Cavazos inaugurated president

By PAM WEIGER

UD Reporter As he was formally inaugurated as Tech's 10th president, Lauro Cavazos was told Tuesday he would probably never again have so much support from all his constituents.

"You will be very popular-for a little while," said Kenneth Ashworth, commissioner of the Coordinating Board, Texas College and University System. "It is inevitable that your popularity will wax and wane with different groups at different times."

Ashworth was the inaugural speaker at the inauguration ceremonies in the Municipal Auditorium. Students, faculty members, and the general public were invited to attend the formal activities.

The installation program began with a procession of delegates from institutions of higher learning, including representatives from Harvard, Princeton and 112 other colleges and

Delegates of learned and professional societies and members of the Tech faculty also joined the procession.

In defining Cavazos' responsibilities to the students of Tech, Ashworth quoted Woodrow Wilson as saying, "The object of a university is to make students as much unlike their parents as possible."

"We must prepare students to harvest crops to fulfill their needs and to live their lives," Ashworth said. "We must make them unlike us if they are to function and survive in the world they will encounter."

Representatives of various facets of the Tech community welcomed Cavazos to Tech.

Gary Hanson, Student Association president, said the tasks ahead of Cavazos were enough to tax any man, but that he could think of no one better suited for the job.

"Cavazos has a certain extra something that makes him the only

man for the job," Hanson said. David Turner, president of the Tech Health Sciences Center Class of 1980, told Cavazos that he felt there was no need to apologize for the school of

medicine, but that there is a great deal of room for progress.

"As medical students, we welcome you at a time rich with opportunity,' Turner said. "From you we need enthusiasm, experienced guidance and encouragement. We are the tools to build this institution. Use us."

Pledging committment, cooperation and communication, Louise Luchsinger, vice president of the Faculty Senate, said the faculty has a positive attitude.

"We do not expect a messiah, but we're glad to have a man of Texas soil," Luchsinger said. "Today we place the heart and soul of Tech in your hands."

Bruce Bartholomew, chairman of the executive committee of the Health Sciences Center Faculty Council, called Tuesday's ceremonies an anniversary. He said the faculty joined with Cavazos in accepting the awesome challenge to envision the future and plan for it.

Arthur Busch, president of the Ex-Students Association, welcomed Cavazos on behalf of the ex-students.

Cavazos was officially installed by Robert Pfluger, chairman of the Tech Board of Regents.

"Your predecessors have left their marks at Texas Tech," Piluger said. "The presidency will offer a continual challenge to you."

Cavazos' response was his first address to the public since coming to

"Inauguration, in one sense, means to enter upon something beneficial, and I think there are many beneficial things in the future of Texas Tech,"

Tech, like most institutions, has past glories, Cavazos said, but past glories are not enough. He said he was attracted to the presidency of Tech by several unusual ingredients for suc-

"Among those factors are people who believe in Tech. Among those are the 23,000 students who have chosen to study here and the more than 75,000 who have earned degrees here," Cavazos said. "We have a solid foundation for excellence."

Cavazos said Tech has been doing some things that are "very right"

repeated his desire to develop school of nursing, allied health, pharmacy and veterinary medicine.

Cavazos said he is not forgetting the importance of other areas of the university.

"We must have strong undergraduate and graduate programs in all areas because these help create and shape what we treasure most-an educated person-a Texas Tech graduate.

A reception was held at the Tech Museum following the inauguration ceremony.

Gaining approval of a controversial \$2.4 million addition to the Music Building will be the main objective of three top Tech administrators when they travel to Austin Thursday to attend a meeting of the Coordinating

President Lauro Cavazos, Dean of Arts and Sciences Lawrence Graves and Vice President for Planning Glenn Barnett will present plans to the Coordinating Board for the addition.

However, strong opposition to the plan is expected from several members of the Coordinating Board. The major reason for not approving the addition appears to be a general feeling by members of the Coordinating Board that Tech is overbuilt, according to Gordon Flack, head of the board's division of campus planning.

Flack said he and many of the board members are against the addition. Flack is not a member of the board, but he reports to the board.

Flack told The University Daily he had statistics that show only 80-85 percent of Tech's classrooms are in use during the busiest times of the day. Flack also said Tech's enrollment is not expected to rise significantly enough to require extra facilities.

Tech's enrollment, he said, has not had a sizeable gain since 1972. Research conducted through Flack's department has shown enrollment should only go up 6.8 percent by 1987.

If approved, the addition would be paid for through tax funds already on hand, but approval from the Coordinating Board is still required.

The Coordinating Board makes funding recommendations to the Legislative Budget Board and the

governor for Texas colleges and universities. The Coordinating Board voted 8-7 in its January meeting to defer a decision on the Music Building until the April meeting.

The vote was a compromise, according to Gordon Flack, the head of the division of campus planning for the

Flack said many members were in favor of voting down the proposal entirely. Flack said after the January meeting that the proposed addition might have a chance to be approved in Barnett would not speculate on the

however, he said the Tech delegation was going to try 'ery hard to gain approval of the addition. The music facilities now include the

addition's chances for approval,

south end of the University Center complex, three wooden buildings and McClellan Hall. Barnett said he planned to emphasize

to the board that existing land and funds would be used for the addition.

"We just want to exchange the temporary building space for the permanent building space," Barnett

Barnett said that savings on heating, cooling and maintenance would eventually balance the cost of the addition.

Music Department chairman Harold Luce described the present music facilities as a "detriment to quality

education." Luce said the facilities are over-

crowded and mar tone quality with their low ceilings and thin walls.

Music department facilities at The University of Texas and North Texas State University, the top two music departments in Texas, each more than double Tech's in size, Luce said.

