### Dr. Newport Speaks On Force of Religion

by BEN McCARTY

"Religion is a major force in the world today," said Dr. John P. Newport at the first Convocation of Religious Emphasis Week last night in the Union Ballroom.

Newport, a professor of philosophy of religion at Southwestern Baptist Theological Seminary in Fort Worth, defined religion as any system of thought and action shared by a group which gives a cosmic frame of orientation.

After these matters, Newport brought out that there was not only a resurgence of religion in the West, but in all the great religions of the world.

HE CITED as examples the new growth of Hinduism which professes that there is one non-material supreme being who is the force behind all phenomena, of Buddhism which stresses man's inner attitude and of Islamism which teaches one supreme being who dominates everything.

"Through these," he says, "we can see that religion is on the march."

He pointed out that the materialistic concepts of religion do not last very long. He noted that the blood, sex, race and will of power philosophy of the Nazis didn't last over a hundred years.

"THE GREAT, vast historical forces are helping religion along its way, not acting as a substitute," says Newport.

The Christian religion is what we believe is the true religion, and we have committed ourselves to it; thus we shall study it as we go through this week, Newport said.

The speaker asserted his belief that there is part of the Christian religion in each of the other great religions, but ours is complete and comprehensive and goes further toward the work of God through the inspiration we get from the true Book, the Bible.

"OUR ULTIMATE problems will be solved by revelation and

faith," he asserted. Christian religion cannot completely be proven rationally, he stated, but through belief, obedience and rational probability we get our Christian religion.

"FAITH THAT is dynamic is the background of our science, freedom and culture," Newport asserted. "Religion is truly a ma-

Page 8, FORCE OF RELIGION

### Intramural Contests Will Be Renewed

Three more speech meets have been scheduled in the intramural speech contest starting March 17, continuing April 21, and May 5.

Persons interested may still enter by contacting Betsy Donovan, director of the meet, or Miss Annah Pendleton, speech professor.

Entrance fees are \$10 for each organization and 25 cents for each independent entry. Contestants may enter the following divisions: radio reading, Bible reading, poetry reading, declamation, dramatic interpretation, and original oratory.

At the end of first speech meet, Phi Gamma Delta leads with 179 points, followed by the Pre-Law Club with 158 and Sigma Kappa with 151.

### Low Income

WASHINGTON, March 3 (P)—Dr. Logan Wilson, president of the University of Texas, said diminished oil income means a state income or sales tax or both may be necessary if the university is to attain desired scholastic standards.

### BSO Reservations Close Wednesday

Board of Student Organization retreat reservations must be turned in to Dean James Allen, Ad. 167, by 5 p.m. tomorrow, Gayland Pool, BSO executive chairman has announced.

The group will leave Lubbock Friday for Clouderoft, N.M., and return Sunday. Tech President and Mrs. E. N. Jones will accompany the group.

Speakers include Dr. Jones, and Dean Holland from The University of Texas.

New BSO officers are Miss Pool, Bill Pittman, vice chairman; Gaynelle Williams, secretary; and Glenn Reynolds, treasurer.

### Secret Committee Makes Selections

by MARILYN GARDNER and CAROLYN JENKINS

Texas Tech will salute 32 outstanding students in the 1958 La Ventana.

Selections were made by an anonymous committee of students and faculty and were based on qualities of character, leadership and contributions to the college during 1957-58. Campus organizations submitted names of students from which final selections were made.

They are: Wick Alexander, Bob Byrd, Pat Cullum, Donnell Echols, Wayne Gibbens, John Gilbert, Eddie Henson and Dan Howard. Don Ledwig, Lloyd Leusing, Roger Loter, Jacky McAninch, Larry Merriman, Peggy Miller, Lee Boyd Montgomery and Gerald Myers.

Sharla Pepper, Neal Pipkin, Pat Rainer, Dean Rea, Carolyn Reynolds, Mary Alice Richardson, Dick Sewell and Don Smith.

Chuck Strehli, David Steinman, David Thompson, Jim Thompson, Pat Tyson, Beth van Maanen, Milton "Rabbit" Vaughn and C. J. Wren.

Pictures will be made of students named to "Tech Salutes" between 10:30 and 5:00 Tuesday for La Ventana.

### Lecturer on Asia To Speak Friday

The adventures of six young Americans, who built two jungle hospitals only five miles from Communist China's frontier, will be told by Dr. Thomas A. Dooley Friday at 7:30 p.m. in the Municipal Auditorium.

Dr. Dooley, who was named by the U.S. Junior Chamber of Commerce as one of the nation's 10 top young men in 1956, holds Vietnam's highest decoration and the U.S. Navy's Legion of Merit. He has just returned from the Kingdom of Laos where his team has been working with Indo-Chinese refugees.

Funds from sales of Dooley's books and lectures are being used to carry on his work in Laos under auspices of the International Rescue Committee, a private refugee-relief organization.

Lecture tickets, at \$1 each, are available at the auditorium box office.

### Pair Killed

AMARILLO, March 3 (P)—A Californian and his estranged wife were shot and killed yesterday at the home of an Amarillo loan company owner who was severely pistol-whipped.

WICK ALEXANDER, senior pre-dental major from Amarillo, Texas Intercollegiate Student Assn., president; Student Assn. vice president; Phi Delta Theta, vice president and chaplain; Mr. Texas Tech; Tech Union Program Council; Spring Festival committee chairman.

BYRD, BOBBY, junior agronomy major from Claude. Doak Hall Dorm Assn.; Student Assn. representative; BSO delegate; Alpha Zeta, censor; Agronomy Club, vice president; Aggie Club, second vice president.

CULLUM, PAT, senior English major from Wickett. La Ventana editor; Alpha Chi Omega, president and outstanding member.

