

Delegates Kick Off Tech U.N.

Delegates representing 52 different countries will gather today in the Ballroom of the Tech Union for kick-off activities for Tech's second annual Model United Nations.

Dwight Young, recently-elected president of the General Assembly, has said that this is one of the most important meetings in the Model U.N. planning schedule.

SECRETARY-GENERAL of the Model U.N., Alan Henry, has said that the Ballroom will be set up for this meeting as it will be during the Assembly meetings on Friday and Saturday.

Delegates will be seated in the places they will occupy for the Assembly meetings, and final orientation for the Model U.N. will be the main order of business at the 7 p.m. meeting.

Final preparation will be made for Friday's Model U.N. opening. The Friday session will be devoted to presentation of position papers by the participating delegations. Each country will outline the stand it will take on the Assembly's discussion topic—Human Rights and Apartheid in South Africa.

THE SATURDAY session will be highlighted by an early-morning address by Philip Deane, director of the United Nations Information Center in Washington, D. C. Following Deane's address, the Assembly will open debate on resolutions pertaining to the topic.

Staff photo—Harrison

SPRING IS NEAR — Warm, pleasant weather for the past few days has brought sure signs of spring in Lubbock—Tech students relaxing at Mackenzie Park. Mary Beakey and Don Forester, above, play with geese by the Lake.

Steve George won the presidency of Tech Union for the 1964-1965 school year at a meeting of the Union Program Council Wednesday night.

George, a math major, will succeed Kay Cravens in the position and will take office May 1.

FOUR OTHERS NAMED

Four other executive officers won their 1964-1965 positions at the same meeting.

SUE WALKER, sophomore education major, will succeed Cathie Thompson to the Union vice presidency. Sally Childress, junior education major, will follow Loysanne Slaughter as personnel director for the Union. Judy Wimbish, junior education major, will replace John Moeser as Public Relations Council director; and Betty Johnson, sophomore accounting major, will replace Nell Anne Walter when she assumes duties as secretary-treasurer of the Union.

John Moeser, current PRC director for the Union, said that the five new executive officers were the nominees submitted by a nominating committee. The committee selections were made official in Wednesday elections by the 20-member Program Council.

MANY APPLIED

Karen Moore, Union program director, pointed out that the nominating committee's slate of candidates was selected from a much larger number of candidates for the offices. She said that there were many applications turned in for each post, and the list was then narrowed to the five candidates who won the positions.

A RELEASE from the Union Program Office outlined the duties and responsibilities of the new president. The junior vice president of the Honors Council will become responsible for guiding the Union

Program Council and Executive Council.

He will conduct and preside at all meetings of these councils, and, after conferring with executive officers and Program Director, he will be responsible for drawing up the meeting agendas.

The president represents the Program Council before the student body and is responsible for establishing contacts with other campus organizations, the administration and other schools.

Dedication Will Open Beef Farm

Texas Tech's \$500,000 Killgore Beef Cattle Center near Amarillo is being dedicated today.

The activities for the day include a round of speeches, an old-style Texas barbecue, and an auction and sale of the 110 performance tested bulls which were the first inhabitants of the center.

Amarillo Mayor F. V. Wallace heads a list of seven speakers. He will deliver a welcome address to guests attending the dedication.

Ferry Carpenter, long-time Colorado rancher and former chief of the U. S. Bureau of Land Management, will give an address entitled "A New Goal for Beef Producers."

Manuel DeBusk, Dallas, chairman of the Tech Board of Directors, and Dr. R. C. Goodwin, Tech president, will deliver the addresses which will officially open the Center.

—Fraternity Focus: Part Two—

New, Better 'Deal' In View For Pledges

By CECIL GREEN
Toreador Copy Editor

If current plans are carried through to next year, the fraternity pledge system at Texas Tech will be offering rushees a new and better deal.

However, some of the 250-plus pledges accepted by social fraternities this spring may wonder how anything could make rushing and the pledge system any easier for them.

But the new pledge now being studied by the Interfraternity Council will help not only pledges but also the fraternities themselves, according to IFC President Gary Lawrence.

Several days ago, IFC delegates unanimously accepted a proposed "semi-deferred" plan to replace Tech's worrisome pledge system now in use.

MUST HAVE 2.0

"Under the current 'deferred' system," Lawrence said, "an interested pledge has to make a 2.0 grade average only during the semester immediately preceding the semester he pledges. The overall grade average does not count at all.

"This means," he continued, "that the individual fraternities are taking at least two pledge classes per year—one in the fall semester and one in the spring."

Under the broad outline of the new semi-deferred scheme, there would probably be only one pledge class taken during the year, and that one during the fall.

"With this plan," Lawrence said, "a pledge class might be accepted early in the fall, and grade requirements could be met during the time the class is pledging and before they are initiated.

PLAN'S ADVANTAGES MANY

"The advantages to this plan are many," he enumerated, "but the biggest one is that it will save the fraternities time and money in the long run when they don't have to spend money for rush and pledge parties all year."

As the situation stands now, all 11 fraternities on campus, with a total of more than 800 active members, are in constant competition all year, trying to round up members for pledge classes several times a year.

"But, with a system something like this," he said, "they can take the one pledge class, bring their membership rolls to normal and work with this one group of pledges the rest of the year. Also, they could have more closed functions without rushees and get to know their members better."

The only other alternative open as a new pledge system is the "pre-rush" idea. As outlined in earlier IFC meetings, this plan would be similar to the one now used by campus sororities.

