

Rally Climaxes Campaigns

A VOTER'S DILEMMA

...faces Patsy Rohrdanz, Houston freshman, as she stands amid an endless array of campaign posters and tags wondering whom to vote for in Wednesday's election. Tonight's rally may help her decide.

Candidates Will Speak To Young Democrats

Two candidates for the governorship of Texas, John Connally and Don Yarborough, will be on hand at a meeting of the Lubbock County Young Democrats at 8 p.m. today.

The public is invited to attend the session in the downstairs Ballroom of Tech Union. Top newsmen will interview the gubernatorial candidates, acting as a panel. Representing the news media are Jerry Hall, *Avanture-Journal*; C. W. Ratliff, KCBT TV; and Duncan Ellison, KDUB news director.

"The presence of these two candidates does not constitute endorsement by the Young Democrats of any candidate," said Van McVay, president of the organization. "All candidates were invited but previous commitments prevented the others from accepting," he continued. McVay pointed out that the program is merely a public information program sponsored by the club.

Both Connally and Yarborough will make closing statements after answering questions from the panel. Their appearance at the Young Democrats meeting will wind up a full day of campaigning in Lubbock.

Preceding this meeting, members of the club will meet at 7 p.m. to select a new vice president. Can-

Junior Council Sets Deadline

Today is the last day women may apply for membership in Junior Council, junior women's service honorary. Women may pick up applications in the office of the Dean of Women. Applications, along with a picture, should be turned in to Judy Cowger, Box 36, Horn Hall.

Campus politicking reaches its acme tonight with an all-college election rally at 6:45 in Lubbock's spacious Municipal Auditorium. Wednesday voters go to the polls.

Candidates for Student Assn. executive offices will be officially nominated tonight by their campaign managers. During their speeches, the candidates will announce their platform positions. Floor demonstrations will add color and excitement to the second annual spring election rally.

Gerald Hodges, Student Assn. business manager, will be master of ceremonies. Peggy Maloy, Assn. secretary, will give the welcoming address. A section of the Tech band will provide the music.

Techians attending the event will be greeted by cheerleader candidates at their campaign booths in front of the Auditorium. Workers will pass out campaign literature while candidates perform skits.

Tonight voters will see and hear the candidates. Starting at 8 a.m. Wednesday, they will cast ballots for the person of their choice.

Charlie Aycock and Dick Perkins are campaigning for the Student Assn. presidency. Jerry Parsons is unopposed for the vice presidency.

Also, as the only candidate for business manager, Kenny Abraham should face little trouble with the voters. Karen Anderson and Ginger Butler are competing for Assn. secretary.

In the cheerleader election, voters will choose three women and three men. Women candidates are

Jimmie Bibb, Christie Brown, Carolyn Buxton, Polly Dahl, Sudie Halsey, Dianne Harbert, Judy Jackson, Marianne McCarthy, Dottie Mize and Carolyn Wood.

Jim Vick, Mark Taylor, Larry Pelt, Wendell Newman, Mark Murdock, Lee Pfluger, Larry Gill and Johnny Appleby are campaigning for the men's positions.

Voting booths will be located in the Ad, Student Union, C&O, Home Economics, Agriculture and East Engineering Bldgs. All polls are closed during the noon hour except for the Union booth. Voting ends at 5 p.m. I.D. cards must be presented to election officials.

Approximately 4,000 ballots have been printed in expectation of a large voter turnout, according to Miss Maloy. She reminds candidates for executive positions that they may campaign for Student Council representative offices if they are defeated Wednesday.

Candidates for representative offices may begin their campaign at 5 p.m. today.

Wednesday morning a special election issue of the *Toreador* will be distributed. The issue will include campaign advertisement along with news stories concerning the candidates and their platforms.

Alpha Phi Omega members will supervise the demonstration and enforce the rules at tonight's rally.

High School Students Compete In Interscholastic League Here

Over 2500 high school students will be in Interscholastic League competition on the Tech campus Friday and Saturday. The annual regional meet is under the direction of Dr. Holmes A. Webb, associate professor of education at Tech.

