organized unit of good fellowship;
2. To assist the members in acquiring the noblest principles of journalism and to cooperate with them in this field; and
3. To advance the standards of the press by fostering a higher ethical code, thus increasing its value as an uplifting social agency.

Drs. Gates, Last Of 1925 Faculty, Retire

With a combined record that totals more than 60 years of service to Tech, Dr. William Bryan Gates and his wife, Dr. Eunice Joiner Gates, will retire from the college faculty this spring.

What are the impressions they will leave behind on a busy campus of 12,000 students, faculty members and educators and general staff members? The absence of two figures who have become so instilled in this atmosphere of teaching and learning will certainly not go unnoticed.

"Their leaving will create a void that will be difficult to fill," said Dr. Robert C. Goodwin, Tech president. Dr. Goodwin has been a colleague of the Gates' in the School of Arts and Sciences.

Dr. and Mrs. Gates are the only two remaining members of the original faculty when the doors of this institution were first opened in 1925.

Their span of service at Tech may be colorfully illustrated by a statement made by Mrs. Gates during a recent Spanish class. She mentioned that, several years previously, she had taught the father of one of the students in the class.

"So, you see, I'm really a grandmother to her," she smilingly quipped, with tongue in cheek. "Just the other day a former student of mine called and said, 'You told me what to do 30 years ago — now (that you're retiring) I'm going to tell you what to do!'"

Dr. Gates is currently serving as professor of English and dean of the Graduate School. Mrs. Gates is professor of Spanish and Portuguese.

Due to a heavy enrollment in freshman English, Mrs. Gates taught in that area when she first came to Tech. After receiving her Master's and Ph.D. degrees in for-

eign languages she moved on to that department. In 1936-37 she was acting head of the department of foreign languages, and was made a full professor in 1945.

Besides his position as English professor, Dr. Gates has been assistant dean of Arts and Sciences

WILLIAM B. GATES

and English department head. He has been Graduate Dean since 1950.

"Throughout the years the department of English has profited immensely from the presence and leadership of a literary scholar of Dean Gates' achievement," said Dr. John C. Guilds, present English department head. "The department is indeed fortunate to have his continued service as professor of English after his retirement as Graduate Dean."

Even in retirement, the two professors will not be "retired." Dr.

Guilds here refers to Dr. Gates' plan to teach part-time during the 1963-64 school year. Mrs. Gates will write a textbook for Portuguese students.

"I have found Dr. Gates the easiest person to work for," said Mrs. Irene Temple, who has been employed in the Graduate School offices for almost ten years. "This is the most pleasant place I've ever worked and I've certainly enjoyed every minute of it."

"Dr. Gates has done a tremendous amount of work for Tech — especially in the academic sense," she continued. "There have been many changes in regulations governing the Graduate School under his administration. Standards have definitely been raised. Dr. Gates should have the entire credit for this. The Graduate Council has helped, of course, but the majority of the improvements have been due to his leadership."

"I think Mrs. Gates is a most

outstanding teacher," said one student, "so ladylike, thoughtful, conscientious and kindly."

EUNICE JOINER GATES

"Mrs. Gates is the fairest teacher I've ever had," another said simply.

Other random comments by students contacted included the statement, "She's such a scholar and student herself."

"Don't be satisfied with what you learned last year," she recently urged a class. "You don't make any progress that way." After all, when you consider your life expectancy, four years is really a very short time to be spent in securing an education."

Perhaps the secret of the success of Dr. Gates and Mrs. Gates as educators may be found in a story concerning them in the 1962 Homecoming edition of the *TOR-EADOR*. When the reporter asked them if they had any advice for contemporary students, their answer was an unhesitated, "Study."

Sigma Delta Chi salutes Dr. and Mrs. William B. Gates.

"ON THE CAMPUS"

Mrs. Allen 'Retires' To Other Endeavors

A woman of tremendous health, energy and vitality . . . a person who has packed a remarkable amount of achievement into a 30-year career at Texas Tech . . . who has been active in countless organizations . . . and perhaps most important of all, a teacher with personal interest in her students . . .

All these things are Mrs. Louise

LOUISE C. ALLEN

Allen, associate professor of journalism at Texas Tech.

JOURNALISM department head W. E. Garets says simply that "She's an amazing woman."

