Monkey music

The Goin' band has often been noted for its 'monkey business' during Tech sporting events. It looks as though the band has carried things just a little too New Mexico prison riot

## Inmates confess to torture

SANTA FE, N.N. (AP) - An execution squad armed with blowtorches and axes tortured and murdered fellow inmates during the 36 hours of hell behind the walls of the New Mexico State Penitentiary where 35 died and 15 others are missing, inmates said Monday.

"I saw some people cutting a dude's eyes out with a cutting torch," one prisoner told reporters allowed inside the smouldering prison that was recaptured by National Guardsmen and police Sunday afternoon after a day and a half of rioting.

The horror encountered during Monday's search for more bodies caused some Guardsmen to vomit.

Fires still burned inside the compound while about 250 Guardsmen stood watch over 1,100 displaced inmates huddled in tents on the prison grounds to ward off freezing temperatures. State officials hunting a place to put them said they had offers of help from Arizona and Colorado.

Gov. Bruce King said 50 inmates were dead or unaccounted for in the nation's worst prison riot since the Attica uprising in 1971 left 43 people dead in new York state.

New Mexico inmates said that after the riot broke out early Saturday, executioners snatched some prisoners from their cells and tortured them with blowtorches, axes and metal rods. Some were beheaded, they said.

Prison officials said the rioters ransacked prison offices and found confidential files. That is when the bloodbath began, as the inmates rounded up informers.

"There was an execution squad of seven prisoners," a hooded inmated told The Associated Press Monday.

Chief Warrant Officer Alfred Ortiz, a member of the National Guard body detail, helped take 22 bodies to Bernalillo County Medical Center in Albuquerque Sunday night. He said one of the dead prisoners had a rod stuck through his head.

"There was a rod stuck into one of the prisoner's ears, forced through his head and through the other side. He still had it in when we took the body out," Ortiz

Ortiz said many of the dead had been

"One of them still had a rope around

Margaret Babcock, a prison secretary, said she was looking through

his neck and then they smashed his

head in," Ortiz said. "It was horrible."

binoculars from a prison fence when she saw one inmate being tortured with a blowtorch near a cellblock.

"Four or five men were holding one man down and burning his head and face with a torch," she said. "He was screaming. I couldn't believe it. It was like a nightmare."

## Government brings charges after 14-month investigation

WASHINGTON (AP) - The government lodged its first criminal charges Monday in the FBI's 14-month political corruption investigation as Congress opened its own inquiries into the undercover probe that has implicated seven House members and a

The first formal charges arising from the FBI investigation were filed against an Immigration and Naturalization Service investigator in Brooklyn, N.Y.

Alexander Andrews Alexandro Jr., 29, of Commack, N.Y., was arraigned before a U.S. magistrate and was formally charged with one count of bribery and one count of conspiracy.

Officials said the government might begin presenting evidence against other public officials to several grand juries later this week.

All the subjects in the probe, some 20 public officials and 10 businessmen and lawyers, were visited by the FBI over the weekend and notified that they were under investigation, one source said.

In addition to state and local officials in New Jersey and Pennsylvania. sources said those who became subjects of the FBI investigation included Sen. Harrison A. Williams Jr., D-N.J., and Reps. John M. Murphy, D-N.Y.; Frank Thompson Jr., D-N.J.; Michael O. Myers, D-Pa.; Raymond F. Lederer, D-Pa; John W. Jenrette, D-S.C.; John P. Murtha, D-Pa., and Richard Kelly,

Most of the eight members of Congress have issued statements denying any wrongdoing.

On Capitol Hill, congressional leaders expressed shock at reports linking the

eight lawmakers to the FBI investigation, and ethics committees in both the House ansd Senate announced they would conduct their own inquiries.

The House ethics committee quickly called a meeting to begin its probe after disclosure that FBI agents posed as aides to a wealthy Arab sheik who was willing to pay bribes to congressmen and other officials in exchange for political favors. Sources say some officials were photographed with videotape equipment in the act of taking money.

The chairman of the Senate Ethics Committee, Sen. Howell Heflin, D-Ala., promised a "thorough investigation" and said he had met earlier in the day with FBI Director William Webster and Attorney General Benjamin Civiletti.

