Iraqi jets hit Iran airport

By The Associated Press

Iraqi warplanes struck at more than a half-dozen Iranian air installations Monday including Tehran's international airport, and Iran claimed success in retaliatory raids on two Iraqi air bases. Iraqi state radio said three weeks of hostilities over a vital Persian Gulf water route had "escalated into a full-scale war."

Iran and Iraq have sparred along their borders for months, but the fighting burgeoned last week after Iraq canceled a 1975 treaty.

Iraq said its warplanes hit 11 airstrips and it lost two Sovietmade MiG jets. A top Iranian military official said "several" air bases were attacked, and an Iranian revolutionary guard commander said six MiGs raided seven installations.

Iran's American-made fighters struck back with bombing raids on Iraq's Waset Province 100 miles east of Baghdad and on Basra, Iraq's southernmost port, according to communiques from Iran and Iraq.

Thick smoke rose over Tehran's Mehrabad Airport on Monday and the thunder of the midday attack rocked the capital. Citizens were told to remain calm and ignore all but official reports of the fighting. The country was under blackout orders to guard against night air raids, according to Tehran Radio.

Iran declared its coastal waters a war zone and said it would not allow any merchant ship to carry cargo to Iraqi ports, according to Tehran Radio. The report prescribed a shipping route and said it would not be responsible for those who violated it.

Iraqi media carried unconfirmed reports that Iranian artillery fired on five foreign cargo ships and its gunboats approached two others Sunday and Monday in the Shatt alArab waterway, the jointly claimed route that is the centerpiece in the escalating border dispute.

The treaty Iraq broke ended the late Shah Mohammad Reza Pahlavi's support of a Kurdish rebellion in northern Iraq and in return put the last 60 miles of the boundary between the two countries down the middle of Shatt al-Arab waterway.

Iraq said it was resuming sovereignty over the eastern half of the estuary, which is formed by the union of the Tigris and Euphrates Rivers, and is the exit to the Persian Gulf for Iraq's chief port - Basrah - and Iran's Khorramshahr and Abadan. In a statement issued in Baghdad and signed by President Saddam Hussein, Iraq accused Iran of escalating the hostilities to the level of "full-scale war" and said Ira-

qi forces were sent on "deterrent" raids. A man in Ankara, Turkey, identifying himself as an Iraqi Embassy press attache confirmed a Turkish news agency report that his country had declared war on Iran, but Iraq's ambassador in London said war was not declared. "I certainly would have

been told if such a decision had been taken," said Hisham Ibrahim al-Shawi. In New York, U.N. SecretaryGeneral Kurt Waldheim issued a statement calling for a halt to the fighting and for the two sides to negotiate.

Muskie: resolution, but no apologies

By the Associated Press

UNITED NATIONS (AP) Calling for prompt release of the American hostages, Secretary of State Edmund S. Muskie offered respect but no apology Monday to Iran, saying its own security and Persian Gulf stability depend on a settlement.

"We are prepared to do our part in resolving fairly the issues between us, Muskie said in a speech to the U.N. General Assembly. He said Iran could end its isolation "from those nations that live in accordance with international law" and have world sanctions ended by freeing the 52 Americans held 10- months.

While promising not to intervene in Iranian affairs, he did not recant past U.S. support for the late pro-U.S. Shah Mohammad Reza Pahlavi. And yet, Muskie emphasized that the Carter administration recognizes the reality of the

Iranian revolution that deposed the ruler. Muskie did not touch directly on Iran's widening border conflict with Iraq in his him stressed the Carter administration intended to remain neutral.

"I urge the nation of Iran, its parliament and its people also to consider the human face of the hostage problem," Muskie said.

"These innocent people and their families have experienced acute suffering. I ask this community of nations to join us in urging that their ordeal be brought to a safe, honorable and prompt end."

Muskie called on the General Assembly to support the hostages' immediate release and to adopt effective measures to protect diplomats everywhere from terrorism. However, he made no specific pro-

U.S. officials said they still considered the commission of inquiry appointed by U.N. Secretary-General Kurt Waldheim last February but subsequently rebuffed in Tehran an effective diplomatic channel to Iranian authorities.

In his annual international statement to the assembly, Muskie took a tough line Summer officially ended Sunday, but motorcyclists are still taking advantage of the continued warm weather to enjoy an open air ride to class. Nelson Tilado parks in a sea of cycles and prepares for a class. (Photo by Mark Rogers)

Amarillo to get warhead portions

AMARILLO (AP) - One way or another, at least portions of the deadly nuclear warhead involved in a Titan II missile accident in Arkansas will wind up at the Pantex nuclear weapons assembly plant near this Panhandle city.

Paul R. Wagner, the ranking Department of Energy official at Pantex, would only confirm the "possibility" of the weapon being brought there.

"One of the options is to return the unit in the accident to Pantex," he said. However, the nuclear material from past military accidents has invariably wound up at Pantex and remains stored there.

Pantex is the final assembly point for all the nation's nuclear weapons.

Nuclear weapons involved in previous accidents were shipped to a now-closed "throw weight" of the Titan II, or its

Titan II Intercontinental ballistic missile - is the largest in terms of yield in the U.S. arsenal. This conclusion is based on the ability to carry heavy items.

disassembly and inspection.

Pantex.

The Titan II is a liquid-fueled rocket with a range of some 7,000 miles.

As usual, the Air Force refused even to acknowledge that a nuclear warhead had

been involved in the fuel explosion at the silo Friday.

Two large canisters - one blue, the other silver and green and each labeled "Do Not Drop" - were anchored by chains to the bed of a flatbed tractor-trailer in the convoy of eight military vehicles. Two helicopters accompanied the procession.

State police and local law enforcement officers also followed the convoy on the 90-minute trip south on U.S. 65 and Interstate 40 to the base near Jacksonville. about 12 miles northeast of Little Rock.

It has been a long-standing Air Force policy to neither confirm nor deny the existence of nuclear warheads at the silos. The Air Force also refused to confirm numerous reports that the warhead was blown hundreds of feet from the launch hole when the silo blew up about 3 a.m.

However, a few hours after the convoy got to the base, the Air Force said that reporters would be allowed within several hundred feet of the crater that was blown into the silo when it erupted.

The blast, which killed a sergeant and injured 21 other men, occurred about 8hours after a wrench socket was dropped by a workman in the silo and hit the rocket's first stage, starting a fuel leak.

Meanwhile, the condition of one Air Force maintenance crewman injured in the explosion improved from critical to

Commissioners approve LCHD budget

Hospital receives burn unit funding

By DOUG SIMPSON

UD Staff Writer The Lubbock County Hospital District (LCHD) Monday allocated \$50,000 in funds for renovation of and equipment for a burn unit at Lubbock General Hospital. Hospital Executive Director Jake

Henry Jr. said he expects the facility to be completed by the end of 1980. "The burn unit will be an economic move and a quality care move," Henry said.

