

# Fall Registration Begins

## Record Year Seems Sure

Registration at Texas Tech kicked off in a big way Wednesday as hundreds of students lined the hallways of various buildings waiting to finish the dreaded chore.

No complete first day tallies were available at press time for the TOREADOR, but the total expected figure of 9,000 seems to be correct.

REGISTRATION began at 1 p.m. and will continue until Saturday noon. There seemed to be mass confusion among several students because of the tremendous lines.

Perhaps the longest line was the one leading to the Office of the Dean of Arts and Sciences. It, at one time, went down to the east corner, turned south and went all the way to the stairs, and then down a few.

OTHER LONG LINES were ones where students were waiting to get their packets ok'd so they could start the tedious process. These lines were moving more rapidly than did the lines to the Dean's office.

A new twist in registration this year is the earlier signing up for evening and Saturday only classes. Students in these categories signed up from 5 to 6:30 p.m. Wednesday, the same time Thursday, and from 8 a.m. to 12 noon Saturday.

Besides beginning registration, Wednesday activities included a "Meet Texas Tech Personalities" program at 7:30 p.m. in the Lubbock Municipal Auditorium. It was the last special meeting of entering freshmen.

THE SLIMES, who have been engaged in entrance tests and counseling since Monday, will join the rest of the student body attending Church Night parties tonight at the various student church centers.

During this initial week, more than 2,200 freshmen have gone through orientation. That's a few hundred more than went through last year. The enrollment of junior college transfers and graduate students is expected to boost the regular student body number to, or above the 9,000 mark. The University of Texas had better watch out, or Tech will soon catch up.

## Permits Issued At Coliseum Lot

Student car registration permits can be obtained west of Jones Stadium on the Coliseum parking lot between 8 a.m. and 12 noon and between 1 p.m. and 5 p.m. Thursday through Saturday.

Before picking up the permits, students should remove all old permits, have their driver's license available and their cashier's receipt for the permit ready. The IBM card must be carefully filled out.

Permits must be on vehicles not later than Saturday, as tickets will be issued beginning Monday on those cars which are not properly marked.

Four parking spaces have been provided in the parking lot directly south of the Post Office to be used by the Post Office patrons—faculty, staff and students. There will be a 10-minute time limit on these spaces.

Vol. 34

Lubbock, Texas, Thursday, September 18, 1958

No. 1

THIS "AIN'T" NO EXCEPTION, it's typical of the first day of registration at Texas Tech yesterday. Students were in lines up and down stairs, around corners and in door and out another. Classrooms and corridors were packed. The expected 9,000 enrollment for the fall semester seems a cinch. (Staff Photo)

## This Semester

# Parking Fees Hiked

Upperclass and freshman parking fees will be raised beginning this semester. The decision was made this summer by the Tech Board of Directors.

The new fees will be \$5 for upperclassmen and \$3 for freshmen, for each vehicle registered. The fees were \$3.50 and \$1 last year.

TECH PRESIDENT, Dr. E. N. Jones, explained the fee raise in a letter to Donnell Echols, Student body president. The text of the letter reads:

"As you have already noted in the news report of the actions taken by the Board of Directors at the July 8 meeting, the fee for car registrations for students was raised from \$3.50 to \$5.00 and for freshmen using the parking lot east of the Stadium from \$1.00 to \$3.00 per semester, effective September, 1958.

"AT THIS MEETING the members of the Board were again brought face to face with very realistic problems involved in adequately financing the operation of the college. These problems are both those of the year just ahead and also on a long-range basis. They include the erection of buildings for classrooms and laboratory

## No Progress Report

Tech's Council of Deans has voted to do away with freshman progress reports effective this fall. Dr. G. E. Giesecke, academic vice-president, has announced.

Dr. Giesecke said the Council took the action because the reports have been found to have less and less significance for counseling purposes. The change was made on recommendation of the Faculty Advisory Committee.

use and other essential structures, such as the physical plant facilities in the heating plant area of the campus. The money for these buildings is provided by what is known as the Building Fund Amendment income. On the other hand, the Bookstore, the dormitories, the Student Union produce revenue and pay for their own new construction. No money from the Building Fund Amendment income is used.

"The construction of streets and parking lots, as well as classroom and laboratory buildings, must be paid for out of the Building Fund Amendment income.

"As the Board of Directors studied proposals made on the building needs of the College for the next ten years, the fact became painfully evident that the available Building Fund Amendment income for this period, now forecast as approximately \$8,000,000 is at least \$4,000,000 short of the total needed.

"SINCE \$119,523.00 has been spent to date on parking lots, including \$23,040.00 on those now being completed and since the construction of further parking lots will have to come from money which otherwise could be used for the construction of necessary classroom and laboratory facilities, the Board of Directors ruled that students using the parking lots should pay, at least in part, for their construction and supervision.

"The reasoning is this—all students are deprived of more classroom facilities to the extent that money which otherwise could go for this use is turned to the construction of parking lots. Not all students have a car, and therefore, inequitable to reduce the amount of money to be used in for classroom and laboratory buildings, which will benefit all

students, by using money from the same source which will benefit a part of the students.

