

# The TOREADOR

VOL. III.

TEXAS TECH, LUBBOCK, TEXAS, JANUARY 10, 1928.

NUMBER XI

## FORENSICS TO OCCUPY MEN OF TECH SOON

### Scholarship Award to Be Made After Talkfest.

By Miss Pendleton

All men who are interested in the formation of a male debating team are urged to be present at the next meeting which will be held in a short time. These men who are interested in this work are asked to see Miss Pendleton as soon as possible, and arrange with her for try-outs.

The possible line for the collegiate debates will include Canyon, Simmons, T. C. U., and Baylor. With such an excellent plan of work we feel sure that the debate team of the Texas Tech will have one of the most interesting seasons of its experience, and for this and other reasons we hope that the men who are really capable will come out and help the school out.

The tryouts will be held right away and for this reason it will be necessary to come out as soon as possible.

The annual men's oratorical contest will be held as usual this year, and we are expecting a large representation out for it. The contest will include five speeches, which will be, an extemporaneous speech, a declamation, an oration, a debate, and an after dinner speech. These speeches will be scattered throughout the year. Persons who are interested, see Miss Pendleton at once. There will also be a girls' contest.

## Incubator Installed In Aggie Class Room

An incubator has been installed in Pavilion Room 103. The room is to be used for class and laboratory in poultry.

The school of Agriculture has added several new classes with the beginning of the winter term. This increase in number of classes was occasioned, in part, by the fact that the number of classes was held to a minimum during the fall term on account of the moving of the department from the Home Economic building to the school's own building southwest of the administration building.

## Next Toreador to be La Ventana Issue

The next issue of the Toreador will be put out under the special editorship of La Ventana with Ferral Roark, Editor-in-Chief of the La Ventana in charge. The La Ventana staff is making a determined effort to make the '28 year book thoroughly representative of Texas Tech and this is but one of the steps the staff will take to "put the annual over."

## Swine Breeders to Hold Sale in Pavilion

The Panhandle Swine Breeders Association is to hold a sale in the Stock Judging Pavilion on Friday, January 27th, at which time some sixty Duroc, Poland China and Hampshire Bred Gilts and sows will be offered for sale.

The College will have a couple of entries in the sale. This sale will bring many persons interested in swine breeding to the campus and as the sale is to be held in the Pavilion, the buyers will be comfortable, regardless of the weather conditions.

## Good News to Degree Candidates

Mr. Cole of the Tech Bookstore has ordered the rings which are to gladden the hearts of many candidates for degrees. It will take some time for the company to make the dies from which the rings will be made but it is understood that the wait which is now occasioned will facilitate matters in the future.

## Dean Gordon Moves.

Dean J. M. GORDON.

The office of Dean J. M. Gordon, Dean of Men, has been moved from the first floor to the second floor of the Administration building. The change gives the Dean considerable more space than he formerly had. Two rooms are now occupied by Dr. Gordon and his secretary, Miss Jerry Henderson.

## "Student Service" Is Aim of Dept. Correspondence

DEPARTMENT OF SCHOOL DEVOTED TO NEEDS OF NON-RESIDENTS.

The Correspondence Department would like to serve the students back home who could not come to College this term. Resident students who will hand the names of such students to Mr. McDonald, Room 209, Administration Building, may make this service possible. Work by correspondence may now be taken in 153 subjects in 18 departments of the College. During the Fall Term 134 subjects were given by correspondence.

The Correspondence Department also offers its services to resident students who desire to take a subject but cannot do so on account of conflicts between two scheduled subjects, or because the desired subject is not offered this term. Conditions may be removed through correspondence work. Resident students may, with the consent of their Dean, take correspondence courses. Those interested should confer with Mr. McDonald.

Correspondence courses are given by the regular instructors of the College and are given full college credit toward a degree, or a teacher's certificate, of both. One-fourth of the work required for a teacher's certificate may be done by correspondence work.

## Miss Small Added to Business Office Staff

Miss Francis Small of Tampico, Mexico is now employed as Secretary in the Business Office. Miss Small has been employed in the southern republic, by an oil company, for some time.

Other changes in the personnel of the Business Office include the handling of the Student Activity Account. Miss Francis Wilson is to have these accounts in charge in the future.

## Miss Pool Replaces Miss Meek as Sec'y.

Miss Juanita Pool is now secretary to Dean Leidigh, replacing Miss Meek whose marriage to Mr. W. C. Winn was announced during the holidays. Miss Meek and Mr. Winn were married during the past summer but their marriage was kept secret until a few days ago.

