Tech Mecca For Graduate Students of Southwest

Murray Folks Organize For His Support

Last week a small group of Murray enthusiasts met to organize a Murray For President Club. The official name adopted is "The Will Rogers Chapter of the National Murray for President Club." The powers of the group were invested in an executive committee. This committee in turn was instructed to draw up petitions for circulation in behalf of "Alfalfa Billie" candidacy. These petitions have met with a ready response. Literally hundreds of signatures have been given at the time of this writing. Those circulating the petitions indicate that many are open in their praise of the resolute character of the Oklahoma governor. It is a real tribute to America's greatest rope thrower, feature writer, and representative commoner that the local organization should designate their club by his name, says one of the members. Another expressed the hope that the picturesque "Bill" would call upon the famous "Will" to serve as secretary of state.

1932 Coaching School Assured

According to Pete Cawthon next year's coaching school will be bigger and better than ever. Based on this year's experience the group will meet earlier in the summer, the dates being July 15 to 27. Cards are to be passed out to coaches attending this year (1931) seeking their opinions on possible conditions for next year. All 1931 all-American football stars will be invited and urged to attend next summer.

U. OF T. HEAD COACH PRAISES COACHING SCHOOL

The genial Clyde Littlefield has only words of praise for the excellent two weeks work accomplished here this summer. He says he has attended many coaching schools and always receives real benefits from them. The type of instruction given here should prove invaluable in every way to the coaches attending this school.

SENIORS AND GRADUATES REQUESTED TO REGISTER WITH ALUMNI SECRETARY

Miss Mamie Wolfarth, secretary of the Texas Tech Alumni Association, has requested that all Seniors in school this summer register their name and address with her. This request is also made to graduate students taking their degree from Tech this summer. Information cards have been worked out and will enable the association to keep in touch with the students from year to year. These cards may be secured by calling at the office of Government Department, Room 304.

The Alumni Association is doing a commendable work in building up an organized spirit for Texas Tech. The success of the organization is ultimately to depend upon the interest of the students who go out from the college, and the extent to which they cooperate in the effort to maintain a definite contact between the college and its graduates will help to determine the status to be attained by this institution in the various fields of college activity.

All students who have not supplied the desired information should do so as soon as possible, in order that they may keep informed on the program of activities for next year.

DR. JACKSON ACTIVE IN AFFAIRS OF COLLEGE AND COMMUNITY

One of the most active men, and it is safe to say one of the most popular men on the campus of Texas Technological College is Dr. W. A. Jackson. In addition to his services as head of the department

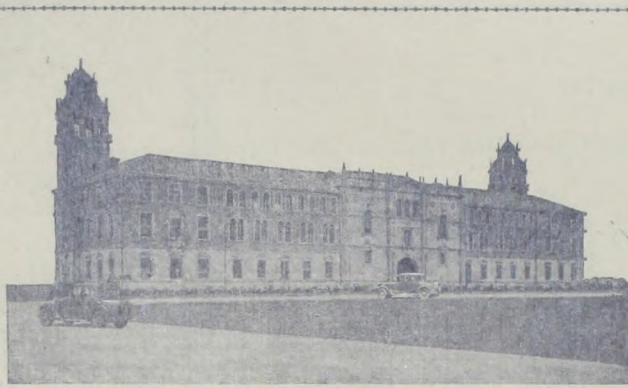

of government he lends himself to a variety of college activities. During the past session he was sponsor of the senior class, and under his able direction the class of 1931 rose to a place as one of the most active that Tech has yet produced. He is a member of the athletic council and has at all times displayed an unflinching interest and an unsurpassed loyalty to Tech athletics.

A further activity directly connected with the college is that of a position on the graduate committee—a group to which much credit must be given for the rapid increase in prestige that has been realized by the graduate school of Texas Tech. He is also a member of the faculty committee in charge of extension work.

In addition to his work directly connected with the interests of Tech students his work with the administration cannot be overlooked. He is a member of the finance committee, and to those familiar with the problems of Texas Technological College from the financial standpoint there is little need of pointing out the difficulties of such a position.