RUSH BEFORE SCHOOL

That is, there would have to be a Rush Week for male students sometime before the school session each September. At that time, interested males would gather on campus and go through the regular routine of joining a fraternity pledge class. The pledge period then would begin at the first of the semester.

With the semi-deferred plan, the Rush Week and the pledge period would begin later in the fall semester. And, with the current deferred system, a rushee is "deferred" or held back for a semester until he makes his grades and has proven that he is eligible to join.

"But the fraternities have made their decisions," Lawrence said, "and now we are going to work on the semi-deferred plan. It will be a big step for us to go into a new system, and if it doesn't work, it may hurt the overall fraternity system."

COMMITTEE GETS PROBLEMS

The problem of working out minor details and conflicts is now in the hands of a special IFC committee, composed of representatives from each of the fraternities.

But no matter which pledge system the combined fraternities adopt, there is one thing that will basically remain the same—the routine for becoming a fraternity pledge.

"Since there is no 'official' (college approved) way a prospective pledge can express his interest during registration," Lawrence pointed out, "it is necessary

that the fraternities work on a personal contact basis—talking to male students and trying to interest them in joining."

Then comes Rush Week when all the fraternities prepare formal rush parties at the individual houses, all for the purpose of meeting prospective members and trying to sway "the better applicants" to their part of the fraternity fold.

On the final day of Rush Week, commonly called Convocation Day, all the rushees meet in one central place and sign a choice card, indicating three fraternities, in order, that they would be interested in joining.

HAVE COMPLETED WORK

By this time, the fraternities have also completed a lot of work: they have issued "bids" to rushees they would like to have in their organization and they have done a lot of personal contact work, trying to get the men they want to list their fraternity first on the preference cards.

Also, the fraternities have prepared lists of their own indicating the men they want to accept as pledges.

These two lists are then compiled in the Dean of Student Life's office, with the rushee's choice checked against the lists the fraternities submit.

Once everything is in agreement, a third list is drawn up and posted—a complete list of each fraternity's pledge class—as compiled from the other two lists. Then the pledgship begins.

PROGRAM FOR INDIVIDUAL

"The pledge program is on an individual basis," Lawrence said, "with each fraternity setting its own rules. But in general, a pledge usually has to work on some group project and complete other work set up by the fraternity."

After the pledge period, the formal initiation ceremony is held after grades are posted for the semester the pledges are pledging. Therefore, under the present system, initiation is in the fall for spring pledges and in the spring for fall pledges.

But, this may be changed in the next few months, depending on the final outcome of the proposed semi-deferred system and the work of the IFC committee.

CECIL GREEN

Goodwin Backs Faculty Senate

The Faculty Advisory Committee moved one step closer Wednesday to getting a Faculty Senate established at Tech, according to Dr. William Cain, FAC chairman.

Dr. Cain said Dr. R. C. Goodwin, Tech president, had agreed to meet with a FAC subcommittee to work out final details on the constitution for the proposed senate.

Dr. Goodwin also agreed to bring the senate proposal before the Board of Directors at their April or May meeting depending on how soon the constitution is completed, Dr. Cain said.

In other major business the FAC discussed the name change issue. Also the spring faculty meeting was discussed and canceled for this year because of lack of business to be conducted.