Mr. Winn is employed by the American Railway Co., and he and his wife are now residing in Amarillo.

Mrs. Winn was presented with a handsome silver service by the Aggie Club upon her departure for Amarillo.

Miss Pool, who replaced Mrs. Winn, has been employed for some time by the Phillips Petroleum Company of Amarillo.

## Pi Gamma Mu to Meet Next Friday Night

Pi Gamma Mu is to meet Friday night in room 214, at which time the group will be addressed by Prof. Conroy on "Competition and Cooperation." The time of meeting is 8:00 p. m.

All members and others interested are invited to attend.

## College Courtesy Is Subject of President's Talk

President Paul W. Horn delivered the principal address at the first convocation of the winter term last Wednesday. His topic was "College Courtesy." Dr. Horn defined courtesy and kindred terms and made illustrations applicable to the local situation. Throughout his talk, the fact that courtesy and politeness may be acquired on the campus, was stressed.

President Horn brought up the matter of being courteous to Lubbock people who are courteous to Tech students and allow them "lifts" in their cars. Such courtesy should be merited and the student should do all in his power to reciprocate.

In closing the audience assembled sang to the accompaniment of Harry LeMaire's Saxophone band.

## Percentage of Engineers Back Very Gratifying

Dean William J. Miller, of the School of Engineering, is greatly enthused over the percentage of Engineers returning to their work after the holidays. The percentage re-registering in the school for the winter term is greater than it has ever been in the past, according to the Dean.

The more stable enrollment is attributed to the fact that men who registered in the school in the fall knew better what they were about than did their predecessors. The grades for the past term are considerably better than ever before, which Dean Miller says goes further to show that Engineers are digging right in to their work. Approximately twenty-five new students enrolled in the school with the second term of the year.

## MADDOX ASSISTS.

Jack Maddox, vice-president of the student body, is now serving as Student Assistant in Engineering Drawing. Maddox served in this capacity during the year 1926-27.

## Many Honor Students of Fall Term Announced by Registrar Dohoney

The following students with their home address have been placed on the honor roll for the fall term according to information released by Registrar E. L. Dohoney.

- Texas Technological College Honor Roll for Fall Term 1927-28
- Students carrying six courses making all "A" grades:
- G. L. Farrar, Lubbock, Texas.
  - Claude Hope, Sweetwater, Texas.
  - Students carrying six courses with an average grade of "A":
  - James Aldredge, Lubbock, Texas.
  - Mrs. Curtis Bond, Lubbock, Texas.
  - June Hewitt Plainview, Texas.
  - Frances Smelser, Lubbock, Texas.
  - Dayle Wallace, Mt. Calm, Texas.
  - Students carrying over five subjects making "A" grades:
  - Mrs. E. M. Barnett, Lubbock, Tex.
  - Hal Lary, Clovis, New Mexico.
  - Mamie Wolfarth, Lubbock, Texas
  - Students carrying over five courses with an average grade of "A":
  - Floy Anglin, Tahoka, Texas.
  - Martha K. Chamberlain, Burnett, Texas.
  - Irwin W. Coleman, Vernon, Texas.
  - Robert Crozier, Godley, Texas.
  - Wilbur Edelman, Plainview, Tex.
  - Owen Murlie Fowler, Lubbock, Tex.
  - Luis Gable, Artesia, New Mexico.

## Spanish Play to Feature Capa y Espada

El Club Capa y Espada will meet January 15, 1928, in room 310.

The programme committee has arranged a very interesting programme including a play "Las Muecas". Officers of the club request a full attendance.

## Tech Delegation Returns From Detroit Meeting

Tech students making the trip to Detroit to attend the meeting of the Student Volunteer Convention have returned to Lubbock. Misses Mary Hope Westbrook, Margaret Turner, and Irene Connor, and Messrs. Dayle Wallace, Clarence Whiteside, Jack Maddox and Warren Huff accompanied by Mr. Roy McCullough, local Y secretary on the trip. Mr. McCullough has not as yet returned as he has been confined in a sanitarium in Detroit when the Tech delegation left that city.

A write up of the Tech delegation and the questions considered at the convention will appear in the next issue of the Toreador.

## Second Toreador Literary Page to Appear Jan. 31st

The second literary section of the Toreador will appear in the final January edition of the college paper, January 31, 1928, according to Miss Lucille Gill. Miss Gill is to edit this page, as she did the prime bow of the literary page.

