NUMBER 2.

SCARLET-BLACK DROP HARD GAME TO T. C. U., 16-6

NEARLY 1400 ENROLLED IN SCHOOL NOW

Student Body Gathered From Throughout Southwest

Thirteen hundred eighty-nine on Friday!

With enrollment approaching the fourteen hundred mark, officials of the college are optimistic, as the registration totals have exceeded earlier expectations. Additional students are entering from day to day despite the ruling that October 1, was to be the last day on which a student might register for full work.

The student body is gathered this year from the entire southwest. Texas contributes her thousand and more, but New Mexico, Oklahoma, Missouri and Indiana, all send their citizens to swell the total in the South's newest Technological College.

Within Texas, as has been the case in the past, practically every county is represented in the student body. Amarillo, Dallas, Ft. Worth, Haskell, Athens, and other distant points, send thirty-five, twenty, or ten students.

From the far corners of the state they are gathered—to a campus that but four short years ago was open prairie.

"DULCY" IS TO BE GIVEN ON OCT. 25

"Dulcy," the first play to be presented this season by the Little Theatre group, is to be given at the High School Auditorium, October 25. Mrs. E. E. White, the director, announces a strong cast for the initial offering.

The following passage which was clipped from a New York newspaper the day after "Dulcy" was presented there, gives us some idea of the play: "As unlike the other clean, hilarious comedies the authors of 'Dulcy' have turned the tables. In the place of the bungling, stupid wife tangling up the affairs of the self-reliant husband, we see a quick-witted little wife smoothing out the affairs of a conceited, block-headed husband."

The cast for the play is as follows:
 Dulcinea Mrs. Byron Dickinson
 Gordon Smith (her husband)
 Dr. G. H. Ater
 William Parker (her brother)
 Gaylord Hankins
 C. Roger Forbes Edgar Shelton
 Mrs. Forbes Earnestine Wilson
 Angela Forbes Eunice Cox
 Schuyler Van Dyck James Allen
 Tom Sterrett (Advertising Engineer)
 Copass Bowen
 Vincent Leach (Scenarist)
 Horace G. Moore
 Blair Paterson E. W. Province
 Henry John Burroughs

TECH SCARLET AND BLACK CLAD PEP SQUAD GIRLS STORM COW TOWN

created a sensation at the T. C. U. game in Fort Worth, Saturday. Dressed in their costumes of scarlet and black, they led the parade from the Santa Fe Station to the Fort Worth Star-Telegram office. Newspaper photographers snapped their pictures for large daily papers.

At the game between halves they performed a unique and attractive stunt, circling as a wheel, turning into football formation, shifting, and then forming a double "T". There they bowed first to their opponents, leaving their scarlet and black hats on the ground, and turning, bowed next to their home team and supporters. Gas-filled balloons of scarlet and black were then released, making a double "T" in the air, as well as the one made by the girls, and the one made by their hats on the ground. Little Eleanor Jean Higginbotham, dressed in a Matador costume, was their mascot.

Broadcast Over W. B. A. P.
 At 6:30 Saturday evening the girls broadcasted several songs from Station WBAP, receiving in appreciation a number of telegrams from loyal

National Guard Unit Is Likely for School

The following information comes from Lt. Killin in regard to the establishment of a National Guard Machine Co. in the college. Lt. Killin outlines the proposition as follows:

I. There has been some talk around the college of forming a National Guard Machine Gun Company to co-operate with the work of the College. It will co-operate in a financial and in a material way by helping the individual members.

II. The National Guard pay will average paying the student's room rent or approximately that amount; and with the proper arrangement they can wear the uniform to make their Military Training requirement in the College.

III. Sixty members are necessary to organize the company, and there are certain things that are an obligation on the part of the members of the company. They must enlist in the National Guard for three years, and they must attend the regular drill each week and must also attend camp for fifteen days in the summer.

CALENDAR.

Tuesday, Oct. 11.

7:30 P. M. All-College Pep Meeting at the Gym.
 Senior Class Meeting to follow Pep Meeting.
 Sophomore Class Meeting to follow Pep Meeting.
 Military Training Corps to follow Pep Meeting.

Wednesday, Oct. 12.

9:00 A. M. Convocation at the Gym.
 7:30 P. M. Press Club meets in Room 217.
 7:30 P. M. Debating Club meets in room 221.

Thursday, Oct. 13.

