

for Years and Years

We have been a part of the business of Texas, and have seen towns grow with business from small beginnings to important units in the geography of West Texas.

For four years we have watched the growth of Texas Tech from its strong beginning to this first goal—a very important link in the educational system of not only West Texas, but also of the South.

Our Congratulations

to Tech College, and to the Class of '29

Textile Seniors Are Offered Jobs

Many concerns have offered to consider employing some of this year's graduates in textile engineering, but only a few of the graduating class of seven have made definite connections thus far. Rudd Hardesty has accepted a place in Chattanooga with the Davenport Silk Hosiery mills. Ray Thomas and Julie Love are going to Oklahoma City this week to interview the district manager for the Goodyear Tire and Rubber company, who has stated that he will probably take two men. The Mexia Textile Mills have also offered to employ Ray Thomas, but he is undecided whether to go with them or the Goodyear company. Jack Maddox has been offered a position which is in the nature of industrial textile engineering by the Texas Power and Light company, and it is probable that he will accept.

Offers Come From East

During the latter part of April the Textile Engineering department sent letters to all Texas mills asking about jobs for its graduates. The object of this was to make an attempt to give the men a chance to stay in Texas to work. However, better offers have been made to most of them by companies in the East. The G. E. Miller Manufacturing company of Dallas has definitely offered to take one man into their Waco mill, and favorable replies have been received from the El Paso Cotton Mills company, and the Hillsboro Cotton Mills of Hillsboro. Companies outside the state other than those mentioned which are considering some of Tech's graduates are: the E. I. DuPont de Nemours company of Wilmington, Del.; American Chastillon company of Rome, Ga.; the B. F. Goodrich company of Akron, O.

Life Of Painter Is Interesting

Dr. Peter Plotkin, who is painting the portrait of Dr. Horn to be presented to the school by the Seniors, is a well-known Russian-American painter. Tragedy early marked his life. His parents, who were Jews, were killed in an Easter celebration in Russia. The future painter was taken under the care and training of Tolstoy, the noted Russian novelist and dramatist. He later studied in the Royal Russian university, from which school he received his doctor's degree. He also studied with Replin, the famous painter, sculptor, and etcher.

Dr. Plotkin came to this country as a representative of the Kerensky government with a delegation requesting American intervention in Russian affairs. He spoke at Madison Square Garden in behalf of his mission.

Senior Ag Students Are Given Dinner

Seniors in the school of Agriculture were given a dinner by Dean and Mrs. A. H. Leidigh last Thursday evening in their home, 2101 17th street. Covers were laid for the following men: Dean Leidigh, John Burroughs, Beris Carmichael, Tom Chapman, Riley Alexander, Claude Hope, Calvin Ritchie, R. C. Tom, Vaughn Corley, Paul Griffith, R. C. Middleton and Ogden King.

A Pair of Tech Pageant Queens

DONNA VAUGHN

LYNN DOUGHERTY

Here is a pair of queens from Texas Tech. Miss Dougherty reigned over the festivities, games, and dances which were presented before about six thousand people Saturday night. Miss Vaughn was crowned queen of May.

Civil Engineers Get Employment

The Civil Engineering department has secured jobs for members of this year's graduating class. John Osborn is going with the Dixie Oil company of Shreveport, Louisiana. Neville Graham will probably either go to work with the Texas State Highway department or into structural work in the east. June Hewitt, architect, has been employed by the Truscon Steel Co.

A letter from Jimmie Biggers, Tech graduate, stating that that he is going to Dallas to supervise construction and plant layout in the state of Texas for the Texas company has been received by J. H. Murdough, head of the civil engineering department. Mr. Murdough has also received a letter from Ted Sams, who is working with the Truscon Steel company in Youngstown, Ohio, in which he announces he has been promoted to the position of checker.

Review Of Tennis Gives Five Wins

Despite the unusually bad weather experienced, the tennis squad, ably led by Captain McKirahan, has finished a very successful season and turned in their fair share of wins. The season just closed reveals that the Matadors have won five matches and lost three.

The lettermen composed of Captain McKirahan, McDonald, Lahm, and Dalton won two times from Canyon, split with A. C. C. and Simmons, lost to Daniel Baker and beat McMurry, besides winning the tennis championship at Canyon, where schools from Texas, Oklahoma and New Mexico competed. The Canyon Buffs were the guests of the Matadors in the first contest of the season. But the Crimson Tide was not very cordial in its reception when they beat the Teachers in six straight matches. Daniel Baker won rather handily from the Tech netmen as did A. C. C. The last game of the home schedule was won from the Simmons

Cowboys. The first trip of the year carried the netmen to Canyon where for the first time in the history of the meet, Texas Tech swept the tournament. A trip to Abilene resulted in two victories for Tech and one loss. The Wildcats and Indians fell before the onslaught of the locals but they lost to Simmons, being tired down from such stiff and frequent competition.

