

Run-off election set

Frosh election rules outlined

The Senate's Election Committee explained the new freshman election policies and poster rules Monday.

The freshman constitution states that freshman representatives will be chosen according to proportion. The Election Committee determines this proportion.

Eighteen representatives are selected by dorm residents and 17 are selected by off-campus students.

Dormitory representation is as follows:

ONE REPRESENTATIVE from each of the boys' dorms; one from the Matador dorm; one from Drane; two from Horn, Knapp, Gates and Wall.

The 17 off-campus representatives will be chosen by off-campus students only.

Friday off-campus freshmen may cast their votes from 8-12 a.m. and 1-4:30 p.m. in the Tech Union or the Ad Building.

Dorm residents will cast their votes in their respective dorms with time of election to be set by the individual dorm councils.

CANDIDATES CANNOT run for both freshman representative and freshman cheerleader, and ID's are re-

Senate meet set tonight

Bill Beuck, president of the Student Association, will deliver his "State of the Union" message at the Student Senate meeting tonight.

As prescribed by the Student Association constitution, Beuck will describe his proposed legislation and the general outlook for the upcoming year.

In other business, the Senate will consider the approval of appointments for executive committees. Gary Rose, vice president of the Student Association and president of the Senate, will announce appointments to the allocations and all-school trip committees. The all-school trip is tentatively set for the Rice game in Houston Oct. 29, pending approval of the Senate.

ROSE WILL also announce approximately 10 other committees needed for the year, and will ask senators to consider accepting appointments on them.

Bob Fillpot, athletic council representative, will appear before the Council to explain seating at football games and to ask support for a card section.

The meeting is scheduled for 7 p.m. in the Biology Auditorium, located in the basement of the Science Building.

Late letters arouse ire of students

"Where's my mail?"

Dissatisfied male students asked this question at Thompson Hall Monday as they clustered about their empty mail boxes.

One resident registered his protest through an anonymous call to the University Daily, and said it was a "rebellion."

"They're holding up our mail!"

According to Thompson residents, the mail was late in arriving, coming at noon instead of 11 a.m. as usual. Officer Manager Larry Johnson, who sorts the mail, didn't have time to sort, eat and get to class, so he temporarily lost any chance for a dormitory popularity contest. His classes lasted all afternoon.

Some of the students holding part-time dorm jobs attempted to sort the mail, but Guy B. Watts, dorm supervisor would not allow them to continue.

Meanwhile students continued to await letters from home, sweethearts—and the draft board.

quired for voting.

At the last Senate meeting it was decided that vacancies would be filled by the next person in line, according to last spring's voting.

Since the next person in line for BA representative is a tie between Krete Jeffrey and Robert Gantt, a run-off election will be held.

Only upperclassmen will be permitted to vote in this election.

Students may cast votes in the BA Building Friday from 8-12 a.m. and 1-4:30 p.m.

Co-editors name staff for annual

Nancy Hedleston and Charlotte Shive, co-editors of the La Ventana, have announced the staff for the 1966-67 yearbook.

They are:

Barbara Reed-section editor; Town and Country; Debbie Holder, Brenda Oliver, Jan Bratton and Sue Crockett. Freshman View; Jinx Allen, Betty Anglim, Jane Germany, Cam Cooper and Sheila Looney.

Cheryl Russell-section editor; Post; Karen Laws, Alice King, Judith Meloye, Sheryl Wall and Kay Burney. Future; Bebs Bullock, Elaine Saul, Arlene Hajek and Sharon Reed.

Ronnie Lott-section editor; Tyme; Susi Kregel, Carla Dunn, Paulette Gavin and Barbie Fassel. Sports Illustrated; Patsy Lokey, Linda Foster, Caren Person and Barbara Langley.

KAY GESSLING-copy editor; Sammie Fletcher, Marilyn Neunaber, Sharon Thurman, Sharon Lewis, Susan Stephens and Diane Bloomer.

