

Parking Solutions Delayed

Specific solutions to Texas Tech's traffic and parking problems will not be presented to the Board of Directors for at least six months.

The Board at its October meeting asked the Traffic Commission to present its recommendations to them by Dec. 1. The commission does not meet until next Tuesday, but will still be able to present their recommendation to the Board at their Dec. 11 meeting.

Have Study Made

The Traffic Commission will recommend that the Board hire a consultant firm to make a comprehensive study of Tech's problems and to project them into the future.

The Board will be asked to approve money for hiring a consultant firm. C. M. Parrish, assistant professor of civil engineering and a member of a subcommittee appointed to locate consultant firms, would not quote a specific sum, but said it would be "no small figure."

He said it would take from six months to a year for the study to be completed, depending upon the amount of detail required.

Will Select Firm

The Traffic Commission Tuesday will select one consultant firm from six located by the subcommittee. Similar studies of campus traffic problems have been made at the Universities of Ohio, Illinois and California.

A consultant firm, if one is hired, would present its recommendations directly to the board, Parrish said.

Other members of the subcommittee are assistant professor James Kitchen and Jack McClure, member of the Student Senate.

DR. PAUL SANDERS

Discusses Law School

Vanderbilt Prof Visits

Dr. Paul Sanders, professor at Vanderbilt School of Law, spoke here informally Wednesday to encourage students to study law at Vanderbilt and other schools.

Commenting on Tech's law school which will begin operation in the near future, he said there is a need for more law schools in Texas since a school should not be run on a mass basis.

Must Be Small

He said that when a school

becomes too large it loses the capacity for individual instruction, which is necessary in the study of law.

Tech has an opportunity to build its own institution and does not need to copy other schools in Texas or compete with them, he said.

Sanders said establishing Tech's law school is not a matter of competing, but is a matter of meeting a need that exists in

an area where there is a great demand.

Dean Is First Step

The first essential step in establishing Tech's school, he said, is to select a dean who will begin to secure a faculty, a library, and essential physical facilities at least a year before the admission of the first entering class.

One of the problems encountered with a state institution is that it cannot remain as small and have as many limitations as can a private institution such as Vanderbilt.

Broad Field

"Any law school must broaden its horizons," said Sanders. "You can't put a wall around an approach to law."

The aim of Vanderbilt, which is located at Nashville, Tenn., is to remain a small, diversified school to give students an opportunity to educate each other as well as receive individual instruction.

Each year there is usually one entering student in the law school from Tech. The school is limited to 350 students, including 130 entering students.

Due to expanded enrollment, said Sanders, other universities have had to enlarge their law schools.

New Phone System Due Here In 1967

By CARMEN KEITH
Staff Writer

Centrex direct line telephone service will be installed by the fall of 1967 to accommodate the increase in telephones on the Texas Tech campus.

The original system set up was based on the same system installed at Louisiana State University, but Tech is outgrowing this system with an estimated increase from the 4,014 phones on campus now to 5,000 in 1967.

This increase is based on the fact that new housing facilities will be completed by the fall of

'67 resulting in increased numbers of student body and faculty who will need phones.

Direct Off-Campus Calls

This system offers maximum privacy on every call, as it needs no switchboard attendants to handle most calls. Calls from off campus will go directly through to the students' room rather than through the operator if the caller knows the number.

Students will still be able to place collect long distance calls from their rooms, but a penalty will be placed on the student who accepts collect calls in his room.

This system saves callers an average of 28 seconds in reaching their party. All calls go out immediately with no attendant assistance needed.

Can Be Increased

Centrex will be set up to accommodate 6,000 phones when installed, but this can be increased as the need increases.

Students are estimated to use the phone three times as much as a normal customer would. For each increase of 1,000 students, fifty faculty members are needed with most of these receiving their own office phones.

The new system will still be housed in Doak Hall where it is presently set up. A central office to house Centrex was discussed, but it was decided that the operation was not large enough to necessitate a separate building.

Under Centrex all lines can remain open at all times without having a cut off time.

Depends on WRC

The regulation concerning the present cut off time has been set by Women's Residence Council and whether or not a cut off time will remain depends on the action taken by the directors of residence halls. A meeting is being set up to discuss this.

Under Centrex it will cost less to leave the lines open for the men's halls, so the cut off time will only concern the women's halls.

This system will have either a prefix such as TT or a number system for dialing. There is a possibility of tie lines to the campus from the off campus dorms to be built next year.

The order for this system will be placed with Bell Telephone Co. during the middle of December.

Band Trip To Gator Bowl Not Certainty

The Tech Band will make a proposal to the Athletic Council Saturday morning concerning funds to attend the Gator Bowl.

The expense for this trip has not yet been determined, pending decisions concerning method of

travel and accommodations in Jacksonville, Fla., the location of the bowl.

Band Director Dean Killion is investigating chartering a special train. Athletic Director Polk Robison said the football team is also having trouble with transportation.

Given Five Minutes

If the band attends the Gator Bowl, they will only be allotted five minutes during the half-time show, with no pre-game performance. The athletic department is trying to get at least a one-minute extension.

