Mother visits captive son

Rv The Associated Press

in the first visit by a relative of any of the American hostages in Iran, a Wisconsin mother said she hugged and kissed her son Monday during a "small miracle" that brought a reunion inside the U.S. Embassy in Tehran.

Barbara Timm of Oak Creek, Wis., told reporters in Tehran after a five-hour stay in the embassy she held her son's hand the entire 45 minutes they were together, she found him in excellent health and he told her he was "a stronger person" as a result of his 170 days in captivity.

She said her son, Marine Sgt. Kevin Hermening, told her he and several other hostages spend much of their time reading and playing cards. Hermening, 20, is the youngest of the 50 hostages.

The visit came as Iran experienced its fourth day of campus disturbances over the ruling Revolutionary Council's order last week closing political party headquarters on universities and purging anti-Islamic elements. Iran closed the universities until Tuesday in a move to halt the violence, which Tehran Radio said left 150 persons injured Monday at the University of Tehran.

The radio said the council met Monday night to consider the violence. Witnesses said one person was killed and many were injured during the weekend.

In an address to his student followers, broadcast by Tehran Radio, Ayatollah Ruhollah Khomeini said, "We expect our university youth not to help those who plan to impose economic sanctions against us, or claim to impose an economic boycott on us."

"We are not afraid of economic sanctions, we are not afraid of military intervention," Khomeini said. "What frightens us is cultural dependence. We are afraid of a colonial university."

Iranian President Abolhassan Bani-Sadr said, "Any assembly or the instigation of violence inside or outside the universities will be considered counter-revolutionary acts," te official Iranian news agency Pars reported.

"Any gathering or attack on political centers outside the universities will be regarded as a plot against the revolutionary government," Pars quoted the Iranian president as saying in a statement.

Mrs. Timm and her husband, Kenneth, arrived Saturday after President Carter's announcement last Thursday that no Americans except journalists would be permitted to travel to Iran. The

State Department made no effort to prevent the Timms from making the trip, and spokesman Hodding Carter said Monday the Timms would not be prosecuted because their trip came before the travel ban went into effect. Mrs. Timm's husband, step-father of her son, was not allowed by militants holding the embassy to join in the meeting, she said. Militants and a Iranian television crew accompanied her, she told the Tehran news conference

Southern Colorado University

Techsan presidential a candidate

By CARMONN McCAIN

UD Reporter
Dr. John Buesseler, professor of ophthalmology at Tech, has been selected as one of six candidates for the presidency of the University of Southern Colorado at Pueblo.

"In a phone conversation with the university, I was notified I was one of six candidates being evaluated for the presidency. Originally, there were 175-200 candidates for the position," Buesseler said.

Buesseler left Lubbock yesterday to visit the campus.

He described the university as relatively new school that began in the 1930s as a small college and now has been incorporated into the Colorado State University system.

Buesseler said many aspects of the university attracted him to it. "First, it's in the Southwest and secondly, it's a new school with innovative ideas in education. They are emphasizing many goals for the 1980s in the allied sciences," he said.

He stressed the growth of the allied sciences field academically and vocationally.

"The allied sciences field is growing with leaps and bounds both in academia and in careers, especially the applied sciences and technology. They have a strong engineering program there and this is attractive to me since I have been involved in it," Buesseler said.

Buesseler received his doctorate and

Buesseler received his doctorate and his medical degree from the University of Wisconsin in Madison He has been honored by the Tech Board of Regents as a distinguished and multi-disciplinary professor. He also is the recipient of a Regents' resolution of congratulations as well as a certificate of citation from the Texas House of Representatives.

He has served in numerous administrative positions during his career, including founding dean of the Tech Medical School.

As the first full-time employee of the med school, Buesseler planned, programmed and organized the management structure and staffed the med school so that it was operational with freshman and junior classes of medical students enrolled within 23 months after his arrival.

Nationally, he has been a consultant to government agencies and an adivsor to governors, state legislatures and congressmen.

Music majors at Tech yesterday showed their appreciation for Dr. Luce and the approved building addition

Tech music department to receive building addition

Spring planting

By PETE McNABB UD Reporter

A recently approved addition to the Music Building has boosted the morale of music students and faculty and, according to department director Harold Luce, enrollment should be on the rise.

"This is a big shot in the arm," Luce said. "This was not only a victory for the Music Department, but a victory for the whole university."

Luce, Vice President for Planning Glenn Barnett, Arts and Sciences Dean Lawrence Graves, President Lauro Cavazos and Vice President for Academic Affairs Charles Hardwick successfully lobbied the addition at the Coordinating Board meeting in Austin last week.

The proposal had been deferred in an earlier meeting this year and was nearly table altogether.

However, despite an early opposition from the Coordinating Board Staff, the

music building proposal passed unanimously Friday, Barnett said.

Barnett said one commissioner on the board commented he had never seen a proposal pushed as hard as the music building proposal.

The addition will cost \$2.4 million — not that much in the eyes of the board, according to Barnett.

Barnett said the Tech delegation stressed the importance of the specialized space for the music department. Earlier, the staff of the Coordinating Board had been against the addition because of an abundance of available classroom space at Tech.

