

Botkin Heads For Washington

THE DAILY CREATOR

TEXAS TECHNOLOGICAL COLLEGE

SC President Confers With Student Leaders

Ronnie Botkin of Hereford, Student Council president, will be Tech's representative to a special White House conference of key student leaders beginning today in Washington, D.C.

The conference was called at the request of President Johnson, who said in a letter to Tech President R. C. Goodwin, "I have a great interest in young leaders who are emerging in our colleges and would like to know them and their thinking."

"I am inviting to the White House a group of student leaders from representative colleges and universities throughout the country," President Johnson continued.

Leaders Attend

Government leaders attending the conference and scheduled to give talks to the student leaders are Secretary of Defense Robert S. McNamara, Secretary of Labor Willard Wirtz and United Nations Ambassador Adlai Stevenson.

President Johnson requested that Tech send "a young person who has shown special qualities of character, leadership and interest in college and public affairs."

Johnson Greets

Tonight, President and Mrs. Johnson will personally greet the student leaders. A buffet dinner and entertainment is planned, with Lynda Johnson, the President's daughter, serving as hostess for the evening program.

Botkin left Lubbock early this morning. On his arrival in Washington, D.C., he will go directly to the White House for a reception at 5 p.m.

"I was very happy to get this opportunity. As of yet, I do not know the exact purpose of this meeting, but I am looking forward to it and meeting the President," Botkin said.

He will return to Tech Sunday night.

Visits Grave

While in Washington, Botkin plans to visit the Kennedy grave in Arlington National Cemetery

and other points of historical interest. The visit to Washington, D.C., will be his first.

Top Meets Draw Tech Dairy Team

Texas Tech's four-man dairy products judging team will be in search of high honors when the International Intercollegiate Judging Contest opens in Chicago.

En route to Chicago for the International, the Tech team will stop in Lexington, Ky., long enough to enter the Southern Dairy Products Judging Contest today.

Tech coach Dr. J. J. Willingham has announced that his team for both contests will include Gerald Notly, Miami, Tex.; Bennie Grigam, Dallas; David Barber, Ingle-side; and Frank Homlinson, Brady.

Previously, Tech entrants have earned top awards in both contests. They won the Southern Contest in 1961.

Judging in both contests will include milk, butter, cheese and ice cream.

Dr. Willingham and his charges will return to Lubbock Saturday, Oct. 10.

For Upperclasswomen

Hostess Applications Due At Noon Today

Deadline for applying for the position of President's hostess is noon today.

All upperclasswomen with a grade point average of 2.5 for their last year at Tech may pick up applications in the Dean of Women's office.

President's Hostesses are 32 women students who serve as Texas Tech's official greeters. They are responsible for welcoming visitors to the campus and assisting with various administrative functions such as the Board of Director's luncheon.

Additional qualifications include that Hostesses must be well informed about the campus and be able to answer questions asked by visitors and official guests.

This group will be selected by AWS executive council and sponsors, President R. C. Goodwin and Vice President Marshall Pennington.

AROTC Girls' Team Started

Tech coeds interested in joining the new Army ROTC girls' drill team should attend an organizational meeting Wednesday from 5-6 p.m.

The meet will be conducted in the Social Science Building, room 217.

Student Directories Available On Campus

The new faculty and student telephone directory went on sale Thursday.

The book, compiled for the Tech Bookstore by Rogers Lithographing and Printing, is out a week earlier than last year, in spite of the fact that approximately 1,800 more students are listed.

Conner Cole, bookstore manager, attributes this to the new IBM card registration processing.

The directory features a four-page spread of advertising from Ruidoso, N.M., merchants.

The directory sells for the same price as last year — 49 cents.

"BANJOS, GUITARS AND WIDE-OPEN MOUTHS!" —Pictured above are The New Christy Minstrels, who will make their first Lubbock appearance at 3 p.m. Sunday in Lubbock Municipal Auditorium. The young singers come here as part of their cross-country tour, and their performance will be a "sell-out," according to Mrs. Dorothy Pijan, program director for the Tech Union.

Bouncy Banjo Beat Hails Visit Of Christy Minstrels

By LIZ LYNE
Fine Arts Editor

Not only are they young and good-looking, but they can also lend a big bouncy banjo beat to a folk song.

Comedy and stylized folk interpretations "en masse" will be combined when The New Christy Minstrels make their first Lubbock appearance on Sunday.

Cross-Country Tour

The group, composed of seven men and two women, will appear here as part of its cross-country tour. It has several notable triumphs behind it, including a White House performance and an appearance in New York's famous Latin Quarter Night club.

In addition to their popularity on the nation's juke boxes, The New Christy Minstrels can claim the laurels of having sold two million copies of their record albums.

The young singers have been a solid success in night clubs, supper clubs, on the concert circuit and on television. Billboard magazine described them as "one of the strongest on-stage acts in the folknik field!"

Vocalist-instrumentalist Randy Sparks founded the group in 1961, after he conceived the idea of patterning a modern singing group after a company of pre-Civil War entertainers created by Edwin "Pops" Christy.

The original group rollicked across the country with traditional blackface make-up, comedy routines and a repertoire of Stephen Foster folk songs.

Sparks, while eliminating these old-shoe earmarks from his newly formed group, also eliminated the melancholic ballad interpretations so characteristic of popular folk trends.

The result of Spark's strategy was a happy-sounding group of youngsters who have enjoyed a smashing success across the country.

Members of The New Christy Minstrels are Karen Gunderson, former student at Pasadena City College, California; Ann White, 1961 graduate of UCLA; Barry McGuire, former actor in television's "Route 66" and "The Virginians;" Barry Kane, chess and fencing enthusiast from California; Nick Woods, a second-generation folk singer from Missouri.

Others are Larry Ramos, a young Hawaiian who has appeared on the Arthur Godfrey television show and toured with musical comedies; and Art Podell, former teacher in a religious school and performer on several major television shows.

Appear Sunday

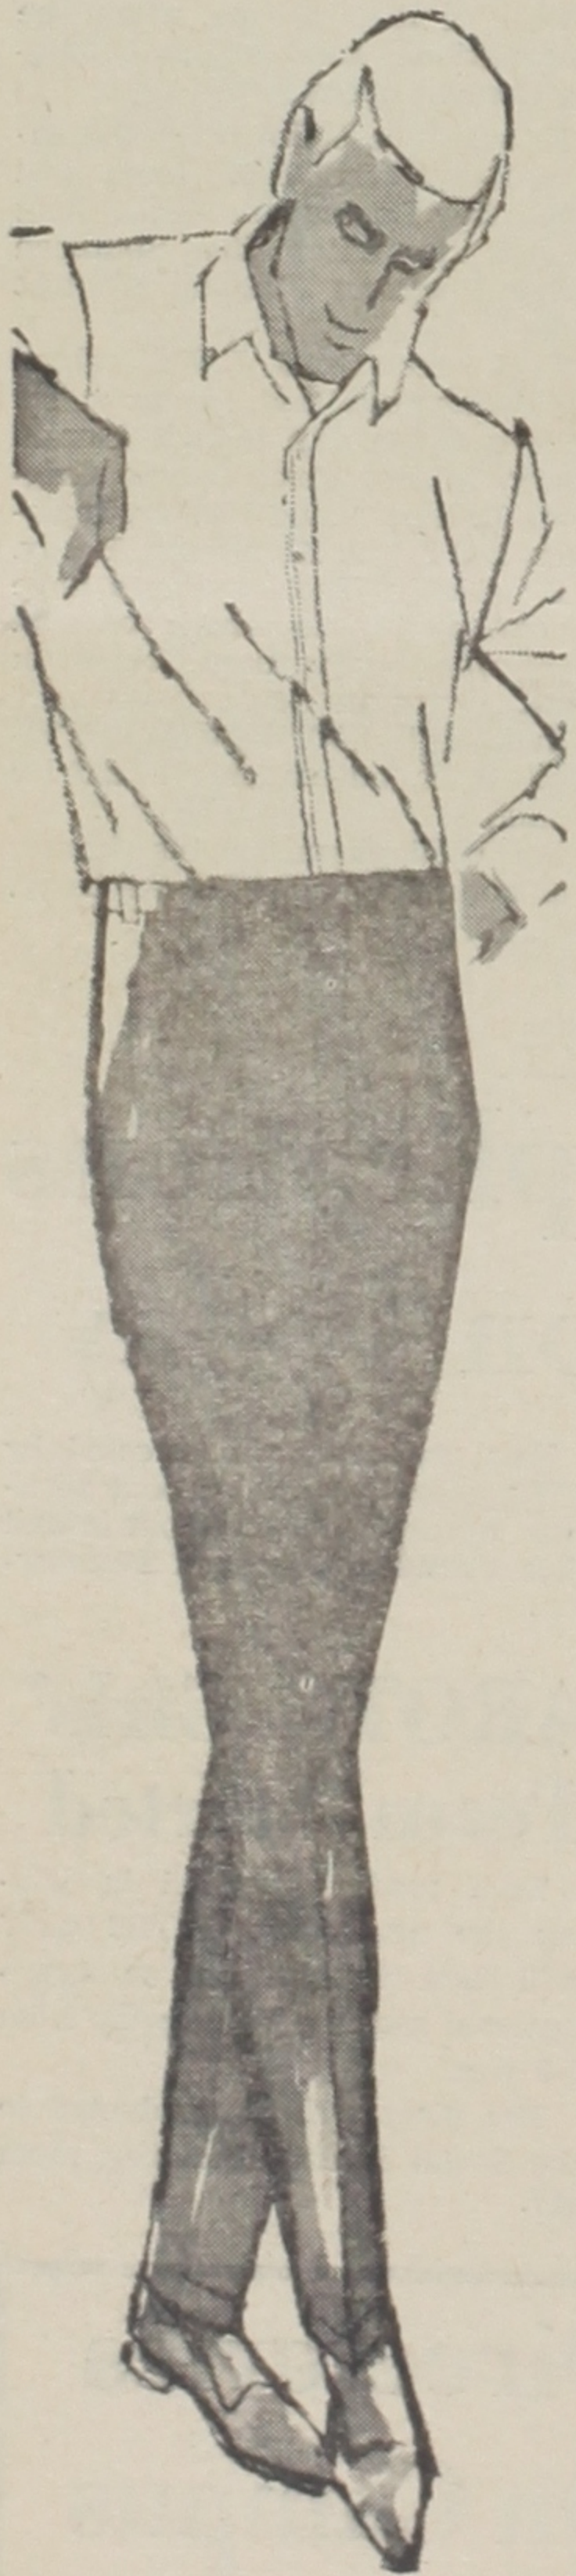

Tickets for the performance are "a sell-out," according to Mrs. Dorothy Pijan, program director for the Tech Union.

The New Christy Minstrels will appear at 3 p.m. Sunday in Lubbock Municipal Auditorium.