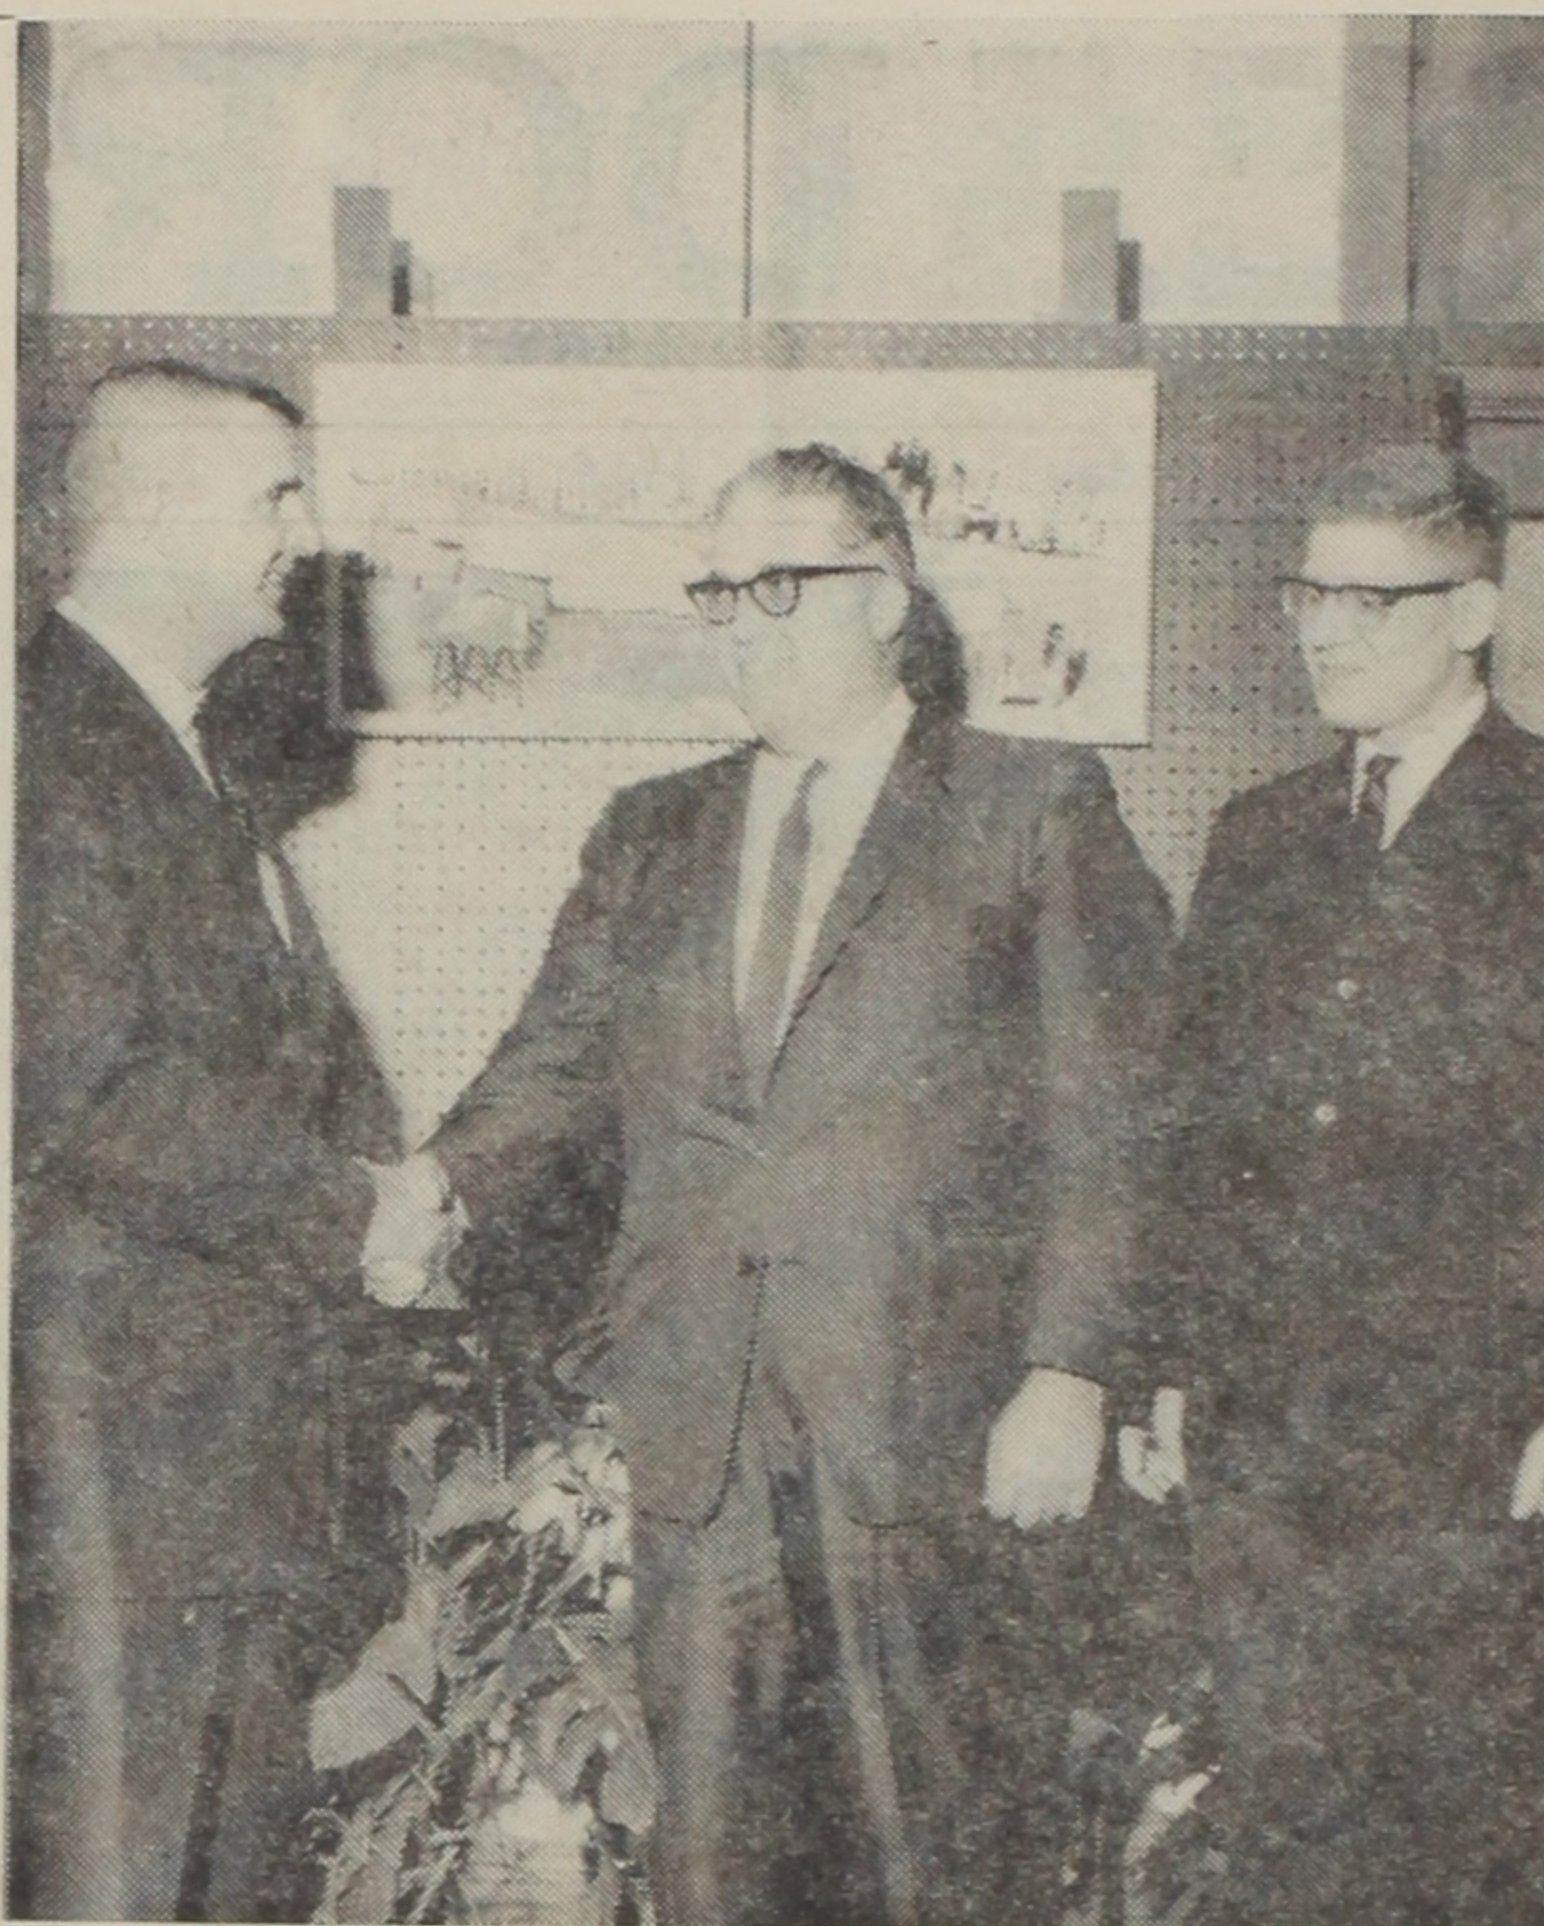

Sing Song Date Reset For April

Phi Mu Alpha's annual interfraternity sing has been rescheduled for April 30.

All sororities and fraternities are invited to enter. The deadline for the \$25 entry fee is April 1.

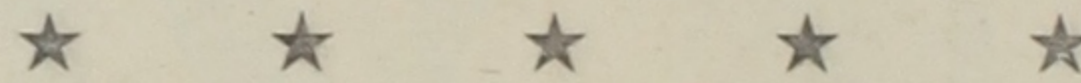

Each organization will present one fraternity song and one other selection. The judging will be on a 70-30 basis this year, 70 per cent will be on music and 30 per cent on production.

There will be a meeting of all sing song leaders next Thursday at 5:30 p.m. in room 202 of the Music Bldg. The announcer for this year's sing will be Jim Schiermeyer, Tech faculty member and announcer for Tech basketball games.

Staff photo—Courtney

IEEE WINNERS — Travis L. Simpson, left and Bruce D. Powell, right, are congratulated by Dr. Harold A. Spuhler, center. Simpson won first prize and Powell second in a technical paper writing contest.

Simpson, Powell Win IEEE Paper Contest

The Texas Tech Chapter of the Institute of Electrical and Electronics Engineers (IEEE) announced the winners of the local Student Paper Contest, Wednesday.

Travis Simpson, senior from Dierks, Ark., has won first prize consisting of \$25 and Bruce Powell of Shaker Heights, the \$15 second prize.

The two winners were chosen from a group of four entries on the basis of the oral presentation of their papers. Each paper was required to take 20 minutes in its presentation. The first place paper

qualifies for the IEEE Region V meet to be conducted in Dallas.

Simpson, whose paper concerned the method of residual networks, will present his work both orally and in written form to the regional judges April 22.

The Tech senior will be competing against representatives from all the IEEE chapters in Region V and will be graded 55 per cent on his oral presentation and 45 per cent on his written composition.