The enrollment of the music department should be affected positively as early as September 1981, according to Luce. The 1979-80 enrollment for music majors was only 380, down about 20 from previous years. Luce said recruiting music majors to

Sealed bids will probably be taken on June 1, Brown said, and construction should start by August.

Law school professor to begin interim deanship

Richard W. Hemingway, Horn professor of law, will assume the interim deanship of the Tech Law School June 1.

Hemingway replaces Frank W.
Elliot, who resigned to accept the presidency of the Southwestern Legal Foundation in Dallas.

On a previous occasion, during 1974-75, Hemingway served as acting dean of the Law School.

Hemingway joined the Tech law faculty in 1969 and was named Horn professor in 1972. Previously he had taught at Southern Methodist University, Baylor University and the University of Houston law schools. For five years before entering academic law he had been in private practice with Fulbright, Crooker, Freeman, Bates

and Jaworski, one of Houston's largest

Hemingway received the bachelor's degree in business from the University of Colorado in 1950, the doctor of jurisprudence degree in law from Southern Methodist University in 1955, and the master of laws degree from the University of Michigan in 1969. He received the J. Woodall Rogers Senior Gold Medal for his achievements upon graduation from the SMU School of Law.

"We are most appreciative of Hemingway's agreement to serve once more as interim dean. He is a fine administrator, as well as an effective teacher and scholarly researcher," Tech President Lauro F. Cavazos said in making the announcement Monday.

Anti-abortionist claims:

Next step selective elimination

Editor's note: This is the first of two-part series about Francis Schaeffer's and Dr. Everett Koop's film series, "Whatever Happened to the Human Race?" Quotes and other information have been taken from the films and from a book by the same name. Today's story deals with Schaeffer's and Koop's positions on the issues of abortions, infanticide and euthenasia.

By DOUG NURSE UD Reporter

The logical result of abortion is infanticide, the slective killing newborns. The logical result of infanticide is euthenasia, or mercy killing. The logical result of all of these is the elimination of anyone deemed less than perfect or deemed to be unwanted, according to Francis Schaeffer and Dr. Everett Koop.

News Analysis

Many consider Schaeffer's and Koop's views the ravings of paranoid, antiscientific reactionaires, but the two Christians substantiate their claims with solid, sound logic and documentation in the film series "Whatever Happened to the Human Race?"

The movies, sponsored by the Lubbock chapter of the Right to Life organization, were shown Saturday in the Monterey High Auditorium.

A primary premise in Schaeffer's and Koop's argument is that as time

progresses, the unthinkable will become thinkable.

Abortion-on-demand, which was legalized in the Supreme Court's Rowe v.

Wade decision in 1973, was unthinkable 10 years earlier, Schaeffer said.

In light of the Supreme Court's predilection for socialogical engineering, supported by large numbers of medical experts, sociobiologists and political activists, it is not unreasonable to expect the killing of babies born with congenital defects and ultimately, babies who simply are not wanted, Schaeffer said

The precedent of classifying unborn children and some newborns as "non-persons" could be applied to the elderly who also are deemed unwanted, he said.

Finally, as the courts and federal government assume more and more power, individuals and groups of individuals who are unwanted, imperfect or socially

embarrassing could be labeled as non-persons and therefore, justifiably eliminated, Schaeffer said.

Koop, surgeon-in-chief of the Children's Hospital in Philadelphia, and Schaeffer, a philosopher and theologian, have meticulously documented statements about the issue made by physicians, judges, justices, and other relevant groups.

Given their substantiation and historical precedent, their arguments take on the chilling effect of a macabre prophesy destined to become reality.

Koop delt with the medical and technical questions of the issues and Schaeffer delt with the philosophical angles. They left few arguments unchallenged.

Regarding abortion, Koop rebutted claims by pro-abortionists that the fetus

is an extension of the mother and, as such, is not a separate human being until after birth.

The pro-abortionists say the mother has the right to do with her body as she

will, including abort her fetus.

Koop aruged that the "test-tube baby" showed that an egg could be fertilized

Koop aruged that the "test-tube baby" showed that an egg could be fertilized without the mother, and , therefore, is not necessarily an extension of the mother. Consequently, the mother-extension argument is invalid, he said.

Koop also attacked the popular idea that abortion will decrease the incidence of child abuse. He said that although six million abortions have been performed since 1973, the incidence of child abuse increases yearly.

Koop questioned the concept that a child is not a person until a certain stage of development. Since life is a continuum, he said, at what point can anyone say 'Now the fetus is a person,' and on what basis could the determiner establish that point as a criterion?

that point as a criterion?

Any criterion must necessarily be arbitrary, he said.

Many would claim that viability (ability to live outside the womb) of the infant

may be used to determine if the fetus is a baby, he said "hat view is undermined by the fact that larger numbers of premature babies are saved each year, he said."

An infant that would not have been viable several years ago may be viable today, Koop said.

He posed a question to the pro-abortion me al community that against killing newborns.

"Would you then kill this infant a minute before he was born, or a minute before that, or a minute before that?"

