## Third 'Carol Of Lights' Features Color, Beauty

Vol. 39

Lubbock, Texas, Tuesday, December 3, 1963

No. 52

By CAROL LEE PAGE

Toreador Staff Writer

In a few hours, the Texas Tech campus will be transformed into a wonderland of color and song. The gladness and joy of Christmas will erase, at least for a moment, the somber, gray sadness of last week as Techsians welcome the season with the third annual Carol of Lights.

At 6:45 p.m. Richard Tolley's brass choir will begin the ceremony with selections of Christmas Carols. Linda Hill, president of Women's Residence Council, will make introductions of special guests and dignitaries at 7 p.m., and Carolyn Kelly, AWS president, will give the invocation.

The campus will be engulfed in total darkness. As the brass choir reaches the peak of its fanfare, the transformation will be complete—16,500 red, yellow, and white Christmas lights will set nine buildings ablaze with color. Almost immediately, Dr. Gene Hemmle will begin "Joy to the World." It is at this moment that everyone will know—the Christmas season is here!

Doak Hall will lead the Carol Cavalcade with "The Carol of Drums." The West Hall mixed choir will follow with "Hark the Herald Angels Sing." "O Holy Night" will be Drane Hall's contribution. Knapp and Gordon halls have combined to sing "Silent Night." Sneed Hall will follow with "God Rest Ye Merry Gentlemen."

Two medieval carols, "Two Kings" and "Fum, Fum, Fum," will be sung by the Tech Choir under the direction of Mr. Gene Kenney.

"White Christmas" by Women's Hall 6 and Bledsoe Hall will be next on the program, followed by "Jolly Old St. Nicholas" by Women's Hall 7 and Thompson Hall. Horn Hall with "Once in Royal David's City" and Weeks Hall singing "O Christmas Tree" will round out the dorm Choir program.

Linda Hill will introduce Dr. Hemmle to lead the whole group in singing "The First Noel," "O Little Town of Bethlehem," "O Come All Ye Faithful," and "Jingle Bells." Following Miss Hill's concluding remarks, the Tech Choir will complete the program with "We Wish You a Merry Christmas."

The lights will again outline nine campus buildings.

The program will be centered in the Science Quadrangle.

In addition to the lights, decorations will include over a thousand luminarios lining the approaches to the campus and a huge evergreen Christmas wreath, forming the background for the choirs.

Since the Carol of Lights idea was originated in 1959 by Board of Directors member Harold Hinn, the lights have been expanded to their present number—16,500 lights placed every 16 inches on almost five miles of wiring. It was Mr. Hinn's idea that several buildings be a solid color, hence the red lights on the Journalism Bldg. He would like to see the Museum in all blue lights in the future.

At present, the buildings outlined include the Ad Bldg., Chemistry, Science, and Social Science Bldgs., East, West and Textile Bldgs., and the Journalism and Home Economics Bldgs.

Women's Residence Council, sponsor of the Carol of Lights, is being aided by Alpha Phi Omega and the Saddle Tramps with luminarios and public address systems.

A dinner preceding the ceremony will honor administrative officials and dignitaries who helped in some way with the Carol of Lights. Following the program, Tech Union and AWS will serve refreshments to the general public in the Union.

Motorists desiring to view the Carol of Lights ceremony are requested to leave only their park lights on since headlights tend to detract from the colorful setting.

THAT TIME AGAIN — Becky Parker, Sadinal junior, emphasizes the spirit that fills the campus of Texas Tech, as she writes—in a rather unusual manner—"Carol of Lights." The annual affair, to be

held today at 7 p.m., denotes the coming of the Christmas season to Texas Tech. It is the third annual such shindig, and is sponsored by WSO.

## Symphony Orchestra To Visit Old Mexico

Texas Tech's Symphony Orchestra will tour Mexico March 28-April 4.

The invitation, extended by Rafael Gaona of Mexico's National Institute of Fine Arts, was formally accepted Nov. 26 by President R. C. Goodwin.

At the meeting with Dr. Goodwin were Dr. Walter O. Parr and Francisco Gonzalez of Good Neighbor Project, Inc., and Tech Symphony Conductor Paul Ellsworth.

### Include Three Concerts

Tentative plans include three concerts in Mexico City, one in Monterrey and one in either Puebla or Cuernavaca.

Private funds will be solicited to make the trip possible. Ellsworth announced the Symphony will conduct a benefit concert Feb. 21 to aid in financing the trip.

### Funds Needed

Funds are needed for travel and other expenses. Mexico's National Institute will pay expenses in cities where the symphony performs.

Incentive for the invitation came from Hector Montes de Och, Mexican pianist, who played a concert at Tech and heard the Tech Symphony while here.

Tentative plans call for the 73-piece symphony to travel from Lubbock to Monterrey by bus March 28. March 29 is the date for an Easter Concert at Monterrey Tech. Travel will be by air to Mexico City March 30.

### Concerts Named

During March 31-April 3, concerts are planned at Mexico City's 13,000-seat national auditorium, the National University of Mexico, the National Polytechnic Institute and at Puebla or Cuernavaca.

April 4 the symphony will fly to Laredo and travel from there to Lubbock by bus.

Instrumental in communications between Tech and the Mexican government are two Good Neighbor Project officials, Dr. Parr, executive director, and Gonzalez, program coordinator.

## Traffic Accident Injures Students

Two Tech students still remain in critical condition Monday afternoon following a three-car smashup Wednesday near Goldthwaite in central West Texas.

Officials at Providence Hospital in Waco told THE DAILY TOREADOR that Gail Ernestine Scales, Gonzales senior, and Cheryl Terry, 20-year-old Lubbock junior, were unconscious and listed in critical condition.

Both Tech coeds have undergone surgery but have not gained consciousness since the accident, the officials reported. The extent of their injuries was not made public. Stanley Newding, 20-year-old junior from McAllen was reportedly taken to Goldthwaite in critical condition. His present condition is not known.

Other Techsians in the accident are listed in serious but not critical condition at Childress hospital. They are Gay Goodman, 19-year-old junior, Pecos, and Edith Ann Scratchley, 19, San Antonio junior.

All the Tech students were traveling in the same automobile on their way home for the Thanksgiving holidays. Lubbock addresses of the students are: Gail Scales, Dorm 6; Cheryl Terry, 4608 39th; Stanley Newding, 354 Sneed; Gay Goodman, Dorm 7; Edith Ann Scratchley, 103 Weeks.

Also hurt but not seriously was Robi Bendorf, 18-year-old University of Texas student from Breckenridge.

Bendorf was in one car and the other five were in a second vehicle. The occupants of the third automobile were not hospitalized.

# Tech Takes National Crop Judging Honors

Tech's crop judging team won the International Collegiate Crop Judging Contest in Chicago Saturday, breaking their own record set last year.

The team, composed of Mac Bartee, senior from Clovis; Jimmy Pearson, senior from Happy; Danny Martin, senior from Hereford; and John Walter, junior from Lubbock as alternate, was coached by Cecil Ayers, professor of agronomy.

The Tech team scored first in identification with 1,779 points, second in seed analysis with 1,763 points, and tied for first with Okla-

homa State in commercial grain grading with 1,762 points.

Individual ratings were: Pearson second with 1,784 points; Bartee, third with 1,788.8 points; and Martin, seventh with 1,762 points.

Grain grading high individuals included Martin, fourth; Bartee, seventh; and Pearson eighth. Pearson and Martin, with a perfect score of 600, tied with the Colorado State contestants for first place in identification. In seed analysis, Pearson tied for first, Bartee ranked fourth and Martin placed twelfth.

Colorado State placed second followed by Oklahoma State, Minnesota, Kansas State, Penn State and the University of Wyoming.

Tech won the National Contest at Kansas City last Tuesday. They scored 5,324.8 out of a possible 5,400 points, topping their old score by two points.

SUMROENG VICHITLEKARN

# Peace Corps Goes Big In Thailand

Sumroeng Vichitlekarn, a native Thailander employed by the United States Information Service in Bangkok, addressed Tech journalism students at noon Monday in Tech Union.

He described his job as film distribution supervisor with the Information Service and answered questions about his country and American-Thailand relations.

The information assistant described the Peace Corps as "the best and most effective group representing America overseas."

He said that two Peace Corps groups had served in Thailand, teaching people, helping people and even giving up their free time to continue their good job.