If Simpson is unable to attend the Dallas meet, Powell will present his paper on linear adaptive networks.

Service Clubs Aid Exposition

Scout troops from Lubbock and surrounding area will display camping skills Saturday at their biennial Exposition in Lubbock Coliseum.

Explorer troops will show first aid techniques and other emergency services, and Boy Scout troops will demonstrate knot tying, cooking and fire building.

Cub Scout booths will emphasize citizenship and display a pine wood derby. Troops will present Indian dances representing a variety of Indian lore.

Members of Alpha Phi Omega men's national service fraternity and Women's Service Organization are coordinating activities for the exposition.

Performance times will be 2-4:30 and 7-9 p.m. Admission is 50 cents per person.

Weather Outlook

A weak Pacific cool front lowered temperatures slightly over Texas Wednesday and cleared most skies.

Clouds floated above the coastal plains, and inland to Austin, but the great bulk of Texas was clear.

The front had little impact on the Texas weather, although some showers were likely in East Texas before dawn.

The advent of spring is a week off, on March 20.

A long range forecast said the state would be three to seven degrees warmer than normal through Monday with little or no rain.

AUDITIONS WILL BE HELD MARCH 15
IN THE TECH UNION.

IFC Reviews Plans For Greek Playoff

Tech's fraternities will close their basketball season Saturday when an "All-Greek" team clashes with the fraternity league winner, Delta Tau Delta.

Final planning for the game was discussed at the weekly meeting of the Interfraternity Council Wednesday night. President Gary Lawrence presided.

TIP-OFF for the game is 2 p.m. Saturday in the Intramural Gym. A practice session for the 10 men playing on the All-Greek team will be at 5 p.m. Friday, also in the Intramural Gym, according to game organizers.