No official invitation has been extended to the band to attend the Gator Bowl, but provisions will be made if they attend, Robison said.

Last year the Sun Bowl required the Tech band to attend. They were given exclusive right to the half-time show and also gave a pre-game performance.

Uses Area Bands

Robison said the Gator Bowl doesn't seem as interested in the Tech band, probably because they have many area bands which perform.

Robison also said any money not used in the team's budget for the game will be turned over to the school, which can allot this money to the band to use to make a bowl trip.

While entertainment was provided for the band at the Sun Bowl, no specific plans have been made in Jacksonville.

Robison said whether or not the band would attend the Gator Bowl was a question of how practical the trip would be.

Council Will Meet Saturday

The Texas Tech athletic council will discuss the trip to the Gator Bowl, extension of football coaches' contracts and expansion of athletic facilities at its meeting Saturday.

Dr. J. William Davis, chairman of the council, said head football coach J. T. King will give the result of a trip he made this week to Jacksonville, Fla., to investigate housing and game facilities for the Gator Bowl. An estimated budget will be prepared.

Davis said he expected the council to receive a proposal from the Tech band concerning the amount of money it will need to make the bowl trip.

The council will consider the possibility of building new football dressing room facilities, new athletic offices and a workout field house.

Recommendations concerning extension of football coaches' contract will be presented to the Board of Directors at their Dec. 11 meeting.

The council will meet at 10 a.m. Saturday in the athletic offices. The meeting is expected to extend into the afternoon.

RECEPTION FOR SENORITAS—Dr. Morris Wallace, head of the department of education, joins Dr. Panze Kimmel, sponsor of Tech's Student Education Association chapter, in welcoming three students from the National Teachers College, Mexico City, at a reception Wednesday after-

noon. The girls are visiting Lubbock and Texas Tech as a part of the Lubbock Junior League's annual "Operation Senorita." From left to right are Adelina Hernandez, Dr. Kimmel, Dr. Wallace, Beatriz Castelan and Senora Paulina Hernandez. (Staff photo by Ron Welch)

Raider Roundup

PHI SIGMA ALPHA

Phi Sigma Alpha, national political science honorary, will meet at 4 p.m. today in the Union Mesa Room. Glen Looney will speak on the future of the Republican Party. All interested persons are invited to the coffee.

Team managers of the intramural basketball teams will meet Monday and Tuesday in the intramural gym. Fraternity managers meeting will be at 5 p.m. Monday, dormitory at 5 p.m. and clubs and independents 6 p.m. Tuesday.

Techsans To Attend Speech Meet

The largest number of Tech students ever to attend a speech tournament will compete this weekend at East Central State College, Ada, Okla.

Thirty-two Techsans will compete against 500 students representing more than 40 colleges in Texas, Oklahoma, Arkansas, Kansas, Missouri, New Mexico, Colorado, and Louisiana.

The tournament is the largest of its kind in this section of the country. East Central State offers pentathlon competition in oral interpretation and public speaking. Contestants must enter five events in each area.

Tech will participate in both individual pentathlons and debate.

Attending from Tech are: Carl Moore, Brian Reeves, Glenn Polk, Mike Bishop, Nan Todd, Bill Williams, Nancy Fly, Becky Joyner,

Jeannie Rook, Jerry Knott, Jerry Trippe, Melanie Reno, Hal Upchurch, David Bradley, Bruce Roberson, Doug Andrews, Janine Edwards, Sherry Nixon, Tammie Ellege, Tommie Ellridge, Cheri Brownlee, Cathy Balzer, Beth and Cathy Carmichael.

14 Techsans Participate In Unions Confab

Fourteen representatives from Texas Tech will attend the region XII conference of the Association of College Unions—International (ACU—I) today through Saturday at Louisiana State University in Baton Rouge.

Region XII is composed of 28 member colleges from Louisiana, Arkansas and Texas and all schools will be represented.

Students attending will participate in seminars and workshops to discuss the social, recreational and educational programs provided by the college unions.

The conference theme is Paths Toward Improvement and a major point of the conference will be an address by Dr. T. Harry Williams, professor of history at L.S.U. on "Paths of the South to the Political Future."

The ACU—I, founded in 1914, is officially represented on more than 556 campuses throughout the world. The purpose of this organization is to develop a campus organization and program which serves as part of an overall educational program of the institution.

Attending from Tech will be Sue Walker, president; Gary Rose, vice president; Sherrell Andrews, secretary-treasurer; Camille Keith, public relations director; Mary Margaret Davis, evaluations director; Ann Baber, International Interest Committee chairman; Janie Kenney, Dance Committee chairman; Jimmy Hogg, Art and Design Committee chairman; Chris Williams, Hospitality Committee chairman;

Helen Sisco, Fine Arts Committee; Beverly Barlow, Ideas and Issues Committee chairman; Gary Graves, Entertainment Committee chairman; Glenn Sides, Special Events Committee chairman; George Strickland, Student Senate Representative, Dorothy Pijan, Union program director and Dallas Biggers, assistant Union director.