"The people loved them so," he continued, "that when their tour had ended the Thailand government requested the U. S. government to extend the group's time in the country."

Vichitlekarn has been in this country two months. He came with a group of 12 USIS employees from nine countries who selected the cities they wanted to visit.

"Most of them wanted to go to the big cities, but I wanted to go to a smaller place, so someone in Washington suggested Lubbock," he said. "I have found the people here very friendly and very nice."

He described the USIS, with offices in 96 countries, as the public relations office of the U. S. government. He said the office in Thailand works well with the country's local government.

He added that Americans in the diplomatic service do a good job in knowing people in Thailand, traveling a lot and meeting all the people they could.

"People don't carry anti-U. S. signs in my country," he said proudly. "We all get along very well."

The visitor was asked several questions regarding the recent assassination of President Kennedy, and the probable attitude of his

people toward President Lyndon Johnson.

"I don't know what your people thought of President Kennedy, but our people loved him; they thought he was a very wise man," he said softly.

Vichitlekarn, a former Thai police agent, speculated that the bizarre slaying of accused assassin Lee Oswald in Dallas jail could have happened in any country.

# Placement Interviews Continue

The Tech Placement Service announces the following organizations will have representatives on campus December 9 through 13. Appointments may be made in the Placement Service Office in the West Engineering Building, room 252.

**Monday, December 9**  
Pittsburgh Plate Glass Co. will interview Accounting majors.

U.S. Navy Area Audit Office will interview Accounting majors.

Prentice-Hall, Inc. will interview Agriculture, Arts and Sciences, Business Administration, Engineering and Home Economics majors.

National Aeronautic & Space Administration of the Langley Research Center will interview Chemical Engr., Electrical Engr., Mathematics, Mechanical Engr. and Physics majors.

Minneapolis-Honeywell Regulator Co. will interview Electrical Engr., Engr. Physics, Mathematics, Mechanical Engr., Physics and Chemistry majors.

Oklahoma Natural Gas Co. will interview Chemical Engr., Civil Engr., Electrical Engr., Industrial Engr., Mechanical Engr., and Petroleum Engr. majors.

The National Supply Co. will interview Marketing, Retailing, Advertising, Economics, Agricultural Economics, Mechanical Engr., Petroleum Engr., and persons with other majors.

Pratt & Whitney Aircraft will interview Chemical Engr., Electrical Engr., Mechanical Engr., Physics, Engr. Physics and Chemistry majors.

**Tuesday, December 10**  
Immigration and Naturalization Service will interview Government, History, Agriculture, Arts and Sciences and Business Administration majors.

Melpar, Incorporated will interview Biology, Botany, Chemistry, Electrical Engr., Physics and Zoology majors.

Allis-Chalmers Manufacturing Co. will interview Agricultural Engr., Civil Engr., Chemical Engr., Electrical Engr., Industrial Engr. and Mechanical Engr. majors.

**Tuesday and Wednesday December 10 and 11**  
United States Air Force will interview all majors.

**Wednesday, December 11**  
Federal Pacific Electric Co. will interview Electrical Engr., Industrial Engr. and Mechanical Engr. majors.

Murphree, Unruh, Phipps, Anz will interview Accounting majors.  
City of Garland will interview Electrical Engr. majors.

**Wednesday and Thursday December 11 and 12**  
Hughes Tool Co. will interview Marketing, Advertising, Retailing, Mechanical Engr., Petroleum Engr. and persons with other majors.

Dowell, Inc. will interview Chemistry, Geology, Mechanical Engr. and Petroleum Engr. majors.

**Thursday and Friday December 12 and 13**  
General Electric Co. will interview Chemical Engr., Electrical Engr., Industrial Engr., Mechanical Engr. and Engineering Physics majors.

**Friday, December 13**  
The Upjohn Co. will interview Marketing, Retailing, Advertising, Bacteriology, Botany and Zoology majors.

Frazier and Torret will interview Accounting majors.

United States Department of Agriculture will interview Accounting, Economics, Finance, Management, Civil Engr., Agricultural Economics and Range Management majors.

# Government Offers Jobs

Representatives of the Federal Career Service will be at the Placement Service Office Wednesday for individual interviews. The Federal Government offers opportunities for graduates of all schools.

According to Louis S. Lyon, Regional Director for the Dallas Region, U. S. Civil Service Commission, the representatives are prepared to answer questions and advise students on career opportunities in the Federal Service.

## Tech's Opera Theater Sings Mozart's Opera

Texas Tech's Opera Theater will present a one-night performance of Mozart's comic opera "The Marriage of Figaro."

The opera marks the first time the theater has given a full-length standard opera. "It is a pleasure for us to work on an opera of the quality and entertainment value of 'Figaro'. Such an undertaking is possible only because of our resources of student vocal and instrumental talent at Tech," Charles Lawrie, Opera Theater director said.

It has for the last two seasons, we intend to make full-length popular opera an annual campus event," said Lawrie. The company will use a specially revised English translation. A synopsis of the story of the opera is available from the music department without charge. The production will be presented with the cooperation of the Tech Symphony Orchestra, conducted by Paul Ellsworth. Performance time is 7:30 p.m. Friday in the Municipal Auditorium. Admission is free.

## KTXT-FM Triples Transmitting Radius

By CAROLYN SLAUGHTER  
 Toreador Staff Writer

Tech's campus radio station KTXT-FM passed another important milestone during the Thanksgiving holidays, when it enlarged its transmitting radius from three miles to approximately ten miles.

Monday, at 12 p.m., when KTXT-FM opened its broadcast day, after five days off the air, it was transmitting from its new antenna located on the KTXT-TV tower on the west tech Campus. That initial broadcast marked the culmination of a year of planning and work by the radio division of the speech department.

**THE ACTUAL** moving of both the antenna equipment and the transmitter from the old location in the speech department building to the new location at the TV tower site, was accomplished by Tech students under supervision of Lorton Trent, the station's chief engineer, and a senior physics major from Lubbock.

**INTERMITTENT** tests were run during the transfer period, with extensive tests beginning on Saturday evening. Tests, to date, indicate that the station has more than tripled its coverage area. Excellent reception has been reported from Reese Village, Shallowater and New Deal.

Periodic checks of station reception will continue until the Christmas holidays. This period will also be used to test the reaction of the new audience to the current type of programming. Audience reaction will be used to determine the new program format to start in January 1964.

**THE NEW** antenna consists of two circular elements spaced approximately twenty-two feet apart. The two elements are mounted on the northeast leg of the KTXT-TV tower. The use of two elements on the new antenna nearly doubles the wattage output of the station. The

old one element antenna had an output of ten watts of power. The new two element antenna will have nearly twenty watts.

The new transmitter is located in the Agricultural Maintenance Bldg. adjacent to the TV tower. ↓

## To Crop Judging Team

# Our Hats Off!

Tech's crop judging team did it again.

For the second year, the four-member team has won the International Collegiate Crop Judging Contest. Again Tech's team has broken the record. However, this year Tech broke its own record.

Mac Bartee, Jimmy Pearson, Danny Martin, John Walter and Cecil Ayers, coach, have brought honors and recognition to the School of Agriculture and to Tech by their outstanding performances.