2:30 P. M. Meeting of all men interested in Tennis—Room 209.

Friday, Oct. 14.

8:00 P. M. Pi Gamma Mu meets to hear Prof. DuFlot on "Environment and Heredity". Open Meeting, those interested invited.

Saturday, Oct. 15.

3:30 P. M. Simmons University meets the Matadors on Tech Field.

Dr. Horn Says Amarillo For Tech, A & M Game

President Horn went to Amarillo Thursday, where he addressed the Rotary Club of that city. Dr. Horn expressed confidence that Tech would defeat A & M on October 28. The people of Amarillo are wholeheartedly behind Texas Tech and are pulling for the West Texas team in this encounter, the president reports.

THAT OLD COLLEGE SPIRIT

(Editorial)

The T. C. U. game is over! Tech has again gone down to Cowtown to play the Horned Frogs, and again Tech has gone down in defeat. But, is that all? Decidedly not. That outburst of genuine college spirit that was evidenced on Thursday night before the Matadors and the three hundred supporters embarked on the special is by no means dead. Although the first Southwest Conference struggle is in the background of oblivion the memory and the spirit of real college enthusiasm still lives.

Without the realization that the entire student body was behind their efforts to vanquish the highly touted Frogs, the Matadors, try as they would, could not have fought the unequal battle that they were called upon to undertake, when in the first half they kept the T. C. U. eleven from scoring. Again, this realization of the support accorded them by the three hundred rooting, praying, fans on the sidelines and the unheard, though often expressed petition of the thousands of supporters left at home, spurred them on in the fourth to a touch-down.

The spirit that does not know the meaning of defeat, the spirit of the Alamo, the spirit of Texas Tech, is all that could have kept those muddied Matadors, their faces stained with the marks of the unequal contest they were waging, out there on the field in the fourth quarter—striving—and attaining the coveted goal for which the prayers of all Tech fans were being uttered.

Tech is glorious in defeat. Neither is the great victory of the T. C. U. team to be minimized. The Ft. Worth team well knows that they were battling a great eleven, but now that the T. C. U. game is over all-Tech will turn its attention toward the task of carrying on.

Next Saturday the Matadors meet Simmons. Simmons, despite the fact that practically all eyes have been turned toward the Frog and Aggie contests, has a powerful machine. The spirit emphasized by the student body last Thursday night must be maintained.

With the pep meeting to-night, Tech defiantly embarks on its task of taking the Simmons Cowboys into camp. With this contest over, the Matadors can then turn their attention to Sul Ross, Texas A. & M. and later rivals. Bear the message of Coach Freeland in mind, "Let us not cross our bridges before we get to them." Beat Simmons and then on to the next team on the schedule.

Keep the Old College Spirit where it was last Thursday night and it will be easier for the Matadors to do the actual work.

Pre-Law Club to Attention Now Take in First Year Men Turns to Aggie Combat on 28th

About 15 Pre-Laws met Thursday in the first meeting of the year. Due to the pep meeting and subsequent interest for the trip to Cow-town, attendance was reduced considerably. No business of any importance was transacted due to the fact that a quorum was not present.

All Freshmen who contemplate the study of law in the future are urged to be present so that a full membership can be registered. Marvin Pines, Wilburn Eddleman and J. W. Jackson were appointed to arrange the program and initiation stunts for the next meeting.

Chief Kirby, Britian and Truitt Smith were appointed to see all Fish Pre-Laws and see that they are present next time.

Alvin Allison, Secretary, failed to return this year and his successor will be elected at the next meeting, Wed., Oct. 25 in room 221 at 8 o'clock.

Convocation Each Wednesday Plan

The Deans of the College in conference with President Horn have agreed that one period each shall be saved for general convocations, student meetings and other extra curricular activities. These meetings will be held at 9:00 o'clock Wednesday each week.

The first bell will ring at 8:50 which will enable the Convocation to begin promptly at 9:00 o'clock. The other periods of the day will be shortened as per the schedule given below. Keep in mind that this is to be a permanent arrangement and for Wednesday only.

1st period—8:00 o'clock to 8:50
 2nd period—Convocation, 9:00 to 9:40
 3rd period—Regular 9:00 classes, 9:40 to 10:30
 4th period—Regular 10:00 o'clock classes, 10:30 to 11:20
 5th period—Regular 11:00 o'clock classes, 11:20 to 12:10
 6th period—Regular 12:00 o'clock classes, 12:10 to 1:00.