'Senoritas' Tour Tech

"Operation Senorita" went into its third day yesterday as 30 senoritas from National Teachers' College in Mexico City toured the Texas Tech campus.

The senoritas visited Wall Hall, West Texas Museum, the Home Economics Building, the Library, University Theater, the Textile Research Building, and the Tech Union.

Dr. David Vigness, head of the history department, conducted the tour of the museum in Spanish, and Mrs. Sammy Armstrong, Planetarium lecturer, gave a Spanish lecture. After the tour, coffee was served by members of the museum staff and officers of the Museum Women's Council.

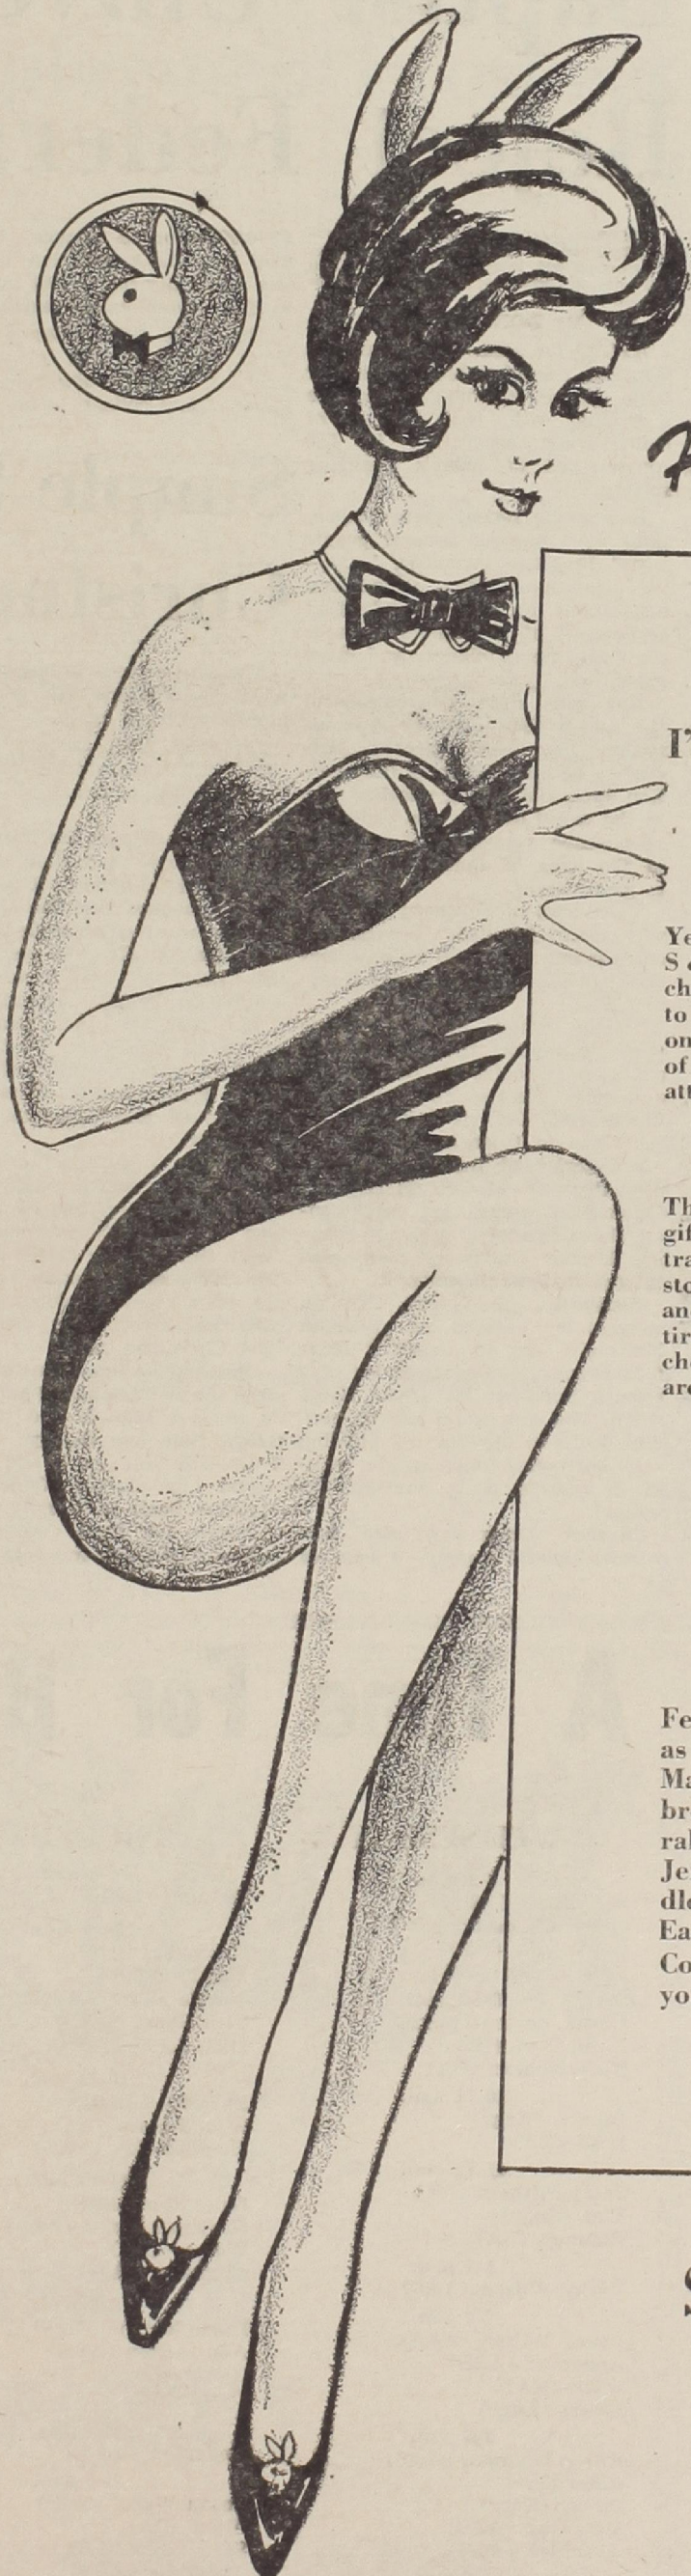

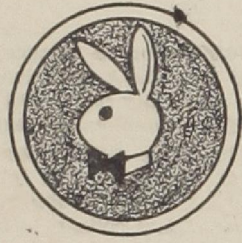

After a luncheon at the Tech Union cafeteria, the senoritas visited the Tech Library, University Theater, and the Textile Research Building.

At 4 p.m. the department of education, the Student Educational Association, and the Association for Childhood Education sponsored a reception in the Coronado Room of the Tech Union.

Mrs. Carroll Cobb, president of the Lubbock Junior League, said the senoritas would present a program in their national dress at 7:30 p.m. Friday at St. John's Methodist Church.

SEA

The Student Education Association will have a Christmas party and short program at 7 p.m. today in the Union Mesa Room.

PMOC

(PLAYBOY MAN ON CAMPUS)

Hello MY NAME IS
THE COLLEGE CORNER

I'm Your Playboy Bunny of
Fashion for Texas Tech

Yes, the COLLEGE CORNER of S & Q Clothiers has been chosen by Playboy Magazine to be their representative on your campus, in the field of Young Men's traditional attire.

The Establishment is newly stocked with gifts and goodies for gentlemen of traditional taste. To be found in our stocks are shirts and ties, sweaters and jackets, sporting and dress attire to grace the holiday season or to choose as memorable gifts. The selections are best right now. Make haste!

**BE OF GOOD CHEER
CHRISTMAS IS HERE!**

Featuring such nationally known brands as Cricketeer, Campus Clothes, Haspel, Mavest, Haggar, Eagle Shirt Maker, Holbrook, Goldcup, Reis, Levi Strauss, Farrah, Resillio, Adler, Canterbury, Lord Jeff, Town & King, London Fog, Pendleton, Canoe, English Leather, Jade East, (all seen in Playboy). The College Corner will have no trouble answering your needs.

Baptist Universities Reject Federal Aid

Just Around The Corner

SEVERAL STORIES IN yesterday's Toreador reflected a situation on campus that can only get worse: lack of space.