Taunton Welsh-section editor; Playboy; John Clifton, Gary Tilyor, Nancy Hurn and Donna Carter. Senior View; Maryanna Hill, Julie Connelly, Lynda Kiesling, Mary Monarch and Lois Ricketts.

Angele Scheeter-section editor; Sophomore View; Sara King, Tania Andrasco, Barbara Green and Kitty Cowan. Mademoiselle; Sandra Waldrep, Pam Shirley, Winifried Striker and Alison Aikens.

Noel Knight-section editor; Junior View; Carolyn Dawson, Milton David Adams, Tenna Gorka and Lora Lynn Hunt.

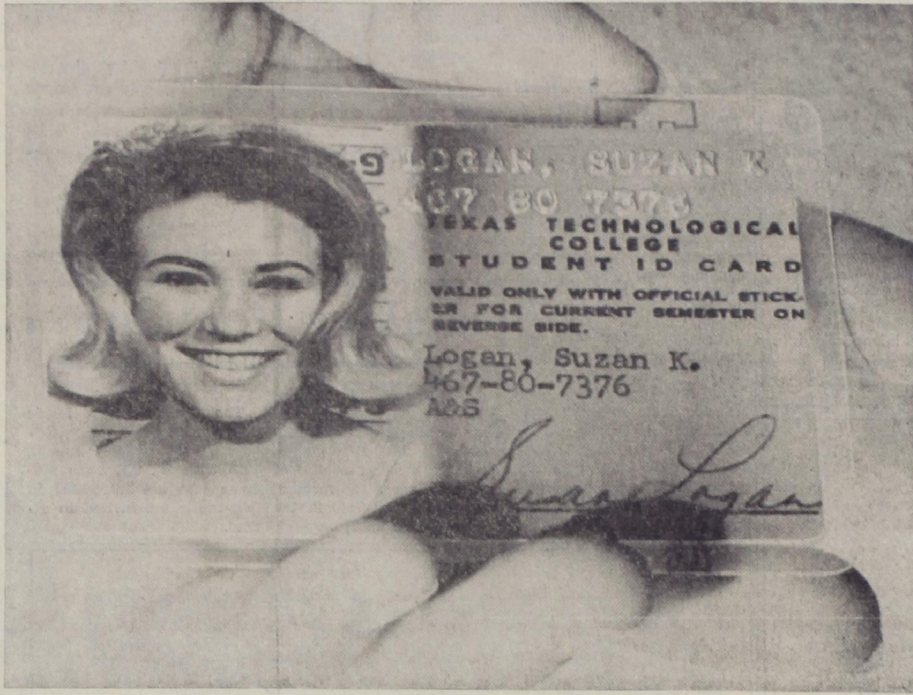

POSITIONS WERE chosen from applications made last week. Applications can still be made by applying at the La Ventana office in the Journalism Building.

Eisenhower advocates win-the-war-now tactics

WASHINGTON (AP)—The political uproar over Viet Nam welled up Monday in a fresh win-the-war-now demand by Gen. Dwight D. Eisenhower and a stout defense of President Johnson's peace efforts by Senate Democratic Leader Mike Mansfield.

At almost the moment Mansfield was telling his Senate colleagues the voters have a right to know whether Eisenhower is advocating nuclear attacks, the Republican former president was saying he would not automatically preclude the use of such weapons in Viet Nam.

"I WOULD DO anything that would bring the war to an honorable solution as rapidly as I could," Eisenhower told newsmen after attending a meeting of the Republican Coordinating Committee of which he is a member.

Although Eisenhower indicated he was speaking in terms of holding the threat of nuclear weapons over the North Vietnamese and not advocating their actual use at this point, his views were likely to be given a wide variety of interpretations around the world.

MANSFIELD, a sometime critic of administration policies, attacked those at home and abroad who question the "honesty of President Johnson's flexible proposals" for peace in Viet Nam. "I do not doubt his honesty and sincerity," he said.

Did Eisenhower's earlier statement mean he would employ up to two million men, invade North Viet Nam and use nuclear weapons, Mansfield inquired?

"The Congress is entitled to know and if the matter is to be considered during an election campaign, the voters of the nation are entitled to know," the Montana senator declared.