(Signed)

J. M. GORDON, Chairman, Schedule Committee.

With the A & M game less than three weeks away, all-Tech is agog with excitement in anticipation of the inter-sectional gridiron contest. At a meeting held last week final arrangements were made for the banner contest, which is to be played here October 28.

Permanent boxes are to be erected in front of the new steel and concrete stands. With this additional seating room the main stands will be able to accommodate over 4,000 people. The knock-down bleachers will accommodate thousands more and the Tech field will be able to seat over 7,500 people on the gala day.

Tickets have been placed on sale in practically all of the surrounding towns and it is reported that these cardboard are going rapidly. The Texas Technological Band which won such laurels in Ft. Worth Saturday, is arranging to meet all trains on October 27 and 28. The band will escort the Aggie team to their lodging when they arrive here on the day preceding the game.

Writer's Club to Select Officers At Next Meeting

With 13 present for the first meeting of the year, the Press Club met Wednesday evening to complete organization for the ensuing year. Wilburn Eddleman, Mrs. Myrtle Morrison and J. W. Jackson were appointed as a nominating committee to select at least two candidates for each office for the current year. The Club will agree on one of these names at its next meeting.

Through an amendment to the constitution all officers will hold office throughout the year instead of for three months as has been the case in former years.

Misses Gill, Conner and Rylander were appointed as a temporary program committee to arrange a program for the next meeting.

All Freshmen who are interested and all Journalism students are especially invited to attend the next meeting Wednesday, Oct. 12, at 9:00 o'clock in room 217.

MATADORS HOLD FROG TEAM SCORELESS IN FIRST HALF; TECH SCORES IN LAST FRAME

The hard hitting, record-breaking Matador team went down in defeat before the onslaught of their more seasoned rival, T. C. U., in Fort Worth Saturday afternoon, on a field coated with a thick layer of mud. The boys from West Texas lost, but their loss was in no wise an inglorious defeat for the T. C. U. team was kept constantly on the alert. Pickett, Matador Freshman, made the most spectacular play of the afternoon when he ran 70 yards to a touchdown in the fourth frame. The game ended with Tech on the low end of the 16-6 score.

MAKE AND KEEP YOUR SONG BOOK

Every issue of The Toreador will contain one of our college songs. It is the desire of everybody to have as much college spirit manifested at meetings as possible. We need songs as well as yells. What can you offer to swell our collections? We already have a considerable number, but we need more.

Use a well known tune to submit some words. We'll try 'em out and put the best in the new book that the college is about to print.

W. R. WAGHORNE.

Our College Songs.

Fight, Tech, fight!
 And do you level best,
 Fight, Tech, fight!
 And leave to us the rest;
 And when we hit that line
 There'll be no line at all;
 There'll be a bull fight in
 the old town to-night!

(Cut this out and paste in a notebook. Keep for Convocations, and Pep meetings. OTHERS WILL FOLLOW.)

STUNT PLANS FOR AGGIE ENCOUNTER SQUAD SECRET

With the pep and college spirit now being shown by the students of Texas Tech it is natural that their attention should be directed toward stunts for the A & M game. The plans for the stunts of this game are already worked out, according to Mr. George James, yell leader. These plans are being kept secret, however. Mr. James stated in an interview that these stunts are new and novel, as they represent happenings at A & M and are not to be used for criticism, but purely as college feature stunts. Mr. James also said that these were to be the best stunts of the year.

Secret plans are now under way for the Tech-Simmons game. The time between halves will be used and the features will not interfere with plans made by the girls pep squad.

Tech experienced its first defeat of the year and its third in its entire history when the Matadors went down before the onrushes of the seasoned T. C. U. eleven. "Rags" Matthews, from end, took on his shoulders, a great part of the responsibility for turning back the Freelandmen.

Scoreless at Half.

Both teams were scoreless at the half. T. C. U. was unable to penetrate the mighty Scarlet defense, and the Lubbock Lads had found no openings in the Frog line.

In the third, however, things began to pop loose. Matthews with his toe turned in the first counters for the Ft. Worth gridmen, when he put across a field goal from the 32 yard line. With this encouragement, and within a few moments, Fain Reynolds, T. C. U. tackle, fell on a free ball over the Tech goal line after Jennings' punt had been blocked by one of the Horned Frogs. Matthews kicked and the count stood 10-0 at the end of the session.