ECHOLS, DONNELL, junior agriculture economics major from Lamesa. Phi Gamma Delta, president; Inter-Fraternity Council, secretary; Rodeo Assn., director; Student Assn.; Rodeo Council, Spring Festival.

GIBBENS, WAYNE, junior pre-law major from Breckenridge, West Hall Dorm Assn.; BSO; Student Council; Kappa Sigma; Saddle Tramps, president; 1957 Varsity Show producer.

GILBERT, JOHN, junior music education major from Amarillo. Phi Mu Alpha; Tech choir; 1957 Varsity Show director and conductor of orchestra; music scholarship.

HENSON, EDDIE, senior mechanical engineering major from Seagraves. Student Assn.; Inter-Fraternity Council, president; Kappa Sigma, president.

HOWARD, DAN, junior accounting major from Littlefield.

## Irradiation and Nutrition Studied by Tech Graduate

Jerry Rivers, graduate student in food and nutrition, is using white rats to investigate the degree of irradiation damage to animals maintained on an adequate diet.

Effect of feeding an adequate diet on recovery following irradiation exposure is also a part of the study.

Miss Rivers hopes her findings will contribute normal nutrition as related to resistance to irradiation damage and to recovery following irradiation damage.

Results of this study will be of interest to today's world, Miss Rivers believes. Not only is there the possibility that it will show a dissimilarity in the quantitative protein intake and resistance to

irradiation, but also the relationship between dietary protein intake and postroentgen recovery, she says.

Determination of such a relationship should also be beneficial to the science of radio-therapy, atomic research personnel and the general public in case of mass irradiation.

No special precautions are necessary in conducting this study, Miss Rivers says, since the irradiation doses are given directly to the rats. Experimenters maintain a station outside a closed door and observe through a window.

Miss Rivers has planned follow-up studies on the effects of irradiation upon reproduction, but not as a part of her thesis work.

**SPRING STYLES** for mothers and daughters in the campus whirl were modeled by members of Tech's Newcomers' Club at their meeting last night. Mrs. John Guilds and daughters Reba, 4, and Carolee 7, wear mother-daughter summer dresses of contrasting stripes. Clothes were furnished by Coe's and the show was in the home of Mrs. John R. Bradford. Six other faculty wives and their daughters modeled for the club and Mrs. John E. Ranne was in charge of arrangements. (Tech Photo)

## Ladies' Journal Exhibit on Display

A new collection of 28 illustrations from the Ladies' Home Journal are on exhibit in the Tech Union.

The collection of paintings, showing some of the magazines most famous illustrations by contemporary American artists, is open to the public through March 31. The collection can be viewed in the lobby of the Union on any day.

This exhibit, the fourth of its kind to be presented by the magazine, is touring the United States and Canada in response to many requests from universities, art schools, art groups and art institutes.

The paintings in each collection were selected as representative of good examples of the art of illustration. The works of thirteen well-known illustrators are featured in the current collection.

They are Harry Anderson, Walter Biggs, Joe Bowler, Paul Burns, Pruett Carter, Joe de Mers, Robert G. Harris, Morgan Kane, Al Parker, Alex Ross, Haddon Sundblom, Jon Whitcomb and Coby Whitmore.

**VARSITY SHOW REPRESENTATIVE**  
Varsity High School's group members "Oklahoma." "Guys and Dolls" represented Carolyn Porter and Ernest sent April 17-18 in the photo.

## JOB FACTS FROM DU PONT

## LIBERAL EMPLOYEE BENEFIT PROGRAM AT DU PONT INCLUDES INSURANCE, SAVINGS AND STOCK PLANS

### WHAT'S YOUR LINE? DU PONT NEEDS ALL KINDS OF ENGINEERS

DuPont has always needed chemists and chemical engineers, and still does. But today, there's critical need for engineers in almost every other field—civil, mechanical, electrical, instrumental and industrial engineering, to name a few.

Expansion is the major reason. In 1957, for example, sales at DuPont were nearly two billion dollars. Four new plants were being built. New research programs were being launched. New products were moving into the production and marketing stages. Engineers and scientists of all kinds work in 75 DuPont plants and 98 laboratories in 26 states. All of this tends to broaden opportunities for the young scientist and engineer at DuPont.

If you're interested in finding full scope for your ability, and this includes a great many special fields, DuPont offers you plenty of opportunity to move ahead.

### SEND FOR INFORMATION BOOKLET ON JOB OPPORTUNITIES AT DU PONT

Booklets on jobs at DuPont are yours for the asking. Subjects covered include: mechanical, civil, metallurgical, chemical, electrical, instrumentation and industrial engineers; atomic energy, technical sales, business administration, research and development. Name the subject that interests you in a letter to DuPont, 2494-F Nemours Building, Wilmington 98, Del.

### PERSONALIZED TRAINING

by H. J. Hollberg  
DuPont Representative

When you join DuPont as a scientist or engineer, you're given an actual project assignment almost at once and begin to learn your job by doing it. That's the essence of our training philosophy at DuPont.

Our objective is to give you responsibility at the outset and qualify you quickly for more, because the more we grow, the more we need trained leaders.

Although there is no one training program at DuPont (each of our many departments runs its own), all have several basic features in common. All are personalized—tailored to the new man's background and interests. All involve close supervision on an informal, day-to-day basis. And all permit periodic evaluation of the new man.

This flexible system helps the new man to move ahead according to his abilities. He gets to know DuPont and his job quickly. He gets a head-start on future responsibility.

You probably have questions about this program and how you'd fit into it. I'll be glad to try to answer them when I visit your campus. Why not sign up for a DuPont interview at your placement office now?