Judge remains on trial of Iranians, Palestinians

AUSTIN, Texas (AP) - Community resentment against Iran runs so high that a judge could profit politically from presiding over a trial of Iranian students, attorneys argued Tuesday.

But lawyers for 23 Iranians and Palestinians charged with disrupting a public gathering failed in their effort to force County Court-at-Law Judge Jon Wisser off the case.

County Court-at-Law Judge Brock Jones denied the motion to change judges, leaving Wisser in charge of the

The University of Texas students were arrested and charged after a campus speech by Fereydoun Hoveyda, former Iranian ambassador to the United Nations under the deposed shah. was broken up by hecklers on Jan. 31.

Maximum penalty is six months in the county jail, a \$1,000 fine and deportation.

Gary Cohen, a lawyer for some of the students, sought to show that Wisser had pulled courthouse strings in order to have the Middle Easterns students' cases assigned to his court.

But all his questions to witnesses were blocked by objections from Assistant County Attorney Joe Turner, who once yelled, "It's a sad commentary that Mr. Cohen has attempted to embarrass Judge Wisser in this

Jones ruled that Texas legislation and court precedents say a judge must leave a case only if he has a personal or pecuniary interest in the outcome.

David Van Os, another lawyer for the Iranians, said Wisser "knows that a conviction in his court will benefit him personally and politically because of the extreme bias and prejudice that exists in this community toward these students."

He said publicity that might help Wisser win re-election in 1982 and enhance his legal career should be considered a "direct pecuniary in-

Bill Allison, also an attorney for the students, said he received six death threats as a result of taking their case

The students' pre-trial hearing continues Wednesday morning, when Wisser will consider Turner's request for an order compelling the UT student newspaper, the Daily Texan, to turn over unpublished photographs taken at the scene of the Jan. 31 incident.

Texas Editor Beth Frerking has resisted the prosecution's efforts to obtain unpublished pictures. UT attorneys, however, say photographs belong to the university and will be turned over to the county attorney despite the wishes of The Daily Texan to New York, the Red Cross in Geneva will mail the original, hand-written copies to the families, Mrs. Pelizzon

Dr. Bernard Liebeskind returned to Geneva from Tehran carrying the messages he and Harald Schmid de Gruneck, the chief Red Cross official in Iran, received during the nine hours they spent with the hostages inside the embassy compound Monday.

Both men, who are Swiss, reported they were able to speak to "all the hostages," received messages from each one to deliver to families in the United States and made a list of the captives that contains their home addresses. They said this list, along with the messages, would be for-

The Red Cross said the two men agreed, at the request of the militants holding the embassy, not to disclose the number of hostages. The State Department has said 50 Americans are at the embassy and three others at the Iranian Foreign Ministry. Tuesday was their 164th day in captivity. Liebeskind told reporters at Geneva

airport he found the health of the

hostages to be rather good and their food supply sufficient. Schmid de Gruneck, in a telephone interview from Tehran with the Associated Press, said he found "no very grave problem" among any of the

He said he made some recommendations to the militants about improving he conditions of the hostages' detention, but he did not say what the recommendations were.

Barbara Timm of Oak Creek, Wis., whose 20-year-old son, Marine Sgt. Kevin Hermening, is believed to be the youngest hostage, arrived in Paris with her husband, Kenneth, and an attorney, Carl McAfee.

NEWS BRIEFS

Police need warrants to enter houses

WASHINGTON (AP) - The Supreme Court told police officers nationwide Tuesday they cannot enter a person's home to make an arrest without a warrant unless it's an emergency.

By a 6-3 vote, the justices ruled that both the Constitution and the ancient belief that "a man's house is his castle" require such an imposition on police. The court previously had ruled that most often police must have a court warrant before searching a home, but never before had the justices extended

the warrant requirement to arrests. "The Fourth Amendment protects the individual's privacy in a variety of settings. In none is the zone of privacy more clearly defined than when bounded by the unambiguous physical dimensions of an individual's home," Justice John Paul Stevens wrote for the court

Kennedy campaign on upswing

PHILADELPHIA (AP) - Sen. Edward Kennedy plunged back into the Pennsylvania campaign onn the upswing Tuesday, with an endorsement from Philadelphia Mayor William Green and a concession from the Carter camp that Kennedy could well capture the state's April 22 presidential primary.

The good news for Kennedy started on his arrival from Washington at Philadelphia International Airport. He was met by Green, an old friend, who announced he was supporting the Massachusetts senator's candidacy.

"I believe it is possible for him to win in Pennsylvania," said the mayor, the second of a large American city to endorse Kennedy over President Carter. Jane Byrne of Chicago was the first, but that didn't stop the president from winning a majority of delegates in that state's March 18 primary.

The Kennedy-Green friendship goes back to 1960 when the mayor's father and city Democratic boss, the late William Green Jr., delivered a stunning plurality of 330,000 votes and 64 convention delegates to help John F. Kennedy win the

Groups place in University Sing

Saddle Tramps won a first place award for best single performance, and Alpha Tau Omega with Chi Omega won the top award for group performance in the University Sing, at the Lubbock Municipal Auditorium Saturday.

Gamma Phi Beta was second in singles competition while Pi Beta Phi with Sigma Phi Epsilon was first runner-up in the group competition.

Judges for the event were Kyung Wook Shin, currently a voice teacher at Tech and former winner of the Korean National Music Contest; Charles E. Cox, associate professor of music at Lubbock Christian College; and William Hartwell, voice teacher and director of the Women's Swing Chorus at Tech.

STOCKS

NEW YORK (AP) — The stock market declined slightly today in a listless session on Wall Street.

