

WADE— That's what it says whether you can read it or not. Although the campus cops weren't out putting up such signs yesterday, they should have been because of the sudden deluge of rain that fell on Lubbock and TexasTech. Streets were flooded and parking lots will be boggy again for weeks to come. However, keep your chin up—spring is bound to come.

Applause Marks 'No Time For Sergeants'

by EVERETT GROSECLOSE & CAROL STONE

Peals of laughter and applause rang to the curtain seven consecutive times last night when the first performance of "No Time For Sergeants" ended before a capacity crowd in their two night Lubbock stand.

Charles Hohman, playing Will Stockdale, an amiable boy from Georgia backwoods, won the audience's hearts and their applause with his excellent portrayal. Hohman, a veteran of the theatre, climaxed his career as he helped to make theatre-Army history in such productions as "Richard II", "The Bad Man," and "Macbeth".

Rex Everheart, portraying the typical sergeant, gave his audience insight to "the way the Army is run." Everhart's performance of Sergeant King, a career man who had the misfortune of having Will

and his scrawny buddy assigned to his classification center, was one of the most convincing characters of the entire play.

The scrawny buddy, played by Tucker Ashworth, was a scholarly little recruit with special aptitude for following in the unfortunate steps of his pal, Will. Ben Whitledge was a character played with zeal and a talent for gaining audience laughs.

ALTHOUGH THE PLOT was shallow in places, characterization more than made up for the lack of suspense. Climax of the play came when the lackadaisical crew manned an airplane to points West that ended in a death defying crash for Will and Ben. The two quite un-dead heroes were presented medals by the brass, with a twist of fate that ended in riot and the infantry.

Backed by magnificent lighting effects, the play left the viewer with an innate sense of realism concerning the setting.

ORANGE AND RED lights predominated the color scheme yielding completely different effects when the two were combined. The

beacon, beaming from the top of the Auditorium, spotlighted the principal action while milder shades engulfed the minor action.

A combination of lights made a sky-blue horizon providing a perfect background with other lights flooding the players on stage.

A PARTICULARLY good effect was produced when the scene shifted to an airplane. The viewer felt the plane was actually in flight amid the roar of the motors. By turning a color spectrum over the lens of the spotlight producing a rolling-sky effect, the plane seemed actually in flight.

Extraordinary props, almost too perfect to believe, found favor, producing realism.

Tonight is the last performance of the troupe in Lubbock. Tickets may be obtained at the Coliseum ticket window.

Special Edition Offers Prizes for Observance Ability

Do you have 20-20 vision, or do you need bifocals?

The April Fool edition of THE TOREADOR will offer you a test of your observation that will rival the best given by any optometrist.

LUBBOCK MERCHANTS are sponsoring a contest to find the mistakes in the drawing of a typical tennis-playing Texsan. Each merchant is donating some article from their stores to a composite prize.

This contest will be the only sliver of truth in the April Fool edition.

The special edition will be sold for ten cents a copy starting about 8:30 Tuesday morning. There will be stands in the Tech Union and in the Journalism Building. Also, newsboys will be stationed at various places around the campus.

CONTEST ENTRIES will be accepted only on the entry blanks that will be printed in this edition. Entries should be turned in between 4 and 6 p.m. Tuesday in Journalism Building 101.

The winner will be determined by the highest percentage of correct guesses and his name will be announced in the following issue of THE TOREADOR.

Employees of THE TOREADOR or persons closely connected with Page 8, APRIL FOOL . . .

Former Teacher Died Yesterday

Dr. Richard Arthur Studhalter, 71, retired head of Texas Tech's biology department, and an original faculty member, died late yesterday of a heart attack.

Studhalter obtained his B.A. degree at the University of Texas, M.A. at the University of Washington and Ph.D. at the University of Chicago.

TWU Dance Group Performs April 8

Texas Woman's University's Modern Dance Group will perform in Lubbock's Municipal Auditorium April 8 at 8 p.m.

Sponsored by the Women's Educational Department, the group will perform its famous suite, Sun and Sage; The Saga of a Texas Cowboy.

Also featured will be a Festival Suite based on the themes of Easter, Thanksgiving and Christmas and a Folk Suite featuring Page 5, MODERN DANCING . . .

With Concert Sunday

Band Tour Opens

The Texas Tech concert band will open its 1958 tour with a free concert in the Music Building band hall tomorrow at 3 p.m.

"We will seat as many as we can and stand the rest" said D. O. Wiley, band director.

THE PROGRAM will be chosen from a repertoire of more than 20 numbers ranging from Walt Disney's "When You Wish Upon a Star" to the "Mignon Overture." Some 68 members will make the tour, Wiley said. The band is scheduled to make eight appearances in the three days.

Concerts are scheduled at Crosbyton, Paducah, Vernon, Seymour, Anson, Abilene, Snyder and Post. During the tour, band members will stay in private homes.

THE TECH MUSICIANS have

for their concerts and are cur-gained considerable recognition for their concerts and are currently the official band of Governor Price Daniel. They have made appearances as far away as Los Angeles and New Orleans.

The first day of the tour, the band will appear at Crosbyton High School, Paducah High School and at the Municipal Auditorium in Vernon, sponsored by the Vernon High School Band and Band Parents Club.

The band has concert dates at Seymour High School, Anson High School and Abilene High School Tuesday.

The tour closes Wednesday with appearances at Snyder High School and Post High School.

Dr. Giesecke Accepts Invitation to Germany

by MYRNA MORRISON

Dr. G. E. Giesecke, Texas Tech academic vice president, will represent Texas Tech and U. S. higher education in West Germany this summer.

