### NEWS BRIEFS

### Iran's economy

TEHRAN, Iran (AP) - An adviser to Ayatollah Ruhollah Khomeini, providing clues to the possible future of this oil-rich nation's economy, said Sunday that Iran should cut its oil production by as much as 60 percent and world petroleum prices should be higher.

Such moves by a Khomeini-guided government in Iran - now the world's No. 2 exporter of oil - could precipitate oil-supply problems among industrialized nations.

Dr. Fazullah Bani-Sadr, a key economics adviser to Khomeini, spoke with a small group of reporters in his home.

He said he favors a new economic system for Iran that would be "neither capitalist nor Marxist, nor a combination of the two." He also said a new Iranian government would have the right to cancel foreign debts incurred by previous governments.

### Teng's American tour

SEATTLE (AP) — Chinese Vice Premier Teng Hsiao-ping, apparently tiring, slowed his pace Sunday as he neared the end of his American tour.

His morning activities included only a brief courtesy call paid by former Secretary of State Henry A. Kissinger, in Seattle to help promote a soccer game in his capacity as the honorary chairman of the North American Soccer League. and a meeting with U.S. Sen. Henry Jackson, D-Wash.

Jackson said Teng had "indicated he would give public assurances" that China's emigration policies will conform to the requirements necessary for the country to attain the low tariffs and credits it wants to enable it to buy expensive modern equipment.

### Rural Texans' case

AUSTIN (AP) - Rural Texans, holding strong hands in a high-stakes poker game with city dwellers, take their case for a generous cut in their land taxes to a House committee today.

The House Ways and Means Committee will hold a 9:30 a.m. hearing on proposals to tax rural land on productivity instead of real estate value.

It will be the first round of legislative activity on implementing the 1978 tax relief amendment, which authorized productivity evaluation of farm and ranch lands.

### McCrory trial

WICHITA FALLS (AP) - The prosecution and defense present their final arguments today to the jury that will decide the fate of John William McCrory, 27, accused of the rapestrangulation last June 2 of Jeana Melissa Walker, a 17-year-old Lewisville High School

Miss Walker's mother said her daughter left the house the night of June 2 to pick up her boyfriend to go to a party together.

The defense succeeded Saturday in getting District Judge Stanley Kirk to strike the testimony of a Dallas psychiatrist who said McCrory told him of being in a minor accident with a girl, who then accepted sexual advances he made after they got out to inspect the

### Double stabbings

VIDOR, Texas (AP) — Police said they plan to interrogate a 16-year-old passenger today about the activity in the past year of James Davis, a truck driver with a history of sex crimes who was slain last week near here on Interstate

Vidor police have received "numerous inquiries" about James Davis, 48, of Los Angeles, since the man's record of sex crimes was disclosed, Detective Sam Kittrell said Sunday.

"We plan to question the boy extensively. We hope he will tell what transpired since he's been with Davis. We've got all these inquiries out nationwide as to crimes Davis could have committed," said Kittrell, who said the man had dodged sex or assault charges in numerous

### INSIDE

Entertainment . . . Fools gave a disappointing show at Rox Saturday night; Dallas Holm's religious concert was sincere; guitarist Alice Artzt's variety of styles was met with a warm reception; "Brigadoon" smacked of professionalism; and singer Nanci Griffith gave a moving performance. See the reviews on pages five and six.

Sports...The Raiders stay in contention for the Southwest Conference title or a top spot in the league's post-season tournament with a big win over Baylor in Waco. See Mauri Montgomery's story on page seven.

### WEATHER

Partly cloudy skies today with no important temperature changes. The high will be near 50, and the low will be in the low 20s. Winds will be southwesterly at 10 to 15 mph.

# Building fund faces possible cut

By ILENE BENTLEY

**UD** Reporter

Tech building funds could be decreased next year if the Texas Legislature votes to abolish the 10 cent ad valorem tax, according to Jeanie Field, Student Association external vice president.

Field attended a Texas Student Association (TSA) assembly meeting Jan. 27-28 in Austin where the student seantors discussed current legislative bills.

According to Field, the bill would abolish the ad valorem tax and create a separate university building fund called the State Higher Education Assistance Fund.

Schools which draw funds from the ad valoreum tax would draw from the university building fund,

and the University of Texas and Texas A&M would continue to draw from the permanent building fund, Field said.

"Tech could get messed around if they (the Legislators) didn't set up something competent enough to take care of our needs," Field said.

Currently, there are six more bills, not yet in the Senate, which propose the abolishment of the ad valorem tax, and each offers different alternatives, Field said.

According to Field, some legislators want to repeal the tax because it may not be legal.

In other business, TSA members discussed a bill which requests tenure be abolished in Texas state schools.

