Subscription covered by the Student Activity Fee. By subscription \$1.50 per school year.

## Choosing Wisely

Frequent transferring of students from one school in Tech to another is one of several indications that there are a number of students here who have not settled that all-important problem—that of choosing a vocation. They have not learned for what their talents are best adapted; they have perhaps not realized that a vocation should be a choice instead of a necessity and they have not yet found out that a purposeless drifting from one line of work to another is likely to result in a wasted, misty life.

A student by the time he is a junior should have decided at least tentatively the general field of his life work. This does not mean that specialization should immediately set in to the detriment of cultural values; it does mean that the choice of a field of work does give a purpose and a vitality to life that is essential for maximum success.

The importance of helping students, not only in training them for useful work, but also in counting a well-reasoned choice of the kind of training they want is a matter that the modern school cannot afford to overlook. Several avenues of help in this respect are afforded.

## Athletics for All

INTRAMURAL ATHLETICS seem to offer the most promising positive development to counteract the oft-criticized over-emphasis on intercollegiate athletics that has yet been devised. "Because of the development of intercollegiate competition, not so much in games as in its material, and especially in its monetary aspects, its bearings as play have fallen largely into a subordinate position. The task confronting those concerned with the development of intramural athletics is to restore to it its proper place in college life."

On the whole, American intramural athletics represent a sounder process of development and sounder aims and purposes than intercollegiate contests. (Quoted from the report on "American College Athletics" by the Carnegie Foundation.)

The case for the fullest development of intramural athletics is one which a plastic school like Tech might well afford to heed in laying the foundations for its future. The case might be briefly and incompletely summarized as follows:

1. Intramural athletics actively engage a far larger number of students. Intercollegiate contests are reserved for those who really have no need of the physical development.

method. They should be well supervised, however, by the Carnegie report states, "yet for intramural athletics, which engage more than twice as many students as intercollegiate athletics, the well-trained coaches are at best few and in a great number of colleges lacking altogether."

6. Intramural athletics lack the superficial, artificial, credit-seeking, perfunctory routine of organized physical training work, which is of doubtful value.

An analysis of the intramural situation in Tech in light of the above points reveals the following facts:

1. Intramural athletics in Tech are confined to roost small group. For example, only sixty-six men were enabled to try for intramural football, due to lack of more uniform. Furthermore, participation by schools does not provide for enough entries. Instead of the three teams working out in football, for example, there ought to be class divisions as well and representatives from such organizations as the social clubs, the pre-law club, etc.

2. Intramural athletics in Tech ought to cover a larger field of activity, which they might do without much expense. Many of the activities listed above as included in intramural competitions are of low cost. Boxing, wrestling and hiking, for example, require little more than their promotion.

3. Those intramural contests now sponsored here might be more fully developed. Basketball lasted only a few weeks and included only a very few contests last fall. There was a demand for it to last through the winter term, the regular basketball season as well.

4. Time and energy that might be spent by instructor and pupils in intramural competitions are of low cost. Boxing, wrestling and hiking, for example, require little more than their promotion.

## Sex Controversy

An interesting indictment of the action of the president and of the board of curators of the University of Missouri in regard to the sex questionnaire controversy of last year has recently been made by the Association of University Professors, of which Tech has a local branch.

It will be remembered that one professor in the University of Missouri was dismissed and another was suspended following the distribution of questionnaires concerning various phases of the sex problem to students. The board of curators in so doing charged that the questionnaire was immoral, shocking, and unscientific in that it would not tend to be of substantial value.

The conclusion of the committee of the Association of University Professors on the matter was: "For the board of curators to decide the most severe punishment within its power, dismissal and suspension without pay, for this alleged 'offense' (trivial, if any), is, under the present circumstances, a clear breach of the principles of freedom of teaching and research and security of tenure in the university."

The report also stated that there was no evidence that any student had been shocked or led to immoral action by the questionnaire, but that they had taken it for what it was, a scientific inquiry. It also stated that the questionnaire concerned matters that not only most college students, but also most high school students were discussing frankly with each other.

The committee denies the charge of the curators that no scientific or valid facts could be drawn from the answers to the questionnaire.