### Means More Security, Greater Real Income To Young Graduates

DuPont believes that the employee builds his own job security by the way he does his work, by his contributions to the progress of the Company and by his readiness to accept responsibility.

But DuPont meets the employee more than halfway with a program of benefits designed to help him as he advances.

Your employee benefits go to work the day you join the Company. They grow and build equity for you as the years go by. Vacations, life insurance, group hospital and surgical coverage, accident and health insurance, pension and bonus plans are all part of the program.

Let's look at a special example, the Thrift Plan. You become eligible for it after one year with the Company. For each dollar you invest in U. S. Savings Bonds, the Company contributes twenty-five cents toward the purchase of DuPont common stock in your name. Roughly 65 per cent of the Company's 90,000 employees are now participating in the plan.

When you're deciding on a career, security is only one consideration. But it's an important one to you and your family. At DuPont, security is a bright part of the future awaiting the college graduate.

\* \* \*

More than 700 of the some 1100 degree-granting colleges and universities in the U. S. are represented at DuPont. Of these 700, more than half are the smaller liberal arts colleges.

## Pre-med Society Hears Dr. Dunn

Dr. S. G. Dunn, neural surgeon from Methodist Hospital, will be the guest speaker of Alpha Epsilon Delta, honorary pre-med fraternity, Friday in Chemistry 2.

Anyone interested in pledging Alpha Epsilon Delta should plan to attend the meeting. They should also sign the paper on the bulletin board on the second floor of the Science building or on the second floor of the Chemistry building, or contact an officer of Alpha Epsilon Delta.

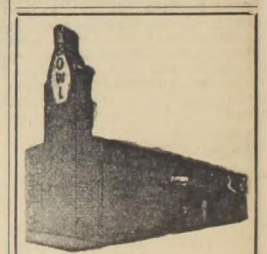

Officers are Philip Duvall, president; Gerald Woolam, vice president; Karen Williams, secretary; Louis Barkley, treasurer; Wayne Culp, historian; Bruce Faust, reporter; and Dr. J. O. Sealey, advisor.

Pledge requirements of Alpha Epsilon Delta are that students be majoring in pre-med or pre-dentistry, have a 2 over-all grade average and have a 2 in all sciences.

## Tau Beta Sigma Initiates Pledges

Tau Beta Sigma, honorary band sorority, initiated eight pledges last week.

New members include Betty Ayres, Patsy Blevins, Jill Flynn, Jill Jost, Jannie Newman, Gracie Russell, Carol Squires and Johnnie Wade.

## Tech Union Pl Get-Together

Hospitality Hour will be junior ballroom of the Tech today from 3:30 to 5 p.m.

All students and teachers invited. Purpose of the get-together is to let students and teachers come better acquainted.

There is no admission and refreshments will be served.

## Aggie Officers

Aggie Economics Club officers and appointed a membership committee Monday night.

Bob Eddleman was elected president and Jack Lot, vice president. Secretary is Charles Fench and treasurer, Travis Fench.

**Fench Consul Speaks In Union Tomorrow**

Jacques Fauchet, French consul from Houston, will speak at a joint meeting of the International Relations Club and Toastmasters at noon tomorrow in Tech Union, Room A.

His speech will be "France North Africa" and is a part of the International Relations world affairs series.

## Union Events

- Tuesday — Varsity Sing, 8:30 p.m.
- Bar, 10 a.m.
- Hospitality Hour, Ballroom, 3:30 to 5 p.m.
- Basketball game, Tech vs. State, 7 p.m.
- Thursday — Music Listening, 2 p.m.
- Movie, "Man Called Peter", room, 7 p.m.
- Friday — Western Dance, Room, 8:30 p.m.
- Sunday — Movie, Ballroom, 2 p.m. "The Tender Trap"
- Raiders Reunions, Snack Bar, 4 p.m.
- Monday — Movie, "The Tender Trap", Ballroom 4 and 5 p.m.

**VARSITY SHOW REPRESENTATIVES** are exchanging ideas with Monterey High School's group which is producing Rogers and Hammersteins "Oklahoma." Watching a rehearsal at Monterey are "Guys and Dolls" representatives Mack Robertson, Beverly Austin, Carolyn Porter and Ernestine Green. The Varsity Show will be presented April 17-18 in the Lubbock Municipal Auditorium. (Staff Photo).

### Festival Group Arranges Plans For Bicycle Race

Bicycle racing for students and tricycle racing for faculty members will be part of Texas Tech's Spring Festival.

Plans are being made for a bicycle race around the Circle Saturday afternoon of the Festival. Anyone is eligible to enter if they have a bicycle.

Suggestions have been made by the committee planning this event that students make up small teams and start training. Winner of the race will be presented a trophy at the Festival Ball.

Further information concerning the race is available at the Student Council office.

Alpha Phi Omega, Saddle Tramps and Circle K are sponsoring the bicycle race.

Plans are also being made for a campus-wide barbecue sponsored by the Spring Festival committee, the Senior Carnival, the Frantic Fun Fair sponsored by the Tech Union, Varsity Show, Engineering and Home Economic Shows, Wilson Lectures, an all-school convocation, a western dance sponsored by Panhellenic and Inter-Fraternity Council, and a semi-formal dance sponsored by the freshman, sophomore and junior classes.

The gala Spring Festival will be April 16-19 and is to be the largest student sponsored event in Tech's history.

### Dames Crown Pipkin King of Ball

NEAL PIPKIN

Neal Pipkin, engineering major from Matador, was selected King of the Dames Ball Saturday night.

Pipkin, who is president of Sigma Alpha Epsilon fraternity and has been named to Who's Who this year, was chosen from a court of seven boys.