The Editor of the literary page issues a call for contributors to this page and points out that there is a wealth of talent in Texas Tech which lives to bloom unseen. The literary page was inaugurated by the Press Club which is sponsoring the endeavor. Contributions should be made to Miss Gill at the English office as soon as possible.

Poems, essays, book-reviews, short stories and any other type of original and creative literary work will be considered for the page.

## Professor Gullikson Resigns From School

Prof. A. C. Gullikson of the School of Engineering has resigned and is now at the University of Cincinnati. Professor Gullikson's successor has not been announced as yet.

## Enrollment Large.

Fifteen hundred seventy-four had been enrolled in Tech during the year at 3:00 p. m. Saturday. E. L. Dohoney, Registrar, stated that the total enrollment for this year is far in excess of the highest figure reached throughout the year 1926-27 session.

Over 150 new students have been enrolled for the winter term and at this time the student body is made up of students from several outlying states and practically every county within the state.

Officers of the college are very optimistic as to the outlook for the year and express themselves as being well satisfied with the present registration.

## Construction of New Buildings Is Progressing

SCIENCE BUILDING IS TO BE ELECTED SOON—PRESENT PLAN.

Buildings being erected on the campus have taken on an aspect of completion with the work done during the holidays. The Home Economics practice house is completed and work is underway on the tunnel through which heat will be furnished from the central heating point. President Horn says that a house warming will soon be held in the new building as rapidly as furniture and other furnishings have been installed.

The construction work on the new Engineering building has progressed nicely during the past month, as can readily be seen by a surveyal of the building. The exact date at which this building will be completed and ready for occupancy is not known at this time from present indications the Engineering building will add considerably to the skyline of the campus.

Plans are underway for the erection of a Science Building. Although money appropriated for this project will not be available until September of this year, it is expected that construction will be begun much earlier than this date, and it is thought that the Science building will be ready for occupancy by January 1st, 1929.

Present plans are to begin construction on this building at an early date with the provision that payment for work undertaken is not to be made until money is available in September.

Dr. Read of the Chemistry Department has recently returned from a trip to the east during which time he inspected various science buildings of other colleges and made observations on these structures. It is understood that the Science Building to be erected on the Tech Campus will embody such details as have proven of value in similar buildings. The structure is to cost in the neighborhood of \$200,000.

## Dramatic Club to Seat New Officers

The Dramatic Club will meet Tuesday evening, at 7:00 o'clock, in room 202. The new officers who were elected for the Winter term, will take office. They are as follows: Russel Dennison, President. Ruth Forbes, Vice-President. Sarah Williams, Sec.-Treasurer. Grady Moore, Reporter.

An interesting program has been arranged by the program committee. All members are urged to be present.

## Debaters to Meet in Special Session Thurs.

The Debating Club meets in special session next Thursday night at 7 o'clock in room 202. Only a few matters will be taken up by the assembly but they are of vital importance to the future activities of the Club. One of the matters is for the Club to vote yes or nay in regard to the Club having their allotted page in the annual. The time for individual sittings has been extended till January 10th by the Annual management. So if you were left behind in the fall term, you still have a chance.

And incidentally, if you are a new student you can still have your picture made for La Ventana the same as if you were here the Fall term.

## PRIMA DONA PLEASES TECH IN CONCERT

### May Peterson Sings Way Into Hearts Of Students

Miss May Peterson, Prima Dona Soprano, formerly of the Opera Comique, Paris, and the Metropolitan Opera Company, sang before a large and appreciative audience in the Tech Gym last night. Miss Peterson's grace of manner created for her at once an answering sympathy in her audience.

Miss Peterson was exceedingly gracious in her response to the demands of the audience and re-arranged her programme several times in response to the applause of the audience. This admirable characteristic is one of the many things which has gained for her such a wide and lasting popularity.

A brilliant personality was made manifest in her unusual program and grace and personal charm dominated the performance. Miss Peterson has without doubt one of the foremost soprano voices of America.

Her adaptation to various songs was remarkable and she took both high and low notes with beauty and ease. Her diction was remarkable, and her enunciation was excellent. Miss Peterson's talents are unquestioned, and along with this is her wonderful personality which she puts to such a great degree in her work.

Miss Peterson has a great interest in young American composers, and whenever it is possible she puts into her program songs written by these composers, which have proven successful with her audiences. Several such songs appeared on her program here.

It is a very pretty habit of Miss Peterson's, to interrupt her and tell her audience something about the songs she has on her program. Of Swedish parentage, she is naturally fond of putting songs of Swedish composers on her programs. While general public seems to be unaware of the fact, Sweden, Norway and Denmark have produced many eminent composers besides Greig, who have written delightful songs.