District winners in Region I, con-

ferences AA, A and B will compete in debate, journalism, poetry interpretation, prose reading, extemporaneous speaking and ready writing.

Students will also compete in persuasive speaking, typewriting, shorthand, number sense, slide rule and science. These events will begin on Saturday morning.

Sports events in golf, track and field and tennis are scheduled to begin on Friday morning. Tee off time for the golf meet is 8:30 a.m. Friday at the Meadowbrook Golf Course in Mackenzie Park.

Track and field events will be held at the Tech track, beginning with field preliminaries at 10 a.m. Friday. Final track and field events will be held Saturday.

Boys' and girls' tennis matches begin at 8:45 a.m. Friday at Tech and Lubbock High School Courts.

The One-Act Play Contest starts at 4 p.m. Friday at W.B. Atkins Junior High School. Saturday competition will begin at 2:30 p.m.

The West Lobby of the Union will be used as the information center for the meet. Results of the contests will be posted there.

The Tech Red Raiders will play an intra-squad football game following the final track event Saturday. Visiting students are invited to attend. There will be no admission charge.

Father Hanley Will Discuss Religious Poem

Father William Hanley, chaplain for Catholic students at Tech and assistant pastor of St. Elizabeth's Catholic Church, will be the Poetry Hour guest speaker at 4 p.m. Thursday in the Tech Union Ballroom Lounge.

Father Hanley will discuss the religious aspect of the poem "Hound of Heaven" by Frances Thompson. He will also speak about the life of the author and the main theme of the poem.

Born in Ireland, Father Hanley attended college in Rome, Washington, D.C. and the University of Detroit. This is his third semester as Catholic chaplain at Tech.

ENGINEERS EXPERIMENT—Tech's Engineering Show, scheduled for Friday and Saturday, promises to be a top notch attraction with everything from space capsules to rockets. Here, chemistry students conjure up a "mirage" from a test tube that closely resembles Tana Tolleson, Tech's 1962 Miss Playmate. Officials of the show have predicted that the exhibits this year will outshine anything shown in past years. (See story Page 5.)

A Look at Trimester Plan

One Change Deserves Another?

DOES ANYBODY REMEMBER: Hadacol?... Wley Walker and Gene Sullivan?... "Trushay, the Before-Hand Lotion"... Don't Fence Me In?... those little tin gadgets for roll-your-own cigarettes?... The American Magazine?... Lulubelle and Scotty?... Stepin Fetchit?... Polly and Her Pals?... Red River Dave?... Arthur Lake?... "Smoke on the Water"... Captain Midnight?... The Chuck Wagon Gang?... the OPA?

The special student committee on campus traffic has come up with some significant, if hardly unique, proposals for improving the almost ridiculous conditions which currently prevail.

The recommendation of an appeals board to handle student traffic infractions is a very sound one, perhaps the committee's most important contribution. Adequate lighting on parking lots also seems vital, but I'm afraid it's almost too much to ask, in view of the big struggle that was involved in merely getting parking spaces marked off in paint.

The proposal to ban traffic from the circle is pretty much old hat, and I'm interested in knowing just what compromises the "mechanics" of such a move. Seems to me it simply requires an official ruling by the administration. One week's notice would be adequate; a traffic-less circle next Monday morning would be one of the more refreshing occurrences on the Tech campus in several years.

Hear about the two Spanish golfers who were swinging away in a sand trap? A caddy runs up and says excitedly, "Furry, someone just shot Juan."
"Oho," cries the first golfer, "a hole in Juan."

In view of the thoroughness of the student traffic committee's report, some of the "assumptions" on which it was based are a bit strange.

First, it seems that some qualifications should be made regarding the statement that "pedestrians should have the right-of-way on campus." If automobile traffic is to be allowed on the campus at all, and if those who drive and park here are required to pay a fee to do so, what sort of strained reasoning requires drivers to give up rights-of-way to walkers, beyond the normal exercise of courtesy and adhering to standard rules at designated intersections? I'm thinking here of the conditions which prevail between classes and particularly at noon, when streams of seemingly unconscious students pour out of buildings like waves of drug addicts stalking around in search of a fix. Cross-walks, traffic lights and intersections simply don't exist at times like this.