"I SHOULD ADD that the Board of Directors has determined that making parking space available to faculty members and other full-time employees of the College, with charge, is a benefit associated with employment.

"In summary, as the financial CAR FEES HIKED, Page 5 . . .

## Tech Board Okays New Insurance

The Board of Directors, upon request by the Student Council, has approved a student insurance plan for the coming year.

The plan, available for students registered for six or more hours, provides coverage for items not covered by the College Student Health Service.

COST OF the plan, which is not compulsory, is \$11.70, and covers the student for 12 months, including vacation periods. The period covered is Sept. 12, 1958-Sept. 12, 1959.

Participation in athletic activities, excluding inter-collegiate sports, is covered. A student may receive benefits from the plan in addition to any other coverage he may have.

Accidental injuries, dental treatment and sickness is covered by the plan.

UP TO \$500 will be paid for medical expenses for each accident. Payments will be made for expenses up to 12 months after accident, if treatment begins within 30 days after the accident.

Expenses covered are medical and surgical treatment, hospital confinement and special nurses, and college infirmary services for which the student is charged.

Expenses caused by sickness that are covered by the plan are operation fees \$10-\$200 each operation; miscellaneous expenses, up to \$100, while confined in hospital; doctor's visits for nonsurgical cases, \$3 each day up to a total of \$90, while confined in hospital; hospital room and board, maximum of 30 days, up to \$10 each day.

## Committees Open

Committee sign-ups for students interested in working on a committee in the Tech Union will continue until Sept. 24.

The Union Program is composed of eleven committees, each headed by a student chairman. These committees plan, coordinate, and execute all the programs of the Tech Union.

# All College Pep Rally Planned For Friday

The Texas Tech Red Raiders can expect a rousing sendoff in front of West Hall at 8 a.m. Friday in the form of an all-college pep rally.

This year's cheerleaders, Joe Naylor, Sharla Pepper, Bill Womack, Judy Ecklund and Butch Lawrence, want to start off this year by leading the student body to the most spirited football season ever.

COACH DEWITT Weaver expressed enthusiasm over the initial rally, as did other coaches on the staff. "Our boys have been working hard for the Aggie game, and with the backing of the Tech students we ought to take them," Weaver said.

The freshmen boys from the various dormitories have been practicing group yells, and are expected to give a good exhibition of yelling strength.

For all Tech alumni, students and friends who follow the Raiders to Dallas, a reception will be held in the Statler Hilton Hotel from 2 to 5 p.m., complete with

refreshments. Host for the reception is the Dallas Chapter of the Texas Tech Ex-Students Association.

THE FIRST officially sponsored Pep Rally will begin Friday week at 7 p.m. The Student Council will be the sponsor of this event. It will start at the new Saddle Tramp Circle where Stan Powers will introduce the cheerleaders, the Student Association Officers, and the Band Director.

Naylor, head cheerleader, and the other four members of the team will lead three or four yells, going over them slowly and teaching them to the freshmen, and to the upperclassmen who have forgotten. Naylor will then introduce Dean of Men Lew Jones, who will be the principal speaker for the occasion.

Next, Naylor will introduce Coach Weaver, who in turn will introduce the football team. He will give a few words on the progress of the squad up to date.

THIS RALLY, as other formal Tech occasions, will conclude with the singing of the Matador Song.

# Traffic Regulations Are Announced

E. 'Mac' McKnight, chief security officer, has announced the 1958-59 traffic and parking regulations.

They are:

## 1. VEHICLE REGULATIONS

a. Every student and employee of the college who operates or parks a motor vehicle on the campus must register his vehicle with the college, before he is allowed to park on the campus.

b. Applications for parking privileges may be secured beginning with registration for classes. The parking permit will be attached in the proper place by the Security-traffic department.

c. A registration fee of \$5 per semester (freshmen students \$3, see 2b) is payable for each vehicle registered and a fee will be charged for each replacement permit issued. These fees are not refundable.

d. Replacement permits will be issued on the following basis:

(1) A fifty cent fee will be charged for each replacement permit, when the remnants of the original permit are returned to the security office.

(2) When the remnants of the original permit are not returned, the regular fee will be charged.

e. Two students will not be permitted to register the same vehicle.

f. Each registrant must present a valid driver's license at the time the parking decal is issued.

g. Response to a notice to appear before the security officer for violation of a traffic or parking regulation must be made within 48 hours of the issuance of such notice. Failure to report will result in a **DOUBLE PENALTY**.

h. By April 3, the registrant must register his new auto license number with the security and traffic office.

