

# Board Makes Expansion Plans

Texas Tech's Board of Directors Saturday approved three requests for off-campus housing units and began initial planning for dormitory and classroom space for the future.

Board members also discussed the campus traffic problem and the recently approved law school for Tech, asking that immediate action be taken on both matters.

Many times during their discussions in President R. C. Goodwin's office, the directors pointed out the necessity for the passage of Amendment No. 1 in the Nov. 2 election and gave it their strong endorsement.

Amendment No. 1 is the proposal that would raise the ad valorem tax five cents and provide a source of construction revenue for 17 state-supported institutions.

## Passage 'Imperative'

"It is not only vital, but absolutely imperative that this amendment be approved by the voters," Board Chairman R. Wright Armstrong of Fort Worth said.

In approving the three requests for off-campus housing for men, the directors also said that a fourth could qualify when it seeks approval.

The three groups given the okay were the following:

- University Housing Construction, Ltd., planning for construction on the south side of the block to the east of College Ave. on 19th St.
- University Dormitory Development, Inc., planning construction on the south side of the block to the west of College Ave. on 19th St.
- O'Meara-Chandler Corp., planning construction on a tract at the intersection of Brownfield Highway and 19th St.

## Fall Completion

Two of the groups are trying for September, 1966, completion dates, while the third is aiming for September, 1967. If completed by next fall, the two units would house more than 1,800

men and relieve some of the pressure on on-campus housing.

Then, as more space is made available to men off-campus, some of the present men's dorms will be turned into women's housing units until more women's dorms can be completed on campus.

The directors also okayed the hiring of an architectural firm to begin work on plans for a new complex of women's dorms, tentatively set to be built west of Flint Avenue.

A new Chemistry Research Building was given final approval Saturday. It will be built just south of the Chemistry Building where room was made for it this summer.

The new building will be three stories, with provisions made for a fourth story if needed in the future.

## New BA Building

Board members also hired an Austin architectural firm to begin plans for a new Business Administration Building. No further details were released on

the building, since "its completion will depend a great deal on the Nov. 2 election," the directors said.

Board member Wilmer Smith also presented a priority list for future academic buildings on campus. Smith said that the list was not in order of priority, but just a list of buildings Tech will need in the near future. The list included the following:

Museum, law school, business administration building, science building, music facilities, architecture facilities, greenhouse, agricultural plant sciences facilities, farm and horse facilities, chemistry facilities for undergraduates, library, and power plant utilities, roads, walks, etc.

## Law School Dean

Board member Alvin R. Allison made a motion, which the Board accepted, that the administration hire a dean for the law school and try to get it into operation by September, 1966.

Allison, who was instrumental in the initial plans of the law school and guided the measure

through the now-extinct Texas Commission on Higher Education, pointed out that funds for the school were made available by the legislature earlier this year.

Campus traffic, a question not on the Board's agenda, was brought up by Smith.

## Action Needed

"The time has come when this board must do something about this traffic or we're going to wind up getting somebody killed, and we don't want that," Smith said.

It was pointed out that several solutions to the traffic dilemma were under study by the Traffic-Security Committee, and the Board moved that the group be instructed to present their recommendations to the Board at least 10 days before their December meeting so some action can be taken at that time.

All Board members were present Saturday except Herbert Allen of Houston, who was here for committee meetings Friday.

## Mosquitoes Creating Havoc On Campus

Saturday night found breathless fans keeping a close watch on the important scores of the day. The Raiders were winning, but the really important score was Mosquitoes 99, People 0.

Amid scratching, swatting and muttering under their breath, Techsians have been wondering just where the sudden swarms of the pests came from. The Lubbock City-County Health Department has estimated that about 1,000 ponds and puddles in the area have been breeding grounds after recent heavy rains.

The department is presently spraying the Lubbock area with a three per cent spray of BHC, an insecticide. Saturday night's football game was sprayed from vents below the athletic office,

making end zone seats the best for comfort, if not for viewing the game.

The city is now taking a trap count to get an estimate on the number of mosquitoes in the area. The health department estimated that 20 per cent of the mosquitoes are capable of carrying encephalitis but said there is no definite proof any of the insects are actual carriers.

Cold weather and wind may put the insects into hiding for a few days, but they are not expected to completely disappear for two weeks. Meanwhile, the city plans to keep spraying, and Techsians well, they'll just keep scratching, swatting and muttering.

## Homecoming Queen Entries Due Friday

All entries for the 1965 Homecoming Queen must be submitted to the Ex-Student Office in Tech Union by 5 p.m. Friday, according

## Five Appointed To Positions By Anderson

Student Senate President Roland Anderson recently appointed five students to positions in the executive branch of student government. They were approved by the Senate last Tuesday.

Filling the newly-created post of public relations director is graduate student and past Tech cheerleader Mike Bohn.

Penny May, new head of academic recruiting, will also work with the Honors Council this year, Anderson said.

Other new appointees are Andy Wilson, athletic director; Lynn Melton, Southwest Conference queen director; and Ernie Cowger, director of the Board of Student Organizations.

of Steve Andrews, queen election chairman.

Andrews said Monday only one entry had been received.

Any recognized student organization is eligible to sponsor a candidate but all must comply with the following regulations:

- Each candidate must be sponsored by a recognized student organization. Candidates need not be a member of the sponsoring organization.
- Each candidate must be a full-time single female junior or senior student.
- Each candidate must meet the basic college requirements in scholarship for representation.
- Candidates must be able to attend all homecoming activities and official functions.
- A wallet-sized, front face photograph of each candidate must be enclosed with the entry blank. Photographs will not be returned.
- Candidates cannot be sponsored by more than one organization.

Primary elections for this year's Homecoming Queen will be Oct. 20 with the run-off scheduled for Oct. 22.

Vol. 41

Lubbock, Texas, Tuesday, October 12, 1965

No. 21

## Wallace Named President

# Council Elects Officers

The Freshman Council elected Wesley Wallace, off-campus representative from Lubbock, as its president Monday night in its first meeting of the year.

Wallace, who attended Lubbock Monterey, was the only off-campus candidate to receive a majority of votes in the first election Sept. 29. The remaining off-campus representatives were elected in a run-off.

Three out of four officers elected were off-campus representatives. The Council is composed of 17 off-campus representatives and

17 representatives from dormitories.