His field of activity carries him outside the college into the affairs of the community—a fact that is important in that such a part helps to bring about a closer relationship between the college and the community, and tends to insure a greater degree the success of both. He is a member of the Rotary Club, and the extent of his interest and activity may be shown by the fact that he served as president of that organization during last year. He also represented his club at the Rotary International Convention held in Chicago last summer. He was elected a delegate to the State Democratic Convention, and attended the National Nominating Convention in Houston, in 1928. He is also an active member of the West Texas Chamber of Commerce. Dr. Jackson always finds time to be sincerely human. His interest is not continually bound up in the narrow field of some particular study, but he takes a broad-minded view of any subject under discussion. And he likes to forget the problems of the day occasionally and enjoy a good round of golf. His personality is perhaps brought out more vividly in his every-day contacts with individuals than in any other way. Whether the matter under discussion be dealing with the problems of world scope, or with the activities of Bill Jackson, Jr., (and we are inclined to think that the latter would take precedence over the former in the mind of Dr. Jackson) one cannot help feeling that one is talking to a friend who is simply a man in the way that all try to be men.

The extent of his popularity with the student body of Texas Tech from year to year may be illustrated by the fact that the 1930 La Ventana, the College Yearbook, was dedicated to him. The wording of this dedication was as follows: "To Dr. W. A. Jackson we dedicate this book in recognition of the many ways in which he has served Tech, and in administration of a superior ability and a human understanding that has made possible his sympathetic administration of truth and won for him in the hearts of the student body a place as the ideal teacher."

O COLLEGE MOTHER, BEAUTIFUL

(College Hymn of Texas Technological College sung to music of "America the Beautiful.")

1

Oh College Mother, Beautiful,
Our hearts go out to thee.
We raise our voices in a prayer
For thy prosperity
O College Mother, Beautiful,
Long be thy life and blest,
May God crown all thy nights and days.
With love and joy and rest.

2

O College Mother, Beautiful,
Thy skies are vaulted blue
Call all thy sons and daughters all
Forever to be true.
True to the state they love so well.
The land that gave them birth;
True to their glorious heritage,
The fairest land on earth!

3

O College Mother, Beautiful,
Thy arches and thy towers
Thy halls and roofs and corridors
Forevermore are ours.
We love thy fields of cotton white,
Thy grasses and thy terraces,
Thy canyons and thy terraces,
Thy fertile upland plains.

4

O College Mother, Beautiful,
We love thy words of truth,
Deep graven in thy brick and stone
To guide the ways of youth.
Long may thy fingers point the way
That earnest youth should tread.
And may the blessings of the free
Be ever on thy head.

Tech Summer Graduate School One Of Largest In Southwest

Graduate Sponsor Popular Professor Experienced Man

A Texan by adoption and preference, an Alabamian by birth, the subject of this sketch has risen to the position of one of our foremost Texas educators.

He was born "somewhere in Alabama." The log house in which he "discovered America" was on the line between Clay and Cleburne counties. His parents neglected to record which county the room in which he was born was located; hence the difficulty.

His school career began in the hills of North Alabama. After the "log school" house days he entered a private institution called Ashland College, later entering and graduating from Oxford College, near Birmingham.

Dr. Evans received his M. A. and Ph. D. degrees from the University of Texas.

In early life Dr. Evans spent some time in the office of the probate judge of Clay county, Alabama, as chief clerk, getting a taste of public life which has since been fascinating to him.

His first teaching was as an instructor in Greek.

The family having moved to Texas, Dr. Evans followed a few months later. His first work in Texas was as teacher in the public school at Fairfield, Texas, at the remunerative salary of thirty dollars per month. The following summer he attended a normal at Navasota, Texas, where he became interested in the profession, and decided to make it his life work. Later he conducted six-ten summer normals in cities as widely located as Brownwood, Dublin, Alpine, Kerrville, and Cotulla, during the time these institutions served the teaching interests of the state.

He is continuing his work of training teachers in his present position as head of the Department of Education in the Texas Technological College. However, he does not confine his work in education to the field of mere teacher training, but with his corps of helpers is attempting to enlarge its scope to include the technological phase of the term as applied to modern education.

Dr. Evans' career as an educator has extended through a period of

(Continued on Page 4.)

Faculty Members Take Leave

W. A. Whatley, Fred Sparks, Dr. Alan L. Strout, and Miss Bonnie K. Dysart leave the campus at the end of the summer term to follow higher study in their respective fields. Mr. Whatley goes to the University of Pennsylvania to work toward a Ph. D. in Spanish. He received the Harrison Fellowship Award as a result of competitive examination. Mr. Sparks is getting ready to stand his examination for Ph. D. at Chicago University. Dr. Strout goes to Oxford to study with the famous Garrot in the field of English Literature dominated by Wordsworth. Miss Dysart has accepted a fellowship at Chicago University. She is working toward her Ph. D. in the field of Educational Psychology.