Ross McDonald, captain in '28, is the only member of the squad that is to be lost by graduation. His place will be very hard to fill as he has been a credit to the school. For the past two years he has been very instrumental in bringing victories to Tech. This year he won the singles crown and at Canyon won the doubles in the Great Plains meet paired with McKirahan. Happy Dalton, Louis Lahm and Wilson McKirahan played very consistent tennis throughout the year. This season marked Dalton's first appearance on the courts at Tech but he made good from the start, taking the place of Bill Sewell in an admirable way.

Chaparittas Seniors Honored Saturday

Senior members of Las Chaparittas club, Misses Flossie Burkholder, Lela Jo Dunman and Lynn Dougherty, were honor guests at a luncheon given in Glorietta Tea Room by Misses Mary Lois Camel, Beth Wulfman, Dorothy Rushing, Frances Ford on Saturday, May 18.

All Library books are due to be returned by the 25th.

J.C. PENNEY CO.

Broadway and Texas Ave.

We wish to thank the graduating class and all the students for their patronage in the past and hope that they will always feel that this is THEIR store.

We hope for the graduates a successful future in whatever they may undertake.

The fine accomplishments of all the ages have been dreams before they could become actualities

So Texas Tech was; and so the first graduating class was; and so are graduating classes that will come.

The Texas Utilities Company is glad to go hand in hand with Tech in the development of West Texas; and congratulates Texas Tech upon its first full senior class, and the members of that class.

To the graduates we would say this: no greater good can come from your years in school than that you be good citizens; that you use your knowledge and skill gained not only for your own benefit, but for those also who have not gone as high as you; that, as you have been law-abiding citizens of Texas Tech, you become citizens of your community, and so of the world!

—“And this be the letter of the law, which is written; but the spirit of the law is of your own making, and the interpretation thereof.”

Alumni Will Have Banquet Monday

Officers of Association To Be Elected At Annual Meeting; Graduating Students Eligible to Attend

The constitution of the Texas Technological College Alumni association calls for a banquet for the alumni of the college, including the June graduates and the prospective August graduates of the year, to be held annually in the evening of Commencement Day. At a called meeting of the alumni held at the college last Thursday evening plans were made for the annual banquet of the association to be held this year at 8 o'clock on the evening of Monday, May 27, at Hotel Lubbock. All alumni and all June and prospective August graduates of the year are eligible to attend. At this meeting it was also decided that the association would continue for this year its custom of inviting the administrative officers of the college and their wives to be guests.

Mary Hope Westbrook, secretary-treasurer of the association, was elected general chairman of the affair and E. M. Barnett, president, appointed the following alumni to assist her in detailing the plans and making preparations: Dayle Wallace, Bailey Carroll, Willie Mae Hawthorne, Mrs. D. VanPelt, Mrs. E. M. Barnett, Sylvia Wilson and Mary Dale Buckner.

The election of officers is the principal business of the association to be attended to at the banquet and in addition to that a program composed of special music and talks by representatives of the classes of '27, '28 and '29 is being worked out by the committee. E. M. Barnett will act as toastmaster on this occasion.

225 Expected.
The Alumni banquet has been carried out in such a splendid fashion that it is looked forward to as a fitting affair to close the college career of the seniors and at the same time reunite the alumni who are still vitally interested in their Alma Mater. In 1927 at the first banquet 24 students and their guests gathered around the board at Hotel Lubbock. Last year 77 students were present. This year out of a possible 300-350 alumni and 168 prospective graduates—it is thought by the executive committee of the association that about 225 should be able to attend. One attractive feature of the banquet is the display of the pennants of each class which have been turned over to President Horn for safe-keeping for the past two years and which will now be sent to the curator of the Tech Museum from which they may be taken only for display at the annual banquet. Reservations for the affair are to be made with Mary Hope Westbrook, Dayle Wallace or Irwin Coleman at the Registrar's office any time this week. Cover charges are \$2.00.

TO HAVE PARTY

A garden party at which the new members will be publicly announced is to be given by the Forum at 5 o'clock Wednesday afternoon, May 29, on the College Green just south of the administration building. This is planned as a farewell party for the faculty and student body is invited. This is the last all-college social affair of the Forum which has carried out its excellent plan of bringing all college women together socially for at least one time each term.

Les Cigales Group Lunch At Glorieta

Les Cigales club, which was formerly named the Gadabout and is composed of Tech girls, had a luncheon at the Glorieta Saturday. Pink and yellow appointments carried out the club colors.

Following the luncheon the members attended a local theater. Those who attended were Misses Dorothy Rylander, Georgia Lee Drake, Johnie Bess Richards, Corene Ratliff, Gladys Nix, Gladys Cox, Mildred Harris, Alysie Odum, Mervel Rankin and Mrs. Ehrhridge Egan.