Consequently, traffic gets tied up at every critical point, tempers flare and everybody has a swearing good time. It's a miracle that we don't have at least ten serious accidents every day.

If pedestrians are to expect right-of-way, they should be required to obey traffic lights and cross only at specified intersections. And if they're given the right of way without this, all auto traffic should be banned from the campus. Mass migration on foot and by car at the same time aren't compatible.

Secondly, the contention that campus parking is a "privilege rather than a right" is rather nauseous. The distinction is really immaterial; this is no more than an authoritarian position which accomplishes nothing except perhaps save the consciences of some who would rather stick their heads in the sand and hope the parking problem will go away. The college is certainly not obligated, in any legal sense, to provide parking. But as a progressive, modern institution, it should make very effort to provide whatever is necessary to make the accomplishment of its mission easier and more efficient... and today, in Lubbock, Texas, adequate parking facilities are a vital necessity, particularly to off-campus students, most of whom require efficient transportation to jobs and homes.

The college has quite valid reasons for being unable to provide such facilities right now, but it should face the problems squarely and acknowledge them, rather than avoiding the matter by resorting to the old "privilege rather than right" saw. Totalitarian societies pretty well hold the copyright on that.

The first major revision in several years in Texas Tech's academic program will go into effect this fall with the initiation of the four-point grading system. According to reliable sources, however, another important change may come in the not-too-distant future.

Although nothing official has been done as yet, a proposal that is constantly gathering backing is one which would change our present semester system to a trimester plan.

As with any new suggestion, the trimester proposal has its opponents, who have not failed to point out a few unfavorable characteristics. Its supporters feel the good points outweigh the bad, however, and they present an argument that can not easily be dismissed.

The trimester system has been used in many places and with generally good results. In most colleges and universities that use it, each of the semesters lasts for a period of 15 weeks. A one-week vacation is allotted between each trimester, with four weeks of holidays rounding out the year. The feature of the system that is most attractive as far as Texas Tech is concerned is that it would allow the college to care for an expected increase in attendance the next few years without building more classrooms.

With college registration expected to double in the next 10 years, there will be great pressure on state-supported schools to offer rather extensive summer programs, almost to the same extent as fall and spring semesters. Certainly Texas cannot afford to double the facilities. It is such a problem that some feel within five years the Texas Legislature will deliver a mandate to state-supported schools to change over to the trimester system.

In the past, students attending schools employing the trimester system tend to drop out for one of the three terms and attend the other two. Proponents of the trimester believe students would gradually spread themselves evenly throughout the three semesters.

More than 12,000 Techsans are expected to fill registration lines by fall of next year and a like number for the following spring. In the past, approximately one-third of the long semester enrollment average has registered for the summer terms. Using this as a guide, the 1962 summer session should have a registration in the neighborhood of 4,000 students.

Assuming that 2,600 students who would normally attend the fall and spring semesters decided to attend the spring and summer terms, and another 2,600 decided in favor of summer and fall semesters, the resulting attendance would find the fall and spring semesters with 9,400 each. The 5,200 changing to summer semesters would give it a registration of 9,200. Since Texas Tech is now equipped to handle the needs of 12,000, an additional 2,600 students could be taken care of each semester without dipping into the building fund.

The other side of the question, however, is posed by opponents who feel there would be no substantial difference between the amount saved by not building and the amount spent to hire additional teachers to match the increase in students. The ratio of increase of teachers to students would be almost directly proportional. A 10 per cent increase in students will necessitate a 10 per cent increase in teachers. Maintenance costs would also soar.

The trimester plan would provide better utilization of facilities since they would be used on a year-around basis. To switch to the trimester plan, college officials would have to offer as many courses in the summer as in the fall and spring. This is an important consideration to many, because it would make it much easier for a student to plan for a degree. Many courses now offered only in one particular semester would have to be offered in at least two and possibly all three terms during the year. The new plan would eliminate the year's delay to students who failed required courses which, under the semester system, are offered only in certain semesters each year.