Trading remained quiet.

The government reported today that industrial production dropped 0.8 percent last month, on the heels of a downward-revised 0.2 percent decline in February. The Dow Jones average of 30 industrials slipped 1.54 to 783.36.

Declines outnumbered advances by a 5-4 margin on the New York Stock

Big Board volume totaled 26.67 million shares, against 23.06 million Monday.

The NYSE's composite index lost .14 to 58.28. At the American Stock Exchange, the market value index was off 1.11 at

Living on love expensive

IRS even taxes love letters

Russell Baker

(c) 1980 N.Y. Times News Service

A few years ago a writer I know named Earl got into the business of writing love letters. He wrote the first one for his plumber in return for having his bathtub drain unplugged.

"What do I owe you?" Earl asked the plumber.

"TELL YOU WHAT." said the plumber. "You're one of those writer people, right?"

Sure enough. "Well," said the plumber, "not much use you paying me money because the tax people just take it all anyhow. How'd you like to write a letter to somebody for me, and we'll call it quits."

So Earl wrote a steamy epistle to a certain Louise, to which the plumber signed his name. It was so effective that Louise was soon snuggled happily in the plumber's arms. The plumber told a lovesick electrician about it, and pretty soon Earl was getting his house rewired in return for a dozen letters to a widow named Caroline.

THESE WERE so successful that the electrician invited Earl to the wedding. Earl's reputation expanded. A grocery executive traded him three months' worth of food for a series of letters to a married woman that peeled the scales from her eyes and made her abandon connubial routine for bliss with the grocery tycoon.

In a year or so Earl was so busy writing love letters for dentists, headwaiters, landlords, haberdashers and surgeons in return for bridgework, six-course dinners, shelter, clothing and gall-bladder removal that he abandoned work on the great American novel, which wasn't panning out anyhow and which, if it did, would be more of a bonanza to the Internal Revenue people than it would to Earl.

By bartering love letters for life's wherewithal, Earl was living not quite like a king, but at least like an expenseaccount executive, which is to say that the tax people were not laying a glove

NATURALLY, the tax authorities did not take it well. They hate seeing anybody not suffering, especially people, like Earl, who don't even have a friend on the Senate Finance Committee. "Get him in here and make him sweat," was the word that went out.

"Earl," the chief sweat inducer told him, "you haven't been playing fair with Uncle Sam. How are we going to keep the Washington Monument elevator oiled if Americans don't come across with the grease on April 15?"

Earl observed that since he had no grease coming in, he had none to kick back to Uncle Sam.

" YOU'RE SPENDING mighty free," the man said, "what with eating all these six-course dinners, repairing your bridgework and having high-class surgeons monkey around with your gall bladder."

"But I don't have money to pay for all that," said Earl.

"Oh?" said the inquisitor. "I PAY FOR it all with love letters,"

said Earl.

"Don't try to flummox me, you swindler," said the man.

"I'll show you," said Earl, and dashed off a love letter, which he handed to the tax man. "Now you just send that to some nice lady who's been treating you like dirt and sign your name at the bottom, and see what happens."

THE TAX MAN DID. The next week he skipped to Venice with his boss's wife. All of Taxland was scandalized. "Since Earl is using these love letter

as currency," said the outraged tax boss, "maybe we can nail him on a charge of counterfeiting." Cooler heads prevailed.

"Earl," said a cool-headed tax man when they had Earl pinned in the

chair, "how many of these love letters have you written in the past year?"

"ABOUT 20,000," said Earl. "Well, old buddy, the news is, you owe the U.S. government 40 percent of that figure, plus fine and penalties, which-let's see-come to 15,631 love

"That's a lot of love letters." said Earl. "I'll do my best for the senators, but by the time I get the lower-drawer bureaucrats I can't guarantee bliss every time."

"THOSE WHO live by the love letter," said the tax man, "shall be taxed by the love letter."

Earl sits home in poverty now struggling day and night to pay his back love letters to the government. I went by the other night to ask him to write one for me, but he doesn't have time now to work for anybody but the government. While I was there Rosalynn Carter came on television to tell a crowd that Jiommy couldn't be there but wanted them to know he loved them all.

"Is that from one of the letters you wrote for the president?" I asked.

"Pretty thin stuff, isn't it?" said Earl. "But with this inflation, what can they expect?"

Anderson's chance could end in Pennsylvania

Tom Wicker

Just before the Illinois primary, I wrote that probably nothing would alter the prospect that "next November American voters will have to choose between Jimmy Carter and Ronald Reagan for President of the United States." So far, nothing has.

That earlier article suggested that the most likely-but still remotepossibility would bew for Rep. John Anderson to "somehow reshape the

Republican party" enough to win its nomination; that hasn't and obviously won't happen, Meanwhile, however, the reprieve granted Sen. Edward Kennedy in New York and Connecticut has raised another possible-but remotealternative to a Carter-Reagan match.

ANDERSON'S FAILURE to win in either Illinois or Wisconsin-crossover states where he conceded he had his best opportunities—appears fatal to his hopes for the Republican nomination. Democrats and independents did not flock to his cause in expected numbers; instead, they supported Ronald Reagan

sufficiently to discredit Anderson's contention that Reagan cannot win in November.

Now Anderson is reduced to forlorn hopes, such as attracting a big write-in vote in Pennsylvania, where he is not on the ballot, and getting thousands of Democrats to register in the California can party in order to vote for him. Nor is there much likelihood that he can provide a third-party alternative.

A Gallup poll found that 21 percent of its respondents would support Anderson on a third-party ticket. But the extent to which Congress and the state

legislatures have worked to rule out third-party candidacies discourages even the idea of one.