Critics damage U.S., help Russia

William Safire

When Ronald Reagan suggested last week that Carter's inaction and vascillation had contributed to our predicament in Iran, the presidnt was stung to fury. He indicated to editors that his political opponent was in unwitting league with the Communists and was helping the Soviet Union:

"I think the people in the Kremlin would agree completely with what Mr. Reagan has said," President Carter charged, adding with that dulcet viciousness that has become his campaign trademark that such criticism of the president "could only damage our own nation's prestige and help the Soviets."

ONE CAN IMAGINE the editorial

outrage that would have thundered if Reagan or Senator Kennedy had flailed out in such a manner, hinting that Carter was the dupe of Communists, acting in tandem with the Kremlin to damage the United States and help the Soviet Union.

Much of the media would have blanched at that kind of mudslinging: the "fellow traveler" smear is a relic of the Thirties and early Fifties. But Jimmy Carter was given a free pass only Newsweek noted his remarks as a "low blow "

This episode was evidence to some of us that Carter has become afflicted with the same notion that obsessed Lyndon Johnson: that criticism of his policies was akin to being against the United States. At some point under pressure, some presidents begin to equate their administration with the nation itself, and look at political dissenters as unpatriotic or even in

ANOTHER SIMILARITY of the 1980 Carter approach to the 1964 Johnson campaign can be seen. Then, as now, the oppositionwas portrayed as triggerhappy, and the president was portrayed as standing firm against hawkish

league with our nation's enemies.

escalation. Then, as now, the moves toward relying on a military solution were made in tiny increments, in gradual response to provocation never strong enough to be decisive bu' steadily drawing us into a quagmire.

Carter is no stranger to incrementalism. In trying to cope with inflation in his gingerly way, his appointees slowly raised interest rates over period of years. As a result, instead of a sharp and decisive rise that would have overwhelmed inflation, Carter's lagging, upward creep of interest rates actually contributed to the rise in the cost of living. Thus, like King Mithridates, who learned to take

WRIGHT

poison in small doses, inflation will die

In Iran, the same incrementalism is drawing us toward ineffectual involvement. Steps that if taken in rapid sequence would seize the initiative are, instead, taken over a year's time, encouraging resistance along the way.

FIRST WE BREAK relations; then we wait. Second, we pressure a few allies to join our embargo; then we wait. Third, with opinion polls leading the way, Carter asks the Congress to declare a state of war unless the hostages are released by a date certain; then we wait. Fourth, we mine the harbors of Iran; then we wait. Fifth, we direct the unhappy sailors of the U.S.S. Nimitz to take out the island of Kharq and the refinery at Abadan; and wait some more.

Each ineffectual escalation is advertised as a "tightening of the screw," when in reality it is vice versa. The slow

ughteners are leading the way into this year's quagmire. We give the Iranians time to adjust and to glory in their sufferings. We also present both the Soviet Union and the Iraqi government with a delectable opportunity to invade Iran under the pretext of protecting it from U.S. imperialism.

The long pauses between escalations are the most dangerous of times. As Carter waits for public opinion in the United States to push him further, the Soviets are able to position their forces on the Iranian border and to step up fifth column activity by their PLO allies inside Iran.

WE ARE NOW IN the pause between the breaking of relations and next month's joint embargo. We are slowly getting ready for our "surprise" mining of harbors in June. The Soviets are given time to prepare a real surprise to counter our non-surprise.

In political terms, the scenario is

Chilling day-to-day accounts

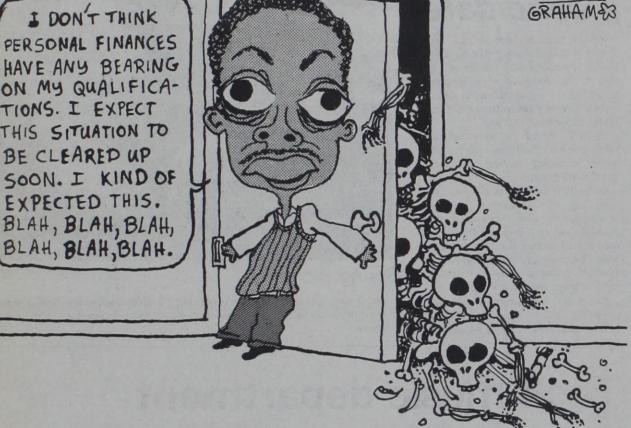

predict Iranian crisis end

intended to be similar to 1964: 8 patient and restrained president denounces his political opposition for warmongering as he slowly but surely escalates, always too little and too late. His poll rating turn upward as he resolutely but never decisively - winces in pain as he directs our inadequate armed forces, out of position and running low on beer, to engage the nation's enemies.

And what of those right-wing hawks who dare to suggest that Carter's stepby-step, follow-the-polls policy may be the most dangerous path of all? We, of course, can be denounced with impunity as impatient, bloodthirsty

Our dissent from Carter's electiontime transition from useless appasement to no-win incrementalism is sure to be characterized as disloyal and unpatriotic, and "could only damage our own nation's prestige and help the

nomination for re-election. Iran decides it better return hostages.