## 2. WHERE TO PARK

a. Within the parking areas a certain portion clearly marked,

is reserved for staff, visitors, and the physically handicapped people.

b. Between the hours of 7 a.m. to 5 p.m., dormitory students' vehicles must remain in assigned areas except for moving off or onto the campus.

c. Non-freshmen students living in West, Sneed, Bledsoe and Gordon dormitories must park only in the large L-shaped area, extending west of Gordon and West dormitories and north of Gordon and Bledsoe dormitories.

d. Non-freshmen students living in Knapp, Horn, Drane, Doak, and Weeks dormitories must park in the following places:

1. The area directly in front of Knapp.

2. The area east of Drane and Horn.

3. No students are to park in the area west of Doak Hall at any time.

e. Non-freshmen students living in men's dormitories 5, 6, 7 and 8 must park in the designated areas adjacent to these dormitories.

f. Off-campus students, other than freshmen, may park in areas they choose, provided that such parking does not violate any campus parking regulations such as parking in dormitory or staff lots.

g. Freshmen students may park in the area east of Jones Stadium at any time. No freshmen may park in any dormitory area at any time.

**AN ENTERING FRESHMAN, FOR THE FALL SEMESTER, IS DEFINED AS ANY PERSON WHO ENTERS COLLEGE FOR THE FIRST TIME AFTER JUNE 1.**

The vehicle registration fee for freshmen will be \$3 per vehicle, per semester. A fifty cent fee will be charged for each replacement permit issued when the remnants are returned; the regular fee will be charged if the remnants are not returned.

h. Parking or driving on the turf at any time is prohibited.

## 3. GENERAL REGULATIONS

a. Every person operating a vehicle on campus is held responsible for obeying all college rules and regulations, City of Lubbock traffic ordinances and State of Texas laws regulating traffic and parking on campus.

b. The registrant of the vehicle is held responsible for the safe operation and proper parking of his vehicle, regardless of who may be the driver or operator.

c. Improper mufflers and disturbances from starting and stopping a motor vehicle will constitute a violation for operator and registrant.

d. Any ticket issued by the City of Lubbock Police Department for traffic violations on campus will be considered a violation of campus regulations.

e. The legal speed limit on the campus:

**STREETS — 20 MILES PER HOUR.**

**PARKING LOTS — 10 MILES PER HOUR.**

f. A registrant operating more than one vehicle must register each vehicle separately.

g. Accumulation of traffic tickets: Any ticket received by a student on campus becomes part of the student's permanent parking and driving record. When a student accumulates three tickets his parking and driving privileges will be revoked (see **NOTICE**).

h. Towing and Impounding System: Any student or employee of the college violating any rule or regulation concerning parking on campus will be subject to having his vehicle towed away and impounded. A clearance from the security-traffic office must be secured before the vehicle is returned to the operator or owner.

i. Any person operating a motor vehicle in a manner which endangers life and/or property on the campus will be issued a violation ticket for reckless driving.

The violator will be restricted

from operating a motor vehicle on campus for a period of from 30 to 60 calendar days. A second offense or violation of this restriction will subject the violator to be suspended from Tech for at least one semester.

## NOTICE

1. One (1) ticket issued either by Tech or the city of Lubbock for either a driving or a parking violation, on campus, will constitute a **WARNING**.

2. A second ticket constitutes a **FINAL WARNING**.

3. Upon issuance of the third

violation ticket the student's driving and parking privileges will be revoked for a minimum of four school months, excluding summer school.

4. Any student having been denied campus driving and parking privileges who then violates these restrictions, may be suspended from college.

5. These regulations will be subject to change at any time. Adequate notice, however, will be given on all changes.

## Ohio State Tops

NEW YORK (AP)—The sports writers and sportscasters participating in The Associated Press pre-season football poll indicated today their judgment isn't to be influenced by past performance.

They can see the defending national champion Auburn team no better than fifth in their guesses as to the make-up of the top 10 at the close of this season. They handed over the top spot to Ohio State, runnerup in 1957.

**THE ESTEEM** in which the Big Ten team is held is indicated by the fact it received 46 first place votes, just twice as many as the number received by second place Oklahoma. Based on points, Ohio State received a total of \$59 to 788 for the Soomers.

Notre Dame was named for the third spot, indicating the prestige of the Irish is undimmed despite their 7-3 record and 10th place finish last year. Michigan State was selected for the No. 4 position.

Although the voters give comparatively few teams a chance to finish on top—most of the first place votes were cornered by four teams—they had a wide variety of

ideas to which teams are good enough to finish in the top 10.

## TOP TEN

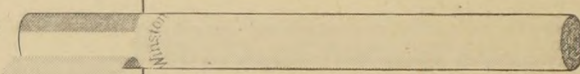

1. Ohio State (46)	859
2. Oklahoma (23)	788
3. Notre Dame (11)	702
4. Michigan State (4)	605
5. Auburn (9)	567
6. Mississippi	283
7. Navy	195
8. Texas Christian	185
9. Army (1)	141
10. North Carolina (1)	140
The second 10: Texas 121; Oregon State (2), 116; Iowa 104; Wisconsin 100; Mississippi State (1), 74; Miami 77; Southern Methodist (1), 70; Clemson 54; Pittsburgh 41; Texas A&M 39.	

When strolling, the uglier the female passerby, the more likely she is to glare at you as though your intent was assault.

One can handle a hundred typical enemies, but one bitter individual can be a nasty problem, especially if it is a female.

Despite the enormous advances by medical science, the undertakers seem unworried.