THE ARMS-LENGTH exchange of Democratic and Republican viewpoints came after retired Gen. Curtis LeMay,

former Air Force chief of staff, had called present strategy in Viet Nam "the ultimate in military blindness."

LeMay recorded his views in an interview with U.S. News and World Report released Monday.

"THE POPULAR philosophy that we can be cautious and timid military tactics, keep the war from escalating into a larger conflict is the ultimate in military blindness," LeMay said.

"The only way to win a war is to escalate it one way or another above what the enemy can take. If we feel we can't win without unacceptable risk, we have no business fighting in the first place. We must wage this war in such a way as to win it as quickly as possible."

Eisenhower spoke out in much the same vein Monday. And GOP National Chairman Ray Bliss, who attended the party meeting with Eisenhower, said Viet Nam remains the primary concern of the voters.

The former president said he was not trying to set himself up as a competent authority to criticize the President. Eisenhower said he gave his advice only when requested, but he conceded Johnson had not asked for it at this time.

Daniels says more traffic tickets given

Bill G. Daniels, Texas Tech chief of Traffic Security, said today that although an official count has not been made, there does seem to be an increase in parking tickets being issued this year.

Referring to parking on the Ad Building parking lot, Daniels said "After 5:15 p.m. any student may park on this lot provided he or she has a Tech parking permit."

THE AD BUILDING parking lot, during the hours of 7:15 a.m. to 5:15 p.m. week-days and 7:15 to 11:15 a.m. Saturday, is for the use of staff members, disabled students and visitors.

Daniels also said that at no time should any student or visitor park in the spaces reserved for the president and his staff.

Tech-TCU tickets

Tickets for the Tech-TCU football game Saturday in Fort Worth are available at the Tech Athletic Office.

Tickets cost \$1 with student I.D.'s.

Deadline for buying tickets is noon Wednesday when they will be sent back to TCU.

HE ADDED: "If I had the responsibility, just as soon as I could I would bring this thing to a conclusion. Everything must take a back seat to winning a war and that goes for social programs."

Eisenhower recalled that the United States had been committed to bringing freedom to South Viet Nam.

"All right," he said, "as long as we have to do that, let's do it in whatever way it is necessary."

MANSFIELD, an advocate of limiting the war, called for support of Johnson's policies. He assailed critics who attribute domestic political overtones to Johnson's forthcoming meeting with Asian heads of state at Manila—now postponed to Oct. 28-29—10 days before the U.S. elections.

Amarillo asks U of T board for med school

AUSTIN (AP)—An Amarillo group which said it has "talked, planned and lived hospitals" for the past several years asked University of Texas regents Friday for a state medical school.

They spoke with full knowledge that the regents have endorsed Houston as the site of any future medical school.

"We'd like to take our place, but not precede any city or locale" for a medical school, said Wales Madden Jr., Amarillo lawyer and former regent. It's not impossible, instead it's probable that Amarillo will at some future date have such a school."

AMARILLO MAYOR F. V. Wallace told the regents' medical affairs committee what the city is doing in the way of medical construction and added:

"We cannot wait the construction of medical school teaching hospital until a medical school can be established. The need of additional beds, development of nursing education, establishment of a health related vocational school, and many other pertinent factors make it imperative that our Northwest Texas Hospital of the Amarillo Hospital District be relocated immediately on the medical center. Thus we plan to build our teaching hospital of 300-500 beds with completion scheduled for 1971."

Wallace and several other persons, including Mrs. Louise Evans Bruce editorial page editor of the Amarillo Globe-News Publishing Co., spoke for a hospital committee organized in 1955.

"THE RESULT WAS and is a continuing planning program on a home grown basis," Wallace said. "We met every week for years—we ate bad food—we talked, planned and lived hos-

Expansion plans may begin soon

Preliminary plans for expansion of Tech Union will soon be underway, members of the Union Board were told Monday.

An application requesting that Union expansion be placed on the agenda of the Campus Planning Committee was approved last week by Marshall Pennington, vice president for business affairs and chairman of the CPC.

