Panel Talks On Prejudice

A panel discussion on press prejudice will be featured at a joint meeting of Theta Sigma Phi and Sigma Delta Chi at noon Saturday.

"It is a good opportunity for non-journalism students to present their challenges to the field of journalism and come to understand the field more fully," said Jody Allen, president of Theta Sigma Phi.

MEMBERS OF THE panel will be W. E. Garets, journalism dept. head, Dr. Dan Nimmo, of the government dept., Bill Hams, Avalanche-Journal night-side city editor, and C. W. Ratliff of KCBK.

Nimmo and Garets will present failures of the press and Ratliff and Hams will answer these accusations.

SINCE THIS IS AN election year, discussion concerning press bias in elections will also play a part in the discussion.

Those attending must sign one of the two bulletin boards located in the Journalism Bldg. before 10 a.m. today. A charge of 77 cents will be collected at the Mesa Room entrance from those desiring a meal.

FOLLOWING THE panel discussion a short business meeting for Sigma Delta Chi will be held. Pledges are asked to attend.

Angel Flight To Compete

Thirty-three members of Angel Flight at Tech will travel to Dallas next Friday for an annual drill competition with Angel Flight groups from Texas and Oklahoma. Tech has won the competition for the past four years.

The Angels have been practicing five days a week since Feb. 1, and six days weekly for the past two weeks, according to Drill Commander Kay Haldy.

They will compete in regulation and original drills and will be judged mainly on precision.

Drill Commanders of the various groups will be competing for "Best Drill Commander." They are judged on commanding ability, number of commands given and group control.

Staff photo—Smith

DRILL PRACTICE — Tech Angel Flight members are shown practicing one of the drills they will use in the annual drill competition to be held in Dallas next Friday. Tech's Angels have won the competition, based mainly on precision, for the past four years. Thirty-three girls from Tech will compete with others from Texas and Oklahoma.

Young Elected To Post

A member of the delegation from Great Britain won the Model U.N. General Assembly presidency in balloting Wednesday night.

DWIGHT YOUNG, junior English major, won the post on the second ballot in a run-off with Keith Strain.

Young will preside over General Assembly meetings March 13-14.

SECRETARY-GENERAL Alan Henry released a letter from Phillip Deane, who will speak before the Saturday-morning Assembly. Deane pointed out the educational aspect of the event by saying, "The Model General Assembly is an admirable means for learning, for cultivating the knowledge and engendering the argument that will produce a wise choice."

Henry also announced the showing of a film—"Come Back, Africa"—to acquaint Techsians more fully with the Model U.N. topic. The film will be shown four times in the Coronado Room of the Tech Union.

THE FILM was made secretly in South Africa and depicts the problems of the non-white in South Africa. The thread of the story is taken from the actual experiences of the non-professional collaborators on the film.

Also featured in the film is Miriam Makeba, well-known South African singing star. The film was a Time Magazine selection among the Ten Best pictures of the Year.

Fifth Film Shown

Another film will be shown today as part of the Film Festival Week. "Man in a Cocked Hat" is the title of the film to be shown at 3 p.m. in the Coronado Room of Tech Union, and at 7 p.m. in the Aggie Auditorium. On Saturday, "Ballad of a Soldier" will be shown at 3:15 p.m. To complete the festival there will be a 7 p.m. showing of the feature film "Sand Castle."

— Civil Defense —

Four Hours—Enough Warning For Fallout?

(EDITOR'S NOTE: This is the second in a three-part series on Civil Defense on the Texas Tech campus.)

By **CAROLINE ENGLISH**
Tornador Managing Editor

Four hours—that's how long the Lubbock Civil Defense units estimate this city will have an advance warning before the effects of fallout reach Lubbock.

The time—not considering a direct attack—has been determined by applying the wind data to the nearest main bombing target which would probably be Roswell, N.M., 135 miles west, according to Harry Tower, director of Lubbock CD.

The first warning would come with the steady blast from city alert sirens lasting from three to five minutes. A three-minute wavering tone from the same sirens is the signal to take cover—in pre-planned protective covering or in the nearest fallout shelter.

Tech has no working siren system for civil defense alert, and the nearest city system is located at a fire station at 3rd St. and College Ave.

HARD TO HEAR

Even at full blast, the sirens would be hard to hear in a closed classroom. Practice alerts once each month by the city testing the signals go almost unnoticed on the campus.

And there's a special reason for Lubbock being better equipped than other cities for protective action through disaster plans and as many shelters as possible, according to Tower.

"Lubbock wouldn't be a target for strategic bombs," the director speculated, "but we would get the fallout from cities like Roswell, Amarillo, El Paso, Abilene and Wichita Falls—all with strategic air bases and all in a great circle around the city."

Reese Air Force Base, west of the city, is only a training center, he explained, and would not be particularly important.

"Lubbock may well be the last place of any size where law and order would still exist," Tower said. "We would get refugees and survivors from these other areas."

For these reasons, Lubbock residents, including the students at Texas Tech, need to know about civil defense.

Tower estimated that three out of every five students wouldn't know what to do, couldn't correctly answer what fallout is and don't know what fallout shelters are supposed to be.