Drill Team
Will Reveal
New Angels

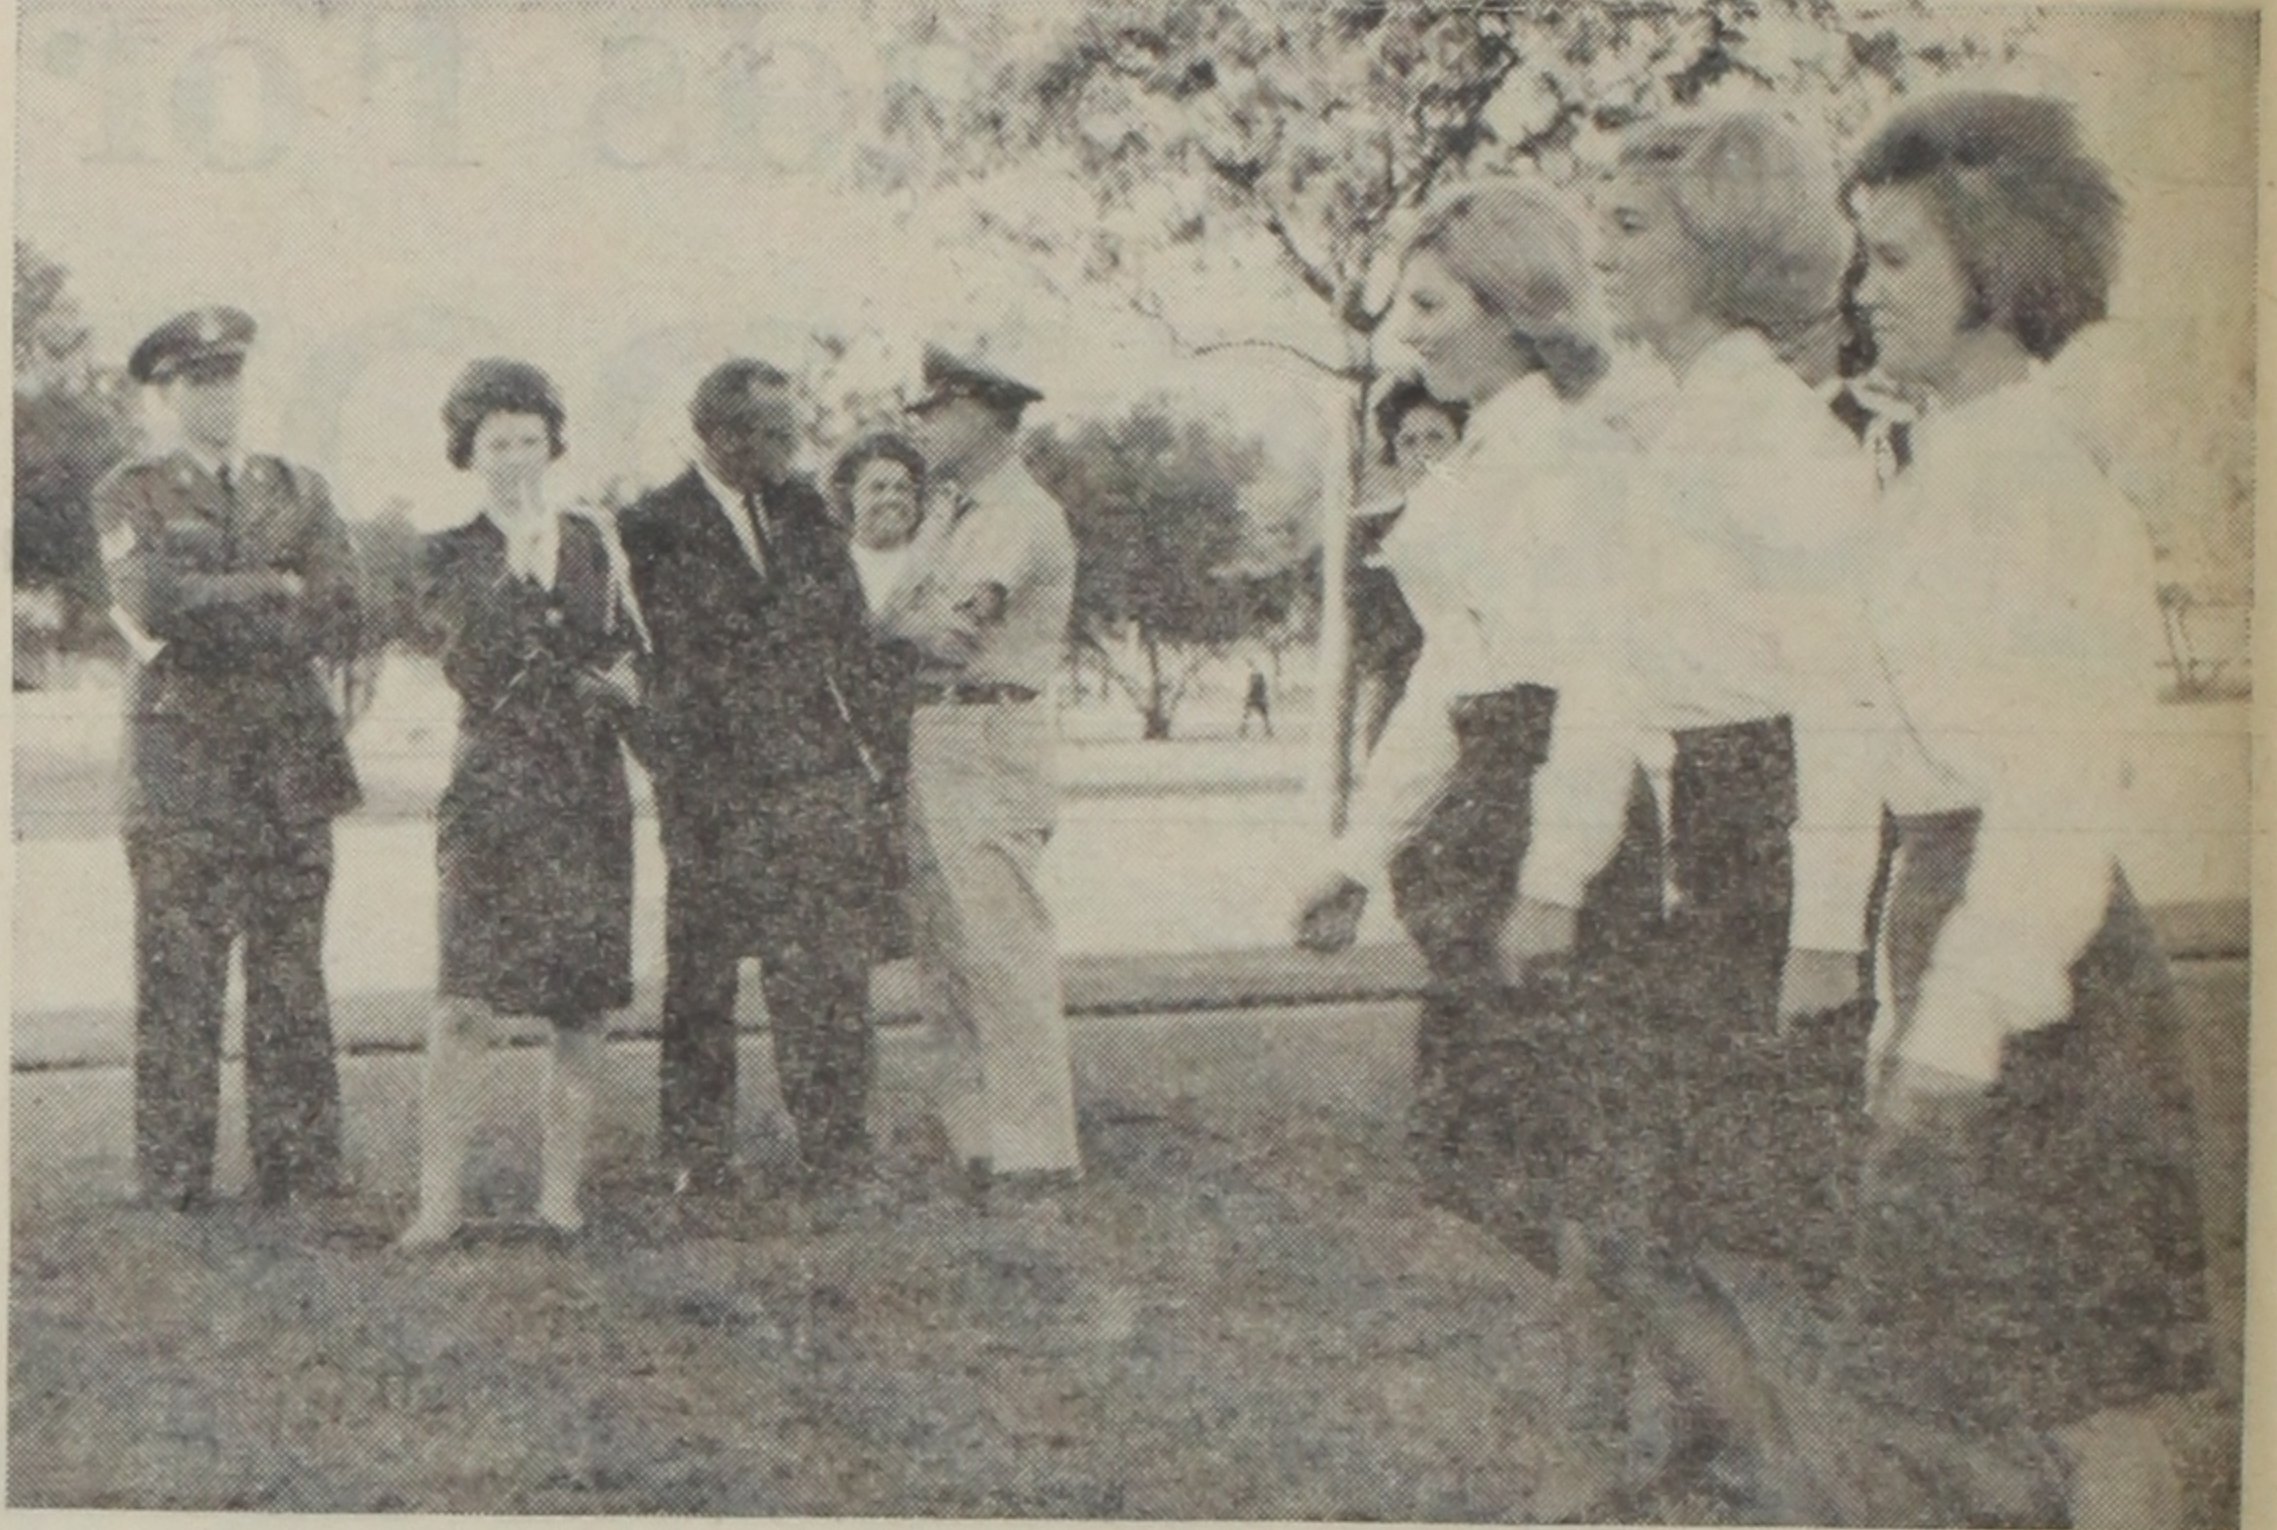

"New members of Angel Flight will be announced Tuesday morning according to Pat Deason, administrative officer.

Finalists from the starting group of 75 met Friday in the Tech Union for a party.

Eliminations began Wednesday and girls were rated on marching ability, poise and neatness. Judges were the drill master and assistant, three AFROTC advisors and two officers of the Tech AFROTC.

Angel Flight members act as hostesses for the Arnold Air Society and aid and promote the Air Force ROTC.

Officers of Angel Flight are Kay Dudley, flight commander; Karen Jobe, executive officer, and Miss Deason, administrative officer. Caro Tubbs is editor of "Angel-ette," the Angel Flight publication.

NEW ANGELS — Angel Flight tryouts on the field Wednesday and Thursday were the basis of judging new drill team members to be announced Tuesday. Finalists were picked Thursday and

pledges will be chosen from them; the candidates were rated on marching ability, poise and neatness.

ART SEMINAR
SET TUESDAY

A series of weekly art seminars directed by Rabbi A. S. Kline will be sponsored by the Woman's Council of the West Texas Museum Tuesday. A continuation of last year's "One Thousand Years of French Art," ten lectures are scheduled from 10-11 a.m. each Tuesday until Dec. 8. A fee of five dollars for students will be charged.

Dr. Karl Pribram

Neurosurgeon Will Lecture

A nationally-known specialist in neuro-physiology from the Stanford University School of Medicine, Dr. Karl H. Pribram, will arrive in Lubbock Tuesday for a lecture on the Texas Tech campus.

Dr. Theodore Andreychuk, professor and head of psychology at Tech, announced that Dr. Pribram, an outstanding authority in areas of research in brain functions, will speak at a lecture, open to the public at 7:30 p.m. Tuesday in the Biology Auditorium at Tech.

Tuesday for a coffee and discussion period in the Tech Union.

Dr. Andreychuk reported that Dr. Pribram is being brought to Tech under the auspices of the NASA program, which is concerned with curriculum enrichment and a Tech research project studying the effects of hippocampal oblations on various learning behaviors of white rats.

Stanford Psychiatry

Dr. Pribram, who received his M.D. from the University of Chicago in 1941, is a professor of psychiatry at Stanford. He has done extensive research on the limbic system of the brain, that part which seems to be involved with emotional behavior.

Born in Vienna, Austria, Dr. Pribram is trained as a neurosurgeon, neurontomist and neurophysiologist. He was previously chairman of the department of neurophysiology at the Institute of Living at Yale University, Hartford, Conn.

Dr. Pribram is a member of numerous professional societies, including the American Medical Association, the American Psychological Assn., the Center for Advanced Study in Behavioral Sciences and the American Electroencephalographic Society.

Published Articles

Dr. Pribram has published numerous articles on neuroanatomy, neurophysiology and behavioral relationships between brain structures.

Dr. Pribram will meet with Tech graduate students and psychology staff from 4 to 5:15 p.m.

Grad Heads
For Africa

Carrie Lou Chaney, Peace Corp volunteer and 1963 Tech graduate left recently for Ethiopia as a secondary school teacher.

After ten weeks training at the University of California in Los Angeles, Miss Chaney learned Amharic, the language of Ethiopia, the country's history and culture and world affairs.

Miss Chaney joins another 130 volunteers already in Ethiopia. Most are teachers, health workers and lawyers. They are improving books, classrooms and teaching materials.

Student Teachers X-Rayed

Texas Tech students in the student teacher program—226 strong—lined up for x-rays this week, when the Lubbock County TB Association's Mobile X-ray unit was on campus.

Dr. Morris Wallace, professor and head of education at Tech, reported that this year all student teachers will have the x-rays as part of their health examination. Tech student teachers will meet the same health standards as public school teachers, beginning this year.

Dr. Olive Wheeler is coordinator of the 90 elementary student teachers and Mrs. Zehobia Verner is coordinator of the 136 secondary student teachers.

Dr. Wallace pointed out that the student teachers are teaching in six-hour blocs, making the equivalent of 452 students teaching in the schools.

STUDENT TEACHERS X-RAYED — 226 student teachers lined up for chest x-rays as part of their health examinations this week. Entering the Lubbock County TB unit are Sandy Samples, Dallas senior; Kay Sanders, Wichita Falls senior; and Pheobe Pack, Lubbock senior.

—Introduce Officers— Tech Dames Present Style Show, Tea, Skit

The Tech Dames Club will present a style show and tea their first meeting of the 1964-65 year at 7:30 p.m. Tuesday, in the Coronado Room of the Tech Union.

The style show, which will be presented by Hemphill-Wells under the sponsorship of the Dames, will be open to all wives of Tech students. The show will feature fall and winter fashions.

After the show, the Dames will present a brief skit, "Recipe," depicting the various interests and activities of the club, which is beginning its sixth year at Tech. Officers for the year will be introduced during the skit.

The Dames Club is an organization designed to foster good fellowship among wives of men who are students at Tech, and to acquaint the wives with the college and its personnel.

Raider Roundup

Alpha Lambda Delta

Alpha Lambda Delta, women's freshman honorary society, will discuss club business at noon Wednesday in the Blue Room of the Tech Union.