## No Class Officers

This year's Freshman Council officers take the place of freshman class officers, which have been selected by campus-wide elections in previous years. The Student Senate election committee decided this year not to conduct elections for freshman class officers.

Other officers elected were Pete Kyle, off-campus representative, vice president; Kay Hayden, secretary; and Vicki White, off-campus representative, Association of Women Students representative.

## Rawls Presides

Jerry Rawls, Student Senate business manager, welcomed Council members and presided over the meeting until Wallace was elected. Bill Beuck, Council sponsor from the Student Senate, was also present.

The Council will meet again Monday at 5 p.m. in the Anniversary Room of Tech Union to select a faculty sponsor. They will also set up a permanent meeting time.

COUNCIL OFFICERS—Wesley Wallace, left, was elected president of the Freshman Council at their initial meeting Monday night. Helping count

ballots are Jerry Rawls, Student Senate business manager who presided over the meeting; Pete Kyle, vice president; and Kay Hayden, secretary.

(See Story Page 6)

# Botanist To Address Sigma Xi

Dr. Katherine Esau, Russian botanist and lecturer, will speak on "Ultrastructure Studies of Leaf Cells in Plants" at the initial meeting of Sigma Xi, national honorary science fraternity, at 7:30 p.m. today in the Biology Auditorium.

Dr. Esau, born April 3, 1898, in Ekaterinoslav, Russia left her native land in 1919 and settled temporarily in Germany where she completed her college education, majoring in plant breeding.

In 1922 her family immigrated to the United States, where she learned a new way of life.

Between 1924 and 1928 she researched the resistance of the virus diseases and curly tops in

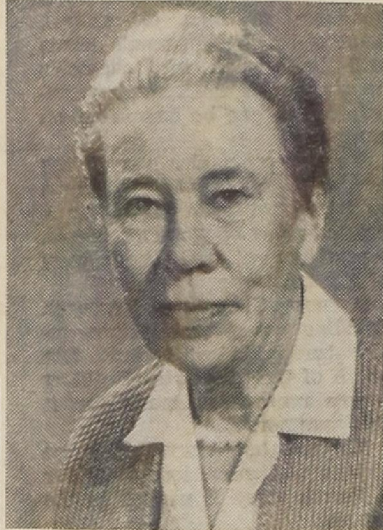

sugar beets for the Spreckles Sugar Co.

She resumed college work in 1928 at the University of California where she obtained a Ph. D. degree in botany in 1931.

She moved through the ranks to professor of botany and botanist in the experiment station. In 1963 she moved to the University of California campus at Santa Barbara. She will receive the status of professor emeritus there on June 30.

Dr. Esau is best known for her research work in plant anatomy and her contributions on structural effect of plant virus and development and structure of the phloem tissue.

She will be a guest speaker at 5 p.m. today at a graduate seminar. The public is invited.

**LBJ RECOVERY PROGRESSES**  
WASHINGTON (P)—President Johnson, advised by his doctors to "take every opportunity to rest" for several weeks, handled routine business Monday and held conferences with top officials.

# Revitalization Plans Made By Committee

By RICHARD D. WILLIAMS  
Staff Writer

An interdepartmental committee is making plans to revitalize interest in Latin American areas studies and to reorganize the course of study for students who wish to major in the field.

Recently, Tech joined the Latin American Research Review Board. The board is composed of approximately 25 American universities. The University of California, Berkeley, UCLA, and Stanford are among the members. Cornell heads the board.

Texas Tech is one of two Texas Universities invited to join the board. Tech has had a Latin American studies program for 15 years, and has offered a B.A. degree in that field for six years.

**Committee Members**

Wednesday the committee met with Dr. S. M. Kennedy, dean of Arts and Sciences. Dean Kennedy designated Raymond D. Mack, associate professor of government, as chairman of the committee. The committee will attempt to revise and revamp the program by changing the curriculum.

In addition to Mack, the committee is composed of Dr. David Vigness, head of the history department, Dr. H. D. Oberhelman, head of the department of foreign languages, Dr. Evelyn Montgomery, assistant professor of sociology and anthropology, and Dr. John R. Hildebrand, associate professor of economics.

According to Kennedy, some of the problems the committee will try to solve are the areas of Latin America to specialize in and what library acquisitions will be necessary for research projects. He said the program is set up to work on the "area technique as opposed to the institutional technique."

Students will be taught the overall culture of an area—the economics, history, government, geography, sociology, anthropology and languages.

He said the formal organization of the committee is an attempt to make a more effective program.

Mack has been on the committee since its formation and says it has developed a sound and orderly ambitious program. He said the staff at present is more than adequate, and that the only weakness is in research materials.

**Education and Training**

The Latin American study course gives students the education and training required for several interrelated fields such as export-import, manufacturing, shipping, airway systems, banking, government, journalism, translating or interpreting. The program also offers preparation for graduate work in area studies.

There are approximately 35 students majoring in Latin American studies this semester. Mack is the advisor and counselor.

The first two years are approximately the same as any liberal arts degree requirements. The third and fourth year, the student studies Latin American politics, Latin and South American government, Latin American trade, Mexican sociology, the history of the colonial and republic periods and an anthropology course on the early Indians and their cultures.

**Geography Offered**

Mack said geography of those areas will be offered next fall. He believes a business course on economic geography and a course on agricultural economics will be very valuable to the program, and said they may be added later.

Mack said the committee's goal is an exchange of students and faculty, and making Tech one of the top schools for Latin American studies in the United States.

**TEXANS SPLIT VOTES**

WASHINGTON (P)—Texas senators split their vote Monday as the Senate refused, 47-45, to invoke its cloture rule to cut off debate on a House-passed bill to revoke the right of states to ban the union shop.

Sen. Ralph Yarborough, D, voted for cloture. Sen. John Tower, R, voted against.

A two-third majority was required to put the rule into effect.

