

An Editorial:

Lyndon Johnson Best For Office

THIS PRESIDENTIAL ELECTION is too important for any citizen to remain neutral or have just lukewarm opinions. The demand on democracy is too great for us to fail to stand up at this hour and be counted.

The challenge facing the nation today requires the best of leadership. The international problems confronting the world community of nations must have the attention of the ablest American statesman. The domestic needs of the United States call for the most experienced person to represent the people.

The presidential candidate with these qualifications to have the most important office in the world is *Lyndon B. Johnson*.

President Johnson would probably have arrived in Lubbock today had not a change in the leadership of the Union of Soviet Socialist Republics occurred a few days ago and had not the People's Republic of China exploded a nuclear device.

He cancelled his Texas visit to meet with the National Security Council on these developments and to report on them to the nation.

These two recent international developments will have significant effects on the future of man, and what course man will travel depends to a great extent upon the ability of the United States to cope with any problem that may arise as a result.

In order for this country to have the ability, the election of Lyndon B. Johnson — a man skilled in the ways of government — is a prerequisite.

President Johnson has demonstrated during the past 10 months he has the talents to deal with domestic and international problems without endangering the tranquility of the world or the position of this country.

Like the late President John F. Kennedy, President Johnson is a man of action. He is not content to serve as President with a *laissez faire* philosophy while the economy of the country needs boosting, while many millions of Americans are denied their rights and while aggressors in various parts of the world threaten others.

In supporting President Johnson, we do not wish to be like others and just support the man — the personality.

To support just the candidate and not his party's platform is ridiculous. The two are inseparable.

We join with many others to support not only the man but his program. Perhaps this is far more important.

President Johnson pledges to support the Civil Rights Act, medical care for the aged under Social Security, a mental hygiene program, a war on poverty and the United Nations.

He strongly opposes extremism whether from the right or left, including such organizations the Communist Party, Ku Klux Klan and the John Birch Society.

We support President Johnson and his position on all these things and others.

This may seem to some as blind allegiance, but it is not.

There may be programs initiated or actions taken by President Johnson from time to time that we may oppose or disagree with, but in this presidential campaign we support his position on the current issues.

On Nov. 3 we are confident that Texas Tech students, faculty members and administrators will join with us and other voters of the country to return to office a leader of proven ability—*Lyndon B. Johnson*.

SC To Take Action On Board Question

Action will be taken on whether or not Tech should have a Cheerleader Screening Board during the Student Council meeting at 7:30 p.m. today in the Coronado Room lounge of the Tech Union.

Also included on tonight's agenda will be a discussion of the campus traffic problem and possible revision of the SC constitution's bylaws.

Revives Issue

Reviving an issue which began last year, the Council will vote whether or not to form a Cheerleader Screening Board. Last year such a ruling was passed. However, before the Board could be formed,

the Supreme Court declared the ruling unconstitutional.

"This action was based on a clause in the bylaws which states that all election procedures for the school term must be set up before Oct. 15," said Ronnie Botkin, SC president. If the Council should decide in favor of the cheerleader screening board, a revision will be made in the bylaws, according to Botkin.

NCAA Ratings

The purpose of the screening board would be to determine whether or not a candidate is qualified to run for cheerleader. If the ruling passes, the board will

use the point system established by the National Collegiate Athletic Assn. (NCAA) in rating a candidate's qualifications. Under the proposed plan, each candidate will be required to answer two questions: What they think the duties of a cheerleader are and what ideas they have for the promotion of school spirit. For the second part of the screening process, each candidate will be asked to perform two yells — one already used at Tech and an original.

Take Oaths

During the meeting, three new representatives from the School of Business Administration—Tommy Craddick, Don Foster and David Berry—will take the Council oath.

Roland Anderson, Fort Worth senior, will open discussion on possible revision and amendments for the bylaws with a report from the Self-Evaluation Committee, a group formed to evaluate and determine the effectiveness of the bylaws.

Opening discussion on the traffic problem, Mike Stinson, Houston senior, will give the Traffic Committee report.

The meeting will be open to the student body. "Students will be given the opportunity to express their opinions or offer suggestions concerning the Screening Board Committee and traffic situation," said Botkin.

At Noon Meeting

Group To Organize 'Writing' Campaign

The Joint Name-Change Committee will map plans for a newspaper and advertising writing campaign during a meeting at 12:05 p.m. today at the Episcopal Student Center, Seaman Hall, 2407 16th St.

Russell Bean, chairman, will give

a report on the committee's prospects and long-range plans. Bean, a Lubbock farmer and investor, is a 1933 graduate of Tech and a Tech parent.