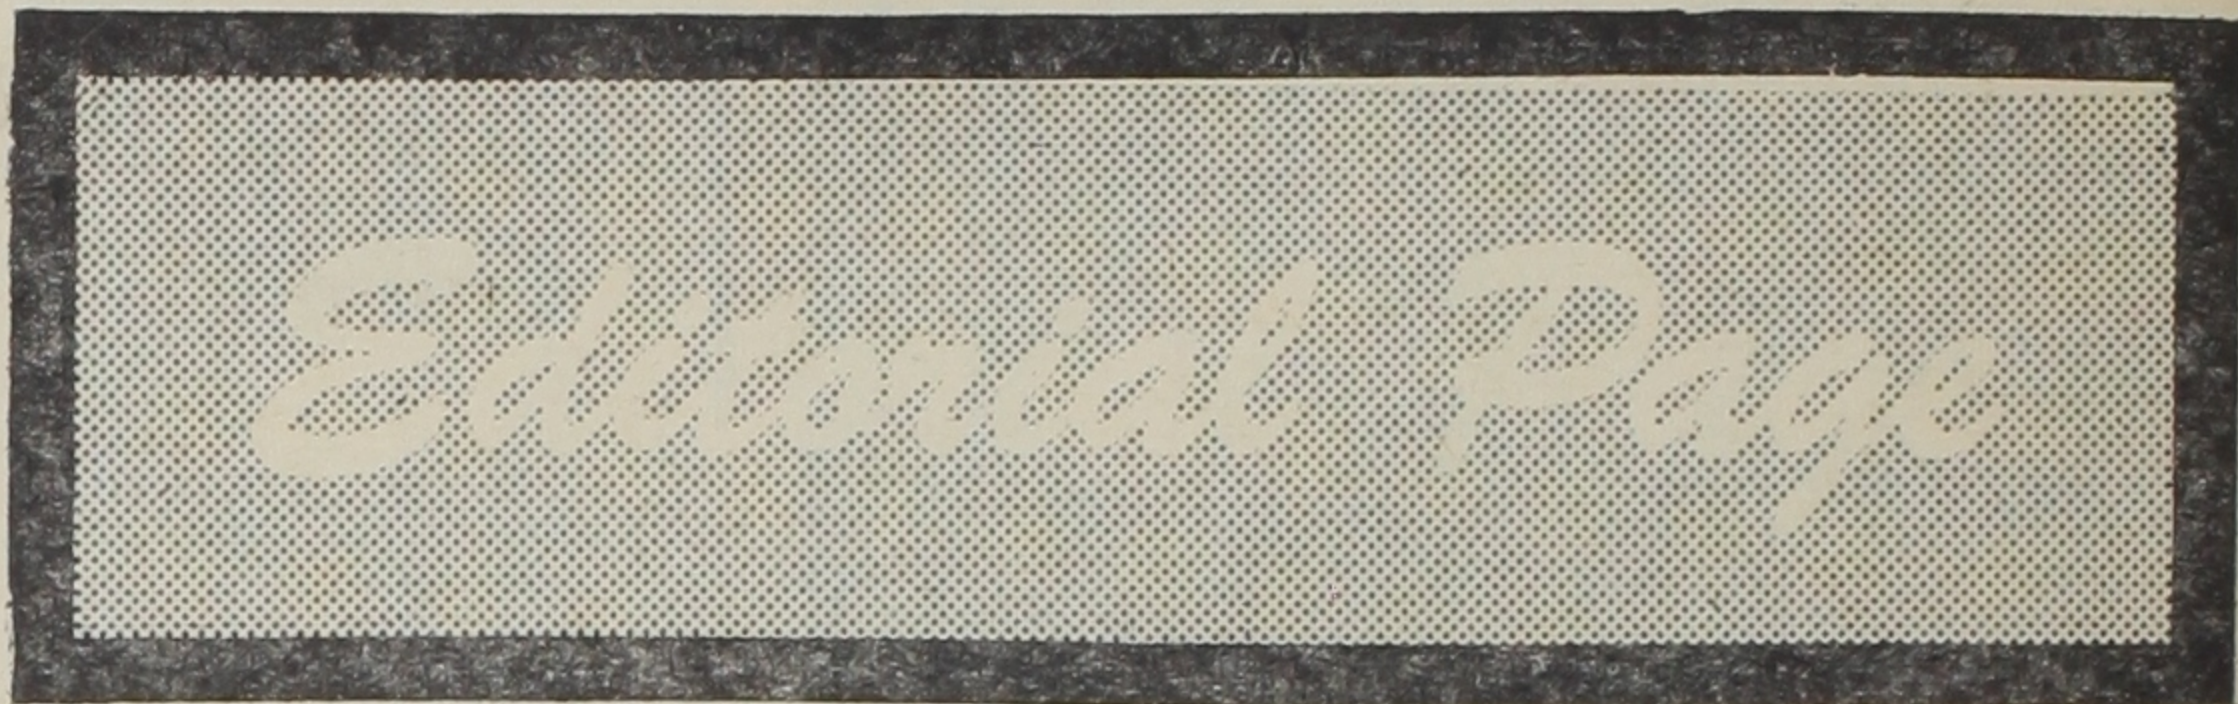

Before winning in the Chicago meet, the team won the National contest at Kansas City, breaking its old record in that event.

Each year the School of Agriculture has numerous judging teams who compete in national meets with teams from across the United States. By continuously winning in these meets, the School of Agriculture spreads the fame of Tech as a leader in the agriculture field.

The crop judging team has a history of wins. The Techsans on the team at the Chicago meet surpassed teams from Oklahoma State, Minnesota, Kansas State, Penn State and the University of Wyoming in the final rounds. Tech's honors were reported by the news media here and in other parts of the nation.

For bringing such recognition to Tech, the team members and the professors who helped them well deserved our praise and support.

—Bronson Havard  
News Editor

THOUGHT FOR TODAY: *The cause, not the battle, is more important.* —G. M.

# Gov's Committee Studies Higher Education

(EDITOR'S NOTE: This article appeared recently in the THE DAILY TEXAN at the University of Texas. It explains the function of the Governor's Committee on Education Beyond the High School.)

On July 4 of this year, the Governor's Committee on Education Beyond the High School met for the first time. It has been working ever since, aiming for an August, 1964, deadline. The committee was formed due to concern of leaders in Texas education, government, and business about certain aspects of higher education in the state. The objections boiled down to a lack of proper coordination and effective long-range planning.

The urgency of the situation was expressed by Sen. Walter Richter, who sponsored the bill creating the committee. He said, "If we don't act within a year or two, we'll be in real difficulty. We don't have enough dollars to provide education in a 'helter skelter,' disorganized educational system. We cannot afford to lose our best resources to other states."

Sen. Richter, who worked closely with Gov. John Connally in an effort to create the committee, has stated that the idea for making a study of Texas' institutions of higher education originated with the Governor himself.

When Connally was Secretary of the Navy, he became amazed at the small number of government contracts for defense and space research given to Texas colleges. Upon later investigation, he discovered that the bulk of these contracts were concentrated in three states—California with 41.3 per cent, New York with 12.1 per cent, and Massachusetts with 5.7 per cent. Texas was receiving only 2 per cent.

### Lack Facilities

Why has Texas been receiving such a small number of government contracts? The simple explanation comes from Defense Secretary Robert McNamara. "The Department of Defense," he said, "seeks the best brains and goes where they are." Connally discovered that Texas was lacking in the proper research facilities and libraries for production of the caliber desired by the government.

So, upon becoming Governor, he decided to attempt a solution to the problem and thus suggested the origination of a bill creating a committee to solve Texas problems in higher education. With the help of Sen. Richter, the 58th Legislature created and financed the Governor's Committee on Education Beyond the High School. It is composed of 25 Texas citizens, and according to Sen. Richter, "This will not be just another committee and just another study that'll soon be shoved aside."

Gov. Connally shares Richter's favor. In a statement to the committee, he said, "Certainly the task of this committee is a tremendous one. We need an overall view and strategy for the educational enterprise of the state, one that is for all education beyond the high school, one that utilizes all the educational resources, public and private at all levels, one that is adequate to meet the needs of all Texas."

To facilitate the work of the committee as a whole it was divided into seven subcommittees:

- Standards
- Goals
- Growth needs and enrollment
- Technical improvement
- Role and scope of existing colleges and universities
- Educational progress and curriculum
- Non-teaching functions.

The subcommittee on goals has spelled out six goals, and the committee has stated that its immediate concern is the development of a plan that will properly and effectively meet the first three which are:

- To provide thorough education beyond high school, and opportunity for every individual to achieve maximum development of his or her abilities.
- To accelerate the economic progress of Texas and its citizenship through education and research.
- To achieve a standard of excellence in higher education for Texas second to none in the nation.

The committee has already suggested several means by which the goals might be achieved. For example, it feels that Texas should develop a strong system of junior colleges and establish, in

conjunction with the junior colleges, strong two-year vocational, industrial, and technological programs. In this way, says the committee, the first goal mentioned will be achieved in large part.

Another step suggested by the committee is that of eliminating unnecessary duplication of curricula, facilities, and services in Texas' higher education. A more extensive use of educational television and operation of the universities and colleges on a year-round basis has also been suggested.