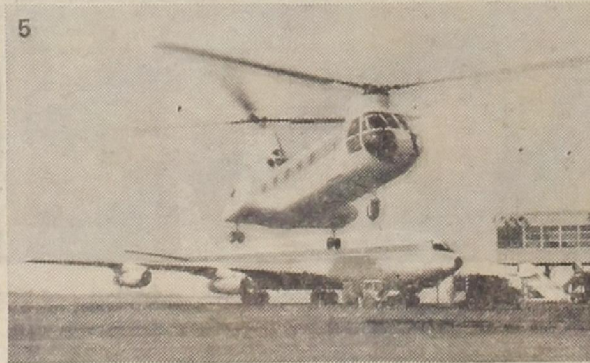

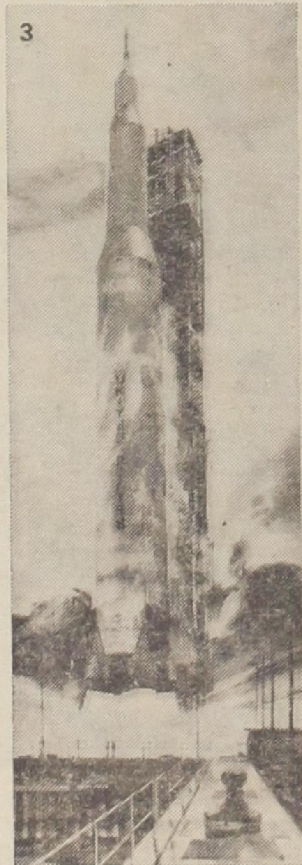

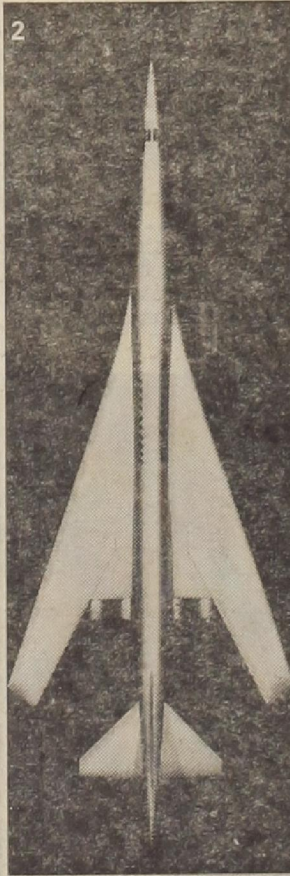

## Jobs in Europe

Switzerland — A summer in Europe is now possible at approximately one fifth the usual cost by taking a summer job in Europe. Jobs are available from the easy going French Riviera to the high paying German factories with no supplemental obligations. For a complete listing of job categories, prospectus and application forms write to Dept. Z, International Travel Establishment, 68 Herrengasse, Vaduz, Liechtenstein (Switzerland) enclosing \$1 with your inquiry to cover the cost of the material, overseas handling and air mail postage.

## Engineers and Scientists:

Let's talk about a career at Boeing...  
50-year leader in aerospace technology

Campus Interviews Monday and Tuesday, October 25 and 26

The most effective way to evaluate a company in terms of its potential for dynamic career growth is to examine its past record, its current status, and its prospects and planning for the future, together with the professional climate it offers for the development of your individual capabilities. Boeing, which in 1966 completes 50 years of unmatched aircraft innovation and production, offers you career opportunities as diverse as its extensive and varied backlog. Whether your interests lie in the field of commercial jet airliners of the future or in space-flight technology, you can find at Boeing an opening which combines professional challenge and long-range stability. The men of Boeing are today pioneering evolutionary advances in both civilian and military aircraft, as well as in space programs of such historic importance as America's first moon landing. Missiles, space vehicles, gas turbine engines, transport helicopters, marine vehicles and basic research are other areas of Boeing activity. There's a spot where your talents can mature and grow at Boeing, in research, design, test, manufacturing or administration. The company's position as world leader in jet transportation provides a measure of the calibre of people with whom you would work. In addition, Boeing people work in small groups, where initiative and ability get maximum exposure. Boeing encourages participation in the company-paid Graduate Study Program at leading colleges and universities near company installations.

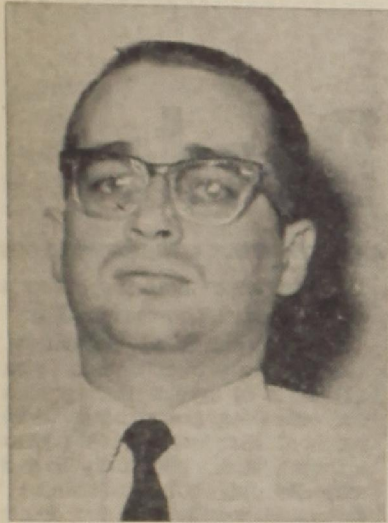

We're looking forward to meeting engineering, mathematics and science seniors and graduate students during our visit to your campus. Make an appointment now at your placement office. Boeing is an equal opportunity employer.

(1) Boeing's new short-range 737 jetliner. (2) Variable-sweep wing design for the nation's first supersonic commercial jet transport. (3) NASA's Saturn V launch vehicle will power orbital and deep-space flights. (4) Model of Lunar Orbiter Boeing is building for NASA. (5) Boeing-Vertol 107 transport helicopter shown with Boeing 707 jetliner.

DR. RAYMOND E. MEYER

## Meyer, Soil Physicist, Joins Ag School Staff

Dr. Raymond E. Meyer joins the Agriculture School as an assistant professor of agronomy. He will teach and develop a soil physics program complete with undergraduate courses and graduate research.

Dr. Meyer, married, one child, and native of Kansas, received his B.S. in Technical Agronomy in 1959 from Kansas State University. He received his PhD in soil physics in 1963 from Oklahoma State University.

Before coming to Tech he served as plant physiologist with Crops Research Division of the Agricul-

ture Research Service at the federal Bollweevil Laboratory at Starkville, Mississippi.

He is currently a research associate of Nuclear Studies in Oak Ridge, Tennessee.

Last April he completed a four week course in radioisotope techniques given by the Oak Ridge Institute of Nuclear Studies in Oak Ridge, Tennessee.

Dr. Meyer is a member of Sigma Xi, American Society of Plant Physiologists, American Society of Agronomy, Soil Science Society of America, and Crop Science of America.

## Two Attend FFA Convention

Floyd McAllister and Lavon Williams are representing Texas Tech's chapter of Future Farmers of America at the National FFA Convention in Kansas City.

The convention began Monday and will end Friday. McAllister, president of Tech's FFA, will re-

ceive the American Farmer Degree at the convention.