Juniors Are Urged To Check Schedules

All juniors who expect to graduate in 1930 are urged to file application at the Registrar's office and check their schedules for next year before leaving school this year.

Students who intend to enter summer school this year are requested to file their name at the office immediately.

Officers of the Dallas Tech club for next year were elected at a special call meeting of the organization last week, including: president, Bob King; vice-president, Lloyd Reeves; secretary, Ben High; treasurer, Lanford Shaw. These officers are to take office at the first meeting of the club during the fall term. This meeting was the last for the term, and no formal program other than the business on hand was taken up.

Hankins Is Honoree Friday Afternoon

Mrs. Gaylord Hankins, formerly Miss Pearl Hensley, was honored last Friday afternoon when her mother-in-law, Mrs. J. H. Hankins, was at home during the afternoon in her home at 2401 Broadway. A number of local women called.

The hostess stood at the head of the receiving line and presented Mrs. Hankins to the guests. Others in the line were the bride's mother Mrs. A. M. Hensley, Mrs. Ralph Bedford, Mrs. J. T. Hutchinson, Mrs. Edward Allen, Mrs. Lorenzo Ellis, Mrs. Lee Quillen, and Mrs. Marlin R. Smith, Jr.

Bouquets of roses were used effectively in the rooms, and guests registered in a prettily decorated guest book.

Mrs. Hankins was widely feted by her friends before her recent marriage and is a former student of Tech.

Mr. and Mrs. Hankins returned early last week from their honeymoon spent in Oklahoma.

Pre-Med Students Have Last Meeting

Pre-Med students of Tech assembled for the last time this year last Friday when they met in the county park for a picnic and election. In a business meeting presided over by Pauline Miller, retiring president, the following officers were elected: President, Bob King, of Dallas; vice-president, Lucile Houston, of Lubbock; and secretary-treasurer, Helen Jackson, also of Lubbock. Besides the club members, there

were present: Miss Bessie League, Mrs. W. T. Read, Mr. Landwer, Mr. and Mrs. Studhalter, Jewel Barrick, Ross Ayers and McGlotham.

- TIME -

- SUCCESS -

AS this first all-Tech class graduates from Texas Tech, a fourth milestone is being passed in the history of the college. First, there was its creation by the legislature of Texas; second, its establishment in Lubbock and its actual construction; next, the first enrollment, in the Fall of '25—and now, the first four-year graduating class of a hundred and sixty-eight young men and women.

THE members of this class of '29, and members of classes that will follow have two gifts, TIME, and ENERGY (as College graduates, directed energy); these to combine, and from the combination to wrest the third — SUCCESS. All have equal TIME; the applied ENERGY will determine the SUCCESS of each.

Welcome indeed are you of '29 to the economic world where time is short, energy the touchstone, and Success yours for the making. Finance is the life-blood of business. Learn the value of money as a step toward success.

Put Wings on your Cap and Gown men of Action

Ribes have wings and sometimes they must be set flying to bring in more.—BACON.

EVERYWHERE you read of the serious need of trained men in aviation—and you may believe every word of it, gentlemen. As one of the largest air line operators in America—of which T-A-T Flying School is a related company—we are in position to know the situation from first hand. Spirited bidding is the order of the day for every properly trained and experienced man available!

COLLEGE MEN NEEDED!

Significant facts, these, for the college man and woman. And of signal importance to college men and women who have the perception to want to grow with a great and growing industry—to college men and women who must earn back quickly the cost of their education. The lengthiest course offered at T-A-T requires the AVERAGE student six months to complete, and prepares you to begin your career with the training so necessary to success. Nor need you be rich or mechanically inclined to make good in aviation.

Retiring Prexy

JACK MADDOX
With the end of the year Maddox leaves the presidency of the Students' Association to Hogue Williams of Hamilton, Texas. Vaughn Corley, present vice-president of the Association, will be succeeded by Charles Woodridge. Margaret Trigg, now secretary-treasurer, does not leave office, having been re-elected. Maddox is a textile engineering senior.

There's No Substitute For Honey

Co-ed Declares Her Gung Doesn't Believe "That Awful Line," But Likes to Hear It Just the Same

There is a fixed formula, it seems, for collegiate conversation, and only unorthodox individuals violate the unwritten code. A girl speaking the other night, said, "I get so overlastingly tired of this constant conversational monotony with boys who have the same arguments. They never vary-always, always, they'll argue for hours that you should be unconventional when they themselves are being painfully conventional in using the same argument that every boy in the crowd uses."

This misunderstanding which exists between the two sexes will always be interesting and if several so-called reformers, or sociologists and psychologists could only listen to a while the remarks they would probably hear would at least be a bit comforting.

The dances are one big factor that come in for discussion. Boys and girls alike have joyfully gone to the numerous college dances this year and a recent bit of overheard conversation is not without humor.