### Tell Public

Those are just a few of the ideas which have already been mentioned by the committee, but according to Sen. Richter, the committee will be to no avail unless the public is aware of their value and the urgency of the situation. In his estimation, the public must be informed as to why top-rated colleges and universities are important to Texas and Texans.

Why are they? According to the committee of the Governing Boards, top-rated schools are important for several reasons. First of all, in this age of technology, quality employes are essential in providing quality service, and the fine schools can provide this training.

Secondly, by acquiring the needed skills, Texas workers can qualify for better positions and higher wages. According to Dr. M. M. Chambers in "Chance and Choice in Higher Education," "all students of our industrial future are agreed there will be an insatiable demand for more and more men and women who are educated scientifically, professionally, and technically."

The Committee of the Governing Boards believes that Texas industry, properly fortified by a ready supply of skilled technicians and trained scientists, will be in a better position to expand and develop. They say that the oft-used expression "Industry follows brainpower," is supported by irrefutable evidence. Many of the space-related programs have by-passed Texans and have been located in states providing outstanding schools with top research facilities and personnel.

Another interesting point made by the committee is that the level of the education of a community relates directly to the level of buying. A case in point is the US Chamber of Commerce study of retail sales in Dallas and New Orleans.

### Increase Sales

In Dallas where the average citizen has the equivalent of a 12th grade education, retail sales averaged \$1,100 per capita compared to \$917 per capita in New Orleans, where the average citizen has only an eighth or ninth grade education. The Study concluded that New Orleans, by raising the educational level of its citizens to that of Dallas, could increase its annual sales by more than \$30 million.

But according to the committee, Texas has been losing ground in the average years of schooling completed by its citizens. The 1960 census shows that Texas stands 13th among the states in the average years of school completed by persons 25 years or older, but of even greater concern to the committee is the fact that 35 states gained more than Texas did in the past two decades.

The committee concludes that unless Texas starts providing quality colleges and universities our students will miss out on the best job opportunities, and many of the most outstanding high school graduates will leave the state to attend "quality" schools. Committee studies show that this already happens with distressing frequency. They also reveal that once the students depart to pursue their studies out-of-state they seldom return, and as Sen. Richter stated, Texas loses perhaps her finest natural resource.

Gov. Connally recently stated that "unless our nation produces more and better brainpower, our system of democratic government, our personal liberties, will soon perish."

At present, the Governor's Committee on Higher Education Beyond the High School is searching for a means of utilizing Texas' brainpower because it feels that the economy and the welfare of the people of Texas are suffering. It feels, as does Sen. Richter that in education as in business, quality is a necessary ingredient of success.

## Wool Contest Offers Trips

Expense-paid trips to the Caribbean and to Albuquerque, N.M., are among the prizes offered by the MAKE IT YOURSELF WITH WOOL contest.

Contestants from 60 West Texas counties will meet on the Tech campus Saturday to model wool garments. Approximately 150 contestants are expected to take part, according to Billie Wolfe, publicity chairman for the contest.

The contest, a national home-sewing event now in its 17th year, will be under the direction of the staff of the Department of Clothing and Textiles and is sponsored by the Women's Auxiliary to the National Wool Growers Assn. and the American Wool Council.

The major rules of the contest, according to Dr. Gene Sheldon, head of the Department of Clothing and Textiles, are that the garment must be made from wool loomed in America and that it must also be made entirely by the contestant.

## Off The Deep End

by Lyne

One of the things for which I gave thanks on Thanksgiving was the fact that I didn't freeze to death on the doorstep of my own home.

It seems hilarious to me now, but at the time that I was locked out of my own house until 6:30 Thanksgiving morning, I was cold, miserable, furious, frustrated and perplexed.

I came home from a date at 3 a.m. to find the front door locked. "Okay," I told my date, "we'll have to go around to the back door."

So we did. And it was also locked.

MAYBE YOU should come on over to my house, my date suggested uneasily.

"Nahhhhh," I replied breezily. "Someone will open a door for me pretty soon."

And so I sent him on his way and applied myself vigorously to banging on the front door.

Lights came on next door, but my own home might as well have been vacant.

The time had come for strategy. A brilliant idea hit me. I would

just hop into my father's car, turn on the nice, warm heater and listen to the radio until I could gain entrance to my own rightful abode.

IT MIGHT have worked, too, if his car hadn't been locked.

So I was forced to sit down on the doorstep, wrap myself inadequately in my thin coat and contemplate the situation.

I felt just like the poor little match girl.

First of all, it was unusual for the doors to be locked. It was even more unusual for no one to hear my racket, since my mother says she doesn't sleep at all until she hears me come in.

Then I began to worry. Maybe my family had been asphyxiated. Maybe they had departed on a spur-of-the-moment vacation.

After an hour had passed. I was numb with cold. Apparently the temperature even affected my mind, because I began to have hallucinations.

I SAW A vivid image of my father coming out to pick up the morning paper and finding his daughter pitifully dead on the porch.

At periodic intervals I wearily banged on the door, hoping that maybe this time would be my lucky one. I even walked around to my parents' bedroom and banged on the window a few times.

By this time, I had worked up a nice, fat anger. I didn't even have a match so that I could build a fire.

Finally the sun came up, and there I sat, hovering between life and death. I wondered if frostbite had set in yet, and I was sure that I saw chilblains all over me.

AT LAST I was livid with rage. I decided to make an all-out attack. I marched to the front door and beat, kicked and bit it as furiously as I could.

The door swung open. "Boo!" my mother greeted me genially, if sleepily.

"Whaddya have to do to get a door opened around here?" I demanded. "Drop a bomb?"

"Oh," my mother replied innocently, "I didn't even know the door was locked."

SOVIET AID WON'T HURT MOGADISHU, Somalia (AP)—Premier Abdirashid Ali Schermarke of Somalia says Soviet military aid to his country will not affect its policy of neutrality and friendly relations with the West. Any Western fears that Somalia is becoming a Soviet bridgehead in Africa are not justified, he asserts.

## ATO's Sponsor Annual Scholarship Cage Tourney

Alpha Tau Omega social fraternity will host a fraternity basketball tournament Friday and Saturday with benefits going into the IFC Scholarship Fund.

Tickets are \$1 and allow the purchaser to attend any of the games slated for the two day tournament.

16 teams, representing Tech's fraternities and other schools in the state will compete.

The teams are competing for the annually awarded Alpha Tau Omega trophy.

The highlight of the weekend will be the crowning of the ATO queen.

The proceeds of the tournament go into the IFC Scholarship Fund, aiding non-fraternity affiliated deserving students.

A trophy is also given to the fraternity with the greatest attendance for the games.

# Arkansas Refuses Athletic Integration

By ARTIE SHAW

Toreador Sports Editor

Texas Tech has postponed any decision until after the Southwest Conference Athletic meeting on Dec. 13 and the University of Arkansas Board of Trustees apparently ruled out any possibility of recruiting Negro athletes, as the integration of athletics in the SWC trudges slowly toward realization.

Southern Methodist University, the University of Texas, Baylor University and Texas A&M University have already approved full athletic integration.

Baylor, which just recently integrated its academic facilities, was not expected to integrate athletics so quickly.

Arkansas, which has never integrated to any extent academically and has never made any efforts to integrate athletically, has competed against integrated schools for some time.

After meeting in Fayetteville, the Board of Trustees at Arkansas issued the following statement:

"Changes in long-standing practices concerning integration of Athletics have been made at some of the member institutions of the Southwest Conference.

"The Board feels that there should be no changes in its present policy."

Arkansas Governor Orval E. Faubus told a press conference that he was opposed to integration of athletics at Arkansas. At least eight of the ten members of the Board were appointed by Faubus, who is an avowed segregationist.

Based on its past competition against integrated teams, Arkansas is not expected to withdraw from the conference because of the integration of the other schools although it will not recruit Negroes.

The University of Texas recent-

ly opened integration of SWC athletics when it announced it will recruit Negroes for its athletic program. SMU, A&M and Baylor quickly followed suit.

Texas Tech has refused to take a stand on the issue.

## Texas Retains Top Spot

By Associated Press

Texas and Navy held firmly to their respective Nos. 1 and 2 positions but the rest of the Top Ten underwent a lively shakeup Monday in The Associated Press' next-to-last college football poll.

The final vote to determine the 1963 national champion is scheduled next week after the important Army-Navy and Pittsburgh-Penn State games.