BSO

The Board of Student Organizations meets for the first time in the Mesa Room of the Tech Union at 4:30 p.m. Tuesday.

Newman Club

Members of the Newman Club leave at 4 p.m. today for a picnic at Johnson's Ranch. The group will gather at the Newman Center before leaving on the picnic.

Alpha Delta Sigma

Alpha Delta Sigma, a national professional advertising fraternity has scheduled its fall smoker for 8 p.m. Monday in the Tech Union, room 209.

Pribram To Speak

Dr. Earl Pribham, a neuro-physiologist from Stanford University School of Medicine, will speak Tuesday at 7:30 p.m. in the Biology Auditorium. The speech is sponsored by the Psychology Dept.

American Marketing Assn.

The American Marketing Assn. will meet at noon, Tuesday in the Mesa Room of the Union. Reservations for the luncheon may be made in the C&O Bldg., room 318, until 4 p.m. Monday.

La Ventana Contracts

Pictures and page contracts for the 1965 La Ventana are available from 1-5 p.m. in the Journalism Bldg., room 209. The contract deadline is Oct. 30.

Tech Choir Party

The Tech Choir will have a party at 6:30 p.m. today in the Little Party House at Mackenzie Park.

Channing Club

The Channing Club will meet at 7:30 p.m. Sunday in the Blue Room of the Tech Union. Guest speaker will be W. G. Steglich, who will speak on evolution, according to George Griffin, club president.

Tom Ramey Will Lead Forensics

New Forensic Union officers are Tom Ramey, president, Fort Irwin, Calif., senior; Don Gibson, vice president, Welch junior; Janine Coats, secretary-treasurer, Amarillo junior; Margaret Eastman, publicity director, Denver, Colo., sophomore; Tommy Hamm, BSO representative, Abilene sophomore.

Tech Forensic Union was named one of the two top organizations on campus by the College Awards Board last spring. Members participate in debate, discussion, oratory, interpretation and extemporaneous speaking.

The Tech Tournament, sponsored by the Forensic Union, will be Oct. 30-31. Tech students are eligible to enter, but may not go into the finals.

The Forensic Union also sponsors intramurals and a high school speech meet. Members are planning trips to Colorado, New Mexico, El Paso and Bloomington, Ind., to participate in college tournaments.

Why Do You Read So Slowly?

A noted publisher in Chicago reports there is a simple technique of rapid reading which should enable you to double your reading speed and yet retain much more. Most people do not realize how much they could increase their pleasure, success and income by reading faster and more accurately.

According to this publisher, anyone, regardless of his present reading skill, can use this simple technique to improve his reading ability to a remarkable degree. Whether reading stories, books, technical matter, it becomes possible to read sentences at a glance and entire pages in seconds with this method.

To acquaint the readers of this newspaper with the easy-to-follow rules for developing rapid reading skill, the company has printed full details of its interesting self-training method in a new book, "Adventures in Reading Improvement" mailed free to anyone who requests it. No obligation. Simply send your request to: Reading, 835 Diversy Parkway, Dept. 9966, Chicago Ill. 60614. A postcard will do.

Greeks Build New Man

ONE ITEM IN THE news recently that some persons may have overlooked we feel deserves a few words of comment.

Again, Tech's 11 social fraternities have won the National Interfraternity Conference's Summa Cum Laude Award for outstanding academic performance.

Our fraternities have won the award for the past three years, ranking among the very top scholastically in the nation.

Emphasis on high academic performance is a major part of the Greek program here.

This indicates that the Greeks are making significant efforts to meet the challenge and demand of higher education today.

The stereotype image of a "fraternity man" is largely false and deceiving. In recent years the Greek system has done a lot to build a new type of fraternity man — a man who is a scholar, a leader and a well-rounded individual.

The Greeks here at Tech play an important part in student life.

If the fraternities continue to take such achievements as the Summa Cum Laude Award, then Techsians will benefit from being Greeks for a long time to come.

MINNESOTA OFFERS TV COURSES

As an experiment of new teaching techniques, the University of Minnesota announced that four university courses would be offered for credit this year on television.

Although the enrollment was not as large as expected, the Dean of General Extension Division said more were expected to enroll later.

This type of college was designed for flexibility in enrollment. Classes scheduled are German, biology, political science and geography.

Addition of a freshman English class is being considered.

LITTLE MAN ON CAMPUS

"SAY, ED YA BETTER CHECK THAT EXPERIMENT THOSE BOYS ARE WORKING ON BACK AT THE END TABLE."

Tech Union--By George

By STEVE GEORGE
 Tech Union President

Overheard just before registration as an upperclass female took a group of beanie-wearing freshmen girls on a tour of the campus: "This is the Student Union Building—where you come to drink coffee and talk between classes."

With her description of the Union completed, this knowledgeable and experienced lady herded her young charges out of the Union—leaving them with a shockingly narrow but common view of the Texas Tech Student Union.

Union Purpose

Although it is true that the Union aids as a unifying force on campus by serving as a community center for students from all walks of campus life, it is equally true that this is not its only purpose.

Many students, like our anonymous guide quoted above for example, might be unaware that this year, some \$31,000 will be spent on student-planned, student-produced programs.

Is this expensive program produced for the benefit of a select group of students and financed by another group of nameless philanthropists?

No, the programs are financed by you and me—and 13,000 other students like us—by means of a mandatory \$5 Student Union Fee collected during the confusion of registration at the first of every semester.

Student Union programs then become of primary interest to all Tech students—if for no other reason than the simple fact that you and I are financially supporting the programs.

Where Money Is Spent

Just where does this \$31,000 go? What types of programs are presented? Who plans and produces them? How can I have a say in this?

To take a current example that is probably familiar with everyone; just who decided that your money should be spent bringing The New Christy Minstrels to Tech?

And if you paid \$5 for a Student Union Fee at the first of the semester, to help finance the Union's program, why are you charged \$1.75 a ticket to enable you to see part of this program?

Who Makes Decisions?

First of all, the decision to invite the Christy Minstrels to Tech came last year—as one of the eight standing committees, in the Tech Union, the Special Events Committee, planned the event as one of the outstanding attractions of the committee for the current semester.

Volunteer students comprise the membership of this and the other seven committees (Fine Arts, Ideas and Issues, Dance, Entertainment, Hospitality, Decorations, International Interests).

These are average students except for one quality—a dedication to the proposition that the Union is part of the educational program of the college and as such should present a well-rounded selection of programs designed to include all members of the college family.

Membership on the committee is open to any student ready to take on the responsibility of planning and producing a first-rate program for Tech students, faculty and administration.

In reply to the second self-imposed question, I might state that the New Christy Minstrels are an exception. They have a big name and a big price tag—the Special Events Committee simply could not afford to absorb the entire cost with its allotted portion of the Student Union Fee.

Programs And Fees

Many other fine programs will be produced either free or for a nominal charge to the student.

Compare, for example, the Fine Arts Festival in November, the noon forums and speakers, the Model United Nations, the International Fair, and the TGIF and after-game dances—all non-expensive programs.

In short, the Student Union program is your program. It is presented for your benefit. Take an interest in it. You could have a strong voice in the type of programs presented—if you would only make your views known.

Letters

'Fine Coverage'

Dear Editor,

I was compelled upon reading the editorial in the Tuesday, Sept. 29, edition of The Daily Toreador, to write a letter congratulating the editor and staff on its fine coverage of the release of the Warren Commission Report.

Many of the Tech students do not subscribe to a local paper — thanks to the fine coverage of important events by the Toreador staff, the student body is enabled to keep up with world events.

May I say that the editorial on this date is indeed a fine piece of journalism. I feel that the last paragraph is perhaps the key to the entire report. It is indeed thought inspiring.

Very truly yours,
 Suzanne Scism

(EDITOR'S NOTE: Thank you very much for your letter. Indeed, YOU inspire us.)

Screening Board

It seems indeed strange to me that a cheerleader screening board composed of six or seven members, most of whom having little or no contact with cheerleading whatsoever, would supposedly be more qualified to decide who is suitable to run for campus office than the student body itself.

I am surprised to note that while the vast majority of the cheerleaders chosen by the students in past years has been very good, the student body must now be deemed incapable of deciding who is qualified to represent them as cheerleaders from Texas Tech.

Sincerely,
 Lonnie H. Dillard, Jr.

— Books In Review —

'Man's Spirit Will Survive' Theme Of Ayn Rand's Provoking 'Anthem'

By LIZ LYNE
Fine Arts Editor

There exists a special class of novels which enjoys an ever-growing popularity, primarily because it deals with the unpredictable future of civilization.

"Anthem," by Ayn Rand, has been around since 1937, and yet it's theme is as frightening as all the unknown possibilities of tomorrow.

Equality 7-2521 is a young man living in the medieval aftermath of modern civilization's self-destruction. He tells his bleak story in plural terms of "we" and "our," since his society has condemned the use of the word "I."

Equality 7-2521 is 21-years-old, and the Council of Vocations arbitrarily assigns him to his life-time career as a street-sweeper.

This young man is unlike his brothers in that he harbors vague questions concerning his society. He cannot understand why some of his comrades cry out in their sleep at night, nor can he comprehend why all the world's reputed books were lost, nor does he know why all the marvelous inventions of the civilization before him have been hopelessly misplaced.

Reconciles Himself

Equality tries to reconcile himself to his career as a street-sweeper, for he knows that it is a sin to be unhappy. He even tries to avoid liking his secret best friend too much, because it is a crime to prefer any one comrade above the rest. Still, however, Equality 7-2521 continues to ask himself the dark, forbidden questions.

He sees a young farm hand, Liberty 5-3000, as she is working in the fields, and his heart turns over with what he realizes is a criminal feeling. Secretly he names her "The Golden One" and thinks dreadingly forward to his furtive, shameful duties in the House of Mating.

While sweeping streets one day, Equality 7-2521 discovers a man-hole cover. He explores the area beneath the cover and finds relics from the destroyed civilization.

It is a crime for any brother to keep secrets, but the young man cannot help himself. He begins to spend much of his time in the man-hole and eventually, by experimenting with wires and metal, he discovers electricity.

Death Penalty

He jubilantly carries his discovery to the Council of Scholars, and he receives the death penalty for daring to use individual initiative.

Equality 7-2521 kidnaps "The Golden One" and they flee into the wilderness, where they find a house left over from the previous civilization. There are many books in the house, and in one of the books the young man finally discovers the lost word which has haunted him. The word is "I."

He adopts the name "Prometheus" and writes in closing:

"Through all the darkness, through all the shame of which men are capable, the spirit of man will remain alive on this earth. It may sleep, but it will awaken. It may wear chains, but it will break through. And man will go on. Man, not men."

Author Rand is known for her staunch theories on individuality and objectivism and "Anthem" seems to be her most consummate expression of these theories.

She says in essence that man is his own hope, and she strongly deprecates whatever will not allow man to discover, elevate or be himself.

"Anthem" is a relatively old book, but it is not history. The reader might wonder if it is not the story of our future.

Assistant Sports Editor

Despite the fact that they have the better record, the Texas Tech Red Raiders will take the field against the Aggies from A&M as a six-point underdog. Aggie Coach Hank Foldberg said he was not discouraged over the 10-0 loss to Houston last week and

that he expects the Aggies to rebound strongly against Texas Tech. The farmers lost their opener to a strong Louisiana State ball club 9-6.

Meanwhile, the Red Raiders were working behind "closed doors" stressing defense as a preparation for a "deceptive offense" as described by Texas Tech Coach J T King.

King used his redshirts to run Aggie plays Wednesday. He had Eddie Williams running as Dan McIlhany, and Rick Jones playing Budgie Ford's position.

Injuries Listed

In the injury department, the Red Raiders will be without the services of 235 pound Ronnie Pack, who was injured in the Texas game Saturday night, and probably tackle Bill Adams and end Terry McWhorter, who are on the doubtful list. Bobby Evans, a 220-pound tackle, will not play for the Aggies.

Tech Coach Joe Blaylock, who scouted A&M against LSU and Houston, said, "I think A&M is somewhat improved over last year, both offensively and defensively."

"They have simplified the offense," he continued, "going to a pro attack similar to the one used by Baylor. Their speed is better on both the offensive and defensive teams, and they have great potential."