One story, explaining the fascinating world of research done by members of the various science departments, told of researchers having to carry on their work in the Science Bldg. attic.

Another story told of the plans and needs for expanding athletic and recreational space on campus.

Both of these areas are not alone in their need for more classroom and research space. Nearly every department in every school on campus is stretching at the seams.

But fortunately, Amendment I was passed by the voters of the state and now help is just around the corner, although it will be several long semesters before that "corner" is close enough to get around.

Already, the Texas Tech Board of Directors has approved a tentative list of new buildings. More will have to be added, especially to the Union, campus athletics and—most important—for classrooms and research.

Meet The Senators...

AT THE BOTTOM of today's editorial page is a chart showing the office hours of Tech's student executive officers and 39 Student Senators.

We are running this chart because it CAN be beneficial to students who will use it.

The Student Senate is the elected voice of the student body. Each Senator is elected to serve a certain number of students in his respective academic school.

It is the Senator's job to reflect the views of his constituents as accurately as possible in the Student Senate.

To do this job, the Senator must be in communication with the students he represents, and vice versa. Only in this way can a representative government be accurately representative.

EDITOR'S NOTE—Federal aid to church-affiliated colleges has created a new struggle over an old principle among Southern Baptists, the nation's largest Protestant denomination.

By DON MCKEE

ATLANTA, Ga. (AP)—Southern Baptists, rejecting federal aid for their colleges and universities, are grappling with the problem of church-state separation in the complexities of today's changing society.

Baptists in recent state conventions have opposed federal grants—and in some instances, loans—for church-affiliated educational institutions on the grounds that acceptance of the money violates the principle of church and state separation.

But many state conventions of the 10.4-million member denomination have been directed that studies be made, leaving the question open and taking another step in the trend of religious bodies to re-examine concept and practice in the area of their relationship to government.