Members of the composite team include Ronnie Tubbs, ATO; Butch Tabor, Kappa Sigma; Mike Talley, Phi Kappa Psi; Jack Gregory, Pikes; Jim Elliott, Sigma Chi; Rex Downing, KA; Jerry Avery, Phi Delt; Jerry Rawls, Fijis; Carrol Sutton, SAE; and David Schmidley, Sigma Nu.

STARTING lineup for the champion Delta Tau Delta squad will have Ron Silver, David Dean, Mike Kunstadt, Tom Arnold and Richard Perry.

Other matters discussed at Interfraternity Council meeting Wednesday night included an Easter egg hunt for underprivileged Lubbock children.

The hunt, slated for Saturday, March 21, will be co-sponsored by

Tech's fraternities and sororities. Already, more than 130 children have been gathered from the Lubbock Children's Home and United Fund Day Nurseries.

PRESENT PLANS call for the fraternities to provide the eggs, and the sororities to boil and dye them.

A special meeting will be held Friday night for members of the Texas Tech Interfraternity Housing Corporation to discuss the possibility of building fraternity and sorority lodges on land west of the campus.

Committee Passes Chamizal Treaty

WASHINGTON (AP) — The House Foreign Affairs Committee approved Wednesday a bill to implement the Chamizal treaty with Mexico.

Under terms of the treaty, the Chamizal section of El Paso, will go to Mexico, settling a dispute of many years standing.

The bill authorizes \$39.4 million for carrying out the treaty, to be used for land acquisition, relocations and so on. Mexico is to provide part of the expense.

The bill approved by a 17-1 vote by the committee is identical to a bill approved by the Senate previously.

Dorms Seek Applications

Applications for officers in the new women's residence halls are now being accepted by members of Women's Residence Council in the various halls. As soon as legislators are selected by their dorms, applications for that position in the new halls will begin.

Residents who are interested in the office staff during summer school may also file now in the Dean of Women's office.

SC Meetings Continue

Student Council executive officers will visit dorms tonight for the purpose of strengthening the means of communication between individual students and the Council, according to SC vice president, James Cole.

The Council also visited dorms Wednesday. Discussions at these meetings include the proposed entrance marker, the proposed cheerleader screening board, the name change and the upcoming Council elections.

TONIGHT'S schedule includes:

6:30-7 p.m.—Informal Lounge of Dorms 6 and 7.

7-7:30 p.m.—Horn Formal Lounge for Horn, Knapp, and Drane Halls.

7:30-8 p.m.—West Lounge.

8-8:30 p.m.—Weeks Cafeteria for Weeks and Doak Halls.

AFROTC Will Seek Wins In Area Drill Competition

Southern Methodist University will host the AFROTC Area G-1 Conference Friday and Saturday in Dallas.

PARTICIPANTS from 13 southwest colleges and universities will compete in three categories: men's drill team, men's rifle team, and women's drill team (Angel Flight). In conjunction with the two days of team competition there will be a discussion conference for Arnold Air Society representatives of the entering schools.

Texas Tech will enter teams in all competitive events and in the Arnold Air Society discussion conference.

Angel Flight, Sabre Flight, Rifle Team and the local branch of the Arnold Air Society will leave Tech by bus at noon Friday.

FOUR CONSECUTIVE TITLES

Tech's Angel Flight, commanded by Kay Dudley, will open competition Saturday at 2 p.m. The local coeds will be seeking their fifth consecutive title as the outstanding women's drill team.

THE RIFLE TEAM from Tech is also a veteran of the Dallas meet, having placed second in 1963 competition. All shooting events will begin Saturday morning and will be shoulder to shoulder competition.

Sabre Flight, commanded by Col. Samuel R. Gaston, will be seeking its first drill title in a field of 12 entries.

The Arnold Air Society's discussion conference will plan the next area G-1 conference and will discuss common problems facing Air Force ROTC programs of participating colleges and universities.

Correction

Wednesday's story on the Student Council approval of the cheerleader screening board was in error on names. The story said: "Ken Reoh, B.A. representative, said he was in favor of the motion (to postpone action on the final approval) because he believed the (Supreme) Court would declare the screening board unconstitutional for this semester in violation of the Council By-laws."

The story should have said, "Ken Patterson, Engineering representative, . . ."

Whoaaaa There...

Since when is it unimportant whether or not a law is constitutional?

Tuesday night when the Student Council approved the cheerleader screening board, Royal Furgeson, Council president, charged Council members by saying, "Our discussion will not be on the constitutionality of the board. If a student wants to test it on . . . this question, he can do so in the Supreme Court."

Seems to us that the Student Council SHOULD BE concerned about the constitutionality of a ruling BEFORE action is taken.

If SC representatives were confused about the legality of the screening board then it was the responsibility of the Council to thoroughly discuss the issue before it came to a vote.

Making a decision just for the sake of clearing the agenda is not conscientious action. Hasty decisions can be dangerous.

Issues should be discussed and UNDERSTOOD before decisions are made.

We contend that the Council's establishment of the screening board is illegal. The action violates the Council's by-laws.

Some SC members recognized this flaw in the screening board proposal. But the opposition was squelched and the motion passed.

It's the obligation of Tech students to question the constitutionality of the new ruling and appeal to the student Supreme Court.

A cheerleading screening board may or may not be a good idea. But if there is to be such a board, it should be established legally.

—Gayle Machen

— Letters To Editor —

Editor:

For what legitimate reason would a society who is bent on our destruction, our burial, want a copy of the Toreador? We as a people, it seems, are doing everything we can to facilitate our own destruction at the hands of the Reds.