Dr. Giesecke has accepted the invitation of the West German government to make a four-week study tour of that country June 15 through July 15.

According to Dr. Giesecke the real world of scholarship lies in the free swapping of ideas between societies.

"WHEREVER I CAN, I want to see what opportunities I can uncover for stimulating exchange between Texas Tech and European universities," Dr. Giesecke said.

Closer exchange relationships between Tech and European institutions of higher learning could take many forms, according to Dr. Giesecke, conceivably those of instructor and publications exchanges as well as direct exchange of students.

A second aspect of the tour

which interests Dr. Giesecke is the opportunity to observe changes in the German universities since the advent of national socialism in the early 1930's.

UNTIL THAT TIME a free flow of ideas existed between the two systems of higher education of the two countries. After World War II communications were completely severed.

"What I want to see is to what extent German Universities have regained freedom and how they are using it," said Dr. Giesecke.

On this study tour Dr. Giesecke will view post-war development of West Germany in general and of the country's higher educational system in particular.

IN ADDITION, he will meet leading personalities in German political, cultural and public life and will have an opportunity to observe the country from his own point of view, according to West German officials.

Dr. Giesecke speaks fluent German. He is the initiator and chairman of the foreign visitors committee of the Lubbock Chamber of Commerce.

While in Germany he expects to visit many of the "honorary citizens of Lubbock" who visited this area on the foreign visitors exchange program between the U. S. and European countries.

HE ALSO PLANS to visit Hanover, West Germany, the city with which Lubbock has had a partnership for cultural exchange for several years.

Dr. Giesecke has been to Germany on two previous occasions. In 1931-32 he studied in Germany on a fellowship awarded by the Institute of International Education, Lubbock. Page 8, GIESECKE . . .

Engineers Meet

Men in charge of departments of the Engineers' Show will meet in room 153 of West Engineering at seven Monday night. A list of exhibits with room numbers and a flow chart should be brought, says Lynn Elliot, Engineers' Show Manager.

'St. Louis Blues' Composer

W. C. Handy Is Dead

Sometimes they danced, sometimes they shouted, sometimes they sat and hugged themselves and shuffled their feet.

And sometimes they listened as though to Beethoven, to the liquid notes trickling off to the farthest corners of the hall.

W. C. HANDY, with his neat business suit and conservative mustache, his shining high forehead, looked like a doctor. And when he blew that golden trumpet he doctored many a heart.

They called him Mr. Blues. They called him Mr. Beale Street, Mr. Memphis and Mr. St. Louis.

IN NEW YORK he walked with the composers of "Minnie," "When Your Hair Has Turned to Silver," "For Me and My Gal," "Smoke Gets in Your Eyes," with Sig-mund Romberg and Paul Whiteman.

In Hollywood's famous bowl at one jamboree 15 bands played 15 different versions of the "St. Louis Blues," and when he died a St. Louis disc jockey played 40 versions for two solid hours.

THEY SAID he was a Southern Negro, and that he interpreted the music of his people. But he made it an American mood.

Tornadoes Threaten

Three tornadoes poked down out of big black clouds over the Texas South Plains Friday.

No injuries were reported. Property damage was believed light.

One twister dipped down near Lakeview in the northwest part of Lynn County.

Another was spotted aloft northwest of Brownfield in adjoining Terry County. The Department of Public Safety said a third funnel was seen near Floydada, northwest of Lubbock, but that it apparently did not touch ground.

The department also said it had reports a funnel hit near New Home, 8 miles east of Lakeview in Lynn County.

3-Year-Old Rescued

DALLAS (AP)—Cries of "I want a cookie" and "I want my ball" drifted from the chimney atop the roof of the Ernest Young residence Friday.

They came from 3-year-old Leeta Young, a sprightly lass who was stuck firmly inside the chimney about four feet from the top.

While one neighbor held her hands another knocked bricks away. Firemen completed the rescue. Page 5, AIRCRAFT . . .

CAMPUS

Geologist's Trip Scheduled in April

Geologists of Texas Tech and The University of Texas are banding together to study an area in the Davis Mountains of West Texas.

A field trip to the area is scheduled April 11-12. Some 300 geologists are expected to assemble for the trip, which will start at Van Horn.

Named "Kent's Quadrangle of Trans-Pecos Texas," the area covers over 1000 square miles. It is estimated to be from 70 to 90 million years old and was formed during the Cretaceous geologic period.

Dr. John Brand, Tech geologist, is working with Prof. Ronald K. DeFord of The University of Texas on the study. Both schools will have other staff members and graduate students working on the project.

The geologists hope that the study will give details of formations extending into oil-producing Country.

Muldrow Aerial Surveys, Inc., Midland, will photograph the area from the air. The pictures will be transferred on to detail maps. Final maps of the survey will be issued by The University of Texas.

Petty Trio Sings At Cotton Ball

Alpha Zeta will present its annual Cotton Ball featuring music by the Norman Petty Trio in the Tech Union Ballroom. Admission is \$2.50 stag or drag, and everybody is invited to attend.

Highlighting the evening will be the crowning of the Cotton Ball Queen.

Candidates are: Gwen Nix, Alpha Phi; Gail Cooper, Gamma Phi Beta; Beth Davidson, Kappa Alpha Theta; Anease Pritchett, Sigma Kappa.

Lajuona Rabbs, Delta Delta Delta; Perry Thompson, Zeta Tau Alpha; Shirley Stephens, Drane; Carolyn Baggett; Weeks; Madalyn Maddox, Knapp.

The South Plains Maid of Cotton may be at the ball to crown the Cotton Ball Queen.