Miss Peterson has a delightful speaking as well as singing voice and she talks exceedingly well. The result is that her recital took on the form and character of what the French call a "conference," which was a very welcome change from the ordinary routine.

## Tech Holsteins Show Production in Tests

Mr. Stangel of the School of Agriculture has had some seven Holstein cows on test for the past several months. One of the Holsteins tested has produced 5,000 lbs. of milk in the past two months. It is interesting to note that this amount of milk totals something like ten gallons of milk daily from one cow.

The tests are made by representatives of the Advanced Registry Association.

Mr. and Mrs. W. F. Simms, of Panhandle, visited their daughter, Glenna, last week. Mrs. George Simms, also, was a guest of College Inn while visiting her son here.

## Social Calendar.

- WEDNESDAY
- 7:30 p. m.—Press Club Meets.
- 7:30 p. m.—Engineering Society meets.
- Thursday
- Friday
- 7:30 p. m.—Amarillo Club Party
- 8:00 p. m.—Pi Gamma Mu meets room 214.

## THE NEW YEAR AND THE OLD.

The year 1927, with all its numerous achievements, has passed and the young 1928 is on the World. 1927 was a full year—a year of Lindbergh, Ruth Elder, Sacco-Vanzetti, the sharing of Nobel Peace prize by a French and German professor, Game the Gentleman pugilist, sixty home runs, a proposed Pan-American Conference and the sending of U. S. Marines to various portions of the globe. Indeed, 1927 was a full year. What will the present year have to offer in the way of thrills, in the manner of achievement?

We collegians have very little part in all this hustle and bustle of the old year and the new. But we do have a part in the making of this and every other year, so long as we remain on the face of the earth. Now is the time to resolve that we shall make the new year better than the old. Resolutions are constantly broken, you say? Psychologists say, however, that habit and habit formation is the whole of one's life. The formation of a habit and the sticking to it will undoubtedly strengthen the resolution and a resolution once formed will have less likelihood of being broken.

Make a New Year resolution and keep it. The world should be a little better for your being in it.

## EDUCATION.

The criticism so often leveled at institutions of higher learning that they are merely a loose-organization devoted to the development of extra-curricula activities and very little else, is not a valid criticism, according to Gerald W. Johnson, formerly of the Journalism Department of the University of North Carolina. Mr. Johnson in his recent article in Harpers, continues his line of thought that such so-called excessive attention to other than informational pursuits in colleges is not excessive at all. Such attention is merely the outgrowth of mass education, which entails very little of the educational element.

The author contends that the plumber's son, the grocery-man's son and the sons of the middle-class Americans which go to make up the majority of the college students of today, are searching for civilization, not education. He cites an instance of a Glee Club enthusiast who neglected the informational studies to the development of his Glee Club practice. He defends the young man in this attitude. For, says Johnson, the young man is getting something from his college career that he would not be able to get elsewhere and in so doing, he is becoming—not educated—but civilized.

## COLLEGE COURTESY.

Within the past week President Horn has touched on the subject of College Courtesy. During the last term the Toreador carried a streamer, "Every Day is Howdy Day in Texas Tech" and editorials have been run urging that the student body make a reputation for Texas Tech as "the friendly school".

The saying of a mere "Howdy" by every student on the campus to every student he or she may meet will, in time, cause an atmosphere of friendliness to permeate the entire campus and Tech will be known as a true friendly school. Such greetings are but part of general courteousness and politeness. Be courteous to your fellows and they will be courteous to you.

A friend of the college in commenting on the subject said:

"Courtesy is the one medium of exchange which is accepted at par by the best people of every country on the globe. It is sentiment, clothed in reasonable and business-like expression; the embellishment which adds tone and harmony to matter-of-fact routine; the oil which lubricates the machine of commercial good-fellowship and promotes the smooth running of the many units in an organization.

"Courtesy radiates a feeling that we are not working entirely for what we get out of work in a material way, but for the pleasure of polite transaction and friendly association as well.

"Life is not too short and we never are too busy to be courteous; for courtesy reflects an inward feeling of an outward consideration for others."

## FRESHMAN WEEK AT TEXAS TECH.

Freshmen were introduced to college life in Texas Tech last September by a pre-registration period of orientation. Officers of the administration, frankly admit that the past period devoted to Freshman orientation left much to be desired. But the days devoted to familiarizing the Freshmen with what was expected of them as college students was decidedly worth while.