The biggest disadvantage of the trimester plan is that persons, especially public school teachers, who come to Tech in the summer to take six-hour sequence courses—Government 233-334, for example—could not do so in a summer trimester. The appeal of Tech to area teachers is so great that a separate summer session would have to be offered in all probability. Result here, of course, is more expense and trouble.

It's a proposal that would have to be viewed from many angles before a definite conclusion could be drawn. But with the many advantages that apparently accompany the trimester plan, the time spent in looking into the suggestion would not be wasted effort.

CHARLES RICHARDS
—Editorial Assistant

Let's Welcome The Visitors...

The Regional Interscholastic League Meet will be held on campus Friday and Saturday. Techsans will have an opportunity to "sell" their school to the visitors.

The visiting students will be the best academic material that West Texas high schools have to offer. The regional area extends from the Oklahoma line to Junction and from Granbury, some twenty miles west to Fort Worth, to Fabens, thirty miles east of El Paso.

Let's make every effort to make these students feel welcome during their stay on our campus. Texas Tech is a friendly school—let's be "extra" friendly on Friday and Saturday.

Several student organizations are making plans to make the visitors welcome. This is good. But, we need more than that. Each and every student can help by simply going out of their way to be nice to the visitors.

Let's make it a big weekend for Texas Tech!

STEREO WINNER—Don Grimes, representing Delta Tau Delta, accepts a stereo set from Phillip Morris campus representative, Ronnie Koons. The set is first prize in the Philip Morris pack-saving contest. Second place winner is Kappa Alpha and third place went to Ken Ballard.

Queen Reigns Over Rodeo

Connie Mitchell, freshman from Rookspring, will reign over the three-day Tech Rodeo, April 19-21, as the 1962 Rodeo Queen.

Miss Mitchell was elected from a field of six candidates by a student penny vote. Her election was announced at the Hank Thompson dance Saturday night. She was not present, however, because she was in New Mexico representing Tech at the Las Cruces college rodeo.

Miss Mitchell will lead the downtown parade April 19 opening the rodeo. At the rodeo she will be presented with a gold and silver belt buckle and a bouquet of roses.

Miss Mitchell was sponsored by Pi Beta Phi social sorority, of which she is a member.

Journalism Honorary Names Freda McVay Outstanding

Freda McVay was named outstanding senior woman journalist of the year Monday at the Matrix Table Banquet before an audience of nearly 75 persons.

The yearly award is presented by the Tech chapter of Theta Sigma Phi, women's journalism honorary, on the basis of outstanding journalistic work.

The award recipient is an issue editor for the Toreador and has served for the past year as Theta Sigma Phi president. Her activities include membership in Sigma Kappa sorority and Town Girls Club. She is editor of two monthly magazines sponsored by the Lubbock and

Hillcrest Country Clubs and is active with the Lubbock County Young Democrats organization.

Highlighting the annual banquet was a speech by novelist Jay Milner. Milner, a former Tech student, is author of "Incident at Ashton." His second novel, "Yonder Mountain," will be published this fall.

SEA

Thursday, April 19, is the date for the Student Education Assn. spring banquet. The banquet will be from 6:30 to 8 p.m. in the downstairs Ballroom of the Tech Union. The program will include installation of new officers.

Speaker for the evening will be James Taylor, past vice president of TSEA. Tickets are \$1.50 and may be purchased at the Education office and at the ticket booth in the Union.

DOUBLE-T ASSN.

All members and pledges of the Double T Assn. are urged to attend a meeting at 8:15 p.m. in the Stadium Lounge. Topics to be discussed are the dinner dance, the spring game ticket sales and initiation.

PSI CHI

Psi Chi, national psychology honorary, will meet at 7:30 p.m. Wednesday in the dining room of the Home Economics Bldg. Dr. R. K. O'Loughlin will speak on "Abnormal Behavior From a Psychiatrist's Viewpoint." Members will elect next year's officers.

Cowboys Win First At NMSU

Tech's Rodeo team won first place this weekend at the New Mexico State University Rodeo at Las Cruces.

Tech'san Ed Workman, winner of three events, won top all-around honors and was presented a saddle. He captured first place in bareback riding, saddle bronc riding and ribbon roping.