That Tech officials were reluctant in offering graduate work is a matter of record. However, the pressure of insistent demand caused the organization of the Graduate Division in September, 1927. Since that time this feature of Tech's service to the citizens of Texas has become one of the most popular.

The 170 enrolled in the graduate school are representative of the best professional school men and women in Texas. A reading of the list convinces one of this fact.

The following is a list of the graduates, showing the major, minor and those receiving their Master's Degree this summer.

- Jack Adair, Sociology, Philosophy and History.
- Martin Luther Harrell Baze, Education, Government.
- Vada Laurene Bussey, Mathematics, Latin.
- Ruth Forbes Cook, English, English and Speech.
- Jane Mast Cox, English.
- James Hollie Cross, Mathematics, Physics.
- Wilson Harold Gordon, Government, History.
- Willie Mae Hawthorne, English, History.
- Zelma Jo Hestand, English.
- Thomas Hobson McDonald, Education, Economics.
- J. Arnold McLendon, Education.
- W. M. Pevehouse, Education, English.
- Katherine Holbrook Ramsey, Education, English.
- Charles Marvin Rogers, Education, Psychology.
- Houston Bailey Self, History.
- Bruce Clarence Shulkey, Education, History.
- Oscar Clarence Southall, Education, History.
- Joseph Arthur Summerhill, Education, English.
- Charles A. Wallace, Education.
- James Franklin Ward, History, Government.
- Grace Watkins, English, History.
- Marcus E. Witt, Education, History.
- Walter Oliver Workman, Education, English.
- Candidate for Master of Science Degree in architecture, Taylor White.

Teachers Invited To State Meeting

Superintendent McIntosh, of the Amarillo schools, calls special attention to the State Teachers Association Convention to be held in Amarillo beginning November 26. All the facilities of the city will be placed at the disposal of the teachers organizations. Mayor Ernest Thompson of Amarillo, adds his earnest welcome to the teachers of the entire state of Texas. It is his desire that all the visitors shall enjoy themselves to the utmost. Certainly no West Texas teacher should miss this meeting.

GRADUATES TO MEET NEXT TUESDAY 8 P. M.

All graduate students are urged to be present next Tuesday evening on the south lawn at eight o'clock. Bruce Shulkey, president of the class, has some important announcements to make. Entertainment features will be added to the regular order of business.

PROUD OF GRADUATE GROUP

President Horn expresses the greatest pride and pleasure in the graduate group. Their fine spirit and the excellent quality of the work they are doing, he says, is a credit both to themselves and to Tech. May each of them enjoy success and satisfaction in his life's duties is the sincere wish of our president.

Schedule For Examination

Second term of Summer School	1:30-4:00. All classes meeting at 12:00 o'clock.	Notes
Monday, August 24	8:30-11:00. All classes meeting at 11:00 o'clock.	1. Any classes not herewith scheduled may make their own arrangements with their instructor provided all examinations are held during the days of examinations.
Tuesday, August 25	8:30-11:00. All classes meeting at 8:00 o'clock.	2. All persons expecting to be graduated at the close of the term will take the examinations regularly scheduled for Monday and Tuesday. Those having classes at 7:00 or 12:00 will make arrangements with their instructors to hold special examinations in these subjects on Monday and Tuesday.
Wednesday, August 26	8:30-11:00. All classes meeting at 7:00 o'clock.	3. Teachers are earnestly urged TO GRADE THE PAPERS OF PEOPLE WHO ARE CANDIDATES FOR DEGREES AT THIS CONVOCATION. A list of candidates is herewith attached. Grades of degree candidates should be handed in to the Registrar as rapidly as they are made up and SUCH GRADES MUST BE TURNED IN NOT LATER THAN 7:00 P. M. ON TUESDAY.

FRATERNITY AND EQUALITY

These catch words of the French Revolution have a real and vital meaning on the great plains of West Texas. No other institution typifies this western spirit to a greater degree than does Tech. You will find no arbitrary class distinction here, no superficial superiority of individual caste. One coming here with honorable motives, with a desire only to be a man or woman among equals is accepted at face value as such. The manifest spirit of comradeship is infectious. The student instructor relationship is most wholesome. To those of us who have been attending schools of a different nature, where class distinction is fostered, where to be in the running one must belong to that hand picked group of campus elite, it is refreshing to be a part of such an institution as we have here. It revives our wilted souls to breathe such a clean social atmosphere.