The views of Southern Baptists, who through state conventions operate more than 50 colleges and universities, differ widely on federal aid.

"If our schools are of God, we ought to support them. If not, we ought to apologize for them," said a layman, Furman B. Hendrix of Cartersville, Ga., at a hearing on the issue in Georgia.

A majority of the messengers—delegates—to the Georgia Baptists Convention agreed, not only turning down federal grants but denying Mercer University permission to get a federal loan.

Similarly, the South Carolina convention ordered its Furman University not to accept a large federal grant for construction of a science building the school badly needs. The convention told its general board to pay for the building—by borrowing funds, raising money in a drive, or by shuffling its budget.

Mercer University also had sought federal money—a loan of

\$500,000—for a science facility. The Georgia convention directed the university to borrow the money from commercial institutions.

The issue boils down to this: What is the aim of Baptist schools? What is the role of denominational colleges? Has it been

pre-empted by the government?

"The time is here when the state conventions must think out what the conventions expect of their colleges and how they expect them to carry out such expectations," said Mercer's president, Dr. Rufus C. Harris.

Simple Steps Aid Christmas Mailing

The time of year to buy and mail all kinds of Christmas goodies is almost upon us again.

And U.S. Post Offices around the country are getting ready for more record amounts of parcels and cards.

"Last Christmas the Post Office handled more mail than ever before," said Lubbock Postmaster E. J. Ohnemus, "yet the operation was the most efficient in history."

Nationally, about 99 per cent of the Christmas mail reached its destination before Christmas Eve.

This year, even more mail is expected to cross the Post Office counters, and "literally billions of pieces of mail will be delivered between now and Christmas," said Ohnemus.

"ZIP Code use and the cooperation of the public in mailing early were the main reasons for our success last year," said Ohnemus. "With the same or better cooperation this year, we expect to handle the even greater volume of mail with less effort than during the 1964 Christmas rush."

Ohnemus outlined several simple steps the average postal patron can do to save himself and the Post Office time and energy:

- Up date last year's address list and include ZIP Codes. The phone book is usually a good source for local addresses, as local ZIP Codes are listed in the

yellow pages of the phone book.

- Prepare a gift list as soon as possible. Shop early to take advantage of full stocks. Be sure to have on hand enough shipping material: boxes, tape, wrapping paper, etc.

- Use first class postage on greeting cards. This assures their being forwarded if the recipient has moved or that undeliverable cards will be returned if a return address is on the envelope.

The postmaster emphasized again this year that poorly wrapped and loosely packed cartons be packed tightly by using stuffing material to fill up the empty space around the merchandise.

He also asked that all mailers make an effort to address their letters, cards and packages as clearly as possible and that they make every attempt to mail often, not waiting until the last minute to deposit all their gifts and greetings.

The peak days of this year's mail load are expected during the week of December 15-20, "and we are preparing to handle the load now," Ohnemus said.

Everyone else should be preparing to handle his end of that load, too, by following the simple steps that will lead to faster Christmas mail delivery.

Survey Says Studies Pay Off, Fifteen Teams Compete Increase Employment Prospect In ATO Basketball Meet

By RONAL LENTZ
Staff Writer

Now may be a good time for students to take a long look at their future in the mad world of business.

With mid-semester grades just out and their general academic standing apparent, students may be either heartened or sobered by discoveries revealed in a survey by a national magazine.

In a study of 17,000 men working for a leading industrial company, success in college was the most reliable indicator of success in a career.

In the study one of the nation's largest companies said that of the men in the top third of their classes at college, 45 per cent were also in the top-salaried third of the company.

Quality Of Man

Frederick R. Kappel, board chairman for A.T.&T., said that the quality of the college makes some difference, but it is of less difference than the quality of the man. That is, top students from average colleges were more successful than average students from top colleges.

While there are exceptions, "Nevertheless we must be concerned with relative probability," Kappel writes. "When you hire a high-scholarship man, your bet is that a drive already demonstrated will be sustained."

With the birth of some 6,000 new occupations in the last 15 years,

companies in the United States are being very critical of the applications that cross their desk.

Thorough Exams

Not including the above acknowledged exceptions, the person applying for a job today will not only be examined as to his grades, but also in the areas of part-time employment, extracurricular activities, positions of leadership in organizations, and a mountain of other aspects.

According to Mrs. Jean Jenkins, Director of Placement Service at Tech, the use of recruiting and testing programs by major companies has increased rapidly in the last few years.

She said most of the companies will probe for the personality of the applicant. College placement services are being used more than ever by the companies who are looking for college graduates to fill their ranks.

According to Harry T. Beckner, a member of the interviewing team sent to Tech for Eastman Co., the new employees in a sample section of their company registered as much as 75 per cent who were hired from college through their placement service.

Asked about the use of training programs for the college graduate in the company, Beckner said it varied a great extent according to the part of the company in which the graduate worked. The sales and marketing departments used

a formal training period for the new employees while the research department does not use this method.

Selection Processes

Beckner said the selection process for the applicants was as varied as their company training. For research, the applicant's grades are considered heavily while grades of the applicant working in production probably would not play such an important part in the company's consideration.