# August Shows Rise In Traffic Deaths

AUSTIN, Tex., Sept. 18—Texas' year-long steadily improving traffic safety record cracked under the strain of August vacation driving, and a report from the Department of Public Safety to Governor Price Daniel shows the first monthly increase of the year in motorcides.

**AUGUST MOTORCIDES** officially reported through last Friday had reached 220, as compared with 211 for August, 1957, at the same date. This was the first month of 1958 in which more persons had died in Texas traffic than in the corresponding month of last year.

The Governor's Office said the 1958 traffic safety improvement record peaked at the end of the first week of August when 201 fewer persons had been killed this year than last. That was a reduction of 15 per cent over last year. But a series of six tragic collisions, taking 31 lives between August 16 and August 24, caused

a sudden upsurge in the number of deaths.

Adding a larger number of fatal accidents during the month, the over-all August toll climbed higher than the same month a year ago. The August total may climb somewhat higher as final reports are received.

**THE YEAR'S DEATH** toll through September 12 is now estimated by the DPS at 1,472, as compared with 1,622 at the same date in 1957. This is a reduction of 150 deaths, or 9 per cent.

Governor Daniel said: "It is a shame that the steady improvement earlier in the year has been reduced by the August tragedies. This report proves that traffic safety efforts can never be slackened, that death is ever-present on Texas highways and that it is overtaking all kinds of drivers. This tragic report should spur all of us to greater obedience to our traffic laws and greater observance of our speeding regulations. Colonel Homer Garrison, direc-

tor of the DPS, said the report "shows in a very tragic way that Texas drivers have a double responsibility, that of protecting themselves as well as other."

**THIS REPORT SHOWS** that many persons died while doing nothing but riding in a car, that they were entirely dependent upon the driver for their very lives.

Some of these crashes took the lives of other persons and not the driver. One second of inattention sometimes makes the difference between life and death.

The DPS report concluded by showing that August's 28 multiple-death crashes took the lives of 84 persons.

Crossword puzzle addicts are saturated with information that's useless except when doing another crossword puzzle or answering questions on a quiz program.

# Jose Martinez Receives Hiram Parks Scholarship

Jose Juan Martinez, entering freshman from White Deer, is the recipient of the 1958 Hiram Parks Scholarship.

Established in 1945, these scholarships are given each year to a high school graduate of Mexican descent by Mr. and Mrs. Hiram Parks of Lubbock.

**SCHOLARS RECEIVE** \$500 each year for four consecutive years while attending college. The recipient is chosen on the basis of his need for assistance, scholastic record and promise of leadership.

Martinez is the son of Mr. and Mrs. Jose Martinez of Miami.

He plans to major in mechanical engineering.

Martinez was named one of the best students and citizens of White Deer high school by his principal and teachers. He was president of the student body, and a member of the Student Council, the school chorus and Future Teachers of America.

**HE WON FIRST** place in the 1958 Sate Interscholastic League Meet slide-rule contest. He was a three-year letterman in both football and track and graduated in the upper half of his class.

Other current holders of Parks scholarships are Rosa Elia Riojas, junior home economics major from Ropesville, and Raul Contreras, sophomore, education major from Lubbock.

It costs many of us more to be governed than it does to feed, shelter, and clothe ourselves.

Some people are born lucky, some have money, and a few have brains.

When a woman has knocked off twenty pounds by cruel dieting she likes her friends to mention her streamlined figure but detests them for invariably adding, "Now stay that way."

# Capt. Williams Assigned To Air Force ROTC

Capt. Bill J. Williams has been assigned as adjutant of the Air Force ROTC Training Detachment at Texas Tech. Prior to coming to Tech, Williams completed a three year assignment with the States Security Service in Swiebrucken, Germany.

A former Phoenix, Ariz., resident, Williams spent three and a half years at the Amarillo Air Force Base as personnel officer before his assignment in Germany.

**WILLIAMS WILL** instruct Air Science I and will be in charge of the administrative section of AF ROTC.

The 29-year-old instructor has a bachelor of arts degree in education from Arizona State University. He entered the Air Force in July of 1952.

He is married to the former Sue Zane Beelar of Miami, Ariz., and they have three children: Mark, six; Bruce, five; and Cristi, three. The Williams reside at 2809 33rd in Lubbock.

It's time to kick off another school year and another football season, and I hope this column can keep up with the throb of the campus activities.

There is one thing that will make this column a success, and that is the cooperation of the entire student body. I cannot possibly keep up with everything myself, so if you run across something that is humorous, or might be interesting to others, give me a call at PO 3-1773, or drop me a card or letter in care of the TOREADOR.

This is not meant to take the place of "Techsians Talk Back," but to give the students an insight on the many little things that happen, but aren't generally known.

I hope Techsians will Talk Back more this year than ever before; in fact, I've reserved a special place for letters on the editorial page. Don't let me down.

Our Red Raiders travel to Dallas this weekend to trample the corp-happy aggies from College Station. The poor aggies have been moaning the blues for the past week or two about the injuries on the squad.

I have but one thing to say about this—they ought to be thankful for what they have now, because when the well-conditioned Raiders get through tearing them up, even the twelfth man in the stands won't help.