## Exam Schedule

Winter Term, 1930	
MONDAY, MARCH 10	
8:00-10:00	All classes meeting from 8:00 to 10:00 M. W. F.
10:30-12:30	All classes meeting from 1:00-2:00 M. W. F.
2:00-4:00	All classes meeting from 3:00-10:00 T. T. S.
TUESDAY, MARCH 11	
8:00-10:00	All classes meeting from 3:00-9:00 M. W. F.
10:30-12:30	All classes meeting from 3:00-4:00 M. W. F.
2:00-4:00	All classes meeting from 11:00-12:00 T. T. S.
WEDNESDAY, MARCH 12	
8:00-10:00	All classes meeting from 10:00-11:00 M. W. F.
10:30-12:30	All classes meeting from 11:00-12:00 M. W. F.
2:00-4:00	All classes meeting from 8:00-9:00 T. T. S.
THURSDAY, MARCH 13	
8:00-10:00	All classes meeting from 10:00-11:00 T. T. S.
10:30-12:30	All classes meeting from 2:00-3:00 M. W. F.
2:00-4:00	All classes meeting from 12:00-1:00 T. T. S.
FRIDAY, MARCH 14	
8:00-10:00	All classes meeting from 12:00-1:00 M. W. F.
10:30-12:30	All classes meeting from 1:00-2:00 T. T. S.
2:00-4:00	All classes meeting from 3:00-6:00 M. W. F.

Note: Any classes not herewith scheduled may make their own arrangements provided the examination is held during the week beginning March 10.

Saturday classes will hold examinations at the regular class hour.

## Tech Publicity Bureau Broadcasts

Photographs, Feature Articles And News Of College Activities Sent To Principal Southwest Journals

When a college beauty gets her picture in the annual, which a class or college queen is crowned, or when an athlete makes an imposing record, his or her picture is always displayed in a local paper, but the lucky students would feel even more flattered if they knew that their likenesses probably will also appear in other newspapers scattered throughout the Southwest, as the result of the publicity bureau under the direction of Mr. Cecil Horne.

Each week a budget of news is sent out to over 200 of the principal daily and weekly newspapers of Texas, Oklahoma, and New Mexico. Photographs of college buildings and college celebrities are sent all over the United States, and short feature articles about special departments of the college are also released.

During the recent Farmers Short course fifty pages of news articles were received by West

## R. O. T. C. Companies Will Be Organized

Organization of new senior R. O. T. C. companies has recently been authorized by Lt. H. E. Killin, with Ted Moody, Joe Williams, Joe Lang, Ben Jenkins, Joe Kelly and Gay Singleton in charge.

Rules for the new companies provide that all men entering must be duly enrolled students of Tech, that at the time of acceptance of a new company no previous Tech cadet will be counted as a new member unless he has been in Tech the two preceding terms without having been enrolled in military science courses, and that the same rules regarding proper registration in the military department must be strictly observed by all members from the time they are mustered into cadet corps.

All companies organized will have a minimum of fifty men and will be lettered in the order in which they are mustered, beginning with Company "A."

## The Oberammergau Passion Play

In Colored Motion Pictures

You who have long wanted to journey to Europe and see Anton Lang play with the Oberammergau Players the part of the Christ, in the "Life of Christ," now have the excellent opportunity of seeing the play! Undisturbed by the sound of a foreign language and vivid in natural colors, this epoch making picture will be presented in Lubbock to capacity houses at popular prices. Special musical numbers, orchestra and appropriate intermission films, also in color will appear—

Monday and Tuesday  
March 10 and 11

## Text by Dr. Evans Adopted by State

"American Citizenship," a new text book for use in the seventh grade of Texas public schools, written by Dr. A. W. Evans, head of the Education Department of Texas Tech, and Dr. C. P. Patterson of Texas University, has been adopted for a five-year period by the state.

Dr. Evans minored in Government while working for his Ph.D. and did considerable research work along that line, for which he got his wide range of information. The book involves a modern treatment of civics from the beginning of activities in the home, school and community. It involves all the major and minor activities affecting American citizens.

Virginia Smallwood, daughter of Professor and Mrs. George Smallwood, was ill in the Lubbock Sanitarium from Saturday until Monday.

Tech branch of the American Society of Mechanical Engineers will meet tonight at 7 o'clock in room 180 of the engineering building.

Sue Wilson and Sue Brown were the week-end guests of the former's parents in Brownfield.

Kay Stallings visited with her parents in Post City Saturday and Sunday.

Mrs. R. M. Childwood, assistant dean of women, has been ill in her home in College Inn since Monday.