Other Tech FFA officers for the fall term are: John Fields, vice president; Tom Horton, secretary; Lavon Williams, reporter; Randy Lehmborg, treasurer; and Marvin Cepicia, sentinel.

## LITTLE MAN ON CAMPUS

"ACTUALLY THIS IS A LOLSZY COURSE BUT IT'S TH' CLOSEST CLASSROOM I COULD FIND TO TH' MAIN PARKING LOT."

## A Big Job Ahead...

IT WAS A REAL pleasure to hear Wilmer Smith, member of the Texas Tech Board of Directors, bring up the campus traffic problem at last Saturday's Board meeting.

The matter has been discussed and set aside in other Board sessions, but this time Smith and the other Board members were enthusiastic about coming up with a solution by their next gathering.

The directors passed a motion directing the Traffic and Security Commission to present their solution to the Board 10 days before the Board's December meeting.

It is now up to the Traffic and Security Commission to come up with a plan the Board will buy. And from now until December, the Commission will be discussing and evaluating many ideas.

Members of the Commission include the following:

- Dean of Men Lewis N. Jones, chairman.
- M. L. Pennington, vice president for business affairs.
- Elo Urbanovsky, head of park administration department.
- C. M. Parrish, professor in civil engineering department.
- L. D. Blakney of the Lubbock Police Department.
- Briggs Irwin, a local attorney.
- O. R. Downing, director of building maintenance.
- Dr. Bill Kitchen, supervisor of grounds maintenance (non-voting member).
- Bill Daniels, head of Traffic-Security (non-voting member).
- Jack McClure, student representative.

We have faith in these men and their familiarity with both the traffic and parking problems here; we will be following their actions closely and be willing to help whenever we can. The safety of Texas Tech pedestrians is in their hands.

## LETTERS:

# Views Of The Reader

### Snyder Criticizes Water Fountains

Dear Editor,

A popular idea in the world today is that the human body can endure any type of pain or mental anguish for a certain amount of time. I do not dispute this theory, but I doubt if the person who first conceived this idea had any experience with the drinking fountains at Texas Tech. From a small trickle to a near deluge, or cool to lukewarm, the water which comes from these fountains is never consistent.

Few people enjoy drinking from a fountain that is issuing only a small trickle of water. Not only is it uncomfortable to bend so far over, but also one must pucker his lips and get dangerously close to the billions of germs residing on the spigot. In order to get a decent drink, one must tarry a long time. If there is a line behind the fountain, any attempt to hurry only results in embarrassing noises made when the water temporarily recedes.

Almost as frustrating is overgenerous water fountains. Because of the high water pressure, the handle is hard to turn. When enough force is applied, however, it goes all the way over, sending a stream of water straight up one's nose. The second plan of attack calls for adjusting the water prior to getting a drink. This action usually results in a wet floor or wall, or possibly even the person standing next to the fountain. Actions such as these are not conducive to "winning friends and influencing people."

Perhaps the most annoying trait of any fountain, however, is the high temperature of the water. When a person approaches a fountain, he is obviously thirsty and is intending to refresh himself. When he takes the first swallow, the result is almost as disheartening as the traffic cop who stops a car for a violation only to find that the driver has diplomatic immunity. Even in the elaborate stainless-steel fountains with the thermostatically controlled cooling mechanism, the water is only a degree or so above room temperature.

Numerous are the stories of captured servicemen that bore torture rather than give away secrets, and numerous are the men that have died for their cause, but to this day an article describing the anguish and torture a thirsty student must bear with Texas Tech water fountains has never been written.

Respectfully submitted,  
Bill Snyder, freshman

### Men's No. 9 Council Criticizes Article

Dear Editor,

With regard to William Matter's article appearing in your Friday paper, the Toreador displayed two instances of regrettable deviation from previous publication policy. First, the Toreador's past preoccupation with accumulating and reporting factual information concerning campus issues was ignored, and secondly, your byline describing Mr. Matter as a "contributing writer" was an obvious misrepresentation to your reading public.

From this dubious "contribution" entitled, "Hey Herman, Do Ya Want My Chicken?", one is completely bewildered when the separation of fact from fantasy is attempted for investigation of complaint validity. Not one instance of pure truth can be garnered from this "cry-wolf" shotgun journalism.

It is a well-known fact in Men's 9 and 10 the Dietitian is highly qualified and sensitive to the likes and dislikes of the residents. However, we cannot expect this attitude of corrective empathy to continue

for any length of time if unjust and undocumented criticisms are allowed to occupy so much space in our news media.

Your publication of this overly exaggerated exercise in imagination (by a person whose only claim to journalistic bravery rests on the collective writings of Walt Whitman and a medical dictionary) will do much to advance the art of wolf-calling and precious little toward initiating culinary reform.

Hall Council  
Men's No. 9

### Woody Suggests Wider Crosswalks

Dear Editor,

Concerning the traffic problem on campus—the average student I believe would be more apt to observe the crosswalks if they were widened.

As it now is there is hardly enough room for two people to walk side by side across the street in most places. The crosswalks should be at least as wide as the average parking space for a car.

Wayne Woody

### Nelson Dislikes Election Turnout

Dear Editor,

Low participation in student elections has long been a problem. Being in the School of Business Administration, I took particular notice of the recent fill-in elections. Not knowing any of the candidates personally, I had only the following ways with which to decide my vote. I could vote for:

1. The one who had the prettiest poster;
2. The one who had the catchiest slogan;
3. The first candidate to stop me in front of the B. A. Bldg. and tell me he would appreciate my vote.

If no candidate has a platform there are no issues to vote on, only personalities. This is what happened at our elections, and I believe it is the reason for such low turnouts. Students say to themselves, if they think about the election at all, "What difference does it make who gets elected? I just don't see how it affects me."

On the other hand, if candidates would publicize their ideas (on posters, in The Toreador, etc.) on campus issues, interest would be stimulated. Once interest is stimulated we can expect a larger turnout of voters.

On a related matter, I would like to ask The Toreador to publish the text of the complete constitution. Returning to Tech after a three-year absence with the Army, I have not seen a copy of the constitution adopted last spring. I am sure that freshmen (and others in Tech for the first time) would also like to see the complete constitution.