Pass Intercepted.

With their backs again against the wall the Matadors attempted to pass in the shadow of their own goal posts and Clark, Frog field general, intercepted, running for a touchdown. The Frogs failed for the extra point and the score was 16-0.

Now Tech Scores.

Pickett, Tech Freshman, had been substituted for Nicklaus in the third and when he snatched up Clark's fumble, the whole T. C. U. eleven could not stop the intrepid Tech gridster until he had dashed a full seventy yards for Tech's lone counter. The run was perfect; Walker who made a similar run in Ft. Worth last fall, followed Pickett down the field, but his assistance was not needed as Pickett soon outdistanced his pursuers.

The game ended with the count 16-6. The starting line-up:

Texas Tech	Position	T. C. U.
Crabtree	L. E.	Matthews
Vermillion	L. T.	Barr
DeWitt	L. G.	Fain Reynolds
Corley	C.	Melton
Reed (Capt.)	R. G.	Brumbelev
Carpenter	R. T.	Felix Reynolds
Jennings	R. E.	Steadman
Hardy	Q.	Clark
Walker	L. H.	Toler
Woodbridge	R. H.	Morgan
Nicklaus	Full	Thompson

Score by periods:
 T. C. U. 0 0 10 6—16
 Tech 0 0 0 6—6

STRONG SIMMONS ELEVEN TO BE NEXT TO MATCH SKILL WITH TECH

When the Matadors take the field Saturday against the Simmons U. Cowboys from Abilene they will be bucking up against one of the most powerful teams in Texas, outside the Southwest Conference.

Simmons played the strong St. Eds., from Austin to a scoreless tie, early in the season, but this does not give a fair indication of the Cowboys strength, as they were handicapped by injuries in the backfield, and by the lack of veteran line material. Several men in the Cowboy's line up had never played inter-collegiate football previous to the St. Edwards game, but since then they have had their baptism of fire, and have shown vast improvement. This was demonstrated when the Simmons' line outcharged N. T. S. T. college to gain a 14-0 decision, on a muddy field.

Cowboys Powerful.

The Cowboys, always a powerful aggregation, will come to Lubbock

with a two-fold purpose. Simmons recently filed formal application for admittance into the Southwestern Conference, and a victory over the Matadors would go a long way into the admitting of the Cowboys into the Southwest's major Conference.

This will be the second most important game to be played in Lubbock this fall, and the Matadors will have to fight to win. It is impossible to hazard a guess as to the outcome of the game, as the teams appear very evenly matched, and the Matadors' chances will depend a great deal upon the condition in which they return from Ft. Worth.

Steel Bleachers Ready.

Fans who attend the game Saturday are assured ample seating facilities, as the new steel stands will be ready for the contest. These stands are much more comfortable and safe than the old ones, and give a far better view of the field.

LA VENTANA

Further evidence of the growing school spirit in the college for the early part of the term is shown in the spirited support of La Ventana. Mr. Roark reports a sympathetic reception of the plan whereby the student signs over his library fee to the annual staff and contracts to pay one dollar additional upon receiving his annual.

To-date over 975 annuals have been sold and the Editor confidently expects the total to reach well over a thousand by the end of the week. Those who have not signed up for their annual are urged to get it off hands as soon as possible.

HOWDY DAY—AGAIN

"Every day is Howdy day at Texas Tech," was the subject of an editorial in the last Toreador. Of course, it is impossible to say whether this message has born fruit or not, at this early date.

If every student, boy or girl, would only say "Howdy" whenever and wherever he meets another Tech student a spirit of good fellowship would rapidly become a characteristic of this Western school. It is worth a trial—Say Howdy!

BE PROUD—FRESHMEN

Freshmen! Everyone of you know how proud you are to be a student at Texas Tech. You wear the Texas Tech belt with all the pride of a new college student. There is something else, however, that the freshmen are supposed to wear. How about the Slime Cap? The first freshman class ever to enter this institution decided among themselves that in order to do their bit toward making class spirit that they must wear a distinctive head gear. Have you added to that old spirit?

The Hemphill-Price Co. have graciously offered the Freshman caps for sale with the understanding that they are not to receive one penny profit from their sale. Such whole-hearted cooperation needs commendation. The management of the Hemphill-Price store has decided to turn back, in some way yet to be decided, all the profits made from the sale of the Frosh caps.