It seems that the other night the low well executed, methodic cussing of a man who had some acute inward ache was heard coming from a re-boudoir. When the blue blazers subsided he moaned, "I've been to a colling dane and it's the - " & " & " tag dances. And he said more, too awful to repeat or remember. But the main gripe was coming from the numerous times his girl had been tagged, sometimes he averted by men he knew she had never seen before.

Another man spoke of retalating by taking some of the feminine tactics of making idle conversation. This torture would die soon, he maintained, if the males assumed

tion apparently. Dances will go on, and tagging will go on, and we are willing to wager that the men will go on with their lines which seem to grow so tiresome but nevertheless are listened to so willingly by the girls who are fortunate to be granted an occasion for the telling of the yarns.

GOOD VISITS HERE
Grover C. Good, former schoolmaster in El Paso, was at Tech yesterday visiting Roy McCullough Good is at present the leader of Boys' work in Texas under the supervision of the Y. M. C. A. with headquarters at Dallas.

He tells of queer pranks of schoolboys in his teaching days. In one class, he said, a boy on the front seat drew a woman's head on the toe of a new tan shoe worn by the teacher who stood just before the front desk.

The teacher, Grover C. Good, found his decorated toe later in the day, but instead of punishing the kid, he congratulated him. Then he asked an artist to see if the boy had any ability. The artist did, and the former prankster is a successful cartoonist today.

Note to freshmen: Try this on your favorite math prof.

FORMER STUDENT GETS
Miss Everetta Love, former Tech student, has been awarded a Journalism scholarship which is presented annually to a girl in the University of Texas by the Texas Woman's Press Association.

She was a student at Tech in the summer of '28.

AN EDITORIAL

For young men of today aviation holds the most marvelous immediate opportunity of any age. This is a truth so great that it is almost a bromide. Yet the greatest opportunities are for the college man who has received thorough training and earned experience. At no other time in history, in no other industry, have youth and education been valued so highly!

The most imposing figures in aviation today are college trained. A roster of the important executives of aviation would disclose practically every man—college man. YOUR FACULTY OF KNOWING HOW TO LEARN GIVES YOU A HEAD START!

As one of the nation's greatest air line operators—and as employers of many T-A-T trained men coming from a number of universities—we suggest to the college man or woman that he or she train for a position in aviation. It is hard to believe the benefits and profits shortly to be realized from such training—impossible to guess the future value!

PERSONAL INSTRUCTION

At the T-A-T schools, veteran Air Mail pilots, chosen for their special ability to impart their knowledge and experience, supervise every step of your training with personal attention and instruction. Actual flying begins the first day, with mechanical and ground school training blending into your program. T-A-T shops are fully equipped with latest tools and machines. You will begin firing many and varied types of open and cabin, dual control planes, powered with approved motors. In advanced flying you will take the stick of transport and fast pursuit planes, and every type of plane necessary to give you broad flying experience.

SPECIAL SUMMER VACATION COURSE

Never was opportunity so great for young men—never such potentialities for college men and women. That college men and women recognize this is seen by the hundreds who have already written in about our special summer course for college men and women. You should send now for full details and information to insure your reservation.

FREE AIRPLANE TRANSPORTATION

Six regular courses are offered, ranging in cost from \$75 to \$250, requiring 30 days to six months to complete, with liberal terms of payment, and free airplane transportation in our own transport planes to students on T-A-T Flying Service routes. Send this coupon today for information about the Special Summer Course and our 32 page book, "FLYING THE GOLDEN TRAIL." In this book may lie the way to the realization of your dearest dreams! Send for it now while the classes are still open.

COEDS

Few other young industries have been so kind to women. No other industry in so short a while has produced a Lady Mary Beach, an Amelia Earhart, an Eleanor Smith, holder of the women's record for endurance flight, or a Bobbie Trout, Pacific coast pilot who established the first women's endurance record. Considerable medical attention is given to women students in each of our four Texas Schools. There is a place in instruction, advanced women in aviation.

TRAINING IN THE HEART OF IMPORTANT ACTIVITIES

College men and women will understand the importance of training in the heart of important commercial aviation activities. As a student at T-A-T you will actually become a part of a great organization, and in touch with the opportunities it holds for hard work and ambition. The five T-A-T companies fly many thousands of miles daily. Passenger and Air Mail planes serve four states, with maintenance shops in the principal cities of these states; and one T-A-T related company distributes four of the principal makes of airplanes—another distributes airplane and engine parts. Your contact with commercial aviation on so large a scale will give you invaluable experience as you train. . . . A strong reason for the preference T-A-T students are given.

CORRECT TRAINING

There is a serious need for trained men and women in the industry who accept no graduate for its best jobs who is not THOROUGHLY TRAINED. You MUST be properly trained, whether you intend to become a pilot, mechanic, salesman or aviator. That T-A-T graduates receive correct, thorough, complete, comprehensive training is amply demonstrated in the fact that T-A-T SHIPS HAVE FLOWN MORE THAN A MILLION MILES WITHOUT INJURY TO PASSENGER, PILOT OR PLANE, OR LOSS OF A SINGLE PIECE OF MAIL.