Future periods of orientation will be based on the failures and successes of the September period and a proper effort expended by faculty and students will make all such future periods more and more of a success.

It is interesting to note that other colleges are giving considerable thought to this problem.

The following excerpt from "School and Society" will show the method by which the University of Wisconsin is approaching the problem. In speaking of the period of orientation or "Freshman week," as it is called in Wisconsin, "School and Society" says:

"The period will be set aside, the faculty voted, for the registration of freshmen and students transferring to Wisconsin from other universities and colleges. The three days, September 20 to 22, inclusive, already had been set aside for early registration in advance of the formal opening of the university on Monday, September 24; the new arrangement simply confines registration to freshmen and advanced standing students during the period and adds one day, Wednesday, September 19, in order to allow the introduction of new measures to acquaint the freshmen with rights and duties of their academic citizenship in the university.

"The purposes of the new plan are to enable the freshmen to do the following:

1. Make living arrangements.
2. Register and pay fees.
3. Consult, without hurry, faculty advisers concerning a proper selection of courses.
4. Take physical examinations and various aptitude tests.
5. Listen to talks on such subjects as how to study, how to budget one's time, use of the library and extra-curricular activities.
6. Become acquainted with the library, the laboratories and other points of interest.
7. Be entertained socially and musically under university auspices.
8. Secure first and most effective impressions of the university from the faculty.
9. Become convinced that the faculty is really interested in the individual freshman.
10. Become reacquainted with university routine and get a clearer notion of what it's all about."

Naturally Texas Tech's problems are not the problems of the University of Wisconsin, but it will do well for students and faculty members to keep the above detailed points in mind and consider wherein they are applicable to the present situation.

## Wise Cracks at Girl Dormitories Amusing and Extremely Dumb

The wise cracks at the Girl's Dormitories are quite the cat's manicured paws. Indeed, the co-eds have learned to act their age and quit crawling. Some of them shoot a hot line, and their popular expressions night and day ring thru the old dorm.

In the wee small hours of the morning, when those unfortunate or unwise enough to have eight o'clock classes disentangle themselves from their beds, they journey the halls yelping in discordant vibrations the familiar words of our kindergarten song, "Good morning to you."

"I'd rather hear no more about that," the upper-classman suggests, while others aroused from their peaceful slumbers ask, "What's your idea in bringing that up?" Whereupon they are informed that they will often wonder, but never. Most of them wish they were like rivers—they want to follow their course without leaving their beds.

Evidently the most important question, or at least the one most often asked, is "What time is it?" And perhaps the nearest rival is "When do we eat?" "It won't be long now" is breathed at times with thankfulness, and at times with fear.

"If you knew what I know about this you wouldn't be eating it," some-

one is always declaring. But the knowledge never seems to effect the declarer that way. If it did, then surely ignorance would be bliss. Some one is eternally wondering how she looks when she's asleep, and about the only information she receives on the subject is that she would be surprised. Instantly she realizes that it doesn't matter.

"Durn that bus," is a frequent remark, while others more frequent are less printable. "Oh, well—" with a sigh, fits into any conversation and expresses words unspoken. Just what these words are, you can never tell. Oh Bill!

"Do you read Shakespeare?" was a question asked a modern co-ed. Oh, yes, she answered; "I read all his stuff as soon as it is out." She was almost as dumb as an elephant. Why pick on the elephant? Because his head is so full of ivory that it even sticks out.

The co-eds are sure to show the eds where to get off. They call one boy "Jack" because he is always giving flat tires a lift.

One girl sure thought she had made a hit when some one called her an ultra-violet beauty; but she considered herself surrounded when she learned that "ultra-violet" means invisible to the naked eye.

## Secret Wedding Surprises Campus

The surprise of the holidays was the announcement of the marriage of Mr. J. B. (Red) Hamilton and Miss Kathryn Bryarly which took place last July. The couple kept their marriage secret until last week when Mrs. Hamilton joined her husband in Amarillo where he is employed.

Mrs. Hamilton enrolled in Texas Tech in 1926, attending the entire year and until Christmas of 1927. During her attendance at Tech she was chosen by Cecil B. DeMille for the beauty section of La Ventana. During the past summer Mrs. Hamilton's picture was syndicated by the NEA service and appeared in some 2,000 newspaper throughout the country under the head, "Tech's Prettiest".

Mr. Hamilton has been in attendance at the college since its opening in 1925. He has been very active in affairs of the school, being a two-letter man, in both football and baseball.