Freshmen do your bit to make Texas Tech the best school in the South.

Get that cap, and wear it proudly.

Registration is Gratifying to Tech Officers

Registration at Texas Tech for the fall term is highly gratifying to the authorities of the college. The total enrollment up to and including September 28 was 1350 which is a decided increase over the enrollment of the same date last year. Many old students are still straggling in loathe to leave their summer's avocation and willing to risk late registration and consequent work to be made up. A decided increase in enrollment will probably occur Saturday of this week when teachers from local and adjoining schools will register for the special teachers' courses which have been arranged for their convenience, according to E. L. Dohoney, Registrar.

Contrary to the precedent set during the first year of the institution, when the enrollment showed about three boys to each girl, is the information gleaned from the registration cards which shows a total of 510 women students as in comparison to 840 men students. This satisfactorily disproves the theory held by many Texans at the beginning of the college that it would become practically a man's school due to the highly technical nature of many courses offered.

Saturday, October 1, has been set by the authorities as the last day on which students may register for full work. Students will be accepted after that date with schedules showing less than the five regular courses.

COLLEGE GETS VALUABLE GIFTS OF LIVESTOCK

Two gifts of livestock, which will add greatly to the quality of the herds have been received from friends of the college. W. L. Stangel, head of the department of husbandry, announced the first of last week.

Joe Stock, of Tankersley, Texas, presented the animal husbandry department with 2 yearling registered Rambouillet ewes. They were included in a shipment of sheep to an Idalou man. Mr. Stock is one of the foremost breeders of the Rambouillet sheep in the state and his gift to the College is the pick of his flock, Mr. Stangel said.

C. C. Slaughter, Jr., of Dallas, who owns a large number of ranches in

this section, presented the college with 2 grade Hereford heifers. These animals will be used for class work in judging, Mr. Stangel said, and will in all probability, be entered in the Stock show exhibit at Fort Worth next year.

Mr. Slaughter has been interested in the college since its establishment and has always shown especial interest in the livestock, which the animal husbandry department maintains. His gift comes highly appreciated.

TEXTILE SCHOOL MAY HAVE GRADUATES THIS YEAR

Featured as the moulder of an industrial revolution on the South Plains, the Tech school of textile engineering may send out graduates at the close of the coming session should the students pass all requirements, Prof. E. W. Camp, head of the department, stated last week, as he busied himself in aiding a large number of freshmen to register. There are four students who have a chance to finish the textile work during the coming year, Mr. Camp said and their graduation will only depend upon their work in the other schools.

The students are Jim Hale, of Thorp Springs; Jodie McDaniel, of Crosbyton; Rudd Hardesty, of Abernathy; and Roger Allison, of Brownwood.

The textile department will have three men in its faculty during the coming term. Mr. Camp heads the department, and has secured H. B. Garden, of Greenville, South Carolina, as professor weaving, fabric designing and fabric analysis. He has been assistant designer in the Cictor-Monaghan mills there for a number of years and is thoroughly familiar with the work, Mr. Camp says. The services of an expert in dyeing and knitting will also be secured for the textile faculty. A number of men are already being considered for the place.

Installation of a new monel-metal line bleaching tank has just been completed, Mr. Camp reports, which will add much to the completeness of the mill. The tank is to be used for bleaching skein yarn and fabrics.

THE DOC SLIPPED.

"My dear fellow," said the doctor gravely, "your rheumatism, as you call it, but which is really osteoarthritis, is caused by defective teeth; science has proved that fact. Let me see your teeth."

"All right," murmured his patient, as he lifted out his false uppers and lowers, "hold out your hand."

Nearly a Thousand Practice House Annuals Have Been Sold

Breaking all former records and setting a precedent for the future, over 976 La Ventanas have been sold and it is the expectation of the staff to order at least 1200 on Oct. 8 when the printing contract will be signed. Hugh Stephens Press, one of the outstanding annual printers of the country, is bidding on the contract. This company takes only a limited number of books each year, and Tech is exceedingly lucky to get in this quote.

In the short time that has elapsed since the opening of the school something like three hundred students have had their pictures made. The portrait work is being done by Daniel Studios for the third consecutive year. Mr. Daniel is well equipped to handle this part of the annual work and urges that all students have their picture made at once. Getting students to have their pictures made is an important job of the staff, and in the past has been considered rather a jinx.