DAY 260.5 - Carter goes into exile in Panama.

Letters:

Baseball drought

To The Editor:

I just finished reading the letter from Steve Craig, concerning the Lubbock radio stations refraining from picking up broadcasts of major league baseball games, and I must say I empathize with him completely.

It is absolutely ridiculous for a city the size of Lubbock not to carry at least one of the state's major league teams, both of which are expected to have fine years in 1980.

Craig mentioned KFYO carried the Rangers last year, but it goes back much further. When I attended Tech in the early '70s, even the Astros were carried. (You had to turn to the Spanish language FM station to hear them, but sure enough, Gene and Lowell were there giving the play-by-play in English).

As it stands now, there is virtually no way of following Texas baseball teams, and the only way you'll be following baseball at all on a regular basis is by way of cable TV.

(I see from Craig's letter he lives in the dorm, and I realize cable TV in the dorm is still about as possible as opening the Pub's doors).

Cable Channel 2 carries many of the Atlanta Braves broadcasts, both live and on tape delay. Cable Channel 3 carries many of the Chicago Cubs games. And tune in to

Cable Channel 6 on a Thursday night, and you'll usually see live baseball from anywhere in the country during the summer.

(In fact, that extra-inning affair the Rangers had with the Yankees, described in Craig's letter, was carried live on that cable TV station). The only problem is you never know what game will be featured on

TV Guide magazine lists Channel 11 in Lubbock as part of the Rangers' television network - but Channel 11 in the past has televised only the weekend network broadcasts and not the weekdays games carried in Dallas by Channel 5.

The problem here lies in the fact that when a Ranger broadcast falls on Saturday, we don't get the NBC game of the week.

We used to get the Astros games on cable (Channel 39 out of Fort Worth), but that station was dropped.

And ABC-TV, I understand, will carry major league Monday Night Baseball only during the month of June. It will only televise Sunday afternoon games in September after that.)

As you can see, Lubbock is hurting for baseball broadcasts. I, for one, would rather listen to radio broadcasts that watch the garbage on TV - and I would think the local radio stations would try to help out the city's baseball fans.

Of course, all this boils down

to is a race for ratings. With the Rangers Radio Network actually paying stations on a game-by-game basis to carry the games, the stations must really think baseball is a killer to ratings.

Even so, with Amarillo and Midland holding minor league clubs - and with even Amarillo carrying the Rangers games on radio - it doesn't say much for Lubbock.

This is the first year I can remember there being no major league baseball broadcast on Lubbock radio. And frankly, I'm more than a little upset about it.

> William D. Kerns 4823 11th Street

Staff welcome

To the Editor: Dear Dr. Cavazos: The

inauguration Tuesday was very nice. The speakers were good, the music excellent, the collection of educators formidable, and the ceremonies impressive.

I was, however, disappointed. There was no welcome extended to you from anyone representing me.

There are, in my opinion, four diversified, equally vital groups in any well functioning university. One group is the students, who are the sole reason for the existence of an institution for higher learning. Another would be the faculty, without whom the educating

process could not take place. The administrators make up

another group. They coordinate the various programs on campus and make the necessary executive decisions in order for Tech to function smoothly. The last group, and the one group that was totally unrepresented Tuesday, is the staff. This is the group responsible for all the details pertaining to the continued function of the university.

No one group here at Tech is more important than the others. No one group can be most important, for all four are totally interdependent. Without all four groups, Tech would cease to exist. Normal daily functions could not go on without the interworking of all the groups on campus. That is why I was so disappointed when no one welcomed you for me.

I am a minor functionary at the lower levels of importance and it was certainly not my place to speak before all those important people attending the inauguration; however, it is saddening to realize that the staff as whole did not have the opportunity to speak through a representative.

I welcome you too, Dr. Cavazos. Tech needs a Tech needs you, for a university without a president is like an army without a general. Tech needs a man who knows West Texas and understands the goals and needs of the university, a man whose first loyalty will be to Tech.

I am glad that Tech now has a president who will strive to see the university achieve its maximum potential.

Forgive me if I do not sign my name, for, as I said before, I am a very minor, and very presumptious employee. Rest assured, even so, that I welcome you and your goals for

You have my whole hearted support and enthusiasm, despite the lack of an official representative to tell you so.

Winning sports

EDITOR'S NOTE: The following letter also was signed by 200 other persons. To the Editor:

This letter has been a long time in coming, though it has been on the minds of many. This is the first time it has been

This letter is primarily addressed to the Board of Regents, the Tech Athletic Department, and our athletic director, Mr. Dick Tamburo. The question that needs to be

answered is "why do you insist on keeping the non-dominant athletes from excelling? When will the time come that your eyes will become opened to sports other than football and basketball?"

Sports such as soccer, swimming, softball, golf, and baseball are being dealt an injustice. With even a little help

and support from our Athletic Department (we say ours because we also attend this university), the Tech soccer team could consistently produce a winning squad that national bring recognition to our university.

The team has the ability that was exhibited three weekends and in the Southwest Conference tournament.