## Press Club to Hold Regular Meeting

The Press Club will meet next Wednesday night, January 11, at 7:00 o'clock in room 217. All students interested are cordially invited and urged to attend. A special invitation is extended to students in the Journalism classes.

## Pre-Laws Swing Into Action and Announce Meet

The pre-law students will meet for the first time this term on Wednesday evening, Jan. 18th, in room 220.

New pre-law students are invited to attend this program and make application for membership.

The program committee is arranging an interesting program for the first meeting this year. The club will not begin its January session of court until the Grand jury, which has been in a continuous conference, makes some indictments. Many serious charges have been brought before these gentlemen and perhaps the burden and worry it has caused them is responsible for low grades made in the fall term.

There are about forty students in this club and the entire membership is urged to don the blackwear and be present at this meeting.

Men who would save money on shoes have found in Bostonians their ideal shoe. Ranging mostly from \$7 to \$10, they offer comfort as well as individuality of style. And the quality that makes for long wear is never absent.

**BASKET-BALL SCHEDULE FOR THE YEAR**

By Ferral Roark

The Tech basketball schedule for the 1928 season includes 12 games at home and six in Abilene and two in Canyon. Last year when the Matadors invaded Abilene only one game out of the six were taken from the three schools. The Canyon Buffaloes

took the large end of the score in a double bill at Lubbock. This year Coach Vic Payne is driving his proteges at a terrific pace in order to whip them into fighting array for the important games.

**The Schedule.**

Amarillo Gassers	at Lubbock, January 6 and 7
Canyon Buffaloes	at Canyon, January 16 and 17
Daniel Baker	at Lubbock, January 20 and 21
A. C. C.	at Lubbock, January 24 and 25
Simmons	Lubbock, January yyy
Simmons	at Abilene, January 30 and 31
McMurray	at Abilene, February 1 and 2
A. C. C.	at Abilene, February 3 and 4
McMurray	at Abilene, February 8 and 9
Simmons	at Lubbock, February 13 and 14
Canyon Buffaloes	at Lubbock, February 20 and 21

**TECH CAGERS TAKE TWIN GO FROM GASSERS**

**M. Hunter and "Andy" Hemphill High Men Of Double Bill.**

Showing a brilliant offensive, and a heady man for man defense the Matador Cagers took a two game series here last Fri. and Sat. nights. Coach Vic Payne using almost all of the entire squad in the two games showed a scoring combination that has never been equalled in Tech.

Friday night with Melvin Hunter as high point man the Matadors scored their way to a 26 to 14 victory. The game was fast and thrilling, so much so in fact that two men, Al Jennings of the Matadors and Heaster of the Gassers, became over-zealous and were forced from the court with four personal fouls each. During the entire game the Scarlet and Black five drew 12 fouls and the visitors 7. Payne's crew came in the court Saturday night and ran up a record that has never been equalled by former Tech cage teams. With an improved offense the Matadors flashed to a 51 to 23 victory. Andy Hemphill, veteran pivot man for the local quintet, led the court with 16 points to his credit and Hunter followed with 8.

**Old Men Ready As Tech Cage**

**NEW ASPIRANTS FOR THE TEAM ARE MIXING IT WITH VETERANS.**

By Ferral Roark.

With the beginning of the basket ball season last Friday at eight o'clock Coach Vic Payne had six letter men and a wealth of new material ready for the opening whistle.

Al Jennings, veteran of last season and captain of the '28 team, is ready for either the forward or the guard position. Hemphill and Weaver have been performing to good advantage at the pivot position with Hemphill as a possible favorite. At the forwards, Coach Payne has two lettermen of last year in Melvin Hunter and Alma Pace with Freshman Hays, star cager of Lubbock, and Watson of Galveston ready for a chance to prove their ability as goal tossers.

Ransom Walker of Mission, one of the Matadors' mainstays of the two previous seasons, is expected to be out on the court soon. Dopic White has returned and is rounding into shape to give the husky newcomers a battle for his old position at guard. Carl Peterson, a veteran of the baseball team, is out fighting the regulars for a place on the quintet.

Among other new material that the Scarlet and Black mentor has uncovered are Walkers of Ball, at forward, and Coppage of Pilot Point, at center. Coppage is a former All-State man and promises to develop into a wonderful variety man.

**Prospects for Net Men Shine As Stars Return**

Tech's tennis prospects for 1928 are brighter than any year previous. With the return of all four letter men of last year together with an abundance of new material, coach Knickerbocker sees the possibility of the best team in the school's history.

Louis Lahm, last year's captain, says that he is very much impressed over the bright outlook for the season of 1928. Lahm lettered in 1926 as well as last year.