## Student Opinion

ATHLETIC CONFERENCES  
Several weeks ago an article appeared in the Toreador in behalf of the proposed Staked Plains Athletic conference. The article was written by one of the originators of the conference. In that article the author put forward the aims of the conference and Tech's reasons for sponsoring the union.

It is to be regretted that Tech is a member of no athletic conference and it appears essential that we should be in some league before the football season opens next fall. The lack of conference competition has repeatedly handicapped all of the

athletic teams of this school. With the installation of a new head coach and athletic director, Tech should now plan her campaigns at future athletic competition. It was with this in view that the idea of the Staked Plains conference originated, and its planners are to be heartily congratulated upon their desire to see Tech athletics advance. The proposed conference would undoubtedly be of untold benefit to Tech. But would we not have more success in another conference?

It appears as though several of other schools, excepting Simmons and Howard Payne, would be financially supported if they chose to see how Canyon and the El Paso School of Mines could be large drawing cards. Neither could the New Mexico Aggies lend much financial support if they chose to enter. It is plainly apparent that this is where our future athletic competition should be held.

Although Tech is planning to enter some other conference, it is doubtful whether the athletic officials have ceased to cast longing glances toward the Southwestern Conference. Even though the plan of getting into the Southwest's premier conference has been temporarily set aside, it can not be kept down. Tech is growing too fast and will eventually become too strong for the teams in any other conference in this section. Nothing could gauge our progress better than playing in the Texas conference.

## Miss Oxyshier Entertains Sans Souci In Snyder Home

Miss Dorothy Oxyshier was the charming hostess to a bridge party honoring members of the Sans Souci club last Saturday afternoon in the home of Mrs. Fred Snyder, 3701 19th street.

At the close of the games, Miss Lucile Moxley was awarded prize for high score and Miss Cornelia McCann received high cut. Later a dainty ice course, strutting the club colors of pink and green, was served.

Miss Mayme Wolforth, Miss Louise Stevens, Mrs. W. E. Cannon, and Mrs. Dick Payne were special guests for the occasion.

Misses Mary and Annie Snyder assisted Miss Oxyshier in the serving and entertaining.

## Capa Y Espada Entertained; Discuss Annual Banquet

Plans for the Cinco de Mayo banquet, given each year by Capa Y Espada were discussed in a meeting of the club Friday night. The Tech Saxophone quartet, composed of Mr. and Mrs. Harry LeMaire and Mr. and Mrs. James J. Thornhill, and directed by Mr. LeMaire, played a number of Spanish and popular songs: "El Sereno," "A Lane in Spain," "Mujer," "Forward Pass," "Adelia," "Blackbottom," "Russian Lullaby," and "Moonlight on the Ganges."

Following the music Mary Louise McNeil spoke on "The Cultural Advantages of Studying Spanish" and Loyd Croslin talked on the "Practical Side of Spanish."

## Sophs Honor Fish With Big Affair; 500 Present

Five hundred freshmen and sophomores were present at the Soph Hodge-Podge which was given at the Uptown Dance Palace Friday evening, February 2.

Long streamers of green and white, freshman colors, were draped around the ballroom. A large green fish with "SOPH" written on it was placed in front of the orchestra platform.

The freshmen, who were guests for the occasion, were greeted by a receiving line of sophomores. The program began at 9:30 o'clock and consisted of a popular song by W. C. Cotton, a tumbling act by ten Tech boys, a duet by R. V. Willis and Red Brooks, and a song by Fred Jordan, Earl Jones, James Lockerage, William Houk and Tedo Hazelwood.

Following the program, Buddy Brothers and J. P. Rhuman gave out favors of hats, whistles, confetti, and blow-outs, and, as soon as the sophomores could get the freshmen rather settled down, a grand march was formed.

Dancing began at 10:30 o'clock, and tables of forty-two and checkers were furnished for those who did not wish to dance. At 11 o'clock the floor was cleared for a clog dance by Fish Wayburn. Music for the occasion was furnished by Frank Stone and his Collegians.

## Sponsor Gives Treasure Hunt

Members of Las Vivasachas were entertained Saturday evening with a treasure hunt given by the club sponsor, Miss Ruth Pirtle. The guests met at the home of Miss Pirtle, 2314 Main street, at 8 o'clock and were given the first clues.