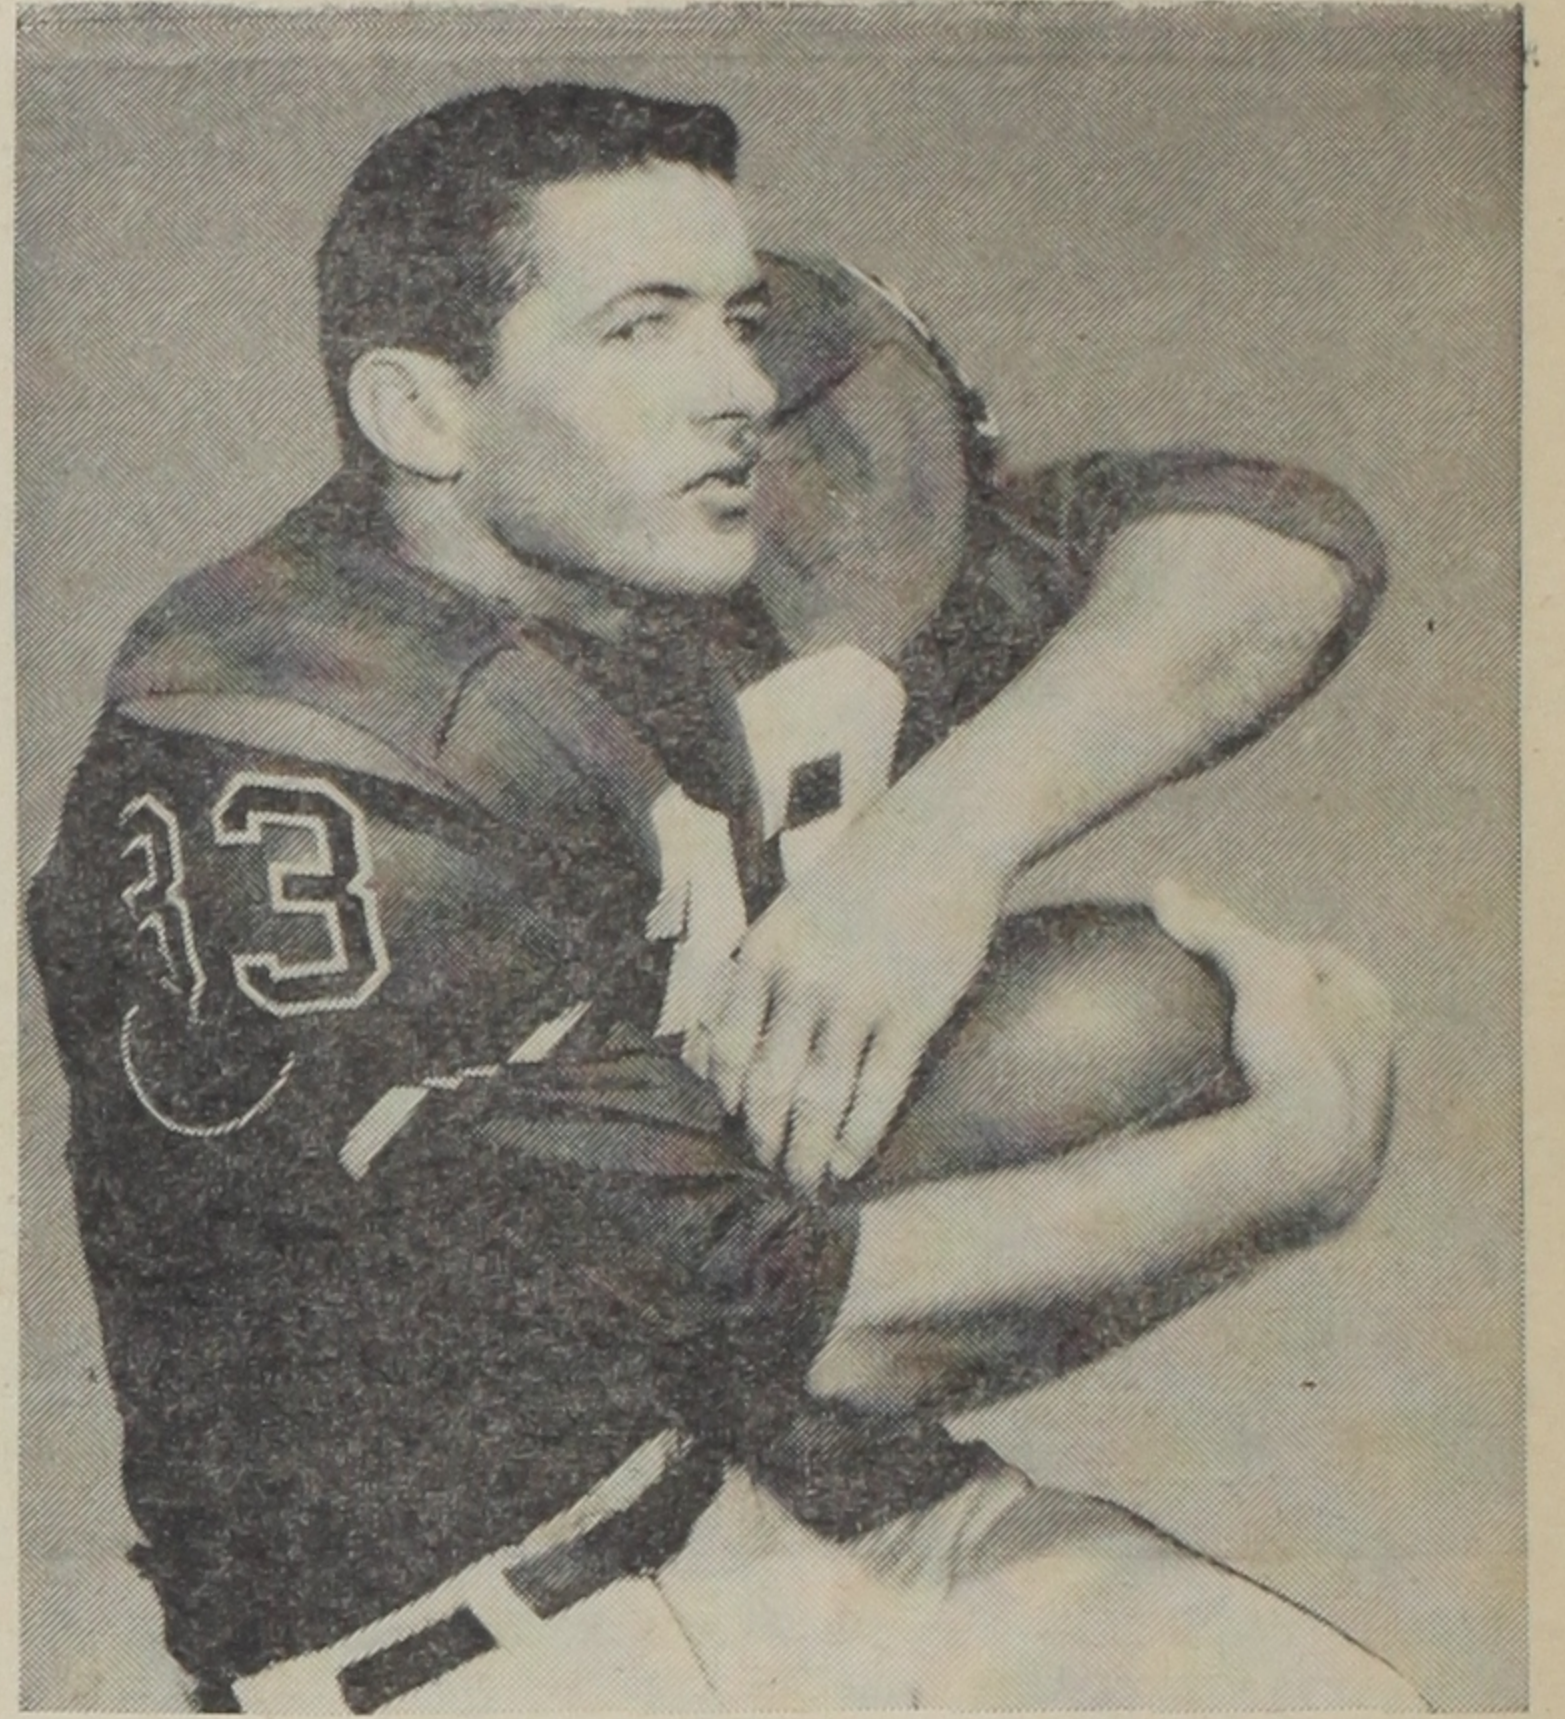

Blaylock went on to say that the entire backfield is much improved, and he had special praise for Aggie quarterback Dan McIlhany. "McIlhany likes to throw to Billy Uzzel, John Brotherton, and full-back Budgie Ford. Each has caught four of his passes in two games."

Raider Assets

All in all, it promises to be a fine ball game, but the Red Raiders have a lot going for them, including the Southwest Conference leading passer in Tom Wilson, 165 pounder from Corsicana; the Southwest Conference leading pass receiver, All-American candidate Donny Anderson, 205 pounder from Stinnett; and 35 other red men who are "rarin" to tear apart some farmers.

Tech is far behind in the A&M series by a 15-6-1 token. They also haven't won at College Station since 1954.

● RAIDER FANS ARE HOPING IT'S JUST ABOUT THEIR TURN!

KICKING SPECIALIST — Kenneth Gill, a 190-pounder from McKinney, is already making loud noises this year for Tech with his magic toe. The defensive specialist kicked a 51-yard field goal against Mississippi State which broke the all-time Tech record and came within inches of breaking the Southwest Conference mark. He will be handling extra point duties tonight against the Aggies.

Probable Starting Lineups

TEXAS TECH		TEXAS A&M	
Player	Position	Player	Position
Jerry Don Balch, 197	LE	Billy Uzzell, 193	LE
John Porter, 225	LT	Melvin Simmons, 212	LT
James Henkel, 210	LG	John Nilson, 203	LG
Reg Scarborough, 199	C	Gary Kovar, 201	C
James Cecil, 193	RG	Ronney Moore, 218	RG
Chester Howard, 215	RT	Waylon Ward, 221	RT
Charles Gladson, 188	RE	John Brotherton, 212	RE
Tom Wilson, 160	QB	Dan McIlhany, 190	QB
John Agan, 182	LH	Lloyd Curington, 158	LH
Donny Anderson, 205	RH	Tommy Meeks, 176	RH
Jim Zanios, 210	FB	Budgie Ford, 186	FB

Rugged Razorbacks Face Winless TCU

The TCU Horned Frogs, Tech's opponent next Saturday night in Fort Worth, meet Arkansas at 1:30 p.m. today in a locally televised game.

TCU, who is still looking for its first victory of the year, will enter the game as a 3-point underdog. The Frogs have been shut out by both Kansas and Florida State. They have yet to cross their own goal line.

No Defeats

Arkansas, on the other hand, is undefeated in two outings. The Razorbacks have beaten Oklahoma State and Tulsa, but they are relatively insignificant opponents. Tech will clash with the Razorbacks in the Red Raiders' Homecoming game Nov. 21.

This afternoon's game will be the initial conference tilt for both teams. TCU will be looking for their first victory over the Arkansans in five years.

Top Rushers

The battle will feature a head-on meeting of the Southwestern Conference's two top rushers, Jim Fauuer of TCU and Arkansas' Jim Lindsey. In addition, the Froggies will have the returned services of ace passer Kent Nix, who missed last week's action with a knee injury.

An inexperienced TCU secondary makes the Razorback backfield a constant break-away threat, and gives Arkansas a possibility of breaking the game wide open.