IT IS ALREADY too late, for example, for such a party to get on the ballot in Maryland, Ohio and New Mexico—which cast 38 electoral votes. No new party ever could have got on the ballot in Michigan (21 electoral votes), since that state permits no such democratic procedure. At least 10 other states make it exceptionally difficult to gain ballot status.

Worse, where would Anderson get the money to make a credible third-party

challenge? The 1974 campaign reform act went far to build in the two major parties as "official" parties by denying federal subsidy to any others during a campaign. Yet, a non-major party candidate would have to abide by the \$10,000 limit the act imposed on individual contributions. That would make it impossible for him or her to equal or even come near the \$29 million federal subsidy each of the major party candidates will receive.

Under the act, private citizens could contribute up to \$20,000 to a new party, rather than to a candidate; but to qualify for this privilege, such a party would have to select delegates, hold a convewntion and nominate candidates, a cumbersome procedure that would only burden Anderson with more organization problems, while yielding him no federal subsidy. Of course, if he got as much as five percent of the national vote, he would qualify for partial federal reimbursement of his expenses-but next year, too late to buy TV time for his campaign.

THESE INDEFENSIBLE restrictions on third parties and independents probably would rule out an Anderson challenge to the two majors even if he could be sure he wouldn't be helping elect Reagan. Thus, the slim possibility that Sen. Kennedy might yet unhorse Carter now seems the only hope for those repelled by a Reagan-Carter choice-if, indeed, they would not be just as repelled by a Reagan-Kennedy match.

Carter's big victory in Wisconsin seems to refute what had appeared possible after New York-that the tide

might finally have turned against the president. Still, Wisconsin's crossover rules and maverick tradition, as well as Pennsylvania's proximity to New York, make it imprudent to rule out that possibility just yet.

It seems likely, moreover, that Carter influenced Wisconsin voting substantially with the last-minute flurry of hope he stirred for the release of the American hostages by Iran. It will not be easy for him to do so again; and if the Iranians dash the public's hopes once more, the president might pay a severe political price for having so often marched up the hill, only to come tumbling down again.

PENNSYLVANIANS dependent on the steel industry are said to be upset with Carter for not doing more to protect it from competition. Cuts in federal spending for social programs will hurt Philadelphia and other aging Pennsylvania cities. Kennedy's emphasis on the Carter administration's economic failures should find an audience in this heavily unionized, old-

line industrial state.

His campaigning is more polished these days, he has been drawing large crowds, he has three weeks to make his case, and he has adequate if not lavish finances, plus labor support. On primary day, April 22, he and Carter will confront each other among Dewmocrats only, with no one to siphon crossover votes from either. Kennedy will have no chance more promisingwhich is why he can expect Carter and his campaign lieutenants to mobilize all their power to finish him off in Pennsylvania.

NO, NO, IT'S

Letters:

Radio woes

To the Editor:

"...And it's one-two-three strikes you're out, at the oldball-game." Player strike or not, the

major league baseball season got under way last week. Fans all over the country anxiously awaited the customary throwing out of the first ball and the cry "Play Ball!."

Of course, without a major league club in Lubbock, those of us who follow the game depend on radio coverage to follow the action.

In the past, the play-by-play of the Texas Rangers has been broadcast locally by KFYO-AM (790 KHz). But that's the past. This year KFYO has dropped the Rangers' schedule. Lubbock and the surrounding area, no less than one-quarter of a million people, are left without a major league version of the national pastime.

The thought of a spring without baseball is about as welcome as a year of Lubbock dust storms. The program manager at

KFYO suggested that fans of the Rangers could now listen to the team on either KGNC-AM (710 KHz) in Amarillo or WOAI-AM (1200 KHz) in San Antonio.

Both stations, he assured me, were easily picked up in Lubbock. I was later disappointed to find the signal of these stations, even on a quite capable receiver, was weak at

Thursday night, I struggled to hear the Rangers win an exciting extra-innings affair with the Yankees. Only later did I find out that the game winning play came on a wild pitch. I can't survive a year of

In essence, baseball fans of the world, unite! Throw off the notion that Lubbock radio can't handle the major leagues.

Call or write KFYO and the Texas Rangers Radio Network in Arlington. Show them the great demand for baseball that

exists in Lubbock. With enough support, another Lubbock station will decide to pick up the Rangers' schedule.

Congratulations also on Tech's baseball victories over Baylor this weekend. Keep it up all the way to the SWC Tour-

Sport, leisure course offered

The Department of Health, Physical Education and Recreation at Texas Tech University will offer a course in international sport & leisure for the fall 1980 semester.

Drs. Bob A. Mechikoff and Jeff A. Stuyt will conduct the course which has been designed for a team teaching approach.

A specialist in sports sociology, Mechikoff will teach the sport section. Stuyt, a specialist in the field of recreation, will teach the international leisure section.

Surgeon to speak on Hispanics

Dr. Ray Santos, a local orthopedic surgeon, will speak today about "The Role of the Mexican-American in the 1980's" as a part of the Mexican Awareness Week.

Santos will lecture at 7 p.m. in the Coronado Room in the University Center, as Mexican Awareness Week enters its third day. The program, sponsored by United Mexican-American Students, will continue until Friday.

Wednesday, April 16 Dr. Ray Santos M.D., Speaker 7:00-9:00 p.m. Orthopedic Surgeon "The Role of the Mexican American in the 80's" Coronado Room, University Center

ASAE president installed

Norman T. Moore of Lubbock was installed recently as the 1980-81 president of the Texas Tech University student branch of the American Society of Agricultural Engineers (ASAE).