After an exciting race the final clue to the treasure, which was \$8 in nickels and dimes, was found in

the mouth of the cannon on the court house lawn by Melba Mae Tatum, Homer Maxey, Evelyn Rutherford and Cecil Keady. The guests then returned to Miss Pirtle's home where sandwiches and punch were served at 11 o'clock.

Guests were Misses Zella Reigel, Mary Knausaux and Annah Jo Fendleton, Mr. and Mrs. Ray Mowery, Messrs. Lonnie Langston, S. T. Cummings, H. R. Nisley, Ernest Dunkel, Bill Pittman, Homer Maxey, Wayne Castleberry, Gene Adair, Cecil Keady, R. V. Willis, Ed Blackwell, Travis Wallace, Clyde Thompson and members of Las Vivasachas club.

## Sponsor Entertains Las Chaparritas

Members of the Las Chaparritas were entertained by their club sponsor, Mrs. E. H. Griffith, in her home last Thursday afternoon, February 27, at 6 o'clock with a delightful bridge party.

High scores were given to Misses Sylvia Wilson and Virginia Murray, and Miss Jo Ann Estes was awarded low score. Miss Louise St. Claire cut high.

After the game, a salad course of coffee, brown bread, cheese pimented salad, cheese crackers, olives and pickles, was served.

Guests were Misses Mary Lois Gamel, Marjorie Ann Almsworth, Virginia Murray, Beth Wulfman, Clyde Grimsley, Sarah Michie, Sylvia Wilson, Frances Ford, Willette Waters, Inez Hensley, Camille Stoughton, Louise St. Claire, Elizabeth Cornell, Elizabeth Pickett, Bertha Mae Willis, Jo Ann Estes, Gail Quinlan, Vonnie Gikerson, Wilma Parks and Flossie Burkholder.

## Tech Ex-Students Marry Here Monday

Miss Clara Swinney and Ronald C. Tom were married Monday at noon in the St. Joseph's Catholic church with the Rev. G. A. Boeckman reading the ceremony.

Immediately after the ceremony the couple left for Fort Worth and Dallas, where they will spend two weeks.

They will then spend a month in St. Joseph, Missouri. After their return to Lubbock, they will be at home at 1714 9th street.

Mrs. Tom, daughter of Mr. and Mrs. H. J. Swinney of Rule, is a former student of Tech's Tech, and was carnival queen during her freshman year. Mr. Tom, of Stanton, received his bachelor of science degree here last spring.

## To Make Pre-Med Dance Gruesome

Members of the Pre-Med club will give their first annual dance tomorrow night at the Hilton hotel; bids are now on sale in the business office.

The marzantine floor will represent a huge grave yard with epitaphs for some of the students and faculty written on the tomb stones. Refreshments will stress the idea of skull and cross bones.

All doctors of the city and senior nurses of both hospitals are invited as honor guests. Music will be furnished by an orchestra under direction of Even Hall.

## Honors Visitors With Hay-Ride

Honoring his guests, Jack Buckler and James Broderick of Waco, James Whitesides entertained Saturday evening with a hay-ride.

After the ride, wieners, pickles and buns were served at the home

Maurice Chevalier, sometimes known as the world's leading entertainer, is a Frenchman. He fought for his native land in the world war, and the world has fought its way in to theatres to see him in talking movies ever since he joined the ranks of Paramount at Hollywood. He has been called "The Big Happiness Boy From Paris." This is his second picture. His first was "Innocents of Paris," which stood 'em up in the aisles in many cities. In "The Love Parade" the first original talking screen musical romance, he sings four songs. All are original compositions. He speaks with an enchanting French accent throughout the picture. His pronunciation is clear, and each word he enunciates is distinctly heard and understood.

## Colorado Scenes Given in Travelog

"Rambles Through the Rockies" was the subject of the lecture and travelog presented by Eben G. Fine in the chemistry auditorium Tuesday, March 4, when more than a hundred beautifully colored slides were shown.

The scenes included practically all of the Colorado mountain areas: glaciers, streams and the beautiful rugged country for which Colorado is famous.

Mr. Fine, who came to Lubbock through the efforts of the Boulder Chamber of Commerce and the Denver City railroad, related interesting features concerning the photographs.