The agenda will also include committee reports and a discussion of the membership drive, according to Bean.

GIFT FOR TECH — Jo Hansen, Fort Worth junior, and Carol Dennison, Liberty senior, look over the old steam locomotive which will be formally

donated to Tech in 2:30 p.m. ceremonies Saturday, west of the coliseum.

—Staff Photo

★ ★ ★ ★ ★ Old No. 401 Finally Arrives

The historic Burlington Line's Fort Worth and Denver engine No. 401 and its tender will be presented to the West Texas Museum for permanent display at 2:30 p.m. Saturday in a ceremony on the Tech spur.

The oil-burning steam locomotive, built by the Baldwin Locomotive Co. in 1923, is being donated by the Burlington Lines of Texas.

H. C. Murphey, Burlington president, will make the official presentation to Mark Hailey, West Texas Museum president.

E. L. Simmons, Burlington president in Texas; W. E. Juge, Burlington freight traffic manager; and other local railroad officials will be present along with Tech officials and board members and members of the museum board. Santa Fe Railroad officials also have been invited.

Tech Board Chairman Wright Armstrong of Fort Worth is a former vice president of the Fort Worth and Denver Railroad.

The Tech spur is located west of the coliseum. No. 401 pulled in Sunday afternoon for its final resting place in the fenced-area.

Model UN Announces Applications Available

Application forms for the Tech Model United Nations are now available.

Application forms, letters, and information on selection of a debate topic are being mailed to campus organizations. Students who are not members of some organization can pick up applications at the Union Program Office.

Zafer Cetinkaya, secretary general of the MUN, has announced that more than 110 nations will be represented in the mock General Assembly sessions scheduled Feb. 25-27.

The MUN is a series of mock sessions where various nations, represented by campus organizations, dormitories and independent groups, debate one topic. Topics currently under consideration are "Cyprus," "Pakistan and Kashmir," "Jordan River Problems," and "Palestine Refugees."

A \$10 entry fee will be charged for each delegation. This covers the cost of tickets to the MUN banquet and the expense of printing delegate packets.

HONORARY OPENS

Male students interested in Phi Eta Sigma, freshman men's honorary, should notify the dean of student life's office.

Dad's Association Possesses Brief History Of Productivity

"Will all those in favor of creating a Dad's Association of Texas Technological College please signify by saying aye."

More than 360 fathers said "aye," and on Oct. 19, 1957, the Dad's Association of Texas Technological College began.

Although the Dad's Association began in 1957, the first idea for an organization was created in 1954. At that time Jane Matthews, assistant dean of women, suggested the creation of a Parents' Day at a meeting of the Association of Women Students.

Former Parent's Day

Parents' Day lasted from 1954 until 1957 when the Dad's Association began. The constitution was written by a committee consisting of Dean James Allen, Mr. Earl Collins, Dr. William H. Gordon, and Mr. Edwin E. Merriman. Gordon was the first president of the Dad's Association, and since 1957, Dean Allen has co-ordinated activities between the Dad's Association and AWS.

Past presidents of the Dad's Association are Dr. W. H. Gordon from Lubbock; O'Brien Thompson, Amarillo; Raymond Pfluger, Eden; Mark Gardner, Dallas; Paul F. Sustwick, Yoakum; Rigdon Ed-

wards, Sweetwater; Fred Hill, Fort Worth; Bill Collins, Lubbock.

According to Dean Allen, the Dad's Association has helped Texas realize that higher education needs recognition in order to progress. This recognition comes in the form of trustees elected from the association who represent each congressional district in Texas. One trustee is elected from out-of-state, and one represents each district that has over 100 Tech students.