Other professional associates speak first of their immense respect for her — both as a journalist and as a woman with uncanny understanding of student needs and problems.

Legion of ex-students recall her many-faceted professional achievements, her concern for their ca-

reers after they leave school, and in the words of one, "a friend."

MRS. ALLEN announced she will "retire" this spring to devote her time to an intensified schedule of writing and research — a field in which she is already prominent.

A textbook on radio and television writing, numerous contributions to magazines and a regular community newspaper column already number among her achievements.

Her work in professional, civic and Tech organizations speak of years of devotion and activity.

SHE SPEARHEADED formation of the Women's Press Club at Tech in 1938 and guided this organization until it became a chapter of Theta Sigma Phi, honorary women's journalism fraternity, in 1941. She has served as sponsor of this group since that time, many times acting in the additional role of confidante and advisor. She has also sponsored Sigma Kappa social sorority.

Sandwiched in with this schedule of teaching and writing, Mrs. Allen served actively in Lubbock civic affairs.

SHE WAS president of the Lubbock branch of the American Association of University Women.

In 1956 she was Lubbock's "Woman of the Year." She has also been honored in "Who's Who of American Women" and in "Texas Women of Distinction."

But perhaps the people who have been personal associates with Mrs. Allen, and those who have been her friends picture her most accurately.

"**MRS. ALLEN** has one of a teacher's greatest qualities — a personal interest in students as individuals . . . I hope we always remember her example no matter how large Tech becomes," Adrain

Vaughan, Tech director of public information, said.

This quality was further explained by Phil Orman, director of student publications. "Whenever you run into an ex-journalism student anywhere, their first question is 'How is Mrs. Allen?' And the last thing they say is 'Give my love to Mrs. Allen.'"

RALPH SELLMAYER, instructor in the journalism department, painted the same picture. "She has been the prime force in the department for many years in keeping track of our graduates, helping them find or change jobs and in publishing a newspaper of ex-students journalism activities."

Freda McVay, a former student, described her as a woman "who has made a tremendous contribu-

tion to the women at Tech, as a leader, advisor . . . and most importantly, as a friend."

BUT GARETS, as head of the department, has a view of Mrs. Allen as a person whose energy won't let her hear these words.

"I think she'll do a great deal of writing," Garets said, "all of which will reflect favorably on this institution."

The same record that speaks for Mrs. Louise Allen now is still growing.

Press Freedom Is SDX Concern

Sigma Delta Chi long has been aware of the threats to freedom of information. It frequently has sounded the alarm to warn the profession and the public whenever it saw these freedoms endangered.

Since 1946 Sigma Delta Chi has maintained a standing committee instructed to take an active, aggressive leadership in this cause and to cooperate with existing groups working for advancement of freedom of information. Since 1942 the society has maintained a clearing house for freedom of information at its National Headquarters.

3 QUESTIONS

to ask before you buy any one single life insurance policy

1. Will it provide a cash payment large enough to cover heavy immediate expenses and enable your family to get a fresh start free of debt?
2. Will it guarantee a monthly income to help raise and educate your children?
3. Will it help take care of your retirement?

Equitable's new Planned Security Policy provides for your family, if you should die: 1. Lump sum cash payment to beneficiary. 2. Monthly income while children are growing up. For you, if you should live: 3. Cash for your own retirement. All at an unchanging, low premium. To find out more about the new Planned Security Policy, exclusive with The Equitable, call The Man from Equitable.

Industrial Engineers Win First

Industrial engineering department took its fifth straight first place in the recent Science and Engineering Show.

Industrial engineering exhibits demonstrated techniques in production control, plant design, materials handling, work measurement, statistical quality control, product design, manufacturing analysis and organizations research.

Displays in the 31st SE annual show were judged on appeal to the public, explanation of department curriculum and presentation of exhibits.

The industrial engineering display received 3,705 points of a possible 4,000.

Bud Lanham was chairman of the department's exhibit. American Institute of Industrial Engineers and Alpha Pi Mu set up the displays.

READY TO STOMP—Judy Richards, junior, and Bob Fouts, senior, are all decked out for the Phi Mu western dance 8-11:30 p.m. today. Jimmy Heap's Band will play for the open dance at Vann's Catering Service. —Staff Photo

Delegations Plan Trips

Delegates from Tech's history department will scatter to state and regional history meetings in Austin and Albuquerque this weekend and next.