Beginning in 1980, no new tenure

would be granted, and by 1990 all tenure would be phased out, Field

But TSA members adopted the Texas Coordinating Board's stand which proposes a faculty member be recommended for tenure after seven years, at which time the university may or may not take action. After 12 years, the faculty member may request tenure and the university must decide whether or not to grant

Another bill proposes a University of Texas student serve as a UT system regent for a two-year term, Field said.

If passed a University of Texas System Council would be created to represent all of the UT schools, from which the governor would choose a

student to serve as a regent. The bill does not specify if the student regent would be voting or non-voting, Field

According to Field, the Texas Association of College Teachers is lobbying for a regular representation of a student and faculty member on boards of regents.

TSA members also discussed a bill that would require all educational standards as a condition for the results of tests used in Texas.

The bill would standardize the testing systems and some of the tests would be offered only once a year, Field said.

According to Field, there are rumors the Student Service Fee

ceiling will be increased from \$30 to \$45 or \$48, although there are no bills requesting such an increase.

If a bill is proposed, TSA members plan to support a campus referendum amendment, Field said. Before any fee could be raised, students woul have to vote for the increase.

TSA members also plan to support a student advisory board requirement which would demand all budget requests for student service fee money be made to a student-controlled fee board before going to presidents and regents.

The TSA Spring Convention will be at Tech March 2-4. TSA members will elect officers for 1979-80 and attend workshops, Field said.

# Future water supply linked to reservoir development

By MIKE VINSON **UD** Reporter

The future of Lubbock's water supply could be tied to the development of two Garza County reservoirs at a cost of \$100 million. Lubbock City Council members learned Friday.

Consultants from Freese and Nichols, Inc., a Fort Worth engineering firm, reported the development of two lakes, one near Justiceburg and another near Post, would provide an estimated 30 million gallons per day for Lubbock.

Water use in Lubbock reached a peak of 78.8 million gallons per day

The study on the development of new water supplies for the city was authorized by the council in August 1975.

A key area in the study was the potential quality of water from the lake sites.

According to the report, the quality of water from the Garza County lakes, while not excellent, would be better than that of water currently piped from Lake

The report also said the water from the Justiceburg Lake would contain fewer disolved minerals than water from Lake Meredith.

The lake near Justiceburg would be the larger of the two lakes and cover an area of 2,884 acress.

Lubbock voters approved \$5 million in 1977 to begin development of new water supplies for the city. The \$100 million price tag on the proposed lakes would include land and right-of-way purchases, as well as dam and spillway construction.

The construction of a water treatment plant, a pipeline and pump stations would also be included in the development cost.

Bob Gooch of Freese and Nichols said most of the cost of the lakes would have to be financed locally through the sale of bonds.

Gooch said there was little chance of obtaining federal funds for the water project.

The next step for the city, said Vaughn Hendrie, Lubbock public information director, is to get in touch with area cities to see which ones are interested in participating in the development of the lakes.

In other action Friday, City Council members approved on first reading a gas rate increase requested by Pioneer Natural Gas

The new rates will mean the average residential gas customer will find his monthly bill increased by approximately \$3.78, based on an average use of 9,000 cubic feet of gas per month.

### Cosmic casino

No, it's not two fashionable Tech students dressed for class. Several students, similar to the unidentified beings pictured above, dressed accordingly for the University Center's Cosmic Casino Night Saturday. (Photo by Karen Thom)

# Tech regents approve two issues

By CHINO CHAPA

**UD** Reporter

A hike in the mandatory retirement age from 65 to 70 for Tech faculty and aid for the campus computer system came closer to reality Friday when the Board of Regents approved action for both issues.

Under the recommendation of Tech President Cecil Mackey, the regents called for a revision of the current university retirement policy to include faculty members. The

board asked that a report be presented by Mackey at the next regents' meeting, March 30, 1979. At the Sept. 29, 1978, meeting, the

regents approved a change in the retirement age from 65 to 70 for all university staff, but "staff" did not include faculty. The federal law that changed retirement for the nation's work force beginning Jan. 1, 1979, excluded tenured faculty.

Board Chairman Robert Pfluger of San Angelo, in a prepared statement, said to the board, "We look forward to a policy which will move the mandatory age of retirement to 70, but we will, in the interests of both the individual and the institution, support a normal retirement age of 65."

An administrative aid told The University Daily, "support" meant that even though the policy would be legally adopted, the administration would still urge that the age of 65 be used as a retirement age.

"The report will include plans and maybe some figures that will make it more appealing for faculty to retire at the age 65," said Charles Hardwick, vice president for academic affairs. Hardwick will aid Mackey in the preparation of the report.

In other action, Ken Thompson, whose title was changed from vice president of administration to include the words "and finance," told the board a new computer system must be purchased soon. Thompson said the current

computer facilities were outdated and inadequate and if not upgraded could lead to the determent of the Tech accounting system and cause trouble in courses.