Sincerely,  
James E. Nelson

### Student Questions View Of Editorial

Dear Editor,

Re your editorial of Saturday, Oct. 9, concerning graduate representation on the Student Senate. You question not whether it is right that they have it, but whether or not they want it, and suggest as reasons why they should not be or are not interested that "most graduate students are older, in most cases are married and spend relatively few hours on the campus."

You also state that they "are not closely woven into campus life."

Several points of reasoning in this view are questionable to me: (1) If it is agreed that graduate students have the right to be represented (Student Court's advisory opinion), is the possibility that the majority might be indifferent to this right justification for denying it to those who are not?

(2) The dichotomy between "campus life" and academics—I take the liberty of assuming that graduate students are interested in their studies—is one which I fail to understand. This campus, despite some opinions to the contrary, was established for academic study, and any attempt to draw some line between academics and campus life is an assertion that each is mutually independent from the other.

Is the Student Senate not to be concerned with academic standards and practices? When individuals and groups are brought here to speak, dance, sing, demonstrate, etc. is it not assumed that they contribute to the total educational process? Are the Senate activities to be directed toward something other than the creation of the environment conducive to the end for which Tech was established?

(3) How is it that graduate students are less affected by Tech's deficiencies than undergraduates? They should be the ones most knowledgeable on the student's view of what this school should be and they are equally responsible for making it approximate this ideal as closely as possible as other students.

Peggy Mehaffey, 1966

### Brummett Defends Bearded Students

Dear Editor,

In the Wednesday, Oct. 6 Toreador, Mr. Smith's column informs us of an incident which took place on the University of Texas campus. A "psuedo-John-the-Baptist" and "literate wolf-man" picketed an F-84 F jet fighter.

"These nuts," as Mr. Smith chooses to call them, were picketing the plane as "a symbol of all military budgets, airplanes, ROTC programs for the purpose of destroying human flesh." Mr. Smith goes on to say that what bothers him about this "fuzzy one" is not "him," but the fact that he has been seen in an "uncomfortable number of such creatures on this campus." He adds that "Many sport the same fuzzy beard and African bushman hairdo . . ." and that people like these undoubtedly come to college for the sole purpose of escaping the draft.

Now, Mr. Smith, surely a fuzzy beard and long hair do not categorize one as a "nut," "psuedo-John-the-Baptist," "African bushman," or draft dodger. Were this the case, I should think we might have grave reservations about some of the faculty here at Tech. Since when has the amount of hair covering one's head or face become any criteria for evaluating the validity of his arguments or the state of his mind.

Maybe all sane, God-fearing, mother-loving, red, white and blue American patriots wear button-down shirts and ivy-league haircuts. I doubt it. Isn't it possible that there are a few short-haired, clean-shaven draft dodgers at Texas Tech?

Before you purge them from your hallowed collegiate ranks, Mr. Smith, try being a bit more tolerant of people with long hair.

Hac Brummett

**EDITOR'S NOTE**—Mr. Smith was not objecting to beards in general, just to one bearded student in particular and to others with similar views.

## Engineers Get Scholarships

Twelve scholarships totaling \$4,250 have been awarded to students in Texas Tech's petroleum engineering department.

Robert St. Germain, senior from Houston, received the \$800 Sun Oil Scholarship awarded to an outstanding upperclassman.

Johnnie D. Odum, freshman from Liberty, received the \$700 Pan American Foundation honor scholarship. He is the first student to receive the four-year award.

Selection is based on outstanding potential. Continuation of the scholarship depends on maintenance of a B-average or better with an annual increase of \$100 each year of possession. In addition, the holder is guaranteed summer job offers during his school career.

Jack D. Owens, Levelland freshman, received the \$500 scholarship awarded by the South Plains Section of the American Petroleum Institute.

Glen Gilbreath from Santa Anna was presented the \$250 Dowell Scholarship for freshmen.