Heflin said he discussed having the FBI turn the results of its investigation over to the ethics panel, but the Justice Department officials did not immediately offer to do so.

### Organization promotes international friendship

By PAM WEIGER

**UD** Reporter Differences may exist between American and international students, but one element remains universal: the need for friendship.

To break down some of the barriers to friendship, an organization called International Friends was begun on the Tech campus last semester. Response has been excellent, according to Kim Gage, the group's organizer. There are now two International Friends groups.

"I wanted to start the group because I thought there was a lot of apathy toward international students, but I've found it's just a lack of knowledge," Gage said. Gage is a senior general studies major. "The feelings of the group are contagious. Once we get a student to come to an activity, he really wants to come back."

The basic worry among American students becoming involved with foreign students seem to be "what will

we talk about?" said Jackie Behrens, director of International Programs at

"We started with a workshop to break down some of the barriers and give students some topics to talk about," Behrens said. "The major difference between the foreign and American students is their perspective of the

International students view the world on a global perspective, while Americans tend to have a local outlook, she said. As a result, international students often find themselves in conversation with people who have limited insights, Behrens said.

Gage also said the concepts and viewpoints of foreign students are much more broad. She said Americans seem to have "tunnel vision."

Americans also worry about upsetting foreign students by discussing their overseas families. But Behrens said most foreign students want to talk about their families and homes. By trying to be sensitive, Americans may block out topics of converasation, she

International Friends is a loosly organized social group. Gage began by recruiting 25 American students from among her frinds and Alpha Phi Omega, a service fraternity at Tech.

"Word-of-mouth was the main way we got American students involved," Gage said. Fifty international students then joined.

The group was then broken down into smaller groups of six to eight students. Small groups are encouraged to get together for activities, and Gage plans events for the group as a whole. Last semester's activities included a covered dish supper, a Halloween party and a dance at which the foreign students learned disco and country dancing.

When the spring semester began in January, 140 new students signed up to join International Friends. Because the first group was already well estdablished and the new students had different needs, International Friends Group II was started.

Laurie Kane and Marty Stitt organized the new group with many of the same activities as Group I.

"I think we originally set up the organization for the international students, but American students benefit as much, if not more," Kane said. She is a graduate student and teaching assistant in speech communication.

Behrens also pointed out benefits for American students involved in the program.

#### "Many students will find themselves working overseas when they graduate," Behrens said. "They are being narrowminded by not exposing themselves to different cultures and different ways of

Stitt, a senior political science major, said almost any career will involve some international interaction.

"Getting involved with international students broadens your horizons," he said. "Many people don't understand the world situation, but if you can understand culture and religion, you can understand a lot of things better."

Cultural differences are sometimes taken into account when planning activities for the group. Kane said they have learned to never include alcohol because of religious factors. She also mentioned the Moslem custom of men and women not eating together in public. But, she said, it is easy to work around cultural differences.

Both International Friends groups are eager to get more students involved in the cultural exchange.

"It's an enriching experience to learn about other cultures," Gage said. "It's been so worthwhile for me because I get back so much more than I put in."

Interested students are encouraged to contact the International Programs office or any of the group leaders.

### New federal law makes more students eligible for grants

By DONNA RAND **UD** Reporter

With tuition and fees rising almost eight percent last year, parents and students paying for college expenses may have found it hard to come up with the necessary money.

The Middle Income Student Assistance Act passed in 1978 made approximately 2.7 million people eligible for a portion of the \$1.5 billion allocated for Basic Educational Opportunity Grants. This is an increase of a million students compared to the previous year, but some Tech students may be unaware of the financial aid available, according to Ronny Barnes, Tech's director of Financial Aid.

Barnes said 1,900 Tech students received BEOG's for the 1979-80 year and an expected 3,000 students will obtain grants worth close to \$3 million for the 1980-81 academic year.

"I think there are a lot of students who applied for grants before the Middle Income Act was passed and were not eligible. Many of these people would probably be eligible now, if they would just apply," Barnes said.

The BEOG is the largest single service aid received by Tech students, Barnes said. Students can receive from \$200 to \$1,500 for one year with the average grant around \$450.