The only team Tech fell to was nationally-ranked Southern Methodist University, in a close-fought battle. If the players would not have had to be bothered with finding their own transportation, paying for motel rooms and skimping on meals due to lack of funds, they very easily could have emerged victorious, even over eighthranked S.M.U.

It is hard to compete against a team that gets \$37,000 (S.M.U.), or \$17,000 (A&M), when your university allows only \$2,500 to the sport. The team had one of the best seasons a Tech team has had (18-5-2), but with a little support it could rank with the best in the country.

It is hard to believe we can spend \$5.5 million on one building and not even \$5,000 on a soccer team.

The team is at hand now. Tech just cannot ignore these sports any longer if we want to be competitive. Let's spend some money on a sport that can

Long distance phone service to end in dorms

Long distance phone service to residence hails will automatically be discontinued on Wednesday, May 7. Those students leaving earlier who wish to have service discontinued before that date can go by Room 209 in the University Center from 9 a.m. to 5 p.m. Monday through Friday, April 23 to May 6. Final bills will be sent to the student's home address.

Off campus students need to disconnect service completely if they are leaving for the summer. A temporary office will be set up in Room 110 at the Civic Center from 8:30 a.m. to 4:30 p.m. weekdays, April 28 through May 9. Off campus students will receive a \$5.00 credit by disconnecting their phones and bringing the phones with them to the Civic Center, according to Southwestern Bell District Manager Bob McNamara.

Those students on the Tech payroll who are leaving Lubbock for the summer and wish to have their final paychecks mailed to a home address should stop by Drane Hall, Room 234 and fill out mailing cards. The office is open from 8 a.m. to 5 p.m., Monday through Friday.

Beginning Russian offered

Tech's Department of Germanic and Slavic Languages will offer Beginning Russian for elementary school students beginning September 23.

Instructional emphasis will be placed on conversational skills of listening and speaking, with some work in reading. A small core of practical vocabulary will be taught to the fourth, fifth and sixth grade students. Also, the students will also be familiarized with Russian songs and games.

"All instruction will proceed on a very informal basis, providing the student with an interesting program that requires no homework, yet does provide enjoyment and accomplishment in an important foreign language," said W. T. Zyla, professor of slavic languages.

Classes will meet for an hour weekly on Tuesday afternoons in the Qualia Room of the Foreign Language

There will be a \$5 fee for each student.

KTXT-FM 88 staff win awards

Bob Fuchs, station manager of KTXT-FM, received the outstanding service award at the annual banquet of the Tech radio station Friday.

This year's presentation of the service award to Fuchs marks the first time a student has won the award. Previous recipients have included area broadcasters such as Ray Moran of KTEZ-FM.

The banquet, held at Smuggler's Inn, was given in recognition of the entire staff of the station, according to

The presentation of awards was in the form of an audio tape presentation, Fuchs said.

Others awards were given to the following: outstanding announcers, Jim Perkins, junior, sports director, and Jeff Hollaman junior outstanding newscaster, Pam Weigar, junior outstanding sportscaster, Greg Heiztman, junior outstanding broadcaster, Rick Neves, program director.

The outstanding public service announcement went to Doug Burdick for producing and editing "Mr. Rogers." The best program of the year award "Yawn Patrol," was given to Jeff Hollaman and Rick Neves.

Craig Fryer was named the most promising broadcaster. Mark Slusher, station manager for 1980-81, was also

Entertainment at the banquet was a tape of "KTXT outakes," a selection of "bloopers" taken from the staff of the station throughout the year.

FUNK'N' ROLL FATEDAWC'S

CANNPUS BRIEFS Overeaters Anonymous help habit

all things to all people. Millman suggests that no one can

NEW YORK - Laura is a compulsive overeater. She is also a member of Overeaters Anonymous, a group fashioned along the lines of Alcoholics Anonymous to help sufferers overcome a life-disrupting addiction to food that can lead to severe obesity and profound unhappiness.

Not all compulsive eaters are fat. Some are dangerously thin anorexics who alternate eating binges with punishing purges or starvation diets.

Whereas most people now recognize alcoholism as a sickness warranting sympathy and treatment, compulsive overeating is still widely regarded as a character defect or moral weakness that victims could overcome through will power if they wanted to.

But the stories told at Overeaters Anonymous meetings throughout the country present a very different picture, one strikingly similar to that of a compulsive drinker or gambler or a drug addict.

It is a picture of profound unhappiness, loneliness, shame, and loss of control to an inner demon that cries out, "Eat, eat" even when the rational self says, "Stop that, what are you doing to yourself?" To the victims of compulsive overeating it is an illness that most are unable to cure or control on their own.

According to Marcia Millman, a sociologist at the University of California at Santa Cruz and the author of a fascinating new book, "Such a Pretty Face: Being Fat in America", "Compulsive eating is like all other compulsions. The eating gives you a temporary sense of control over whatever is making you anxious. But it's not a permanent solution because it doesn't get at the source of the anxiety. Your 'hunger' is never satisfied. That's why the behavior becomes compulsive."