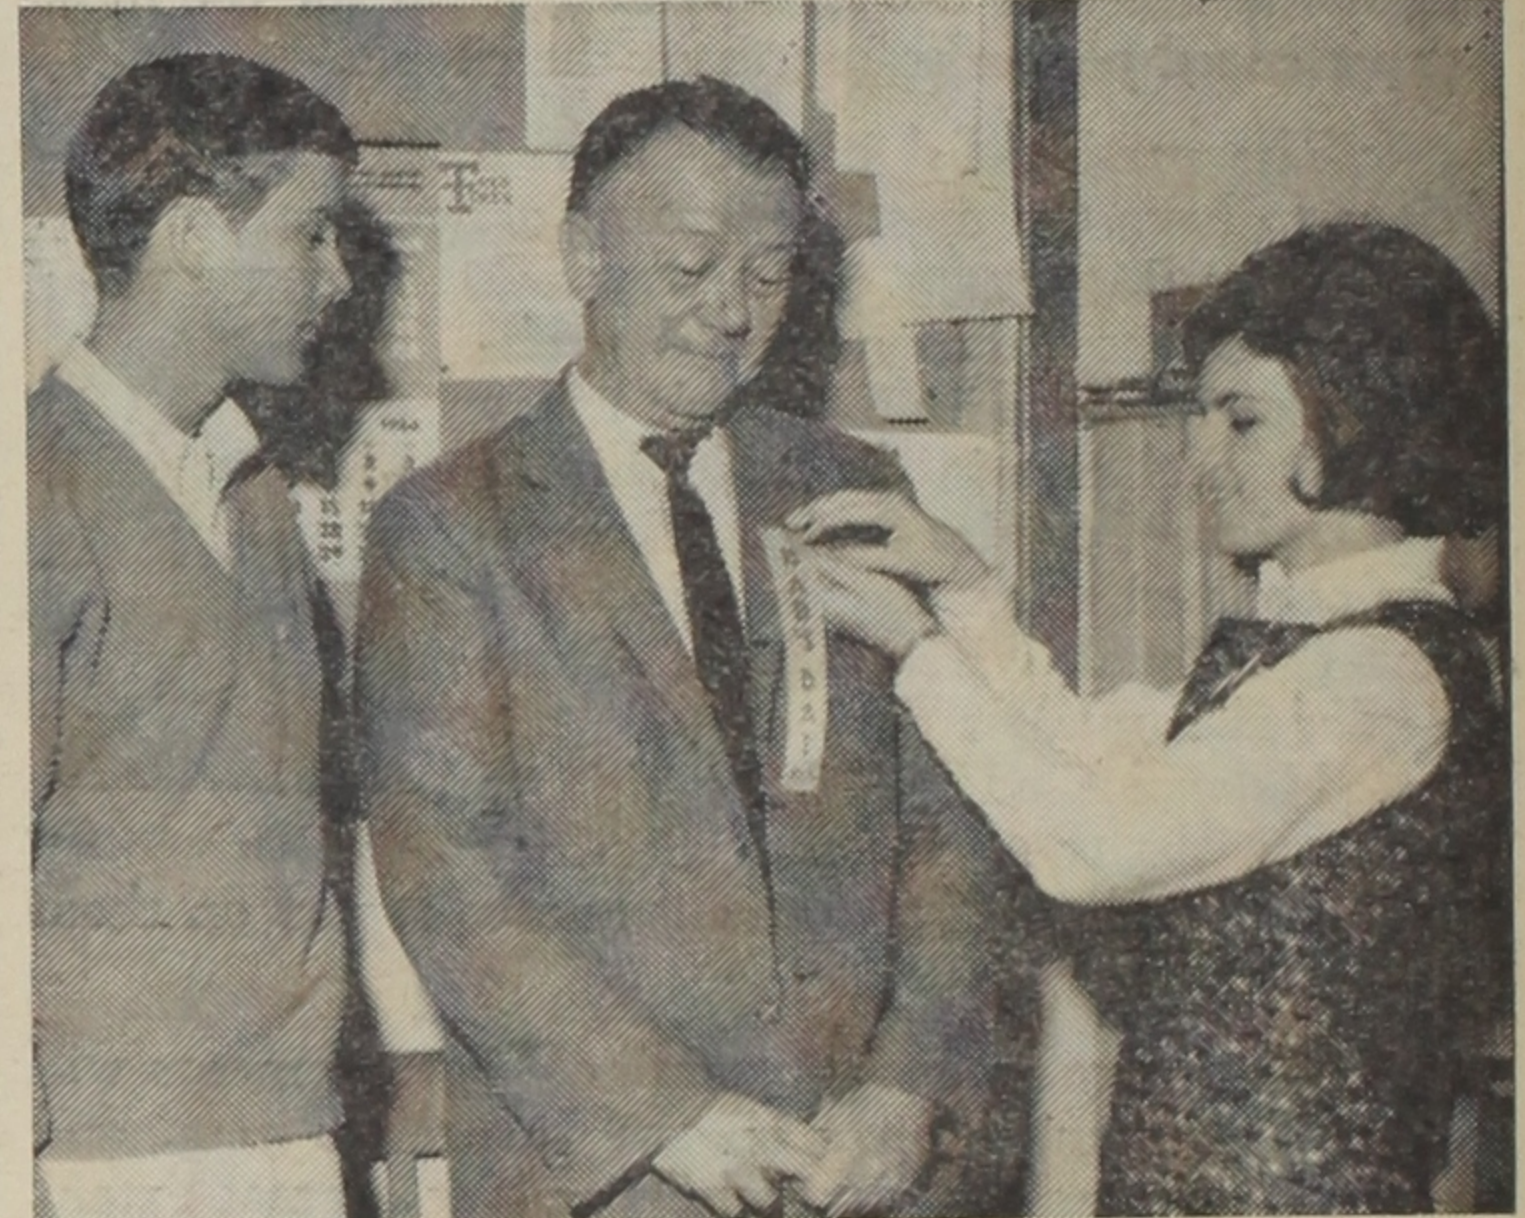

Scholarship Gifts

To further the need for higher education for young people, the

Dad's Association also gives four scholarships each year.