To receive a BEOG a student must be a United States citizen or permanent resident and must be an undergraduate enrolled at least half-time, Barnes explained. Students also must meet the Basic Grant financial need requirements and must have received no more than four full years of BEOG payments.

Students also can obtain loans from the Financial Aid office. Rather than showing a good credit record as most loan companies and banks require, the applicants must show need.

"We give loans to people that most banks wouldn't even take a second look at," Barnes said.

Approximately 150 students take out loans each semester, Barnes said. Most students receive loans of more than \$400 and repay the loan through set payments.

The state comptroller is currently trying to collect more than \$1.2 million in delinquent state-federal student loans. According to Barnes, Tech has had no major problems with loan defaulters. Only five percent of those students receiving loans at Tech are defaulters.

Barnes said many students use scholarships to pay for tuition and other fees. Approximately 2,000 students have received scholarships offered by Tech and another 1,000 have obtained scholarships from outside sources. Barnes said the scholarships account for \$688,000 in tuition and fee payments.

The deadline for applying tor the BEOG is March 15 and several scholarships have earlier deadlines. Barnes suggested students should check their colleges and departments for scholarship information. BEOG applications are available in the Financial Aids Office in Doak Hall.

### NEWS BRIEFS

#### Draft decison questioned

Draft registration will be the subject from 11 a.m. to 1 p.m. today in front of

The UC Programs Committee will ask questions about Carter's decision to reinstate the draft, registration of women, women in combat and the willingness of those drafted to serve.

The responses will be tabulated on a male-female basis. Results will be printed in the Wednesday issue of the University Daily.

#### Graduate filing deadline nears

Students planning to graduate in May should file an intention to graduate by Friday in the deans' office of their colleges, according to Len Ainsworth, vice president for academic affairs.

Any students also may declare courses for the spring semester pass-fail until Feb. 12. Students may declare pass-fail in the deans' offices of their colleges.

#### Story clarification given

Two staff members at the Health Sciences Center Hospital have not been laid off as reported in Doug Nurse's story printed in the University Daily Monday. Neither the directory of radiology nor the director of physical therapy have left their jobs at the HSCH.

The University Daily regrets the error.

#### stocks

NEW YORK (AP) - The stock market turned downward today, yielding to a round of selling near the close of a drifting session. Trading was relatively quiet by recent standards.

#### Georgetown speech inspires followers

### Kennedy campaign regains momentum

William Safire

What a pleasure it is to see an overconfident, top-heavy favorite get knocked on his ear. What an even greater pleasure it is to see the chastened man shake his head clear, get up off the floor, and - by dint of the intellectual and emotional effort of a powerful speech give his political campaign life and give his political life meaning.

Sen. Edward Kennedy's address at Georgetown University revived the art of the political speech, which has been dormant for nearly a decade. The Kennedy oration was written by people with a feel for vivid prose; it was delivered with force and style; and it had meat for everyone to chew on.

WHEN BARRY Goldwater threw down the gauntlet at the 1964 Republican Convention, an astounded observer cried:

MEET IN

THE CLOSET

30 NOT ERASE

EXPLAIN THE STASA

CO NOW STUDENTS, PLEASE CROWERS'
NOTICE THAT I HAVE OUT - SOCIATION TH

LINED TODAUS LECTURE MEETING

"My God - he's going to run as Goldwater!" Kennedy, sitting Job-like atop a political dunghill, has evidently decided to run as Kennedy.

That is good for the country. For months, the saga of the Democratic liberal could be titled "Waiting for Lefty." As the national mood turned rightward, no champion of the left would dare stand up for activist interventionism in economic affairs and antiinterventionism in foreign affairs.

FORMAL

Kennedy took up the fallen standard, denouced his party's leader as a sheep in wolf's clothing, and gave his own campaign a coherence and reason for being. He now has a cause other than himself. That is far nobler than last year's reason for declaring his candidacy - to save Democratic officeholders from being dragged down by an unpopular president.

I HAPPEN TO think the Kennedy way is mistaken. He would impose price controls without cutting the federal deficit, which is treating the symptom and not the cause. He would ration gas consumers and put the squeeze on oil producers, which would not marshal the force of greed to solve our energy problem. He would ingratiate himself with the Iranians and not be beastly to the Russians, which would earn us no real friends and lose what respect we have left.