In "The Overeaters", Dr. Jonathan Kurland Wise, a Boston endocrinologist, and Susan Kierr Wise, a dance therapist, describe a variety of emotional clusters that trigger some to overeat, including a dependence on food for warmth, comfort and safety, a fear that expressing anger will lead to uncontrolled rage, a fear of independence, and confused or ambivalent feelings about sexuality.

A common pattern expressed by compulsive overeaters is their need to be perfect, to be totally in control of life and to be

maintain such perfect control.

Compulsive overeaters use food to help them face life. As an O.A. pamphlet says, "Every emotion from agony to ecstasy is met by fleeing to the 'comfort' and oblivion of food." Members report that when they abstain from compulsive eating, they are besieged with the painful feelings that food used to mask.

Millman notes that the vast majority of O.A. members are women, and though no survey has been done to determine if there are many hidden food addicts among men, she said she believes men are more likely to lapse into other types of compulsions, such as compulsive overwork, to cover up their

"To the victims of compulisive overeating, it is an illness that most are unable to cure or control on their own."

anxieties.

Like abstaining members of A.A., compulsive overeaters in O.A. don't consider themselves cured, only recovered. They try to refrain from compulsive eating one day at a time and to keep coming back to O.A. meetings to maintain their abstinence and help others achieve it.

As with alcoholism, relapse is common. But with time, many members who stay with the O.A. program find that the old addictive eating patterns have been suppressed enough to prevent minor slips from turning into major blowouts.

Since the groups are anonymous and no records are kept, it is not possible to say how successful they are in helping people to control their abnormal eating, lose unwanted pounds and maintain a normal weight. Nor is it known what proportion of compulsive overeaters might benefit from the O.A. approach. It is not considered a "cure" for obesity.

But, Millman says, "often those who stay (in O.A.) feel their eating has come under control and also feel they have undergone a profound personal transformation." Many members tell of dramatic success through O.A. after years of failure with every other kind of weight-loss program.

Grace, for example, weighed 290 pounds in May 1977, when she came to her first O.A. meeting. She had been fat, very fat, all her life, and paid the usual social debts of no dates, no clothes that fit, no participation in school sports. But she was highly successful in other areas, a leader in church groups, dependable team assistant, superb baby sitter, and valedictorian for her college class.

Grace told an O.A. meeting in Brooklyn last month: "I did many of these things so that people would love me. I wasn't good enough to be loved just for me. But no matter what I did, I felt a gnawing emptiness inside, an I-got-to-have-more, something's-missing feeling," She attempted to fill that emptiness with food, but though eating provided a temporary distraction, the old hollow feeling eventually returned crying out to be fed again.

Today, it is hard to recognize Grace in her "fat pictures." In less than three years, she has lost 130 pounds and is still going down, slowly, purposefully, by relentless adherence to the O.A. program and by treating abstinence from compulsive eating as the single most important thing in her life.