Tech Practice Teachers Find Unexpected Snag

by JENNICE MARKS
 "They just don't tell you all these things in books," was the advice student teachers Barbara Hinkson and Pat Curry found to be true as they spent seven weeks practice teaching in the home economics department at Crosbyton High School.

Pat, from Arlington, and Barbara, from Lubbock, have just completed their practice teaching and are now living in the Home Management House.

HELPING WITH STYLE shows putting displays for Public Education week in store windows and learning to fingerprint in the first grade were some of the practice teachers' extra-curricular activities. They also attended the Area I Future Homemakers of America meeting at Amarillo, a home economics teachers meeting at Tulia and a district teachers meeting at Tulia and a district teachers meeting.

The home economics seniors all agreed that student teaching had a definite bearing on their decisions to teach.

As would be expected, the student teachers had many unusual experiences. When Emma Lou noticed that a girl, while making biscuits, had put in two tablespoons of flour and one cup of milk, she assumed that the girl had copied the recipe wrong.

WHEN THE SAME GIRL used two tablespoons of sugar and one cup of cocoa in making hot chocolate, she realized that the wrong measurements were not the fault of the recipe. After drinking

some of her own hot chocolate, the girl asked Emma Lou, "It's so bitter. What can I do for it?"

A highlight of the home economics student teaching program was home visitation. The student teachers visited in the homes of the girls working on home projects and by doing this got an insight into the family situation which helped them in their class room procedure.

THE GIRLS are now sharing duties in the Home Management House. The duties are laundries, upstairs house keeper, assistant baby director, baby director, downstairs housekeeper, assistant food director and food director. These jobs are rotated so that each girl has the opportunity to do each type of work. They receive three hours credit for the home management residence course.

Miss Billie Wolfe, assistant professor of home economics lives in the Home Management House with the girls.

Faculty Members Attend Meetings

Three members of the Tech English faculty are attending professional conferences today.

Dr. Kline Nall, director of freshman English courses, winds up his visit to the ninth annual conference on college composition and communications in Philadelphia today.

Dr. Truman Camp, English department head, and Mrs. Neva Gehring, English instructor, are attending the annual Texas conference of College English teachers in San Antonio.

All three faculty members are expected to return this weekend.

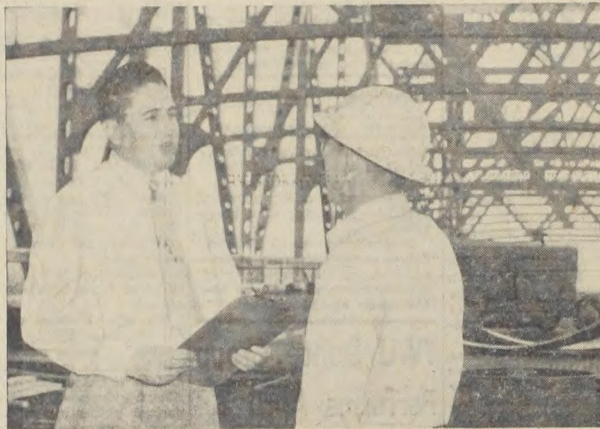

Missile Picture Slated April 2

"The Pentomic Army" a new color film is scheduled to be shown at the Aggie Memorial Auditorium at 7:30 p.m., April 2, and all Tech students are invited. Col. James B. Carvey, PMST announced this week.

Starting with the missile commands, the Army's new type organizations are shown with their weapons, both nuclear and conventional. The film emphasizes the employment of the new battle groups and their supporting elements including the greater mobility, long-range firepower and long-range communications inherent in the new organization.

The information until recently, has been classified, but is now released to the public.

A Campus-to-Career Case History

Bill Rhode (left) at the site of New Orleans' new Claiborne Street Industrial Canal Bridge.

"Problems keep life interesting for a telephone engineer"

"I've taken part in all kinds of engineering projects during the five years I've been with the telephone company," says Bill Rhode, M.E., Tulane, '52. "Each project brings special problems to solve.

"Take a couple of recent jobs I did as examples. One was to plan and oversee the relocation of telephone facilities near a new drawbridge. The job included designs for attaching telephone cable to the finished bridge and for providing service to the bridge-tender's office and the locks.

"The other job was completely dif-

ferent. I was asked to make an experimental installation of some newly developed line concentrator equipment. After selecting the test location, I engineered facilities for the remote concentrator unit, and trunk plant to the central office.

"Another thing about these jobs — they're a result of the growth of the telephone business. Not only do problems like these keep life interesting for a telephone engineer, but they mean that careers are full of opportunities to show what you can do and get ahead."

Wilmer J. Rhode is with Southern Bell Telephone and Telegraph Company. He is one of many young men who are finding interesting and rewarding careers with the Bell Telephone Companies. Ask your placement officer for information about the careers these companies offer.

Tri-Delts Honor Pledges Tonight At Presentation

Delta Delta Delta's annual presentation and dance will be held tonight at 7 p.m. in the Union Ballroom.

Gilded bird cages with velvet swings and flower decorations will carry out the spring theme.

Those presented will include two members initiated last fall, 24 new members and three pledges.

They are: Barbara Black, Abilene; Julia Blanchard, Austin; Peggy Braselton, Plainview; Mary Jane Cashion, Lubbock; Robbie Craze, Houston; Jodie Creed, Wichita Falls; Nel Ray Daws, Throckmorton; Gail Delcambre, Dallas; Marie Dulaney, Sherman; Ellen Edwards, Monahans; Kay Fleming, Abilene; Jimmie Harkrider, Brady; Margie Hatton, Lubbock.