**ATTENTION!** Attention Tech Student Body (including the lowly slimes). The main thing the Raiders need now is more confidence and backing. It's up to us to encourage and urge them on.

Let's all show up at the Pep Rally Friday morning and give the team the best send-off it has ever had. One of the new coaches will be there to tell us what to expect. Check the regular news story in the TOREADOR for time and place.

For the past few nights I've heard some faint murmurs outside the various dormitories, and have seen a few guys standing around outside.

I was really wondering what was going on, and then someone told me the freshmen were practicing yells. I just laughed to myself and thought, "They sound like a bunch of kids — you can hardly hear them."

Slimes, you've got to shape up. In the morning you will be expected to give a fine exhibition of school spirit. Don't let Texas Tech down. Get enthusiasm. I don't think any other dorm will be able to out yell Sneed, and they are bad enough.

Last year there was a spirited drive underway to rid the campus of history teachers by means of decapitation (cutting off heads).

The government faculty and students were pushing this drive, and all at once they stopped. They found out that the "dern thing kept talking anyway."

THE TEXAS TECHNOLOGICAL COLLEGE

## Higher Parking Fee Comes With Paving

Again this year, parking on the Tech campus looms to the headlines in the form of increased fees for this privilege.

Most students who use cars on the campus were aghast at the sight of a \$5 fee, and over the \$3.00 fee for the freshmen. There is one thing for certain, this fee won't be lowered since it was brought about by action of the Tech Board of Directors.

However, before jumping an any conclusions, a review should be made of the improvements made in the parking situation in order that an objective overall view of the subject may be obtained.

First, 880 new paved parking spaces for off campus students have been added, not counting the new parking spaces for the various dormitories.

New paved lots are now, or will be in the very near future, located immediately west of the Ad Building, west of the Journalism Building and east of the new gym, and spaces in the lot immediately north of the infirmary are now available for off campus students. Also the extra spaces in front of Drane and Horn Halls are being considered for these students.

The reasoning of the Board of Directors on the action of raising the parking fee is this: "All students are deprived of more classroom and laboratory facilities to the extent that money which otherwise could go for this use is turned over to the construction of parking lot. Not all students have a car, and therefore, not all students use the parking lots.

The Board of Directors also determined that making parking space available to faculty members and other full-time employees of Tech, without charge, is a benefit associated with employment.

It is generally accepted that the increased car registration fee will seriously dent the pocketbook of many, even worse than did the \$3.50, but new and better things come high.

## Security Force Policies Will Bring New Changes

Over the past few years a bad relationship has existed between the students and the Tech Security Officers. It is hard to define what has caused this type of relationship, and matters little at this point.

E. "Mac" McKnight, the new Security Chief, has announced plans for traffic control that should provide a cure for the bad feelings in the past.

He has instructed the men on the force to use "courtesy" as a by-word, and to bend over backward to be pleasant with the people they are dealing with. However, this does not mean they will have to accept unnecessary abuse from a violator of the law.

Another thing which should ease the tension between students and officers is that the patrolmen who work the parking lots in daytime have quit wearing pistols. This was a move welcomed by both sides.

The officers will attempt, to the best of their ability, to be a warning force rather than a ticket-giving force, but tickets will be given where the rules are clearly violated.

Towing and impounding cars will be the last resort in all cases, but will be carried out when necessary. If your car is towed off, you will be told why.

McKnight plans to act as a public relations man in handling the affairs of the office. He will not be in uniform, and he plans to meet with individuals and organizations all over the campus to help bring about a better understanding of the traffic problem.

Students, it is now up to you to take up the remaining slack in this relationship. Help the situation, don't hinder it.

## A Little Bit

james hamm

A new school year is beginning at Tech, and we would like to take this opportunity to say "hello" to the entering freshmen, and "welcome back" to the upperclassmen.

For Tech's new students, a new, exciting and rewarding experience is beginning. In addition to the opportunity to cultivate the mind, Tech presents to the entering freshmen the benefits of working with other young people in school activities.

**FRESHMEN CAN GAIN** much through meeting and working with other students. They should conduct themselves in such a way as to advance themselves and Tech.

For returning upperclassmen, this year presents the chance to correct mistakes made in the past, cement old relationships and do things that they haven't been able to do in the past.

We would also like to take this opportunity to introduce a new column, which will be run in the TOREADOR each week. This column will present interesting and little-known facts about Tech buildings, organizations, monuments and traditions.

**THE COLUMN WILL** attempt to educate its readers in the histories that surround the things, both abstract and concrete, that have shaped Tech into what it is today — and what it will be tomorrow.

These histories give an insight into past student and administrative leaders — their hopes and fears.

This column will also delve into present-day subjects, such traditions that are forming at the present time, and official action that will have a lasting effect on Tech.

**FROM TIME TO TIME**, comments on present college political situations, student activities college sports will be thrown in for good measure. All in all, we hope this column will help the Tech student to better understand his college.

More history, which will leave a permanent mark on Tech, will be written into the books this year. Whether it leaves a good or bad effect will be decided by the manner in which the students, faculty and administration conduct themselves.