While the field of employment is widening as new jobs are created, the college student now considering work with a large company must face an increase in the number of qualified applicants for the same jobs.

GRADUATE STUDY OPPORTUNITIES

Dr. David Vigness, history department head, will address all senior women on the opportunities for graduate study and fellowships at 8 p.m. today in the Union Coronado Lounge.

Dr. Vigness is on the campus advisory council to the Woodrow Wilson, Fulbright and Rhodes Scholarship Foundations.

Sponsored by the Forum Chapter of Mortar Board, the speech is to explain graduate work for women, since each year fellowships and graduate opportunities are wasted because of lack of information.

The annual Alpha Tau Omega Fraternity Basketball Tournament will get under way today at 4 p.m. in the intramural gym.

Each Tech sorority will sponsor a queen candidate. Trophies will be given to the champion and runner-up teams. An all-star team, made up of five players, will be selected. A trophy also will be given to the campus organization that has the leading attendance throughout the tournament.

A tournament queen will be named during half time of the championship game, scheduled to begin at 1:30 Saturday afternoon. Tickets will be on sale at the door of the intramural gym at \$1 per person.

—'Busiest Place On Campus'—

Clinic Serves Students, Graduates, Public

By **GLENN HONEA**
Staff Writer

The Psychology Clinic of Texas Tech may not be the most publicized place on campus, but it is one of the busiest.

The clinic functions to provide three important and independent services: it offers specialized instruction in various areas of psychology and serves as the center of almost all graduate work in the department; it provides professional advice and analysis to doctors and public clinics; and third, the clinic offers professional help to

Tech students who feel they have psychological problems.

"The primary purpose of the clinic," said Dr. Joseph Ray, director, "is education."

Student Participation

The clinic gives the student an opportunity to observe and participate in actual case studies. These cases are drawn from the student population on campus and from the general public.

The clinic offers courses leading to either a masters or Ph.D. degree in the specialized areas of clinical psychology and counseling psychology. The program for counseling was initiated in 1964, and the clinical program was begun in 1965.

Work in the fields of general

and experimental psychology on the graduate level, also offered by the department, is not directed by the clinic.

All graduate students, regardless of the field they choose, must take a series of "core" courses, composed of 21 hours of basic psychology.

The psychology department has the largest graduate school enrollment of any school on campus. There are now 104 students engaged in work on either the masters or Ph.D. level, and that number represents an increase of 40 per cent over last year's total.

The entire graduate program involves four years of training here and one year internship anywhere in the United States.

The counseling program at Tech enjoys the prestige of being approved by the American Psychological Association. Only 24 such programs in the country are so approved.

Students entering the area of counseling psychology gain practical experience both from working with the cases admitted directly to the clinic and working in cooperation with various public institutions.

An important part of their training, for example, consists of working at the South Plains Guidance Center here in Lubbock.

When the recently approved hospital for the mentally retarded is established in Lubbock, this, too, will become the scene of some of the training for both clinical and counseling students.

Study in clinical psychology is quite distinct from that of counseling psychology, and aside from the basic "core" courses, requires a different type of training technique. Clinical practice also is gained by working with cases taken by the clinic and by working with private institutions.

The clinic operates as a professional public servant.

Cases From Public

"One out of five cases that we handle come from the public," says Dr. Ray.

A private physician often seeks the services of the clinic's staff. A school principal may refer the case of an unruly child to the clinic. Cases come from the juvenile office. Ministers request advice, and individuals bring themselves—sometimes from other states!

And how much does the staff charge in return for its valuable time and effort? Nothing. The services are performed in the interest of public betterment and for whatever educational value the services might have.

Third Function

The third function of the clinic is to provide aid to Tech students who feel they have psychological problems. This work is done on a strictly confidential basis, and a phone call to the clinic is sufficient to arrange a conference. There is no charge for this service.

Several students presently are being helped with their problems—everything from severe emotional problems to minor maladjustments. It is Dr. Ray's opinion that many more students would probably avail themselves of this service if they knew it existed.

It seems to be the fate of the Psychology Clinic to do its work in relative obscurity. The staff continues to perform its three-fold function if for no other reason than the satisfaction of knowing they are improving both the educational quality of its students and the health of the public at large.

Buffaloes Edge Tech 86-77

Colorado Pulls Away In Final Seven Minutes

By MIKE LUTZ
Sports Editor

BOULDER—A rapid-fire scoring spurt by Colorado in the waning minutes of play and a flurry of Texas Tech miscues ushered the Buffaloes to the winner's circle here Wednesday night with an 86-77 victory over the Red Raiders, in the basketball opener for both quintets.

Colorado's one two punch of Chuck Gardner and Jack Lintz kept the Raiders playing catch-up most of the evening, but it was numerous first-game errors by the SWC favorites that issued the coupe de gras.

Gardner was the leading scorer for the game with 28 points. Lintz tallied 11 points, but it was the 6-8, 237-pound giant's rebounding that did the most damage.

It was nip and tuck in the second half until the closing minutes when the Buffs, playing without the services of last year's leading scorer, Pat Frink, began to take the upper hand.