## Listed in "Who's Who in America"

Seven members of the faculty and administration of Texas Tech are listed in the last issue of the original "Who's Who in America." Two of these persons were omitted in an article dealing with the matter in a recent issue in another publication. The complete list of Tech people honored with this recognition is as follows: Dr. Paul W. Horn, president of the college, Dr. J. M. Gordon, dean of the school of liberal arts, Dr. A. B. Cunningham, member of the English department and author of several novels, Dr. S. S. McKay, member of the history department and also an author, Dr. Leroy T. Patton, head of the department of geology, Miss Elizabeth Howard West, librarian of the college, and Dr. J. C. Gran-

## Freshman Councils Hold Social Meeting

The combined councils of the freshman men and women students held a social meeting at the home of Grace Thompson, secretary of the freshman class, at 2421, 22nd street, Thursday evening. Punch was served to the guests.

## Interest Shown In Studies In Religion Offered In College

That interest is being shown in religion on the campus is evidenced by the fact that a total of 60 students registered during the fall and winter terms for the courses in religion which are offered by Miss Mary DeBardeleben under the auspices of the woman's department of the Methodist church, South. The work done in the classes is under the supervision of the school of liberal arts and is subject to all the regulations which govern other courses.

Regular credit is allowed these courses in the school of liberal arts and Old Testament history is given credit in the department of history. The schedule of courses for next year has met the approval of the dean and will be incorporated in the new catalog which will soon be off the press. The courses which are offered are: Biblical Introduction, Apostolic Age, Life and Teachings of Jesus, Old Testament History and Biblical Literature.

## Visiting Professor Addresses Math Club

Dr. J. W. Calhoun, professor of applied mathematics and comptroller of the University of Texas, addressed the March meeting of the Mathematics club Monday afternoon.

Mr. Calhoun compared the development of a mathematician to the growth of a child. When a person is first introduced to the subject, his teacher or tutor can lead him and tell him all there is to know, just as the parent watches over the small child. Then, as each person begins to branch off into some specialized field, the teacher can guide his pupil only slightly. But, after the person has decided that "the salvation of the world"

is his, head of the departments of history and of philosophy and sociology.

## Harnessing Niagara Falls to the washing machine

Cheaper power! Groping after this modern touchstone to wealth, deluded inventors slaved over perpetual motion machines... informed inventors evolved the turbine... broad visioned men harnessed the rush of waters... engineers raised pressures and temperatures to produce more power without corresponding increases of cost.

While, step by step, this progress has taken place, the many men who have contributed to it could not know what far-reaching results it would have. Now the ultimate boon grows clear. Water power development becomes a national policy, steam bids fair to rival water power for cheapness, economically produced power brings more plentiful goods, lights houses and hauls crowds in cities, is carried to rural sections to lift washday drudgery from farm women's shoulders.

Among the many industrial victories that are behind this revolution, none is more important than wider knowledge of piping materials and better materials. One of the highly prized chapters of our history is the contribution that Crane research and valve engineering has made to the general advance. The results of this research are embodied in a Crane book, *Pioneering in Science*. It is a fascinating story of engineering development and a valuable reference work for engineering students. A request will bring you a copy.

### Registration For Spring Term Will Last Two Days

Monday, Tuesday, March 17 And 18 Are Days Set By Registrar; Plan Similar To That Used Before

Two days will be allowed for registration for the spring term instead of one day only as was previously announced in the college catalogue. According to the plan released by the registrar's office, Monday, March 17, will be the time for registration of sophomores, juniors, seniors, graduate students, and new students. Freshmen and those new students who have not registered on Monday will be cared for Tuesday, March 18. With the exception of this difference, the plan of registration, which is very similar to that used at the beginning of this term, is the same for both groups.

Students have been requested to report in alphabetical order according to the first letter of their family names on the particular day assigned their groups as follows:

- 8-9 o'clock: A-B.
- 9-10 o'clock: C-D.
- 10-11 o'clock: E-F-G.
- 11-12 o'clock: H-I-J-K.
- 1-2 o'clock: L-M.
- 2-3 o'clock: N-O-P-Q-R.
- 3-4 o'clock: S-T-U-V.
- 4-5 o'clock: W-X-Y-Z.

Mr. E. L. Dobson, registrar of the college, requests that all students come at the beginning of the hour assigned them and especially urges that all students whose names begin with A and B come promptly at 8 o'clock. Otherwise congestion at the business office which handles the work for the entire day will result.

Agriculture, engineering, home economics, and liberal arts will go to their respective buildings for registration.

No new students will be permitted to register until they have presented a certificate from the college physician stating that they have taken the physical examination.