OTHERS ARE Mar-Jo Holly, Plainview; Kay Jones, Midland; Kay Kring, Abilene; Sallie Jo Lemon, Lubbock; Pat Martin, Wichita Falls; Sally Miller, LaMarque; Jeannene Pieper, Lamesa; Jane Rechenhinn, Temple; Lynn Richards, Lubbock; Margaret Ritter, Amarillo; Suzanne Stafford, Amarillo; Linda Trojan, Lake Charles, La.; Toni Thompson, Abilene; Marcia Vick, Graham; Linda Warren, Lamesa; and Gaynelle Williams, Plainview.

Music for the dance will be furnished by Harold and Raley.

TODAY FROM 1 to 3 p.m. Tri-Delts will hold open house for their parents at the lodge. Coffee and doughnuts will be served.

Robbie Craze, freshman from Houston, was recently named best pledge and presented a gift from the chapter.

Peggy Donnell Brown was named best member by the fall pledge class and presented a plaque with her name inscribed.

Pikes Entertain Fijis With Party

Pi Kappa Alpha fraternity will entertain Phi Gamma Delta fraternity in the Pike's lodge at 8 p.m. today.

Music will be by records played on Pike's new Hi-Fi set.

Pledge classes of both fraternities will present skits during intermission.

Purpose of the party is to improve fraternity relations.

ARRANGING FLORAL DISPLAYS is the hobby and part-time job of Buddy Polser, freshman from Weatherford. Polser works at a local florist shop helping Tech students with floral selections for their dinners, corsages and parties. (Staff Photo).

Tech Artists Win Top Prizes At Several Museum Exhibitions

Tech and Lubbock artists took top prizes at the seventh annual South Plains Art Guild and third annual Texas Fine Arts Regional

MorningWatchSet For Tech Union

A campus-wide Morning Watch for the observance of Easter is scheduled for 7:25 a.m. April 2 in the Tech Union.

The Student Religious Council has invited all Tech students and faculty to this annual worship program. The service will be conducted by Rev. Bob Fudge, who has worked with the World Council of Churches and several years ago attended an international world council convention in Oslo, Norway.

exhibition being shown at the Tech Museum through April 13.

A \$25 merchandise award for his painting, "Juxtaposition," was presented Rod Parkinson, Tech assistant professor of architecture. Also, Ray Collier, Tech graduate, received a \$25 merchandise award for his craft of a wooden cat.

Other winners are Nina Hatcher, who received the Grumbacher Award for "The Wild Ones"; Vivian Turquette and Thelma Lawrence, the latter two received merchandise awards for their paintings.

The show, whose purpose is to make better known the widespread work of Texas artists and craftsmen, includes 85 entries from 20 South Plains counties.

Texas Tech Student Florist Finds Flowers Fun and Makes Money, Too

By FRANCES TAYLOR
Girls, have you ever wondered where that beautiful corsage came from?

An answer to this question may come from Buddy Polser, Texas Tech student from Weatherford working at Custom Flowers here in Lubbock.

Polser has worked as a florist since Christmas, 1955.

"The only reason I ever got into this business was that I needed some Christmas money."

"I enjoy the floral business because I get a chance to help Tech students with their corsages, dinners and parties." Polser makes the majority of the corsages sold to Tech students at Custom Flowers.

PAST EXPERIENCE has made possible a trip to Dallas in July for him to attend the State Florist Convention. Polser, with assistance, will prepare a table with the theme "Barbara's Farewell To College." Twelve Texas floral shops are honored annually and are invited to participate in this convention. Tech made this trip possible because of the large business in flowers. Polser has attended design schools in Austin, Fort Worth, San Antonio and Dallas.

Working while attending college has not hampered Polser. He is a freshman non-major and last semester he had a 2.3 grade average. While in high school he was an honor student. He was awarded a scholarship upon graduation.

PAT WATSON, Lubbock, and Gayle Reams, Sweetwater, are two of Polser's colleagues. All three are being taught the art of floral techniques and design.

"Working in a florist shop is never dull. I have a lot of fun and I may make it my career."

Tech Army Cadets Get Honor Ribbons

Thirty-seven basic cadets of the Army ROTC Brigade have been presented with Good Conduct Ribbons at a special review by the Cadet Brigade.

Brigade Commander Cadet Col. R. W. Price presented the ribbons.

The Good Conduct Ribbon is issued to basic cadets when they have received no demerits and maintained a B average for one semester, according to Col. James B. Carvey, professor of military science and tactics.

Those receiving the award are: Richard D. Beale, Jerry M. Bell, John P. Black III, Donald L. Curry, Claude L. Dailey Jr., Robert C. Grider III, Lysle J. Koch, Clarence E. Marak, Hugh P. Parkinson, Ardith D. Rolen, John F. Shepard, William L. Smith, Roger L. Studer, Leslie R. Thompson, Lance C. Williamson.

Others are: Marvin Armstrong, Norman B. Bookout, Billy F. Brown, Samuel M. Burns, Jack F. Gist, Allen S. Glenn, Almer L. Norman, Gary P. Harrison, Charles F. James, Herry R. Lines, J. R. Logsdon, Jimmy D. McAuley, Arvie E. Marshall, Larry L. Melton, Irby D. Range, Michael R. Rodman, Joel L. Smith, James H. Spencer, Lee R. Whitley, Charles Wright Jr., Donald L. Zimmerman, and Ordie R. Jones.

Sororities And Responsibility

RESPONSIBILITY in student government plays an important part in its success. But, from the standpoint of a number of sororities and girls from them who run for positions on the Student Council, there has been little evidence of it.

The lack of responsibility for student government begins with the idea that the race for a position on the Student Council is a popularity contest, not a race between competent individuals who can serve the study body to the best of their ability.