The nominees were escorted by two members of Mortar Board, sponsor of the dance. They were presented on the stage at Fair Park Coliseum, and Pipkin was crowned by Carolyn Reynolds, Mortar Board president. Catherine Nelson and Donna Abraham, Neal's escorts, kissed His Majesty and gave him an engraved pocket knife.

Although this was the first affair of this type sponsored by Mortar Board, they plan to make it an annual affair. Proceeds will provide scholarships.

# Not by Bread Alone

TECHSANS, as students on any other college campus today, spend 99 per cent of the semester at the routine of classes, meals, sleeping and the rest of the time at some diversion or another. It is a crowded life and one not necessarily singular, but it does omit, in the large degree, one element — religion, or whatever one might choose to call it.

With most students there is the weekly observance of some form of worship on Sunday. However, in the main, we don't take time out for any serious consideration of the things toward the more sublime rather than of the molecule and the test tube.

This week, until Thursday, there is on campus for Religious Emphasis a team of nine speakers on this subject of religion. They represent a fair cross section of the different religious elements, and all were selected because of their special knowledge in the field.

The topic is "The Logic of Belief." A more appropriate one couldn't have been chosen. With such hallowed teach-

ings as the Creation and Revelation being bared before the light of scientific analysis, it is well to delve into them from the standpoint of their origination for a change.

It is but fair due for the "other side" — and other side is certainly due its fair. We blithely sail through studies on evolution, for instance, with scarce a second thought. The scientific evidence is there before us. It is, by scientific law, logical.

But this would seem to contradict what we were taught in Sunday School. The point is, can we so lightly discount such teachings? The history of man has shown that, if we may borrow a quotation much used but still of the essence, man does not live by bread alone.

This means, as it is usually interpreted, that science will not fulfill all that man needs to get along happily. Science is only half of it.

It might be not only helpful, but refreshing to take time out for the lectures.

## Mixed Emotions

Tonight, tonight!  
Oh so late at night.  
No sleep, no rest,  
my troubled breast doth shake,  
reeling, soft murmurings my  
lips do make.

Oh master I cry, Oh for sleep;  
don't question why.  
Foolish people, I laugh how  
dumb.

Not bitter, never, nor either a  
quitter,  
but I can't help running, leap-  
ing,

spinning and falling;  
laughing, crying, breathing and  
calling—

wine, women, hope and despair!  
Mixed emotions, a hope a care,  
Love or lust? Wants or needs?  
A cold, black sky and a moon  
that bleeds.

Drunk from my thoughts — an  
aching brain  
oh cold snow and drizzling rain,  
A broken heart and so alone;  
social injustice,  
a roaring drone.

How pain doth cut. Will it ever  
go away?  
Maybe tomorrow, or some  
other day.

Yes! maybe tomorrow, or some  
other day.

by Loman Jones

## BOOK REVIEW

# 'On the Beach' Is Food for Thought

by ANNETTE AUSTIN and NITA HEDLESTON

Shute, Nevil; ON THE BEACH; Morrow Co., New York; \$3.95.

The world will end in September. There is no doubt in your mind — scientists have set a time limit on the life of the world — less than a year to go.

WHAT WOULD YOU want to do with your life before September? Have that one last fling . . . realize a long-cherished dream . . . or would you simply live each day as it comes, conscious of passing time, but working, raising a family, planting gardens and living much the same as you always have?

Nevil Shute's ON THE BEACH tells the lives of a group of people — one American, four Australians — who

are forced to make this decision when a global war dooms the people of the world.

SHUTE, A NATIVE of England now a resident of Australia, does a powerful job of arousing the reader to a fact which could well come true . . . the destruction of life by radiation.

Practically all of the real action of the story takes place in Australia, but actually the whole world is involved in the clear, simply told plot.

With certain death staring them in the face, the characters in ON THE BEACH seem to take a new look at the real values and pleasures in life. Although nothing seems different around them, the simple things take on real and significant meaning.

THE READER IS almost thrust into the situation himself, right at the first of the book. Shute's ability to make the reader "feel" the spell of oncoming doom, with calm resignation to that fact, is the real effectiveness of the book, an effectiveness which lingers on even after he puts the book down.

This book has the emotional depth to arouse readers almost too realistically to the actual dangers which could be encountered in this generation as a result of our atomic and nuclear powers. But it is not the dismal, no-hope type of plot with which many of the science-fiction books deal.

SHUTE HAS GIVEN to the world a subtle warning and has also strengthened a faith in the human race. The calm tone which prevails throughout prevents any thought of panic entering into the scene.

ON THE BEACH could well serve as an example all over the world, but perhaps even more important, it might teach new values in the life we take for granted.

## LITTLE MAN ON CAMPUS Biber

"IMAGINE! A PHI BETA KAPPA FINDING ME INTERESTING! WHY, I BARELY HAVE A 'C' AVERAGE!"

...wet wash...

—wetherington

One day and night, so very long ago it wearies the mind to ponder it (and so we won't) there lived at the bottom of a fresh-water spring, a protoplasmic glob called Freddie. Freddie was one-celled. There were no others like him; only bits of green slime covering the stream-bed and the rocks. Freddie had originally been a part of the slime, but a slight current had broken him loose from the rest so that he was free to move on his own.

Freddie spent his time oozing from place to place and from rock to rock and from fissure. There was nothing alive anywhere except Freddie and the slime, so he had nothing else to do.

One particularly droll day he decided to change it all. He went to his mother slime (it may have been his brother or sister — slime is usually sexless), and told her he was going to leave in search of adventure. She begged him not to go. She told him of the dangers of life outside and how swift waters (which run deep, by the way,) could easily wash him into the Great Ocean. She reminded him of the safe comforts of the stream bed where they lived.