Four faculty members will represent Tech at the Texas State Historical Assn. meeting this weekend. The Austin meet begins today and continues through Saturday. Dr. David Vigness, department head; Dr. Ernest Wallace, professor; Billy Mac Jones, instructor and Richard Marcum, teaching assistant, will attend.

Tech's chapter of Phi Alpha Theta, history honorary, will send five representatives to a regional meeting in Albuquerque, N.M., Friday and Saturday, May 3-4.

Attending will be Dr. Paul Woods, history professor, and Lt. Col. George R. Hull, professor of air science.

Ronald Benson, teaching assistant, will present a paper on the Hay-Pauncefote treaty.

Nancy Vincent, Alpha Theta president, and Sarah Gaston, Austin junior, are Tech's student representatives.

Why Do You Read So Slowly?

A noted publisher in Chicago reports there is a simple technique of rapid reading which should enable you to double your reading speed and yet retain much more. Most people do not realize how much they could increase their pleasure, success and income by reading faster and more accurately.

According to this publisher, anyone, regardless of his present reading skill, can use this simple technique to improve his reading ability to a remarkable degree. Whether reading stories, books, technical matter, it becomes possible to read sentences at a glance and entire pages in seconds with this method.

To acquaint the readers of this newspaper with the easy-to-follow rules for developing rapid reading skill, the company has printed full details of its interesting self-training method in a new book, "Adventures in Reading Improvement" mailed free to anyone who requests it. No obligation. Simply send your request to: Reading, 835 Diversey Parkway, Dept 9894, Chicago 14, Illinois. A postcard will do.

Zsa Zsa Stars In Union Show

Mel Ferrer and Zsa Zsa Gabor star in "Lili," a technicolor movie, at 4 p.m. and 8 p.m. today and 2:30 p.m. Sunday in Tech Union Coronado Room. The Special Events Committee is sponsor.

Grads Discuss Negro Novelist

Grover Lewis and Nolan Porterfield, graduate English students, will lead the discussion at today's Noon Forum in the Tech Union Blue Room.

Discussion topic is contemporary Negro novelist, James Baldwin. Baldwin is author of "Another Country."

Purdue Prof Lectures On European Market

Competition from the European Common Market will force the U.S. to move rapidly if it is to hold onto its world markets or consider expanding them, according to Dr. James Greene, industrial engineer and visiting lecturer at Tech.

His ideas may carry some special weight since he has recently been a consultant to the European Production Agency, a division of the Common Market's organization.

"The U.S. must find ways to produce goods with more efficiency," he declared. "This presents a challenge to our industrial engineers."

Dr. Greene, a Purdue University professor, is spending three days, Monday through Wednesday, at Tech. He is conducting seminars in general industrial engineering research, production control and operations research.

Positions Open For L-V Staff

Applications are now being accepted for associate editor, copy editor and staff artist for next year's La Ventana.

Students interested in these positions should write a letter giving their qualifications, past experience on an annual or newspaper, why they want the job and any new ideas they may have for next year's La Ventana.

Past experience is not necessary, but preferable. Applications should be turned in to the La Ventana office or to either Johnnie Lu Raborn or Travis Peterson by May 1.

These are paid positions, and applicants should be willing to put in a great deal of time.

HONORARY MEETS

Psi Chi, psychology honorary, will meet at noon today in Tech Union, Elmer's Lounge. The group will initiate members and present a slate of officers. Those attending must sign up in the psychology office, X-31.

SURROUNDED—Carol McCormick, Ennis sophomore, was surrounded by cadets from England's Royal Air Force after their captain said, "If I were you blokes, I wouldn't let these ladies sit alone."

As I see it . . .

by johnnie lu raborn

"You think we speak the same language, but we don't," said one cadet from Cranwell, the Royal Air Force Academy in England. I had to agree with him.

Tech's Angel Flight was visiting the Air Force Academy in Colorado Springs. Some were dated with English cadets, who were also visiting. It was a real education.

For years, I've heard the English stereotype came out with "jolly good," "old chap" and "ra-ther." They are all true with the addition of an occasional "quite" and "Oh, my yes."