But Kennedy is at last espousing a point of view that exists in the U.S. electorate and has - in this crisis - gone unarticulated. Doves who have spent a dozen years telling us how guilt-ridden we should have felt about defending South Vietnam have suddenly fallen silent as our president seems to be guaranteeing the fraying borders of Pakistan. As the threat of another "land war in Asia" looms, antiwar critics are hard to find.

It's Gulf of Tonkin time again, and unanimity reigns supreme. Are doves only noisy in retrospect? How much better is General Zia than General Thieu? Where are the doves when it counts - how willing are they to take a courageoulsy craven stand when the decisions are being made?

KENNEDY HAS begun to do that, and it is about time somebody did, because we are led by a weak president who suddenly realizes he must look tough. As a result, Carter is enunciating vague and dangerous doctrines without debate, treating symbols as harsh reality, and trying to claim that the crisis caused by his mistakes is a reason to rally to his side.

Carter, following the polls and buffeted by events, offers voters a sure confusion in the general election: he is for SALT but not now; he is for defense spending but shuts his eyes to the inflation that gunsand-butter deficits will guarantee. Wearing hawk's wings and labeling as "austere" the most whopping one-term deficit in our history, he seeks to fuzzy the difference between the Republicans and himself.

Kennedy's decision to campaign as Kennedy brings a welcome clarity of choice to the campaign. Do you really want to curb an inflation that corrupts the value of thrift?

Kennedy offers his draconian way; the Republicans offer a more painful way; Carter offers an OPEC alibi.

THE PRESIDENT'S men hope that Kennedy's outspoken stand positions them nicely in the middle. More likely, Carter will be seen as the waffler between candidates who stand for clear principles. Not all Democrats will choose a candidate who prefers to embrace the hawkishconservative positions of most Republicans, and whose main pitch is that his re-election would save moving expenses.

The trend in wolfpack journalism is to savage Kennedy while treating Carter's Rose Garden campaign with awe and reverence. As one who has kicked Kennedy when he was up, I want to salute his first performance as underdog. He showed class; perhaps even character, though I'm not sure of that yet.

Why can't Republicans make decent speeches? Do they think they can out-fuzzy Carter? If they imitate Carter's imitation of themselves, they will deserve to lose.

KENNEDY HAS fired a worthy opening salvo, and shown us all that a political message can come in a serious speech and not in a thirtysecond package. Carter's response was silence. A great many of us are awaiting our candidate's response.

#### Letters:

#### Reality of war

To the Eidtor

This is a response to the five women (further addressed as "you") who wrote Tech 'gentlemen.' I enjoyed your letter and the message that the men at Tech should be more like gentlemen is probably true. The comparison of lack of chivalry to training for war is false. War knows no chivalry.

The problems faced on an unchivalrous Tech campus are minute in comparison to the reality of war. Your letter showed an innoncence of what war is really like and I hope you always maintain that innocence.

Are the bruises obtained fighting for a bus seat equal to catching a slug or shrapnel in your leg and watching your life drain away? Is carrying an armload of books and opening a 'heavy' door equal to carrying sixty or seventy pounds of food, clothing, ammunitiion, and firearms on your back? Is walking on this level planned

landscape with your 'load' as difficult as taking sixty pounds through snake infested swamp, one hundred ten degree desert, or 12,000 foot mountains.

Carrying an armload of books ten minutes between classes is nothing like carrying sixty pounds for 10, 15, maybe 20 hours in one day.

You refused to go farther into your 'training.' I will carry your 'training' further. Do you dread having to brave the cold Lubbock wind between classes? Are you prepared to sit in a trench for days with a constant sleeting rain? What do all Tech women fear from the ungentlemanly male? Rape.

If you were at the front your only hopes would be to survive the war safely or be killed. If you were taken prisoner, what horrors would befall you as a female POW?

How hard would it be to live with that nightmare the rest of your life? Has your training prepared you for the total reality of war?

IF we do go to war over the present world situation, the war will be more for economic reasons than human rights. Are YOU prepared to die so others may keep their dishwashers and their electric can openers?

#### Military power

To the Editor:

Please accept the following statements for publication. With the eventuality of the resumption of the draft upon us, we should all pause and reflect upon the reason this has become necessary.