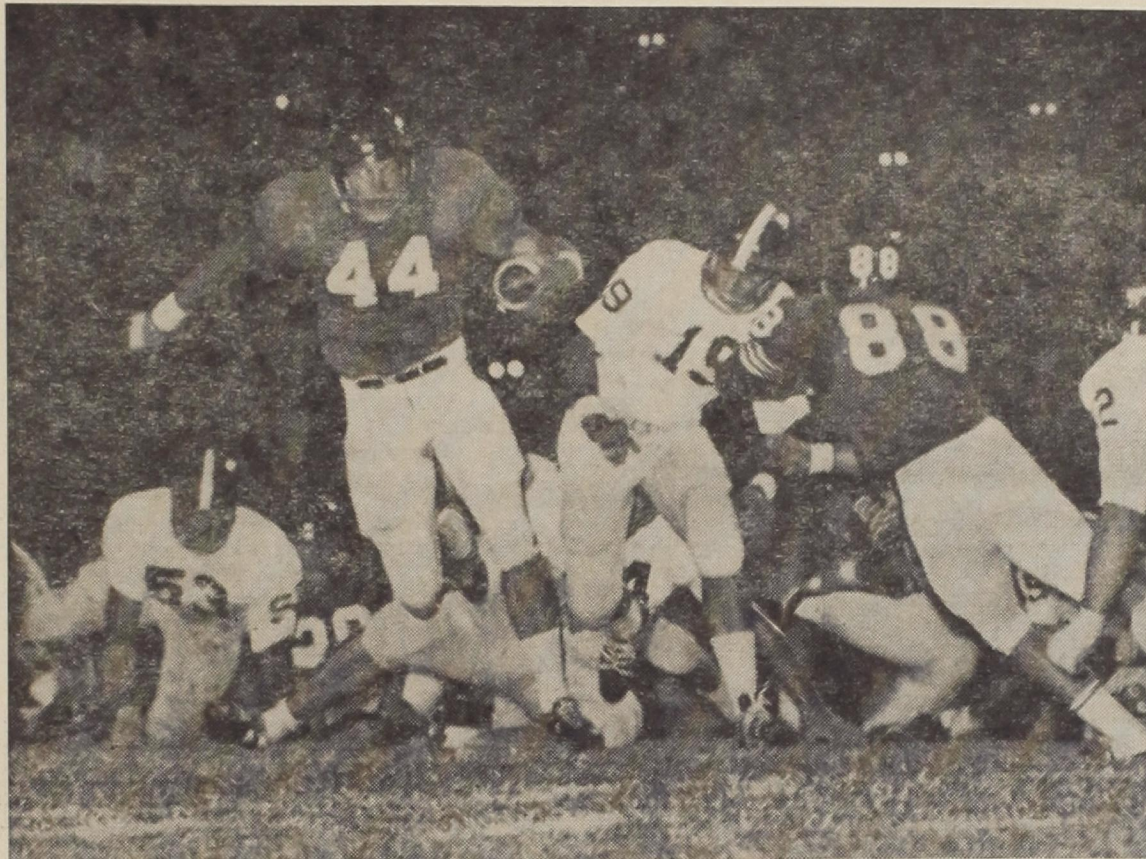

Freshmen receiving the \$250 departmental honor scholarships for 1965-66 include William Duncan of Fort Worth, John E. George of Coleman, John Lamberth of Kemah, Don Lamprecht of Lubbock, Andrew Merryman of League City, Elson Robertson Jr. of San Angelo, Ronnie Thrash of Dallas and Curtis Wood of Wolfforth.

Freshman students were selected by the faculty of the department of petroleum engineering on the basis of academic potential shown by high scoring on scholastic aptitude tests administered by the college.

## Forum To Discuss Art and Morals

"Contemporary Art as a Moral Issue" is the topic of Wednesday's noon forum in the Tech Union. James Howze, assistant professor of allied arts, will be the speaker.

The talk will be preceded by a \$1 buffet luncheon for which students must sign up by 5 p.m. today in the Union program office. The talk will begin at approximately 12:20.

FROG'S-EYE VIEW—Texas Tech's Donny Anderson (44) charges wildly through the TCU line to begin a 54-yard touchdown run in the first quarter

of Saturday's SWC encounter with the Froggies. Anderson led Tech rushers for the evening with 105 yards.

### Engineers

Tennessee Gas Transmission Company and component companies, including Tenneco Oil Company, Tenneco Chemicals, Inc. and Packaging Corporation of America, have opportunities for graduates in the following disciplines.

### Mechanical Electrical Civil

Senior students are invited to discuss these opportunities with company representatives on October 18 and 19. Contact Placement Office for location, time, and company brochure.

# Koufax Blanks Twins With Four-Hitter, 7-0

LOS ANGELES (AP) — Sandy Koufax and Maury Wills took command of the World Series Monday as the fleet Los Angeles Dodgers humbled the free-swinging Minnesota Twins 7-0 and took a 3-2 edge by winning the fifth game.

Koufax allowed only four hits, struck out 10, and had a perfect game going until Harmon Killebrew got a single in the fifth on a ball that Willie Davis first misjudged and finally couldn't hold after a long run.

The Twins' second hit was an infield roller that Joe Nosssek just beat out by a whisker in the seventh. Frank Quilici and Sandy Valdespino singled in the ninth.

#### Ties Series Record

Wills tied a Series record with four hits, including two doubles, in the Dodgers' total of 14 hits off loser Jim Kaat and Dave Boswell and Jim Perry.

The alert Dodgers stole four bases, three of them by Willie Davis. It was the first time a player had stolen three in a Series

game since Honus Wagner, the old Pirate immortal, did it in 1909.

After five games the Dodgers, derided for their peck and scramble attack, were hitting .302 as compared to their regular season average of .245.

Koufax, coming back with a strong effort after his defeat by Kaat in the second game last Thursday, appeared on his way to a no-hitter or a perfect game as he mowed down the Twins in the early innings.

When Killebrew came up to open the fifth, Sandy had retired 12 successive batters.

#### Two In First

The Dodger bandits who lost the first two games in Minnesota, were all over Kaat and his successors. They scored two in the first, two more in the third and never let up.

They now go back to Minnesota for a sixth game Wednesday afternoon and a seventh, if necessary, Thursday. There will be no game today, an open date for travel.

Wills opened the attack with a ground rule double that bounced

into the stands in right in the first inning. Jim Gilliam, his old sidekick, singled him home.

Willie Davis' sacrifice bunt was taken by Killebrew, but Quilici, covering first, let the throw get through him and Gilliam came all the way home.

Davis kicked it off again in the third with a single to right. He stole second and sped home when Lou Johnson reached out and dunked a single into center field.

Ron Fairly promptly followed up with a double to center that scored Johnson, and the Dodgers were off and running with a 4-0 lead. Kaat gave way to Dave Boswell after Fairly's double.

#### Beats Out Hit

That pesky Wills was at it again in the fourth, beating out a slow roller to Zoilo Versalles for an infield single. After Boswell played cat-and-mouse with Wills, trying to keep him close with six straight pick off throws, Wills packed up and stole second on Boswell's first throw to Gilliam.

Junior promptly stroked a single to right center, once again scoring Maury, the Dodger captain.

Jim Perry was working for the Twins when the Dodgers picked up their last two runs in the seventh. Once again Wills was a factor, driving in the final score with a single to center that was his 10th of the Series.

Fairly opened the seventh with a single and was moved along on Wes Parker's sacrifice.

After Dick Tracewski struck out, John Roseboro was walked intentionally.

Koufax, a strikeout victim the first three times, then drew a tremendous roar from the crowd by singling to center, scoring Fairly. It was Sandy's first Series' hit. Wills' single knocked in Roseboro, completing the scoring.

#### Starter Undecided

Sam Mele, manager of the Twins, said he would not make a positive decision on his sixth game starter until after today's workout at Metropolitan Stadium.

He said he was considering Jim Merritt, Camilo Pascual and Jim Grant, but most observers believed he would fall back on Grant, his ace, with his back against the wall.

Grant pitched Sunday but was taken out after throwing to two batters in the sixth.

Mele called Koufax "great, absolutely great, the best I have ever seen." But he added, "We're not out of this thing yet. We've bounced back before. Our home park means a lot to us. We even scored on Koufax there."

Claude Osteen, the shutout winner of the third game with a five-hit 4-0 victory, will work for the Dodgers in the sixth game.

Walter Alston would not speculate on the seventh game as to whether he would continue in rotation with Don Drysdale or fall back on Koufax.

It was another bumper crowd with gate receipts of \$511,064.88, but the players took only an academic interest in the figures. They cut into only the first four games.