The University of Texas and the University of Oklahoma were the first universities to have an association for dads, and with student encouragement and active participation on the part of each dad, the Dad's Association of Texas Technological College will grow to be as big as that of UT and OU.

Techsans will welcome their dads on Saturday as they celebrate the eighth anniversary of their association.

FACULTY DAD — Robert Heine, left, watches as Virginia Fry pins an official Dad's Day ribbon on his father, Richard Heine, a Tech professor. Miss Fry, publicity chairman for Dad's Day Committee, said that all Tech Dads will be honored Saturday.

THE DAILY TOREADOR—An all-student newspaper edited by students for 40 years.

Where Is Your Voice?

THE TEXAS TECH Student Council meets again tonight.

As usual, the only ones expected to attend are the 35 duly elected representatives from the five undergraduate schools.

Last year, WE elected these 35 students: 16 from the School of Arts and Sciences, seven from the School of Business Administration, seven from the School of Engineering, three from the School of Agriculture and two from the School of Home Economics.

Add to this number the four executive officers of the Council and you have the 39 persons on campus who are responsible for proposing and putting into effect legislation that affects more than 13,000 other students.

In today's 7:30 p.m. meeting in the Coronado Room lounge, representatives are scheduled to discuss and vote on the controversial Cheerleader Screening Board, the growing traffic problem and possible revision of the Student Assn. constitution.

Action is needed on these topics, and we know action will be taken.

This is as it should be. We elected these students and they would not be doing their jobs if they did not act, and act promptly on matters of importance.

However, these 39 students cannot do their job alone. They may represent everyone on campus, but it is a physical impossibility for these representatives to stop and talk with every student and hear 13,000 opinions.

But all opinions, from all students, have a right to be heard in this representative government. This, also, is as it should be.

Make your opinion known tonight.

Kind Of Spirits Needed

BAYLOR STUDENTS WERE primed for a victory Saturday night, and as it turned out they weren't disappointed.

Despite a winless 0-3 record, they were behind their Bears all the way and doubtlessly played a big part in the victory.

More than a dozen large canvas signs prepared by various Baylor organizations appeared around the campus, sporting such alliterative slogans as "Rack the Raiders" and "Trample Tech."

One group sold pins for a penny each to put a "voodoo curse" on a Red Raider dummy which appeared in the Student Union. More than a thousand were sold in the university, which is less than half as large as this one.

Spirit ribbons were sold by the Baylor Chamber of Commerce reading, "Baylor Theology Over Texas Technology." A pep rally attended by a large part of the student body was held Thursday night. Gold and green streamers were placed on cars free of charge by one organization.

Mayor Roger Conger even proclaimed Saturday as "Rustle the Raiders Day" in Waco.

All this in a game which precedes Baylor's homecoming by only a week, and on a school showing a winless record.

This type of spirit is unusual in any school, regardless of its record or size.

This is the kind of spirit Texas Tech needs, not only in football, but in all sports. Being a winner or a loser should not matter.

Tech Union--By George

By STEVE GEORGE
 Tech Union President

Assume that you are a distinguished British poet having been born near London, England, in 1909.

You are considered one of the three foremost post World War I poets in England—along with W. H. Auden and C. Day Lewis.

One typically cloudy, foggy Monday you board a plane at London and fly to New York City. After one day's rest in New York you leave for your ultimate destination—Lubbock, Tex.

Does that sound ridiculous? Maybe so, but that is exactly what will happen in one week as the Ideas and Issues Committee and the Fine Arts Committee of the Tech Union present Stephen Spender, one of the most significant voices of his day in modern poetry and politics, in his Texas Tech debut on Wednesday, Oct. 28, at 7:30 p.m. in the Coronado Room.

Stephen Spender is a traditional romantic poet who uses modern language to express his views on art, nature and politics. A background of an Oxford education and an association with such men as W. H. Auden, C. Day Lewis and Edwin Muir creates an interesting and even controversial personality.

His romantic tendencies and revolutionary political policies have led some critics to compare Spender to Shelley, the 19th century English romanticist.