And many of the men responsible for this record are T-A-T trained! Another

Director Pleased With Tech Chance

McDonald Optimistic About Change In National Extension Association Rule; College May Be Admitted

Professor J. F. McDonald, director of extension, has just returned from Austin where he has been representing the college in a meeting of the National University Extension Association. Mr. McDonald reports a significant change with reference to membership in the association and appears optimistic as to Tech's chances for membership in the future.

The N. U. E. A., on the closing day of its conference, at Austin, on Wednesday of last week, after a spirited discussion on the exclusive character of its membership, prompted by the application of the "ancient and honorable" William and Mary College for admission requirements, and to admit William and Mary. It was a test case, and it was understood so to be. In the future other strong colleges with well organized extension departments will be admitted upon their merits, notwithstanding they are not universities.

This action was followed by a change of the constitution of the Association, relating to membership. The secretary of the association read a list of eight colleges and universities, of different sections of the nation, which had submitted inquiries looking toward membership, the list being headed by the Texas Technological College. S. M. U. was included in the list.

Dean Shelby, president of the association, the University of Texas, the Austin Chamber of Commerce, and the Rotarians proved admirable hosts to the members and visitors of the association. A barbecue, dinner, reception, and drive were included in the program. Every courtesy, but the privilege of voting, was extended to the representatives from Tech.

Price To Serve As Graduation Marshal

H. Y. Price, representing the junior class, will be Marshal of the day next Monday during commencement exercises for the class of '29. Faculty and seniors will meet in front of the Textile building Monday morning. According to Price, the procession will start promptly at 10:30 a. m. The faculty will be seated at the gym according to rank, while the seniors will be seated alphabetically according to schools.

Somewhat similar will be the procession starting at 10:55 Sunday morning when the seniors march to the baccalaureate services. The faculty will not be included in this file, however.

Registration Plan Given For Summer

Following is the plan of preliminary registration for summer school as given out from the Registrar's office. Students will report for registration in the following alphabetical order:

- 8 to 9—Those whose family names begin with V, W, X, Y, or Z.
- 9 to 10—Those whose family names begin with S, T, or U.
- 10 to 11—Those whose family

FLYING SCHOOL

Snyder Boy Wins In Stock Judging

A gold medal was awarded to Buford Browning of Snyder for being high point man in the Annual Freshman Livestock Judging contest held Saturday. The medal which was offered by Alex McDonald of Lubbock, to the man making the highest score in this contest was awarded to Browning for a high score of 653 out of a possible 750 points.

Other high men of the contest were W. J. Grimes, second with 645 points; George Langford, third, with 636 points; Everett Griffin, fourth with 630 points; Eul Bell, fifth with 626 points. In the various divisions of livestock Buford Browning was high in beef cattle with 142 points; Harold Woodson in dairy cattle with 139 points; Everett Griffin in hogs with 136 points; Jim Williams in horses with 143 points and J. P. Gee in sheep with 136 points out of a possible hundred and fifty.

This contest is open only to those men who have the highest standing in the year's work in the freshman stock judging course. This year twenty-five men were selected from the different classes to compete in the contest.

The contestants were divided into teams of five men each and the high team composed of W. J. Grimes, Harold Woodson, Everett Griffin and E. Bell and Truett Stovall were entertained with a theater party after the contest by instructors R. C. Mowery and F. G. Harbaugh.

The contest was judged by J. M. Bird, vocational agricultural teacher, Post and W. L. Stangle, head of

the department of animal husbandry. The senior and junior agricultural students headed by E. Carmichael had charge of the contest.

Coleman To Start Law Degree Work

Irwin Coleman, who has been connected with the Registrar's office since the foundation of Texas Tech, plans to leave for Austin on June 1 where he will study for his law degree. Coleman is a Liberal Arts graduate of Tech, class of '28, being among the youngest and first graduates who did all of their college work here.

It is also remembered by old students that Coleman has the honor of being the first student who registered in Tech. He is a two-letter man in debate, a member of Pi Gamma Mu and the Southern Scholarship Society and was the winner of the \$250 scholarship for highest excellence in oratory in 1925-27. During the past year Coleman has been employed as full time assistant in the Registrar's office. His wife, Mabel Gibbs Coleman, takes her B. A. degree this spring.

Registration Plan Given For Summer

Following is the plan of preliminary registration for summer school as given out from the Registrar's office. Students will report for registration in the following alphabetical order:

- 8 to 9—Those whose family names begin with V, W, X, Y, or Z.
- 9 to 10—Those whose family names begin with S, T, or U.
- 10 to 11—Those whose family

**More Than A Stenographer—
And Paid Accordingly!**

Stenographers are not hard to find—stenographers of a fashion. The same is true with book-keepers, accountants, clerks, business managers—after a fashion. But what is sought after by executives of any business is employees that are MORE than they claim to be.