Because of the anticlimactic end of the Vietnamese conflict and the great amount of dissent that accompanied it, Americans lost all heart of military matters.

I am awed that this strongest, most powerful nation on Earth could have lacked the foresight to realize the absolute necessity of military supremacy. Indeed we have learned a valuable lesson from all the recent indignities bestowed upon the free population of the world. Lets all just pray that we can

by Garry Trudeau

restore the might and vigor we previously held claim to. Perhaps through diligent apolitical effort by our chosen representatives this country might have a strong enough military budget to ensure for our children the same kind of freedom and rights we've always enjoyed and expected. Robert J. Fern

#### 2314-28th

Ladies To the Editor:

To the authors of "Tech Gentlemen": How can you sit there and say that chivalry is dead? I'd like to say that chivalry is not dead, but a lot of it, along with your seat on the bus went up in smoke with your bra!

As for the courtesy of opeining of the door, you might consider a little courtesy in return. Sometimes, ladies say something, but most of the time, they don't say a thing and keep on walking.

If you don't like the gawking, whistling, and rating that goes on then avoid it. Maybe if you could score higher than a three. you wouldn't get upset.

Chances are you'll continue to walk the same way every day because you love every minute of it.

If you assume yourself so ready for battle in war, then here's my gun. GO TO IT! I'd be happy to give you my seat on the bus over to the Middle East.

So you see, chivalry isn't dead yet. If you want more courtesy in the future, then you might consider showing a little more yourself.

Have you ever felt the humilation of saying 'hello' to what you thought might have been a nice girl and having smoke from her Virginia Slim blown in your face?

Or how about when you hold the door open for this same girl and five of her fat friends waddle through, all of whom neglect to acknowledge your presence. I can't remember the last time a door was held for me when my arms were full.

I have always held doors and relinquished my seat to ladies. but perhaps more girls should learn to act like ladies than gripe about the actions of men.

> Gil Radtke 220 Murdough Mike Priebe 218 Murdough

#### Fair maidens

To the Editor: The "gentlemen" concept

went with bra-burning, ERA, and disco. You ask what ever happened to chivalry? Well we can tell you it lives and breathes at Tech.

The problem is finding a fair "maiden" who should obtain the chivalrous activity appropriate of a "gentleman." The only thank you that we have encountered has been an occassional glance or grunt.

But we realize that some of this is caused by the numerous layers of cosmetic goop which inhibits the normal function of the near-extinct horizontal smile.

Concerning the seating on a bus. If you really expect in your wildest dreams for a man to give you his bus seat when he busted his own butt to get it then "posh-posh and cow cookies" to you. Furthermore, if you can't cut it carrying the books on how to get a "MRS" degree then get a pack mule!

By the way, if this letter doesn't aply to you women who aren't liberalists, ERA proponents, sexists, braburners, jock raiders, wig-wearing, spiked heeled, and disco-crazed NEVER MIND. Name Withheld by Request

### Lubbock good area for experimental housing

By JEFF FLOOD UD Staff

The Lubbock area is considered ideal for new experimental housing designed to conserve energy, according to Ernst Kiesling, Tech Civil Engineering chairman. The skyrocketing, and only 20

of materials. But a larger

deal with is energy con- Tokyo. servation, Kiesling said.

#### 'The Russians are also doing extensive building'

Walter Calvert, Tech architecture professor, has been researching the designing aspect of energy conservation in housing. When housing is spread out with single family houses over a large area, such as the urban neighborhoods, each house has four sides that are open to the weather elements.

All areas of the house have to be insulated in order to keep the inside area comfortable. Calvert thinks that houses

should be massed together, much like an apartment complex. "Then there is less wall perimeter open to the outside air that needs to be insulated." Calvert said.

These housing compartments can be massed even closer together to provide compact cities that would save energy, Calvert

Pre-fabricated, or pre- to plant," he said. made houses are built as one

One reason for the in- the Habitat in Montreal, eliminating the weather creasing cost of housing is compact living quarters elements beating on all sides partly because of the high cost erected for exhibit in Expo '67. Japan has been using ground houses. reason is the increasing cost of computers to find new housing sources. They have created housing. The main problem to example of this is a hotel in

> "The Japanese take these movable pre-fabricated units and plug the life support systems into the building on the site," Calvert said.