This trouble stems from many sororities urging the girl who has beauty, and possibly a good personality, to run for an office in hopes that her election to office will bring honor or recognition to their organization.

The matter sororities seem to give no consideration to is whether the girl has any ability to serve the student body of Texas Tech. In not thinking of this, the guilty sororities are placing their organization above an institution of which they are only a part.

Incompetence because of the above reasons has been of great concern to the leaders of the Council. Often, they explain, girls who are elected on a popular-

ity ticket are sworn into office, and then they seem to forget they have an obligation to fill.

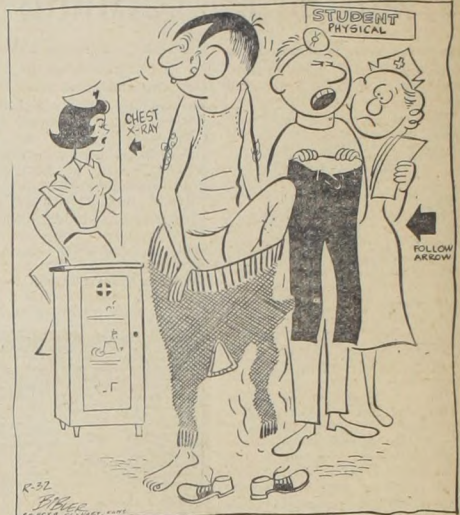

When they attend Council meetings, as they seldom do, they fail to take an active part in the process of the business at hand, and never have any constructive ideas for the benefit of the campus.

This is a point to be taken seriously. Each representative on the Council represents approximately 350 students from their respective Schools, and by not actively participating, they are neglecting the right of the student to be represented.

This brings the responsibility to another group — it is you, the voters. From now until the time of the election it will be your duty to observe the candidates and their actions, and then make your decision on who you think can represent you best, not who can look the prettiest perched on a Council table.

In conclusion, I will revert back to the basic responsibility — that of the sorority which urges their girls to run for various offices. By choosing incompetent persons, you ruin the whole purpose of your existence — that of the betterment of Texas Tech.

Be SURE to ENTER

Trouble Then 'Br

A Texas Tech graduate is proving that a photoelectric cell can be a magic carpet to the moon. Tape recorders have been used around Tech for some time to blind students and to students who want to analyze voices.

Mrs. Dolores Killehenstein transferred to Tech to major in business education, became interested in tape recorders as early as last Spring.

First reasoned Mrs. Killehenstein why should a student who has been unavoidably absent from class have to decipher a teacher's lecture notes? Why not keep a tape recorder on hand to record the teacher's lectures on tape for week or so for the benefit of absentees.

That led to another idea. Mrs. Killehenstein's lectures present material that is particularly difficult to understand. The teacher can't be asked to repeat the complicated material over and over again, but Mrs. Killehenstein is grateful for the chance to get his interpretations of difficult material.

Tapes of such lectures are used in drills to improve student listening and note-taking habits.

The magic of magnetic tape brings reality and glamour to the classroom.

... Aircraft

Laeta said she followed "kitty cat" up a ladder to the top of her home. Then she discovered her ball down the chimney and went after it.

She was unhurt but her Wanda, said, "She's in bed for the rest of the day."

Aircraft in Error
BRIDGEPORT, Tex. — A Civil Aeronautics Administration spokesman said that one or both of the two Force planes that collided and crashed Thursday "obviously" at the wrong assigned altitude.

All 18 servicemen aboard the two aircraft were killed.

Bruce Chambers, public information officer of the CAA in Fort Worth, said one should have been flying at 8,000 feet. That was a huge master carrying a crew of 5 passengers.

Chambers said the other plane carrying a crew of 5 assigned to 8,000 feet.

Travelers Present Foreign Dance Show

"Trip the Light Fantastic" program of exhibition and information of unusual foreign dances will be held at 7 p.m. Tuesday at the Tech Union Ballroom.

Tech foreign students will perform several Latin American dances and give lessons in such as the mambo, samba, tango, Servando Trevino will provide the music.

The World Travelers Committee is sponsoring the program in charge. Mickey Dulaney is in charge of the event, and Mack is chairman of the committee.

SE

Trouble 'Creating' Answers? Then 'Brainstorming' Is for You

A Texas Tech graduate fellow is proving that a strip of tape flowing past a photoelectric cell can be a magic carpet to learning.

Tape recorders have been used around Tech for some time as aids to blind students and to speech students who want to analyze their voices.

Mrs. Dolores Kilchenstein, who transferred to Tech to major in business education, became interested in tape recorders as a senior last Spring.

First reasoned Mrs. Kilchenstein why should a student who has been unavoidably absent from class have to decipher a friend's lecture notes? Why not keep the teacher's lectures on tape for a week or so for the benefit of such absentees.

That led to another idea. Some lectures present material that is particularly difficult to absorb. The teacher can't be asked to repeat the complicated knowledge over and over again, but a tape of his voice can. Many students are grateful for the chance to go over his interpretations of difficult material.

Tapes of such lectures also can be used in drills to improve student listening and note taking habits.

The magic of magnetic tape can bring reality and glamour to edu-

cation, Mrs. Kilchenstein pointed out. Tapes can pick up the words of an outstanding salesman as he talks candidly with a prospect, or of other business and professional transactions.

Prospective secretaries can become steeled to the dictation of hard-to-understand bosses through drills with tapes of such voices.

The hard-come-by rhythm drills needed in typing classes can be performed flawlessly on edited tape. And through that medium, the teacher can multiply himself as much as needed to drill groups within a class according to their

advancement.

A teacher can even save time by recording his opening remark on tape and playing it for the class as he checks the roll. Mrs. Kilchenstein added.