I am not saying, "Don't send them a copy." but I am against a move as trivial as this may seem. They obviously want it for their own reasons, however much it will inflate our ego to send them one.

We shouldn't be honored by their request. We should be insulted.

A concerned super-patriot
William K. Gamble

Editor:

I believe it is about time that we begin to realize the seriousness of our deplorable misnomer, "Texas Tech University." It is quite strange, after the uproar of three months ago, that we take defeat so calmly.

But, apathetic as Techsians seem to be, we drown our sorrows in a "water fountain," in an effort to forget the absurdity that will appear on our diploma.

Why was this "water fountain" kept secret? Supposedly to have a tremendous impact on the students in order to help the fund raising campaign.

Apparently, the "front yard sprinkler" had such an impact as to divert our attentions from that "two-minute" decision made by the Board of Directors.

Speaking of "two-minute" decisions, it is quite evident that the Board of Directors were more concerned over the water frontage than the importance of Tech's name.

Finally, I should like to propose a question: Which is more important to the students, funds for an adequate library, or donations for the construction of an entrance marker?

Thank you,
Dianne Gillard

Dear Miss Machen:

The gods have spoken! Thunder and lightning! Down from the troubled skies fell the great abomination—Texas Tech University. Aggggggggh!

Rain upon the just and the unjust and, brother, this is hail! Our ears refused to believe it and may we never witness its official legislative approval. If there were ever a misnomer this it is.

Please clarify one small point, supporters of

misnomers, walkers in darkness. How in the world are we going to tell people that we graduated from Texas Tech University?

We could, of course, explain that Tech was originally a primarily technological college and that when the powers-that-be at long last realized that she had grown up, there was such a great outcry for dear old tradition that Tech was retained in spite of the dictates of common sense.

But who's interested in hearing such explanations? And, speaking of dictates, we might weakly add that those who weren't exactly in favor of TTU (minor figures such as the student body and the faculty) didn't really have any say in the matter because those aforementioned powers enjoy a position unfamiliar to a democracy.

Fellow students, we urge you to "write your representative" as you have never written before. If ever a situation called for action on your part, this one does. If you can't get satisfactory results from local powers, then hope for democracy in Austin.

We appeal also to fellow ex-students—realizing that we can get no hearing in the "Wayne James Monthly"—to push aside the blinders of tradition and let Austin know that they will not be made a party to the adoption of this great abomination.

While we are speaking of tradition let us point out a fact which is no doubt obvious to many: this conglomerate palliative will never stand the test of time—should it—shudder—be accepted.

There will come another time and other students who do not yet know the bitter taste of unjust defeat, and they will certainly rise up and strike out at this monstrosity and perhaps wonder what ever possessed their predecessors to hang such a tag on their school.

In closing let us go on record as four ex-students of Texas Technological College who would have liked to have graduated from Texas State University and who were most willing to pay loyalty to Texas Technological College but who will never, "... turn to other matters and work for 'Texas Tech University.'" Our education from Tech will not be the greater or lesser for any name change. But, people, yours may be.

Sincerely,
Wendell E. McClendon
Janis A. McClendon

On The Soap Box

... young demo speaks

By MIKE READ
Toreador Feature Editor

Reference to last week's Young GOP column will be fairly short—and it is suggested that frequent reference to that column might be helpful.

WE, AS YOUNG Democrats, were rather surprised to find that it is we, and not the Young Republicans, who seem to have the only interest in state and local politics. But there, in the second paragraph last week, was an undisguised sneer at the level of government the "conservatives" claim is the most important.

In the next paragraph we found an unsupported charge that previous Young Demo arguments were unfair. Surely such charges could be supported with an example—if such example exists.

IN COMMENT on the body of last week's column, we can only suggest a beginning economics course (to correct the statements on inflation) and point out that court decisions (ask any pre-law student) prohibit the application of anti-trust legislation against control of human labor.

While the "conservative" writer is damning "liberal legislation," we Young Demos would like to request that he tell us just how in the world "liberal legislation" can "sap individual incentive" and "harm fixed income workers" and "pander the masses without apparent restraint of a social conscience?"

"LIBERAL LEGISLATION," as we see it, asks for "energetic cooperation" because it is possessed by a strong "social conscience."

Politics is a pattern of activity dealing with the resolution of groups conflict through a process of decision-making.

The political situation is constantly affected by the activities of interest groups.

Political parties are forms of interest groups which attempt to obtain control of the process of control by influencing political behavior—both thought and action.

BECAUSE POLITICAL, social, economic structures are inseparably intertwined, political parties are involved in issues as diverse as civil rights and farm surplus problems.

(1) Strictly speaking—politically—no personal rights exist except as those rights are granted by a national government.

THERE ARE—practically speaking—no "God-given" or natural rights in existence, except as those rights are recognized and sanctioned by national governments.

If a national government, such as our's, purports to grant all citizens equal rights and opportunities, then that government should not—indeed, must not—allow any citizen the privilege denying equal rights and opportunities to any other citizen.

The liberal sees that property rights—state granted—must occasionally yield to human rights.

To further the assertion that confusion is the fault of the philosophy—as seen by the GOP and GOP, Jr.—we would draw attention to the recent appearance on campus of Russell Kirk, the leading philosopher of the neo-conservative movement.

THE FACT THAT Kirk is embraced by Sen. Muddywater is perhaps an indication that the Senator has never read any Kirk.

It was Kirk who told his Tech audience—in defense of American poverty we think—that "the average man in Morocco is more poor (sic—with six university degrees, "more poor" yet) than the poorest man in America."