The CPC is the first step for any construction on campus. It works out details concerning new buildings or expansion, approves plans and architectural drawings and then makes recommendations to the building committee of the board of directors.

"THIS IS AN excellent opportunity for adding to the Union if we can get the money," chairman James G. Allen told the Union Board members.

He referred to the "tight money" situation which is making it difficult to sell bonds. Any expansion to the Union would have to be financed by bonds sold to private enterprise. State and federal money can only be used for construction of academic buildings.

This is the same method used to finance the building of dormitories. An application for Union expansion presented to the CPC in August, 1965, was tabled because private funds were needed at that time for dormitory construction.

"PROBABLY THE dormitory situation is stabilized enough that attention should be turned to the Student Union," a memorandum dated Sept. 29 from Pennington to Allen and Nelson Longley, director of Tech Union, stated.

"Miss (Jerry) Kirkwood (CPC coordinator) is requested to place the item on the agenda and, with proper approval, Mr. (Howard) Schmidt (architect) probably should start the programming schedule.

"A careful look should be taken at the request, as I believe it is extremely modest," Pennington said in the memorandum.

TENTATIVELY INCLUDED in the plans are seven meeting rooms for the second floor, expansion of the Faculty Club, a 12-lane bowling alley, an 800 to 1,200 seat auditorium and expansion of the snack bar which would approximately double its present size.

pitals . . . We have no formal financing and have to scrounge for the money for every project. We still pay for our meals and generally our own travel."

Mrs. Bruce said, "This is not a chamber of commerce project. The money that has been spent is our own."

She said of the \$12 million spent on the center on 400 acres west of Amarillo, only \$2 million came from state and federal funds.

"WE WANT TO be so good that the university will ask us to put a medical school there," she said.

Legislative approval is needed for any new state medical school.

★ ★ Regent says action unlikely

AUSTIN (AP)—Dr. H. F. Connally Jr. of Waco, chairman of the University of Texas regents medical affairs committee, said Saturday the board probably will not act on a request by Amarillo residents to establish a state-supported medical school there.

"We aren't sure it is within our authority" to recommend location of the school, Connally said.

ASKED ABOUT the regents' endorsement earlier this year of Houston as a site for the next medical school, Connally said:

"I'm not sure we had the authority to do that."

Legislative approval is needed for establishing a state-supported medical school.

WSO
The Texas Tech Women's Service Organization will meet at 7 p.m. in room 372 of the Ad building.

The Texas Tech Chapter of the Texas Section of the American Society of Range Management will hold its regular monthly meeting today at 7:30 p.m. in the Aggie Aud.

ID card distribution starts today in library

Distribution of identification cards begins today and will continue through Friday in the Tech Library.

Tentative time for distribution is 12:30-7 p.m. Student fee slips will be needed to obtain IDs.

La Ventana Pix

Student pictures for the La Ventana are being made at the Avalon Studio, 2414 Broadway.

Photos will be made from 8:30 a.m.-noon and 1 p.m.-5 p.m. Appointments can be made but not necessary.

Pictures will be made throughout October. No deadline has been set.

Boys must wear coats and ties. Girls can have regular attire.

Students should bring their fee slip. If the student bought a yearbook no charge will be made, otherwise there is a \$1 charge. If the student buys a yearbook at spring registration one dollar will be deducted.

This year the identification cards have colored pictures and are laminated with raised letters.

The production cost for one card was \$1.25. The cost of a replacement card in case of loss depends upon the time in the semester. Early in the semester, a new card will cost \$20 and the amount decreases as the year progresses.

The majority of the stores around the campus require an ID to cash a check.

IDs will be necessary for students to be admitted to the Tech-Florida State football game, Oct. 15.

Date Tickets

Student date tickets will be on sale each Tuesday and Wednesday preceding a home football game, the athletic ticket office has announced. Tickets will sell for \$5 each and will entitle the holder to sit in the student section. Three hundred will be offered for each game.