Breaks Deadlock

Gardner whisked CU away from a 67-67 deadlock with 7:00 remaining and from that point, the locals all but blew the Raiders out the back door.

Two free shots by Gardner and consecutive goals by Steve Rowe, Chuck Williams and another by Rowe, gave CU a 77-69 advantage from which Tech never recovered.

Four Raiders hit in double figures with all-America candidate Dub Malaise leading the pack with 15 points. Also scoring in double figures were Russ Wilkinson, 10; Norman Reuther, 12 and Vernon Paul, 12.

Karl Tait was the No. 2 scorer for the Buffaloes, canning 15 points. Most of the total came in the decisive second half.

Used Two Platoons

Coach Gene Gibson used two platoons in the first half in an effort to combat the high altitude, which kept the visitors winded most of the evening.

Tech was unable to rebound with the taller CU squad which grabbed 53 rebounds to 43 for Raiders. Tech shot only 32.9 per cent from the field but hit accurately from the free throw circle at an 81 per cent clip.

The Raiders wrangled a brief 2-0 lead as the initial half got under way on a field goal by Reuther, but the Buffaloes utilized the rebound and shooting of Jack Lintz and the shooting of Chuck Gardner to emerge at intermission with a 46-41 edge.

Reuther Draws Fouls

After Reuther's goal, the Raiders sank one free throw in three chances for a 3-1 mean but the

Buffis tied it at 3 all, and Reuther left the game with three fouls after only two minutes had elapsed.

From that point, with the Buffs controlling the boards on both ends of the court, Colorado nudged into a 6-5 lead and increased it to 13-9 after seven minutes of action.

Gibson put in a completely new unit after seven minutes of play.

Second Team Closes Gap

The No. 2 unit, composed of Dave Olsen, Vernon Paul, Trenton Bonner, Jimmy Fullerton and Bobby Measells, narrowed the gap almost immediately and tied the count at 18 all with 9:30 left in the half.

The Raiders shot a cold 33 per cent in the first half to a creditable 44.2 for the home towners. Tech really hit a cold spell in the latter part of the half, keeping close only with its free throws.

Lintz and Gardner scored a combined 30 points in the first half, and led the Buffs to a 34-23 rebound edge.

The Raiders will try to rebound Saturday night when they host the nation's No. 6 ranked team, Kansas University, in Municipal Coliseum.

Final Stats Not Two-Man Performance

Guy Griffis, David Baugh, Jimmy Edwards, and Bob Bearden proved you don't have to be named Tom Wilson or Donny Anderson to finish the season at the top of Texas Tech's football statistics columns.

Griffis, a Dallas junior, played only three games before undergoing a knee operation, but his 15 punt returns for 162 yards held up as best for the season—and ranked high also in Southwest Conference tabulations.

Baugh, Rotan junior, whose dad Sam concentrated on the launching end of forward passes, and Edwards, junior from Royse City, each intercepted three to lead the Raiders. Robert Yancer, Arlington senior, stole only two but had the most return yardage, 32.

An Old Pro Sums It Up

MIKE LUTZ

"THE TWO BIGGEST surprises of the season to me, were the downfall of Texas, and the progress made by Texas Tech," said Blair Cherry, whose past experience as head football coach at the University of Texas and addiction to athletics should be enough in the way of credentials to qualify him to summarize the outcome of the SWC campaign.

"You expected Arkansas to be up there, but it's hard to figure what happened to Texas," the veteran coach said. "I don't know what happened to them but if I had to venture a guess, I'd say they were built up so high, that when Arkansas defeated them, they had a hard fall, and it became a problem of morale."

Raiders Jumped To Prominence

CHERRY, WHO IS a member of the Tech athletic council, said that the ascendancy of the Raiders to a tie for second place in the SWC was the second biggest surprise of the race and predicted a happy end of the year for Tech in the Gator Bowl against Georgia Tech.

"I'd say Tech's chances are pretty good in the Gator Bowl," Cherry said. "They (Georgia Tech) have a team just like ours. You can bet Coach Bobby Dodd will have a wide open game planned and that's the way Tech's been playing this year."

Cherry, who served a controversial tenure as head coach of the Longhorns from 1947-50, said he would not attend the Gator Bowl clash Dec. 31. "No, we're going to see the grandkids in Louisiana. It's too far down there," he added. He'll be tuned in to the one-eyed monster for the extravaganza, however.

TEXAS TECH IS growing up, athletically, and that ominous quality called "Image" is getting a good whitewash along with the Raiders' climb in the SWC standings.

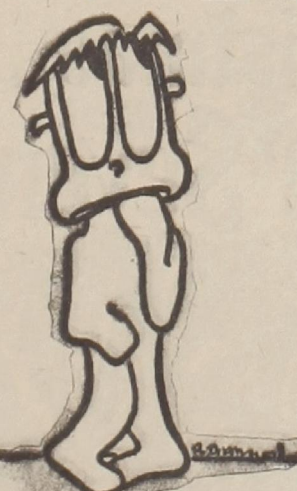

One good yardstick as to the new-found prestige in which Tech is now basking, is the recruiting program. Raider coaches begin quizzing

Freshmen Cagers To Open Action Against Chaparrals

Texas Tech's freshman basketballers begin their season against Lubbock Christian College in the Coliseum here Saturday night, preceding the varsity contest with Kansas.