OBVIOUSLY, THIS poor slob in Morocco is in one hell of a bad way; so Kirk must be arguing merely for increased foreign aid to Morocco.

The local Young GOP is not the only confused branch of the Republican organization.

LITTLE MAN ON CAMPUS

"YOU KNOW THAT NEW MEN'S DORM THEY JUST FINISHED NEXT DOOR? WELL THAT'S NO MEN'S DORM!!"

-By Council-

Screening Procedures Released

By BRONSON HAVARD
Toreador News Editor

Details of how the new cheerleader screening board will operate have been released by Judy Price, Student Council committee chairman.

The specific purposes of the board will be

- To provide continuity within the cheerleader program by having a screening board function annually under the chairmanship of the faculty cheerleader sponsor.

- Through the cheerleader sponsor to insure an annual report

from the outgoing head cheerleader.

- To specifically serve in selecting qualified candidates based upon physical ability, job understanding and true desire to lead and serve.

- To create an awareness of the desired qualifications for cheerleader candidates.

Under general mechanics of operation the board will be composed of the faculty sponsor, head cheerleader, senior girl cheerleader, Student Assn. business manager, Student Council member-at-large,

Saddle Tramps member and a member of the Athletic Council.

BOARD SEES CANDIDATES

All cheerleader candidates would appear before the screening board for the purposes of (a) devising and presenting a new yell with or without old motions, (b) presenting a well-known old yell, (c) demonstrating necessary physical ability and (d) demonstrating job understanding and true desire to lead as determined through a brief application to be submitted prior to the screening board appearances.

THE APPLICATION will contain two requests: "Outline what you feel are the primary duties and responsibilities of a cheerleader at Texas Tech. List specific recommendations for improving school spirit at Texas Tech."

Screening board members will use a voting code for judging candidates.

The following areas will be covered and each will be worth 10 points:

- Over-all body control — coordination, appropriateness of motion to yell.
- crowd control and appeal as ob-

served in voice, diction, and composure.

- originality and value of new cheers and motions
- application data.

JUDGED ON SCALE

Applicants will be judged according to this scale:

- 10-9—Superior
- 8—Excellent
- 7—Good
- 6—Fair
- 5—Poor

AN APPLICANT will be required to attain a score of 25 out of a possible 40 points in order to run in the general election.

Students interested in running for a cheerleader position this spring must return their application by March 19.

LBJ, Kennedy Feud Rumored

WASHINGTON (AP) — The White House, seeking to soft-pedal talk of a political feud between President Johnson and Atty. Gen. Robert F. Kennedy, said Wednesday the two men see each other "from time to time on various matters."

Pierre Salinger, White House press secretary, made the statement in response to inquiries about one report that Johnson and Kennedy no longer speak but communicate through intermediaries.

Asked about reports of a feud, Salinger said, "All I know about it is what I read in the newspapers."

Other White House officials who declined to be quoted by name pictured reports of a feud as being "ridiculous."

Student Violence Erupts In New York Schools

NEW YORK (AP) — More violence erupted in New York City schools Tuesday. Two boys ganged up on a teacher in one incident, and a girl pupil armed herself with a broken bottle in another.

There have been 17 such instances of violence made public in two weeks.

THE LATEST outbreaks occurred in Brooklyn and Harlem.

Police gave this account: At the Brooklyn school, two pupils, John Figueroa, 16, and a boy companion, 15, pushed teacher Ronald Passick, 27, against a wall and started punching him after he berated them for making noise in the hallway.

Other teachers went to Passick's rescue and one of the boys lost a tooth. Both boys were suspended and charged with assault.

IN HARLEM, a girl, 12, re-entered the school with a broken bottle after being called down for running in an inside assembly area and being made to stand in the school yard and "calm down." She was not suspended, but was charged with juvenile delinquency.

At a school in lower Manhattan for emotionally disturbed children, police said a youngster had been telling chums he had a gun and was going to use it on a teacher. Police found no gun.

They took no action.

Frosh Baseball Team Tests Odessa Today

Texas Tech's freshman baseballers launch a nine-game schedule by meeting Odessa College there today.

Doug Gibbins, former varsity player from Fort Worth, is coaching the Picadors this season.

Last year Texas Tech and Odessa split, the Picadors winning in Lubbock 5-4 and Odessa taking a 6-4 decision in Odessa for Tech's only loss on a 10-game card.

Baseballers Start Play Friday

Frank Ray, former Abilene Eagle, returns home to pitch against the Abilene Christian College Wildcats as Texas Tech's Red Raiders open their 1964 baseball season on the road with a doubleheader, Friday.

Left-handed Ray, now a senior, hurled a seven-hit, 1-0 shutout at the Wildcats in Abilene last year. Coach Berl Huffman will also have two other Abilenians in the Red Raider lineup, outfielder Bob Fielder, a junior, and second baseman Billy Monk, a sophomore.

Last season the Raiders and the Wildcats split a pair of doubleheaders. ACC took the other contest in Abilene by an identical 1-0

score. The schools switched from pitchers' duels to slug-fests here, ACC edging the Raiders 7-6 and Tech coming back to grab a 7-4 triumph.

POSSIBLE NBA FRANCHISE

ST. LOUIS (AP)—Marty Blake, general manager of the St. Louis Hawks, said Wednesday "a number of people in Houston and Kansas City" have expressed interest in a possible 10th franchise in the National Basketball Assn.