The winners probably will get about \$9,000 each and the losers close to \$7,000 when Commissioner Ford Frick announces the cut in a few weeks.

Told that Koufax said he would be ready for the seventh game if called upon, Alston said, "Sandy is ready any time."

"I hope to keep the club hot," said Alston, whose Dodgers will remain in Los Angeles for a workout Tuesday before flying to Minnesota.

Summing it all up, Koufax came up with the understatement of the day:

"We all had a good day."

## "At graduation I still wasn't sure what kind of job I should take"

"Where would I fit best . . . lab, plant, field, sales, administration . . . ? What kind of projects . . . ? These were questions I couldn't answer. So I looked for a company that would give me room for lateral, as well as upward, growth. One that was big enough and still *personal* enough that I could make adjustments as I went along, and not get pigeon-holed.

I found what I wanted at Phillips.

Of course, Phillips is big . . . 19th largest among industrials. But as I got talking to them, I realized this was, surprisingly, a *people-type* company. Pleasant, direct, informal. Personal. I found out a lot more, too. I'd thought of Phillips only in terms of oil, refining, gasoline. I hadn't known they were so deep in LP-gas . . . Rubber . . . Plastics . . . Carbon Black . . . Rocket Propellant Binders . . . Fertilizers . . . Packaging . . . Textile Chemicals! And that's a highly abbreviated list.

I've been here 3 years now. I've had ample chance to define my career and make changes. It's worked out very well. Phillips is a growth company, and I feel I'm growing with it."

That is not just one person speaking, but a composite of the kind of comments we get . . . a group picture. If it sounds like the kind of picture you should be in, contact:

# Anderson, Howard Week's Top Back, Lineman

## Raiders Learned Their Lesson Well

MIKE LUTZ

By MIKE LUTZ  
Sports Editor

Tech's offensive unit moved into the limelight Saturday night to direct the Raiders to a 28-24 victory over TCU, and as testimonial of that effort, this week's Daily Treador Back and Lineman of the Week both have been selected from that group.

All-America halfback Donny Anderson was named top back for the second consecutive week and co-captain guard Chester Howard got lineman laurels in a close race with end Jerry Shipley.

"Offensively, we blocked better from tackle to tackle than at any

time this season," Coach J T King said. "Chester did a good overall job and especially stood out on the pulling plays and punt coverage."

### Caught Six Passes

Shipley, who caught six passes for 66 yards, graded higher than Howard, "but Howard threw the key block that helped Anderson score our first touchdown," King said.

"Donny figured prominently in so many of our key plays and made so many great runs, you'd almost have to give it to him," King said. "Do you know, he made a total of 303 yards total production."

By total production, King referred to Anderson's mileage in four categories, rushing (105 yards), pass receiving (92), kick-off returns (92) and punt returns (14).

### Good Punting

"And if you count the yards he gave us with his punting, he'd have well over 400 yards," King added.

More significant than Anderson's 36.4 punt average was the fact that out of five boots, none were returned. His high, spiraling punts gave his teammates ample time to get downfield to cover.

(See Anderson Page 8)

IF TECH CONTINUES to win football games in its present manner, they'll soon be calling Coach J T King a "Two-Minute Man" and reasoning behind the nickname goes something like this.

For the past two weekends, the Raiders have performed with sufficient prowess in the waning minutes of play so as to rally past two SWC foes, Texas A&M and TCU by name, and as King will gladly tell you, the bit of strategy that turned the trick was "our two-minute offense."

## For Young Men In A Hurry

What it amounts to is four carefully planned maneuvers, three drop back pass plays and one pass-run option counter, all designed to gobble up yardage quickly when the Raiders are trailing.

"I'll say this. Our two-minute offense won the game for us," was King's summation following Saturday's thrilling, 28-24 victory over an inspired band of TCU Horned Frogs.

"We work on it every week in practice and especially on Thursdays," King said. "We put the ball on the 40 with one time out remaining and give them two minutes to score."

## It's Worked Two Weeks Now

But on second down, Wilson zeroed in on All-America Donny Anderson, who's living up to his rating, for a completed aerial to the Froggie 27. From there, first and ten, Leinert bucked the middle for no gain.

But Wilson went back to the airways and on the next down hit end Jerry Shipley at the TCU 12, from which vantage point Leinert snatched the winning TD pass two plays later.

"WE DID THE SAME thing against A&M," King said. "We've worked on it hard and it's surely paid off for us," the Raider head man added, relaxing after his third successful week of the year.

"TCU did an excellent job on us," King said. "We expected them to come down here throwing the football, and set up our defenses accordingly."

"But they played ball control and that really hurt us. In fact, it almost beat us," he added quickly.

Last Monday, an aspiring young man from the halfback ranks was shifted into the fullback cavity of the Raider backfield and today sophomore Kenny Baker is considered the first step in solving the fullback dilemma.

"Baker took a big step in Saturday's game," King said. "We didn't give him the ball much, but he did a good job of blocking."

"Now, if we can get some of our people well at end, maybe we can solve some more problems."

**OFF THE CUFF:** Confidence cannot be measured in statistics, but from where this pressbox observer sat, it was certainly being radiated by the Raiders Saturday night.

Perhaps it began two weeks ago with a juggling act that pushed Tech past the Aggies, but whatever the origin, it would appear that the Raiders are fast developing that quality so often lacking in past Tech teams.

Call it pride, poise or whatever, a team has character when it comes back from three setbacks in the late stages to win.

Twice in the last half the Raiders lost possession via interception, once on the TCU nine and again on the Frog 44. And just prior to the winning touchdown, Tech gave way to TCU by a fumble at the visitors' three-yard stripe.

But it's Tuesday morning now, and planning is already in the ad-

"The offensive team must move 60 yards in the specified time with the plays we've decided on," King said.

The Raiders learned their lesson well, and their testimonial is recorded in the play-by-play description of Saturday's conference victory No. 2.

With three minutes 58 seconds remaining in the game, Tech took possession at its own 43, and immediately quarterback Tom Wilson filled the air with footballs. The first went incomplete to halfback Mike Leinert, who trespassed on the TCU goal line three times.

vanced stages for Saturday's non-conference opponent — Oklahoma State, a team not much unlike TCU in the matter of scheduling.