Those members of the staff that have already been selected include: Literary Editor, Horace Grady Moore; Humor Editor, Floyd Woodbridge; Calendar Editor, Katharine Bryarly; Snapshot Editor, Virgil Hobby. Other members of the staff are under consideration and all people who wish to work on the annual are asked to report to room 311 and they will be given a tryout.

A German Student Writes of School

The following letter was received by Mr. J. B. Calvert from a student in Germany, with whom he is corresponding:

My Dear Mr. Calvert:
The central office of Correspondence at Leipzig provided me with your address. It has indeed afforded me great pleasure to find in you someone with whom I can exchange ideas and opinions in regard to Chemistry. I am very much occupied with this science and also intend to pursue the profession of Chemist or Apothecary.

Potsdam is a very pretty city. It is the summer resort of the former Prussian kings. It is situated about 25 kilometers from Berlin. The city has approximately 60,000 inhabitants. It is located along the Havel, a river which forms large lakes in our locality, so that we have much opportunity for swimming and rowing.

Potsdam, however, is not my hometown. I am what they call an Alumnate here, that is, we room and board in the school. My home town is about 120 kilometers south of Berlin. There in Finsterwald, lives my mother. My father, who was a physician, died about two years ago. I no longer live there, because they have no school there, where one may take the final examination required. I am now almost 17 years old.

As I note from your address, you are attending a technical school. Do you intend to become an engineer or a chemist? If I intend to become a druggist, I must first serve two or three years in an apothecary, then come the preliminary examinations. Thereupon follows another year of practice and then comes the formal course of study, which lasts four semesters (two years).

Have you studied German long? I have had instruction in English for four and a half years. At present we are also occupied with American authors, such as Cooper, Irving, Longfellow, etc.

Hoping to hear from you soon, I remain

JOACHIM WOLFF,
State Training School,
Potsdam, Germany.

This letter was translated by Prof. Carl Henninger of the Foreign Language Dept. The quaint wording has been retained for obvious reasons.

DR. READ ATTENDS N. Y. CHEMIST CONVENTION

Dr. W. T. Read, head of the department of chemistry, was in New York City week before last where he acted as chairman of the Students course of the Eleventh Exposition of Chemical Industries, which was in session from September 26 through October 1. This made Dr. Read's third year as chairman of the meet, which is attended by all of the leading chemists of the United States. The students course is sponsored by the American Chemical Society.

Dr. Read's faculty for the course included some of the foremost authorities in the world on chemistry. The first day, Charles F. Roth, manager of the exposition, made an address, and T. B. Wagner, president of the Chem-

Learn to do by doing—this phrase made famous by the girls of C. I. A.—is embodied in the spirit of the school of Home Economics. Home making is not taught wholly in theory but by experience. To this end a \$20,000 ideal home or Practice House is being erected on the Campus for the use of Home Economics students.

The Home will be equipped and furnished similar to the average American home. Of course, all modern fixtures and conveniences will be installed and made practical use of. Miss McCreery, head of the Foods Department, will have direct charge of and direct the various activities of the Home. All Senior Home Economics students and all students majoring in Teacher Training will be required to take the course in this Home.

Briefly, the plan is this: The students will live in the House for one term, doing all the work and at the same time they will live the regular, active, normal college life. Six students will occupy the Home at one time. They will operate the Home on the budget system, which will be somewhat less than the regular board and rooming bill.

According to Dean Weeks, the dominant aim and purposes, (which are four-fold) are: 1. Ability to assume responsibilities; 2. Co-operation; 3. Develop self-confidence, and 4. To master situations.

Due to inclement weather work has been retarded, greatly, but the building will be in operation by the opening of the Winter term. Thus another worthy structure will adorn the Texas Campus which three years ago was an open cattle range.

HEREDITY OR ENVIRONMENT.

Irishman—You're a Canadian. You were born in Canada.

Scotchman—No, sir! My mother and father were Scotch, so I'm Scotch.

Irishman—No, you're a Canadian even if your parents were Scotch.

Scotchman (heatedly)—Well, if a cat had kittens in an oven would you call them biscuits?

ists' club of New York City, also spoke in the first session: Other speakers included: Author D. Little, president of the A. D. Little Company, Inc., one of the largest chemical concerns in the world; H. C. Parmlee, editor of the Chemical and Metallurgical Engineering magazine; Frank C. Whitmore, chairman of the chemical division of the National Research Council; Williams Haynes, publisher of "Chemical Markets;" Edwin C. Judd, editor of the Industrial Digest; H. E. Howe, editor of the Industrial and Engineering Chemistry; and G. Edwin White, of the College of the City of New York.