The magnificent success of the coaching school is another tribute to the vision, energy and determination a man with an ideal working in an institution with a consciousness of service.

It is almost axiomatic that society seldom if ever pays the agitator or nonconformist well, either socially or economically. Thomas Paine died a forsaken and embittered man. An apostle of Liberty to both America and France whose verities pen fanned the flame of wearied enthusiasm in our dark hour of revolutionary reverses, he was hunted in England, imprisoned in France, ostracized in America. Some how he did not have the faculty of adapting himself to the duly constituted authority which his own efforts had brought into being. Individuals of this type have a place in the world, we need them. True it is that we cannot agree with their views though we are influenced by them. Somehow they are irritating to the average man and ultimately this irritation leads to their downfall. If you think human nature has changed any in the last hundred and fifty years with regard to this matter read the life story of Leon Trotsky, Kerensky, or Debs.

The Editor and Manager of this issue wish to thank each individual who helped in making this Graduation Edition possible.

DR. EVANS TO IMPROVE SCHOOL AT ALBANY

Dr. A. W. Evans, of the Texas Technological College, will make a survey of the school system at Albany, Texas, this fall, and offer recommendations for improvement of same. Dr. Evans was invited to do this by the school authorities of Albany, and will begin his work early in the fall, and make a thorough study of the school system there and the needs of the school.

J. B. Harwell, teacher and coach in the Dexter, New Mexico, High School, was seen attending the coaching school this week. He is planning on doing graduate work in Tech next summer.

Law Sone, superintendent of the Panhandle schools, and Lewis Hill, superintendent at Follett, and some other members of the Buffalo Herd were seen grazing around Tech last week.

INITIATE PROGRAM

A sizeable gathering of superintendents and principals enjoyed two hours of fellowship and entertainment on the south lawn Wednesday evening.

The purposes of the meeting were explained by Mr. Dowell. The principle object discussed was the organization of a permanent association of superintendents and principals, and other Tech exes. Dean Gordon, Dean Leidigh, President Horn, Dr. Evans and Mr. McDonald were present. Dr. Horn expressed his hearty approval of such an organization. Words of encouragement and helpful suggestions were given by Dr. Evans and Dean Gordon. Talks were made by Mr. Shulky, Mr. Melton, Mr. McIntosh, and Mr. Smith. Each

indicated his approval of the idea and the fine objectives toward which the group might work.

An executive committee was elected to perfect an organization consisting of the following men: G. S. Dowell, executive secretary; S. G. West, C. M. Rogers, D. T. Smith, U. S. Holland, T. M. White, Mr. Summerhill, H. P. Clemons, W. A. McIntosh, J. E. Speer, Bruce Shulkey. Dr. A. W. Evans was elected faculty advisor to the organization.

The most enjoyable feature of the evening was the beautiful violin rendition of Kriesler's Liebesfreud by Miss Margaret Halsell. She was accompanied at the piano by Miss Florence Anderson. Prof. Waghorn led the boys in some familiar tunes. Perhaps no bit of informa-

tion proved of greater interest than the summer school total enrollment. According to Dean Gordon's statement Tech enrolled 1553 this summer.

Sorrow and silence are strong, and patient endurance is Godlike—Longfellow.

Mrs. Helen Burke Newcomer and the Misses Sarah Lee, Virginia, and Mary Burke were visitors on the campus Friday morning. They are returning from their summer's work at Oklahoma University and Oklahoma A. & M. The editor confesses a great pleasure in having them here.

There is nothing high hat about Miss Alta Mae Hill even though altitude is twice indicated in her name.

Jo Brown of Hobbs, N. M., was a visitor at Tech last week. Miss Collie will resume her customary smile now.

Duke Athletic Coach Praises Tech Democracy

Wallace Wade, who for one week held sway at Texas Tech coaching school, departed last Sunday for Durham, North Carolina, where he will resume his duties as head football coach of Duke University.

Before his departure from Lubbock Wade made the following statement:

"I have enjoyed my stay at Texas Tech. I've been treated royally. Tech is one of the finest schools of the Southwest and next fall, according to the material I worked with, should be represented by a splendid football team.