In England, you are not "out to lunch" but "around the corner." When we have a lousy date he is called "cull" or "bad head," but Cranwell calls them "grimmies."

'MAKING OUT'

It is a mystery how they got it but "cupeake" is said for "making out." Tennis shoes are called "blimp shoes," and a resounding "dash it" means darn or damn.

We Americans take much for granted. These cadets had never seen a drive-in movie or drive-in restaurant. Motels were also new, for they don't exist in England. Some of the guys got their first taste of pizza, Mexican food and pretzels. They didn't like it.

'STATUS SYMBOL'

It is a status at our Air Force Academy for the "firsties" or seniors to have Sting Ray Corvettes. That vast parking lot is full of them. I didn't see five cars under two years of age. The Cranwell "chaps" find it "marvelous" to get to ride bicycles when seniors. They do have cars, but generally these are somewhere in the 30's models. A car 10 years old is relatively new.

I did notice one thing about the cadets as a group. They abounded with national pride. One said, "There will always be an England." To which some of the U.S. cadets sort of laughed. A Cranwell "troop" recounted with a "Don't scoff at it, national pride is a wonderful thing." Their pride was so emphasized that it made me wonder if we "came over" the same way about our country.

On Saturday night, a formal ball was given for our flight, Cranwell and first classmen (seniors) at the academy.

The British boys taught us one way to live up a rather stiff dance. During one of the songs, one Cranwell "troop" yelled "Ants." The cadets immediately fell down on the floor, rolled over on their backs and kicked their feet and arms into the air. At the sound "dead ants," the legs and arms went stiff. Rather quaint, I'd say, but still effective enough to break everyone up.

GHOUL POOL

The Angels with U.S. Academy dates were wondering that night if they were included in the "ghoul pool." It goes like this. The academy hosts arrangements for blind dates for the formals. Cadets within each squadron enter a "pool" for 25 cents. At the dance, squadron officers act as judges and dance with the dates of each cadet entered in the pool. Afterwards, these officers decide which had the worst date and he wins the money. If we did it here, I would be rich.

AS I SEE IT

Sigma Kappa will choose a "Mr. Pledge" at 8 p.m. today in the National Guard Armory. Mr. Pledge will be chosen from fraternity pledges. The Caravans will play for the all-school dance.

Phi Mu will have a western stomp, 8-11:30 p.m. at Vann's Catering Service. The open dance will feature Jimmy Heap's band. Tech Union also is having a western dance from 8-11:30 p.m. in the Ballroom. Jimmy Mackey is playing.

KAPPA KAPPA GAMMA

An informal "German Beer Garden" will be the setting for the Kappa Kappa Gamma dinner dance at 6:30-11:30 p.m. today.

Delta Sigma Pi will have its Rose Dance from 7:30-12 p.m. Saturday at the Pioneer Hotel.

Newman Club will go on a picnic Sunday to Palo Duro Canyon.

Red-White Skirmish Ends Spring Training

Scarborough, Ben Elledge Opposing QBs

By ARTIE SHAW
Toreador Sports Editor

A pair of shining freshman quarterback prospects will be opposing each other at 4 p.m. in Saturday's final spring training scrimmage.

Featured will be Danny Scarborough of Quanah and Ben Elledge of Brownwood.

The annual contest is the rubber game of the series, as the Reds jumped to a quick two-game advantage, only to have it taken away from them in the last two outings by the underdog Whites.

Two upperclassmen quarterbacks, Bill Worley of Midland and James Ellis of Lubbock, underwent knee surgery in December and will probably not see action, although they will be suited.

Statisticians Overworked

With both the Reds and the Whites threatening to "loosen-up" their previously tight offenses, the stress could be worse on the statisticians than on any one else.

Last week the Reds gathered 364 yards of total offense in a losing cause, while the Whites haled and threw for 277 in their 20-12 victory.

Long gainers have been the word of the day thus far, and any

Tech Linksmen Meet UT At Meadowbrook

Texas Tech, in an effort to get back into the Southwest Conference golf race, engages the University of Texas here on Lubbock's Meadowbrook golf course today.

Tee-off time at Meadowbrook is 12:30 p.m.

Coach Jay McClure's linksmen, 4½-1½ losers to Texas Christian University here Monday, will also be motivated by a desire for revenge. Texas sports five lettermen from the squad that downed the Red Raiders 5-1 in Austin last year.