Installation of new officers took place at a spring awards banquet honoring students majoring in agricultural engineering. Max Slaughter of Toastmasters International was the speaker.

Marvin J. Dvoracek, chairman of the Department of Agricultural Engineering, presented the awards.

Texas Beta Chapter of Alpha Epsilon, national agricultural engineering honor society, recognized five students for having the highest grade point averages in their classes. Recognized were: Douglas P. Landers, 1420 Blossom Ave., Redlands, Calif., freshman; Susie McCurry, Cypress, sophomore; and Charles E. Gamio, 9 Calle Poniente, San Salvador, El Salvador, junior.

Senior students with the highest grade point average in each curricula of the department were presented plaques. Recipients were Billy M. Vannoy, Hope, Ark., mechanized agriculture, and James H. Waller, Albany, agricultural Professor C. E . Teske of the system," Teske said.

Scientists turn to DNA for understanding of cancer causes

was The

the iper The said a ate the tral

and ent ern-s a tics

NEW YORK - In seeking to understand why some substances cause cancer and what can be done about it, scientists are turning more and more to the DNA, the body's ultimate genetic material.

DNA (deoxyribonucleic acid) contains the chemical messages of heredity that tell every living cell what it can do and what its progeny can become. Active forms of cancercausing substances actually bind to the DNA and distort it, a subversion that evidently can lead to permanent and deadly changes in the most basic regulation of life.

NEW RESEARCH on the details of this subversion suggest tests to tell, long before cancer could develop, whether a person has actually been harmed by exposure to a cancercausing substance, or carcinogen. Other tests may permit the drawing of a profile of a person's inherent risk of harm from some of the most widespread cancer-causing substances known.

Roughly 25 to 30 substances are proven carcinogens in humans, but the list is bewilderingly diverse, including natural and synthetic chemicals, hormones, metals, asbestos and aflatoxin, a fungus product.

Despite the confusing diversity, there is a unifying principle among a broad category of the chemical causes of cancer. Many of these substances are inactive in their natural form and start the cancer process only after they are converted within the body into highly reactive forms. The forms bind to the DNA and distort it.

The binding mechanism, originally discovered by Drs. Elizabeth and James Miller of the University of Wisconsin about 25 years ago, has become a virtual axiom of cancer research. Some substances are thought to act directly on DNA or a related nucleic acid or some key cell protein. Many others act through the highly reactive metabolites produced

"...we are beginning to think

of DNA in a dynamic sense..."

in the body's efforts to render the original chemical easy to

Carcinogenesis, the process by which cancer originates, could be thought of as the effects of a natural protective process going astray.

The specific sites and configurations of the chemical binding to the double helix of DNA seem to vary from substance to substance among those that produce cancers.

What happens after the binding has taken place is a puzzle under attack at many laboratories. In general, the presence of the foreign material distorting the DNA is believed to lead to errors in the replication that genetic material must undergo to provide genetic instructions for each new generation

"We are beginning to think of DNA in a more dynamic sense than in the past," said Dr. I. Bernard Weinstein of Columbia University's Institute for Cancer Research during a recent symposium.

He and colleagues at Columbia and the National Cancer Institute have recently produced antibodies that well detect the difference between normal DNA and DNA that has been deformed by a metabolic procduct of benzo(a)pyrene, a cancer-causing substance present in tobacco smoke, automobile exhaust and other sources of environmental pollution. The chemical is a prime example of a huge class of substances called polycyclic hydrocarbons.

"THIS TECHNIQUE is providing a valuable tool for studies on the interaction of carcinogens and DNA," the research group said in a recent report in the scientific journal, Cancer Research. "It also provides a novel approach to monitoring a biological consequence of human exposure to specific chemical carcinogens through assay of DNA from cells and from tissues of exposed individuals."

The active form of benzo(a)pyrene usually binds to a chemical subunit called guanine in the DNA, a fact that took on possible new significance last year with a discovery by Dr. Alexander Rich's research group at the Massachusetts Institute of Technology. The found that the helix of DNA, long thought to have an exclusively right-handed twist, sometimes takes a left-handed form.

When the DNA is twisted to the left, the guanine units are more exposed and therefore more accessible to attack by some carcinogens. Rich suggested that this form of DNA may facilitate binding by the cancer-causing substance.

A group led by Dr. Harry V. Gelboin, chief of the National Cancer Institute's laboratory of molecular carcinogenesis, has worked out in great detail the steps that lead to the activation of benzo(a)pyrene into a highly reactive form called a diolepoxide.

At least four groups of enzymes are involved, he said in a recent interview. In the enzymes' efforts to dispose of this foreign chemical, metabolic pathways can lead to any of at lest 40 different chemical variants on the original.

Of these variants, the diolepoxide has been shown by collaborators at the Weizmann Institute in Israel to be

several thousand times more potent in causing mutations than any of the others, Gelboin said. Cells that cause mutations are often capable of causing cancer and tests of mutagenicity are used to gauge the cancer potential of suspect chemicals.

"It all hangs together," Gelboin said of the diolepoxide. "It is the most mutagenic. It is the one found in DNA. We have been able to elucidate the enzymatic mechanisms by which it is formed."

THE ENZYMES can be found in many tissues, including blood. Studies have shown individual variations in the pattern of these related enzymes. The studies have suggested a new kind of biochemical profile as a gauge of cancer risk. By knowing the specific chemical pathway that leads to the dangerous diolepoxide, scientists might test human cells to draw a personal enzymatic profile showing whether or not the individual was likely to transform benzo(a)pyrene into a harmless excretable substance or into the form that binds to and distorts DNA.

There are wide variations in the speed with which indivisuals break down drugs. Perhaps there may also be individual variations in chemical procissing of chemicals such as benzo(a)pyrene.