Thompson said, "The current system would be sold and with money saved from past computer use, a \$2 million computer system could be purchased and hopfully be in use by the beginning of the fall 1979 semester."

The new system would have five or six times as much storage capacity as the system the school owns now.

Mackey presented the board with a report of the provisional entrance program for freshman that began last semester.

enter on certain stipulations, including a course load of no more than 12 hours, were placed on probation after the first semester. "Although we sent out midsemester notes telling them to see

their counselors and seek aid, no

Mackey said that 40 percent or

1,500 students who were allowed to

more provisional freshman met with counselors than did other students," "I believe this shows that there is a substantial number of students who are not prepared for college work or cannot be counseled to a

college level capacity," said Mackey. "I am not in favor of lowering our standards any more than they already are," said Mackey. "We cannot force 18- and 19-year-old men and women to study. If they cannot maintain a 1.5 grade point average and do not seek help, we cannot lower our standards for them and

hurt our educational program. "Although we want students. We want to educate them. We cannot waste money on these kinds of students. If they are not going to make an effort, we should not spoon feed them at this age. They belong in other schools like community colleges or vocational tech."

Regent J. Fred Bucy of Dallas agreed with Mackey.

"Many students are affected by peer pressure and some others just don't have an interest in school," Bucy said.

Knox Jones, vice president for research and graduate studies, announced that the school is \$500,000 ahead of last year's grants for the same time.

The board also adopted an audit policy that would send complete reports and comments to the regents. The move was to keep the internal auditing of the School of Medicine and Tech using the same procedure.

# Board of Regents hears reports of hospital, med school progress

By TOD ROBBERSON

**UD** Reporter

The Tech Medical School Board of Regents, meeting jointly with the Lubbock County Hospital District Board of Managers, heard reports on the operating deficit at the Health Sciences Center Hospital and on the progress of the Medical School branches in Lubbock, Amarillo and El Paso.

Bosworth, LCHD Gerald executive director, reported the hospital's \$4 million in start-up reserves, will be depleted by the end of 1979. He added that unless the Legislature and the community work to curb the operating deficit, the hospital will incur almost \$4 million in debts in 1980.

Dr. Richard Lockwood, vice president of the Tech Health Sciences Centers, told the group that the Medical School's "number one priority for this year will be to do whatever is necessary to raise the school's enrollment."

His report re-stated the school's priority of training students with an emphasis on the primary care specialties, particularly in the field of family practice.

Bosworth said the major problem contributing to HSCH's deficit is the bad debt problem. Since the hospital is responsible for indigent care in Lubbock County, most of the lower income patients seek medical care at HSCH. Bosworth explained that

not all of these patients qualify for indigency benefits, but nevertheless are unable to pay their bills.

Regent J. Fred Bucy asked Bosworth if the only alternative to combat the hospital deficit would be to raise local taxes.

"That's one avenue to consider," Bosworth said.

County Judge Rod Shaw suggested an alternative of having the state underwrite the costs for indigent care, "since indigents have a tendency to move from one county to another, making it impossible to determine which county should foot the bill."

Bosworth said the main consideration in reducing the debt depends on the opening of additional beds in hopes of attractinga higher ratio of paying patients.

He reviewed the hospital's first year of operation by comparing its development to that of another teaching hospital he helped organize. "This hospital is much further ahead in its level of development," he said.

"A year ago the hospital admitted 27 patients, and today it is operating with a 135-bed capacity-134 of which are filled," Bosworth said. "But we have the space capacity to open 273 beds, but the only major stumbling block preventing this is the lack of nurses."

He told the regents that the nursing shortage in Lubbock has forced

local hospitals to hire more than 60 percent of their nursing staffs from outside the state. He said the nursing shortage could easily be the cause for HSCH's deficit expenitures.

Regent A.J. Kemp added, "Isn't it ironic that we're worried about legislative funding for the Nursing School when we are confronted with a situation like this?"

Most of Bosworth's report like Lockwood's, was of a generally optimistic nature.

Lockwood said Medical School faculty recruitment is 80 percent complete, with almost 200 faculty members teaching throughout the school's three branches. The school currently has 186 undergraduate students and 131 resident physicians

"Generally, the school's progress has been a comfortable one," Lockwood said, "but it hasn't been without its problems."

He said that since the school is geographically divided, faculty duplication is necessary, and therefore more money is needed to operate facilities at each campus.

Faculty recruitment is difficult, particularly in the primary care field, Lockwood said, because "in addition to teaching responsibilities each physician is also responsible for service to primary care patients.

"It takes many things to attract a good faculty, but many more things to keep them," he said.

# Connally's dream doubtful in real world

James Reston

(c) 1979 N.Y. Times News Service

WASHINGTON - Old men running for the presidency of the United States are like old men who take young brides. It's an exciting idea for awhile but it seldom works.