Texas Tech currently has a 14½-9½ standard. The Raiders lost to Texas A&M, knocked off Rice 6-0 and defeated Baylor 5-1 before dropping the match to TCU.

Texas' players will probably be Bill Munn of Midland, Randy Geiselman of Houston, Oscar Goode of Austin and Pat Thompson of Mission.

Texas Tech golfers for the match will probably be Bruce Dobie of Worcester, Mass., Richard Yates of Corpus Christi, Housty Brewer of Andrews and Jim Davidson of San Angelo.

Yates is Texas amateur champ, and lost his first-SWC match of the year to Jack Montgomery of TCU last week.

BILL WORLEY

. . . Will not see action

more would be just icing for the cake.

Jim Zanios, Albuquerque full-back, for example, took a handoff from Red quarterback Ben Elledge and raced 52 yards off tackle in a spectacular gainer.

Elledge connected on two long passes, one to all-Southwest Conference end, David Parks, for 44 yards and another to Stimmert half-back, Donny Anderson, for 41 yards.

For the rubber game, each having won two contests, lineups will be exactly the same as last week. There may be a trade at half-back between David Baugh of Rotan, a Red last week and Jimmy Edwards of Roysse City, who played for the White squad last week.

Admission is \$1 for adults, 50 cents for students and Tech students will be admitted by showing their identification cards.

Traffic and Security

The staff is comprised of a chief, 10 commissioned officers, one night sergeant, two radio operators, one secretary, one clerk and two part-time employees. There are three radio-controlled patrol cars. In October, 1962, there were 6,240 cars registered to park on campus.

Tech Netters Challenge Rice, Texas In Important Matches

Texas Tech tennis players, in their next two matches, have a chance to influence the outcome of the Southwest Conference championship campaign.

In successive matches—against Rice University here Saturday and against University of Texas in Austin Monday—the Red Raiders tackle the teams currently sharing the lead.

Coach George Philbrick's netters, besides playing the role of potential spoilers will be out to guarantee or better their own third place position. Tech is 14-4 following wins over Baylor University 5-1 and Texas Christian University 6-0 and a split with Southern Methodist University 3-3.

Raiders' netters will be Daryl Allison of Lubbock, Greer Kothmann of Junction, Beau Sutherland of Kerville and Robert Peterson of Wichita Falls.

Rice University is led by the 1962 Southwest Conference finalist in both singles and doubles, Fritz Schunck. The Owls, coached by Sammy Giamalva, are defending Southwest Conference team champions.

Last year Rice downed Tech 6-0, and the Longhorns battled the Raiders to a 3-3 draw.

A re-match of last year's SWC finals doubles match, won by Allison and Sutherland over Schunck and DeEdward Greer, has been virtually ruled out by re-pairings on both teams.

Matches, on the Varsity Courts, will start at 1:30 p.m. The public is invited free of charge, Coach Philbrick pointed out.

GEORGE PHILBRICK
... Tech tennis coach

Pics Down AFB, 20-12

Texas Tech's Picadors picked up their eighth win of the season Wednesday as they ran away from Reese Air Force Base, 20-12.

The game, which took three hours and twenty minutes to play, was called at the top of the ninth inning due to darkness. Tech slammed out 17 hits, as converted basketballer Dadid Schmidly picked up his first mound victory of the season. Schmidly pitched the first four innings and left the game with a 15-5 lead. In his four innings stint, Schmidly allowed only four hits, while striking out six and walking three.

The Picadors were led at the plate by second-baseman Buzz Henderson, who collected four hits out of five at bats. Jim Murrell and Ronnie Holly drove in the most runs with five RBI's apiece.

"FLORA-SCENT" makes The Perfect MOTHER'S DAY Gift

Raiders Visit Highlands Nine

Two improved baseball teams—Texas Tech and Highlands University—clash in a doubleheader at Las Vegas today.

Since Texas Tech posted a pair of wins, 5-2 and 3-0, here earlier this month, the Cowboys have won six straight and now are 10-10 for the season.

The Red Raiders have a three-game streak, and five of the six, going for them. Their only loss came at the hands of the Abilene Christian College nine. Other wins are the twin-killing of Highlands and a double victory over ENMU.