Ross McDonald, captain for 1928, and who finished last year with a higher percentage than any man on the squad, is also pleased with the prospects for this year. McDonald with McKirahan, holds the doubles championship of West Texas. He features an overhead game, and when in proper form, is a most dangerous opponent.

Wilson McKirahan, star performer, of last year, is also back. He was first ranking singles man of last year and with Sewell won the college doubles title. He also holds the singles title of West Texas and the Amarillo Tennis Club. McKirahan is well known in tennis circles throughout this section of the country. He was paired with McDonald late in the season, last year, and his consistent driving game, together with McDonald's powerful smashes, proved to be the most formidable doubles combination in this section of the state.

Wm. Sewell, ranking player No. 2

of last year, is also back. He says that the prospects for 1928 certainly look sufficient to give Tech a prominent place in tennis circles. He says that what tennis in Tech needs most, is the support of the student body. Tennis is becoming more prominent in colleges every day.

It is interesting to note that tennis is the only sport in which an official intercollegiate national championship is awarded.

Coach Knickerbocker is anxious to start work for this season and says that a definite announcement of plans will be made in the near future.

**'28 Grid Program Shows Real Class Schedule Begins**

By Ferral Roark.

Although the failure of Texas Tech to get into Southwestern Conference has dampened the spirit of some of the people on the campus, a glance at the gridiron card for next year will show that the Matadors still maintain their prestige in big collegiate circles. With such schools as Texas University and Texas Christian University on their list, the bull-fighters are going to have to show some fight or be relegated to the ranks of common bull slingers. Considering the set down that the Matadors met in the season showed, the Matadors are to be congratulated on being able to engage Southwestern schools another year.

Losing only four men through graduation, Big U and his assistants should have a good eleven to put on the turf next fall. With the exception of Al Jennings the line will be intact, and out of the wealth of material which dons the colors each year some man will come along who can hold down the wing position.

**Here's the Schedule**

- \* Texas University, at Austin, Oct. 6.
- \* St. Edwards, at Lubbock, Oct. 13.
- \* McMurray, at Lubbock, Oct. 20.
- \* T. C. U., at Ft. Worth, Oct. 27.
- \* Daniel Baker, at Brownwood, Nov. 3.
- \* A. C. C., at Lubbock, Nov. 10.
- \* Simmons, at Lubbock, Nov. 17.
- \* W. T. S. T. C., at Canyon, Nov. 29.

**College Inn Club**

Hail! Hail! the gang's all here! Not all the gang, of course, but most of us, and a few additions. We miss Miriam Chasey, and we seldom see Red Huff, who no longer finds College Inn very fascinating. We also miss Edith Harris, Tommie Merriek, and Sybil Glenn, who did not come back after Christmas.

Our new inmates are "Sallie" Simmons, of Miami, Frankie Barnhart, Tampa, Clora Swinney, Littlefield, "Charlie" Harp, Abernathy, Aileen Osborne, Hillsboro, Nettie Mullins, Haskell, and Zelma Ringwald, of Tatum, N. Mex.

It grieved the entire family to learn that our brother, "Country" Coker, was not returning. Although he was badly spoiled, being the only boy in a family of forty girls, we hate to lose him.

College Inn Club will meet each Wednesday evening at 10:30, and programs are being planned. Sometimes when we have a corking good one we'll invite friends, maybe.

**ARENA DUST.**

By Ferral Roark.

As the winter months roll around and the winds sweep down from the north and the thoughts of fans and athletics turn to indoor sports. Here in Texas the major sport is basketball and Tech should have her share of the glory when the season ends.

With the arrival of Percy Walker, star Matador Cager from Mission, Texas, the Scarlet and Black stock took a sudden rise and it is going to take a mighty strong team to bring them back to earth. Walker is a two letter man, having captained the team the first year of Tech's existence.

Reports from the Matador camp indicate that Coach Vic Payne is working the boys plenty hard. That sounds good, because no team can compete successfully that is not hindered by sensible training.

The football men have come to the conclusion that better training during the past season would have seen them a more successful season. As well there is another season coming, and the Bull-Fighters may well profit by their experience of the past fall.

The past year may well be called an open season on athletes so far as the holy bonds of matrimony are concerned. The pitch and catch combination of the Tech Nine are now engaged in the bitter game of married life. Thanks to their experience on the diamond the boys should have strong lungs and a witty tongue. Red Hamilton completed his ball bearing days on the gridiron by carrying off Kathryn Bryaryri the Viking beauty from Dallas. Satche Hill, veteran hurler has also passed from bachelor hood to the less dignified state of a married man.