"The Tech coaching staff organized the school thoroughly and the student coaches attending my lectures were serious and sincere about the work."

Wade was followed by Jimmy Phelan, University of Washington mentor, in the instruction of football play at the school.

Dr. McKay Brings Further Honor To The Texas Tech

D. Seth Shepherd McKay's article on "Texas and the Southern Pacific Railroad, 1848-1860," recently appeared in the July issue of the Southwestern Historical Quarterly as the feature article.

His discussion starts by taking up the early legislative acts relating to railroad construction in Texas. The main division of the story, however, is devoted to the beginning of the Southern Pacific lines.

Dr. McKay came to the Tech history department in 1929, from South Carolina, however he is a native Texan, having been born and reared in Bell county. He is thoroughly acquainted with Texas history can be clearly seen from his treatment of Texas railroads. He is the author of several books and pamphlets on Texas history, all of which have received wide recognition. Notable among his books is the "Debates in the Texas Constitutional Convention of 1875," which was recently released from the University Press, and which bears the name of Texas Technological College as well as the author.

These articles, besides being a credit to the author, are something for which the college can be justly proud, for it adds to the ever increasing fame and reputation of Texas Tech.

Prominent Authority Lectures Here

Dr. Herbert J. Stack, the outstanding safety authority in America, was a visitor on the campus Monday and Tuesday. His lectures on "Teaching the Rules of Safety and Good Health" proved a source of inspiration to those fortunate enough to be in the classes which he addressed. Dr. Stack pointed out the uselessness to the individual of all the academic training which he may have if the individual is dead. This being true it is the duty of the school and its teachers to emphasize in each of the regular courses those elements that are conducive to health and safety. That this is the natural method productive of most real benefit to the child and to the community was amply illustrated by the speaker. A Guide Book for Safety Education may be obtained by writing the National Bureau of Casualty and Surety Underwriters, New York.

The delightful informality of the ten o'clock society (after Ben Johnson) has been flavored by the actual presence of Wisdom.

The South Plains Teachers Institute

The South Plains Teachers Institute will convene at Texas Technological College on September 7, 8, 9, 1931.

The institute will be under the direction of Dr. P. W. Horn, who will be ably assisted by Dr. A. W. Evans. There will be eighteen counties and twenty-five independent districts represented at the meeting.

Dr. Shelton Phelps, professor of education and dean of graduate school of George Peabody College for teachers and Dr. S. P. Nanninga, dean of the school of education, University of New Mexico, will each lecture in the general session. Dr. A. L. Crabb, professor of education, Peabody College, will lecture to the intermediate section. Dr. L. M. Jenkins, adjunct professor of educational psychology, University of Texas, director of kindergarten primary section A. Mrs. J. T. Shaver, primary supervisor of the public schools, director of upper primary section B. C. L. Davis, supervisor of agriculture, state department of education, director of vocational agriculture, state department of education, director of vocational agriculture. J. B. Rutland, assistant supervisor of agriculture, state department of education. E. R. Alexander, professor of agricultural education, Texas A. and M. College and J. C. Dykes, associate professor of agricultural education, Texas A. and M. College will each lecture in vocational agriculture.

Local professors having part on the program are:

W. P. Clements, assembly singing and assistant in intermediate section; M. H. Duncan, Parent-Teachers Association; R. E. Garland, director of high school section; Cecil Horn, chairman of committee on homes, and M. E. Witt, secretary-treasurer.

In addition to the above there will be presented during the institute a representative of the state Teachers Association, of the administrative division of the state department of education and of the Interscholastic League.

Enrollment will be at the business office, Administration building, Monday, September 7, at 7:30 A. M.

The housewife was questioning the cook with a view to taking her into her employment.

"Why did you leave your last place," she asked.

"The master and mistress were always rowing," she replied.

"But surely that was nothing to do with you," said the housewife.

"And anyway, what were the rows about?"

"Mostly the way the meals were cooked," came the other's reply.

GOVERNMENT DEPARTMENT OFFERS DEFINITE SERVICE

In an effort to improve the type of citizenship of the state and to promote a more intelligent participation on the part of the citizens in the affairs of the state, Texas recently passed a law requiring all graduates of any state supported institution to have had a course dealing with the government and constitution of the United States and of Texas. With a view toward carrying this same idea into the public education of the state a similar requirement was made for graduation from high school. To insure adequate preparation of teachers for this work a law was passed requiring all teachers to have had a course in the study of the government and constitution of the United States and of Texas. The Department of Government of Texas Technological College has outlined a course of study fulfilling these requirements in a way designed to meet the needs of various types of students.