Maybe John Connally can make it work this time, but timing in politics, as in love, is everything, and Big John always seems to be arriving or departing at the wrong time.

IF HE had stayed in the Democratic Party in 1972 instead of campaigning for Nixon and against George McGovern, he might have taken it over after McGovern's defeat or at least inherited the wreckage. Likewise, he joined Nixon's ship just before it was beginning to sink and won the support of Nixon just when Nixon lost the support of the American people.

Now, at almost 62, denounced by the Democrats as a turncoat and resented by many Republicans as a presumptuous newcomer, he has finally made a formal announcment of his lifelong ambition.

As usual, he came in with a bang. There has always been something gloriously and unashamedly brash about Connally. Not so long ago a reporter couldn't even get him on the telephone, but here he was at the National Press Club, greeting strangers like old buddies, as if he'd never been away. He dismissed President Carter as a nice, sincere man who was "wrong for the times" and offered himself, without excessive modesty, as the man to lead the nation out of its fourth great crisis, as General Washington, Mr. Lincoln and Franklin Roosevelt had led it out of the first three.

BIG JOHN is as subtle as a punch in the nose. Like that other Texan, Roger Staubach, he passes from the shotgun formation - telling you in advance he's going to throw the ball and then throwing it down your throat.

Connally is not going to have an easy or a very pleasant time. Reagan's supporters will resent his effort to capture or the conservative split Republican vote, already somewhat divided by the candidacy of Rep. Philip M. Crane of Illinois.

IN FACT, there is a danger that a crowded conservative field could fragment the conservative vote in the Republican Party and help the cause of the moderate Republican hopeful - George Bush of Texas, former CIA director and former ambassador to the U.N. and special emissary to the People's Republic of China.

Accordingly, without control of the Republican Party in Texas, and with strong opposition from Reagan, Connally's hope lies in capturing the party in the primary elections. Here his talents should not be underestimated.

HE IS a superb public speaker. He looks like a president, and he has no doubts. This is precisely why so many people distrust him, but in the primary elections, where energy and personality are so

important, he could be a formidable candidate.

Connally is counting on the assumption that Carter doesn't look or sound like the sort of leader he thinks the American people want - too weak and mild, too conscious of the limitations of American power, and the ambiguities of world political problems.

CONNALLY insists that the president has "little sense of strategy and little sense of the use of power on a global scale." His suggestion is that what Carter lacks, Connally has.

He talks as if nothing has

changed in the world since he used to work here when Washington was clearly the dominant military and economic power in the world, and he describes the United States under Carter, almost in Nixon terms, as inefficient at home and almost helpless overseas.

REAGAN, Crane, Dole and even Howard Baker of Tennessee, if he joins the race, will probably make roughly the same argument, but Connally will shout it through the primaries in a campaign that will probably be vaguely but noisily protectionist.

. . . Or just a bastard child

### Invention: son of necessity.

Having been a history buff for several years, I like to think of how modern life would be had this or that event never oc-

The January issue of Omni magazine included a brief timeline of historical inventions which are now more or less common household items. But the interesting aspect of the history of invention isn't just in imagining how life would be without such inventions, but in how long each invention took to catch on after it was invented.

For instance, the toilet roll wasn't invented until the 1870s, yet its popular usage didn't really develop until the early 1900s. Life must have been rough back then. For what I understand, the corn cob was highly popular in the wellequipped outhouse of the 19th century.

The can opener is a nifty little device we've often taken for granted. Have you ever tried to open a can without one? Well, before the 1880s, folks with canned goods either had to have strong teeth or good hammers and chisles, because the can opener wasn't marketed until 1885.

1909 it was technically possible for a woman (or a man, if you please) to have her or his breasts enlarged with injections of silicone. But the final products couldn't be harnessed for almost a decade later, when the brassiere was invented.

Hmm, it makes me wonder what the women's libbers burned back then when they wanted to protest for women's rights.

Tod Robberson

And speaking of women's rights, it took almost three centuries for the modern slave to evolve, according to my calculations. First came the pressure cooker and the thimble-both products of the mid-1600s.

The progression toward modern conveniences stagnated in the 18th century, but things really started rolling by the mid-1880s. To save the housewife from the same old meat-and-potatoes dinner for hubby, the gelatin dessert was invented in 1840.

The 1850s brought the gas burner into the kitchen, so now women no longer had to struggle over a hot cauldron to make a good meal. Alas, hubby started to get too fat, though, so saccharin entered the market in the late 1870s, about the same time cancer was invented.

The 1900s gave us the vacuum cleaner, the first self-service supermarket and stainless steel cookware. Even though the electric freezer had yet to reach the average household in the 1920s, some guy named Birdseye found a way to market frozen foods.

The twenties also brought us the pop-up toaster and Contract Bridge, two favorites for the person who likes to eat toasted playing cards.