Earlier, Hawks' owner Ben Kerner had been quoted as saying Houston was interested. He heads the NBA's expansion committee.

the Grandstand Quarterback

By MIKE WALL

Information comes from Louisiana that Texas Tech has been chosen as one of four teams to compete in the 27th annual Sugar Bowl basketball tournament next December.

The Tech appearance will mark their first time to play in the event.

Included in the tournament will be Georgia Tech, who finished second in the Southeast Conference race this year, Vanderbilt and Louisville.

All of the teams are almost strangers to the New Orleans event, with Vanderbilt and Louisville both appearing in the tournament once before several years ago.

A former Tech student now serving with the United States Information Service in French Guinea, Marlee Kochis, sent an interesting clipping from the international edition of The New York Times of Feb. 13.

The clipping concerned the Red Raiders come-back victory over Texas A&M in Lubbock early in the season.

The article said in part "... Urged on by a crowd of over 10,000 the Raiders engineered a second-half comeback after trailing by 19 points at halftime. Tech battled back to knot the score at 82-82 with seven seconds remaining and Texas A&M in possession of the ball."

Several Tech students have started efforts to organize a college trap and skeet team with aims at a possible SWC league within the next few years.

Larry Prouse and Doug Mabrey feel that it would take a while to get the organization off the ground, but said that answers from several SWC schools indicate interest in the program.

The group needs a minimum of five members to compete in team matches and are seeking qualified skeet or trap shooters to fill out the team.

Probably one of the most embarrassing baseball games on the campus came the other day in the opening round of the intramural program.

Thompson Hall whipped Sneed by 19 runs, 21-2. The Sneed group was held scoreless until the last inning, when the Thompson fielders seemed to relax a bit and allowed Sneed to sneak across a couple runs to keep from being completely skunked.

AFROTC Seniors

Slip Past Juniors

In one of the last basketball games of the intramural season, the Air Force ROTC seniors defeated the AFROTC juniors 47-42.

High point man for the seniors was Richard Baird with 20, followed by Keith Moffet with 17.

High point men for the juniors were Billy Hogan and Hac Brummet, both with 17.

SWC Swimming Meet Opens; Four Events Scheduled Today

The 1964 Southwest Conference swimming meet opens here today with preliminaries and finals scheduled in four events.

STARTING AT 2 P.M., time trials will be held in the 500-yard freestyle, the 400-yard individual medley, the 50-yard freestyle and preliminaries in the 1-meter diving.

Jim Graves from Texas is the defending champion in the 500-yard race and is favored to repeat in the event. Graves swam the distance in 5:10 last year to take first place.

In the 400-yard medley, another defending champion is favored to repeat his record-setting pace to remain the champion.

Tiny Barnetson from Southern Methodist went the distance last year in 4:29.4 to cop the blue ribbon.

IN THE 50-YARD freestyle, a new champion will be crowned and Tech's Phil Simpkins is a heavy favorite to replace last year's winner, Bob Baker from Texas A&M, as the record holder. Simpkins has tied Baker's SWC record of 22.2 for the event and possesses one of the best times in the Conference this year with a 22.4 clocking.

A new champion will also be crowned in the 1-meter diving competition, and again a Tech squad member is favored to take the old winner's place.

Either Rick Baird or Jesse

Marsh could take the event as both have been consistent winners for the Tech team, and Marsh earlier in the year defeated an outstanding diver from Oklahoma, Jim Cody.

Foreign Flavor Spices Events

A strong international flavor characterizes the Southwest Conference swimming meet starting today.

Southern Methodist is bringing three South Africans, and Texas A&M will have one—William Harriman, a sophomore from Mogadishu, who swims the backstroke.

Swimming for the defending Mustangs will be Tiny Barnetson of Pretoria, Tudor Lacey and Colin Light of Johannesburg. Barnetson, SMU captain, who holds the SWC records in both individual medleys, made All-America in four events last year.

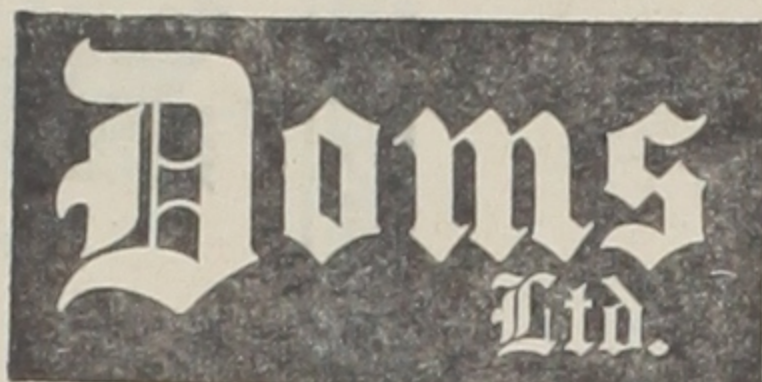

Even the coaches have an international background. Art Adamson, in his 29th year as Texas A&M coach, is a native of England who won the 100-yard freestyle championship of New Zealand. A. R. (Red) Barr, SMU's coach, guided the United States team at the Pan American games at Sao Paulo, Brazil, last spring.

FINALS in the four events will be at 7:30 p.m. and Tech students will be admitted upon showing their identification cards.

Six I-M Sports Still Open

Entries are still being taken in six intramural spring sports. Entries in the horseshoe contest must be in by Tuesday, in wrestling and olympic weightlifting and scratch bowling by March 24, in weightlifting (odd lifts) by April 8 and in track and field by April 21.

Further information about entering any of the events may be obtained from Edsel Buchanan, intramural director, in the Intramural Gym or by phoning ext. 3113.