A specific business training is vital to the latter class. Exact, to-the-point training. Business training in a business school.

One may learn business methods in many places. But a certified Business College is the only place where "more than" employees are trained! Add to this the fact that our Employment Service has more calls than can be filled for TRAINED business people. The balance is more than favorable for training here. Phone now—call 335 for further information.

**School Exercises
Held In Tech Gym**

Several Faculty Members Have Son or Daughter In Graduating Class; Three Now Attend College

Graduating exercises for the senior class of Lubbock high school were held in the Tech gymnasium Thursday evening, May 16. Several faculty members had a son or daughter in the class. Among the graduates was Lynn Gray Gordon, son of Dean Gordon; Frances Ford, daughter of Gus L. Ford; Sarah Michie, daughter of Dr. Michie; and Miss Read, valedictorian of the class and daughter of Dr. E. L. Reed. Misses Ford, Michie, and Ola May were among the first semester graduates who have been attending Tech during the last two terms. Phyllis Pool was selected by a Federated Woman's club for a scholarship to be awarded to the best "all-around" girl of the class. Miss Pool is a sister to Dean Leight's secretary.

Mr. Duncan, superintendent of schools, stated in his address that he should like for all the graduates to consider Tech a continuation of Lubbock high school. Dr. Hutchinson, president of the school board, told the class that he should like to be present and see every member of the class graduate from Tech. Mr. Garrard delivered the commencement address.

**Moore Completes
"Stronger Call"**

Horace Grady Moore, Tech senior, has just completed the play, this entitled "The Stronger Call." The play consists of one act with two scenes, and is of the problem play type. Its progress depends upon the struggle for a decision the central character, a young man, undergoes when he is confronted with the choice of exploiting his small spark of personal genius and the alternative of a happy life. "The Stronger Call," of course, is the deciding factor.

Moore hopes to produce this play with a select cast chosen from summer school students before the Little Theatre, the Faculty club, or other interested organizations. He plans to submit this play to a critic for improvement.

Moore is at present working on a three-act comedy-drama, two acts of which have been completed. He is also constructing a historical play based on the operation of the Pirate Jean LaFitte, in Texas.

AWARD ARRIVES

The loving cup, awarded in the West Texas colleges' one-act play tournament held at Tech recently to Howard Payne college players, arrived early this week, and is being sent to Howard Payne immediately.

The cup was awarded by the Lubbock Chamber of Commerce, and bears the inscription "Lubbock Chamber of Commerce Award, Howard Payne College, Winner, West Texas College One-Act Play Tournament, Texas Technological College, March 28-29, 1929." It is of silver, of Grecian simplicity of line, and stands 10 inches high without the base.

Directors of Tech's Fourth Pageant

Pictured above is (right) Miss Ruth Pirtle and (left) Miss Zella Riegel. Miss Pirtle was director general and Miss Riegel was assistant director of the Elizabethan Festival Tech's fourth annual pageant, which was presided by over six hundred people last Saturday night.

**Williams To Lead
Forum Next Year**

The Forum announces the election of Margaret Williams, daughter of Mr. and Mrs. L. G. H. Williams, as president for the academic year 1929-30. Miss Williams has completed her work for her bachelor's degree in three years and summers at Tech and will receive her degree with a mathematics major in August of this year. She plans to enter the Architectural Engineering Department next fall as a sophomore and complete her work for a degree in that field. In addition to her scholastic record she has been actively connected with various student organizations on the campus since she has been a student here. Kate Pressley who will be a senior in the Speech Department next year has been chosen to act as business manager on the record which she made as general chairman of the all-college women's party and the Collegiate Review which were sponsored by the Forum during the winter and spring terms of this year. Nell Goodloe, who was elected by the faculty as the best all-college woman citizen during 1927-28, her freshman year here, was elected by the Forum to be its secretary.

Seven new members of the Forum have been elected and will be initiated by the present members on Sunday morning, May 26, at 5 o'clock. The new officers will be installed at the same time.

**Glee Club Boys
Order Sweaters**

The Boys' Glee club has recently placed an order with Hemphill-Wells Co. for sweaters and emblems for its members. Of the 15 boys, 10 have appeared in concerts and will be awarded emblems. The others will have plain sweaters. The order is expected to arrive soon after the close of school, according to information from Professor Wagborne's office.

TECH STUDENT WINS

Mrs. Floy Eiter, Tech student of Lubbock, won first place in Texas in a national essay contest, "Why I Should Vote," held recently under the auspices of the Federated clubs of America. Her essay was published in the late current edition of the "Federated News."