**MODERN COLLEGE CAMPUS SLANG
DEFENDED BY STUDENT OF MASTERS**

In reading Shakespeare or Dickens, or any of their contemporaries we find slang used profusely. Yet, in English classes, profs seem to wonder why the students persist in using slang to express what, to them, can't be expressed in any other words. Wonder why it is they preach Shakespeare to us and then throw up their hands in despair when we use some of his language.

"Where have you been all my life?" is to be heard from some young Campus Shiek in speaking to his (or someone else's) sheba. And indeed it is a very effective—er—a question. It sounds much better to a Collegiate ear than "Oh, how do you do?" or "So glad to meet you"—or some such conventional statement.

No doubt some of the Ancient Nobility would turn over in their graves if they heard a modern young person say, "You're cracked," when the meaning is only that one doesn't know what one is talking about. Or "Oh! be your age." Causes one to wonder how this old world would be run if everyone did act his or her age. But, that is literally speaking.

To hear one of the eds say, "We had a hot time last night. That baby certainly does know how to pour it on." Translated into "King's English," "We were entertained most lavishly last evening. Our host did everything to make the party a success." Now, the translation is rather slow for the present generation. The twentieth century can't stop for all those "tongue twisters"—one must say what expresses thoughts spontaneously.

"Get tight," isn't a new way of saying "get drunk". Not at all! It is to be found in several of Dickens's books, and no doubt some other author used it before him.

Father is often spoken of as "the old man," while among the eds one's roomie is known as "the old lady."

Co-eds, when they are greatly surprised or angered, can be heard to say, "How do you like those apples?" Strange as it may seem the blithe, some co-ed has not offered the fruit, first made famous by Mother Eve.

"Great Heck," is merely an exclamation—nothing at all profane about it. "Aw balogna," pronounced "balonee" has its place in the group, while "Bushwa" "rates" more "zippy" than either of the two former expressions.

Class time draws near, so, "I'll be seeing you later."

Laughable Play to be Presented by Students

The play, "Help Yourself," which was presented at Tech last week to the Methodist students will be presented again at the high school Friday, October 14th, at 8 o'clock.

The cast includes some of the leading talent of Tech and the city. Mrs. E. E. White is director for the Little Theatre plays this year. "Help Yourself" is a musical comedy which affords much laughter from start to finish. Ned Camp and Russell Hardin as negro sweethearts, will like prove to be the hits of the evening as they did last week.

Others in the cast are Margaret Turner, Glenda Crawford, Anna Belle Guffin, Evelyn Wilson, Ailsie Herridon, Russell Denison, Ethridge Engan, H. Y. Price, Clarence Whiteside, Guy Carter.

It's No Picnic

When telling the time means a long struggle with an obstinate watch pocket—and an armful of troubles to boot. Choose here a Gruen Strap Watch, for utmost convenience and smartness.

Gruen Quadrant, "Precision", \$60
Others, \$25 to \$250

Miss West Gives Information for Use of Library

Miss West, Librarian, offers the following information on the grouping of books in the library:

Library Classification Schedule.

The books in the Library are divided, according to the subjects of which they treat, into the following main classes:

- Class A, General works, such as encyclopedias
- B, Philosophy, psychology, religion
- C, Auxiliary sciences to history, such as history of civilization, archaeology, biography, etc.
- D, European and Old Water history
- E, American history, general
- F, American history, local
- G, Geography, anthropology, sports and games
- H, Social sciences, such as sociology, etc.
- J, Political science
- K, Law
- L, Education
- M, Music
- N, Fine Arts
- P, Language and literature
- Q, Science
- R, Medicine
- S, Agriculture
- T, Technology
- U, Military science
- V, Naval science
- Z, Bibliography.

Subdivisions of a general class are indicated by placing another letter of the alphabet and a figure or figures after the letter indicating the main classes; e. g. P means literature; PR British literature; PS, American literature; PZ, fiction and juvenile literature; PZL, collections of short stories by several authors; PZ3, fiction in English by individual authors, etc.

Generally speaking, these classes are arranged on the Library shelves in class order, beginning at the right of the loan desk and extending clear around the room. That is, the first group is class A; the next, class B; and so on.