The thirties gave us instant coffee, non-stick Teflon and DDT, a food additive that prevents bugs from eating your meal before it gets into your stomach. The government has now determined that we would probably have been better off eating the bugs, but they don't taste as good.

Ah, but what modern kitchen would be complete without the famed microwave oven? Just think, 30 years ago somebody bombarded himself with microwaves in the name of progress and modern convenience. Now everyone is doing it.

Some more interesting facts: less than 15 years after the telephone was invented somebody thought up the idea of letting his fingers do the walking with the Yellow Pages, thus giving birth to arthritis.

The first cloverleaf intersection went into use in the mid-1920s, and man experienced his first rush-hour traffic jam soon thereafter.

In 1915 the crossword puzzle was invented, giving new meaning to the word "boredom."

In the 1950s, a guy named Sabin was sitting around thinking of the possible uses for the sugar cube and stumbled upon the polio vaccine.

And lastly, the mixture of inventions like chewing gum in the 1840s, soda pop in 1807, Life Savers in 1910 and the ice cream cone in 1904 brought into popularity the institution of modern dentistry.

What would we do without invention?

by Garry Trudeau

# Jimmy in Wonderland

START PACKING OUR STUFF -- AFTER WATCHING AMERICAN TELEVISION PROGRAMS, MR. TENG

Leonard Silk

(c) 1979 N.Y. Times News Service

NEW YORK - In his State of the Union message, President Carter used bold rhetoric to proclaim his unwillingness to choose between inflation and recession. "In our economy," he declared, "it is a myth that we must choose endlessly between inflation and recession. Together, we build the foundation for a strong economy with lower inflation, without contriving either a recession with its high unemployment, or unworkable government controls."

BY USING the word "endlessly," Carter presumably meant that this unhappy choice between inflation and recession must not be permitted to hamper economic policy into the far future, and that this

timistic private forecasts.

will result, the Administration predicts, in only a slight rise in unemployment. The jobless rate, according to the budget's assumptions, will average 6 percent in 1979, the same as in 1978. By the fourth quarter of 1979, however, the administration expects unemployment to have risen to 6.2 percent; that is at least half a percentage point lower than most private economists expect.

Because the administration is expecting real GNP to grow by only 2.5 percent in 1980, or by 3.2 percent from the fourth quarter of 1979 to the quarter of 1980, it is forecasting that unemployment will continue at 6.2 percent in 1980. That is a remarkable forecast for a Democratic President, with his party's history of advocacy of "full employment."

IF THE Carter forecast proves correct, the president will end his first term with unemployment having averaged 6 percent or higher each year of his administration. In fact, the seven-year average of unemployment, from 1974 through 1980, would work out to 6.7 percent, signifying either the existence of a long minidepression or something drastically wrong with the unemployment statistics or concepts.

Earlier in the postwar period, the standard of normal full employment was considered to be 4 percent unemployment, and until recently there was resistance from Democrats against accepting 5 percent unemployment as the norm. But Carter is now planning for a jobless rate in excess of 6 percent during the third and fourth years of his administration, with only minor protests form forces within his own party.

### Former editor dies after renowned career

He witnessed the dawn of an era from the window of a crude log cabin and lived to see the nuclear age. Harry Montgomery saw it all and reported it for the world.

Montgomery, who came to Tech when construction started on the first buildings of the university, was the cofounder and first editor of the student newspaper then named The Toreador now The University Daily. Montgomery died Jan. 19 in Phoenix, Ariz.

One of the Southwest's best known newspapermen, Montgomery had retired in 1971 after completing 24 years with Phoenix Newspapers.

He also had served as the first public relations director at Tech.

Montgomery was born in a log cabin in the Choctaw Nation

(Indian Territory) on July 28, 1902, five years before that area became a part of the new state of Oklahoma. As a newspaperman, Montgomery was to see and report

on many events. He covered the first atomic explosion at Almagordo, N.M., while with the Associated Press and he watched the development of the rockets that led to the eventual landing of Americans on the moon.

**UD** Reporter

Billions of dollars have been saved by energy conservation buildings of regular wear and regulating the amount of air habitable by reducing the hot efforts at Tech, although recent figures only show a fractional drop in money

spent. "If previous usage levels had continued with the drastic increases in the cost of energy and the increased number of buildings added to the campus a the cost would have been prohibitive," said Building Maintenance Director Marvin Buckberry.

Until four or five years ago, energy conservation was not a consideration when plans for new construction were proposed. Therefore, to keep costs down, cheaper and inferier mechanical equipment often was installed rather than the more expensice but energy saving equipment.

"We are now paying the price through excessive maintenance, wasted fuel and problems maintaining temperatures within a reasonable tolerance," said Stanley Moore, special assistant to the director of Building Maintence. "Years ago the equipment was chosen to best meet the creature comforts (temperature, humidity, etc.) of the personnel rather that for energy conservation," Buckberry said. However, the slight decreases seen in the last quarter energy consumption and cost figures are incouraging, Moore said.