The ticket office also announced that student tickets for out-of-town games must be purchased before noon Wednesday of the week of the game. They will sell for \$1. The purchaser must present his student ID.

Simon and Garfunkel silence Tech fans with sounds

by ELAINE McLENDON
Fine Arts Editor

Two vacant stools sat alone on the Municipal Auditorium stage Friday night looking as if they were wondering along with everyone else what had happened to Simon and Garfunkel.

But the talented pair finally arrived and proved to the capacity crowd that it was well worth waiting for an hour. Apologies behind, they began their performance with a rousing bit of Americana titled "Richard Corey."

Dark-haired, 5 feet tall Paul Simon is the creator of the duos city-style folk songs.

Paul sings lead and accompanies the two on guitar, equally adept at a 6- or 12-string.

Artie Garfunkel, with an over abundance of curly blond hair, sings harmony and acts as straight man for Paul's jokes.

Typically "mod" in appearance and speech, the pair sang of frustration, protests, lost love, love never found and the happiness of being alive.

Paul said his attitude toward writing songs has changed since their new success. He finds now he is able to write happy songs as well as the

deep, thoughtful and emotional kind for which the two are famous.

A rock and roll satire and "I Am A Rock" were two of the most well-received songs of the evening.

The versatile young men surprised the audience with numbers such as "Benedictus" and a guitar solo by Paul.

Paul received much of his inspiration for writing by observing the commonplace and often ugliness of the world, as typified by "Poem on an Un-

derground Wall" and "Most Peculiar Man."

"Red Rubber Ball," "Dangling Conversation" and "Homeward Bound" were more familiar numbers.

The pair closed the show with their biggest hit "Sounds of Silence," but came back for an encore with "Churches Are Burning" a selection from their latest album.

A slow start, but a rousing finish to an evening with Simon and Garfunkel in concert.

Alpha Phi places first in annual Fiji Olympics

Alpha Phi Sorority became the new defending champion as they carried away Phi Gamma Delta's traveling trophy Sunday afternoon at the Fiji Olympics.

Placing first with the highest accumulated score, Alpha Phi received a first place trophy and a tug-of-war trophy in addition to the traveling trophy. Second and third place trophies were presented to Kappa Alpha Theta and Kappa Kappa Gamma sororities, respectively.

Zeta Tau Alpha sorority was the recipient of the sportsmanship trophy.

"Sportsmanship was based on attitude, enthusiasm, and cooperation," stated Trenton Bonner, Olympics Chairman.

All 13 sororities entered competition for the eight events. These included the sack race, the balloon toss, the three-legged relay, the wheelbarrow race, the egg toss, the dizzy lizzy, and as a special event, the tug-of-war.

Are you discontented enough to work for G.E.?

Does water pollution bug you? Or smog? Does it concern you that some places in the country never have enough teachers? Or nurses? And when you read about the growing pains of a developing nation, do you wish you could do something?

You can. Thousands of General Electric people are helping to solve the problems of a growing, changing world.

Generating more (and cheaper) electricity with nuclear reactors. Controlling smog in our cities and pollution in our streams. Using electronics to bring the teaching skills of an expert into many classrooms at once, the trained eyes of a nurse into many hospital rooms at once.

If you're not content with the world as it is... and if you have the brains, imagination and drive to help build a better one, we'd like to talk to you.

See the man from G.E. during his next campus visit. Come to General Electric, where the young men are important men.

Progress Is Our Most Important Product
GENERAL ELECTRIC

Amarillo request misplaced

The request presented by a group of Amarillo citizens to the University of Texas board of regents for a state-supported medical school in their city raises an interesting question:

What does the U of T board have to do with the location of future medical schools in Texas? Obviously, the Amarillo group approached the regents because they expect new medical schools in the state to become branches of the University of Texas. Here either they are making a large assumption or they have an insight into the minds and workings of the Coordinating Board and the legislature.

Any action concerning the site of a new medical school will have to be taken by the legislature, probably after a recommendation from the Coordinating Board.