Reference books are, for the most part, nearest to the desk, even though

this position sometimes necessitates their separation from classes to which they belong. Other exceptions to exact order have had to be made from considerations of space.

As some books can be classified in more than one class, it is advisable to go to the catalog and look up the shelfmark before trying to find a given book on the shelves.

The shelfmark is the combination of letters and figures, indicating class and author, which is typed on the upper left-hand corner of each catalog card.

In a box on top of the catalog cabinet will be found printed call slips. It is well to fill out these before asking or looking for a book.

ELIZABETH HOWARD WEST,
Librarian.

Amarillo Group Holds Annual Fall Election

The Amarillo Club met October 5, to organize the club for the current year. Edgar Brittain was chosen to head the group, while George Waddill was elected vice-president, Barney Brady was selected as secretary.

A business meeting held to formulate plans for the year's activity engrossed the attention of the club. The Club is to supply the Tech Library with the Amarillo Daily News for the entire year.

The Amarillo Club sponsored a "Back to Tech" banquet during the summer months. At this time some seventy or eighty ex-Tech students gathered for the occasion. Dr. Horn addressed the assembly.

**CAMBRIDGE U.
MAY DEBATE
TECH ORATORS**

**English University May
Include Tech in
Tour**

Cambridge University is to meet Texas Tech in debate—that is, if a date can be arranged. The English Debating team arrived in America yesterday. Their tour is to take them to many points in the United States, including a meet with Simmons University at Abilene.

The Public Speaking Department and the Debating Society is making every effort to arrange the international meet. Although definite word has not been received as yet from the English speakers, their agents in New York have wired the local club that November 19th is open.

Despite the expense that bringing the Cambridge team here will entail, the Debating Club is very optimistic as to their ability in meeting this responsibility.

Members of the club point out the tremendous importance of the contemplated debate. Indeed, the encounter will be of as much importance in the manner of Forensics as is the A & M game on October 28, in the eyes of the Matadors.

Announcements will be made as soon as definite arrangements have been made.

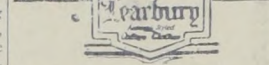

**More Than Score
Taking Graduate
Work This Year**

The newly organized courses offered for graduate work are receiving the attention of a number of students. In the education department some eight or ten students are taking courses for which graduate credit is to be given, while some dozen students are working on their master's degree in the departments of history, sociology and

philosophy. In the English department, some two or three students have signified their intentions of doing graduate work by signing up for courses in this department which are offered for graduate work.

PERSONALS.

Local men who made the Ft. Worth trip with the Matadors included: Chief of Police John Lemon, Mr. I. F. Holland and Vernice Ford.

Dr. Horn attended the game at Ft. Worth Saturday and from there went to Dallas, where he is engaged on school business.

Eugene (Red) Smith, former Matador player in '25 and '26, visited in Lubbock the past few days. Eugene is working in Smithville, Texas, at the present.

Miss Mary Shackelford, Secretary to the President, spent the week end in her old home, Austin. Miss Shackelford returned today to resume her duties.

Miss Annie Kate Ferguson, who teaches in the Plainview High School, visited Saturday with her sister, Miss Frances Ferguson. Miss Evelyn Scarbrough returned to Plainview with Miss Ferguson for the week end.

Word has been received from Miss Ruth Pirtle, of the Department of Public Speaking, who is in New York

**SOCIAL SCIENCE
GROUP ACTIVE**

The Sociological Club is to meet Wednesday night at the home of Dr. John C. Granbery, 1622 Ave. X. Dr. Granbery is the sponsor and founder of the organization which meets from time to time for the discussion of social problems.

Roy McCullough, the newly appointed Tech "Y" Secretary, will lead the discussion for the evening. Mr. McCullough is to bring to the attention of the group, a meeting of social workers which he recently attended in Detroit.

Pi Gamma Mu, the honorary Social Science fraternity, is to meet Friday night, at which time Prof. DuFlot of the W. T. S. T. C. of Canyon will speak to the society on the subject, "Environment and Heredity".

Mrs. Murphy had named her baby Hazel. Pat objected.

"With all the saints in the Calendar, why do you name the little one after a nut?"

on leave of absence, that she is working on eight hard courses in Columbia University. Mrs. McNabb, formerly Secretary to Dean Gordon, is expecting to go to work soon on the Columbia Campus.