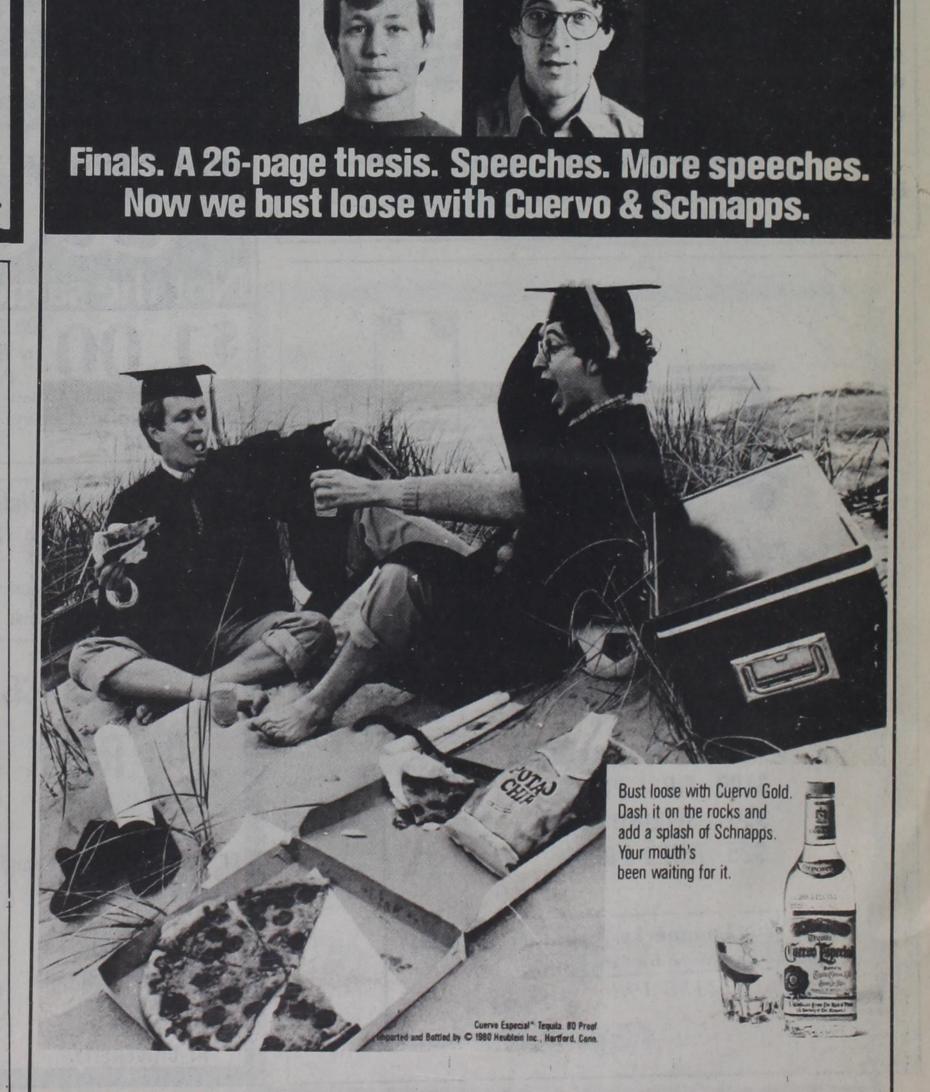

Grace says she's also learned how to deal more directly with her feelings, how to express anger, resentment, disagreement, instead of trying in vain to bury them with food. "I'm learning that they're just feelings, not facts, and I'm not a bad person for having them," she told the hushed assembly of about 40 self-proclaimed compulsive eaters.

lacks vocal quality

UD Staff

Daryl Hall's latest release on RCA Records, "Sacred Songs," is like mold on old bread. It tends to grow on you after awhile, but you know

The same holds true for Hall's album. Few of the songs are memorable enough to hold the listener's attention for more than the first few bars of the tune. Those songs that do stay with you are memorable only for the odd treatment Hall gives his songs.

Perhaps the best cut of the album is the title piece, "Sacred Songs." And even that's pushing it. It's like

"Sacred Songs" is hummable. Who knows if that was Hall's intention for this first song, but it's the sort of tune you sing to yourself in the shower or out playing Frisbee, in the elevator. Wherever your mind turns to such things.

Truthfully, the vocals provided by Hall and company were possibly the weakest element of this album. The instrumentals were fine, especially on "Urban Landscape," an instrumental tune written by Robert Fripp. Fripp also collaborated with Hall on"NYCNY." Hall wrote the rest of the selections on this album.

Hall's voice is rough and less.

By LAURIE MASSINGILL coarse, a quality admirable in some vocalists, but unfortunately not in Hall's case. Particularly on "Don't Leave Me Alone With Her," Hall's voice was comparable to running one's fingernails you'll end up throwing it across a blackboard. Just grating on the nerve's of the listener.

The lyrics are all fairly interesting though Hall's voice hardly encourages listening. In "Survive," despite the obnoxious quality of Hall's voice, the words are effective. "You were born

freedom to be a slave to your inhibitions Inventing excuses and proving the right to back up your condition But a soul like that ain't tied too tight choosing the lesser of 10 evils. And it's liable to scatter all over the night".

Only two other songs are worth mentioning. Both are somewhat sensitive. "Something in 4-4 Time" is quiet, one of the only tunes on the album of that nature. The other song, "Babs and Babs," thinking?' She said 'Nothing but I never do 'cause I leave it up to you.' Interesting,

One thing is certain. Despite Hall's fairly good track record on previous albums, his "Sacred Songs" is no sacred cow and deserves no more praise than given here. Maybe

Daryl Hall

Segrist, baseballers eyeball SWC tourney

By DOUG SIMPSON **UD Sports Writer**

Kal Segrist Monday called this year's baseball squad the best team he's ever coached and said the Raiders have all but sewed up a berth in the upcoming Southwest Conference Tournament.

"It's a 'senior' club," Segrist said of his team, which took over sole possession of fourth place in the league this past weekend by sweeping TCU in a three-game series in Fort Worth. "The leadership has been tremendous. Our leaders are the reason we're where we're at. This is the greatest team I've ever had."

IF TECH WINS one of its games against SMU this weekend or if Baylor should lose to Houston, the Raiders will have wrapped up their first SWC Tournament berth in the school's history. But Segrist says he isn't celebrating just yet.

"We've got to win one more game, and until we do, we're in trouble," he said. Hopefully, we'll keep this momentum and carry it on through. But SMU has some good pitchers who can give you a hard time. I feel real good about things at this point."

Segrist said it doesn't matter to him which team Tech would have to face in the first round of the tournament.

"We'll just be glad to be there." he said. "We'll play any of 'em. If we play as well as we've been playing lately, we'll be as good as any team in the tournament."

SEGRIST SINGLED OUT a number of players for outstanding performances in the TCU series.

"Different people are playing well for us," he said. "One day it's Bobby Kohler who comes up with a clutch hit or a key play, and another day it's Larry Selby. Dan Hejl had a great game Sunday. And Mark McDowell was terrific on the mound. He threw the ball great.

"I can't be more proud of our people and the wav they

HAMILTON BELIEVES that his troops can perform well in the upcoming SWC tennis tourney.