### Howe To Speak

(Continued From Page One)

spoke on the application of chemistry to the commodities in which the merchants represented were particularly interested.

#### New Development

Speaking before a faculty group, which was held under the auspices of the Faculty club and the Science club, in the chemistry auditorium last night, Dr. Howe discussed the advances which chemistry and science had made and the new developments in chemistry.

Dr. Howe will leave today for Norman, Oklahoma, where he will address students and faculty members of Oklahoma university.

### Bantel Compliments Tech On Facilities And On Opportunity For Rapid Growth

#### Studhalter Talks

(Continued From Page One)

Mr. Studhalter, head of the department of biology in the college, was re-elected president of the society. Other officers elected are as follows: Dr. W. C. Holden, first vice-president; Dr. Ophelia Wesley, second vice-president; Miss Vivian Johnson, third vice-president; D. E. L. Reed, fourth vice-president; Dr. M. A. Stainbrook, curator; Mr. H. B. Carroll, assistant curator; Mrs. Mary Dale Buckner, secretary; and Dr. P. A. Kleinschmidt, treasurer.

Mr. R. A. Studhalter, head of the department of biology in the college, was re-elected president of the society. Other officers elected are as follows: Dr. W. C. Holden, first vice-president; Dr. Ophelia Wesley, second vice-president; Miss Vivian Johnson, third vice-president; D. E. L. Reed, fourth vice-president; Dr. M. A. Stainbrook, curator; Mr. H. B. J. Smith of the West Texas Historical and Scientific society at Alpine in which cooperation with other collecting agencies in this part of the country was stressed.

#### Next Meeting

The next meeting of the Plains Museum society will be held in January or February of next year. The program committee has recommended that the papers at the meeting be of a technical nature. A luncheon for out-of-town guests, and possibly for local persons, will be held in connection with the program.

Mr. R. A. Studhalter, head of the department of biology in the college, was re-elected president of the society. Other officers elected are as follows: Dr. W. C. Holden, first vice-president; Dr. Ophelia Wesley, second vice-president; Miss Vivian Johnson, third vice-president; D. E. L. Reed, fourth vice-president; Dr. M. A. Stainbrook, curator; Mr. H. B. Carroll, assistant curator; Mrs. Mary Dale Buckner, secretary; and Dr. P. A. Kleinschmidt, treasurer.

Margaret Garland underwent a sinus and tonsillectomy operation in the Lubbock sanitarium Saturday.

The Wranglers met last night in the club rooms of the Bosque apartments and arranged for the election of new officers.

"The first thing that struck me about Tech when I came on the campus was the enthusiastic spirit of both the students and the faculty members," stated E. S. H. Bantel, assistant dean of the University of Texas Engineering school, in an interview granted to a representative of the Toreador. "I consider that students who come here have a wonderful opportunity during this period of newness and growth. There is an old saying to the effect that 'A new broom sweeps clean'; students are able to get up-to-date instruction here, because the instructors as well as the institution are young, speaking generally. Young instructors are fired by enthusiasm, and consequently have an advantage over older teachers from that standpoint. With age enthusiasm wanes."

"I saw the start of Tech, and I have been impressed by the great development on the campus since then. I consider that the members of the faculty of the Engineering school should be especially gratified at the great growth. An interesting comparison with the history of the University of Texas may be made at this point; when I first came to the university in 1901 there were fewer than a hundred students enrolled in the school of Engineering, which at that time consisted of the department of Civil Engineering. I particularly remember that a banquet of celebration was held when the hundredth student enrolled in the school. Tech already has almost as many students in its Engineering school as the University, which had over 700 last year."

"Graduates of the Tech Engineering school should be able to take their places on equal rank beside graduates of other institutions. You have excellent buildings and fine equipment here. I sincerely hope that Tech will get the funds needed for expansion to provide for the students who will come in the future, keeping up the rapid pace at which the increase has been going on."

"I have known a number of the Tech faculty before, and consequently I have found the atmosphere of the campus very home-like and familiar. Those that I knew include Dean Miller, Mr. McRee, Michie, W. T. Reid, Farris, Shelton, and Helwig. I was in the same office with McRee for about a year at the University."