"If you have 1,000 people who smoke a pack of cigarettes a day for 30 years," Gelboin said, "20 percent will probably develop lung cancer."

Could enzyme profiles pick out the people who face the greatest risk? This has been tried, without success, using the same general group of enzymes as a whole. Now that it appears possible to sort them out, distinguishing the potentially dangerous from the harmless chemical pathways, such profiling seems much more likely to succeed.

The body has other enzymatic systems devoted to repairing faulty DNA. Special enzymes recognize the errors, ship them out of the long twisted strand of the genetic material. Then other enzymes put the strand back together again after the right chemical sequence has filled the gap.

A rare disease called xeroderma pigmentosum, in which early death from skin cancer is common, has been explained by faults in the patient's natural ability to repair DNA after exposure of the skin to sunlight has damaged it.

THE BODY is by no means defenseless against carcinogens, whether they be chemical substances, radiations such as X-ray or sunlight, or some viruses, which probably act directly to insert their own specific subversive messages into the DNA. While some viruses are strongly suspected of causing certain cancers in humans, the evidence remains just short of conclusive proof.

Some viruses have been proven to cause cancers in animals. A key difference between a chemically induced cancer and one caused by a virus is that the latter tend to be uniform while those caused by chemicals are much more variable. It seems to be a difference between subversion of the DNA by a specific viral message and random damage by

Dr. Daniel Nathans, the Nobel Prize winnder from Johns

"...20 percent of 1,000 people who smoke a pack of cigarettes a day for 30 years will develop lung cancer..."

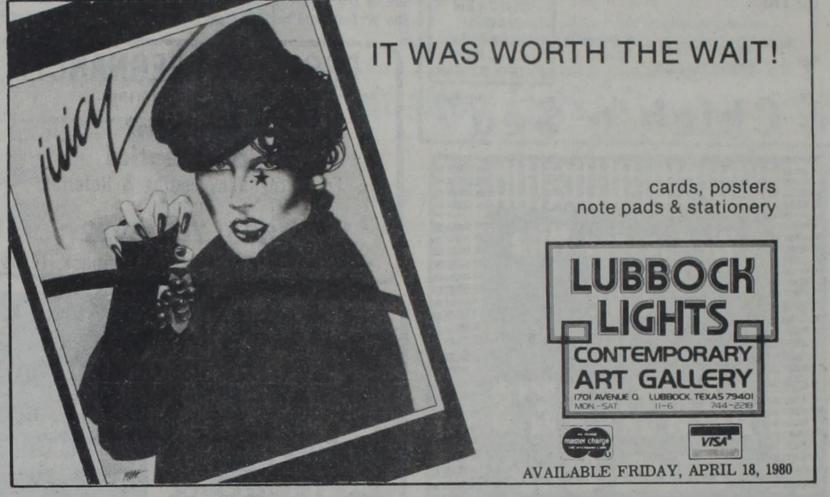

Hopkins, is directing a research team that has found a genetic speedup-slowdown switch in a much studied cancer virus called SV-40. The discovery is expected to help scientists understand carcinogenesis through clues to the basic controls over cellular growth.

While the body has its own defenses, cancer too has multiple weapons. There is a distinct group of other substances that act as cancer promoters, not causing irreversible changes at the start, but producing an environment within tissues that seems to promote carcinogenesis.

A current theory gaining considerable support among scientists is that the mutations, or changes in the DNA, that lead to cancer do so less by direct action than by upsetting the stability of the body's complex plan of cellular differentiation. This would help explain the fact that cancer often takes decades to develop.

Cellular differentiation is the developmental process that makes it possible for a single fertilized egg cell to divide, redivide and proliferate to form the almost incalculable billions of specialized cells that constitute a fully developed adult animal or human being

The worldwide search for an understanding of carcinogenesis, therefore, has implications even beyond the crucial one of coping with a major cause of human tragedy and death. Within the tangled skein of the cancer process and the body's defenses against it, lie insights into the very nature and organization of life.

Farmers face risk of cancer

IOWA CITY, Iowa (AP) -The death rate for Iowa farmers from six kinds of cancer is much higher than for nonfarmers, indicating the "healthy farm life has its cancer risks," a university research team reported Tuesday.

The University of Iowa researchers said, however, that the overall cancer death rate for Iowa farmers was lower than for non-farmers because farmers do not contract fatal smokingrelated cancers as often.

The study, based on death certificates of 20,311 white Iowa men from 1971 to 1978, found farmers were more likely to die from leukemia and prostatic, lip, stomach, bone marrow and lymphatic cancers than were nonfarmers.

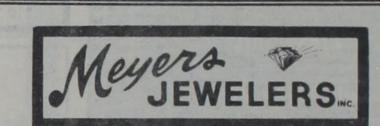

The researcher said the team felt the cancer rates that were most prevalent among Iowa farmers were occupationally oriented. Burmeister said farmers might be more susceptible to certain kinds of cancer because of animal viruses, farm chemicals and dust from hay

SMU tramples men netters...

SMU entered its encounter with Tech Tuesday afternoon ranked 14th in the nation, and the Mustangs did nothing to harm that ranking as they defeated the Raiders 8-1 in a Southwest Conference match on the Tech courts.

The loss leaves Mark Hamilton's Raiders with a 1-6 SWC record, a 12-15 spring mark, and an 18-15 overall slate. Tech hosts Hardin-Simmons at 2 p.m. Thursday and New Mexico Military Institute Saturday in its final tuneup before the SWC Tournament, scheduled for April 24-26 in Corpus Christi.