Obviously such practical imagination isn't going to be overlooked. Mrs. Kilchenstein's ideas have won her fourth place in a nationwide contest sponsored by Audio Devices Inc. to discover new uses of tape.

The ideas also helped win her a graduate teaching fellowship in Tech's business education department this year.

Sigma Nu Honors Hargis & Strawn

Charlotte Hargis, freshman from Seminole, was crowned Sigma Nu White Rose Queen at the annual White Rose Dinner Dance last night at the Lubbock Country Club.

Charlotte was presented with a trophy and a bouquet of one dozen white roses. She is a member of Delta Gamma sorority, Angel Flight and an AFROTC sweetheart.

Jim Strawn was named Outstanding Sigma Nu of the Zeta Pi chapter. Strawn is a senior industrial and mechanical engineering major from Houston.

Strawn also received a trophy. The awards were presented during the intermission of the dance. Other candidates for White Rose Queen were Catherine Clements, Sharry Erickson, Barbara Morgan, Linda Warren, Sharon Cochran and Mary Ann Pippin.

Techsan's Mother Selected Paducah Woman of the Year

PADUCAH, Tex. (AP) — Care for nine children, four of them helpless with muscular dystrophy, in crowded quarters? Mrs. E. W. Hollar has done it.

Mother of Donald Hollar, known as the famous masked Red Raider who rides Tech Beauty and leads the Tech football team onto the gridiron, Mrs. Hollar has had for 24 years one or more of her children suffering from the crippling disease. They were unable to feed themselves or move about.

AT THE SAME TIME, she reared five healthy children. The family now lives in the sheriff's quarters at the jail in Guthrie. Her husband is King County sheriff.

In recognition of her patience,

cheerfulness in spite of odds, and devotion to her family, the Paducah Lions Club selected her recently as Woman of the Year.

She was showered with more than \$5,000 in prizes and cash.

THREE OF HER SONS, Jimmy, 16; Billy, 18; and Karleton, 20, have muscular dystrophy. Each weighs less than 100 pounds. They cannot care for themselves.

Another son, Luther, who also had the disease, died 10 years ago at 14.

DR. C. C. PATE said, "Her family is the only family in the entire world and medical history where four cases of progressive muscular dystrophy is found."

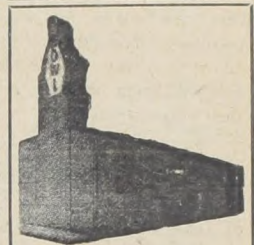

The other children are Gail, 8, and Douglas, 14, who both live at home; Donald, 21, a student at Tech; Gloria, a resident of Kingsburg, Calif.; and Wesley, a farmer near Guthrie.

... Modern Dance

dances from White and Negro spirituals and including a selection from the "Texas Hoedown" dance.

The group, under the direction of Anne Schley Duggan will hold an informal dancing class Tuesday (April 8) between two and three. No admission will be charged and it will be open to the public.

Tickets, one dollar per person, may be purchased at a booth in the Tech Union, from members of the Tech Major-Minor Club or the Tech Modern Dance Group. Ticket reservations can be made by calling Ext. 457 or 389.

Leeta said she followed her "kitty cat" up a ladder to the roof of her home. Then she dropped her ball down the chimney and went after it.

She was unhurt but her sister, Wanda, said, "She's in bed for the rest of the day."

Aircraft in Error

BRIDGEPORT, Tex. — A Civil Aeronautics Administration spokesman said Friday that one or both of the two Air Force planes that collided and crashed Thursday "obviously were at the wrong assigned altitudes."

All 18 servicemen aboard the two aircraft were killed.

Bruce Chambers, public information officer of the CAA office in Fort Worth, said one plane should have been flying at 7,000 feet. That was a huge Globe-master carrying a crew of 10 and 5 passengers.

Chambers said the other, a cargo plane carrying a crew of 3, was assigned to 8,000 feet.

Travelers Present Foreign Dance Show

"Trip the Light Foreigntastic", a program of exhibition and instruction of unusual foreign dances, will be held at 7 p.m. Tuesday in the Tech Union Ballroom.

Tech foreign students will perform several Latin American dances and give lessons in dances such as the mambo, samba and tango. Servando Trevino will provide the music.

The World Travelers Committee is sponsoring the program free of charge. Mickey Dulaney is in charge of the event, and Martha Mack is chairman of the committee.

ACC Slams Raider Baseballers, 21-1

DAVE BOURLAND, Raider from Abilene, had a "cold" homecoming yesterday, as ACC downed Tech 21-1, Bourland went 0 for 3.

Frosh Too Early—Game Set Today

ODESSA, March 27 (Special)—Due to a misunderstanding in the scheduling of the contest, Texas Tech's Picador baseball team arrived "a day too soon" for their scheduled match with the Odessa College nine, but the two teams will definitely play here tomorrow.

The Techs were under the impression that their game was to be played Friday, but upon arriving, the Odessa team was unprepared to play, having the game on their schedule for Saturday.

Coach John Ortosky's team will be trying to avenge their lone loss of the season, a 12-10 defeat at Lubbock in the season opener.

ABILENE, March 28 (Special)—The Abilene Christian College Wildcats, aided by numerous walks and errors by the visiting Red Raiders from Texas Tech, clawed their way through four Raider pitchers for a 21-1 victory in the opener of a two-game set here today.

Sophomore Billy Tombs, who had pitched a two-hitter in his last

start for Tech's only win this season, got off to a bad start by walking the first four batters to face him, and the Wildcats, thanks also to four Tech errors, got off to a six-run lead.