The Texas Longhorns, who completed a perfect 10-0 season on Thanksgiving Day with a 15-13 victory over Texas A&M, continued to top the rankings with solid support from throughout the country.

They drew 42 of the 51 first place votes from a special panel of sports writers and broadcasters for a total of 485 points. Navy got eight first place votes and the other went to Pittsburgh, which took over the No. 4 spot behind Illinois.

Illinois gained considerable prestige in beating Michigan State 13-0 for the Big Ten Conference title and a bid to the Rose Bowl, moving from eighth position to No. 3 in the list.

## Exciting Art First! Exclusively at

THE TEXAS TECH COLLEGE BOOKSTORE

Collector's Choice of the World's

# GREAT DRAWINGS

Reproduced in the Most Exacting COLOR and Detail

INCREDIBLE VALUE AT **1.00** each

LATEST WORD FROM the trend-setting art collectors and decorators . . . "Drawings are definitely IN! They have a charm all their own, add a warm, distinctive touch to any room and give endless pleasure." Now, exclusively at The College Bookstore we're first with the best color facsimiles of fine drawings and watercolors at this low, low price.

EVERY DRAWING in this fabulous collection is an acknowledged masterpiece — spontaneous, spirited . . . by Rembrandt, Durer, Goya, Degas, Cezanne, Picasso, and other masters. In fascinating combinations of pencil, ink and colored chalk; charcoal, sepia and crayon; wash and watercolor, pastel, tempera and other media. Beautifully printed on heavy, antique art stock — with all the delicacy and detail of the originals.

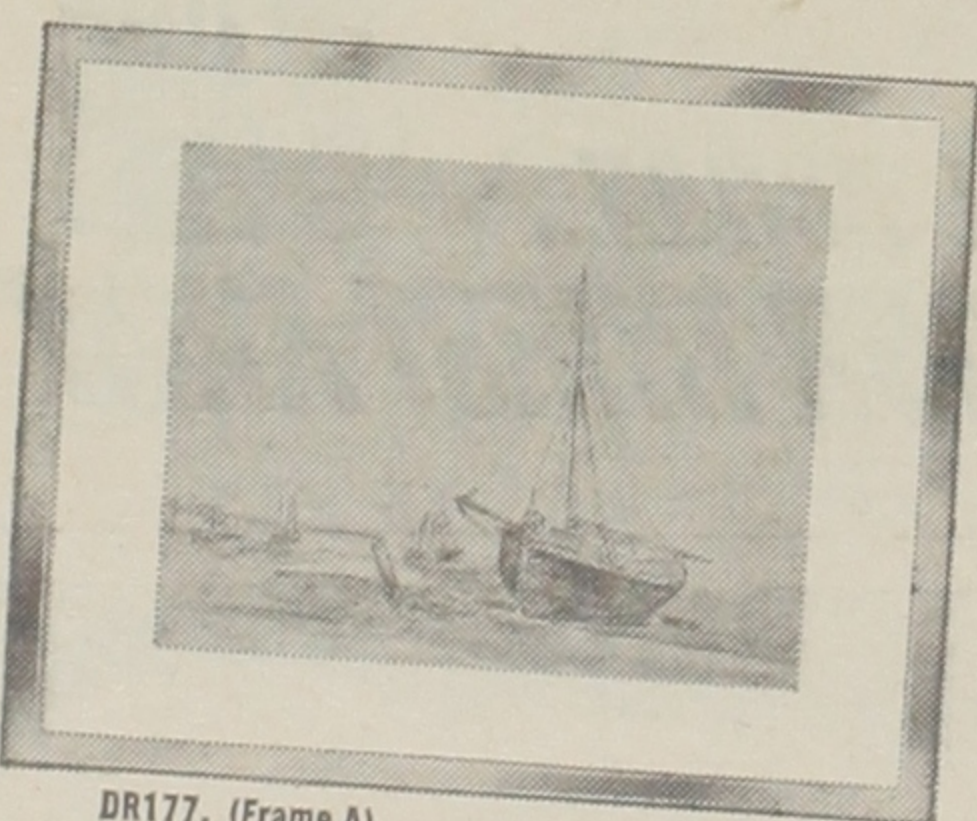

Choose from classic figure drawings and

marvelous portraits, from airy landscapes and bold modern lithographs. Each drawing comes in a folder that contains its own prefitted mat to save you effort and expense. Frame them and arrange them on your walls to lend sophistication to your decor.

Choice 14" x 18" subjects listed below may be ordered by mail or phone, or come in and see the entire collection including many in 12" x 16" size.

## FROM THE BENCH

by artie shaw

### somebody noticed

Thus far David Parks has been virtually ignored by the All-America selectors. TV Guide, which has one of the many All-America polls, only rated him third.

But yet, when the National Football League, the epitomy of football at its finest, drafted, Parks was the first player chosen. The San Francisco 49ers, in dire straits victory-wise, had the first choice and chose Parks over all other graduating seniors in the country. Why not Vern Burke, Jim Kelly, Mel Profit, John Simmons and Hal Bedsole? They all rated higher than Parks on the TV Guide list.

It just goes to show that somebody did notice the fine exhibition of football Parks has been putting on here on the Golden Spread for the past three years.

The 49ers weren't the only ones that wanted him—the Dallas Cowboys did too.

Parks, in my opinion, is the finest all-around lineman in the country's college ranks. It is gratifying to note that the San Francisco 49ers and Dallas Cowboys think so too.

### warn me, would you?

There is a fellow on Tech's hardwood squad who confuses even his teammates when he has the ball. Can you imagine what the opposition thinks of his antics?

It would appear obvious I am speaking of the little man from Atlantic City, New Jersey—Bill Murren.

The "Little Faker" set up enumerable scoring plays and led the Raiders in their attempt to upset powerful New Mexico.

When you watch the guy you sometimes wonder if anybody on the court knows what he's going to do next. He drives, shoots, fakes and passes as well as anybody in the game.

Murren, a favorite of the hometown fans, was one of four Raiders in double figures Saturday. Others were Norman Reuther, Glen Hallum and Harold Denney. Denney paced Tech with 19 points. Murren tossed in 16, while Hallum had 18 and Reuther tallied 12.

The 76-75 loss was a compensation of some sort for Raider fans, as it will be remembered the Lobos beat Tech, decidedly last year by a 90-66 count. They had the same team then as they have now, and ours has changed only due to Bobby Gindorf's departure. Put in this light, the one-point loss is encouraging, to say the least.

### to cheer or not to cheer

From the above sub-head you will undoubtedly think I'm going to talk about soaps. I'm not. I'm going to talk about Tech fans — the greatest fans in the world.

But, even the best of us have faults, and Tech fans are certainly no exception.

It is not sportsmanlike to yell, hiss, boo, cheer or make noise when a member of the opposing team is shooting a free throw. As a matter of fact, it is downright crase and rather immature. This type of action is not condoned by even the most competitive of the "win-however-you-can" school.

The free throw is a direct result of a misdemeanor by a member of your team, and is not to be looked on as something the man attempting the free throw should be ashamed of Fouls, good calls and bad, work both ways and average out over the long run. From the attitude of the persons present Saturday, it could have been concluded that the man at the line was some sort of a mellow-dramatic villian grabbing the mortgage from Polly Pureheart.

In a sense, when you boo or hiss the other guy at the foul line, you are booing and hissing your own team, because, a vast majority of the time, it was the fault of your own team he was there in the first place.

We've won the Sportsmanship Trophy of this conference a couple of times. Let's start acting like we want it back.

Scream and hollar when we have the ball and when we score, but not when the man is shooting. He deserves a little respect.

# Spunky Raiders Bow To KU Powerhouse

By CHARLES RICHARDS  
Toreador Managing Editor

LEXINGTON, Ky. — (Special) The Kentucky Wildcats Monday night showed Texas Tech what big time basketball is supposed to look like and outran the Red Raiders for a 107-91 victory.

A near capacity crowd of 11,000 Kentucky partisans were on hand to cheer the Southeastern Conference powerhouse to its second consecutive win of the season. For the Raiders it was their second loss in as many games.

All-American Cotton Nash led the scoring barrage for the 9th rated Kentuckians, hitting for 33 points, mostly on wide open baskets under the goal.