Pat Rea was the only Raider to notch a victory against the powerful Mustangs. The Seabrook (Clear Lake) freshman defeated SMU's Roman Kupchynsky 6-3, 7-6 as the Ponies took five of six matches from the Techsans.

Also in singles, Jai DiLouie of SMU downed Chow Wah 6-1, 6-0; Drew Gitlin overcame Jose Rivera 6-3, 6-0; Jeff Turpin downed Jeff Bramlett 6-3, 6-3; Tom Cain defeated Zahid Maniya 6-2, 6-2; and Eric Van't-Hof beat Mark Thompson 7-5,

In doubles, DiLouie-Cain defeated Bramlett-Wah 7-5, 6-3; Gitlin-Turpin downed Maniya-Thompson 6-2, 6-2; and Van't-Hof-Jakes Jordan overcame Davis-Rivera 6-0, 6-4.

Thurman says theft only prank HAWTHORNE, Calif. (AP)

- Dallas Cowboys defensive back Dennis Thurman has convinced police that a bank stickup he was arrested for Monday night was a prank, and officers said Tuesday they won't press charges. The two-time All-American

football star from USC jokingly handed a Bank of America teller a note saying, "I have a gun and I will use it," police spokesman Tom Quintana said. Thurman told police he

"just got a little bored" while waiting for a friend to cash a check at the bank around 1:30 p.m Monday. Quintana said when Thurman handed the teller the note, he "asked her what she

would do if someone handed her a note like this." The note read: "Dear teller, this is a stickup. Please don't make any false moves or noise. I have a gun and I will

Another employee saw what was happening and stepped on a silent alarm.

use it. Signed, Robber."

Decide conflict at Olympics

John Eubanks

Now that the United States Olympic Committee (USOC) has voted not to send a team to the 1980 Olympics in Moscow, the next step is to convince other nations not to attend.

The American boycott will have much more impact if other countries, particularly West Germany, Japan, Great Britain and France also boycott the Olympics.

In an interview last weekend on a special broadcast by the Public Television System (PBS), Olympian historian Bud Greenspan said that if America boycotts the Olympics without the support of other major countries, the propaganda by Russia against the United States could be worse than if American athletes attend even while the situation in Afghanistan continues.

Before the decision to boycott was made, USOC treasurer William Simon said he had no doubt that the NATO countries. plus France and Japan, would follow an American decision to boycott.

Those countries are now considering the issue.

Prior to the USOC's decision, several American athletes proposed that the U.S. team could boycott certain events at Moscow, such as the opening ceremonies and the awarding

Greenspan said, "Russia is praying that the United States doesn't go because it can't handle the types of demonstrations presented at the Olympics."

Many critics to the overall boycott have said demonstrations at the Olympics may have as much or more effect than an overall boycott.

The critics pointed out that the most memorable event of the 1968 Mexico City Olympics was the raising of fists on the award stand by Tommie Smith and John Carlos in support of the black movement in America. (Let's not forget Bob Beamon's spectacular effort in the long jump).

But the Carter Administration has refused any alternative boycotts. Prior to the USOC decision, Carter threatened legal action to prevent American athletes from participating in the Olympics.

On the other hand, American athletes have considered legal action themselves. The athletes contend neither the USOC or the Carter Administration has the right to prevent them from competing. Peter Schnugg, a member of the United States Water Polo

team, gave his comments concerning possible legal action by the American athletes during the PBS presentation.

Asked if he would join such a group, Schnugg said he would consider it, depending on several situations.

Schnugg pointed out that he would be hard pressed to go against the USOC's decision to boycott because the committee has helped improve the quality of the polo team.

He said the water polo team was ranked 15th in the world a

few years ago, and is now the second best in the world.

Schnugg said he has waited eight years to attend the Olympics and would hate to pass up this chance. But he said the Olympic situation is now an issue of politics and foreign policy - areas Schnugg said he doesn't understand.

"I'm an athlete, and I don't attach political policies to the Olympics," he said.

But from what he has seen of the politics involved in the situation, he is not impressed.

"I resent methods by which the administration has coerced and pressured the USOC," Schnugg said. "I'm not impressed by political techniques but that's the way it works. I wish people's ethics were a little stronger."

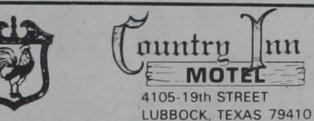

The decision to boycott will apparently not be reversed, even if Russia pulls out of Afghanistan before May 24, the date to accept invitations from the Moscow Olympics.

The question of having alternative games has been brought up, but many of the USOC delegates last weekend unofficially rejected any thought of alternative games.

As the situation stands now, America must wait to see what other countries decide. And, you know, it will be a shame if the Olympics become a watered-down track meet.

Wouldn't it be nice if world conflicts could be straightened out in Olympic competition instead of the decision whether to participate in the Olympics being decided on by world con-

But I'm not that naive. I just believe that the American athletes would be so pumped up about going to Moscow that they would beat the pants off every country. Including Russia.

Recreational Sports

Playoff field narrowed to 16

Sixteen men's intramural softball teams remain in con- Advance and The Stuff. At 7 p.m. Thursday, Knapp and TBE tention for the all-university championship, which will take place at 5:30 p.m. Sunday on one of the recreational fields adjacent to Stangel-Murdough.

The women's softball championship will be decided at 4 p.m. Sunday, and the co-rec champ will be determined at

Eight teams remain in contention in the women's division. On Thursday, the field will be narrowed to four and then to only two, as six quarterfinal and semifinal contests narrow the number of survivors.