"Funds for the facility are not to exceed \$50,000," he said. "But we hope to spend only about \$30,000 on it."

The burn unit will be the only one of its kind in this area, said Patsy Lock, direc-

tor of Nursing Service at Lubbock General Hospital.

"The closest burn unit to ours is El Paso's," Lock said. "The next closest facility is in Dallas." Lock said the unit should serve as a

regional health care facility for West Texas residents. "We already treat burned patients,"

she said. "Patients from all over the area are referred to us. The burn unit will improve our services."

In a meeting of county commissioners Monday, the LCHD gained final approval of a \$19 million budget for fiscal year 1980-81. Commissioners set a tax rate of 75 cents per \$100 evaluation.

The budget, which was approved by the LCHD at its monthly Board of Managers meeting Aug. 25, includes a 20 percent increase in Emergency Medical Service (EMS) charges, an 8 percent wage increase for hospital employees and a 9 percent increase in hospital rates.

Board members at the LCHD meeting reviewed a financial report that indicates an average daily census decrease from 137.8 patients in July to 136 patients per day in August.

But Henry said that on an annual basis, the hospital is seeing increased patient utilization.

"In 1979, our average revenue per patient day was \$212," Henry said. "So far in 1980, our average revenue per day is \$350. In 1979, our average expenses per day were \$403. So far this year, we're spending \$327.32 per patient day."

The hospital's average daily census for 1980 is 128.1, Henry said. The figure for 1979 was 105.7 and a daily average of 97.3 patients used the hospital in 1978.

Medicare and Medicaid patients represent 22.7 percent of the total care rendered at the hospital in August, Henry

"It appears that our financial picture is changing," said Charley Trimble Jr., hospital finance director. "We're in a break-even situation, partly because of our Tech liabilities (resident physician salaries and utilities). What will happen will happen in the next few months but we're in good general condition.'

The LCHD also approved the purchase of duo-scan echocardiography (hearttesting) equipment for the hospital. The Lubbock General Hospital Auxiliary helped fund the purchase, which amounted to \$13,300.

In other business, the LCHD voted to move an EMS station located at 48th Street and Avenue Q to a new location at 30th Street and Texas.

"We're paying \$3,600 a year rent at the current location," Henry said. "The city would only charge us \$1,100 a year at the 30th Street and Texas location.'

Henry said EMS will move to the new location after some physical reconstruction that will cost about \$1,500. The City Council will discuss the matter this week.

Budgeting explained at workshop

Basic budgeting techniques will be explained at tonight's Money Management workshop, sponsored by the University Counseling Center. The workshop is from 7 to 9 p.m. in the West Hall second floor lounge.

Students planning to attend need to the inform the counseling center in advance. A personal bank statement or a listing of checks from a checkbook will be needed for the workshop.

Interviews for technical fields today

Interview schedules for interviews in the technical fields will be open for signups today on a first come, first serve basis beginning at 1 p.m. in the Student Lounge, room 205 of West Hall. Sign-ups for non-technical field schedules will open at 12 p.m.

Summer interview schedules will be available for sign-ups at 1 p.m. Wednesday in the Student Lounge.

Stocks

NEW YORK (AP) - The Dow Jones industrial average climbed to a 32-month high Monday after the stock market weathered some early selling on news of fighting between Iran and Iraq.

The Dow Jones average of 30 blue chips, off more than 5 points in the first hour, finished with a 10.83 gain at 974.57. That marked the average's highest close since it stood at 976.15 on Jan. 13, 1977.

Weather

Today will be partly cloudy with a 20-percent chance of rain. The high will be in the mid-70s and the low will be in the mid-50s.

speech. Privately, U.S. officials here with toward the Soviet Union. Student opinions vary about presidential debates

By INEZ RUSSELL **UD Staff Writer**

If results of a survey taken Monday by The University Daily are any indication,

Reagan did a good job. Anderson just

WALTER LAZDOWSKI - Senior: " had already made my decision before the debate."

many Tech students did not watch the debate Sunday between presidential candidates Ronald Reagan and John Ander-

"Anderson didn't say anything worth hearing."

OWEN KELLY - Junior: "The debate is

going to help Anderson's popularity."

Of the 25 people questioned in the survey outside Holden Hall, only five watched the debate. Most students questioned said they were studying or were busy during the debate. Several said they did not even know the debate was scheduled.

he watched the movie "Midnight Express" instead of the debates because the movie was better. Opinions varied among students who did watch the debate as to which can-

One student, freshman Ben Bragg, said

he changed his opinion about the election as a result of the debate. Freshman Cathy Cragin said she liked Reagan better both before and after the debate. Cragin said she supports Reagan

didate performed better. No student said

for president. "I think Reagan did a good job. Anderson just doesn't have any ideas," Cragin

Junior Owen Kelly, who said he was an Anderson supporter, disagreed. "The debate reinforced my ideas,

CHRIS PRENTICE - Sophomore: "Reagan didn't make any mistakes, and that's what he wanted to avoid doing."

because I thought Anderson showed his attributes. He's willing to state the issues. It's refreshing to have someone who's not afraid to state issues," he said.

"The debate's going to help Anderson's popularity. I think Anderson just blew Reagan away," Kelly said.

Chris Prentice said he believes the debate will help both Anderson and Reagan because they participated. Prentice is a sophomore.

"The debate didn't help Carter much because he wasn't there to defend himself. But they really didn't say anything new. Reagan didn't make any mistakes, and that's what he wanted to avoid doing. Anderson showed he was different enough from Reagan to give a third choice, so both benefited," Prentice said.

Freshman Ursula Henning disagreed with Prentice's assessment of the debate. Henning, like Cragin, said she believes the debate helped Reagan more than it helped Anderson. Henning also said she is a Reagan supporter.

"Anderson didn't say anything worth hearing." Henning said. "He has a lot of great solutions, but no ideas."

To senior Walter Lazdowski, the debate was more of a campaign stop than an actual debate.

"I think they spoke on their own campaign, more like campaign speeches as opposed to a point counterpoint debate," Lazdowski said.

He said the debate didn't change his opinions about the candidates because "nothing new was introduced in the debate.'

Polls show Anderson's effect on election

(c) New York Times Service

John Anderson has attracted some passionate support. That is evident from the reactions to a recent column in this space arguing that the almost certain result of his candidacy would be to help elect Ronald Reagan.

Anthony Lewis

Anderson supporters wrote in outrage. Some challenged the accuracy of the statement that votes for Anderson would in effect help Reagan. And even if that were true, others said, it was just as well to let the extreme right take over for a while; the country would react against it, and the way would be open for a return to liberal principles.

The passion demands respect. It shows, among other things, how deeply disillusioned many natural liberals are with Jimmy Carter. They feel so strongly that they have turned to someone whose record makes him a most unlikely liberal hero, but whose aura expressed righteous discontent.