**Pre-Law Orators
Wage Eloquence**

No Fourth of July speaker ever waxed more eloquent than did certain Pre-Laws last Wednesday night as they attempted to elect their favorite to office when the annual Pre-Law elections were held amidst the most stormy political event of the year.

Using the preferential ballot the results were closer than the ordinary secret ballot would have allowed. The results of the nine elective offices are as follows: Alvin Allison, recently elected business manager of the Toreador succeeded Holmes Webb for the presidency by a substantial majority over his two opponents.

Lanford Shaw of Dallas, freshman, ascended to the position of vice-president after a spirited fight by his supporters on his behalf. He takes the place of Mary Great-house. Don Boggs, honor student and

present news editor of the Toreador was elected secretary-treasurer, after one of the hardest fights of the whole election. Solon Clements turns over the reigns of office to Boggs next September.

Don Wellman, a member of the first Fish debating team ever to represent Tech, was elected parliamentarian to succeed Clarence Whitesides, who graduates this year.

To redheaded, freckle-faced, smiling, Canon Clements falls the job of publicity agent, or known in the common vernacular as reporter. James Abernathy is the present incumbent of the office.

Ex-president Taft has nothing on Holmes Webb, who was elected Chief Justice of the Texas Technological Supreme Court, on retiring from the presidency. Taft is at the

present time Chief Justice of the U. S. Supreme bench, after spending four years in the White House. Sidney Knowles and Robert Webb relinquished their positions of Associate Justice to Solon Clements and Lloyd Groslin, respectively.

Alvin Ellis becomes prosecuting attorney, taking the day after one of the hardest fights of the evening. All three candidates were within 10 points of each other. He steps into the shoes of J. W. Jackson, the last of the Charter members of the club which was formed the second year of school.

CAFETERIA OPEN FOR SUMMER
Tech Cafeteria will be open for breakfast and the noon meal during the summer school according to an announcement from Miss Katherine Harper, director.

**JUST RIGHT
FOR LUNCH**

A rich, fluffy Ice Cream Soda—your favorite flavor—with a freshly made sandwich! What could be better for a hot-weather lunch? Cooling, refreshing, nourishing—just what you want.