"What is modern art?" is the title he has chosen for his lecture. Relationships and contrasts between modern literary works of art and modern paintings will be discussed with special attention given to H. G. Wells, Sinclair Lewis, G. B. Shaw and William Faulkner.

Even if you are not interested in poetry or modern literature, you should make an effort to attend this lecture. You have an opportunity to meet and talk with an outstanding personality in the field of literature and you may acquire a new appreciation for his art.

As you may know, work on the annual Tech Model United Nations is well under way—even though the actual event is months away. In connection with this, one of the upcoming Union activities will be the UN room forum on Friday, in the Blue Room. Dr. Martin Tamkog, a Fulbright scholar from Turkey, will speak on "The U.S. in the UN" at the \$1 a plate buffet lunch.

For all of you dance fans, there will be the usual TGIF dance every Friday at 4 p.m. in the snack bar. And next weekend, the Velvetens will play for the after-game dance at 10 p.m. in the Ballroom immediately following our victory over SMU.

Speaking of SMU, the Tech game will be the Methodist's school trip and the Student Council and the Union's Hospitality Committee will host a reception for the 30-or-more delegation in the W. L. Croslin Room (foyer) of the library at 10 a.m. next Saturday.

Another reception, this one for all Non-American Tech students and labeled as an International Student's Reception, will be Sunday, Nov. 1, at 4 p.m. on the Sun Porch (immediately outside the Ballroom).

Another big event, the most important in the minds of all bridge-playing addicts, is the annual Bridge Tournament starting at 3 p.m. on Sunday in the Coronado Room. Sign-Ups will continue until Friday.

All parents, both student and faculty, are urged to take their young ones to the Children's Halloween Party on Thursday, Oct. 29, at 7 p.m., in the Coronado Room. The Hospitality Committee is sponsoring the event as it did for last year's big success.

VOICE

of the People

Young Democrats Answer Charges

Dear Editor,

On the thirteenth of this month, the DAILY TOREADOR published a letter written by Mr. George Minton. Mr. Minton charged that certain "Democrats" (which he did not name!) had been responsible for the destruction of a "Vote Goldwater" sign which was atop his car.

According to Mr. Minton, the sign was destroyed on a campus parking lot. He also accused "Democrats" of removing the remaining nuts from the wheel of a Republican party fire truck.

These are serious accusations. And although they might be true, we cannot find evidence to support the notion that the incidents were the doings of any Collegiate Young Democrat, or other party member, for that matter.

Therefore, the Resolutions Committee has issued Mr. Minton a challenge: if he can provide us with the names of those guilty, and if these individuals are Collegiate Young Democrats, we will be more than happy to replace his "other candidate sign," for we feel a certain responsibility for the political actions of our members.

We also think that Mr. Minton, if he knows the identity of those guilty, should report them to the proper authorities, who, we hope, will show the vandals no mercy.

But on the other hand, if Mr. Minton wrote to the TOREADOR without giving enough consideration to the seriousness of his accusation of all Democrats, we ask that he use more discretion in the future, and we would welcome a public apology. It is our belief that before one charges a group with a misdemeanor, he had best know the identity of those guilty.

Vandalism will occur during any political campaign. Those guilty of such actions are neither conscientious Republicans nor conscientious Democrats, for the sincere of both parties are serious in respect for the spirit of healthy competition.

We condemn vandalism against either side of the campaign, and we are sure that the opposition agrees with this attitude.

Mr. Minton wrote to express his indignation, and we join him in this, but we can't find any reason whatsoever to indicate that the vandals in question were Democrats.

Honorary Union Set Contest

Sigma Tau Delta, English honorary fraternity, and the Tech Union are co-sponsoring an essay contest as a part of the annual Fine Arts Festival.

The contest, open to all Tech students, will be concerned with any of the arts prominent during Shakespeare's era. Essays will be judged on originality, vividness of detail and effectiveness of composition, and should not exceed 500 words.

Winners will be announced and prizes awarded by Basil Rathbone, celebrated movie actor and Shakespearean reader, at a luncheon Nov. 17 in the Coronado Room of the Tech Union. First prize will be \$10; second prize, \$7.50; third prize, \$5.

Entries must be turned into the English office in the C&O Bldg. by Nov. 2.

HORTICULTURE QUEEN — Carole Brashear, Petersburg senior, was chosen as Horticulture Queen Friday night at the annual Horticulture Club party. Her escort, Ray Vaden, Odessa senior, pins on her corsage.

AWS Pair To Attend Scientific Symposium

Tech's Assn. of Women Students is sending two delegates to a science symposium sponsored by the Massachusetts Institute of Technology AWS Friday and Saturday.