**SEE YOU NEXT WEEK.**

ASST. DIR. OF STUDENT PUBLICATIONS	Phil Orman

The TOREADOR, official student newspaper of Texas Technological College, Lubbock, Texas, is regularly published each Tuesday, Thursday and Saturday morning during the two long terms, excepting holidays, by students of the College as an expression of student news and opinion only.

The TOREADOR is financed by a student matriculation fee, advertising and subscriptions. Letters to the editor represent the views of their writers and not necessarily those of the TOREADOR. Letter must be signed, but may be published without signatures in justifiable instances. The views of the TOREADOR are in no way to be construed as necessarily those of the administration.

Entered as second class matter at the Post Office in Lubbock, Texas, under the act of March 3, 1919.

## Janeway Will Head Association in 1959

Texas Tech Librarian R. C. Janeway has been made president-elect of the Texas Library Assn.

The Assn. has more than 1,200 members in libraries for public schools, colleges and universities, government and the general public.

**TAKING OFFICE** as Texas Library Assn. president Tuesday was Abilene Public Librarian Thelma Andrews. Janeway will succeed her in July, 1959.

Janeway said a prime objective of the next two years will be the recruitment of more librarians. As the Texas population expands there will be even more opportunities for library work than there are today, he pointed out.

**HE ALSO EMPHASIZED** that the expected growth of higher education in the next 10 to 15 years probably will mean increased competition for the type of personnel going into teaching or library work.

Janeway currently is also chairman of the Bibliographic Center for Research, a cooperative operated by 275 Rocky Mountain and Plains libraries and located at Denver.

**JANEWAY CAME** to Tech in 1949 from the University of Kansas, where he was assistant librarian. He was librarian at Bradley University before moving to Kansas.

He has a bachelor's degree from

## Marriage Class Now Offered

Like to take a course in marriage? All joking aside, a new course in marriage is being offered by the department of home and family life.

Objective discussions about many problems and adjustments in courtship and marriage will be held on such things as dating, going steady, meaning of engagement, what you bring to marriage, what it means to be married, common conflicts in marriage and how to cope with them, the making of a family, divorce and remarriage, war and post war problems, tomorrow's family etc.

**THE COURSE** is listed under Child Development in the schedule of classes as 235 Marriage. It is offered 2-3:30 TT or 6-7:30 p.m. By holding the class at 6 p.m., it will give the students an opportunity to attend extra-curricular meetings after class is over.

Freshmen and sophomores; both men and women who are single, pinned, engaged or recently married may take this course. Student may come as couples if they wish.

## Lubbock, Tech Plan Changes For City Streets

The July 8 decision of City of Lubbock and the Texas Tech Board of Directors to open up Flint Avenue through the campus and to widen 19th Street is expected to reduce much of the heavy traffic caused by rush hours and athletic contests at Jones Stadium.

Under the agreement Tech donates 14.8 acres on the Northwest corner of the campus to be used in the proposed Loop 289 around Lubbock. Also, Tech donates to the city a slice of the south side of the campus which will be used in widening 19th street.

**IN EXCHANGE** the city will assume the cost of paving Flint Avenue. Lubbock will also pay Texas Tech \$11,000, which will be used to cover the cost of replanting nearly 150 trees, moving an underground springler system and constructing a chain-link fence along the south side of the campus.

Representing Tech at the meeting were three members of the executive committee who were authorized to act in behalf of the Board of Directors: Chairman W. D. Watkins of Abilene, J. Evatts Haley of Canyon, and Jim Lindsay of Midland.

Lubbock officials were Mayor Lemnis Baker, City Manager H. P. Clifton and commissioner David Casey, Homer Maxey and Otis Maner.

If a person is desperate for a compliment, he will go to the end of town to wheedle one.

## ... Car Fees Hiked

problems incident to the operation of the College increase in number and severity with a heavy increase in enrollment, these problems must be faced realistically and solved on an equitable basis as possible. This principle applied to the construction of parking lots is that the students who use them should, through the car registration fee, contribute, in part, to their construction and supervision."

**THREE NEW PARKING** and traffic regulations were also approved.

(1) When a student accumulates three parking tickets he will automatically lose his driving and parking privileges on campus for four months.

(2) Any student or employee of the college violating any rule or regulation concerning parking on the campus will be subject to having his vehicle towed away and impounded. Clearance from the Security-Traffic Office will be required before the vehicle can be returned to its operator.

(3) **ANY PERSON** operating a motor vehicle in a manner which endangers life and/or property on the campus will be issued a ticket for reckless driving and will be restricted from operating a motor vehicle on campus for 30 to 60 calendar days. A second violation of this restriction will subject the violator to being suspended from Tech for at least one semester.

# Texas Artist Directs Jewelry Making Course

Twenty-two Texas Tech students are learning new and old techniques of an ancient art — making custom jewelry.

Directing them is Wiltz Harrison, El Paso artist whose jewelry and silver are on exhibit in museums and private collections from California to New York.