But on the facts of what his candidacy is doing,

the Anderson supporters have no case. As more polls come in, the results show an extraordinary consistency. North and South, East and West, the Anderson vote is helping Reagan. Some examples:

New York. A recent New York Times poll of registered likely voters showed Carter leading Reagan, 44 to 38, in a two-man race statewide. When those polls were asked to choose among three, the result was Carter 33, Reagan 30, Anderson 20. A meaningful lead for the president was now less than the usual margin of error in polls.

Washington state. A poll for the Carter campaign put the president ahead by three points against Reagan alone, behind by seven when it was a threeman race.

Minnesota. A Minnesota Poll came out this week with these figures: In a two-man race, Carter 43, Reagan 37; in a three-man, Carter 34, Reagan 31, Anderson 19.

Illinois. A poll for Carter's campaign put him ahead by five points in a two-man race, even with Reagan when Anderson was included.

Connecticut. A Hartford Courant poll showed: Reagan 36, Carter 35, Anderson 15, undecided 14. The voters were not asked aout a two-man race. But the survey did analyze the sources of the Anderson vote, and far more of it came from registered Democrats and independents than from Republicans.

Mississippi. A poll for the Carter campaign had Reagan leading by four points in a two-way race, by 10 when Anderson was added.

Alabama. A Carter poll put him ahead by 10 points against Reagan alone, by five with Anderson in - turning the state from relatively safe to contested.

California. A Field Poll released this week showed: Reagan 39, Carter 29, Anderson 18, others four, undecided 10. When Anderson was removed from the choice, the result was Reagan 44, Carter 38, others four, undecided 14. The Reagan margin was cut from 10 points to six.

New Jersey. A poll for the Carter campaign showed the president behind by one point in a two-man race, by seven points with Anderson in.

Those are polls from a variety of states and by a variety of professional survey companies. They all point in the same direction, and I know of none to the contrary. By the most accurate tests we have, then, the Anderson vote at this stage is helping Reagan everywhere.

The effect is not overwhelming -- but in many states it is enough to make the difference in a close election, which this one is likely to be. Moreover, the device of asking Anderson voters how they would go

if he were not in the race may actually understate the potential damage to Carter. A significant number of those voters say they would not vote at all if Anderson were out of the picture. But many of them are regular voters, and intensely liberal, and by Election Day they might well decide to vote -and vote Democratic.

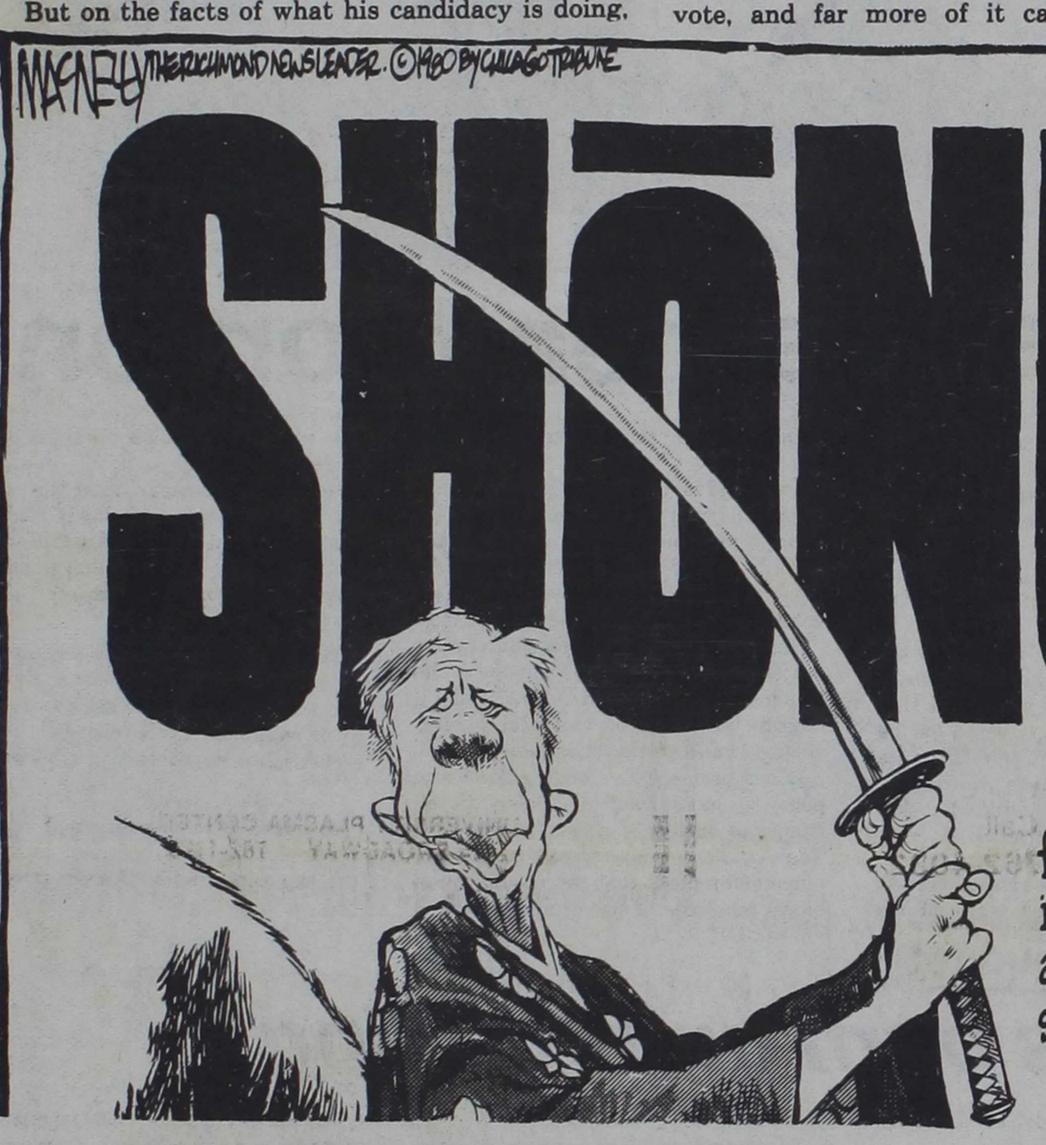

But the polls do provide a realistic basis for political judgment. They show that Anderson's chance of election is extremely remote, and that -barring a transformation -- votes cast for him are likely on balance to help Reagan. There is nothing wrong with that for voters who want Reagan

elected. But liberals who support Anderson out of dislike for Carter cannot in conscience pretend that there is no such effect.

As for the argument that four years of reaction will open the way for a liberal revival, merely to

state that proposition should be enough to make its dangers clear. History is full of disasters following such calculations. What four years of Ronald

Reagan would do is an interesting question. For the answer, we should not look to Dr. Pangloss.

The incredible story of a Georgia farm boy who, after almost four years in a strange new land, tries to become a master of the martial arts in a few short weeks before the election.