The Raiders sent five players into double figures, led by sophomore Norman Reuther's 20. Harold Denny hit 18, Dub Malaise 14, Tom Petty 12 and Bill Murren 10. Again, it was defense that cost the Techsans dearly. The Wildcats took advantage of a loose defense to get basket after basket in close. In contrast, most Tech scores were from the eight foot range.

And, just as against New Mexico Saturday, Tech lost the battle of the boards. Holding a two inch height advantage over Kentucky, the Raiders bowed in rebounds 60-44.

Nine players saw action for the Raiders in a game that saw 48 fouls whistled, 26 against Tech and 22 against Kentucky. Hallum and Denny both fouled out, and both received ovations from the crowd.

Reuther, in addition to leading the scoring barrage, also was leading rebounder fro Tech. He got nine and Denney and Russ Wilkinson grabbed seven apiece. Other than that it was all blue and white on the boards. Nash and Ted Deek-

en pulled down 17 rebounds each for the night.

The Wildcats had control of the ball virtually all the way, trailing only montarily in the opening minutes. They took a commanding 53-41 lead at half-time and lengthened it steadily in the last half for the win.

At one time, the lead surged to as much as 23 points, but the Raiders whittled away at it to get the final fargin.

There was only one tie in the game, but Tech was in the lead on two different instances. The first

came with just 1:14 elapsed when Hallum connected on a jump shot from 15 feet out to push the Raiders out front, 4-2.

They kept that lead for only three minutes, however, mustering no more than a three point lead. Tech led 6-3, 8-5 and 10-7 before Kentucky staged a mild rally to go ahead.

The Raiders went out front 12-11 on Murren's jump shot, but then Kentucky's Randy Embry was true with a long set shot to send the Wildcats out front to stay.