**IN THE THREE-WEEK** short course that ends June 25, two methods of making custom jewelry are being learned — by fabrication from sheet metal, wire and bar stock and by casting.

Methods of attaining a design in metal have changed little from those used by men throughout history. "We've only refined the techniques with better tools, equipment and materials," Harrison said.

**HARRISON FINDS** the history of jewelry almost as fascinating as teaching the skills themselves.

"In looking back over the civilization before ours, sometimes all we know about remains of a civilization are the bits of jewelry left behind," he commented.

He said that in addition to being a diverting avocation, jewelry making has another satisfying aspect for both professionals and hobbyists.

**MUCH OF THE** commercially made jewelry today may not be intrinsically valuable but it has excellent design that is attractive to the buyer, he said.

"But, a piece of custom made jewelry is for the individual alone," he pointed out. "There's

only one piece and none other exactly like it."

**THE TECH STUDENTS** are learning to make individual pieces of jewelry by casting metal in molds and models made in wax or carved in soft stone. A special kind of sand is also used to cast metal objects.

"We can make jewelry out of anything," Harrison said, "even a bright piece of rock found on gravel streets can be made into an ornamental object."

**HE HAS TAUGHT** many "rock hounds" or lapidary enthusiasts how to make jewelry from the many stones they've collected and polished.

"I continue to be amazed at the great variety of jewelry that has appeal to all persons of all ages and classes over the years," Harrison stated.

While making jewelry is as old as the Pyramids, it has been accepted and taught as an art form in colleges only since World War II. Before that, the techniques of sculpture and painting dominated the education scene.

**BENEFITS** of jewelry making in occupational therapy in veterans hospitals also have helped the craft, Harrison said.

Teaching of the craft as an art form got its biggest boost between 1947 and 1952 when a Conference of American Silversmiths was held for six weeks each year at the Rhode Island School of Design.

Each year an internationally

famous silversmith such as William Bennett of England or Baron Eric Fleming of Sweden conducted the seminar. Only those who agreed to teach the art were allowed to participate, said Harrison who attended the conference several years.

**THE ARTIST-TEACHER** has his own studio and workshop in El Paso and is an associate professor at Texas Western College. He holds degrees from Texas Western and Denver University.

Some of his work currently is being shown in Europe under direction of the Smithsonian Institute and sponsored by the State Department.

## Gates Asked To Attend Meet

Dr. Eunice J. Gates, professor of foreign languages at Texas Tech has been invited to a "Conference on Brazil" to be held in New York City on Dec. 1-2-3.

The conference will be part of establishing a Brazilian Institute for furthering the cultural, economic, and political relations between Brazil and the United States.

**PRINCIPAL SPONSORS** of the conference are New York University, Nelson Rockefeller, Mayor Robert Wagner of New York City, the Brazilian Ambassador to the U. S. and the Brazilian Ambassador to the United Nations.

Dr. Gates was born in Brazil and has maintained her interest in the country and its Portuguese language through her studies and research. She has published articles on Brazil, a textbook on Portuguese study, and has taught Portuguese at Texas Tech and Texas Christian University.

SIGN UP — A typical Tech scene is boys signing up for Fraternities.

## Board Approves Grants

Fifteen new scholarships have been approved for outstanding students transferring to Tech from junior colleges. Four other scholarships have been formed for sophomores, juniors and seniors—\$200 for sophomore scholars and \$300 for juniors.

Also provided from the uncollected property deposit funds are three music scholarships of \$300 each for freshman students.

**WHEN A STUDENT** enters Tech, he makes a \$750.00 property deposit from which breakage or unpaid library fines are deducted. Many students have not collected their deposit when graduating or withdrawing from Tech and it is from this surplus that the scholarships were formed.

Students interested in the scholarships may apply to the Texas Tech Committee on Awards and Scholarships for additional information.

## Photojournalism Offered

An advanced course in the problems of photojournalism will be taught this fall in the journalism department.

**THE BASIC AIM** of the course is to offer training of a specialized nature for students who already know the basic mechanical operation of the camera and have had some experience in darkroom techniques.

Interested persons should either

have credit for Journalism 3313, Beginning Photojournalism; or Physics 237, Techniques of Photography; or satisfy the instructor that he has skills available comparable to persons who have completed these courses.

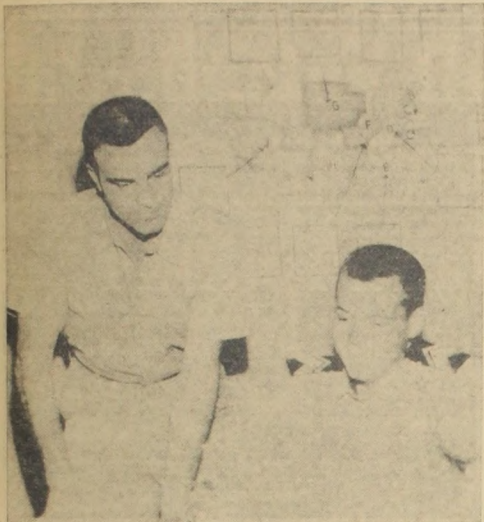

**THE CLASS** will meet once a week for a conference period and assignments will be discussed at that time. Students will then work

on an individual basis, solving var-

ious photographic problems.