University should have more commencements

Chino Chapa

Administration officials are pondering the feasibility of more than one graduation commencement excercise a year, preferably a December ceremony, maybe another after the summer sessions.

Currently the only university graduation ceremony is at the end of the spring semester. The only official recognition by the university of students who were graduated from Tech in the summer or winter is a diploma, which arrives in the mail.

However if the student is not a May graduate, he has the option to return to the school for the ceremony. Of course, the chances are not great that a student will return for the ceremonies in May. Some people have been away from the school for almost nine months and are working.

The money and time involved for most non-May graduates to return to the May commencement is too much trouble. It is sad that many students leave the university without trotting onto the stage and receiving a round of applause from friends and family. After at least four, in many cases more, years of early morning classes, reports and finals, a ceremony would be a small but welcomed reward to some students.

Texas Tech is graduating enough students at the end of each semester, fall and summer, to have more ceremonies. Many universities across the state and the nation have two and three ceremonies throughout the year.

Granted, not all students attend the ceremonies. Some say it is a waste of money. Others say the ceremony is boring. But for the student who wants to receive his diploma on stage, he should have the chance available to him.

With about 1,500 students qualified to be graduated in December, the ceremony would not have to be as extravagent as the May commencement. A small, official, yet dignified ceremony would suffice. The same is true for the summer graduates.

A good opportunity to test the feasibility of the extra commencements would be this year. A ceremony for this fall's graduates would be a credit to the university and a nice tribute to its students. Time is quickly becoming a factor, but if the university is seriously studying the possibility of the ceremonies a commitment is needed soon.

The students of this university should have more than one opportunity to go through a ceremony that comes but once in a lifetime.

Opinion

Dreadful fourth week still lingers in life

(c) New York Times Service

The fourth week of September has always been a grisly time for school children. It is then that the romance of education, sparked by the back-to-school excitement of fresh books, new teachers, virginal fountain pens and notebooks unstained by ink blots and baffling mathematical formulas, begins to yield to

And what is that reality? It is knowledge. Knowledge that it will be nine long months before summer vacation rolls around again. Knowledge that the geography teacher dislikes you. Knowledge that the gym instructor finds your physique absurd. Knowledge that you are never going to understand at least three of the subjects with which you are saddled and are going to suffer horribly for months as you sink into the quagmire of F's recording the progress of your ignorance.

Almost all of us have dreadful fourth weeks of September in our backgrounds somewhere.

The fourth week of September that mutilated my own life is the reason I am not a brilliant nuclear physicist today. Here let me confess that in youth it was not my intent to become a typewriter pounder hacking out material for Sunday supplements. Hooked on the romance of science, I yearned to take up the torch

from Einstein and carry it forward. Thus I came to physics class. The first week of September was thrilling, as textbooks were issued and the teacher discoursed on Isaac Newton and apples

and introduced us to the lab, that frontier of human progress. In the second and third weeks, he introduced us to the erg. I was quite happy with the erg, without which blocks of wood could not be made to overcome the villainous friction of inclined ramps and moved upward, triumphantly ascending those ramps.

At the end of the week, he introduced the dyne, which seemed excessive. It was not that I couldn't understand the dyne. I could have. What I could not understand was why, since we already had the erg, it was also necessary to have the dyne.

was still puzzling over this philosophical question the following Monday when the teacher, assuming that everbody now had a firm grip on the dyne, plunged ahead into the centimeter.

It was disconcerting to have the dyne taken utterly for granted when I still had profound doubts about it and to be asked to cope with the centimeter. The next day was worse. That was the day of the milligram. The following day there was a

I was astonished that the rest of the class took it without a roar of protest that

it was outrageous to ask us to cope with ergs, dynes, centimeters and milligrams while we were still baffled about the dyne.

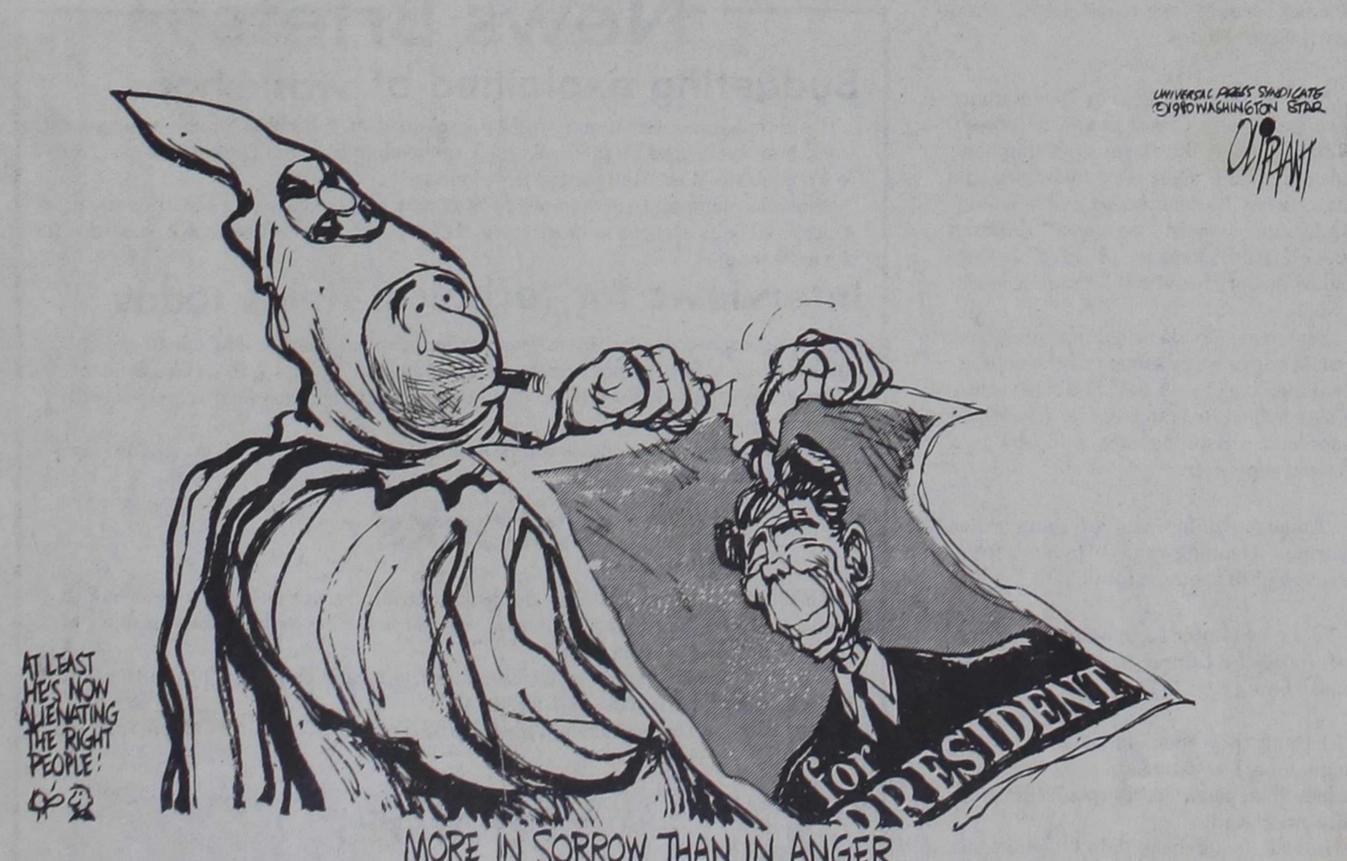

The rest of the class did not protest. Most passed easily. I failed every question not devoted exclusively to the erg. The rest of

that year was a nightmare, and the world still awaits a worthy successor to Einstein.