# Whoopenanny Reset

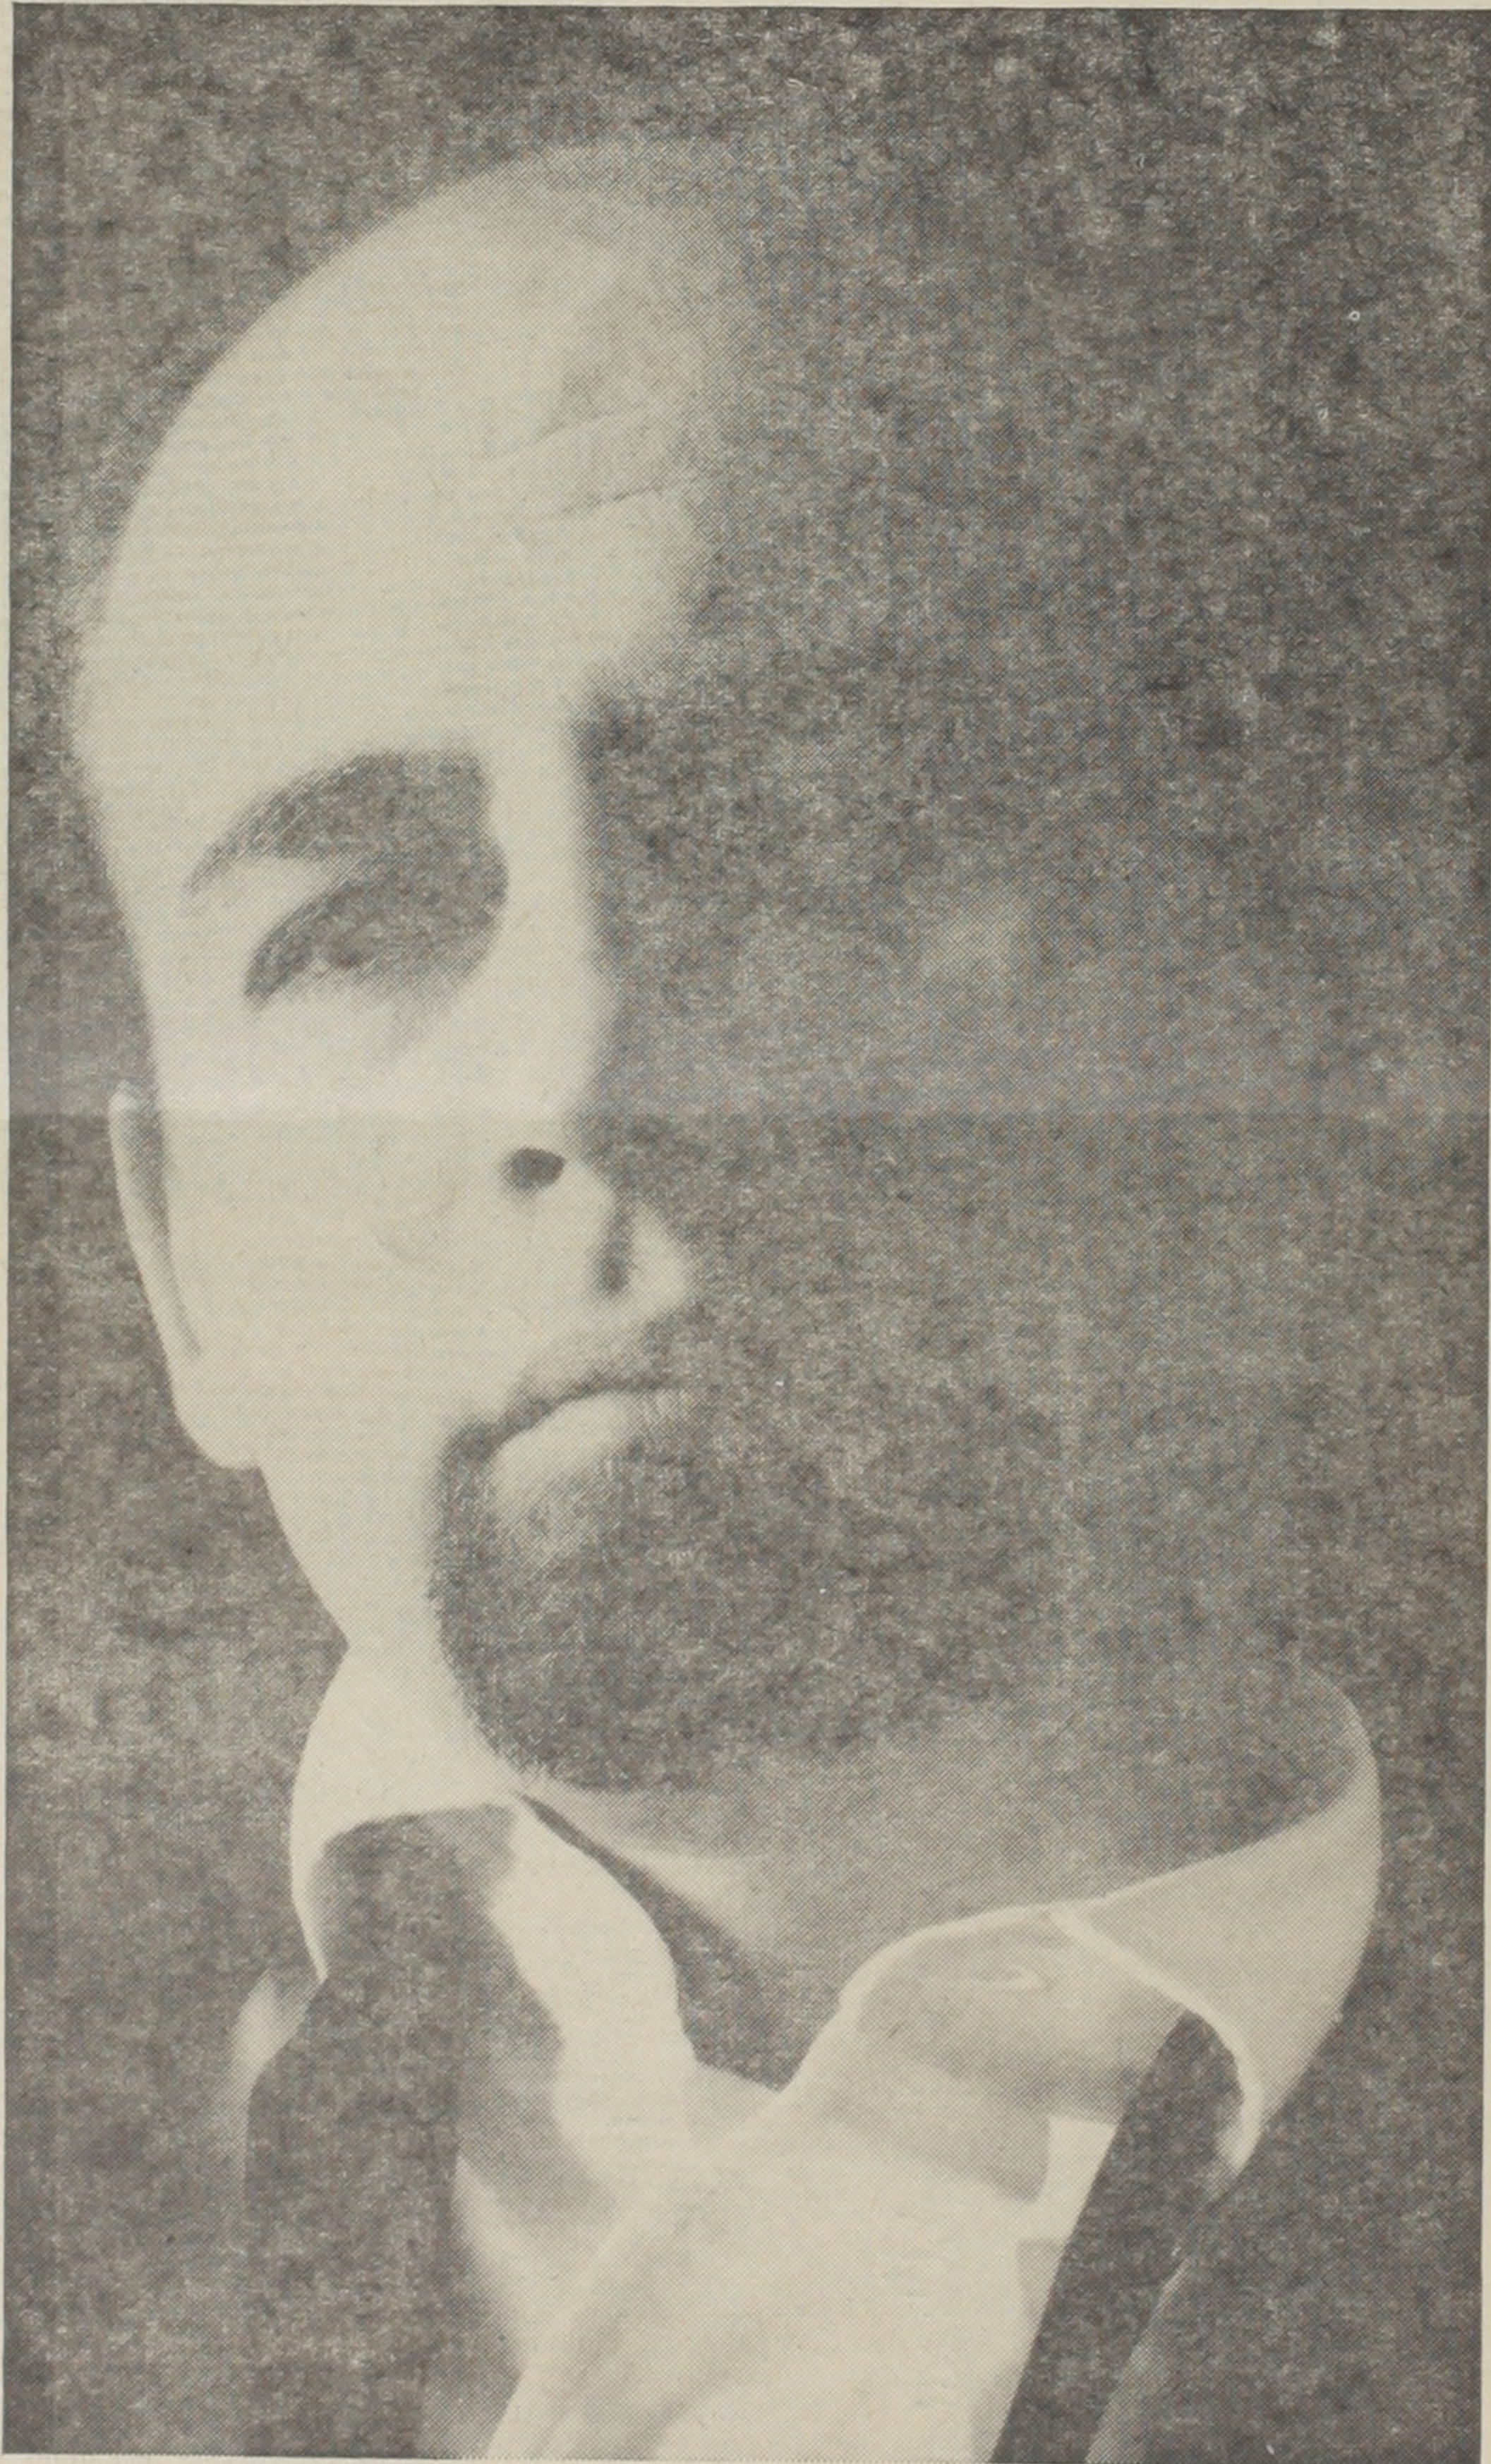

The Lubbock Lions Club "Whoopenanny" scheduled for Nov. 23 will now get underway Saturday night. The event, given for charitable purposes, was cancelled because of the late John F. Kennedy's death. Lorne Greene, Ben Cartwright to television fans, has been rescheduled to appear as master of ceremonies. Greene will be stopping in Lubbock upon his return from New York City where he served as narrator for the annually televised Thanksgiving Day Parade. The actor also appeared in Hollywood in a memorial service for the late President. While in New York, he read the late President's prepared Thanksgiving Day message on the television show "The Tonight Show." The Bonanza star will be accompanied by a professional act for the Lions Club event. The show is planned as a talent exposure for West Texans. Professional and amateur talent have been rehearsing to appear with Greene in the one and one-half hour variety show. Performance times are 7 p.m. and 9 p.m. in the Municipal Auditorium. All tickets sold for the cancelled show will be honored on this night. All seats are reserved and advance tickets are now on sale with prices ranging from \$2.50, \$2 and \$1.50.

# Deadline Set For Harbinger

Deadline for the *Harbinger* has been extended to noon Saturday. Mrs. Kay Irwin, editor of the *Harbinger*, announced that entries are still being accepted in all categories, including poetry, fiction, personal essays and literary criticism. Entries are to be turned in to C&O, Room 125. Each contribution should be marked with the student's name, address, telephone number and classification, and the category in which the entry is to be judged. Mrs. Irwin advised that all graduate students mark "graduate division" on their entries.

# La Ventana Names Artist

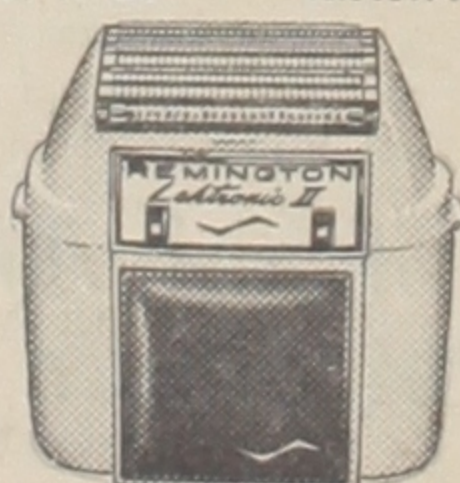

Gregg Spickard, Houston junior, appearing before each football game became La Ventana art director by being a part of his work. In 1961 Spickard won the award of Outstanding L-V Staff member for his work on the Playboy staff. This was his first paid position. Spickard replaces John Wehrle who withdrew because of illness. Work submitted for the appointment included cartoon, technological drawing, a fashion model and a portfolio of past work. Spickard was chosen on the basis of art work he submitted. Spickard did art work for THE DAILY TOREADOR, the cartoons