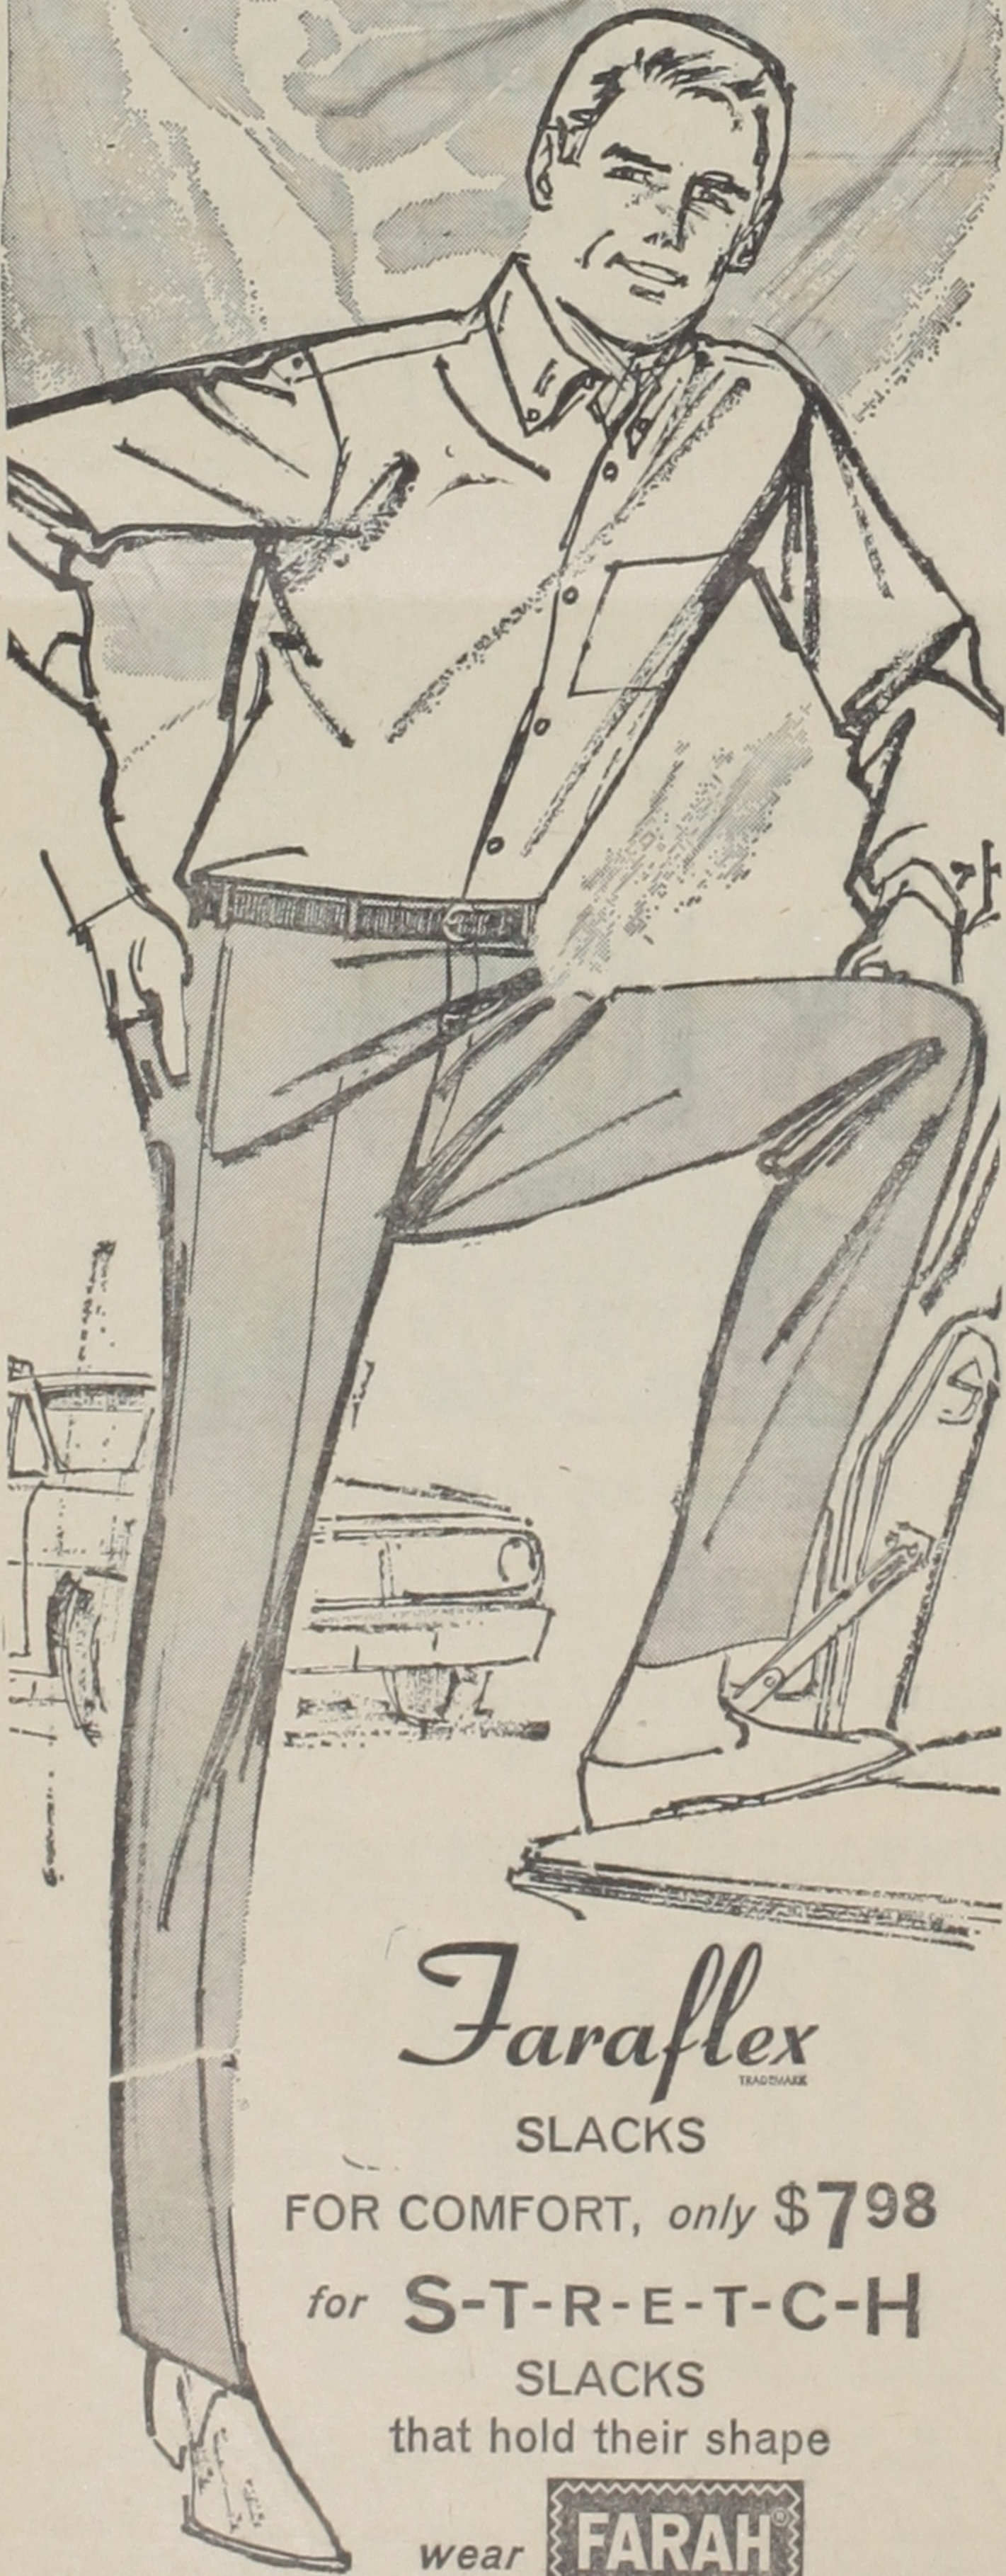

ZAPALAC MISSES RECRUITS

Willie Zapalac, former Texas Tech assistant football coach now with the University of Texas, wishes he could have taken two of his Tech recruits with him to UT, and so does Darrell Royal. Linebacker C. C. Willis and quarterback Tom Wilson were both signed by Zapalac before he left Tech. Now Zapalac is on recruiting duty for UT, but it's doubtful he's come up with much better selections.

-League Bowling Begins-

Intramurals Underway

DEFENSIVE SPECIALIST — Billy Weise, a 170-pounder from Austin, has turned his talents toward defense work this year. Last year as an offensive back, Weise was the third leading rusher; second in kickoff returns; and had the best yard gained per carry with a 4.6. He will be a defensive starter tonight.

Texas Tech's vast intramural program got underway last night as league bowling teams began competition.

Twenty-four teams are competing in three separate leagues for the fall semester, according to Dorothy Robertson, intramural secretary. Ten teams are entered in the fraternity league, eight in the dormitory classification and six in independent and club competition.

Bowl Friday

The teams bowl every Friday beginning at 5:30 p.m. at Lubbock Bowling Club.

Defending champions from spring semester bowling leagues are Sneed Hall in the dormitory league, Sigma Nu "A" in the fra-

ternity division and Delta Sigma Pi "A" in the individual league. Pi Kappa Alpha "A" is defeding all-college champion in the bowling league division of intramurals.

Entries Closed

Entries also have been closed for handball and golf.

Forty-six men have signed up for handball. Since only doubles competition is offered during the fall semester, this will constitute 23 teams. Play will begin next Thursday.

Golf brackets had not been drawn as of Friday afternoon, but play will begin on Monday.

Entries for touch football, volleyball and the decathlon will close on Tuesday. Entry blanks, which are available at the Intramural Office, must be filled out by all prospective participants by that time.

The intramural program, which is open to virtually all men students, has been an important part of Tech activity for several years. Last year, 3,338 men participated in the extensive program. This constituted 42.1 per cent of the entire male student body. This year an even greater number is expected.

Texas-Army Battle To Highlight SWC Games

By THE ASSOCIATED PRESS
Unbeaten Texas, standing proudly atop the collegiate heap, faces also undefeated Army tonight at Austin in a game that highlights weekend action among Southwest Conference football teams.

Four teams open conference competition, and two others take on intersectional foes.

The Longhorns, fresh from a victory over Texas Tech, its first tough opponent of the year, haven't been beaten in 13 games. They whipped Tulane in the season opener.

Also Undefeated

Army's Black Knights, on the other hand, always seem able to rise up when least expected — and this year they can be expected. They brushed aside The Citadel, 34-0, and defeated Boston College, 19-13, this season.

Some 65,300 persons are expected to fill Memorial Stadium for the largest crowd at Austin in 12 years.

In other intersectional games, Rice hosts unbeaten but so-so West Virginia and Baylor plays Oregon State at Waco.

Conference Games

In games that count toward the conference championship, Texas Tech visits Texas A&M and Texas Christian meets Arkansas at Fort Worth.

Rice hopes to, and could, make up for its 3-0 defeat by Louisiana State last week. The Owls rate a 14-point favorite over West Virginia, winner in its first games over Richmond and The Citadel.

At Waco, two pro-type offenses manned largely by sophomores will clash in the Baylor-Oregon State meeting. Baylor favors the aerial bomb, but it doesn't always succeed. The Bears notched 327 yards passing against Washington, but got beat, 35-14.

Oregon State, a touchdown underdog, has beaten Colorado and lost to Northwestern.

Aggies Slim Favorite

Texas Tech, which upset Mississippi State and then took its lumps in a 23-0 beating by Texas, is a three-point underdog to the Aggies at College Station. A&M however, has scored only one touchdown this year in losing to LSU and Houston.

Another three-point favorite is unbeaten Arkansas, challenging TCU at Fort Worth. TCU's scoring output this year has been a field goal — in a loss to Kansas. The Horned Frogs were blanked against Florida State. They haven't beaten Arkansas in five years.

The Arkansas-TCU game will be regionally televised.

SMU May Win

In the meantime, Southern Methodist lures little Arlington State into the big Cotton Bowl, hoping to improve its record after losses to Florida and Ohio State.

Whether the game is a rout or a close contest may depend largely on how much determination Arlington State can muster against the favored Mustangs. The Rebels have a 1-1 record.

Intramurals To Hold Meeting

FRATERNITY LEAGUE TOUCH FOOTBALL — The fraternity league schedule will be completed at an organizational meeting for all fraternity league touch football managers at 5 p.m. Monday in the Intramural Conference Room. All fraternity managers must attend. Play is scheduled to start Sunday, Oct. 11.

DORMITORY AND INDEPENDENT LEAGUES — An organizing and scheduling meeting for all dormitory and independent touch football managers will be held Tuesday at 5 p.m. All dorm and independent managers must be presented at the meeting to be held in the Intramural Conference Room of the Intramural Gym. Play will begin Tuesday, Oct. 13.

With AF Officer

Citation Finally Catches Up

Good news doesn't always travel fast.

Take the case of Air Force Capt. Charlie Cribbs, for instance.

Capt. Cribbs, a Jacksonville, Fla. native, served as radar maintenance officer at an Air Force radar site manned by the 65th Air Division in Spain until May, 1962.

Completes Tour

Recently, more than two years after completing this tour of duty, the dark-haired career officer was awarded an Outstanding Unit Ci-

tation for accomplishments by his unit while stationed in Spain.

Capt. Cribbs currently is attending classes at Texas Tech and majoring in electrical engineering under the Air Force Institute of Technology (AFIT) program. This program, which has turned out such products as Maj. L. Gordon Cooper, the Astronaut, allows officers to return to college at Air Force expense to further their education.

Second Bachelor's Degree

The Floridian came to Tech in

May, 1962, and plans to receive his Bachelor of Science degree in January, 1965. It will be his second bachelor's level degree. He received a Bachelor of Science in Business Administration from the University of Florida in 1953.

Capt. Cribbs, one of 40 AFIT officers now at Tech, claims that his AFIT tour is a far cry from the Air Force. Such a far cry, in fact, that he has had his uniform on only twice since he entered the program.

CAPT. CHARLES CRIBBS

CPC Meet To Feature Foreigner

A German civic leader, Elisabeth Strauss, from Bad Godesberg, will speak at a noon luncheon Monday sponsored by the Community Planning Council at the KoKo Palace.

Miss Strauss is the Executive Director of the German "Aktion Gemeinsinn," which means "Community Spirit in Action."

Educate Germans

The organization has been trying with increasing success to educate German citizens for a democratic way of life and individual initiative in public affairs.

With the help of public service advertising and press campaigns, it has promoted numerous projects to encourage participation in all types of civic affairs and social services.

Ticket Cost

Tickets are \$2.10, and reservations must be made at the Community Planning Council, 2201-19th St., by Oct. 23.

Organizations may purchase tickets in blocks in order that their members may attend in a body, if they wish.

Miss Strauss comes to this country as the guest of the Federal Press Office of the Bonn government. The Lecture Division of the German Information Center, which is officially attached to the German Embassy, arranges her speaking engagements.

Resemble Council

Objectives of "Aktion Gemeinsinn" resemble closely those of the Advertising Council of the United States.

However, whereas the initiative in developing the Advertising Council came from the advertising profession itself, the "Founding Fathers of Aktion Gemeinsinn" were a handful of public-minded individuals representing essential elements of public life in Western Germany.

Follow Example

They followed closely the example of the Advertising Council, which exercises considerable influence on public opinion through public service advertising and public relations campaigns.

Lubbock's Community Council, which is sponsoring Miss Strauss' appearance, coordinates planning for health, welfare and recreation through research and dissemination of information.

Clearing House

It serves as a clearing house for volunteers through the Volunteer Bureau, provides an information and referral service, and administers the Christmas Clearance Bureau by coordinating the Christmas welfare activities of Lubbock agencies and community organizations. Its operations are supported by the United Fund.

TEXAS REPORT

AUSTIN (P) — Atty. Gen. Waggoner Carr will present to Gov. John Connally Monday a 20-page summary of Texas' role in the investigation of the assassination of President Kennedy.

Wool Contest Open For Creative Coeds

Tech coeds are eligible to compete in the District 1 "Make-It-Yourself With Wool" contest for the grand prize of a two-week trip to Paris, London, Nice and Rome.

District 1 finals are scheduled at Tech Dec. 12. State finals will be in San Marcos, Jan. 8-9, 1965, with the national finals slated for the second week in January, 1965.