> Calvert suggests that cities in America could be constructed with utilities carried to the home by one common power line.

> 'This system could be used to furnish power to entire cities by using computer technology as related to architecture," he said.

> Another alternative for future housing can be found on the Tech campus. The concept used with the inflatable, air-compressed roof at the Tech swimming pool, may serve to provide new light to the subject of housing in extreme climatal regions of the world. The largest air dome exists in Detroit at the Silver Dome, a football arena.

Calvert feels the air dome system could be used on a larger scale. "Cities could be built in desert or arctic areas energy can be that are covered by this air dome. The climate could be controlled year round. Agricultural products could be helps combat the spread of grown all year, without flames in case of a fire, waiting for the proper season Kiesling said.

Keeping a home comfortable "The house would either be is more difficult for a 100 for a zero degree range. But some form of heating and

underground houses. "If a person were applying for a loan to purchase an underground home, most lending agencies would require a conventional heating and cooling system to control the environment inside the house," Kiesling said. The earth surrounding the "Energy would be saved because the system would not be used as much as in an above ground house,"

> Kiesling added. Another advantage would be the fact that the houses would not be visible above ground. The underground houses can be clustered to get a higher density than above ground housing, without the visible

Kiesling admits there are disadvantages to underground housing.

"The initial cost is somewhat higher, because the structure is more expensive, and professional assistance in the designing aspect of the home is needed," Kiesling

Also, the marketability of underground housing is not proven, and the process is unfamiliar to most building contractors. "Most building codes are written with the above ground house in mind,"

But the advantages for underground housing outweighs the faults, and Kiesling feels the outlooks for future underground houses are good.

"I think the likelihood is great because of the overwhelming advantages in the area of energy conservation,' Kiesling said. Kiesling added that there are a few communities that are developing with underground buildings exclusively.

"Once the advantages of these are known, the concept will catch on, and become fairly widespread," Kiesling said. The change may take up to 20 years to develop, but according to Kiesling, this is a short time span as compared to the life cycle of a house.

Solar powered housing is temperature range on the another major alternative for

been thought of as a relatively new concept, professor Calvert says it has been around longer that most

'In order to get large amounts of solar power, one alternative is to build solar collectors to put in orbit

and turns its waste products He has found two basic ways outside of between 10 degrees the future. Although it has around the earth, according to

'Huge solar collectors in orbit could collect vast amounts of the sun's power, and turn that into high powered energy that can be transferred down to the earth with lasers," Calvert said.

The possibility of using solar power in the South Plains area has been monitored by officials. The Crosbyton solar research plant is using solar collectors to furnish electricity to the city.

Tech architecture graduate Glenn Hill currently works for First Manufactured Homes, in Lubbock. The company has built six solar powered homes in the Lubbock area and is on contract for some 18 more in the near

Hill feels the South Plains has high potential for the conversion of residential homes to solar power. "In fact, Lubbock and the surrounding regions has probably the highest porcentage of solar capabilities in the United States. There is a chance, with very little design and cost, to get 53 percent of the heat used from natural processes," Hill said.

Most solar powered houses have some sort of backup room without any mechanical heating and cooling system, mainly because of the cost of The passive system refers to putting in a 100 percent solar

**BUY ONE AND GET ONE** 

#### Techsan wins award **Breaking away** living off campus

Michael Cook

Tired of dorm life? Then, you may be considering the big move off campus. More than two-thirds of all Tech students live off campus.

Many live in the "ghetto," a large area of the city between 4th and 34th streets, east of University Ave. The ghetto is characterized by aging houses, overgrown lawns, apartment complexes with exotic names and a high crime rate.

Although the ghetto has its drawbacks, it has several positive aspects, too. The ghetto is packed with students, and you can always tell where the party is by the number of cars parked out front. Also, the ghetto is close. This eliminates the need for commuter stickers and saves a lot of gas.

SEVERAL AREAS are served by free shuttle buses, courtesy of the Student Association. Those nice warm buses make it much easier to crawl out of bed and get to class when the cold winds blow and the frost bites.