BUT FREDDIE WAS adamant (insistent). He told her he could no longer be satisfied with the mundane (common) life. He said he felt he was grown up now and could manage on his own. After all, he had by now developed twelve pseudopods, (like feet, but not exactly.) So his "mother" packed him a lunch of protein molecules and amino-acids (a compound containing ammonia, sort of,) and, amid weeping and

wailing and gnashing of nuclei, wished him a happy life elsewhere.

SO FREDDIE protoplasm tore himself loose from his rock and floated freely in the water. Sure enough, the current caught him and swept him away. Down the stream he went, further and further from home — closer and closer to the Great Ocean.

And finally he was there; out into the Great Ocean he went, down and down into its fathoms, (a fathom is six feet), until he reached the bottom.

IT WAS DARK and cold here and Freddie was scared at first. He saw hundreds of weird shapes he had never seen before, but none were alive. In places the ocean floor gave forth hot bubbles as if it were boiling. He clung to a smooth rock for safety, and the rock suddenly became very hot and broke apart. He jumped (figuratively speaking) off the rock and scurried (sic) to another. For days he was miserable. He missed the ooze and slime of his warm home. He missed the sunshine.

THEN ONE DAY Freddie did something that revolutionized the reproductive industry and insured the interest of biologists cons later. He became ultra-specialized and decided he'd make some more protoplasm to keep his misery company. (Misery, you see, loves company.) And soon he had friends galore. They were neither brothers nor sisters — fathers nor mothers — but just fellow-Freddies.

This was in the very beginning, so many years ago it hurts. And from them grew the glory of generations to come — you, dear reader, and me. All because of Freddie's great discovery and his great secret:

Freddie was a schizophrenic. (He could do the split.)

wren

## For What It's Worth

Our respect for at least a segment of SMU was restored considerably by a comment recently appearing in the SMU Campus, student newspaper there. We have taken the liberty of borrowing it:

"The game on the floor of the Coliseum Saturday night (Feb. 22) was great, but there was another kind of game in the stands, and it was anything but great.

"AT WORST, IT WAS the poorest display of sportsmanship shown here since the Notre Dame football game. At best it was an extreme case of mass thoughtlessness.

"The booing and mass cheers against the Texas Tech team and students were only the more emphasized by the good showing and friendly attitude which was displayed by the 1,300 visiting fans from Lubbock.

THESE VISITORS had one of the best attitudes I have seen. They yelled for their team continually, but they were quiet during all free throws; their spirit was bubbling over, but they did not boo the officials; they came en masse, and with a tremendous urge to win, but they acted like considerate people.

"Had they won they would have been good winners. As it was they were good losers.

"DON'T THINK THAT this is

just because they were visitors. In the earlier game in Lubbock they were perfect hosts. They clapped for the SMU starting line-up, they did not go overboard on booing the officials (although the game was much more intense and feelings were even more pent up here than here.) Any upstarts-manlike tendency on the part of the Tech students or the other spectators was immediately stopped by the cheerleaders, who simply raised their megaphones.

"THE SITUATION here at SMU has been getting progressively worse, but it hit a new low Saturday when the SMU students as a

## Mack Resigns FCC Post Under Fire; Threatened with Impeachment

WASHINGTON, March 3 (AP)—Richard A. Mack resigned from the Federal Communications Commission tonight under pounding congressional pressure including a threat of impeachment.

The White House released a letter from Mack to President Eisenhower saying he believed his usefulness on the commission had been brought into question by a House probe, Eisenhower accepted the resignation immediately.

Earlier, President G. T. Baker of National Air Lines pictured Mack as being crucified—as the tall guy for a conspiracy to which Baker linked several senators. The senators will have a chance to testify later in their own defense if they wish.

Mack's ouster was demanded by most members of the House subcommittee on legislation for accepting loans and other financial favors from a Miami lawyer who once pushed the successful application of a National Air Lines subsidiary for a Miami TV license.

chairman, Rep. Harris D-Ark., announced he would introduce a resolution calling for Mack's impeachment.

"Perhaps," Mack wrote the President, "I should have been more careful in the handling of my personal affairs, but I have not violated my oath of office."

## New Amarillo Club Organizes Thursday

The new Amarillo Club will have its organizational luncheon in the Tech Union Thursday noon.

Tech students from Amarillo interested in the organization of this club should sign up for the luncheon at the Union newsstand. Price is \$1 per person.

# Sticklers!

WHAT IS THE MAN WHO KEEPS THE CIGARETTE MACHINES FILLED WITH LUCKIES?  
 (SEE PARAGRAPH AT RIGHT)

THE REALLY GREAT MEN of history are forgotten men. Who did throw the overalls in Mrs. Murphy's chowder? Is Kilroy still here? Does anyone remember Dear John's last name? No, friends, they're all (Sob!) forgotten. So right now, let's pay homage to the greatest of them all—the man who keeps the cigarette machine filled with Luckies! Let's honor the guy who supplies the one cigarette that's packed end to end with fine, light, good-tasting tobacco, toasted to taste even better. Let's salute (Fanfare!) the *Vender Tender!* Touching, isn't it?

# Raiders Host Owls In Finale

## GAME AT A GLANCE

Who: Tech vs. Rice  
 When: 8 p.m.  
 Where: Lubbock Municipal Coliseum  
 Probable Starting Line-ups

Tech	Pos.	Rice
Myers	G	Thomas
Lynch	G	Ball
Wolfe	F	Griffin
Key	F	Robitaille
Hill	C	Tucker

By BILL DEAN

Texas Tech's Red Raiders, still nursing a very faint hope to gain a tie for the Southwest Conference championship, close out their regular season here tonight against the equally hopeful Rice Owls.