Other Tech team winners were H. C. Zachry, second in bareback riding and third in bull dogging; Jerry Carson, first in bull riding; Jerry Harlan, second in calf roping; Benton Wardlaw, second in calf roping; and Clyde Ford, second in ribbon roping.

Connie Mitchell, newly crowned Rodeo Queen, represented Tech as a girl team member.

Each team is composed of six cowboys from approximately 12 schools. The team compiling the highest score after six rodeos gains the right to represent their region in the National Intercollegiate Rodeo Assn. Rodeo. This year's rodeo will be in Denver during June.

The top cowboys and team from the four regions in the U.S. will compete in the national finals, which will be televised. Tech is a member of the Southwest region composed of Texas, Oklahoma, New Mexico and Arizona.

Rodeo team members from Tech are selected by the Rodeo Club Board of Directors on the basis of individual ability and current winning success.

During spring vacation the Tech team was runner-up for the first place trophy at the South Plains College Rodeo. Tech is entered this weekend in the West Texas Rodeo.

Tech's Rodeo is April 19-21.

Editor Announces Handbook Deadline

Copy for "Tech Tips," AWS and Panhellenic annual handbook for women students, is due in the Dean of Women's Office today, Dorothy Bowles, editor, announced Monday.

Sororities, women's residence halls and women's honoraries should turn in copy typewritten and double-spaced, along with a glossy picture of major officers.

Additional information may be obtained from the Dean of Women's Office. The AWS representative from each organization is responsible for "Tech Tips" material.

Town Girls Begin Events For April

The weekly luncheon meeting of the Town Girls Club (Catena) will be in the Rec Hall at noon Wednesday. Mrs. Freda McVay, president of the journalism honorary Theta Sigma Phi, will speak on the "Pros and Cons of Political Parties on the College Campus."

Kennett Hobbs, Lubbock attorney, will give a spiritual program on the real meaning of Easter Wednesday in the Rec Hall.

The club will elect officers April 25. Sharon Frost, president, has urged all members to be present at these last two meetings in preparation for the election.

MINUTEMAN
... set for show

AF Shows Minuteman

Newest weapon in the arsenal of U. S. Air Force intercontinental ballistic missiles, the Minuteman, will be on display at Texas Tech Friday and Saturday.

Airmen of the USAF Orientation Group from Norton AFB, San Bernardino, Calif., will set up the missile display and will appear with it to answer spectators' questions about the Minuteman.

The ICBM to be displayed is a test model version of the three-stage, solid-propellant Minuteman, which is lighter, smaller and less expensive than the Atlas and Titan, but capable of carrying a nuclear warhead more than 6,300 miles.

It is about 60 feet in length and about six feet in diameter. Weight is 60,000 to 70,000 pounds.

Minuteman's smaller size, as compared to liquid propellant missiles, is due primarily to its three solid fuel rocket engines, lightweight warhead and guidance and control packages. The use of solid fuel rocket engines eliminates fuel tanks, extra support equipment and vast consoles needed in current liquid propellant missiles.

As a result of this simplicity, the Minuteman will require fewer men per squadron than the larger ICBMs.

A completely-assembled missile can be easily transported by C-133 cargo aircraft or by a special air conditioned, enclosed truck-transporter.

Minuteman's speed will be about 15,000 miles an hour, or about 22 times the speed of sound. Each of the three engines will use a case-bound propellant charge fitted with a four-nozzle system to permit pitch, yaw and roll control.

Publications Dinner Honors Journalists

The Toreador and La Ventana staffs will celebrate their annual Publications Awards Banquet at 6:30 p.m. Saturday at the Chicken Shack.

Theta Sigma Phi, women's journalism fraternity, will give awards to authors of the best feature story, news story, picture and editorial appearing in this year's Toreador.

Sigma Delta Chi, men's journalism fraternity, will announce the recipient of the W. E. Garets Award, given to the most outstanding member of Sigma Delta Chi.

CRAM COURSE NO. 2: BIOLOGY

The grisly shadow of final exams looms over us, so today in this column instead of merry quips and homely saws, you will find hard facts—quick cram courses to help you through the ordeal ahead.