Probable Picador starters for the opener are forwards Gary Washington, 6-5, of Lubbock, and Bob Cunningham, 6-5, of Dalhart, center Benny Wiggins, 6-7, of Lawton, Okla., guards Robert Evans, 6-3, of Schenectady, N. Y., and Larry Lewis, 5-10, of Phillips.

With Charley Lynch helping Gene Gibson with the varsity and scouting Red Raider foes, the frosh are being coached this season by Gerald Coppedge, former Hobbs, N. M., assistant, and Glen Hallum, Red Raider starter for the past three seasons. Both are students at Texas Tech, Coppedge doing graduate work and Hallum completing his degree.

Other Picadors are 5-11 Jerry Childs of Farwell, 6 foot David Grazier of Aspermont, 6-3 Fred Green of Texarkana, Ark., 6-4 Paul Hessler of Coos Bay, Ore., 6-1 Miles Johnson of Lubbock Monterey, 6 foot Bob Johnson of

Richardson, 6-5 Gary Mattox of Abilene Cooper.

5-11 Bobby Pierce of Lubbock Monterey, 5-7 Steve Richardson of Brunswick, Me., 6 foot Joe La Salandra of Ysleta Parkland, 6-4 Tim Sturm of Houston Bellaire, and 6 foot Mike Wall of Dallas South Oak Cliff.

Remainder of the freshman schedule, with varsity contest in parentheses:

Home Games: Dec. 6—West Texas (Arizona), Dec. 14—South Plains College (Oklahoma), Jan. 15—Midwestern (Midwestern), Feb. 1—Hardin - Simmons (TCU), Feb. 5—Lubbock Christian (Texas), Feb. 15—Eastern New Mexico (Texas A&M), Mar. 1—Abilene Christian (Rice).

Away: Dec. 17—South Plains at Levelland, Jan. 29—Eastern New Mexico at Portales, Feb. 24—West Texas at Canyon.

BULLETIN

Tech's Donny Anderson was named to a First Team All-America selection by the Associated Press Wednesday night. Anderson previously was named All-America by Look Magazine.

Mike Lutz' Column

(Continued from Page 7)

prospective high school athletes Saturday and they'll already tell you that selling Texas Tech will be much easier than several seasons ago.

Raider stock took a big upswing last season, after a 6-3-1 campaign and a Sun Bowl date. It appears even healthier this year, what with an 8-2 record and a Gator Bowl spot as a calling card.

TT Preferred Over UT

A typical example of Tech's drawing power is a high school sophomore who visited the athletic office Wednesday with his coach.

"I'd sure like to play here someday," he said gazing out at the Jones Stadium turf. "It sure is a good view from up here, isn't it?"

The lad talked about a teammate who is in big demand by most of the conference schools. The visitor said a particular SWC team had sent him offers after every game the high schooler had played this season.

"He said the University of Texas was his first choice, unless Texas Tech offers him a scholarship," the visitor said of his teammate.

If you think optimism is high in Tech football circles, you oughta chat with Raider golf mentor **Danny Mason**. He's expecting a banner year for the linkmen. Mason thinks it'll be one of Tech's better years on the links and praised his senior No. 1 player, **Steve LeCrone**. LeCrone, who was elected team captain last month, will be shooting for his third all-SWC ranking, after earning the honor in his sophomore and junior campaigns.

Tech sports information director **Bill Holmes** received a telegram from Sports Illustrated yesterday, informing him that Texas Tech will be featured in its Dec. 6 basketball issue as one of the top 20 teams in the nation.

SINCE WE'RE GIVING SI a plug, we might as well borrow an

excerpt from its November 22 issue.

It's an almost unbelievable tale about a gregarious fellow with a self-styled name of **Douglas "Sudden Death" Sabol**, who is a fair country quarterback and his own press agent all wrapped into one 210-pound frame.

In addition to other publicity gimmicks, the extrovert gragger, who performs for Colorado College in Colorado Springs has: bought newspaper advertisements to sing his own praises; written his own press release, which countless sports writers gobbled up eagerly; produced button lapels and pencils with the inscription, "The Prince of Pigskin Pageantry now is at the Pinnacle of his Power."

He's even brought his head coach, **Jerry Carle** into the act. He paid for an ad in the football program saying: "Coach Jerry Carle wishes Sudden Death Sabol a successful season."

But he's also a great one for psychological warfare against CC opponents.

Colorado College is located in the Rocky Mountain chain at an altitude that often has visiting teams gasping for air. Just to help them feel a little higher, Sudden Death posted a sign outside the stadium reading: "Washburn Stadium, Altitude, 7,989 feet," an exaggeration of 2,089 feet.

But Sabol's masterpiece is a sign found in the visiting team's dressing room. It reads: "This field is named in honor of Washburn, who perished when his lungs exploded from a lack of oxygen during a soccer match with Denver University, 1901."