Blanks Available

Dr. Gene Sheldon, professor and head of clothing and textiles at Texas Tech and director of the District 1 contest, which includes young women in the Panhandle-South Plains area, has notified area homemaking teachers and county agents that entry blanks and official information are now

available for women in their areas interested in this year's contest.

Four Groups

The 1964 contest will have four groups of entries: Division A, 10 through 13 years, eligible for the district level only; Division B, 14 through 17 years, and Division C, 18 through 21 years, eligible for the national contest; and the Adult division, over 21 years, eligible for district and state contests only.

The "Make-It-Yourself With Wool" contest is sponsored annually by the American Wool Council, in cooperation with the Women's Auxiliary to the National Wool Growers, and by State Sheep Growers Assn.

Must Be Wool

Dr. Sheldon reports that all work on garments must be done by the contestant, and the garments must be made of 100 per cent wool, loomed, knitted or felted America. The contestant must model her own garment before the judges.

Judging in all divisions is based on workmanship, beauty of design, coordination with the individual and appearance in fashion. Judging will be done by experts in wool fabrics, fashion and construction, Dr. Sheldon added.

4-Day Trips

In addition to the grand prize of a 14-day holiday in Europe, 41 winners from 20 area sheep councils will receive four-day trips to the national contest in Phoenix, Ariz.

Girls in each state get a trip to the state contest, upon winning the district contest.

Dr. Sheldon announced that the District 1 contest will be composed of winners of the county contests.

Scores Entries

If there are not enough entries from a county to warrant a county contest, the local director may see that entries are scored and eliminated to determining the ten contestants to be sent to the District 1.

Contestants or sponsors may write for entry forms and official information to Dr. Sheldon, School of Home Economics, Tech, or to Home Sewing Department, American Wool Council, 909 17th St., Denver 3, Colo.

Fair Features Something For Everybody

Few things come free to Texas Tech students, but when they do, Red Raiders take full advantage.

Friday was College Day at the Panhandle South Plains Fair, with dozens of exhibit buildings, a midway full of chill, spill and thrill rides and endless concession stands to tempt Techsians.

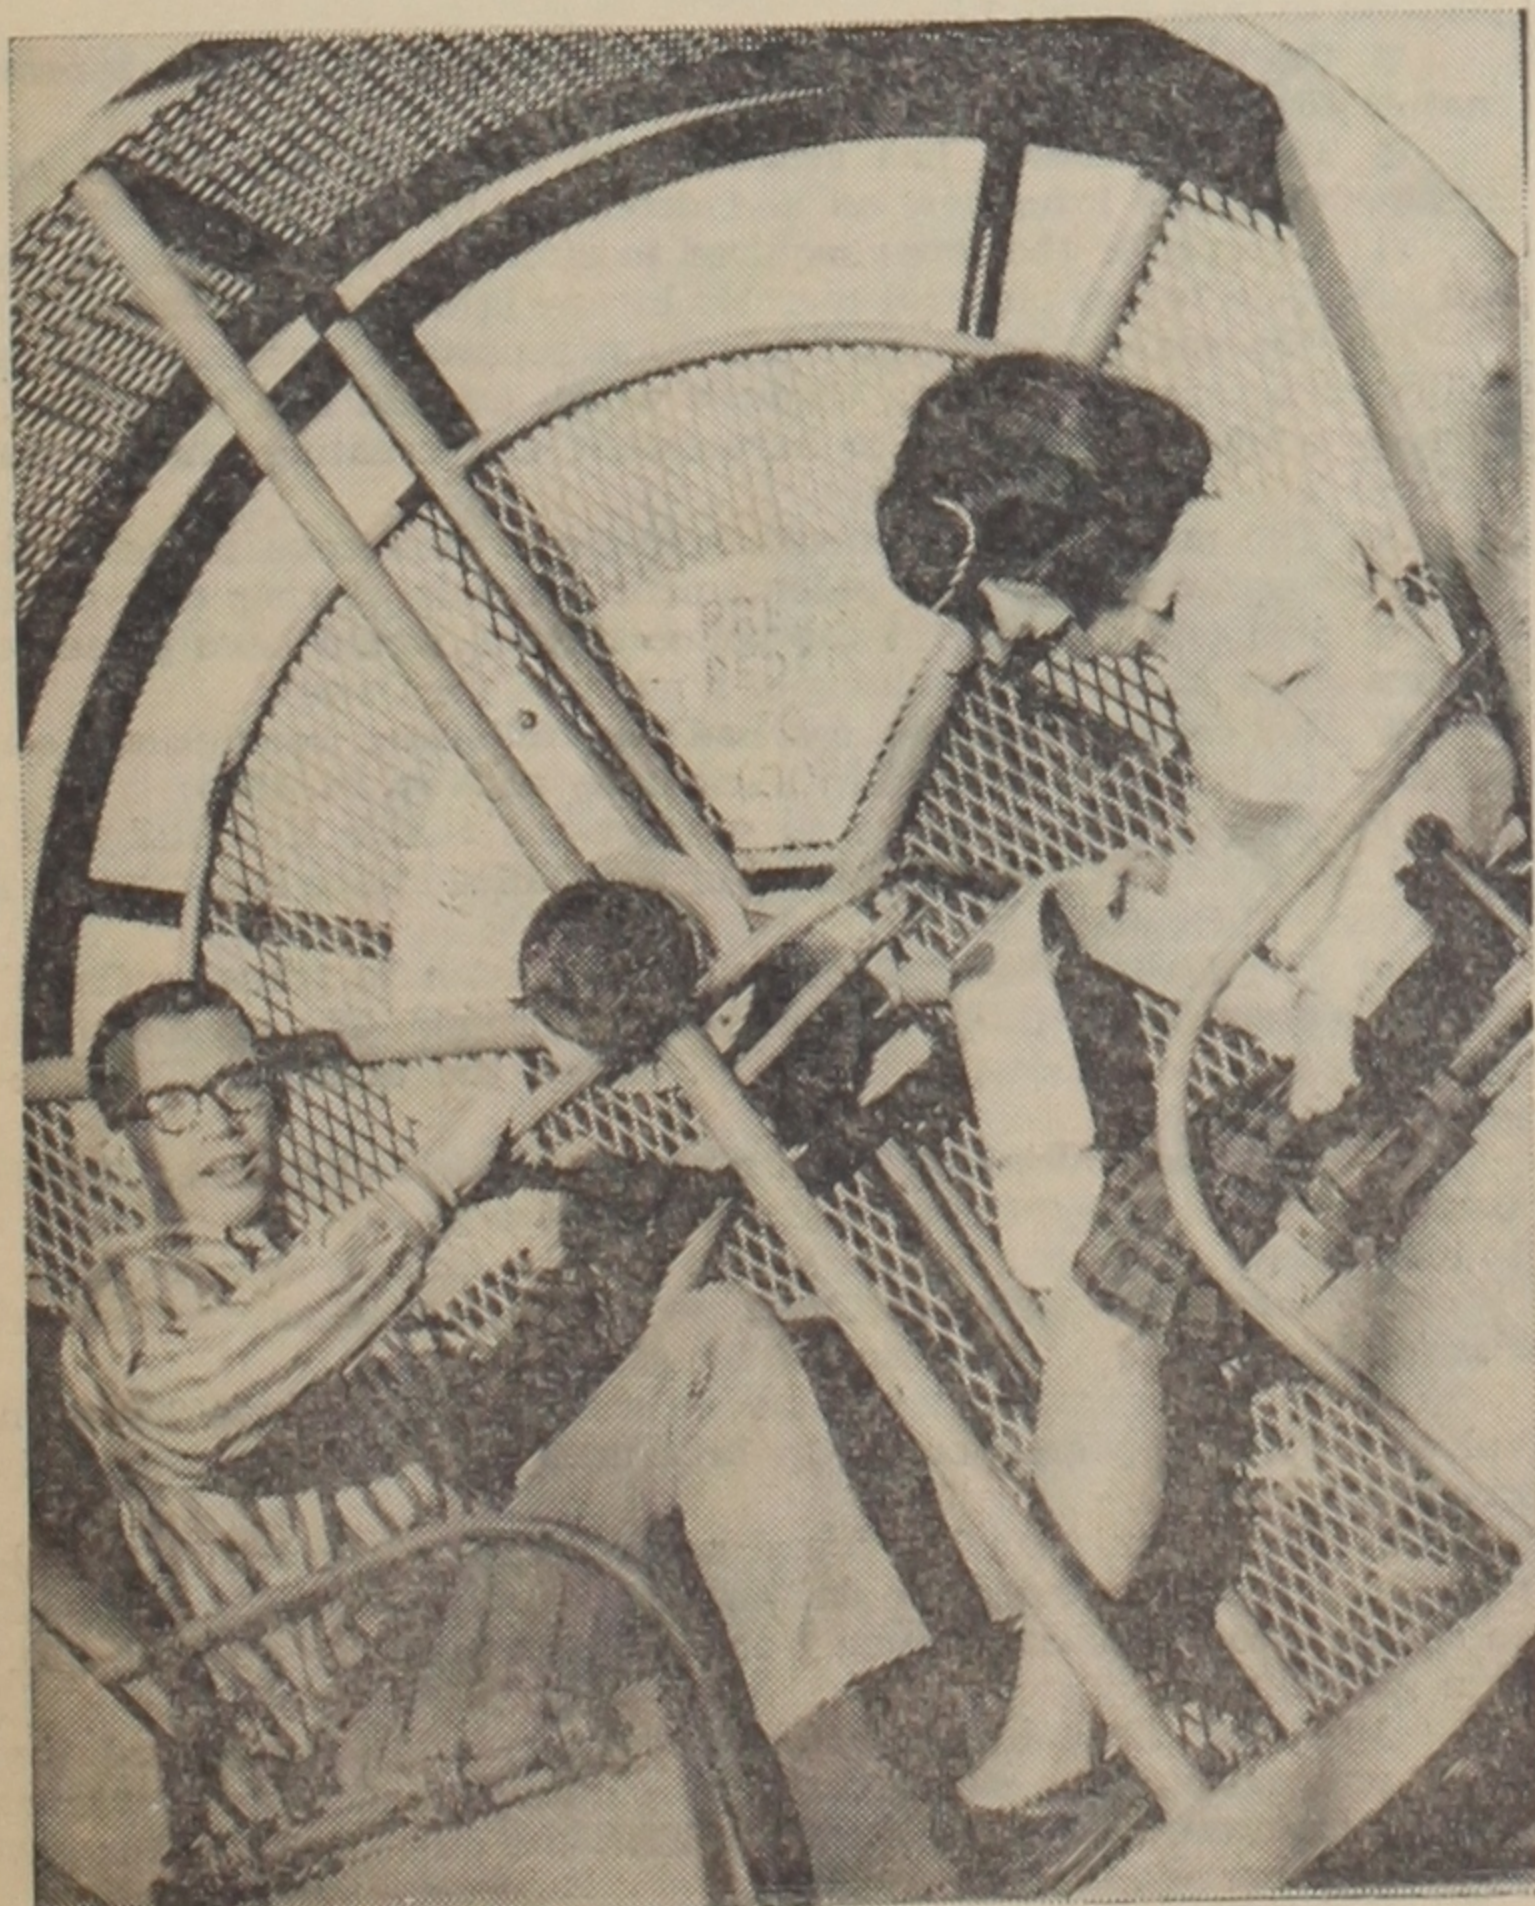

Of special interest, perhaps, were several exhibits of handiwork in arts, crafts and sculptures, which won prizes for some Tech students and a faculty member.

With a "something for everybody" theme seemingly in mind, the fair featured countless homemaking, industrial, mechanical and agricultural exhibits for the serious fairgoer, and the carnival world of noise, colored lights and a chance to win a teddy bear for the younger at heart.

(A) Entering the fairgrounds, senior Harold Rives, Roswell, N.M.; picks out points of interest for Carole Brashear, Petersburg senior, as the two begin a day at the fair.

(B) Carole doesn't seem as enthusiastic as Harold when the two finish a roller ride through the spook-filled halls at the fair's Haunted Castle.

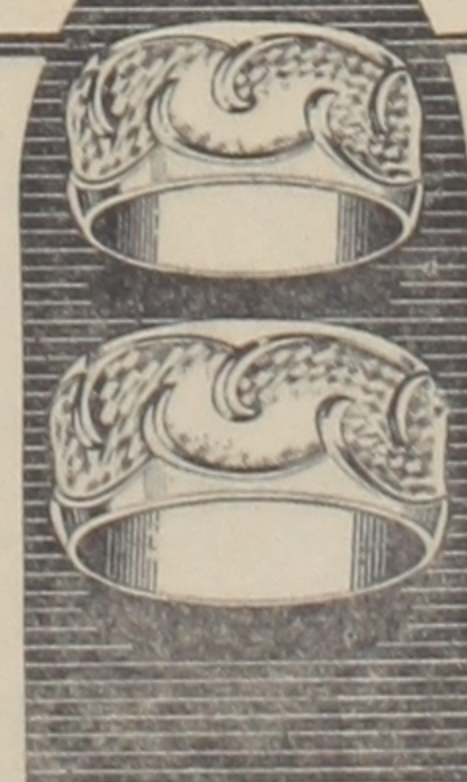

(C) Pausing to appreciate the finer things in life, the couple examine the award winning beauty of a late blooming rose entered in the fair's horticulture competition.

Staff photos
By VERNON SMITH,
ALLYN HARRISON

(D) Carole and Harold round out the day's activities with a whirl on one of the many head-spinning rides on the fair's midway. For those Tech men who failed to win teddy bears for their favorite coeds, the breath-taking ups and downs, ins and outs of the rides offered consolation.