**We, too
SERVE**

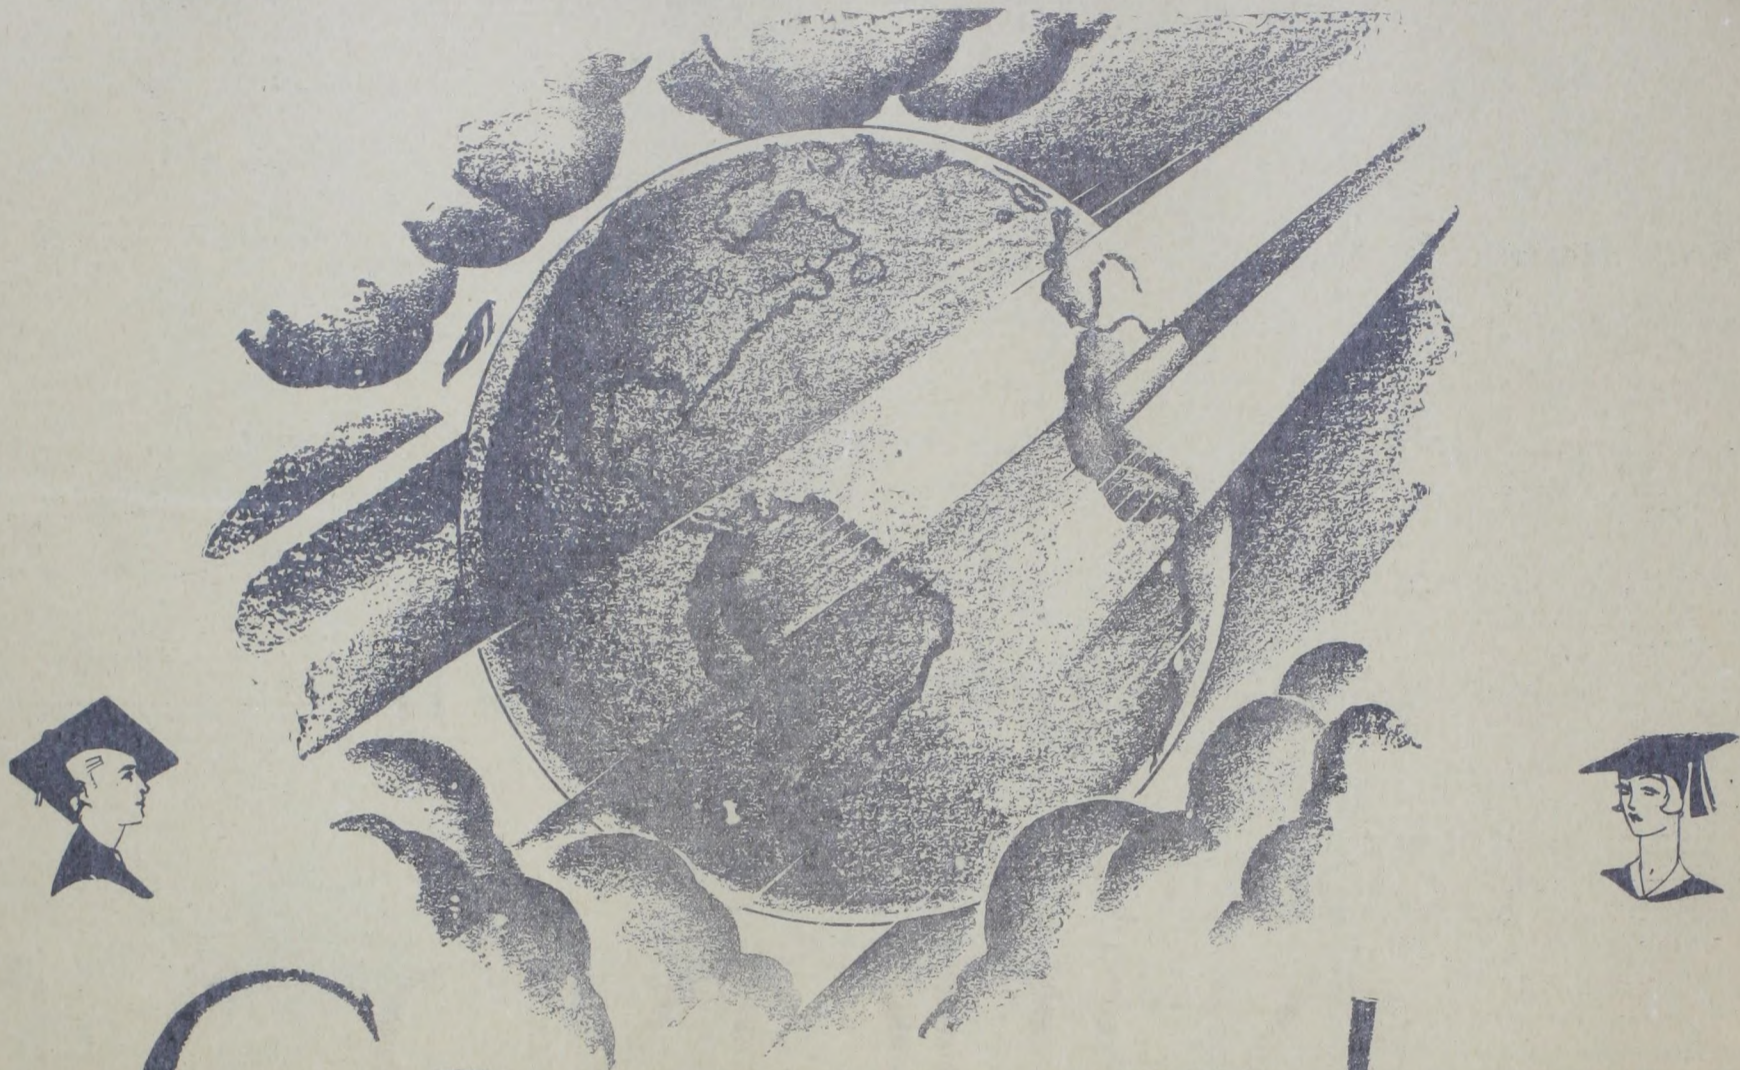

We serve the people, As Tech Serves the People

Our service is used in the home, the church, the state. It is equal in the factory, the store, and in the home. It is demanded at all hours.

The class of '29 will be called upon to serve at all hours also. Its members will work for the home, the church and for the state. We congratulate the class upon completion of its four years, and upon its entrance into the field of service.

**WEST TEXAS
GAS CO.**

Congratulations To Tech's First Four-Year Class!

CONQUER!

CLASS OF 1929

-and Life, and Luck, and Fame to 29!

Keep that "Rainbow Round Your Shoulder," Class of '29! Go right on "Looking At The World Thru Rose Colored Glasses!"

Don't pay too much attention to cold water throwers who talk about the "stern realities of life." Of course, you will experience plenty of knocks and jolts. So did Hannibal, crossing the Alps. So did Columbus, keeping his little crew headed westward. But they accomplished their purpose.

Do the things you decide you really want to do! Attempt the impossible. Lindberg did—and blazed a trail that will change the history of the whole world. There are plenty of big things left to be done. Don't think every worth while thing has been accomplished before you arrived on the scene.

There are just as many important scientific discoveries to be made. Just as many mechanical inventions to be worked out. Just as many daring exploits to be attempted. Just as many fortunes to be achieved as ever before in the history of the world. *Get busy, keep busy, and you are sure to conquer, Class of '29! Tech and Texas* will be expecting much of it's first four year class.