Government 131-2-3 deals with both national and state government, the first two terms being devoted to the study of the national government with particular emphasis on Texas government. This course is open to freshmen and sophomores. For juniors and seniors who have not had government 131-2-3 a two-term course is provided to meet the state requirement; this course is government 331-2. As a means of providing a course convenient to teachers government 230 has been outlined; this course is a concise survey of the whole subject of national and of state government. Both government 131-2-3 and government 331-2 may be counted toward the fulfillment of the social science required for graduation, but government 230 may not be counted in this way. The extent to which this latter course is meeting the needs of the teachers in service is shown by its popularity as a correspondence course.

In addition to these courses for undergraduates, the department offers ample opportunity for advanced study in the field of government. Many are taking major graduate work, while still others are using government as a minor in the graduate school. The department has at all times displayed an interest in the work of the graduate students, and the expansion of the graduate school is an ideal to which it is constantly striving.

The department maintains a corps of instructors who are well trained in their field, and who have displayed an interest in the welfare of the student that is encouraging toward a more intimate relationship between student and teacher. They are willing at all times to confer with students on their individual problems and make suggestions as to the course of action best suited to the solution of these problems.

LAUGHS

Chlorinda—So there was some hot necking at your house last night?
Emeralda—Yeah. Uncle George got too near the gas jet with his celluloid collar!

Lawyer—(taunting witness) Have you ever been in jail?
Witness—Yes, sir. Once.

Lawyer—Ah! For how long?
Witness—Just long enough to whitewash a cell which was to be occupied by a lawyer who had robbed dozens of his clients.

Movie Director—We want an audience for the opera scene.
Casting director—Any particular types?
Movie Director—No, just anybody who can cough.

Two pickpockets had been trailing an old man whom they knew had a large roll of bills with him. Suddenly the old man turned into a lawyer's office.

"What'll we do now?" asked Sneaky Sam.
"Wait till the lawyer comes out," replied Slippery Slick.

The Pathfinder.

Mose—What yo-all doin' wid dat dictionary, findin' some big words to another speech at de lodge?
Sambo—No, Ah's jes' translatin' de spech Ah made las' night.

"I've pondering over a very singular thing."

"What is it?"

"How puttin' a ring on a woman's third finger should place you under that woman's thumb."

—Brooklyn Eagle.

She wanted to be in the beauty chorus, so she wrote an application, inclosed her photograph, and was asked to come for an interview. Imagine her surprise when she was told by the manager that she was too late.

"Is that position filled, then?" she asked.

"No," replied the manager. I meant that you should have come when you had the photograph taken."

—Stray Stories.

Stern Parent—Willie, I would like to go through one whole day without scolding or punishing you.

Willie—Well, mother, you have my consent.

—Brookton Enterprise.

Gale Crasher (at party)—These big parties are a joke. I have not been invited but nobody noticed it. Stranger—I have not been invited either.

Gale Crasher—Really? How did you get in?
Stranger—I am the host.

—Faun, Vienna.

Father—Where in the world shall I hide Tommy's birthday present?
Bother—In the bathroom.

—Stray Stories.

Toreador Reporter: "I've got a perfect news story."
Your Editor—"Did the man bite the dog?"

Toreador Reporter: Naw,—the bull threw Fender."

Enjoy the present day, trusting very little to the morrow.—Horace.

A bad neighbor is as great an evil as a good neighbor is an advantage.—Herod.

The laws of conscience which we say are born of nature are born of custom.—Montaigne.

Nature does not bestow virtue; we are born indeed for it but without it.—Cicero.

Cheerfulness is the principal ingredient in the composition of health.—Murphy.

The best way to keep your friends is to never owe them anything and never lend them anything.—De Kock.

CHURCH OF THE NAZARENE
Avenue Q and 14th Street
R. M. Hocker, Pastor
Sunday school at 9:45 a. m., F. A. Cook, superintendent. Morning worship 11 o'clock. The N. Y. P. S. 6:30 p. m., C. E. McCuary, president. Evening service at 8:00 o'clock.

10:45 a. m., Morning service, preaching by the pastor.

6:45 p. m., Young People's meeting.