GOOD THINGS ARE HAPPENING TO 7-ELEVEN CUSTOMERS

*7-Eleven Stores make no magic claims about their products or services. They are only reporting these incidents in the public interest.

Eddie Hach...

"I was always bashful and shy. I never could speak before a crowd... until I started shopping at 7-Eleven. What a change has come over me. I'm amazing. I have just been voted Captain of our fraternity debate team."

Slim Binniss...

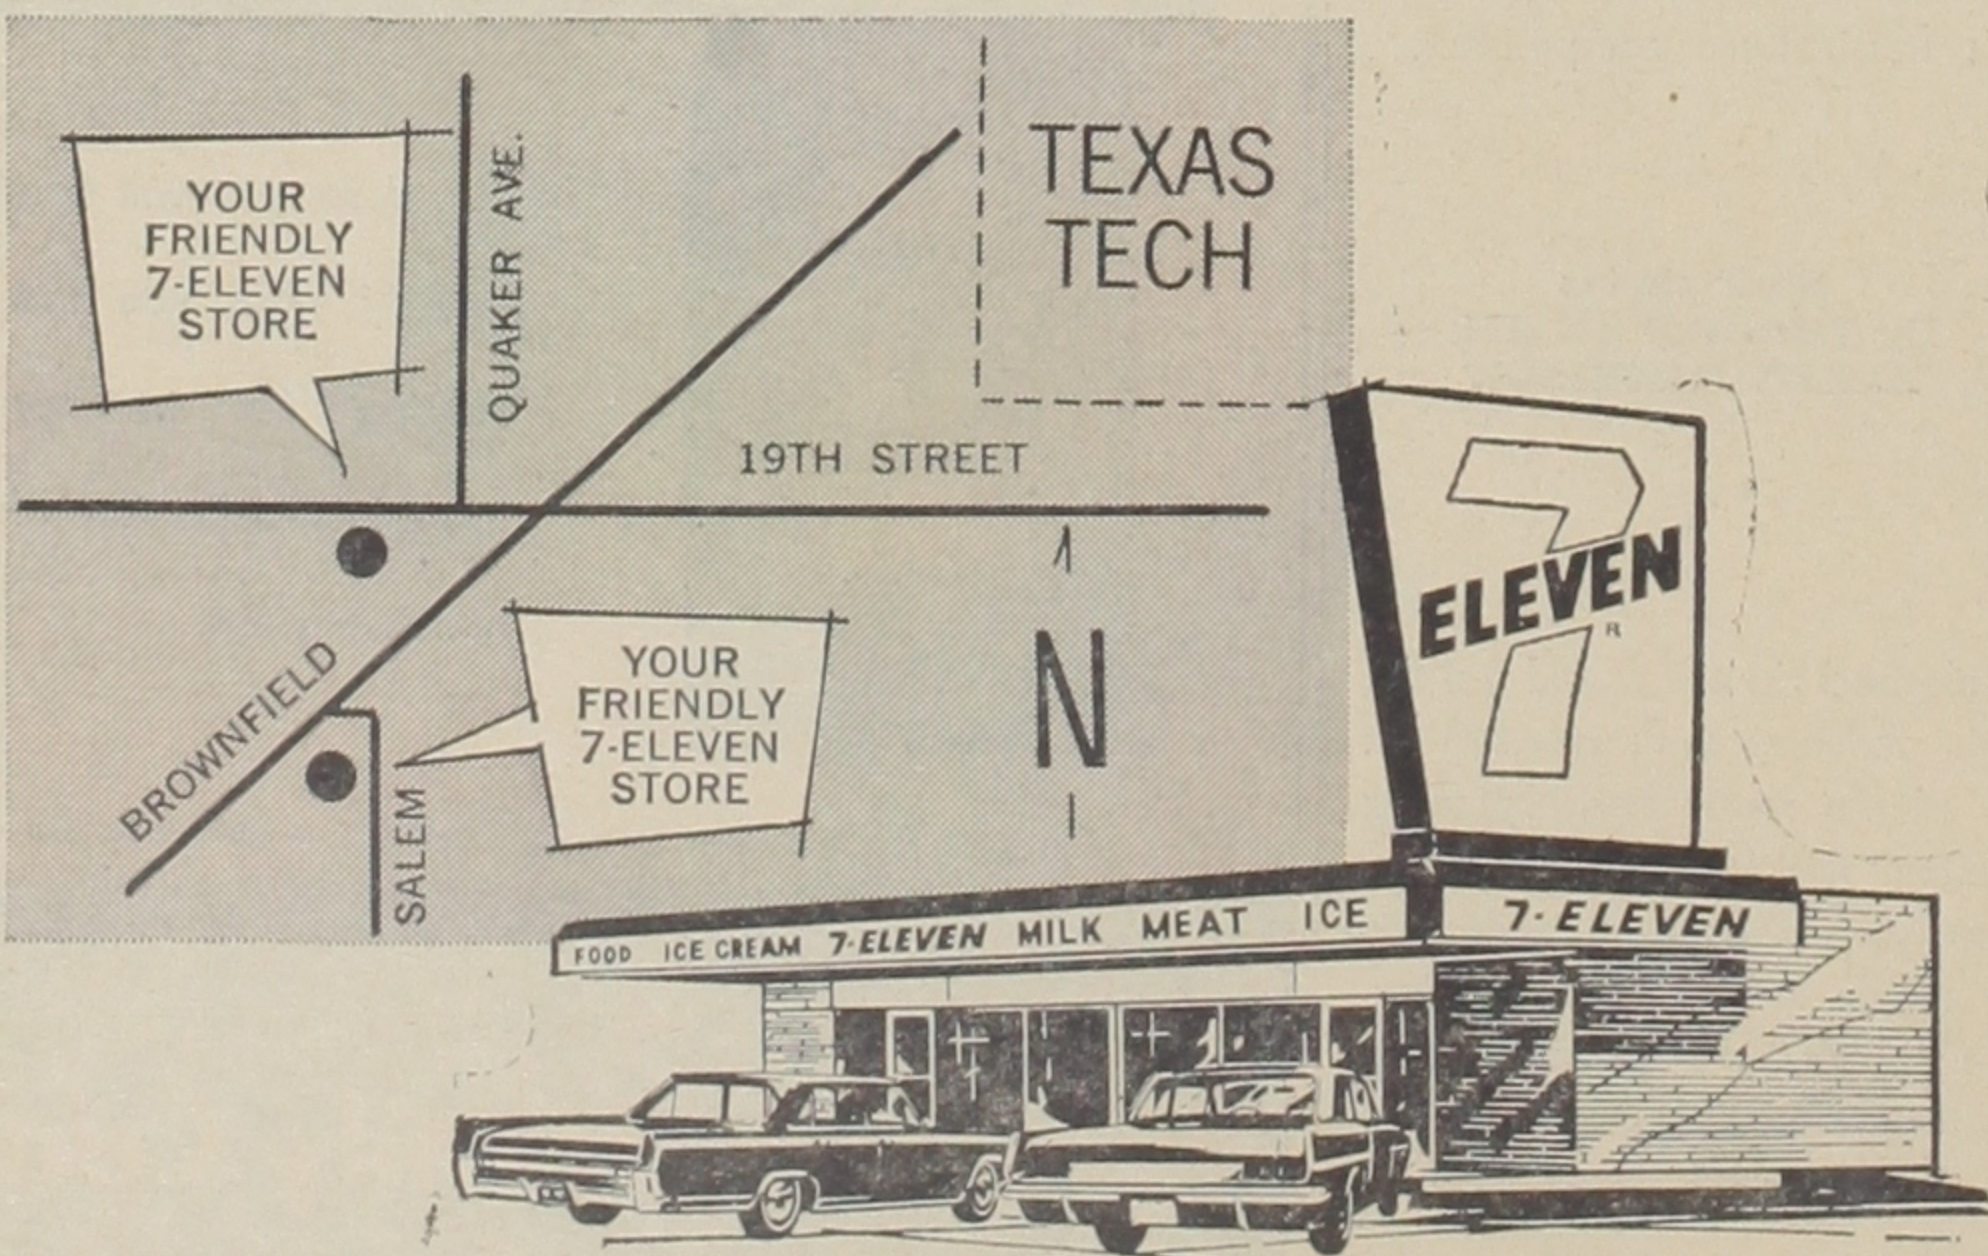

"I live off campus in a trailer camp. It's a long way to walk to class. In fact it was just wearing me out. But after I started shopping at 7-Eleven, I found a short cut."

Hugo Ellendeimer...

"Some one or some thing is writing my Freshman English themes for me. I'll leave the dorm for a pep rally or for my fencing class, and when I get back my theme is already written. It's eerie. This all started happening after I had bought my first quart of milk at that 7-Eleven Store."

7-Eleven Stores are equally famous for Money Orders, Free TV Tube Testing, TV Set Renting, Name Brand Foods and Dairy Products, and so forth. We are also Friendly, Trustworthy, Kind, and Loyal.

—About Murder— Conclusions Drawn By Commission

EDITOR'S NOTE: Following is the fifth in an AP series giving the summary and conclusions of the recent Warren Commission Report. Part of the summary will be run each day until completed.

WASHINGTON (AP)—This commission has reached certain conclusions based on all the available evidence.

These conclusions include the following:

● The shots which killed President Kennedy and wounded Governor Connally were fired from the sixth floor window at the southeast corner of the Texas School Book Depository. This determination is based upon the following:

(1) Witnesses at the scene of the assassination saw a rifle being fired from the sixth floor window immediately after the shots were fired.

(2) The nearly whole bullet found on Governor Connally's stretcher at Parkland Memorial Hospital and the two bullet fragments found in the front seat of the presidential limousine were fired from the 6.5-millimeter Mannlicher-Carcano rifle found on the sixth floor of the depository building to the exclusion of all other weapons.

(3) The three used cartridge cases found near the window... were fired from the same rifle from which fired the above described bullet and fragments.

Windshield Hit, Unbroken

(4) The windshield in the presidential limousine was struck by a bullet fragment on the inside surface of the glass, but was not penetrated.

(5) The nature of the bullet wounds suffered by President Kennedy and Governor Connally and the location of the car at the time of the shots establish that the bullets were fired from above and behind the presidential limousine.

(6) There is no credible evidence that the shots were fired from... any other location.

● The weight of the evidence indicates that there were three shots fired.

● There is very persuasive evidence from the experts to indicate that the same bullet which pierced the President's throat also caused Governor Connally's wounds.

● The shots which killed President Kennedy and wounded Governor Connally were fired by Lee Harvey Oswald. This conclusion is based upon the following:

(1) The Mannlicher-Carcano 6.5-millimeter Italian rifle from which the shots were fired was owned by and in the possession of Oswald.

(2) Oswald carried this rifle into the depository building on the morning of Nov. 22, 1963.

(3) Oswald, at the time of the assassination, was present at the window from which the shots were fired.

Oswald's Rifle Found

(4) Shortly after the assassination, the Mannlicher-Carcano rifle belonging to Oswald was found partially hidden between some cartons on the sixth floor and the improvised paper bag in which Oswald brought the rifle to the depository was found close by the window.

(5) Based on testimony of the experts and their analysis of films of the assassination, the commission has concluded that a rifleman of Lee Harvey Oswald's capabilities could have fired the shots from the rifle used in the assassination within the elapsed time of the shooting.

(6) Oswald lied to the police after his arrest concerning important substantive matters.

(7) Oswald had attempted to kill Maj. Gen. Edwin A. Walker (Resigned, U.S. Army) on April 10, 1963, thereby demonstrating his disposition to take human life.

● Oswald killed Dallas police Patrolman J. D. Tippit approximately 45 minutes after the assassination.

● The commission has reached the following conclusions concerning Oswald's interrogation and detention by the Dallas police:

(1) Except for the force required to effect his arrest, Oswald was not subjected to any physical coercion by any law enforcement officials.

(2) Newspaper, radio, and television reporters were allowed uninhibited access to the area through which Oswald had to pass... thereby subjecting Oswald to harassment and creating chaotic conditions.

(3) The numerous statements, sometimes erroneous, made to the press by various local law enforcement officials, during this period of confusion and disorder in the police station, would have presented serious obstacles to the obtaining of a fair trial for Oswald.

● The commission has reached the following conclusions concerning the killing of Oswald by Jack Ruby on Nov. 24, 1963:

(1) There is no evidence to support the rumor that Ruby may have been assisted by any members of the Dallas Police Department in the killing of Oswald.

(2) The Dallas Police Department's decision to transfer Oswald to the county jail in full public view was unsound. The arrangements made by the police department... before the attempted transfer, were inadequate.

● The commission has found no evidence that either Lee Harvey Oswald or Jack Ruby was part of any conspiracy, domestic or foreign, to assassinate President Kennedy. The reasons for this conclusion are:

(1) The commission has found no evidence that anyone assisted Oswald in planning or carrying out the assassination.

(2) The commission has found no evidence that Oswald was involved with any person or group in a conspiracy to assassinate the President.

(3) The commission has found no evidence to show that Oswald was employed, persuaded, or encouraged by any foreign government to assassinate President Kennedy or that he was an agent of any foreign government.

(4) All of the evidence before the commission established that there was nothing to support the speculation that Oswald was an agent, employee, or informant of the FBI, the CIA or any other governmental agency.

NEXT WEEK: More conclusions of the Warren Commission.

Hoover Warns Against 'Gestapo' Safeguards

WASHINGTON (AP) — FBI Director J. Edgar Hoover has cautioned against establishment of Gestapo tactics in efforts to safeguard the President the Evening Star reported Friday.