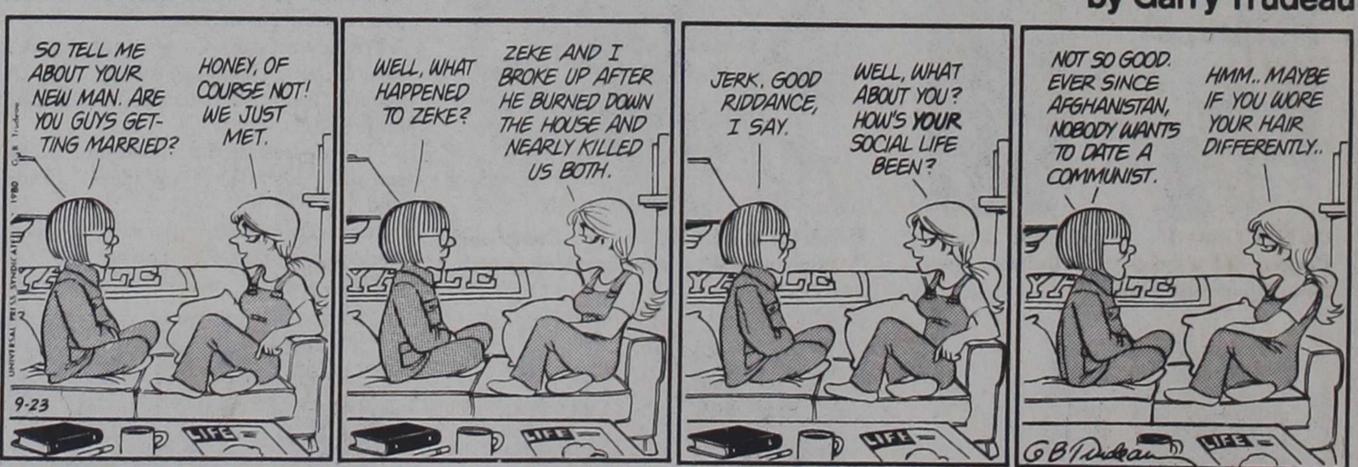

Such is the price the Republic pays for letting its educators skim through the

fourth week of September as if it were just another week on another production

Area jogging bandit suspect in holdups

DALLAS (AP) - He's about average in size, weight and coloring, he looks like an average jogger and he works - on the average - every other week, robbing Dallas-area savings and loan institutions.

Local FBI agents say the "jogging bandit" is suspected in eight area savings and loan robberies, and may be responsible for similar holdups in Amarillo, Lubbock and Austin, too.

The federal investigators call him the most prolific savings and-loan robber to hit Dallas in the past decade.

The bandit's latest victim was the First Texas Savings Association's branch in suburban Richardson. The manager there, Ron Christian, thinks the man "knows what he is doing."

"He knows things too well," Christian explained. "This is just my opinion, but to have pulled off this many robberies I think he may have worked in the business at one time."

In four of the holdups, the man wore jogging shorts, running shoes and a hooded sweatshirt. He has taken between \$500 and \$4,000 in the each of the eight robberies since May, and authorities say he strikes about every other

FBI agent Lamar Meyer, working with police on the robberies, says one of his major problems is that no witness has been able to give police a description of the robber's vehicle. He always

make bank customers and employees lie on the floor while he takes his leave.

Meyer said a profile compiled from witness discriptions of the man shows he is white, somewhere around 30 years old, between 5-foot-8 and 6-feet tall, and weighs 170 to 200 pounds. He has short hair, a reddish-brown full mustache, a medium complexion and wears sunglasses, Meyer said