Last week I gave you a rapid survey of Modern European History. Now let us turn to Biology.

Biology is divided into several phyla, or classes. First is the protozoa, or one-celled animal. All life stems from the one-celled animal. Over a space of millions of years, life slowly evolved until today we have animals with as many as 12 cells. Some larger mammals claim they have 14 to 16 cells, but you know how larger mammals lie.

The second class of animals is the periphera—a shadowy category that borders often on the vegetable. Take, for example, the sponge. The sponge is definitely an animal. The washcloth, on the other hand, is definitely not.

Next we come to the arthropoda, or insects. Most people, of course, find insects fairly repulsive—and yet, if one will but look, there is exquisite beauty in the insect world. Who does not remember the lovely insect poems of William Cullen Sigafos—such enchanting lyrics as *Tumbling Along with the Tumbling Tumblebug*, *Fly Gently, Sweet Aphid*, and *Goats My Mother Taught Me*. Mr. Sigafos has been inactive since the invention of DDT.

Our next category is the mollusca—lobsters, shrimp, and the like. Lobsters are generally found under rocky projections on the ocean bottom. Shrimp are generally found in a circle around a small bowl containing cocktail sauce. Marlboro Cigarettes are generally found at any tobacco counter or vending machine.

What have Marlboro Cigarettes got to do with biology? Well, actually, not very much. It must be remembered, however, that the makers of Marlboro pay me for writing this column, and they are inclined to get surly if I fail to mention their product.

Mind you, I enjoy singing the praises of Marlboro—and so will you once you try that flavorful tobacco, that fine filter which lets the flavor come through undiminished. It is a great pleasure to smoke Marlboros and a great pleasure to write about them, but sometimes, I must confess, I find it a bit difficult to work the commercial into the column. Some years ago, for example, I did a piece about Alexander the Great, and, believe you me, it took a heap of stretching to drop in a plug for Marlboro. The way I finally managed it was to have Alexander go to the Oracle at Delphi and say, "Oracle, I have conquered the world and tasted all its pleasures, but somehow I am not content. I know that somewhere there must be a joy I have not yet experienced." To which the Oracle replied,

There is no great difficulty distinguishing the two

"Yes, Alexander, there is such a joy, but alas, the time is not yet. I refer to Marlboro Cigarettes which will not be invented for another 2500 years." Whereupon Alexander fell into a slunk from which he never recovered... Well sir, there is no question I sold a lot of cigarettes with this ingenious commercial, but the gang down at the American Academy of Arts and Letters gave me a mighty good razzing, you may be sure.

But I digress. Back to biology, and the most advanced phylum of all—the chordata, or vertebrates. There are two kinds of vertebrates—those whose backbones run horizontally and those whose backbones run vertically. Generally, there is no great difficulty in distinguishing the two varieties. A fish, for instance, has a horizontal backbone, and a man has a vertical backbone. Occasionally, however, you run into a problem—like a fish who swims upright and a man who spends most of his time in the sack. How, in such a case, do you tell one from another? Science struggled with this sticky question for centuries, but finally Sigafos of M.I.T. came up with a brilliantly simple answer. Offer the creature a Marlboro. If it is a fish, it will refuse. If it is Homo sapiens, it will accept. In fact, the more sapient, the quicker the acceptance.

The makers of Marlboro, upright vertebrates all, remind you that their fine cigarettes are available in pack or box wherever cigarettes are sold in any of the 50 states.

THEFTS COULD TOP \$1700

Bottle Losses Rise

By MICHAL RAMSEY
Toreador Staff Writer

Are you a thief?

You are if you fail to return bottles belonging in the dorms and academic buildings. Each year thousands of bottles are broken or lost.

Few of the bottles are actually broken; most of the loss comes when students sell them.

During the 1960-61 school year over 100,000 bottles were lost. The largest bottle loss was reported in the men's dorms. For every one of these it cost the college 1 2/3 cents or approximately \$1700. This year, if present trends continue, the figures will run even higher.

Effects of such a loss could be annoying. Chances are the price of buying soft drinks will go up to a dime. Tech students need to become conscious of the loss and strive to lower the figures, according to Tech officials.