In general, students will be allowed to work on such problems as may interest. Such areas as magazine, newspaper and advertising photography and the marketing of pictures will be surveyed.

For additional information, contact B. J. Whitted, journalism department, or phone extension 234.

PICTURED DURING the annual meeting of the Arnold Air Society National Executive Board is AFROTC Cadet Colonel Kenneth D. Lockhart as he discusses plans for the forthcoming year with Cadet Colonel James E. Willis, who is seated. Cadets Lockhart and Willis were one of 26 senior AFROTC cadets selected from 14 colleges across the nation to attend the three-day conference at AFROTC Headquarters, Maxwell Air Force Base, Alabama.

## Reception for Foreign Students Is Scheduled

Foreign students attending Texas Tech during the 1958-59 academic year will experience West Texas hospitality through new "host family" program in Lubbock.

**SPONSORED BY** the Lubbock Community Committee for International Students, the program will involve 30 host families living in Lubbock and a similar number of foreign students enrolled at Tech.

Mrs. A. J. Foster, 4708 17th, heads the Lubbock committee that will be working with Tech students through the Student Life Office. Others on the committee are Mrs. Bryan Edwards, Mrs. L. E. Brown, Mrs. C. W. Rathliff, Mrs. L. J. Hicks and Mrs. Alton Briggs.

**PLANS FOR** committee activities during the fall include an orientation program for host families Sept. 7 and a reception for

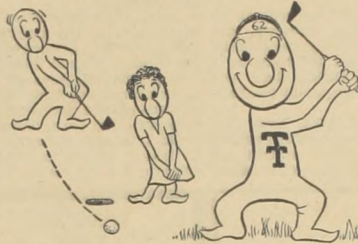

Tech foreign students and host families at the home of Mrs. Foster Septemeber 28.

The host family program met with great success in Houston for foreign students enrolled at institutions there. James Whitehead, Tech assistant dean of student life said.

**THE PROGRAM** was organized by the Institute of International Education — a private non-profit agency which administers exchange programs for governmental agencies, foundations, private organizations, colleges and universities in the United States and abroad.

Mrs. Alice Reynolds Pratt, southwest regional director for the I. I. E. in Houston, was here in June to advise the new program, Whitehead said. The aim of the host program is to better understanding between local people and foreign students.

# Initial Plans Made For Out-of-Town Trip

Initial plans for the annual out-of-town trip have been made, and from all indications, it should shape up to be one of the best.

The trip is to the Tech-TCU football game, and other activities included in the trip are the State Fair of Texas in Dallas, the Texas-Oklahoma University football game, the State Fair presentation of "The Music Man," a Broadway hit, and many attractions within the Fair itself.

**THE GAME** between Tech and

TCU should be one of the best in Southwest Conference play this year. TCU now is rated No. 1 in the Conference, as they were when Tech trounced them 21 to 19, a few seasons back.

The Santa Fe train with Class I coaches loaded with Tech students will leave Lubbock at 10 p.m. Friday, Oct. 10, and will arrive in Fort Worth at 6:30 a.m. the next day.

There will be a pep rally at the train station in Cowntown, and then, after the rally, the students will again board the train for a short trip to Dallas. Buses will carry the passengers to the Fairgrounds.

**STUDENTS WILL** have the day at their leisure. The Fair has hundreds of exhibits including an electric show, automobile show,

the Texas International Trade Fair and the Dallas Garden Center.

The train leaves Dalas at 6 p.m., and when it arrives back in Fort Worth the students will board buses to go to Amon Carter Field for the highlight of the trip.

**PRICE** for the round-trip train ticket, plus a ticket to the ball game, is \$14.25.

To get more information about the trip, or to buy tickets, contact the Student Council office or any Student Council member.

Tech girls will have to secure written permission from their parents and present it to the Dean of Women's office for approval. The Student Council urges that this be done as quickly as possible in order to prevent confusion.

DR. AND MRS. E. N. JONES returned recently from a trip to Europe.

## Ryan Works for Humble Board of Directors

Dr. John A. Ryan, professor of marketing and head of that department at Texas Technological College, spent the summer in Houston studying, evaluating and formulating recommendations concerning activities of the marketing department Humble Oil & Refining Company.

Dr. Ryan was one of 20 professors from 11 universities invited to work for the summer as the continuation of a policy begun

in 1950 by Humble as part of its aid-to-education program.

**THE COMPANY** believes that the importance of education to the nation and to the business community warrants support by corporations in keeping with their responsibilities as good citizens.

At the conclusion of the summer program, the professors were invited to offer any comments or suggestions which occurred to them as a result of their observations during the summer work.

# PRICED RIGHT FOR YOUR FALL WARDROBE

This attractive sportscoat is only one of the many fine values that is offered at Brown's Varsity shop. Welcome back to Tech, drop in and say hello to Coach and John, they will be glad to see you and to welcome you back. Watch for Brown's football guessing contest, starting next Tuesday.