"We have come a long way Tech Theatre. Tickets are \$2 "We are hoping for a large in the past, but we have a long way yet to go," Moore said "I haven't come this on my own, effort and cooperation from the faculty and staff."

# Continuing Education offers night Shakespeare course

The Division of Continuing Education at Tech is offering "The Plays of Shakespeare," a non-credit evening course. The course is designed as a discussion group based on the television productions of the Shakespearean plays. The students will not be required to read the text of the plays, however, such reading will be strongly encouraged.

The format of the discussion will center around 1) the producer's interpretation of the play, 2) the character development during the productions, 3) an awareness of Shakespeare and his works, 4) television's role in the movie industry, and 5) what television can do for Shakespeare. Any necessary background information to the plays will be provided by Pam Brink, the instructor of the course.

Each student will have the opportunity to discuss his or her reaction to the televised productions. Interest in the course has been shown from students who have an interest in

Shakespeare but who do not have the time or the opportunity to actively pursue a study of Shakespeare, members of various community clubs, and persons actively interested in Shakespeare so people of all interests are

Brink, lecturer in the English department at Tech, is currently working on her dissertation at the University of Washington dealing with a discussion of three of Shakespeare's

The course will meet today, Feb. 19, March 5 and 26, and April 2 and 16 from 7:30-9 p.m. Room 73 of Holden Hall will be used for the meetings. Enrollment will be limited to 40 persons and the registration fee is \$20. An orientation meeting will be held from 7:30-9 p.m. today. For further information or to register, contact the Division of Continuing Education, 742-2354. Persons may also register at the orientation meeting.

### MONENI'S NOTICE

Persons wisning to place a Moment's Notice in The University Dally should call 742-3393 between noon and 2:30 p.m. the day before a notice needs to appear A Moment's Notice will be taken for one day only by telephone.

Persons wishing to place a Moment's Notice in The University Daily for more than one day should come to the newspaper offices on the second floor of the Journalism Building and fill out a Moment's Notice form for each publication date the notice needs to

Need to take the GRE? Graduate school hopefuls can brush up on verbal and math skills by signing up for an 8week, one night per week seminar. It begins Feb. 20. Cost is \$35. People can register by calling 742-2192 **Block and Bridle** 

Block and Bridle will meet Wednesday at 7:30 p.m. in the Auditorium of the Agriculture Engineering Building. New and interested persons are welcome Pans for Little International and banquet will be discussed. Horseman's Assn.

Horseman's Assn. will meet Tuesday at 7:30 p.m. in the Meat Lab of the Meats Lab Building. The guest speaker will be Jim Ward, western artist. Slides of trail ride will be shown. Everyone is welcome. Refreshments will be served. Spirit Mixer

The Saddle Tramps and Pom Pon Girls will host an Aggie Aggravation spirit mixer and pep rally Friday from 3-6 p.m. at the Eight Second Ride. Dress up for the Ugly Aggie contest and win the grand prize. More than 25 door prizes will be awarded. Budweiser beer Everyone come and support Tech basketball. \$3.

Delta Sigma Pi Delta Sigma Pi will meet Wednesday at 7 p.m. in the Blue Room of the University Center. Rush Smoker. Truman Bell will be the speaker. Call 742-5175 for more information. **Cultural Exchange** 

Committee of the UC . The Cultural Exchange Committee of the University Center will meet Tuesday at 7:30 p.m. in the Lubbock Room of the UC. Dr. Kennedy will be the

The sociology department is initiating a chapter of Alpha Kappa Delta, national sociology honorary society. To be eligible a student must have an overall GPA of 3.0 and an 3.0 in at least 10 credits of sociology. If you are interested in AKD and think you are eligible, please contact the sociology

Campus Crusade for Christ will meet Tuesday at 7 p.m. in Room 169 of the new Home Economics Building for LTC. We will see a film by Dr. J. Edwin Orr discussing prayer; its importance and its place in history. Campus Crusade for Christ will meet Friday at 7 p.m. at 3210 41st for prayer. Everyone is invited.

NOW NOW will meet Tuesday at 7:30 p.m. at the Wesley Foundation, 2420 15th. The topic will be "When God was a Woman." Circle K

Circle K will meet today at 8:30 p.m. in the University Center Blue Room. All interested students are welcome. Phi Alpha Theta

Applications for Phi Alpha Theta, history honor society, are available in Holden Hall 131. Qualifications are at least 12 hours of history with a GPA above 3.0 and overall GPA of 2.75. Deadline is Feb. 14. Fall initiates may pick up their membership certificates in Holden Hall 131. PhiU

Phi U applications for graduate students are available in the Phi U office. All applications are due by Wednesday at 5 p.m.