Of course there are plenty of other places to make your home in Lubbock. The neighborhood may be quieter, but the rent will probably be higher. So, above all, when choosing a home, keep your budget in mind. Food, gas, and beer get more expensive every day. Don't underestimate your cost

A major consideration for those wanting to live off campus is who to live with. Living alone can be depressing, as well as expensive. Typical symptoms of the "bachelor syndrome" include a) nothing edible in the refrigerator (cooking for one is a pain) b) a huge long distance bill (from calling your friends at UT) and c) a new (appreciative) outlook on dorm

AT TIMES, you'll be kicking yourself for giving up that warm bed and three guaranteed meals a day to face bills, cooking, and cleaning your own bathroom. Cheer up! These are all things that adults must deal with. (My mother told me

And, if you've rounded up a few friends to room with, your life will probably be easier. You can split the rent, divide the food bills, and have big family dinners in the evening. You'll have less space and privacy , but you'll always have a

shoulder to cry on when life gets tough. The drawbacks to the "community life" may strain friendships. Living together can put a great strain on friend's relationships. There will always be someone who forgets to take out the trash, eats like a pig, or listens to Pink Floyd at 3 a.m.

KNOW who you plan to live with. Set basic rules even before you sign the lease. And once you move in together, cooperate. Life flows much smoother when each member of the household lives up to his (or her) responsibilities.

### Lazario's alternative to Sunday 'hungries'

By LAURIE MASSINGILL **UD Staff** 

So what are you hungry for reasonably healthy appetites. don't know what you're the whole thing, leave at least hungry for?

Certainly not just any old thing sittin' on a Ritz or a greasy burger at the nearest The cook has a way with foil. stand. So what are the His creative flair may turn choices?

With the help of a coupon here or there, ones of the best bets is Lazario's, close to the campus at 2411 Main St.

The restaurant is fairly mixed drinks. The bar special small and intimate if you sit in a dark corner. The staff is helpful and courteous, though made of creme de Cacao, a little too enthusiastic at creme de banana, rum and times. Maybe overfirendly might be a better word. No tropical, like guava or a delivery service. Another harm done.

price. Might be great if it was less expensive. The chef is generous with the cheese and makes a good crust. For those of you ordering sausage on your pie, beware. The seasoning has a bit of a black licorice after-taste. A rather unpleasant surprise if you're not expecting it.

### Bench thing of the past for Sanders

By JON MARK BEILUE **UD Sports Writer** 

To the everlasting credit of senior Thad Sanders, the light said. "I just had to accept that physical education major. at the end of the tunnel was not whatever happens will hap- Because of Mom Sanders' against a zone defense too." an oncoming train

The Tech basketball career of Sanders has not been an easy one. Instead of racing up and down the court, an all too familiar position to Sanders has been one of seated in a chair, elbow on knee, head resting on hand, silently watching his teammates perform on the floor.

After seeing extensive playing time as a sophomore in 1977-78, the bench has been all too often Sander's home. Oh, there were appearances against a Northern Montana, a Rice, and an SMU but when the better teams rolled around, Sanders took a back seat.

Until this year. Now the Port Arthur native plays a key role in Gerald Myer's attack. Although he is not a starter, Sanders still sees plenty of action as Tech's sixth man, a role designed to pick up a team when its play sags.

But more importantly to the 6-5 Sanders, the sixth man role means playing time and a feeling of team contribution. Perseverance does pay off.

"Playing is great. People can see what I can do," Sanders said. "I'm helping the team and now I think I can go out on a good note."

Sanders is currently averaging 5.8 points and three rebounds a game while shooting an eye-opening 67 percent. But the most telling statistic is minutes played. Sanders has nearly 300 minutes compared to the 102

"Thad's done a good job this season. He's a versatile athlete who can play the big guard or small forward," said Myers.

"He's really worked on being more aggressive and he's a lot stronger this year." Myers said. "And his selfconfidence, which he lost over the last couple of years, has been regained."