"The patron saints of the Engineering and Law schools of the University should be of particular interest to the students here. The engineers call their patron saint saint Alexander Frederick, Claire, or more familiarly, 'Alex'. The original statue was taken from in front of a beer garden in 1908 by a group of students, and was meant to represent the mythological character of King Gambrinus. The engineers and lawyers frequently attempt to steal each others' patron saints. The lawyers call their Peregrius, representing a mythical animal."

Margaret Short of Amarillo was the week-end guest of Elizabeth Tolk.

### Haymes And Dison Speak To Society

Speeches by Terrell Haymes and Everett Dison featured the meeting of the Tech branch of the American Institute of Electrical Engineers in the Engineering Auditorium last week. "The Life of Lamme" was the subject of the talk by Mr. Haymes; it was a review of the life of a great Westinghouse man who died in 1924. Everett Dison spoke on "Power by the City of Lubbock"; he showed a number of blueprints of the old and new plants here and told of plans for future expansion. He also explained various details of operation of the plants.

A two-real motion picture on the theme of transformers, with special attention being paid to their construction, was shown at this time. The films were furnished by the General Electric company.

### Engineers Win

(Continued From Page One)

first down and then putting it on across. The Aggie forward held stubbornly, and it took six downs for the north campus boys to register. Cousineau was the man who finally plunged through to score. Again a pass was missed for an extra point.

Two penalties of twenty yards each almost cost the engineers the game in the last quarter, when the ball was brought back to their two-yard line. Maddox, however, carried the ball out of the danger zone, and the game ended 30 the Aggies battling valiantly for the trophy.

In regaining the championship which was lost to the Liberal Artists last year, the Engineers failed to show the punch that they did in their game with the AR on the preceding Monday. The Aggies deserve much credit for holding the champs to the low score of 12 to 6. They confronted the Engineers with a smooth-working offense and a fighting defense. Jack Dalton, Aggie back, was a threat as a pass receiver, and he backed the line equally well.

The final game leaves the three representative clubs with the following standing:

Engineers	1000
Liberal Arts	500
Aggies	000

Mildred Bagley is recuperating in the Lubbock sanitarium from an appendicitis operation performed Friday.

Jake Schober, former pep leader and student of the college from Fort Worth, visited with friends on the campus Saturday.

Hill Garrison will talk on "Gas Power Engineering" and J. R. Renfro will speak on "The Mechanical Equivalent of Heat."

### Sock And Buskin Club Will Present "The Great Divide," Classic Drama; Has Talented And Experienced Cast

The Sock and Buskin club will give its first public dramatic performance of the year tomorrow night at the high school auditorium when a large and carefully selected cast will be presented in William

and other dramatic organizations on the campus. Miss Ruth Birtle, head of the speech department, is directing the play. The sets are being constructed and arranged by members of the club and by stage-craft classes. Clever outdoor desert scenes and mountain cabin interiors are among the sets.

Louise Stevens of College Inn has as her guest her mother, Mrs. Jack Stevens of Quanah.

### Miss Graves Has Mrs. Lacy's Part

Mrs. Dorothy Lacy, who was to have taken the part of Ruth Jordan, the leading lady in "The Great Divide," was taken sick with scarlet fever early this week. Her part in the play is being taken by Miss Eileen Graves, a member of the Sock and Buskin club who has had considerable experience in dramatic work.

Vaughn Moody's "The Great Divide." This drama is classic among plays by American writers and is studied in college English courses. The plot is an interesting story of Western romance.

The character personnel of "The Great Divide" is made up of some of the most talented and experienced actors of which the college boasts. Mrs. Dorothy Lacy, who is cast in the leading role, has done dramatic work in the Little Theatres of Amarillo and in the University of Colorado before coming to Tech. Orville Burroughs, who is in the leading male role, has had previous experience in dramatics both in Tech and at West Point, where he was cast in several Major productions. R. V. Willis, another of the principal characters of the play, won a scholarship last year as the best actor in a regional one-act play tournament. Kate Pressley has been prominent in college dramatics for four years, having won a scholarship for interpretive reading last year; she plays the part of the mother in "The Great Divide." Without exception the other members of the cast have been active in the Sock and Buskin club

Laundry service is the one thing that has changed from a luxury to an absolute necessity in the last decade. Especially is this true in college life. How many think of washing and ironing our own clothes but in past days just this sort of thing prevailed on college campuses.

That fresh feeling of a clean shirt, ironed so that it fits you even better than it did the day you bought it, is brought to life when you send your clothes to be washed and ironed by experts... We are experts.