Student Conference There will be an international student conference Feb. 16-18 in North Texas sponsored by the Baptist Student Union. Cost is \$25, subject to reduction. Please contact the BSU at 763-8263 for more information. Deadline for egistration is

AHEA The American Home Economics Association will meet Tuesday at 7:30 p.m. in Room 111 of the Home Economics Building. Ethel McCloud, from the Steno Call answering service, will speak on "Professionalism."

# Fools . . .

### Four's a crowd, when you're a trio

By DOUG PULLEN **UD** Entertainment Editor

Fools would be a much better band if it took care of a few problems - like learning how to end a song, or trying to work within its limitations, rather than beyond them.

The four-member Houston-based group concluded a three-day stint at Rox Saturday

Fools has gained substantial popularity throughout the state with its simple, yet imaginative blend of hard rock influences. Its association with manager-producer Bill Ham (ZZ Top, Jay Boy Adams) adds to the group's fame.

But Fools is going through a few changes these days, the most recent being the addition of keyboardist Pat O'Bryan, an addition intended to help round out the group's sound.

Saturday night's first two sets indicated that Fools is still very much a trio, a trio trying desperately to work in a new keyboard player, but failing miserably to do so.

Guitarist Van Wilks writes and sings most of the band's material, and as such, tries to lead the band through too many directional shifts. Wilks has the imagination worthy of national appeal, but somehow he lacks the instrumental ability to carry his versatile band through the various transistions it so

feebly attempted in its song Saturday night.

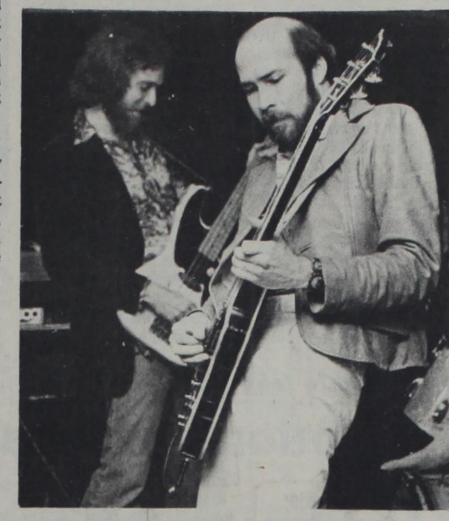

Perhaps a diversification of views could help Wilks and the band succeed where it failed Saturday night. Bassist Reggie Witty seems the natural choice as second songwriter and singer. Indeed, Witty writes a portion of the band's material, but most of it was omitted from Saturday night's show.

The show was hampered by a generally uneven, and at times uninspired performance. Keyboardist O'Bryan seemed left out of the majority of the group's material, and might have been better off playing a guitar so that he'd at least feel more at home with the band.

Perhaps it's a bit unfair at this point to shed such a negative light on Fools. The band has garnered numerous honors throughout its career - it opened the first Sunday Break in Austin in 1976 with Peter Frampton, Santana, America and Gary Wright and a year later it won first place in the Austin Sun's best bands in Texas reader's poll.

Such accolades don't come without some degree of talent. Fools has the talent to live up to the word-of-mouth reputation it has earned in Texas. But its lack of balance Saturday night belied the real sentiments of Fools' music.

# Religious singer, group perform with sincerity

By DONNA RIVERA . **UD Entertainment Staff** 

The smell of pine trees, a bright blue sunny sky and the majesty of Colorado's Rocky Mountains such would have been the perfect setting for a Dallas Holm and Praise concert. Even though Colorado is 500 miles away and it was night, nature's serenity was sensed Thursday night during Holm's concert in the Municipal Auditorium.

A religious concert such as his is quite different from a rock concert. The music does not blare in one's ears, and the lyrics have a special message about Christ. When the curtain of the evening. Holm's dexrose Thursday night, there trous guitar picking had the were no bright lights, no resplendent costumes, only four young men casually dressed and ready to perform.

The group definitely had its music together. Even a person not interested in religious music could have enjoyed this concert. Holm and Praise were versatile, playing styles ranging from pop to country.

Each member contributed to the harmony, with Randy Adams on bass guitar, Rick Norris on drums, Tim Johnson

Dallas Holm

acoustic guitar. Accents of the various instruments made accessible the different moods audience stomping and clapping to the beat. Long trills and piano runs by Johnson preluded a sublime and inspiring song.

be compared to groups like back stage so he could talk to Firefall or Poco.

Unlike the money made by

many entertainers, the ticket profits from Holm's shows do not go directly to the band. Holm explained to the audience that his concerts are free, usually. Churches sponsor them. Half of the money pays for auditorium rental fee and promotion. The rest of the profits go to the group's ministry. This is not an ordinary group, it performs on a set yearly income provided by its organization. Even the money earned from on keyboards and Holm on their album and tape sales goes to such projects as a drug abuse program, with which Holm's ministry is involved.