Tech delegates, Zafer Cetinkaya and Keitha Davis, were chosen by the AWS executive council on a basis of their ability and interest in professional careers in the physical sciences or engineering.

Carol E. Gustafson, association president at MIT says the symposium will make it possible for a group of highly qualified men and women to explore the personal, social and economic factors involved in a woman's commitment to a

scientific professional career, to report on the current status of women in industry and the academic world, to probe the problems associated with the employment of women, and to analyze a woman's prospects in these fields.

The material will be considered in a series of lectures, panel discussions, and informal meetings between guest speakers and student delegates.

JOHNSON CANCELS VISIT

Representatives of Lubbock Democratic Headquarters told the Toreador Monday President Lyndon Johnson's visit to Lubbock, scheduled today, has been cancelled due to the condition of world affairs.

'Blues' Slate Final Drills

More than 70 girls will meet at 5 p.m. Wednesday for the second practice of Army Blues. Eliminations will begin after all practice sessions are completed Oct. 28.

Under the new constitution not more than 45 girls will become members.

New members will elect their officers and choose their uniforms. Kay Burlison is acting commander and organizer of the group.

La Ventana Sales Soar

La Ventana, Tech yearbook, has one of the highest college yearbook sales records in the U.S. This fall 7,945 yearbooks have been sold, an increase over last year's sales by 1,105.

"Our high sales," said Phil Orman, director of student publications, "are, I think, due to the type of yearbook we have. It's interesting to everyone. A 'regular' yearbook serves no purpose as far as journalism goes. Students get the experience of producing an actual magazine, which can cover so much more, so much better."

Tech's yearbook was the first in the U.S. to introduce the magazine format. The innovation, produced in 1959, was designed by W. E. Garets, head of the Journalism Dept.

SPECIAL to Tech Students-

Alpha Tau Omega

On September 11, 1865, three young Confederate soldiers assembled together at the Virginia Military Institute in Lexington, Va., and founded the Alpha Tau Omega Fraternity. Otis Allan Glazebrook, Alfred Marshall, and Erskine Mayo Ross were cadets at the institute during the Civil War . . . and had seen active duty in the Confederate Army. Their prime objective in forming this brotherhood was to restore the Union, to unite fraternally the young men of the South with those of the North. It was the first Greek fraternity to be established at the Institute and the first after the war. It was not established in imitation of, or in opposition to, any existing Greek fraternity.

The Texas Tech Zeta Eta Chapter of Alpha Tau Omega came on the campus in 1953. It had originally been the social club called the Wranglers. In these last eleven years the ATO's have established many traditions . . . Invitational Basketball Tournament in which other fraternities are invited from other Universities to compete along with the fraternities at Tech. Along with this is the 'Babes in Toyland Dance', and 'Grecian Party'.

Not to be overlooked is the main purpose of the fraternity. A brotherhood which binds men together to stress the qualities of scholarship and character, to make better men in the world today, both socially and spiritually.

Students Paid To 'Oversleep' In NASA Immobilization Test

By DON FORESTER
Feature Writer

Imagine being paid \$30 a day to pull the covers around your ears and deliberately ignore the shocking metallic clang of an early morning alarm clock.

Unbelievable as it may seem, this is precisely what the federal government paid 10 college students to do last summer.

In a series of bed rest immobilization experiments conducted by the National Aeronautics and Space Administration (NASA), students were selected to spend three months taking part in an assimilated space flight designed to discover some of the physiological as well as psychological problems encountered by astronauts.

MSC Studies

Sponsored by the Manned Spacecraft Center at Clear Lake, near Houston, the studies were conduct-

ed by a team of young medical researchers, Drs. Fred Vogt and Moise Axelrad, through the facilities of the Texas Institute of Rehabilitation and Research located in the Texas Medical Center, also at Houston.

Studies were divided into three time periods consisting of approximately 30 days each. The first four days of each period were used to record the physical and mental condition of the subjects prior to immobilization. Immobilization lasted for exactly 10 days during which time strict controls were enforced on the participants. At the end of the 10 days each subject was tilted on an electric table (a procedure designed to produce the effect of weightlessness) while crucial data, pertaining to his blood pressure, heart rate and general respiration, was recorded

by a battery of electronic computers.

Back To Normal

The remaining 16 days were occupied with recovery to a normal condition and various testing procedures.

The 10 men chosen to participate in the studies were selected from more than 100 applicants, after a thorough screening process. Each student was considered for his intellectual background and general physical condition.

Six were Australian athletes from Lamar Tech and the University of Houston while two more were members of the Texas A&M track squad.

It was decided to use predominantly athletes, because their physical conditioning more closely represented that of the astronauts.

During the entire study, attempts were made to assimilate as closely as possible an actual space flight.