The game will be preceded at 6 p.m. by a match between the Tech Picadors and the Ince Oilers.

**THE RAIDERS**, after three straight losses, are now in a four-way tie for second place with Rice, Texas A&M, and TCU. All hold 7-6 records and trail SMU and Arkansas, 8-5, by one full game.

Tonight Arkansas hosts Texas at Fayetteville, SMU meets Baylor at Waco and TCU battles A&M at College Station.

The situation, already quite complex, could become considerably more tangled after tonight. One thing is certain — the ties for third place will all be broken as the four teams involved all see action against one another.

**IT WOULD** take a double loss — by SMU and Arkansas — to give anyone else a shot at the crown. And — it could end with just one battle-scarred figure at the top of the heap.

Rice will be seeking revenge

for a three-point loss inflicted by Tech in Houston that opened this dizzy campaign back in January.

Since that time both ball clubs have been great in streaks and miserable in others. At present, both have been inclined to fall under the latter classification.

The Owls have lost their last two to TCU and Texas while the Raiders have fallen three times in a row to SMU, A&M and TCU.

**SATURDAY** night the Raiders

fell far behind to the Horned Frogs at the beginning and never could quite catch up, although they made a gallant effort in the second half, actually pulling ahead by one point for a few seconds.

But H. E. Kirchner's 25 points was too much for the slumping Techs.

In this season finale the Owls will start with two Lubbock boys, Dale Ball (6-0) and Gerry Thomas (6-2) at guards. Both played for

Lubbock High School under Dave Cook several years back.

**ANOTHER AREA** lad, Gary Griffin (6-5) from Pampa and Tom Robitaille (6-9) will start at forwards. Robitaille is the leading scorer for the Owls with 141 field goals and 51 free throws for 333 points in season play and 90 field goals and 28 free throws for 208 points in conference action.

At center will be highly-touted Temple Tucker (6-10). Tucker has 121 field goals and 72 free throws for 314 points this year to be Rice's second leading scorer.

**FOR THE RED** Raiders in their final debut of a highly successful, yet a bit depressing late, conference campaign Polk Robinson will start Gerald Myers (5-10) and Charley Lynch (6-2) at guards, Chuck Key (6-3) and Wade Wolfe (6-5) at forwards and Leon "Pold" Hill (6-6) at center.

Hill is the leading Raider scorer with 151 field goals and 63 free throws for 365 points for the season. He ranks third in the conference in this division.

Myers is right behind with 116 field goals and 98 free throws for 330 points.

This will also be the final game for Raider Bobby Wilson, the only senior on the team.

A crowd of around 8,000 is expected.

## Opportunities for Growth

...IN A GROWING COMPANY

**GEORGE HEDRICK**, Texas Tech '48, is a distribution field engineer in Texas Electric Service Company's Fort Worth Division.

Capable young men and women have extra opportunity in a growing company serving a growing area. During the past ten years, Texas Electric Service Company has increased its power generating capability to more than seven times that of 1947, has constructed more than 1100 miles of high voltage transmission lines and 2800 miles of distribution lines, along with related substation and other facilities, more than doubled the number of employees, and serves more than twice as many customers.

And the company is continuing to build its organization as it plans and constructs new electric transmission and distribution facilities to serve our rapidly developing area. New career opportunities are opening for qualified men and women.

Mr. George Hedrick and other representatives of Texas Electric Service Company will interview graduates:

THURSDAY, MARCH 6

ENGINEERING — Electrical, Mechanical and Civil

An appointment can be arranged through your Placement Office.

How do you like your eggs?  
Scrambled!

Well, if you're a Southwest Conference basketball fan you better take your basketball the same way you take eggs.

If there ever was a scrambled messed-up situation that compares with this year's Southwest Conference basketball campaign I wish someone would let me know about it.

**HERE WE ARE** — the last night of action — and there is a possibility of having a four-way tie for the championship. And of all things, the leaders have lost five games each.

The most unfortunate thing about it is that Texas Tech could be right on top and unchallenged right now. But I guess that could be said for all of the six teams still in contention.

The Raiders must have lost more than just one game at Dallas when they lost to the Ponies. Apparently they lost their touch for coming back strong. If they had come back and played like they are capable of Polk Robison would be on top of the basketball world in the SWC.

**BUT WHEN** a team reaches a point of eruption and doesn't explode it's hard to come back. It's not through any lack of effort. It's like an old man running a race with a younger one. At a certain point he gives it all he's got and if it isn't enough he quickly falls behind and loses ground.

I'm not trying to picture the Red Raiders as a bunch of old men — just making a comparison.

Tech has always given the maximum this year. Sometimes they played poor ball and lost. Other times they were sharp and won. But against SMU they were hell-bent on winning — and lost.

**SINCE THEN** the wear and tear and extreme pressure has been apparent in the face of every boy on the squad. They haven't folded — just faded a little.

But personally I feel as though this has been the best year basketball has ever enjoyed at Raiderland. The entire South Plains is "fired up" over the team and the sport.

**BIG THINGS ARE** on the way for basketball here. I wouldn't be surprised if, within a few years, we have to build another Coliseum to hold basketball crowds.

And the credit for building this dream-come-true sits behind a desk in the athletic offices reserved for Polk Robison.

Polk Robison has done a great job with these kids and in turn they have done a great job for themselves, the school, the community and the entire area.

This is, in reality, Polk Robison's dream come true. His undying efforts through the past 15 years to the school and the sport he loves are at last being appreciated.

This might not be his finest

team but I'm quite sure he will never forget it. How could he forget the thrills that this team has given him — their undefeated non-conference record — their thrilling overtime win over SMU to win the first game in the SWC Tournament — winning their first conference game over Rice at Houston — upsetting Arkansas by 21 points at Lubbock.