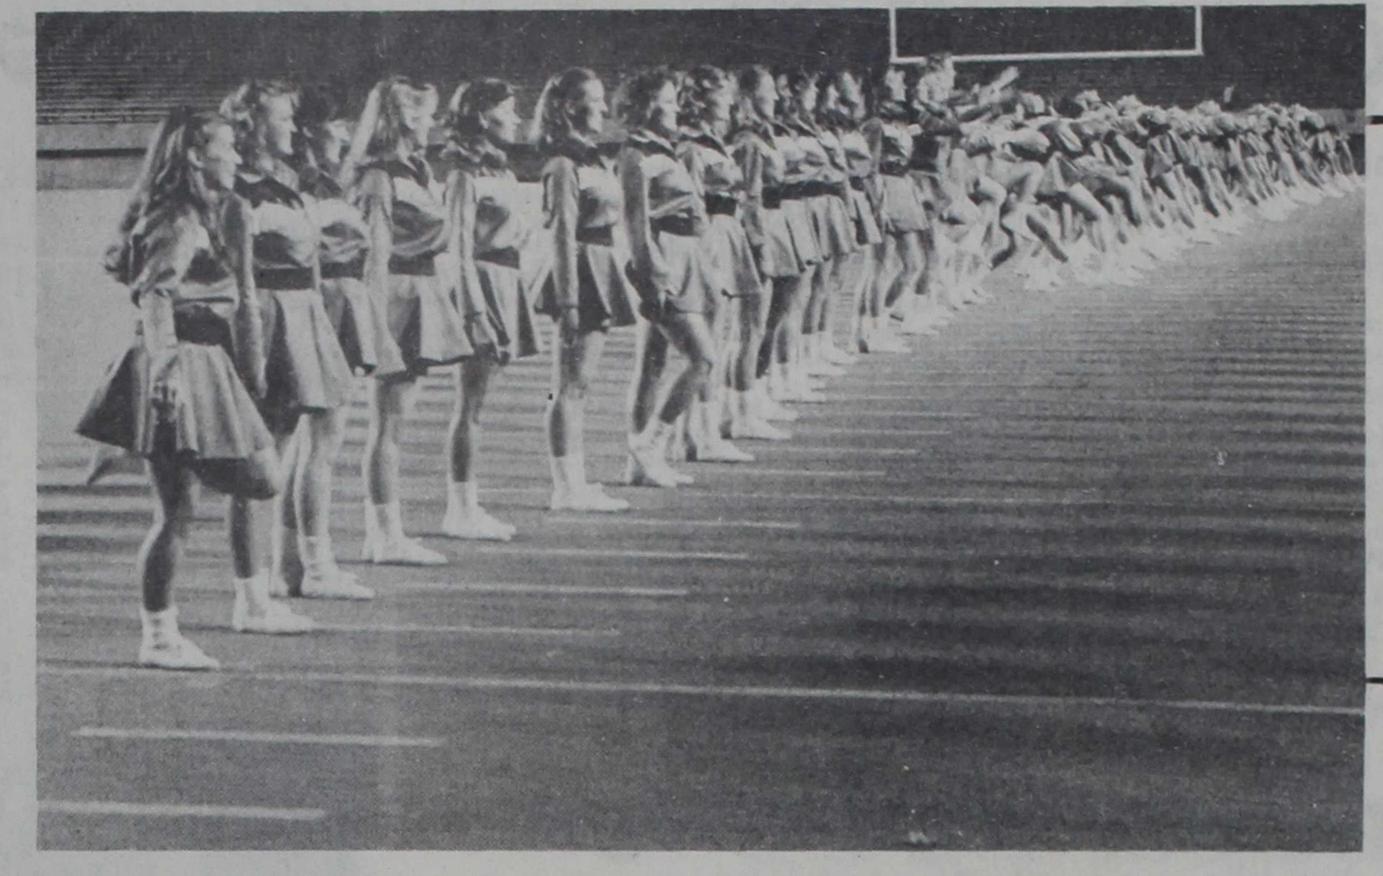

He uses a blue steel revolver but not threateningly. On one occasion, Meyer said, the bandit said "please" when he told everyone to hit the

In three of the robberies, he wore long pants, a short-sleeve shirt, blue or yellow windbreaker and a motorcycle helmet.

Meyer said the robber is quick, efficient and likes to work in the mornings, shortly after an office opens.

Savings and loans are good targets because "they're less security conscious," Meyer said. "They're not even required by law to have a (surveillance) camera on the premises until after they've been robbed. Plus, many of these institutions are quite small and have only a few employees.

"Some of them are isolated, too, not like the larger banks, which cuts down on the number of

Acquainting new freshmen goal of council co-sponsor

Helping freshmen get acquainted with everything Tech has to offer is one of the major goals of this year's Freshmen Council, said cosponsor Charlie Hill.

Interested freshmen currently enrolled in 12 hours can apply to compete for one of the 32 council positions, which are 16 on-campus and 16 off-campus spots, anytime before 5 p.m. Friday. Elections will be Sept. 30.

Applications are available in the Student Association office.

Hill, a former Freshman Council member and presently chairman of the Student Senate Budgeting and Finance Committee, said most of the information available to freshmen is printed in some way.

"Most freshmen don't take time to read this material; they find out what they need to know by word of mouth. We hope by teaching council members as much as possible about Tech, they in turn can inform other freshmen. We plan to devote the first 30 minutes of each council meeting to this goal, by having leaders from various campus organizations come speak," Hill

Another goal of the council will be training its members for future leadership positions on cam-

pus, including senate positions. The council also will participate in planning University Day, when high school students in-

Both exams begin at 9 a.m. Applications are in the Political Science Office, Room 113 Holden Hall. Deadline for applying is October 8. Alpha Zeta will meet at 7 p.m. today at the Ag. Arena. All committees for Ag. Career Day will also meet.

Soviets welcome cosmonaut travel

MOSCOW (AP) - A Soviet space program permitting cosmonauts from socialist countries to travel with Soviets in outer space looks more like a masterly piece of public relations than any important space achievement.

It was only 21/2 years ago in March 1978, that manned space travel was limited to the United States and Soviet Union.

Since then the Soviet Intercosmos program has launched a Czech, a Pole, and an East German in 1978, a Bulgarian in 1979, and cosmonauts from Hungary, and Vietnam earlier this year. A Cuban marked the program's fourth anniversary last week by blasting off in the Soyuz 38 spaceship to join Russian colleagues orbiting since April. And Mongolian and Romanian crewmen are currently in training for similar flights.

Everyone who has gone to date has been a friend of Moscow, not Washington. A similar U.S. program, using the American Space Shuttle, is not scheduled to begin for another few years.

And two Frenchmen are training at the Yuri Gagarin Space Center near Moscow for the first cooperative space venture between socialist and capitalist countries since the U.S. Apollo and the Soviet Soyuz linked in space for 140 minutes in July

Visiting cosmomauts make only one-week flights in the orbiting Salyut 6 space station, a fact that led one prominent Soviet science official to remind the public that a spaceship "is not a trolleybus."

Lubbock's chronic water shortage is being researched extensively and a center at Tech is helping work out solutions to the water problem.

"To foster, promote and conduct water research on campus is the goal of the Water Resource Center at Tech, and we do this by using scientific information to solve water problems," said Robert Sweazy, director of the center.

Sweazy is also vice-president of the Water Resource Board for Lubbock. He said the Resource Center staff is constantly working on new projects. A project now in the early stages of development is a study of using treated sewage water for irrigation. The project began in January.

"We are investigationg the practice of using retreated sewage effluent for irrigational purposes and we think this is a good way to re-use water for a beneficial purpose," Sweazy said.

"But our center will research and make certain, for instance, that there are no problems such as adverse health effects and ground water is contamination," he said.

South Lubbock

Projects such as the effluent study will have very important long term impacts on the economy of the region being developed for possible agricultural uses, Sweazy said.

Because of the number and magnitude of the water problems now facing the state and especially the High Plains, the Tech center works with many agencies such as the High Plains Water District in Lubbock. However, Sweazy said the Water Resource Center and High Plains Water District have different respon-

"The Water Resource Center is constantly researching and gathering information to design projects that will help the water situation," Sweazy said, "but the High Plains Water District's sole purpose is to conserve water within the district."

The center has been in existence since 1965. It has continued to expand in terms of water research and information.

The staff is federally funded, but Sweazy said the center is now asking the state for appropiations and state funding that were revoked a year-and-a-half ago. The center's responsibility is research and continuing education, Sweazy said.

that Type A behavior doubles a score is derived. Rewards offered, motivation anger

DALLAS (AP) - The man who offers rewards, Harmon Schepps, admits the return on his investment is not so good - 20 percent - and his motivation is usually anger, but he insists he could not do otherwise than he does.

When Schepps reads about crimes in the local newspapers and spots one that makes his blood boil, he offers a reward for information leading to the arrest and conviction of the perpetrators. In almost every case, Schepps does not know the victims of the crimes he wants solved.

"Hell, maybe I'm trying to buy a seat into heaven," said the 62-year-old president of Schepps Dairy, Inc., and Schepps Food Stores, Inc. Since 1973, when a clerk in one of his convenience stores was killed, Schepps has paid out \$40,000 in rewards and spent another \$20,000 advertising the rewards.

Police credit Schepps' rewards with helping solve at least six murders in the past seven years.