First, fallout is the radioactive debris of a nuclear explosion, earth drawn up into the blast area and contaminated by radioactivity. Each of these particles gives off radiation in the form of beta rays, dangerous if swallowed, inhaled or touched to the skin, and the gamma rays, which penetrate like X-rays and create the need for protective shields.

WHAT TO DO?

For Techsians, the "what to do" would be more simple. The campus has 26 buildings with basements that have been surveyed and approved as adequate fallout shelters for 17,000 persons.

These buildings are the new Library, Women's Gym, Music, Tech Union, Infirmary, Administration, Agriculture, Home Economics, Chemistry, Science, C&O, Chemical Engineering, Architecture Computer, West Engineering, Museum, Journalism, and Drane, Sneed, West, Doak, Horn, Bledsoe, Gordon, Weeks, Gaston and Carpenter Halls.

These buildings have not been marked or stocked, but they are here and they are safe.

In most cases, Tower indicated, the plans employed in Tech dorms for tornado warnings would be sufficient in the case for a national alert.

Sufficient protection can also come from shelter

which provides one or a combination of the following things:

- an inch of steel
- 18 inches of concrete
- two feet of earth
- five feet of wood
- five feet of tight hay
- five feet of water

"Anything less would at least stop a percentage of gamma rays," Tower explained.

BETTER THAN MOST

Protection offered by the Tech shelter sites offer an average 60 to 70 per cent protection, which "is probably better than most" in the city, he added.

With only 40,000 spaces for fallout protection in a city of more than 140,000 persons, a national emergency would cause utter chaos, Tower predicted. But the story would be the same all over the country, where there is shelter space for only 110 million Americans, the defense director said.

"If we were given a matter of days for warning, we would tell the people not within 10 minutes walking distance of a fallout shelter to evacuate to Big Bend country," he said.

Why 10 minutes? If they couldn't get to the shelter in 10 minutes, it would already be full, Tower explained.

"The sense of urgency has been taken away from civil defense at the moment," he said. "All this talk of peace, disarmament, test ban treaties has served to de-emphasize the importance of fallout shelters."

Yet, Tower pointed out, while President Johnson asked for a decrease in overall defense spending the appropriations for civil defense jumped from \$100 to \$400 million.

Editorial

Does SC Statute Violate By-Laws?

Recently the legislative branch of Tech student government—the Student Council—passed a bill establishing a cheerleader screening board.

That action, in our opinion, is illegal.

The proposal approved by the Council representatives on a 20-5 vote creates a six-member board to evaluate cheerleader candidates on their qualifications to be a cheerleader.

Candidates who are judged qualified by the board will be allowed to run for the positions in a student body general election.

The bill was rushed through the Council so that the proposed board could be in operation for this spring's election.

The stated purpose of such a board is:

"To insure that every person entered in the popular election for cheerleader knows the requirements for and the duties and responsibilities of a cheerleader.

"To assure the student body that every candidate is at least to some degree qualified as a cheerleader and, if elected, could adequately represent Texas Tech at all athletic contests."

This purpose per se is not subject to debate. There can be no argument that better qualified cheerleaders are desired; but as a responsible student government, the Student Council must give assurances that in all legislative matters it will follow proper procedure and the "due process of law."

Whether or not a "screening board" is desired or will solve alleged problems in getting qualified cheerleaders is one question.

Whether or not the Student Council acted legally to establish that board is the question posed here.

Let us examine the following three points:

- The Council clearly violated its own by-laws in establishing the board.

The by-laws specifically outline the procedure a candidate must go through in order to qualify for participation in an election. In reference to the cheerleaders (called "yell leaders" in the by-laws), no provision is given for a screening board.

If the Council by-laws supercede any legislation, then the recent Council action is illegal until such a time as the by-laws are amended to include this new procedure.

- The constitutionality of the Student Council action has been debated by many persons. The question here is not so clear.

Conceivably one could have a valid point by arguing that the constitution provides for a free and secret election and that the proposed "screening board" is an infringement upon that guarantee.

This is a question that only the judicial branch of student government—the student Supreme Court—can answer. Why no one has appealed to that body for its opinion or decision is another matter. That brings us to our third point.

- One role of the student Supreme Court is to advise the Council on any legislation where there is a controversy concerning its legality. The advice is given only upon request. It has not been requested.

These questions must be resolved. They should be resolved now before the general election. Either the Student Council must act or the student Supreme Court must act to set things right.

High School Speech Meet Starts Today

More than 480 students representing 32 Texas high schools will meet here today and Saturday to take part in the annual high school invitational forensic meet.

Entries have been received for debate, persuasive speaking, informative speaking, poetry reading, prose reading and one-act plays.

A sweepstake and runner-up trophy will be presented to the two schools designated best over-all. In addition, trophies will be presented for first and second place in the three debate divisions—AAA and AAAA schools, boys; AAA and AAAA schools, girls; and AA, A and B schools, both boys and girls.

Members of the speech department, both student and faculty will judge the competition which is sponsored by the Tech Forensic Union. Most student judges are speech majors.