Earlier in the year the regents had endorsed Houston as the site for the next state medical school. But this weekend Dr. H. F. Connally Jr., chairman of the regents' medical affairs committee, admitted, "I'm not sure it was within our authority." The same statement applies to the Amarillo request, he said.

Texas Tech now has a request for a medical school before the Coordinating Board. During the last legislative session, Lubbock and Amarillo rivaled each other for a medical school. A bill establishing a medical school at Tech was finally passed, but Gov. John Connally vetoed it because it had not been approved by the newly-created Coordinating Board.

Amarillo presented a strong case for a medical school, including plans for a \$12 million medical center already in progress which could be used as a "teaching hospital." In this respect it is far ahead of Lubbock.

But Amarillo has no university campus to offer which would contribute immeasurably to a medical school through cooperation in research, use of laboratory equipment and facilities, use of library facilities and many other areas.

We are not criticizing Amarillo's effort to secure a medical school, but rather its methods of requesting the school. The proper place for the request was the Coordinating Board, not the University of Texas board of regents.

Review the recommendations

The State Board of Education's Saturday action of endorsing a "revolutionary" plan for Texas public schools was an action which will undoubtedly bring forth a great deal of response from many quarters both pro and con.

The proposal might well be called a "one-one-one increase." It calls for a seven-hour school day (an increase of one hour), a 10-month school year (an increase of one month) and a 13-year plan (an increase of one year). The changes will be submitted to the Texas legislature when it convenes in January.

Briefly, the purpose of extending the daily and monthly schedules of the school year is to provide more time to include new knowledge in such subjects as science and "others that are in a process of rapid change."

Admittedly a meritable cause, but would it not be every bit as useful rather to eliminate certain subject material from the student's curricula which is fast growing obsolete, thus providing the time to study new material without the necessity of extending the actual school day?

Such an extension of actual time spent in class—the difficulties of getting amiable student-

teacher cooperation notwithstanding—would increase education cost \$4 million for the 1967-69 biennium. According to reports 80 per cent of the funds would be provided by the state, leaving local school districts to provide \$800,000 of the funds.

The only part of the Board's proposal for which we can see a useful effect is the extension of the school-age years in the state to 13, thus providing 5-year-olds the opportunity to begin their formal schooling.

This is a program which has been needed for some time, one which will considerably improve the Texas public school program. Psychologists have long been saying that formal education of the human mind should begin before age six.

The Board is to be congratulated for showing a willingness to change basic concepts of public education—traditionally an area that is all too set in its ways. They are also to be congratulated for the 13-year proposal.

But we also hope they will consider streamlining courses rather than adding more than 200 hours of instruction to an already lengthy school year.

Peace Corps trainees undergo 'intense' study

By DIANE WEDDIGE

The mid-section of the Pioneer Hotel hasn't seen such rumbling since the hotel was built in 1926.

The rumbles are caused by sixty-three Peace Corps volunteers who are "intensely" occupying the third, fourth, fifth, and sixth floors of the hotel as they train for a Peace Corps community development and credit union program in Costa Rica.

The word is "intense," for in 11 weeks, the trainees devour 450 hours of language training, 48 hours of area studies, 174 hours of technical studies, 24 hours of American studies and world affairs, 23 hours of health and medical training, 16 hours of Peace Corps orientation, 12 hours of communism strategy and tactics and 74 hours of physical training.

FOR THE 63 trainees, the day begins at 7 a.m. with classes and ends at 9 p.m. with the completion of a two-hour lecture and discussion group.

At two meals a day, the trainees are required to speak Spanish. With the crash program in language instruction at all Peace Corps training centers, the

Peace Corps has become the nation's biggest consumer of language learning material.

Studying is not new to the trainees for all have attended college. Forty-three have bachelor degrees, six have law degrees, three have masters' degrees and nine have associate degrees. The majority of the other trainees are lacking only a few hours to receive degrees.

THIRTEEN MARRIED couples are participating in the Tech training program. They are allowed to work as a team in the country to which they are assigned, but must have no dependents under the age of 18.