THOSE INITIAL six runs by ACC were scored with only one hit to aid their cause.

ACC scored another run in the second, then nopped on Tech's reliever, Charles Flanagan, for eight more runs in the fourth, aided by five bases-on-balls and two errors.

Tech's only run came in the top of the sixth, when Gehrig Garrison singled, advanced on Bill Dean's one-baser and came home on Warren's singleton. Jackie Miller ended the rally by slapping into a double play.

ASIDE FROM this mild uprising, Wildcat hurler Howard Adams had the Raiders eating from his hand all the way, allowing only five hits by the Techs, being backed up by errorless play by his mates.

First-sacker Bill Dean, who was unable to play in the Raiders' openers last week, led the Techs at the plate with two-for-three. All of Tech's hits were singles.

FOR ACC, second-baseman Armstrong was the big gun, hammering out a home run and a triple in four trips to drive home four runs.

Tech's all-sophomore pitching admittedly receiving poor backing afield, still could not rise to their showing last season as freshmen. Besides Tombs, Raiders who paraded to the mound were Bruce

Boyd, Flanagan and Lawrence Barber.

ALTHOUGH PLAYED in comfortable 65-degree weather, the game was hampered by intermittent rain and wind that made fielding hazardous.

The two teams wind up the series Saturday, with Tech Coach Beattie Feathers scheduled to send veteran Houston Powell to the hill. Powell lost his first start last week to Hardin-Simmons. Tech now is 1-2 for the year.

Test your personality power

(Taboo or not taboo—that is the question)

1. Do you feel unqualified to judge a campus beauty contest? (For men only!)	YES	NO
2. Do you think going to a big party the night before is the best way to overcome pre-exam jitters?		
3. Do you find the company of the opposite sex annoying?		
4. Do you think fads and fancy stuff can give you the full tobacco flavor of a real cigarette?		
5. Whenever one of your professors makes a grammatical error, do you call it to his attention?		
6. Do you and your date sit in the back row of the balcony only because you're both farsighted?		
7. Do you think cowboy shows will ever be banned from television?		
8. Do you consider Ibid, the most quoted Latin author?		

R. J. Reynolds Tobacco Company, Winston-Salem, N. C.

If you answered "No" to all questions, you obviously smoke Camels — a real cigarette. Only 6 or 7 "No" answers mean you better get on to Camels fast. Fewer than 6 "No's" and it really doesn't matter what you smoke. Anything's good enough!

But if you want to enjoy smoking as never before, switch to Camels. Nothing else tastes so rich, smokes so mild. Today more people smoke Camels than any other cigarette. The best tobacco gives you the best smoke. Try Camels and you'll agree!

Tech's Relay Hopes Are Jolted

By LEE SULLENGER

Texas Tech's point hopes in the 31st annual Texas Relays received a severe jar when sprinter Johnny Henderson was scratched from any races because of a pulled leg muscle.

Henderson was a tower of strength in the 880-yd. and mile relays. Two of Tech's strongest events.

HENDERSON PULLED a muscle in his leg Tuesday and later had to use crutches to get around. The leg did not respond quickly enough to treatment for Henderson to run Saturday. Henderson was able on Thursday to run at three-quarter speed, but Coach Delmer Brown decided not to risk his running at full speed for fear of injuring the muscle worse and losing Henderson for

the season.

Now composing the 880-yd. relay is E. H. Davis, Tommy Davis, Doyle Herring and Tommy Patterson. Patterson will run the anchor lap in Henderson's absence.

Tech's 440-yd. relay team is composed of the same above men and they have run the event in 41.4, which might be fast enough to place at the Austin tournament.

IN OTHER EVENTS, W. L. Thornton may place high in the high jump, with SMU's Don Stewart. Tommy Patterson will be a threat in the low hurdles, but Tech is not expected to be strong in the high hurdles, where mid-semester failures have hurt the Raiders.

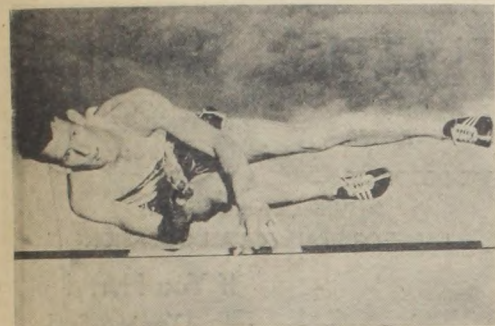

The Relays will feature many of the outstanding track stars in the United States. Abilene Christian's fabulous Bobby Morrow will be entered in the 100-yd. dash, as well as Bill Woodhouse and James Segrest of ACC, and other standouts in the dash.

Also participating in the Relays is Don Bowden of California, the only American to break the 4-minute mile. Quartermiler Eddie Southern and miler Joe Villareal of Texas are competing. Oklahoma University's Gail Hodgden of South Africa is entered.

SCHOOLS FROM all over the West and Southwest are competing in the relays. Entered are Abilene Christian, Baylor, California, Colorado, Drake, Houston, Iowa State, Kansas State, Kansas, Marquette, National Polytechnic Institute of Mexico, Nebraska, North Texas State, Ohio State, Oklahoma State, Pacific Lutheran, Pan-American, Rice, SMU, Stanford, Texas A&M, Texas, Wichita and Oklahoma.

The freshman team is expected to be among the leaders in the junior college-freshman competition, with strong opposition coming from Texas and Houston.

Quartermilers Curtis Hart and Don Oster, Texas and New Mexico state champions respectively, will give strength to the Picadors in the 440-yd. dash, and sprinter Johnny Janak is also a threat. Webb Corbin and Charles Draper are dangerous in the half-mile.