Dallas Holm's honesty with his audience was sincere. After his final song, "Rise Again," he closed with prayer.

In contrast with most rock performers' seclusion, Dallas Holm invited those "who had Much of Holm's music could not accepted Christ" to come

He made it clear -he cares.

# Guitarist gets warm reception

By STEVE MORGAN

**UD Entertainment Staff** 

Guitarist Alice Artzt greeted her Saturday night audience with a variety of classical styles. And by the evening's end, she had been warmly received.

Artzt began her Recital Hall concert a little slowly, but soon she was playing comfortably and well.

Artzt structured the evening around her own songs. She began most without introduction, but for others she felt the need to explain something about the song's origins and the version she would play.

Artzt said that "Variations on Folia de Espana" was a simple tune about a holiday celebrated in Spain. On this particular holiday, however, men dress as women and dance around crazily.

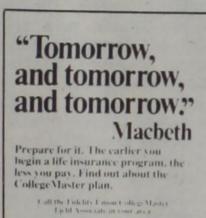

She played 22 of Manuel Pounce's short variations, pausing briefly between each. She began very slowly, somberly, taking a beautiful, sweeping melody that would rise and fall with the touch of her dancing fingers. It was obvious that the artist was very much at home with this piece.

After intermission, Artzt resumed by introducing three adaptations by Francisco Tarrega, whose works she relied upon throughout the concert.

The second portion of the concert began with the light and pleasing "Minuetto de Handel." The more serious, feeling "Andante de Haydn" followed and then the happy and

FUN GROUPS TOURS Harwood

2428 GUADALUPE TOUTS
AUSTIN. TEXAS

aggressive "Minuetto de Haydn." The latter, with its marching air of self-assurance, won the hearts of the audience for

The most interesting composition of the evening was William Walton's "Five Bagatelles." Walton was the most contemporary of the composers whose works were played Saturday night. The song, composed of five parts, was intense and dramatic. The effective use of repetitive runs gave it an air of mystery and suspense.

For an encore, Artzt did a very melodic Tarrega arrangement. Members of the audience were heard humming or whistling this final piece as they left the Recital Hall.

### Tankers destroy TCU

Winning 13 of the 15 events, the Tech women's swimming and diving team overpowered Texas Christian University 98-25, Saturday, in a dual meet in Fort Worth.

Tech's Denise Shipman led the Raiders, winning all three of her individual events. Shipman's wins came in the 100-yard freestyle (57.7), 100-yard butterfly (1:03.5) and the 50-yard butterfly (28.71).

Not far behind were Priscilla Smith and Dara Hembree, each winning two individual events and placing second in

Smith took the 50- and 100-yard backstroke events in 30.7 and 1:05, respectively. Smith finished 6-100s of a second

behind Shipman in the 50-yard butterfly with a 28.77. Hembree swept both breaststroke events with a 33.1 in the 50 and a 1:11.3 in the 100. Hembree finished second in the

100-yard individual medley. Other first place finishers for the Raiders included Melanie Halpin in the one and three meter diving events,

Jenny Stuart in the 500-yard freestyle and Sarah MacDonald in the 200-yard freestyle.

Coach Anne Goodman was pleased with the outcome of the meet and the performances of Sarah MacDonald and Melanie Halpin.

### Turner commits to UT

Dewey Turner, Lubbock Estacado's highly-regarded tight end, has made known his intention to sign with the University of Texas, The University Daily has learned.

Turner, a blue-chipper and All-State choice for the Matador gridders last season, had narrowed his choices for a college home to Texas and Tech. The 6-4, 225-pounder cannot officially sign with any school until the Southwest Conference's deadline for filing letters-of-intent, Feb.14.

The national deadline is Feb. 21.

Carl Robinson, Temple's blue-chip product at running back, has also narrowed his choices for a college to Oklahoma, SMU, and USC.

being household words, a little Altus, Okla., and worked as a team that will never be a before moving to Topeka,

-The Yankees avoid what year. could have been a disaster It also may prepare Gene with another reluctant letters to 113 radio stations

-The fans may be a little tired of the yapping of all Adding up the winners and these big-money baseball people.

Whitey Herzogn manager of the Kansas City Royals, got in the best crack in the post--The Angels get a solid - if trade quotation sweepstakes. "The Angels didn't give up anything." he said. "Minnesota would have been better off taking the deal the Yankees wanted to give them."

> But Carew killed off that chance by badmouthing the Yankees, pushing Minnesota owner Calvin Griffith into a corner. Carew could play out his option this year and walk away, leaving the Twins with nothing. He had set a Monday deadline for a trade which is a privilege under baseball's new player rights situation.

Steinbrenner pulled the Yankees out of the Carew reading Carew's comments about the New York owner arguments.