Prayer meeting every Wednesday night beginning at 7:30 o'clock.

Dean Gordon Calls Attention To Techs Rating

The Texas Technological College holds membership in the Association of Texas Colleges, the Association of Colleges and Secondary Schools of the Southern States, and the Association of American Colleges. Likewise, it has membership in the National University Extension Association. The University of Texas is the only other Texas institution having membership in this association.

George Heath, superintendent at Friona, says the Coffee Drinkers' Club should add the great American pastime to its activities: I. e., the election of a long list of officers.

CHURCH OF CHRIST

Corner Broadway and Avenue N
John T. Smith, Minister
9:30 a. m., Bible school, Raleigh Martin and Paul Sherrod, superintending.

10:45 a. m., Morning service, preaching by the pastor.

6:45 p. m., Young People's meeting.

Prayer meeting every Wednesday night beginning at 7:30 o'clock.

NOTICE TO STUDENTS!

11th August, 1931.
Those students, who are doing work in summer school for the expiring this August, should apply at the registrar's office for a form to be filled out. The forms are now ready and should be filled out before August 25th.

Signed: E. L. DOHNEY,
Registrar.

STUDENT RECORD BOOKS

11th August, 1931.

All students in summer school who have not returned record books to the registrar's office, should do so immediately.

Signed: E. L. DOHNEY,
Registrar.

The superintendent of a large Panhandle school system observes that college courtships are highly successful. Few divorces result from such marriages. He says that these young people have a program which prevents them hurrying into marital relations. They come to really know and understand each other. As Old Tack would say, "It's so, folks, it's so."

Extension Work Accredited

The editor of the Graduate number of the Toreador asked the director of the Tech Extension Department what service would be available for graduate students, who will be going about their regular occupations during the coming school year, and was advised that advanced courses in many subjects with resident credit, will be available in convenient centers where a sufficient number of advanced students, graduate and undergraduate, request the organization of an extension class.

Extension classes of this type in six centers, the nearest Lubbock and the farthest Amarillo, making available work in sixteen advanced subjects, were conducted during the past long session.

One of the three terms of residence study required for the M. A. degree may be satisfied by work through extension classes. Additional courses of this type may be completed so that the graduate student may devote the major part of the two remaining terms to research work in the college library, on his thesis.

From the standpoint of economy of time and cost, extension courses carried to the students by the college have proven most profitable investments for students. The fee for a term's work in a subject carrying three term hours credit is ten dollars.

From the standpoint of bringing students to the college to continue their work in residence extension courses have proven most profitable for the college. The following letter is in point:

June 24, 1931.
Mr. J. F. McDonald, Director,
Department of Extension,
Texas Technological College,
Lubbock, Texas.

Dear Mr. McDonald:
Complying with your request this morning, I am glad to give you some information with reference to the number of graduate students who are attending Texas Technological College this summer as a result of extension courses given in Amarillo.

There are about twenty-seven or twenty-eight graduate students from the Amarillo Public Schools, registered in the summer school this summer. I have talked to several of these people, and all of them join me in the opinion that the majority of them, probably about twenty, are in school here as a direct result of the extension courses that were given in Amarillo by Dr. Evans.

During the school session 1930, 1931, Dr. Evans taught two extension courses in Amarillo. There were forty-five enrolled in the fall class, and sixty-seven in the winter class. Nearly all of these people were doing graduate work. Had it not been for this service offered by the Texas Technological College these people would not have had this opportunity. Many of our teachers would not have undertaken graduate work if they had not had this opportunity.

Please let me take this opportunity to thank you and the college for the very fine service that has been rendered to our teachers in Amarillo through the extension work.

Sincerely yours,
C. M. ROGERS, Supervisor,
Amarillo High Schools.
Superintendents or principals or teachers, graduate and undergraduate, who desire extension courses for the coming school year should feel out the need of this service for their respective committees and request the establishment of extension centers.

R. S. White of Amarillo, is the best local representative of Pennsylvania.

Authorities are considering ways and means to prevent the obliging superintendent from the Amarillo schools from running open competition to the bus lines. Mr. McIntosh when questioned said that there is a real advantage in loading the car since it makes it ride easier. What?

Rumor has it that Dr. A. B. Cunningham is including a trip to Canada on his summer's itinerary. Now, Doctor, do be careful.