Each day the subject were given extensive psychological tests as well as strenuous physical exercises. Even while immobilized the exercises were carried on. Each bed had equipment built onto it so exercises could be conducted with a minimum of movement and delay.

A strict low residue diet was established and three dieticians and two dietary aides worked full time meticulously measuring and weighing each gram of food prior to consumption.

Psychological Aspect

One of the most interesting aspects of the experiment was the psychological tests conducted by Alan Fhurer, a psychologist. Fhurer subjected each student to a number of reaction and perception tests. Aside from this, each subject was secretly rated twice daily by the researchers, pertaining to his general attitude.

The subjects responded well to their confinement, although a few of the more active individuals pasted dollar signs over their beds as a constant encouragement.

Most of their spare time was devoted to reading or playing assorted board games. One of the Australians completed two correspondence courses during the three months he was affiliated with the study.

At night television provided entertainment and various NASA films, such as the official record of John Glenn's history-making flight were shown.

Data Compilation

Data compiled from the \$200,000 study will be capable of filling the volume required for a set of the Encyclopaedia Britannica.

It is hoped that the results of the experiments, which are still being translated, tabulated and interpreted, will help solve some of the major problems concerning the human body and its reaction to space flights of prolonged nature.

Especially, it is hoped that vital information will be obtained concerning muscle deterioration and loss of principle body elements through urine output.

Choose your own pharmacist—Have your physician write your prescription and hand it to you so that you may exercise your own choice of a pharmacy.

The Texas Medical Society and the Texas Pharmaceutical Assn. have in a joint Code of Inter-professional Relations adopted the position that the patient should have free choice of pharmacist and physician.

Tech Misses Opportunity, Loses To Bears

By DAVID SNYDER
Sports Staff

WACO — Texas Tech missed its golden opportunity here Saturday night as the Red Raiders fell victims to the Baylor Bears, 28-10.

A Tech win, coupled with Texas' defeat at the hands of Arkansas, would have left the Raiders in excellent position for a high finish in the Southwest Conference race.

But the Raiders didn't have it on this night, as they fell victim to a hustling bunch of Bears, a pass-minded quarterback named Terry Southall and a big, bad break.

Southall riddled a Tech pass defense for 197 yards as his receivers constantly popped up open in the middle of the Tech defense secondary. Flankerback Lawrence Elkins snagged seven of Southall's 13 completions in his best showing of the year. His receptions added up to 138 yards.

The bad break, and what proved to be the turning point in the game, came with only 1:51 left in the first half. Techsan Donny Anderson was backed up in his own end zone to punt. Center Wayne Barginear bounced the snap back to Anderson, and he had no chance to kick.

Baylor scored from the two yard line in two plays.

Gives Bears Confidence

That gave the Bears a 14-10 lead and enabled them to leave at the half on the long end of the score, with the idea that maybe they could win a game.

They returned in the second half with that attitude and limited Tech to six first downs and only one penetration into Baylor territory. The Bears added two second half TD's of their own to salt away their first victory.

Tech had been cruising along with a 10-7 lead late in the second quarter when Baylor's go-ahead touchdown came along.

Both Teams Score

Both teams scored the first time they got the ball.

Baylor scored first as Southall completed five of six passes for 54 yards, including an 8-yard TD toss to end Ken Hodge. Baylor led 7-0 with eight minutes left in the quarter.

The Red Raiders roared back with two scoring plays to take the lead. The first was climaxed as halfback Johnny Agan scampered over the double stripe from five yards out with 3:10 remaining in the first period. Richard Perry booted the extra point.

The big play in the drive was a 17-yard pass completion from quarterback Tom Wilson to Jim Zanios.

Tech Moves Again

Tech was on the move again some six minutes later.

They drove from their own 20 to the Bear 24 before bogging down when Wilson was thrown for a 9-yard loss while back to pass. Place-kicker Kenneth Gill then booted a 40-yard field goal to give Tech the advantage, 10-7.

The 56-yard drive had consumed 18 plays. Tech's pre-game plan of ball control was running true to form until Baylor stumbled onto their second touchdown and the Raiders found themselves playing catch-up ball in the second half.

Stopped In Second Half

Penalties, miscues and a determined Baylor defense kept the Raiders in the shadows of their own goal most of the second half. They could never advance beyond the Baylor 31-yard line.

In the meantime Baylor was adding 14 more points to their total as Southall's passes threaded the Tech pass defense for consistent yardage. Fullback Tom Davies and Southall countered the touchdowns on one-yard plunges.

Two pass interceptions and a fumbled punt by Teddy Roberts ended any Raider hopes of a rally in the fourth quarter.