## ME? A POET? HECK NO!

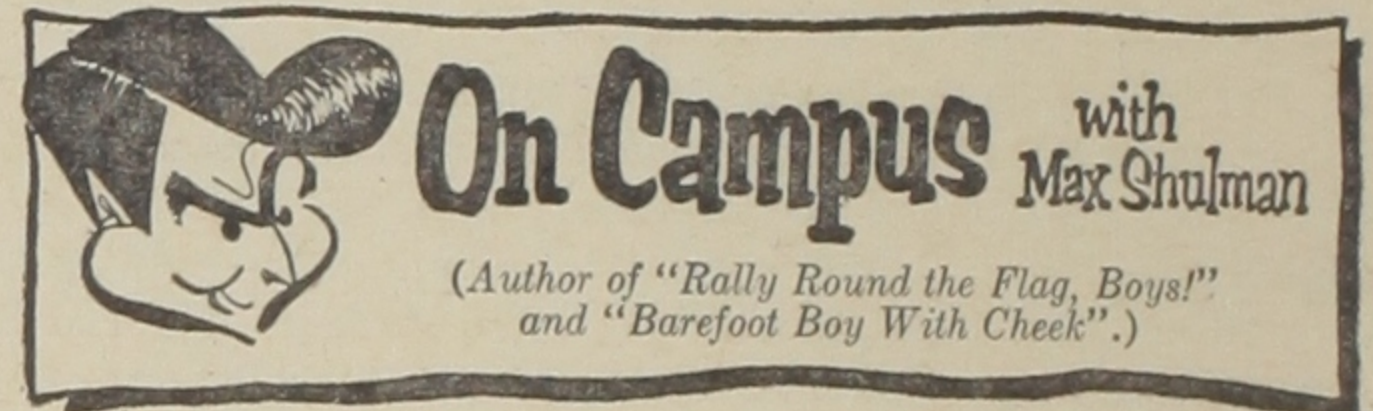

I'm an economics major hinting that I want a REMINGTON® LEKTRONIC II for Christmas. (It costs a little more than most electric shavers, but it's worth it.)

There's a simple, sound reason why the REMINGTON LEKTRONIC II costs more: It delivers more of a shave. There's the cordless feature. Sealed-in, rechargeable energy cells let you shave anywhere without a plug. And what shaves they are! 348 cutting edges of high-carbon steel (sharper and tougher than stainless-steel) whisk whiskers off. The edges are honed on an angle. So whiskers get sliced off instead of "ploughed" up. 756 whisker gathering slots in the

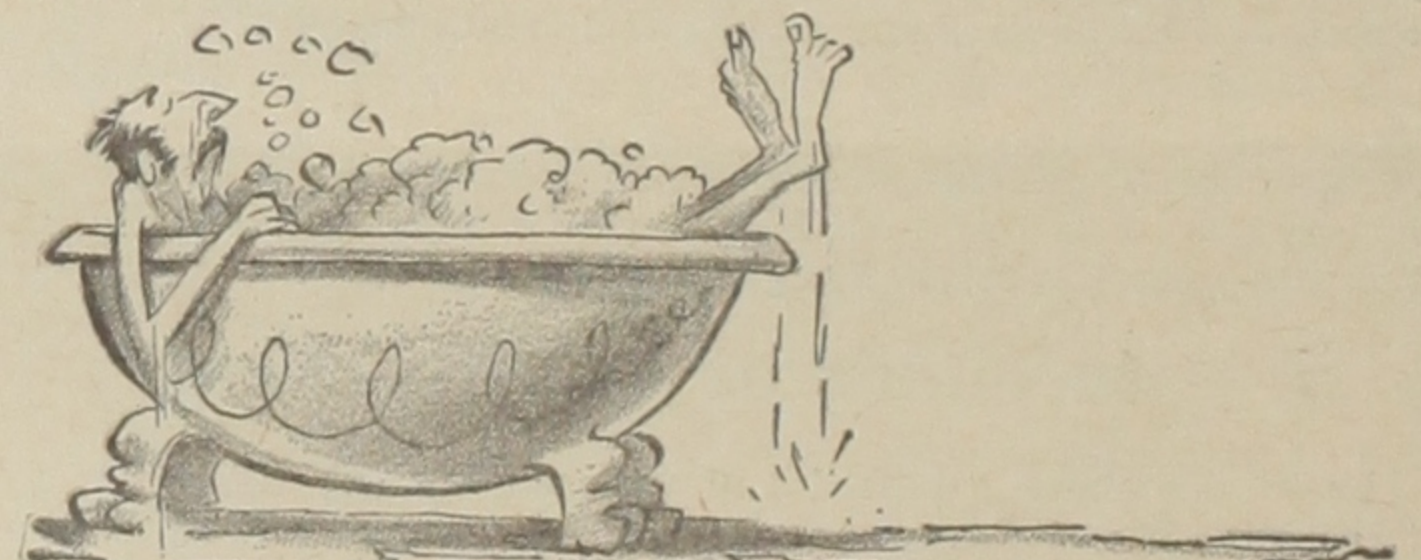

big shaving head feed whiskers to the cutters faster. And on top of the shaving head are the REMINGTON Roller Combs. Adjust to any skin or beard. Push skin down, pop whiskers up into the cutters. Forget to recharge? There's a cord. Plug it in and shave anywhere. With a cord, without a cord, with the LEKTRONIC II you're never without a close, comfortable shave.

**REMINGTON LEKTRONIC II**  
REMINGTON ELECTRIC SHAVERS, BRIDGEPORT 2, CONN.  
 LEKTRONIC: Trademark, Sperry Rand Corp.

## DECK THE HALLS

The time has come to think of Christmas shopping, for the Yuletide will be upon us quicker than you can say Jack Robinson. (Have you ever wondered, incidentally, about the origin of this interesting phrase "Quicker than you can say Jack Robinson"? Well sir, the original saying was French—"Plus vite que de dire Jacques Robespierre." Jack Robinson is, as everyone knows, an Anglicization of Jacques Robespierre who was, as everyone knows, the famous figure from the French Revolution who, as everyone knows, got murdered in his bath by Danton, Murat, Caligula, and Al Capone. (The reason people started saying "Quicker than you can say Jacques Robespierre"—or Jack Robinson, as he is called in English-speaking countries like England, the U.S., and Cleveland—is quite an interesting little story. It seems that Robespierre's wife, Georges Sand, got word of the plot to murder her husband in his bath. All she had to do to save his life was call his name and warn him. But, alas, quicker than she could say Jacques Robespierre, she received a telegram from her old friend Frederic Chopin who was down in Majorca setting lyrics

*all she had to do was call his name*

to his immortal "Warsaw Concerto." Chopin said he needed Georges Sand's help desperately because he could not find a rhyme for "Warsaw." Naturally, Georges could not refuse such an urgent request. (Well sir, off to Majorca went Georges, but before she left, she told her little daughter Walter that some bad men were coming to murder Daddy in his bath. She instructed Walter to shout Robespierre's name the moment the bad men arrived. But Walter, alas, had been sea-bathing that morning on the Riviera, and she had come home with a big bag of salt water taffy, and when the bad men arrived to murder Robespierre, Walter, alas, was chewing a wad of taffy and could not get her mouth unstuck in time to shout a warning. Robespierre, alas, was murdered quicker than you could say Jacques Robespierre—or Jack Robinson, as he is called in English-speaking countries. (There is, I am pleased to report, one small note of cheer in this grisly tale. When Georges Sand got to Majorca, she did succeed in helping Chopin find a rhyme for "Warsaw" as everyone knows who has heard those haunting lyrics:

*In the fair town of Warsaw,  
 Which Napoleon's horse saw,  
 Singing cockles and mussels, alive alive o!*

But I digress.

We were speaking of Christmas gifts. What we all try to find at Christmas is, of course, unusual and distinctive gifts for our friends. May I suggest then a carton of Marlboro Cigarettes? What? You are astonished? You had not thought of Marlboros as unusual? You had regarded them as familiar, reliable smokes whose excellence varied not one jot nor tittle from year to year? True. All true. But all the same, Marlboros are unusual because every time you try one, it's like the first time. The flavor never palls, the filter never gets hackneyed, the soft pack is ever a new delight, and so is the Flip Top box. Each Marlboro is a fresh and pristine pleasure, and if you want all your friends to clap their hands and cry, "Yes, Virginia, there is a Santa Claus!" you will see that their stockings are filled with Marlboros on Christmas morn.

© 1963 Max Shulman

The holiday season or any other season is the season to be jolly—if Marlboro is your brand. You'll find Marlboros wherever cigarettes are sold in all fifty states of the Union. You get a lot to like in Marlboro Country.