Fifty-eight of the trainees are in their 20's, three are in their 30's and two are in their 50's. Most majored in the arts and sciences in college with history being the most frequent major.

The trainees are from 24 states and Puerto Rico. New York, California, Michigan and Indiana boast the largest number of trainees here, with 32 coming from these states.

UPON COMPLETION of the training program here, the trainees will complete a month of field training in Puerto Rico. After a week's home leave, the trainees which have been accepted for overseas duty will leave for Costa Rica on Dec. 27. They will return to the United States in December, 1968.

In Costa Rica, these Peace Corps members will be involved in community development and the establishment of credit unions.

"In Latin America there is no source of credit for the lower income classes. Therefore, they have no means of obtaining money to buy the materials they need to make improvements in their low income housing projects," Cheryl Cason, training program coordinator, said.

"The Peace Corps members," she said, "will encourage the establishment of credit unions which will be built from capital obtained from the lower

classes of Costa Ricans."

"THE CREDIT UNION will be self-generating and will enable the natives to borrow money at low interest rates," she said.

In the area of community development, the volunteers will have the difficult task of helping the residents recognize the problems and potential of the community.

THE VOLUNTEERS will live on the same level as citizens of their host country. They receive only a small living allowance which includes enough money for food, clothing, housing, travel and incidentals.

Priscilla Estrada, program coordinator for Costa Rica, said, "The men may build schools, community buildings, or roads. The women may teach cooking and sewing, lecture on nutrition, boil water or give simple first aid."

"They could be involved in any task which might help improve the community," she said.

Helping with the training program at Tech are Peace Corps returnees. John and Linda Proctor spent two years in the Peace Corps program in Costa Rica and are now assisting in the training of the new volunteers. Both are college graduates and John has a masters' degree in public health from the University of California in Berkeley.

Of their experiences in the Peace Corps, Proctor said, "One of the first things we found out was we didn't have all the solutions to the world's problems."

"BUT WHEN WE ARRIVED there," he added, "the people were apathetic, had no sense of community, and were unaware of the potential of their own resources. When we left, we genuinely felt that the community was better able to solve many of its own problems."

"The value of the Peace Corps," he said, "is not our 'superior knowledge and technology' but the way we relate and interact with the people of the country."

Raider mistakes prove fatal

By **GEORGE CHAFFEE**
Sports Editor

While introducing Raider Coach J T King at the weekly meeting of the Red Raider Club yesterday, emcee Bob Nash said, "Gentlemen of the jury, now begins the trial of Jake King."

Although King managed a slight smile, he wore a face of dejection while describing Saturday's game in which the Aggies of Texas A&M handed Tech its worst A&M defeat since the Raiders began SWC play.

"DESPITE WHAT you might have heard concerning A&M's 'behind the fence' tactics,"

King began, "I would like to point out that A&M played one of the cleanest games I've seen. I thought they had tremendous desire and played good football."

Dodgers 8 to 5 favorite

LOS ANGELES (AP)—The strong arms of Sandy Koufax, Don Drysdale and Claude Osteen make the Los Angeles Dodgers the 8-5 favorites over the hard-hitting Baltimore Orioles in the World Series, opening Wednesday at Dodger Stadium.

Orioles Manager Hank Bauer named Dave McNally, a 23-year-old left-hander with a 13-6 record, to open for the American League champions who have had almost two weeks to prepare for the big

test after clinching the AL pennant Sept. 22.

Given a similar choice of the pick of his staff, Manager Walter Alton of the Dodgers would have named Koufax, his 27-game winning ace. But he was forced to pitch Sandy against the Phillies Sunday when the Dodgers clinched National League pennant in the last game of the season Sunday and barely escaped a playoff.

Drysdale, 13-16, was knocked out of the box by the Phillies in the first game of

with their pass receiving" King said. "However, if they were to go out on the field today and attempt the same passes with any opposing players, I don't think they could begin to catch them."

King was speaking in reference to the pass for 41 yards Tommy Maxwell, sophomore Aggie from Houston, caught in front of the Raider bench. Maxwell reached out with one hand while falling out of bounds and pulled in the ball. The play set up the Farmer's third TD in the second quarter.