He spoke out in testifying before the Warren Commission investigating the assassination of President John F. Kennedy, the Star said in a copyright article, saying "We don't want a Gestapo. We have to, I think, maintain an even balance."

Oswald 'Safe Risk'

He testified also, the Star said, about a State Department document which it said indicated that Lee Harvey Oswald, Kennedy's accused assassin, was a thoroughly safe risk.

Hoover's testimony has not been made public by the Warren Commission. It referred to his testimony in its report on the assassination, published Monday.

FBI Criticized

In that report, it criticized the FBI for "an unduly restrictive view on its role in preventive intelligence work prior to the assassination."

The commission indicated the FBI was remiss in not reporting to the Secret Service Oswald's presence in Dallas.

The Star, in a story by Jerry O'Leary — a long-time friend of Hoover — said a transcript of his May 14 testimony was made available to the Star.

Makes No Comment

The FBI so far has made no comment on the commission's findings, but officials have indicated that the report was taken bitterly by high FBI officials.

Hoover's testimony also included recommendations for protective measures that he thought might be more successful than those employed by the Secret Service up to the time Kennedy was slain last Nov. 22.

"I don't think you can get absolute security without almost establishing a police state, and we don't want that," Hoover told the commission.

Dr. Baxter Will Speak At Session

"Maybe We Need a Sex Revolution" will be the theme for a program sponsored by the Tech Religious Interest Council.

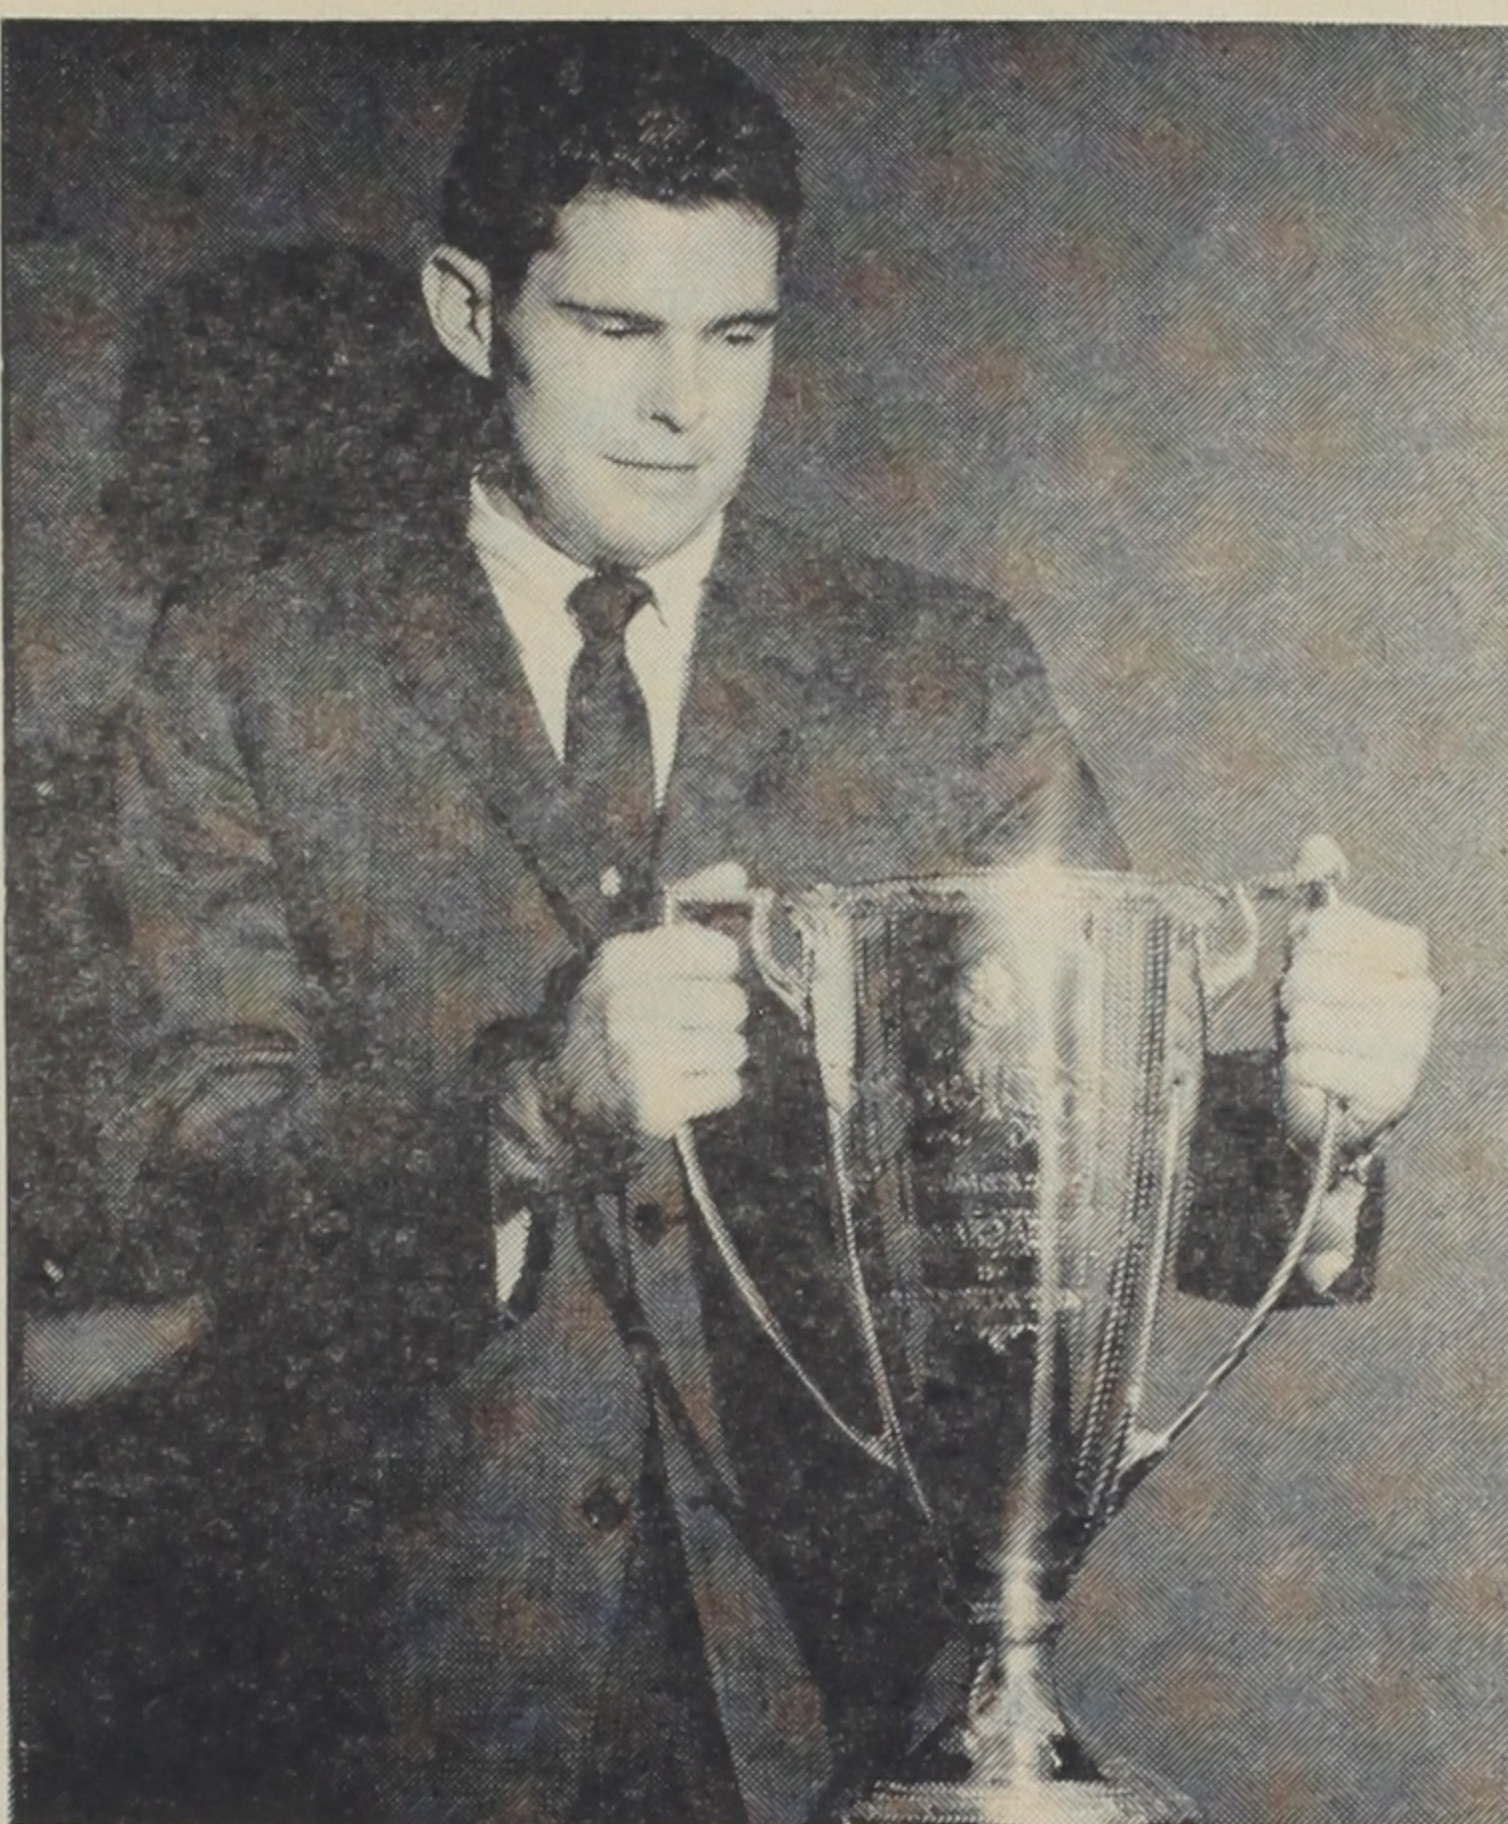

The program will be Tuesday at 11 a.m. in the Tech Union Ballroom.

Dr. Batsell Barrett Baxter, professor at David Lipscomb College in Nashville, Tennessee will be the speaker. Dr. Baxter was main speaker at the opening of the Protestant Pavilion at the New York World's Fair.

He also has served as minister for the nation-wide "Herald of Truth," an ABC television program. Dr. Baxter also has appeared on religious emphasis programs at the University of Tennessee, University of Mississippi, University of Arkansas, and the University of Texas.

At present Baxter is in Lubbock for a meeting in the Municipal Coliseum sponsored by the Churches of Christ in the South Plains area.

Charles Casebolt, senior, president of the Tech Religious Interest Council, is in charge of the program.

FRATERNITY TROPHY — Cliff Mowery, Phi Delta Theta president, shows the Harvard Trophy the Tech chapter won this year at the fraternity's convention in Pasadena, Calif. The trophy, which Tech's chapter has won three times before, is awarded for all-around excellence in scholarship, athletics, and campus activities. Tech's other 10 fraternities also got in on the scholastic honors this week when they were pointedly awarded Summa Cum Laude recognition for having a total grade point average higher than the overall men's grade point average.

Local Phi Delt Chapter Gets National Award

The Tech chapter of Phi Delta Theta was awarded the Harvard Trophy at a national convention held in Pasadena, Calif. recently.

The trophy is awarded each year to the nation's outstanding chapter. The award is granted on the

basis of scholarship, athletics, campus participation and individual participation in school sponsored activities.

Seven members were on hand at the convention to witness Cliff Mowery, chapter president, receive the award. This is the fourth trophy Tech's chapter received during its eleven years history.

According to Russ Wilkinson, vice president of the Tech chapter, the fraternity was organized in 1953 with the national organization. The current enrollment is 104 students.

Included in the chapter's activities are spring service day and preparation of a homecoming float.

Campus Frats Receive Recognition For Grades

For the third consecutive year, Texas Tech fraternities have received Summa Cum Laude designation for scholastic achievement.

The award is presented by the National Interfraternity Conference to colleges and universities in which all fraternities have achieved yearly grade-point averages above their campus all men's average.

Thomas P. Stover, Advisor to Fraternities, Foreign Students, and for Student Loans, received notification of the award, which was presented for the 1963-64 term, on Tuesday.

"Many fraternity systems come under attack because of grades," Stover commented, "but they can't say we have a weak system here

at Tech. Six of our eleven fraternities have received national awards in recent years."

Fraternity over-all grade-point average last year was 2.293, compared to the all men's average of 2.044. All eleven fraternities had averages above the all men's average.

Phi Delt Highest

Phi Delta Theta had the highest scholastic average among Tech fraternities last year, a 2.392. It was rated the top Phi Delta Theta chapter in the nation last year.

Summa Cum Laude designation is a rare achievement among American colleges and universities. Only 31 out of 283 institutions qualified in 1962-63, one of which was Texas Tech.

Tech fraternity average has never been below the all men's average in the eleven years since organization of the first one in 1953. Only twice in the past ten semesters has an individual Tech fraternity been below the all men's average.

Encourage Scholastic Work

The National Interfraternity Conference inaugurated Summa Cum Laude Designation in recent years to encourage high scholastic work among national fraternity members. The conference is a coordinating group for all national fraternity chapters.