All those thrilling wins and losses will not soon be forgotten.

**YES SIR**, this has been a good basketball year. And tonight when the boys and their fine coaches take the court for the last time I for one will give thanks that we have such a man as Polk Robison to guide our basketball fortunes.

How about you?

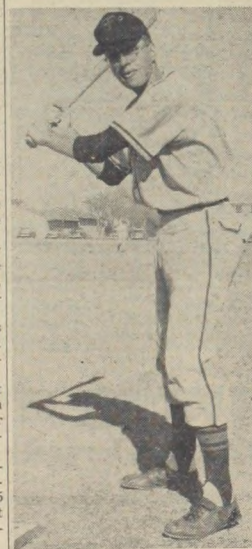

DAVE ALLEN  
Raider First Sacker

## Bad Weather Hampers Baseball Drills; Raiders Meet Hardin-Simmons March 14

In spite of the bad weather, Texas Tech's baseball team is working desperately to get ready for their first game with Hardin Simmons, March 14, here in Lubbock.

"We've had only four or five good days for workouts," Coach Beattie Feathers said, "but I don't think Hardin Simmons has had any more good days than we have."

The Raiders have had two practice games. Rob Hill has been the outstanding hitter and pitchers Billy Tombs and Houston Powell have shown good form. Both should be ready for Hardin Simmons.

ROB HILL

**THE BATTLES** for starting positions have begun with Bill Dean and Dave Allen waging a hot fight for first base and Dave Bourland and Hill contesting for second.

"We have plenty of material for the infield, but not much reserve strength for the pitching staff and the outfield," Feathers said.

**BOYS COMPETING** for the various positions are: Cullen Hunt, Earl Parker, Jim Schiermre and Paul Cato, catchers; Allen, Bruce Boyd, Dean, and Ken Warren, first base.

Wick Alexander, Powell, Charles Flanagan, Tombs, Lawrence Barbour and Bruce Boyd, pitchers; Burland and Hill, second base; Dave Potter, Gary Wetter and Ed Robertson, third base.

Jackie Miller and Wetter, short stop; Dean and Sonny Donelson, right field; Gehrig Garrison and Warren, center field; and Norm Huggins and Dewey Bryant, left field.

### GOP FUND

AUSTIN, Tex., March 3 (AP)—The Texas Republican Executive Committee today gave National Committeeman Jack Porter a unanimous vote of confidence and decided to keep a \$100,000 political fund he raised in Texas. The National GOP Committee refused the money.

## Women's Intramurals Begin

Women's intramural basketball began last night in the girls' gym. Of the sixteen teams entered, four are seeded. They are Kappa Alpha Theta, first; Weeks Hall, second; Knapp Hall, third; Drane Hall, fourth.

Play is scheduled for two weeks in the single elimination tournament. First round consolation will begin Thursday at 6 p.m.

The schedule for this week's games:

- Monday 5 p.m. Kappa Alpha Theta vs. Delta Gamma.
- Monday 6 p.m. Sigma Kappa vs. Delta Delta Delta.
- Tuesday 5 p.m. Kappa Alpha Gamma vs. Nurses.

Tuesday 6 p.m. Pi Beta Phi vs. Weeks.

Tuesday 7 p.m. Knapp vs. BSU. Wednesday 5 p.m. Gamma Phi Beta vs. Alpha Chi Omega.

Wednesday 6 p.m. Casa Linda vs. Zeta Tau Alpha.

Thursday 5 p.m. Alpha Phi vs. Drane.

### EMERGENCY LOANS

WASHINGTON, March 3 (AP)—The Agriculture Department today designated Chambers and Comanche counties, Tex., as areas where its Farmers Home Administration may make emergency loans to farmers.

 Methodist Student Center—Chaplain Hermanson  
 9-10 a.m. PERSONAL CONFERENCES  
 The Rev. Miller  
 Dr. Bates  
 The Rev. Zacharias  
 Dr. Howard  
 Dr. Newport  
 2-3 p.m. Mrs. Carr  
 Chaplain Hermanson  
 4 p.m. SEMINARS  
 "The Home of Your Dreams"—Mrs. Bass, Union, Room A  
 Presiding—Deniese Magness  
 "Principles vs. Prejudice"—The Rev. Zacharias, Workroom, Union.  
 Presiding—Neil Pipkin  
 5 p.m. "On Being Christ's Personal Witness Today"—Dr. Howard, Union, Room A.  
 Presiding—George Smoot  
 "Christ Must Reign in Every Vocation"—The Rev. Bratton, Workroom, Union.  
 Presiding—Layton Raun  
 5:10 p.m. VESPERS

# ... Force of Religion

Dr. W. F. Howard, Chaplain First Lieutenant Sheldon E. Hermanson, Rev. David L. Zacharias, and The Rev. Mr. Morris Bratton.

Mr. Miller is the present Rector of the St. Christopher's Episcopal Church. He received his B.S. degree from Episcopal Seminary of the Southwest in Austin.

Dr. Bates is the present Dean of Lubbock Christian College. He has served in the Army as a chaplain. Dr. Bates received his Ph.D. from the University of Southern California.

Dr. Howard has been the Director of Student Work, Baptist General Convention of Texas since 1945. He is a former English professor at Baylor University.

Chaplain Hermanson is currently Chaplain at Craig Air Force Base in Selma, Ala. He took part in the Platoon Leaders Course program of the U.S. Marine Corps.

Rev. Zacharias is minister of the Westminister Presbyterian Church. He received his A.B. at the University of Pittsburgh, and at the Western Theological Seminary.