The largest percentage of loss occurs in the men's residence halls. Gordon Hall leads the list with a total loss for the 1961-62 semesters of 8,688. Gordon was also

first last year. Totals in the other dorms include Bledsoe, 8460; Sneed, 6600; Wells, 6336; Gaston, 4992; Carpenter, 4938; and Thompson, 4170. Loss in the men's dorms as of February, 1962 is 44,184 and a gain of 9,072 over last year's total of 35,112.

None of the women's residence halls has a number as large as the lowest of the men's dorms. Drane leads with 3,858. Other figures are Knapp, 3,498; Horn, 2,766; Doak, 2,364; West, 2,208;

and Weeks, 1,890 for a grand total of 16,584 and a decrease of 282 over last year's total of 16,866.

With this semester almost over, an increase in the number of missing bottles will probably result unless the students improve over previous years. Christmas, spring vacation and the end of school are the peak periods when students, short on cash, load up their cars with bottles and sell them on their way home.

20 Ad Building Lights Add New Attraction To Tech

They're shiny, they're bright they're red and white.

They are the lights in the Ad Building towers.

For the students and faculty members who don't know, the Ad Building towers have been equipped with 20 red and white lights.

These lights give the dome section of the towers a more picturesque appearance at night.

The lights are a gift from the 1961 senior class. According to Peggy Maloy, Student Assn. secretary, Bob McGough, '61 senior class president, and Ted Ferguson, vice president, came to her last fall with the question of what to give Texas Tech. They came up with the idea of putting lights in the towers. The three then talked with M. L. Pennington, vice president and comptroller, who liked the idea. But before making any promises Pennington talked with Ray Downing, director of building maintenance, and arrangements were made for the Tech maintenance men to put up the lights.

The campus planning committee was allowed to observe the lights in order to choose which tower they preferred. They chose the west tower. The maintenance men then changed the east tower to copy the west tower. Both towers are completely finished and are now ready for use.

The lights will not be on every night. The only time they will be used will be when we win ballgames, at homecoming and at all other special events, Miss Maloy said.

Pikes, Gaston, PhiEK Lead 'Murals

Pi Kappa Alpha, Gaston Hall and Phi Epsilon Kappa currently are leading their respective divisions in the Tech intramural softball program.

Pi Kappa's 3-0 mark is good enough to lead all other fraternity teams. Phi Gamma Delta and Phi

Kappa Psi boast 2-0 records while Sigma Alpha Epsilon holds a 3-1 showing.

Wednesday's action pits Kappa Alpha and the Delts, Sigma Nu and Alpha Tau Omega, Kappa Sigs and the Phi Delts, Fijis and Phi Psi and SAE with Pikes.

Gaston's perfect record leads the dormitory division. Thompson Hall is also undefeated, but only in one outing. Sneed, Bledsoe and Carpenter all are 1-1.

Today's schedule has Carpenter matching Sneed and Thompson facing Gaston.

Phi Epsilon Kappa holds a good margin over its closest rival in the Independent League. The Rodeo Club, Baptist Student Union and Crusaders all have two victories in three games played.

Team	W	L	Pct.
Phi Gamma Delta	2	0	1.000
Phi Kappa Psi	2	0	1.000
SAE	3	1	.750
Sigma Chi	2	1	.667

Tech, H-SU Battle In Net Match Today

Texas Tech's tennis team will meet Hardin-Simmons University today at 2 p.m. in a non-conference match at the Tech tennis courts.

Friday and Saturday the Tech netters took two conference wins to forward their standing to 3-1 in the Southwest Conference and 4-4 for the season.

Friday Tech downed the Texas A&M team 6-0. All Tech netters took wins to defeat the Aggies. Daryle Allison defeated Carrol Kell 6-4, 6-4; Benny Lawrence downed Doug Sassman 6-4, 6-4; Beau Sutherland over-powered Ray Salazar 6-3, 7-5; and Don Draper took out Jerry Foster 6-1, 6-4.

In doubles play Sutherland and Lawrence won over Kell and Salazar 7-5, 6-4, while Allison and Draper out-scored Foster and Sassman 10-8, 6-3.