Picadors Drop Game To Shoats, 18-14

The Texas Tech Picadors took advantage of a couple of first-half breaks to earn a 14-6 half-time lead Saturday afternoon against Arkansas in Little Rock, but could not score in the second half and dropped an 18-14 decision to the Shoats in their first game of the year.

Arkansas scored first on a 5-yard pass, but Tech retaliated early in the second quarter when halfback Kenny Baker intercepted a pass and returned it 28 yards to the Shoat two.

Fullback Andrew Reed scored on the first play. Bob Bearden booted the extra point and the Picadors led 7-6.

A bad center on an Arkansas punt led to Tech's next score. They were kicking from deep in Arkansas territory, and the miscue put the Picadors in business again on the Shoats 2-yard line.

This time halfback Gary Golden scored on the first play, and

Bearden's PAT left the scoreboard at 14-6 at halftime. and promptly pushed across two touchdowns to taken an 18-14 lead.

— For Baylor Defeat —

King Blames Lack Of Mental Preparation

Texas Tech head coach J T King blamed Saturday night's defeat at the hands of Baylor on lack of mental preparation at Monday's Red Raider Club luncheon and then quickly added that part of the blame rested with the coaches for what he termed "over-coaching."

"We probably had them (the defensive secondary) watching Baylor's receivers too closely," he told the Raider boosters, "and they wound up spreading out and doing nothing."

King said that he felt the Raiders played their worst game of the year as a team due to their mental condition. He attributed many of the penalties that hurt the Raiders to this factor, "Baylor put in more preparation than we did, and therefore they won and we didn't," he said.

King said the Raiders had a good

night offensively, but that the defense was not up to par. He said, "We have no alibis for not scoring."

Another factor hurting the Raiders' cause was the bad physical condition of their ends. "That hurt us as much as anything," King said.

"I was expecting to win this game too," King told club members, "but it's hard to be up for every game and the coaches just couldn't jar them out of their complacency. I think we'll be up for the next two games (against SMU and Rice) for sure."

Speaking again in regard to mental alertness, King said a team has to be ready mentally to win in the Southwest Conference. He cited Texas' loss to Arkansas as an example.

The Red Raider mentor then

looked on ahead to SMU, saying it would take an all-out effort to beat the Mustangs. "SMU has had problems offensively, but people usually wind up solving them against us," he said in probable reference to the Baylor game.

Assistant coach Joe Blaylock, who scouted SMU vs. Rice this past week, added several remarks in regard to the Mustangs, whom Tech plays this Saturday night at Jones Stadium.

He praised the Mustangs' kicking game and defensive team. Punter Danny Thomas, conference leader in that category, is capable of keeping Tech's back to the wall, he said. "We'll just have to hope to keep our field position with Anderson's kicking."

The Mustangs have a fast, quick defense with three top-flight linebackers. The Mustangs proved that Saturday in a 7-6 loss to Rice.

Blaylock reported that the Methodists use a platoon system similar to Tech's and that they have 20 returning lettermen.

"All in all, if we're going to beat SMU, we'll have to give a real big effort," he summarized.

Freshman coach Berl Huffman, who was expected to report on the freshman game against Arkansas Saturday afternoon, was not present at the meeting.

Anderson Leads Tech In Four Departments

Tech's Red Raiders, having an impressive season, show fine individual and team statistics. These figures include Tech's 28-10 loss to the Baylor Bears Saturday.

Donny Anderson, the swift half-back from Stinnett, leads the ball club in four divisions. Anderson has a total of 476 yards on 103 carries for an average of 4.6 yards per carry. He also leads in pass receiving with 14 snatches for 176 yards. In punt returns Anderson has a 14.0 average and in kick off returns he has logged a 19.2 average.

Agan Impressive

Johnny Agan has also been a very busy ball carrier with 257 yards on 57 carries for a 4.5 yard average. Agan places second in pass receiving with 8 catches but fullback Jim Zanios has 57 yards in pass receiving to place second in

the pass reception yardage department.

Quarterback Tom Wilson has thrown 56 passes and completed 21 for 313 yards and a completion per cent of 48.2. Defensive halfback Teddy Roberts has stolen five enemy passes for 62 yards.

Zanios Averages 4.8

Zanios, the pile driver, has rolled for 247 yards on 52 carries to post a 4.8 yard average. Anderson has punted 27 times for 1,005 yards and a fine 37.2 average. Zanios and Anderson lead the team in scoring with three TD's each for 18 points. Zanios is the only regular back not thrown for a loss this season.

The Raiders have out-distanced the opposition in net yards rushing 986 to 592, and in total offense 1,319-1,303.