"People always want to know why I do it. We're not looking for any ego trip. Every person who has a good mind and an able body ought to have a commitment of some kind.

"I also have a selfish interest. I want the streets safe for my customers and my family." Schepps' latest anti-crime investment is a \$10,000 reward he has offered in a Sept. 11 abduction-rape-murder case. He does not know any of the three victims, but wants their assailants

"When a woman is involved, when she's assaulted, I can get awfully damn mad."

Schepps says only one reward offer in five gets results, and admits, "maybe every one we paid off might have been solved without a reward.'

But as long as the money and his anger hold out, Schepps said, the rewards will continue. "In nearly every case, somebody knows who did the crime. Most of these people (criminals) just have to boast about their

Often, Schepps finds finds himself paying off "low-life characters" who turn in acquaintances just to collect his

"No matter how distasteful it is," he insists, "it's a way to separate the murderer or robber from society. Some of them are about to do it again and again."

By CLAY WRIGHT **UD Staff Writer**

Sitting in a bathroom on a cold seat can be quite taxing on one's patience at times. To make matters worse, if you have failed to take anything with you to read or do while mother nature does her thing, the experience can be less than pleasant.

All is not lost. Nothing is a more accurate appraisal of what a society is con-

cerned about than graffiti on the bathroom wall. In the quiet solitude of a private stall one has no concerns or worries, nothing to divert the mind. All of the trivial oddities of life can be disposed of.

When one sits down he/she can concentrate on the rhetorical questions of life and can ponder on the very nature of man.

In the seclusion of the toilet one is free to express his or her innermost feelings in print.

You need not worry someone will doubt your word or engage in a violent exchange of verbiage with you, for the next occupant will be unknown to you, and he/she of course will not know who his/her predecessor was. Let's face it, there is not a whole lot to do while sitting on the

john: if you try to do your homework your pen will fall in the water, the lighting is not great for reading and music and television are still in the distant future. The beginning of graffiti can be traced to the beginning of man

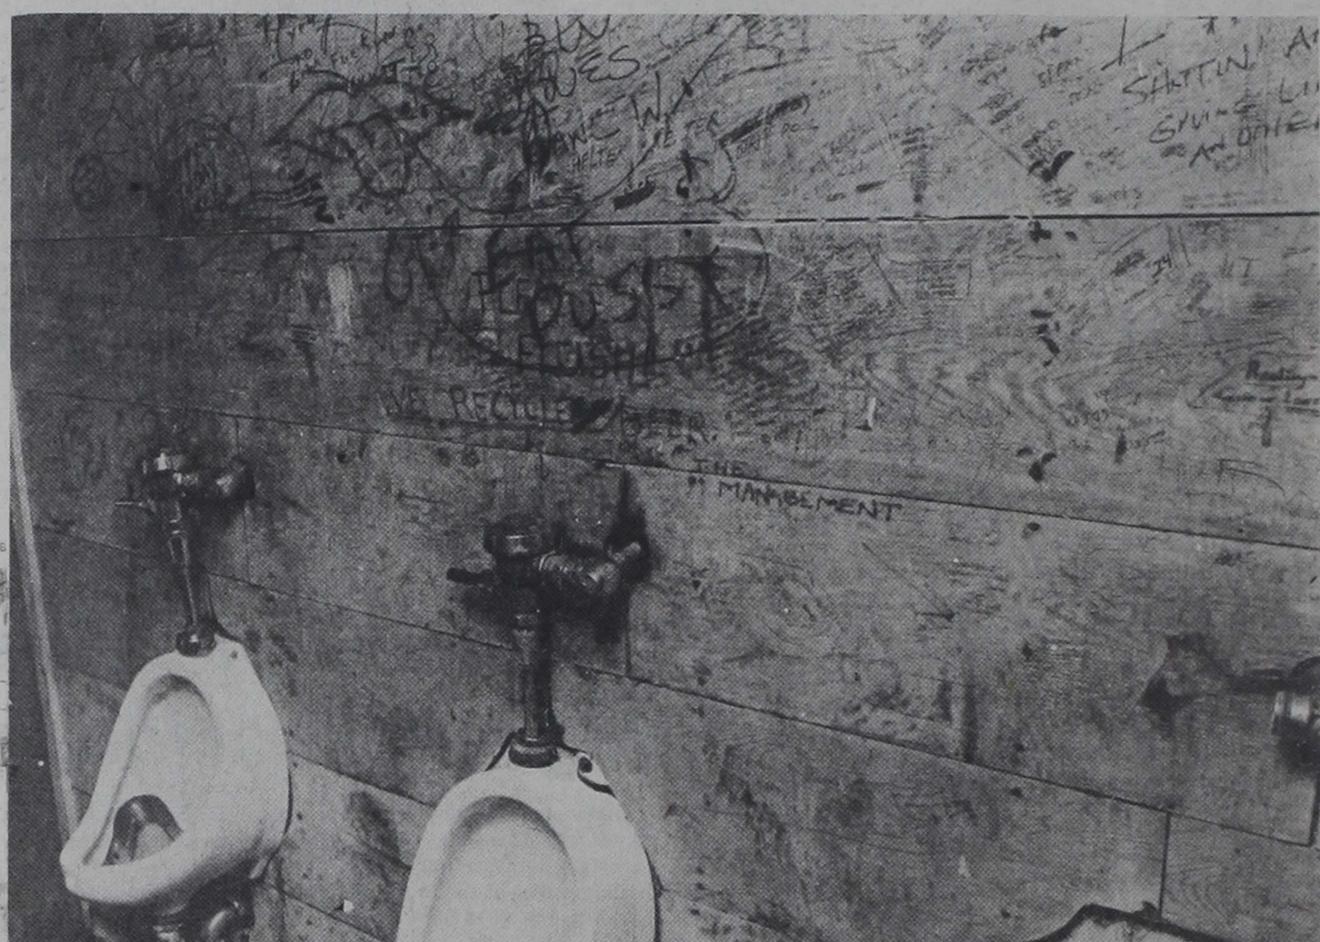

himself: all those cave drawings weren't done for artistic relief, they were done for relief of boredom.