At Baylor Saturday Tech took another 6-0 win in defeating the Bears. Tech took all but one of

the 13 games played. Allison out-puncted Jim Robinson 7-5, 8-6; Lawrence took Foster Roden 6-4, 6-4; Sutherland defeated Bill McCleary 6-2, 6-3; and Draper downed Cary Don Mize 6-1, 7-5.

The doubles proved to be a little rougher than before. Although Sutherland and Lawrence took an easy win over Robinson and Roden 6-1, 6-0, Allison and Draper found the going not so smooth as Baylor won one of three matches. Allison and Draper took the win in the third match making the final score 6-4, 4-6, took the win in the third match making the final score 6-4, 4-6, 6-0.

Today's game will not be an easy one.

"They (HSU) have a good team and it should be a tough match," George Philbrick, tennis coach, said. "We are improving fast and the boys have been doing a real good job," Philbrick continued.

Today's match is free to the public.

Picadors Stay Perfect With 5-1 Odessa Win

Righthander Joe Fox fired a two-hitter as the Texas Tech Picadors rolled to their fifth straight triumph of the year with a 5-1 win over Odessa Junior College Monday in Lubbock.

Second baseman Foy Williams paced the Tech hitters with a single, double and two runs batted in. Shortstop Billy Monk, catcher Steve Reed, rightfielder Ronnie Simpson and centerfielder Jerry

Guthrie each knocked across one tally.

Monk led off the home half of the first with a triple over the left-fielder's head. Williams followed with a single and the Pies had a 1-0 lead.

After third baseman Richard Perry had struck out in the second inning, Guthrie and Simpson singled. Fox walked to load the bases, and Guthrie came home on an infield out by Monk.

The Wranglers narrowed the margin in their half of the fourth frame. After Williams had gone deep in the hole at second to throw out the first hitter, Fox issued a free pass to the next man. The next Odessa batter hit into a force play and went to second on an overthrow at first by Williams who was going for the double play. A base knock brought in the only Wrangler score of the day.

Tech picked up another run in the fourth. With one out, Fox hit with a pitch by Odessa hurler Terry Stafford. Monk forced Fox at second, but moments later the little shortstop stole second. He moved to third on an overthrow by the catcher and when Williams rapped a double to center, the Picadors had their third run.

Two more markers came across in the fifth. Reed led off the stanza with his second walk. After first baseman Bob Felder grounded out, Perry reached base on an error by shortstop Joe Acevedo. Successive singles by Guthrie and Simpson brought home the final two tallies, both off pitcher Ernie Davis who had relieved Stafford at the onset of the inning.

Fox struck out five Wranglers and issued four bases on balls. There were three errors committed behind him, two of them in the last inning.

The only Picador to fail to reach base in the contest was leftfielder Johnny Mack King.

The meeting was the first for the two teams this season. Tech's first four victories were by lopsided margins over South Plains Junior College.

Palmer's Rally Wins Masters

AUGUSTA, Ga. (AP)—Miracle worker Arnold Palmer came off the floor again Monday, rallied with a withering streak of birdies and won his third Masters Golf Championship in an unprecedented three-way playoff with Gary Player and Dow Finsterwald.

Palmer shot a 4-under-par 68, Player 71 and Finsterwald 77. Down three shots to Player after the first nine holes, the powerful, unshakable young pro from Latrobe, Pa., knocked in birdies on five of the first seven holes of the incoming side in turning the contest into a virtual rout.

The finish was similar to that of Sunday when Palmer, his game on the verge of collapse, saved it with spectacular birdies on the 16th and 17th holes, bringing about a tie at 280.

Player, the usually imperturbable little defending champion from Johannesburg, came off the final green, shaking his head in disbelief and declaring, "That man went crazy out there." The usually reserved Finsterwald seemed almost in a state of shock.

In adding the 1962 Masters to the crowns he won in 1958 and 1960, Palmer established himself firmly as the king of present-day golfers.

AND YER OUT!

... this was a familiar scene Monday as the Texas Tech Picadors won their fifth straight of the year. They beat Odessa College, 5-1.