The meet will begin at 1 p.m. today and should be concluded by 3 p.m. The Activities Bldg. of the First Baptist Church, 2201 13th

Street has been chosen as the site of the meet.

Contact Mr. Robbins, ext. 2151, Ag Engineering Bldg., room 207 for more information.

Group Sets Slave Day

Sigma Alpha Eta, Tech's speech and hearing therapy society, will hold a "Slave Day" Saturday to raise money for new equipment and supplies for the speech and hearing clinic.

According to the organization's treasurer, Joe Melcher, the students will wash cars, mop floors, baby-sit, rake yards, type "or just about anything you will let us do."

Lubbock residents and Techsians may call the clinic, PO2-8811, extension 2155, if they have a job these students can do.

Melcher added that in addition to the proceeds from "Slave Day," donations to the clinic would be welcomed.

ROTC Staff Named

Cadet officers for Army ROTC Brigade and Battalion positions have been named as follows: Cadet Col. T. A. Cox, Amarillo, Brigade Commander; Cadet Lt. Col. Richard C. Linnartz, Lake Jackson, Brigade Executive Officer; Cadet Sgt. Maj. Alfred D. Stroud, Lubbock, Brigade Sgt. Maj.

Officers for the 1st Battalion are: Cadet Lt. Co. Bobby N. Kaerwer, El Paso, Battalion Commander; Cadet Maj. Ben T. Edwards, Matador, Battalion Executive Officer; and Cadet Sgt. Maj. Vernon F. Danner, Odessa, Battalion Sgt. Maj.

Officers for the 2nd Battalion are: Cadet Lt. Col. Joseph E. Cannon, Midland, Battalion Commander; Cadet Major Elmore J. McCarty, Lubbock, Battalion Executive Officer; and Cadet Sgt. Maj. Ronald K. Dameron, Lubbock, Battalion Sgt. Maj.

Commander of the 3rd Battalion is Cadet Lt. Col. Gary D. Miller of Vernon; Battalion Executive Officer is Cadet Maj. Ronnie R. McWilliams, Littlefield; Battalion Sgt. Maj. is Cadet Sgt. Maj. Robert B. Denning, Idalou.

THE BELL TELEPHONE COMPANIES SALUTE: JOHN ARNOLD

The Southwestern Bell business office in West Memphis, Arkansas, is managed by John Arnold (B.S.B.A., 1960). John attained his present position in just two short years with the telephone company.

John directly supervises the personnel who are responsible for sales, collections and all other Southwestern Bell commercial operations in the area, which includes six nearby towns. In the area around West Memphis, John is the telephone company.

His success can be attributed to meeting the opportunities available to anyone who works for the Bell System. After a brief training period analyzing business office operations, he was assigned a supervisor's job. It wasn't long before he moved on to his present position.

John Arnold, like many young men, is impatient to make things happen for his company and himself. There are few places where such restlessness is more welcomed or rewarded than in the fast-growing telephone business.

BEARS BOW TO TECH

Raiders End Season With 96-82 Win

WACO — Nine Red Raiders got into the scoring act last night to overpower the Baylor Bears, 96-82.

Four of Tech's five starters finished the game in double figures, with the other starter, Tom Patty, ending up one point shy of the double digits with nine.

The win by the Raiders left them with a 11-3 mark in Southwest Conference play, tying the won-loss mark set by the SWC championship teams of 1961 and 1962. The Raiders set another SWC mark for most points scored in a fourteen

game season, winding up play with 1,189 points and an 84.9 game average.

One of the big reasons for the lopsided score was the freethrow margin. The Raiders hit 16 of 19 attempts while the Bears hit only 13 of 22.

Norman Reuther joined three of his other teammates in going over the 300 point mark while leading all Tech scoring for the night with 21 points. The tall sophomore went into the game needing 18 to go

past the 300 mark and hit his 18th and 19th points on a 20-foot jump shot midway through the second half.

The game was nip-and-tuck throughout the first half. The lead changed hands eight times in the frantic stanza and was tied seven.

The Tech quintet led the Bears by only four points at the end of the period, 49-45.

As the second half started, Spencer Carlson hit a short jump

shot to pull the Bears within twoHarold Denney hit 20, Glen Hal-lum collected 18, Dub Malaise pick-as close as the Bears could get and ed up 14, Patty hit for 9, Russ the Tech team was never headed Wilkinson connected for 9, Bill during the period. Murren got 3, and Sid Wall and

For the Raiders, Reuther hit 21, Mike Gooden both got 2.

PEK Takes Carpenter For Title

Phi Epsilon Kappa led Carpenter Hall all the way last night to take the All-College Intramural Basketball Championship, 77-63.

The main difference in the scoring was at the freethrow line. PEK connected for 29 points at the charity mark, while the dormitory team collected only 21.

Three players hit in the double figures for the PEK team. Allen Wilson was high man for the p.e. majors, collecting 22, followed by Dale Glaze with 18 and John Dupre with 10.

For the second place Carpenter Hall team, David Whitfill was high point man with 20, followed by Richard Purcell with 15. Score by quarters—