PASS RECEIVING was only one of four areas where King blamed the humiliating loss.

"We were hurt by penalties more than in past games," King said in reference to the 60 yards marched off against the Raiders Saturday night. The two other areas where the Raiders broke down were pass receiving and the poor showing by defense especially when A&M faced third and long yardage situations, King said.

MOST OF THE PRAISE

King dished out to the Raiders fell in the offense department. Quarterback John Scovell, Mike Leinert and Phil Tucker drew most of the accolades from the Raider mentor.

"I believe Tucker is fast becoming the best guard in the Southwest Conference," King said of the Tullia Tank.

Commenting on the 59-yard run in the first quarter by Mike Leinert, King said, "I don't think I've ever seen a better run this season."

THE PLAY which set up Tech's first TD came in the closing minutes of the first quarter. Leinert took the hand-off from Scovell and cut around right end. Three times during the run, one or more Aggies had their hands on the fleet back yet he ran to the A&M two-yard-line before being dragged down from behind.

We're not crying 'foul' but ...

By **GEORGE CHAFFEE**
Sports Editor

Defeat affects different people in different ways, but it has yet to make a sour man of J T King.

However, at the Red Raider Club meeting yesterday, King was obviously upset over the loss to Texas A&M and the reason behind King's dejection justified his attitude.

Texas Tech was penalized six times for a total of 60 yards in the contest and most of those penalties were illegal procedure calls. The official explained that the center was holding the ball in a straight-up position, thus causing the infraction.

Explaining Tech's point-of-view to the club members, King said, "I've been coaching that type of snap ever since I've been at Tech and we've never had a penalty called on it before. When we found out the trouble, we didn't tell Turner to hike the ball differently because you just don't change something like that in the middle of a game. It would cause fumbles and confusion."

To add to the Raider's woes, the official did not call the penalty every time although the centers snapped the ball the same way all night. As it was, Tech seemed to be threatening to score each time the infraction was called.

Probably the most important time was when the Raiders were on a march during the second half. Earlier, Tech had scored after an 80-yard drive and the scoreboard showed the Raiders on the short side of a 21-14 tally.

At the beginning of the fourth quarter, Gary Golden intercepted an Edd Hargett pass on Tech's 25-yard-line. In four plays Scovell moved the Raiders to A&M's 22.

On first-and-ten, Leinert hit right guard for four. However, the official tossed his flag and the Raiders moved back to A&M's 27. Following an incomplete pass, Leinert wormed his way to the 23. The official again tossed the flag. This time the Raiders backed up to the 39-yard-line. From there the drive sputtered to a halt.

Was Ol' Jake using the officials as a scapegoat? The answer is an emphatic "NO" to all those who heard him speak at the luncheon yesterday. Over and over again King explained that a team has to win regardless of the officials and that the official's word is official.

King laid the blame on three other areas, all of which had little to do with officials.

Possibly the greatest damage done by the penalties won't show up until next week at Amon Carter Stadium in Fort Worth. The incident is the type that lingers in the mind and leaves little room for mental preparation. Or—in other words—the offensive team could think all week about how that drive could have meant a TD and a 21-21 tie with a full quarter ahead, or they could put it out of their minds and concentrate on some angry Frogs in Fort Worth.

Soccer tryouts scheduled

The Southwest Conference Intramural Sports program has designated Austin and November 19-20 for the time and place of this year's soccer meet.

All Tech students are eligible for these games and anyone wishing to try out should contact Jim Pace at PO 2-3468 on any week-day after 6 p.m.

Tryouts are scheduled on Wednesday and Saturday at 4 p.m. There will be 11 men on Rice and Texas Tech.

the team and 22 will be going to Austin.

Tech did not participate last year because of failure in getting its entry in on time, but Pace said, "We are sure that we are going to have a good team this year and will be playing a good game."

There will be 10 to 12 teams playing, including LSU, Texas Wednesday and Saturday at 4 p.m. There will be 11 men on Rice and Texas Tech.