DG and Chitwood will square off at 6 p.m., as will Campus

IM Top 10

MEN'S SOFTBALL

- 1. Exodus 2. Wells Zoo
- 3. Clement Orange Crush
- 4. Missing Pub
- 5. Weymouth Monkees
- 6. Project X 7. Phi Delts "A"
- SPE (tie) 8. Meat Packers
- 9. ATO "A" Pikes "A"
- 10. Tekes I Pikes "B" (tie) Texas Tokers (tie)

WOMEN'S SOFTBALL

- 1. Hot Dogs
- 2. Knapp
- 3. Delta Gamma
- 4. FNTC
- Chitwood (tie) 5. TBS
- Campus Advance (tie)

CO-REC SOFTBALL

- 1. Betas-Sisters 2. S-M Special
- 3. Shut Up 4. ASM
- 5. Tokers-Zaps

and the Hot Dogs and KAT will collide. The two semifinal games will take place at 7 p.m. also.

The co-rec playoff field was also pared to eight teams Tuesday night. The clubs will square off in four games at 5 p.m. tonight. The co-rec semifinals are slated for 6 p.m.

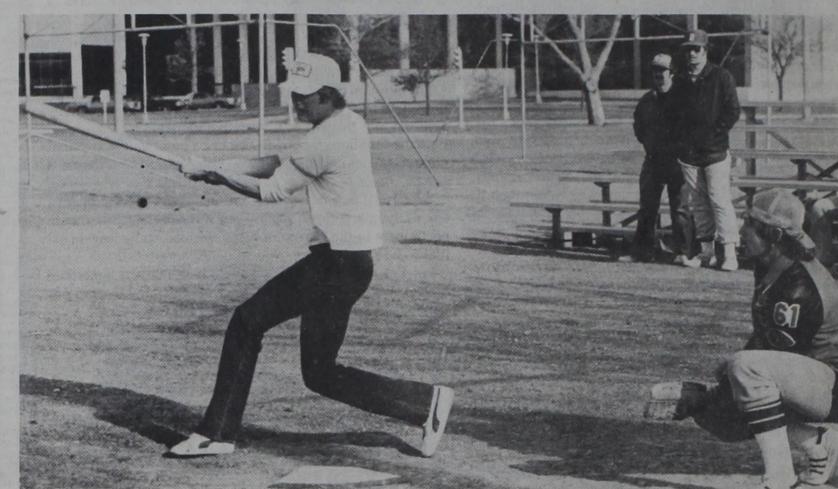

Four teams remain in contention for the championship of the men's club division. In Tuesday night's club division action, AEPi squared off against Teke I, SPE battled Entomology, Double T competed against IEEE "A", and Campus Advance played ASCE. The four survivors will collide at 6 tonight.

In Tuesday night's residence hall division action, Clement Orange Crush played Sneed Silver Streak, Murdough Machine squared off against the Gord Trolls, Murdough Draw Brothers battled the Weymouth Monkees, and Wells Zoo squared off against the Red Lighters. The four winners play at 6 p.m. today.

In the men's open division, four teams remain in contention for the all-university finals. Tuesday night, JKV played FSCS, Exodus battled Big Sticks, Goodnuff faced Bad Co., and Missing Pub met the Texas Tokers. The winners play at

The championships of the individual men's divisions (Greek, club, open, and residence hall) will be decided Thursday. The Greek champ will play the club winner at 7:30 p.m. Friday, and the residence hall victor will square off against the open winner, also at 7:30 p.m. Friday.

The campus community all-university championship will be decided April 26.

Home run

Kevin Robinson of the Murdough Swamp Gators cracked a home run on this particular play as his team battled Sneed Silver Streak in recent intramural softball playoff action. John McDowell (catching) watches the action. A full slate of

playoff games are on tap for this week. IM softball will culminate Sunday with the men's and women's all-university championships.

Scoring position

Steven Sims of Sneed Silver Streak gets ready to run in action Both teams hope to compete in this Sunday's all-university during last weekend's intramural softball playoffs. Keith title game. SATURDAY LIVE

This week's Saturday Live program will feature a singles racquetball tournament and a singles handball tourney. Both events will take place this Saturday morning on the outdoor handball courts.

All students, faculty, and staff are eligible to enter. Entries must be turned in by 5 p.m. Thursday in the Rec Sports

CYCLING INFO

Radio station KSEL will sponsor a program of bicycle races on April 27. Entry fee will be \$1, and entry blanks may be picked up at KSEL, Mr. Burger, Hutchinson's Cycles, and the Rec Sports Office.

The races will take place in the Canyon Lakes area. There will be junior, women's veterans (over 35), and senior (18-35) divisions. Registration will begin at 11:30 a.m., and the races start at 1:30 p.m.

Derrick Wade captured first place in the licensed riders division recently in a bicycling criterium sponsored by the Tech cycling team. Jerry Anderson placed second among licensed riders, and Tom Hutchinson earned third. Lee Williams, Jack Ragzor, and Ross Meyer took first, second, and third, respectively, in the unlicensed riders division. Another cycling criterium will be held at 6 tonight in the

Tech Museum parking lot. CANOE TRIP

A canoe trip down the Concho River, located near Sar Angelo, is being planned for this weekend by Rec Sports. The group will leave Saturday morning and return and Sunday night. The cost is \$17.50. A mandatory pre-outing will be held tonight.

TENNIS LESSONS

Rec Sports will sponsor intermediate-advanced tennis lessons beginning Monday and continuing through April 24. Flying leap Each class will begin at 6 p.m. Mamie Bevers, former varsity player, will be the instructor.

COMING SOON

Entries are due by 5 p.m. today for putt-putt singles and women's fast-pitch softball. Entries are due Thursday for men's fast-pitch softball.