Work being done here by Mrs. Margaret Monahan, M. A., Columbia in Philology, has been approved for application toward her Ph. D. degree by the University of Pennsylvania.

The editor offers three cheers for the University of Penn.

WISE CRAUNTS BY A "TECH-NITION"

RAMSEY RETURNS

Ole Ramsey has returned from a visit to the United States—that is, those places he calls the good ole United States. The fact of the matter is that he only went to Pennsylvania.

ABRAHAM AMBITIOUS

"Oofie" Abraham has returned in splendid condition for the coming football season. The tiny tot has gotten ready for the tough grind by bringing a sweat jacket along.

IT TAKES LONGHORNS

Eileen Graves and Helen Womack are packing a ton of fraternity jewelry around as a result of a Longhorn invasion to the Tech Coaching school. This is one time that Texas U. scored a triumph over the Matadors.

BACK TO VIRGINIA

Mike Carmack, singer of "Carry Me Back To Old Virginia," will carry a few Wade-Phelan points back to the city of Glade Springs this fall. Mike will try to teach the eastern boys what football is and how it is played by men.

JIGGERS, JUAREZ

Horace Garrett has changed his mind. Instead of Arkansas he is going to wade the Rio Grande for a visit to the watering place of the Southwest. Juarez is going to be the temporary home of Garrett during the coming recess.

BOOSTER EDITION

This edition might be called the "booster" edition. At least the editors have tried to relieve unemployment in the floral business as when they started putting this sheet out the bouquets began to fly.

EL PASO, WHAT'LL YOU DO?
The mighty Knowles departs for El Paso within the next few days. Sid has been studying football under Wade-Phelan instruction and hopes to inoculate the Bowie High boys with a shot of it.

OVERHEARD IN CORRIDORS

Mr. Crane, M. A., 31, is to be head of the English Department in the New Mexico School of Mines next fall. How some people do put it over.

Dean T. U. Taylor, of the University of Texas, will deliver the commencement address to the Summer Graduating Class next Wednesday evening. Greetings to the visiting Dean.

The reason for the enormous enrollment in the coaching school is out. The girls' gym classes enliven the morning hours with the gyrosopes of the dance, tap, clog and what have you.

Mr. and Mrs. E. C. Gates have returned from a summer's work at the University of Pennsylvania. English has a better half in Spanish at the Gate's household.

Miss Frances Rhea, A. B. Trinity University, will teach in the Fort Worth schools the coming year.

Miss Anna Cecil Evans, gives the Houston schools a Spanish accent derived at Tech.

We who attend the first term miss the genial smile and pleasant greeting of Lee Clark coming down the corridor. Hope to see you again next summer, Mr. Clark. Good luck.

C. M. Rogers, C. A. Wallace and Harold Gordon represent the Amarillo schools among the candidates for M. A.'s this summer.

Miss Alice Qualla is a guest at the Qualla home since August 10. We thought the professor was stepping around rather proudly Tuesday.

Dr. Evans

(Continued from Page 1)

thirty years, he having served in the following positions:

Principal of high school, Del Rio.
Principal and superintendent, Comanche.
Superintendent, Uvalde.

Chief State Supervisor of high schools, State director of National Educational Association, and Vice-president of the National Association of High School Inspectors.

While a very busy man, yet Dr. Evans has found time to make many addresses on different phases of education throughout the Southern states and at the meetings of the National Educational Association. Among these was an address delivered in April, 1929, before the Southwest Division of the American Association for the Advancement of Science at Albuquerque, New Mexico.

He has found time also to contribute as an author to the literature for education. He is joint author of the adopted text in civics, "American Citizenship," author of "A Workbook in Elementary

Civics," and numerous articles to professional magazines. There are some things of which he is really proud of. One is that he attended the first summer school held at Baylor University in 1897; another is his record as a member of the State Teachers Association for the past thirty-five years, and that he organized the first legal joint teachers institute in the state, in Uvalde in 1907.

Miss Francis Whalley is working on her thesis in the Mexican National Library in Mexico City.

Members of the Las Chaparritas Club have been enjoying a full program of summer entertainment. Virginia Murray staged a back yard barbecue. No, it didn't rain. Misses Quinlan and Jennings were hostesses at a lovely bridge supper, and the picnics 'a la Country Club have been numerous.

Sid Evans, sizable principal of the McKinney school, Amarillo, is always ready to show you the easiest way to insure your widow a sufficient income or estate in case of your death.