Among the boys who did not get the seemingly deserved sweater for stellar play on the gridiron were Elvis Pickett freshman full-back who made the only touchdown against T. C. U.

Buddy Brothers, half-back and star punter who formerly starred with Lubbock High School, and Red Waller the fleet quarter who hung up several games to his credit. Although the Athletic Committee did not see fit to letter these men, from the sides lines they appeared to be a credit to their positions.

According to Sidney Knowles, boxing instructor there are some good men coming out for that sport and some real good bouts are promised in the future. Knowles wishes to place boxing on a rating with other sports and there is no reason why that shouldn't be done.

This is going to be Tech's big year in tennis, if good men mean anything, and we are given to understand that they do. Last year the Matador net men won the West Texas doubles, and this year they have back the men that carried the colors to victory. Power to them! Tennis is fast becoming one of the college major sports and Tech must be a leader.

**Potential Pugilists Battle Daily at Gym**

The Boxing class got underway for the winter term last Tuesday when several candidates for the class made their appearance at the Gym. Classes will be held every day, according to Sidney Knowles, who has the potential pugilists in charge.

New equipment is needed in order to keep the work up to par, says Knowles, but he urges all who wish to take up this kind of physical training to report promptly.

**Ex-Tech Students do Splendid Med. Work**

Reports from the Medical School of the State University at Galveston indicate that Tech is well to the front in Medical preparatory work. There are some ninety-six Freshmen in the Medical school. Three of these coming from Tech, Ewell Hunt and Henry (Hank) Benson of Lubbock, and Ike Kendrick of Amarillo. These three former Tech students had the two-year Pre-Med. course offered by Tech and they have distinguished themselves and their former school by the high rank they made at the Medical institution.

Further indications of the high class work done by these boys is observed with the explanation that the Texas Medical College give preference to those students who have already obtained the A. B. degree and an A. M. graduate in the Freshman class is not at all unusual.

**Dairy Products To be Made on Tech Campus**

Mr. Renner of the School of Agriculture installed a churn in the milk room of the Dairy room during the holidays. The first batch of butter made, totaled eighty pounds, and according to a letter on file in Dean Leidigh's office, was of superior quality.

Mr. Renner will hold Sophomore and Junior classes in Dairying practically throughout the day, during the next two terms. Laboratory work in the courses will necessitate the regular manufacture of dairy products, which in the interest of economy will be placed on sale.

**School Biologist Collecting Skins Of Texas Birds**

Mr. Landwer, of the Biology dept., has begun something new in Tech. Mr. Landwer began in September to collect bird skins. Later it is hoped, these skins will be stuffed or mounted and placed in the museum room of the new science building.

Mr. Landwer's goal is to have a good collection of bird skins and to have them mounted. Rare birds as well as local birds, interest him especially.

Already Mr. Landwer has two distinctly different hawks, both of which were shot within five miles of Lubbock, also, he has in his collection. The duck skin do not work as well as hawk, however. Mr. Landwer has a good specimen of mud-hen. There is in his office a little migratory bird that resembles a sparrow. But on the top of its head is a red crown. It is the Ruby Crowned Kinglet.

Mr. Landwer states that any good skins that can be used by the department will be appreciated if some of the young hunters will bring them in. He is constantly working on the bird skins, trying to increase his collections and he would appreciate any help that may be given him.

**Amarillo Club is to Hold Party Friday**

The Amarillo Club will have a party next Friday night at the Cafeteria. There are several new Amarillo students in school and these new students are urged to be at the party. See Barney Brady or Edgar Britton for further arrangements.  
Time 7:30.

**I Am The Gink.**

(With Apologies to Republic Syndicate).

I am the gink who advises you continually. I often attend a party where bridge, forty-two or some other games are being played and I make it a point to visit each of the tables and coach participants in the game. I look over your shoulder and make such remarks as these: "I wouldn't bid if I were you," "Boy howdy, you can knock 'em for a loop with all of those 4 trumps," "Now play this off," and "Hold this Ace till later".

Of course, I know that you can play the game as well as I can and that many people resent my free advice but nevertheless, it gives me secret satisfaction to tell you how to play your hand. It never occurs to me that I am tipping your opponents off when I make such remarks but they can't beat you anyway with my expert assistance. I carry on with the air of an expert, a shark, and a veteran. When I do this free coaching, it gives me an air of dignity, and self-satisfaction, which compensates me for my trouble in telling you how to "play this hand".