OVER THE TOP goes Tech high-jumper W. L. Thornton of Aspermont, who will be counted upon heavily for points by the Red Raiders at the Texas Relays today in Austin.

'Mural Baseball Standing Vague After One Week

It's too early yet to tell much about how the teams are going to stack up in intramural baseball, after only one week of play, since most teams have played only one game.

The Fraternity League is the only one in which teams have played more than a single game. In that circuit, three teams, Phi Delta Theta, Phi Kappa Psi and Phi Gamma Delta, have won both of their games for a good start. The complete intramural standings:

FRATERNITY LEAGUE:

Team	Won	Lost
Phi Delta Theta	2	0
Phi Kappa Psi	2	0
Phi Gamma Delta	2	0

200 Visitors Expected For Tech 'Feeder Day'

by **MARJAYNE DYKES**
Agriculture Dean W. L. Stangel will welcome an anticipated group of 200 visitors on Tech's annual Cattle Feeders' Day, April 1.

The opening session will begin at 10 a.m. in Aggie Memorial Auditorium. Graduate student Tom Neff of Colorado City will announce final results in Tech's 31st annual cattle feeding experiment. Feeders Day participants will then visit the experimental lots.

THREE LEADERS in livestock research who will address the visitors are Dr. Wise Burroughs, animal nutritionist from Iowa State College; Dr. R. D. Lewis, director of the Texas Agricultural Experiment Station, College Station; and William J. Waldrip, range specialist with the Texas Agricultural Experiment Station at Spur.

The purpose of 1957-58 experiments is to test the effectiveness of fattening cattle by feeding loose and pelleted cottonseed hulls

with various additives. These experiments are a continuation of 1956-57 tests during which period calves were used.

In the latest tests, yearlings are being used because they have greater capacity for utilizing cottonseed hulls, Stangel reports.

FOR THE PAST three years, Tech's cattle feeding experiments have been conducted in cooperation with the Texas Agricultural Experiment Station.

Neff has been conducting the feeding experiments under the direction of Stangel and Dr. N. C. Fine, animal husbandry department head. Neff has a Texas Cottonseed Crushers Assn. fellowship in connection with the work.

For the 1957-58 tests, 80 yearlings are divided into eight lots of ten. Lots one through four are being fed loose hulls and lots five through eight, pelleted hulls. All lots are receiving eight pounds of crushed milo grain and two pounds of cottonseed meal per

head per day.

ALL LOTS except four and eight receive two pounds of alfalfa hay per head per day. Cattle in lots four and eight are receiving like amounts of synthetic alfalfa (the equivalent of natural alfalfa in minerals, vitamins and proteins.)

Hulls are fed according to appetite in all lots. Each lot is receiving one-tenth pound of calcium carbonate per head per day. Lots two and six are receiving hormones and lots three and seven are being given hormone plants (under skin with needles).

At the beginning of the experiments, cattle in all lots averaged 768 pounds per head in weight. Stangel announced the following preliminary results at the end of 112 days in the feeding experiment:

AVERAGE WEIGHTS per animal—lot one, 1,041; lot two, 1,073; lot three, 1,061; lot four, 1,018; lot five, 1,041; lot six, 1,064; lot seven, 1,083; and lot eight, 1,054. The tests will be concluded March 28.

After visiting the lots, visitors will be guests at a noon barbecue in the Tech livestock judging pavilion. Local business firms are sponsoring the luncheon.

Dr. E. N. Jones, Tech president will open the next session at 1:15 p.m. in the Aggie Auditorium, and at this time the three specialists in the cattle industry will speak.

Progress in range research for cow-calf operations on rolling plains will be discussed by Waldrip. Lewis will describe current cattle research studies in Texas and Burroughs will speak on new horizons in beef cattle feeding.

... Giesecke to Germany

He spent a year in graduate study at the Phillips University in Marburg/Lahn, Germany.

His second visit to Germany was on more official business. During World War II he was stationed in Germany where he served with the U. S. Naval Technical Intelligence. He received special commendation from the Navy for this service.

DR. GIESECKE, a native Texan, received his B.A. at Stanford University, studied a year abroad and then continued his graduate studies at Stanford. He was awarded his M.A. in 1934 and his

Ph.D. in 1939.

Giesecke came to Tech as academic vice president in 1953. He is a member of the Texas Advisory Committee on Conservation Education, a body appointed by the State Board of Education.

He is also a member of the Lubbock Chamber of Commerce and of the board of directors of the West Texas Chamber of Commerce.

He is initiator and chairman of both the Foreign Visitors Committee of the Lubbock Chamber of Commerce and the Lubbock Mayor's Committee on the Young Citizen and the Ballot.

... April Fool Draws Near

employees are ineligible.

Merchants and the prizes they are contributing are Brown's Varsity, shirt; Bray's Campus Toggery, matching shirt and Bermuda shorts combination; Red Raider Barber Shop, shampoo and massage; Book and Stationery Center, stuffed animal; Varsity Book Store, stuffed Red Raider bull; Campus Book Store, a novel of your choice; and Broadway Drug, aftershave lotion and foam shave for a man or lipstick and cologne for a female.

Avalon Studio, 8x10 portrait;

Dr. Pepper, portable ice chest; Portwood Garage, front end alignment and wheel balance; Bob's Cafe, chicken dinner for two; Aztec Inn, dinner for two; Howard's Watch Repair, watch band and Dom's Ltd., pair of slacks.

Most of the prizes are for men, but girls' don't let this stop you from entering. Doesn't your father or friend of the opposite sex have a birthday soon?

Or maybe this is the way to get a man, just stand back and let them fight to see who will take you out to a free dinner.