"(Jose) Rivera nad (Gregg) Davis are capable of winning some matches for us in doubles," Hamilton said. "So are several players in singles. We'll try to get through the qualifying matches, then win some quarterfinal matchesthat's our main goal. The competition will be that tough."

In addition, Hamilton praised his squad for its performance against New Mexico Military Institute Saturday on the Tech courts. The Raiders notched their second non-conference victory in a row by winning 7-2.

"The Hardin-Simmons and NMMI matches were 'tuneup' matches for us," Hamilton said. "We played exremarks during Monday's ceptionally well in spots. Hopefully, the wins will give us a little extra momentum going into the Southwest Conference Tournament."

> FINALLY, OGLESBY SAID that several members of his track team are looking forward to competing in the Penn Relays in Philadelphia, Pa.

"This is the first time that anyone from Tech has been invited, so we're hoping to make a good showing," Oglesby said. "Some of the team will be going to Plainview to compete in the Wayland Invitational this weekend. I'm hoping that we can do well there, also."

TECH SENIOR GREG LAUTENSLAGER will lead the way for Tech in the Penn Relays. He'll compete in the 5,000 meters at 7:30 p.m. Thursday and join teammates Robert Lepard, Joseph Mutai, and James Mays for the twomile relay at 4:30 p.m.

Women netters host NMMI today

The Tech women's tennis team will play in its last dual match and final home appearance of the year today when it hosts New Mexico Military Institute at 2:30 p.m. on the men's varsity courts.

Tech brings a 28-14-1 dual match record into the contest and hopes to make it three in a row against NMMI. The Raiders have been victorious in the teams' two previous meetings, winning 6-3 in the fall and 5-4 earlier this spring.

"It won't be an easy match," said Coach Mickey Bowes. "NMMI would really like to beat us. We've beaten them twice in two tough matches, and this one should be a good one to watch."

The Raiders will go with the same lineup that they used at the state tournament this past weekend in Fort Worth. "Even though we didn't do well at state, I think that this is

the best lineup to use," said Bowes. Playing at number one for the Raiders will be freshman

Regina Revello, the only Techsan to win both her singles matches at Fort Worth in the state meet. Following Revello will be Becky Gerken, Jill Crutchfield,

Lesley Romley, Cathy Stringer, and Kathy Lawson. The doubles teams will be Revello-Stringer, Crutchfield-Lawson, and Gerken-Joanie Waltko.

Coach Bowes feels that this match will be a good tuneup for the TAIAW state individual tourney next week.

"I'm hopeful that a good match will help us warm-up for next week's tournament," Bowes said.

Rivera, Davis netters' best chance

By JOHN EUBANKS **UD Sports Editor**

Tech has not garnered a first-place victory in the Southwest Conference Tennis Tournament since 1962 when the doubles team of Daryl Allison and Beau Sutherland stitute, 6-2, 6-4. captured a first.

Corpus Christi this weekend during the 1980 Southwest Conference Tournament.

Tech's doubles team of senior Gregg Davis and junior Jose Rivera has as good a chance to garner a first-place victory as any other doubles team in the conference, according to their comments and those of Head Coach Mark Hamilton.

"They are our main hope in the tourney," Hamilton said. "They have not been playing they were earlier in the year. I enough. Today, I think I

tourney."

Davis and Rivera tuned up Lynch and Thomas Anderson double player. of New Mexico Military In-

After the match, Rivera But that may change in figured that the duo might be regaining the form that enabled them to pick up five SWC victories this season.

> you return well in doubles you usually win. That puts pressure on the other team." Rivera said his singles game has also trailed off

Tech golfers finish sixth

The Tech men's golf team finished sixth, a notch better than its 1979 performance, in the Southwest Conference Tournament held Thursday-Sunday in Tyler.

The Raiders opened the three-day tourney with a 299 team total, then followed up with rounds of 306 and 316 to finish ahead of SMU, Rice, and Baylor. Houston captured the team title with an 854 total, and Cougar golfer Ray

Individually for Tech, sophomore Larry Seligmann finished 20th in the conference with a three-round total of 227. Randy Waterhouse shot 229, followed by Chris Brown with 232, Kyle Rowland with 233, Jeff Watts

Barr was the tournament medalist.

with 241, and Bill Crist with 242.

"We should have done much better," said Raider senior golfer Chris Brown. "We didn't play too well the last two days."

Seligmann made a remarkable turnaround in the middle of the second round. After opening with a disappointing five-overpar 77, he shot 41 on the first nine the second day and then lost one stroke to par on both 10 and 11. However, he regrouped to birdie four of the next seven holes. He then followed with a strong round on the final day of competition.

The final spring tournament averages are: Waterhouse- 73.6; Seligmann- 74.8; Brown-75.8; Rowland- 76.3; Mark Williams- 79.1; Crist- 79.8; and Watts- 80.3.

PEACE CORPS/VISTA

Don Francisco.

Put yourself in his shoes ... and he'll put you in someone else's!

Brilliantly honest and contemporary! Don Francisco vicariously captures a spectrum of feelings which can make us walk with those that actually walked with Jesus . . . make us wear their very shoes! And when we do, the fit is strangely comfortable