Mr. Bratton has B.S. in Organic Chemistry from Southwestern University and a B.D. from the Yale Divinity School. He has served as pastor of St. Luke's Methodist Church in San Angelo. He is presently at The University of Texas.

Christian Student Center—Dr. Howard  
 Presbyterian Student Center—The Rev. Miller  
 6:30 p.m. SORORITY AND FRATERNITY MEETINGS  
 (Meetings will be held in the individual lodges)  
 Delta Delta Delta—Dr. Howard  
 Pi Beta Phi—The Rev. Zacharias  
 Sigma Kappa—The Rev. Miller  
 Alpha Phi—Chaplain Hermanson  
 Zeta Tau Alpha—Dr. Bates  
 8 p.m. EVENING SERVICE—Union Ballroom

Presiding—Frank Wright  
 Invocation—Dr. I. L. Little  
 Special Music—Tech Glee Club  
 Address "Living in Two Worlds"—Dr. Newport  
 Benediction—Col. Carvey  
 10 p.m. BULL SESSIONS  
 Drane and Sneed in Drane—The Rev. Zacharias  
 Drane and West in Knapp—The Rev. Bratton  
 Horn and Doak in Horn—Dr. Howard  
 Bladsøe, Gordon and Weeks in Weeks—Chaplain Hermanson

### ... For What

whole began yelling "poor Raiders" near the end of the game.

"I don't mind booing, as an expression of displeasure . . . but when this attitude carries over to yelling during Tech free throws, and to singing to the guest stands, then it becomes meanness, thoughtlessness, and the lowest form of human relations.

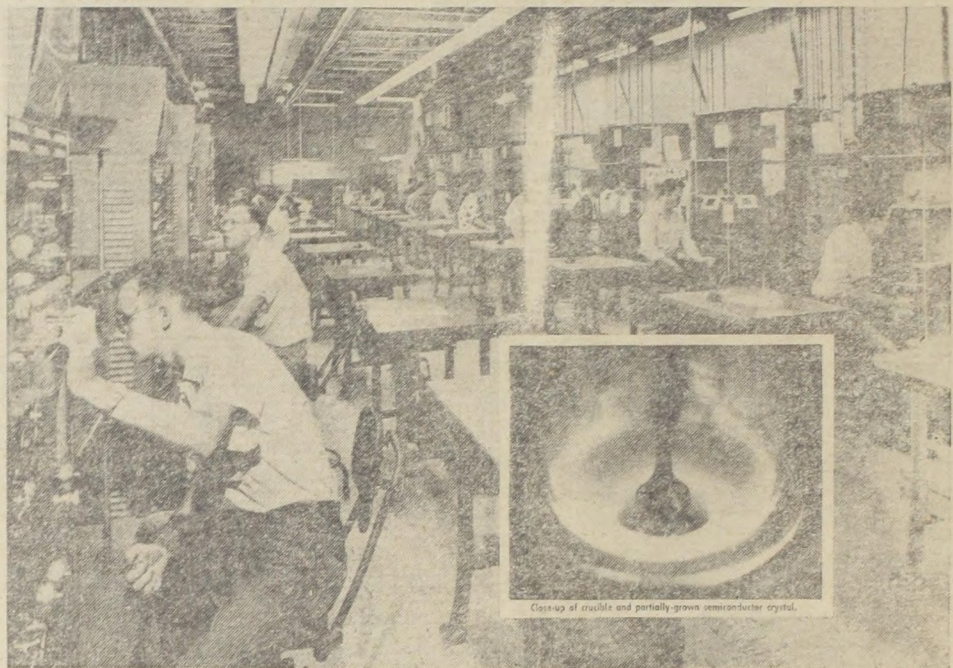

"IT SHOULD be as Matty Bell says, 'Win or lose, but do it gracefully and modestly. Treat the opposing teams and their spectators as our guests'."

"If SMU students would think about this statement before they vent their enthusiasm, we would be well along the route to another Southwest Conference sportsmanship trophy.

"As it is now, we rank lower than Texas A&M."

This is a fine tribute to Tech's sportsmanship. We should be proud and live up to it not only now but it should become a tradition.

## 'hot house' for growing crystals! ...from plum-size up to 8-in. diameter, largest ever grown

This, the world's longest line of crystal "pullers," is typical of advanced engineering-in-action in which you are invited to share at Texas Instruments . . . largest producer of silicon transistors and a major source for germanium transistors as well as silicon diodes and rectifiers . . . with many engineering "firsts" in semiconductors.

At TI, you will push out beyond existing limitations—in research, development, design, and manufacture—into new concepts and new products . . . into vital fields such as electronics, semiconductor behavior, infrared optics, missile control, high speed data reduction, and many others. This pioneering approach has been so successful that Texas Instruments has grown 20-fold in the last 10 years to a current \$70 million volume . . . a growth accelerated by recognition of individual achievement . . . a growth you can share.

**openings**  
**SEMICONDUCTORS AND OTHER COMPONENTS**—Transistors, diodes, rectifiers, resistors, and panel instruments.  
**ELECTRONIC AND ELECTROMECHANICAL APPARATUS**—Radar, sonar, infrared, navigation,

magnetics, telemetering, communications, computers, transformers.

**RESEARCH**—Semiconductor materials and devices, noise, surface, ferromagnetics, infrared optics, microwaves, magnetics, radiation damage, high speed data reduction, etc.

**MANUFACTURING**—Production, planning, purchasing, cost analysis, etc.

**come and grow with us**

Hitch your wagon to the Texas star . . . work at a plant within the city but away from downtown traffic . . . live within 15 minutes of your work or your play—year-around recreational, amusement and cultural activities. A Texas Instrument representative will be on the campus in a few days to give you more details. You may contact the placement office or write—