Researchers have done dissertations on social norms as implyed by bathroom grafitti. Some of the greatest pieces of literature were inspired by ideas scribbled on a toilet wall. It is true that the walls predominately are inscribed with

obscene language and gestures, but occasionally a true selection of artistic expression can be found. So now go forth and seek out expressive comments. Be not afraid to jot your own words of wisdom upon the pearl white or

The authors of some of the most creative pieces of writing will never be known, for their works appear as 'the writing on the

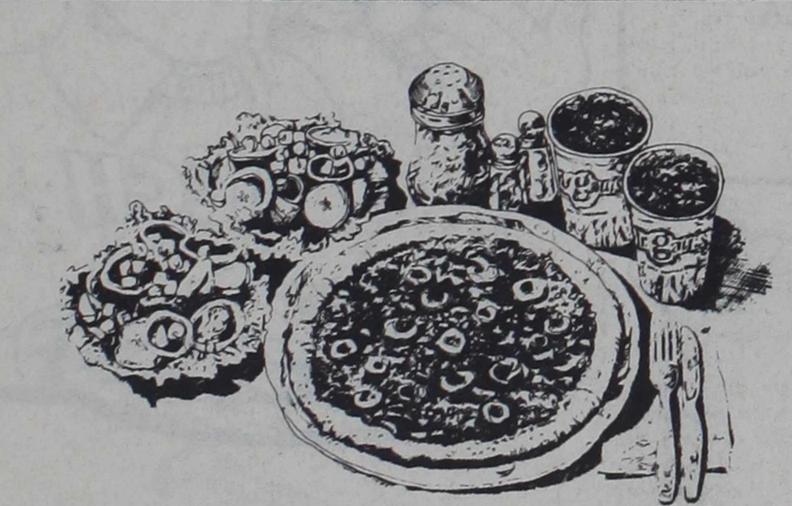

porcelain walls of a sanctuary of relief.

The men's room at Fat Dawg's has long been known to be THE place for bathroon graffiti. The wall not only boasts the traditional advice to the broken-hearted, telephone numbers for the lonely,

and exclamations of "I was here," but also is covered with notable renditions of life's philosophies. The wall is so loved by the owner that the clubs management has vowed to leave the wall intact despite new renovations to the building.

Get a great deal on a great meal.

Buy any large Mr. Gatti's pizza with three ingredient toppings or more, and we'll throw in salads and soft drinks for three people absolutely free!

That's an over \$3 savings on a complete meal for three. And that's one terrific value on one terrific pizza.

But that's not all. Order an extra large Mr. Gatti's pizza with three ingredients or more, and we'll go one step further and throw in the soft drinks and salads for four.

Pitcher of Miller or Miller Lite just \$2.00. University store only.

An almost \$5 savings just for having the good taste to come to Mr. Gatti's. The best pizza in town. So come into your nearest Mr. Gatti's soon. And get a great deal on a great meal.

The best pizza in town. Honest.

through the task of autographing 500 ceramic dinner bells at a Tempe company, Sandstone Creations.

Sandstone, which makes Southwestern-oriented stationery and gift items for marketing through gift and department stores across the country, is using DeGrazia's "Little Prayer" painting of an angel as the design for a limited edition of 7,500 bells.

DeGrazia said he wasn't burning any more paintings - "it's too hot."

But, he said, he's still angry with the government tax officials and is storing paintings in caves in the Superstition Mountains.

"Nobody knows where they are but me," he said. "If they can't see 'em, they're not there,

DeGrazia set a torch to some of his paintings to protest the inequities of a tax system which, he said, only allows an artist to deduct the price of materials for a work he gives to charity, "but when you die, they want 50 percent of the paintings you have left."

"Nothing protects the artists in this country," DeGrazia added. "In Europe, Ireland, even the Far East, they like artists. But not here.

Bowes said.

Tech's women's tennis team will travel to Plainview this afternoon to face Waylon Baptist College in dual match at 2:30 p.m. The Raiders defeated Midland College 9-3 in their last outing.

Coach Mickey Bowes plans to three players tough competistart Regina Revello, Peggy O'Neil, Jill Crutchfield, Kathy her serve and volley and Ber-Lawson, Kay Tally, Sue Mangum and Becca Fritz.

Bowe's main concern, player. however, is with the West Texas State University match. The Raiders return home to meet the Buffaloes Saturday at 10 a.m. in a dual match on Tech's intramural courts across from the campus police station.

"They have recruited well. faloes this year.

Spikers take on A&M Coach Terry Condon's Aggie

Facing a virtually unknown coach and team will force Raider team comes to Lubbock noted coach Janice Hudson to enter as a highly aggressive team tonight's Tech+Texas A&M volleyball game with open anticipation.

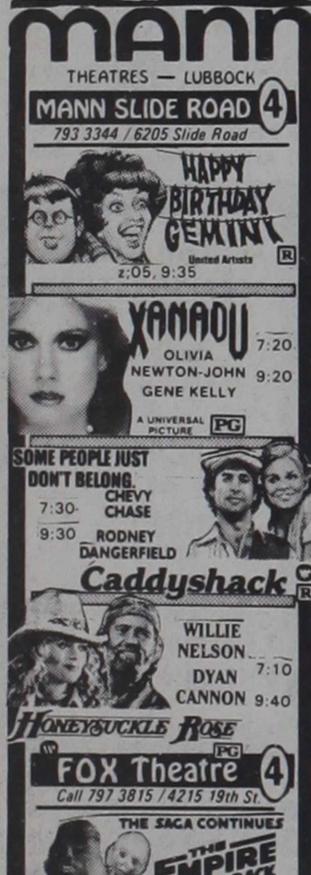

The 6 p.m. match marks the first time ever the Aggies have competed in Lubbock in a volleyball game.

Coach Cindy Carleton's squad will take its 5-4 record on the line when the Raiders host West Texas State University in a doubleheader today. Gametime is set for 4 p.m. at the Mose Hood Park, located at Ave. Q and 24th Street.

Earlier this season the lady Buffalos defeated the Raiders in a doubleheader in Canyon.

"I think everyone was a little nervous in our first game with WTSU, but I think we're ready for them now," Carleton said.

"If our defense plays as consistently as it has been, we should take both games," she said. "Our confidence is up and we're playing on our home field which should help us a lot," she

Since that first game in Canyon, the Raiders have fared quite well in their last outings. At the San Antonio fast pitch tournament, the Raiders placed fifth in a field that featured nationally ranked teams from Texas and Oklahoma.

Last week the Raider squad defeated Angelo State University in a doubleheader by scores of 16-7 and 11-10.

First baseman Susan Harrington and third baseman Natalie Lee were both cited for

Tech sets for Baylor

By JEFF REMBERT **UD Staff Writer**

After taking the New Mexico game off, the Raider passing game will return to action Saturday against the Baylor Dockery said Monday.

Tech will try to ride the momentum of Saturday's 28-17 win against the New Mexico the Baylor contest.

Tech attempted only four passes against New Mexico for 11 yards. Against UTEP and North Carolina, Tech's air attack accounted for 385 yards.

Dockery said the Lobos' defensive blitz helped the Raider running game scamper for 247 yards. Fullback Wes Hightower gained 110 yards and tailback Anthony Hutchison collected 71 yards

Baylor will force Tech to Dockery said the entire change its offensive strategy.

A trio of Bear linebackers will instigate the change. The trio, Mike Singletary, Doak Field and Lester Ward, have been called the best linebacking corp in the Southwest Conference by several sports publications.

dispute such a claim. Instead, he looked at the game from a

Tech offensive standpoint. got to be able to run with the ball," Dockery said. "I believe we've proved we can run the continue to periodically spell ball, because we ran against a quarterback Ron Reeves.