But it has been an inner struggle for Sanders to regain that self-confidence. Confidence is nourished on the court, not on the bench.

pen. I just had to try and help efforts. Sanders didn't trade

the team."

questions like why couldn't I around either. Against somebody a rest."

trade somewhere else.

been for the talks with his mother, he would have against Arkansas," Myers offense and work on playing probably transfered to said. "He got some key the good hard defense." another school.

talked me into staying." Sanders said. "She said why transfer and sit out a year such as fouls or defensive when you can continue your matchups, depend on when schooling here and get your Sanders is sent in but

knew I could play. I just attack. really didn't know why I "Thad is sometimes sent in wasn't playing. My mother just for a change and to get the

New role

jerseys. And when Sanders is "But at times I'd ask sent in, he doesn't stand mups and reporting to the least go in and give Arkansas. Sanders was a he must be mentally following The situation got bad field, including a tip in of a enough to prompt Sanders to missed Tech free throw that think about applying his Arkansas coach Eddie Sutton be guarding and look to see described as one of the best how our offense is working,"

rebounds and played the best "When it got bad my mother all-around game he's ever three trips down the court to

Myers said that factors, sometimes Sanders enters a "My family kept me here. I game to pick up the Raiders' only take the shots that are

Photo by Max Faulkner

Playing regularly is unfamiliar to Thad Sanders, as far as his

collegiate career is concerned. But Tech's 6-5 forward has

abandoned the bench this season to become one of the most

reliable players on the Raider basketball team. Adjusting to

sitting on the bench and playing the role of reserve has not

been an easy task for Sanders, as Jon Mark Beilue explains

in his profile on the Port Arthur native.

"I always said 'hang in told me to keep a good at- team going if we bog down," there,' that there would titude, work hard and keep on Myers said. "Primarily he's always be next year," Sanders hoping," said Sanders, a better against a man-to-man defense, but he will go in

Entering a game is not as easy as removing the warscorer's table. Sanders said perfect five for five from the the game no matter if on the bench or on the court.

"I look over the man I will Sanders said that had it not individual efforts he had seen. said Sanders. "When I get out "Thad's play was excellent on the court I try to initiate our

> Sanders said it takes two or loosen up and get into the flow of the game.

> "It takes awhile to adjust," said Sanders. "When I first go in, I work on playing defense and stopping my man. I'll right for me. I might look at my man and if I can take him one-on-one I'll do it but mainly my role is defense."

Sanders said that starting or substituting made no difference as long as he can help the team and earn some

> Brewster's defensive strategy against Woods was simple.

"I just couldn't let him get Raiders a 48-41 lead.

Tech's Kent Williams soars above Texas A&M players David Britton (30) and Claude Riley (13) as he puts up a shot against the Aggies Monday night at the Municipal Coliseum. Williams scored 12 points in helping the Raiders to a 63-53 win. Tech now stands at 7-4 in Southwest Conference play and 13-8 for the season.

Williams calls win 'sweetest'

By DOUG SIMPSON **UD Sports Writer** 

Kent Williams called Tech's 63-53 win over Texas A&M "the sweetest win of my college career" and made goo-goo eyes with the Southwest Conference Tournament as he talked about how the win will help the Raiders down the stretch of the basketball season.

"We could smell it (the victory) toward the end," Williams said, referring to Tech's stretch of free throws which, essentially, did in the previously-undefeated Aggies. "You could see the smile on my face. We knew we were going to

"This victory means more to me than any of them," Williams added.

Williams, who scored 12 points and contributed five assists to the Raider cause, said the win will definitely help Tech in its remaining games.

"We want to reach our peak here in the second half of the season," Williams said. "Hopefully, this win will help us to reach that level and keep it going into the (SWC) Tour-

But as Williams looked ahead to potentially better things and sweeter victories, Gerald Myers took time to praise the overall effort of the entire Raider squad.

"It was just a great team effort," the Tech coach said. "Our inside people (Ralph Brewster and Ben Hill) played especially well. We started out to stop them on the inside

"I have to compliment Williams and Taylor on their smart play," Myers said. "But I really can't single out anybody. Everybody played well."

"Thad Sanders played as well as anybody out there,"

"We've got some excellent ball-handlers," Williams said. "When we got up by 10 (51-41), we knew we could stall it off. We work on our four-corner offense for situations like this."

Texas A&M coach Shelby Metcalf said Tech deserved to win the game because of its successful game planning and improved inside play.

"They (the Raiders) played better than we did," Metcalf said. "They had a good game plan and stayed with it all night. They were almost perfect from the free-throw line in the second half, and that kept us from catching up."