Both teams have faced a formidable early season slate. And each has shown the ability to score the upset. The Cowboys, although bucked back three times this season, put on a rousing rally to defeat Tulsa two weeks ago. Their losses have been to Arkansas, 28-14; Missouri, 10-0 and Colorado Saturday, 34-11.

After Saturday's stinging defeat by unbeaten Colorado, the Sooner State troopers likely will have their spurs sharpened for the Raiders, but with the frequency of heroics displayed by the locals before the home crowd, wonder what they'll do next.

### IM Seeking Bowling League

Deadline for entering the intramural program's Tech married couple's bowling league is noon today, according to Edsel Buchanan, intramural director.

Bowlers interested in signing up for the league should either call or go by the intramural office today to sign up for the 10-week league.

Fee for each couple per league night is \$2. If enough couples sign up for the league, play will begin Wednesday night at Lubbock Bowling Club.

## Raider Cagers Seek Replacements For Two Veterans As Drills Begin

Replacing two players who started every Texas Tech game for three seasons will be the principal objective for the Red Raider basketballers, who start workouts here Friday.

Graduated are 6-8 Harold Denney of Amarillo, who averaged 17.7 points last season, and 6-5 Glenn Hallum of Brownwood, who averaged 11.8 points while playing some of the best defensive basketball in the Southwest. A third letterman graduated is 6-3 Royce Woolard of Midland, a top reserve

who started several games. Coach Gene Gibson and assistant Charley Lynch will have eight returning lettermen, including three 1964-65 starters—5-11 Dub Malaise of Odessa (23.7 avg.), 6-6 Norman Reuther of Fort Worth (17.6), and 6-3 Billy Tapp of Lubbock (4.6).

Other lettermen back are 6-2 Bob Measels of Seminole (7.2), 6-4 Russ Wilkinson of Lubbock (3.0), 6-5 Dave Olsen of Las Cruces, N.M. (2.5), 6-2 Trenton Bonner of Graham (2.5), and 5-10

Jimmy Fullerton of Lubbock (0.5). Other leading candidates are five sophomores—6-7 Vernon Paul of Lawton, Okla., 6-1 Danny Davis of Lubbock, 6-7 Bob Glover of Dallas Jefferson, 6-5 Joe Dobbs of Lubbock, and 5-10 Jerry Haggard of Lubbock Monterey.

### Anderson

(Continued from Page 7)

But Anderson's selection was by no means unanimous. Quarterback Tom Wilson, although he had three aeriels intercepted, graded 88 per cent and sophomore halfback Mike Leinert tallied three of Tech's four touchdowns to push Anderson for honors.

"If he hadn't had those three passes intercepted, no telling what he might have graded," King said of his No. 1 quarterback. "And, although he wasn't in on some of the key plays of the game, Agan (halfback Johnny) graded 87 per cent."

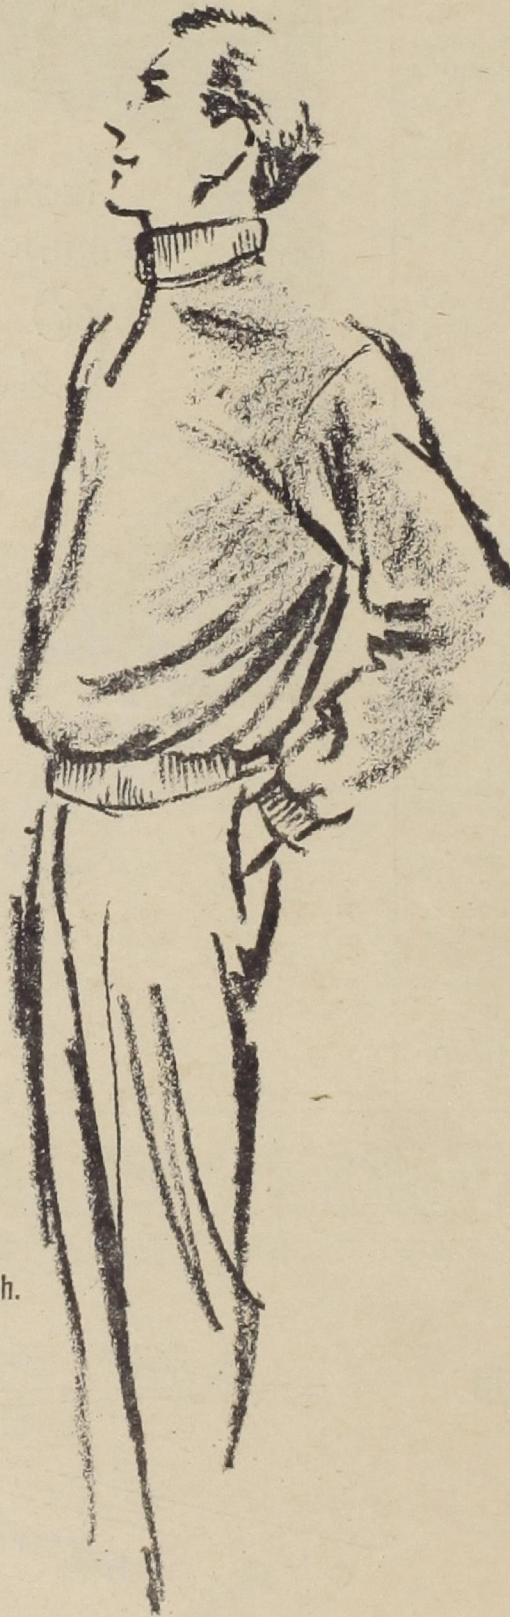

Leinert did not grade on a level with Agan, with whom he split time, but the Houston Milby product scooted into the TCU end zone with but 2:20 left in the game to give the Raiders the necessary winning margin.

King also praised the efforts of another sophomore, inserted into the starting lineup for the first time this season.

"Kenny Baker played every offensive down at fullback and did a creditable job," King said. The Houston Smiley gridded graded 70 per cent in his first starting role.

Other linemen mentioned by King included co-captain tackle John Porter, center Jerry Turner and tackle Stanley Edwards.

Porter and Edwards each graded 65 per cent after coaches viewed the films. It was Edwards' best effort of the season. Turner, despite being outweighed by one of two Froggie guards throughout the contest, graded 75 per cent.
