REPORTERS—Bess Baldwin, David Buckingham, Billie Jean Burrell, Joan Edwards, Novaline Freeman, Jim Hininger, Barbara Green, Anne Hurt, Pherba Jordan, Barbara Livingston, Patsy Miller, Maxey Pinson, Christine Tippit, Ivan Tucker, Jane Watson, Dorothy Helen Williams, Earline Young, Mildred Young.

## What About Us?

Old-Timers on the campus will remember back to pre-war days when the local radio station KFYO had a station announcement that went something like "This is KFYO, Lubbock, Hub of the Plains and Home of Texas Tech." Those were the days when Tech had an enrollment of about four thousand.

In July, 1923 a group composed of the presidents of Texas state colleges visited a small town in West Texas. On the itinerary for Tuesday, July 31 were the towns of Wilson and Lubbock. This group later decided that Lubbock, out of the thirty seven towns they visited, would be the ideal spot for a college. At that time, as history recalls, Lubbock was not much town, much less city.

With the letting of contracts and building getting underway, the home town of Texas Tech began to expand. There are many that will swear that if it hadn't been for this college, Lubbock would still be a small town. Within ten years after the college was begun, the town was beginning to look something like a city.

And then came the war. Almost overnight Texas Technological college was forgotten—which is as it should be. The first thing to do was win the war. The two air fields became of supreme importance. Lubbock went all-out for victory. Side by side, in tide with the times, Texas Tech offered an accelerated program whereby a student could graduate much more quickly. The college offered the Emergency, Science and Military War Training extension courses. Aviation cadets were moved into dormitories. Army engineers were given schooling here. And of course the enrollment dropped as draft-age youths were called to the colors. Texas Tech had gone to war.

General school of thought among students is that it is about time for Lubbock to start taking notice of the college out on west Broadway again. Time is not far off when the service men who have been spending their money with Lubbock merchants, will again be in civilian clothes. Many will go back home. Many will exchange their olive drab for a sport coat and pleated pants to attend college. Then, Tech will be the main attraction in Lubbock again.

Last Saturday night the football game between the Texas Aggies and Red Raiders was broadcast from a Fort Worth station. KFYO, the "home of Texas Tech" was busy putting on the air some national hook-up program. Perhaps through some poll they were able to ascertain that this program would be listened to by more people than the football game. Perhaps they had a contract to broadcast this national program.

What Tech students would like to know is: When is the city of Lubbock—the city that has a college responsible for growth—going to sit up and take notice of a group of young people that are temporarily living in this city? Not all, by any means, Lubbock organizations and institutions have forgotten the college. But a few have. Lubbock—have you forgotten us?

## Those Traditions Again . . .

Traditions are here to stay, and although Tech is a comparatively new school, it is just as proud of them as any of the older institutions.

Fish are in on most of these traditions one way or another, usually the other. Either they must or must not do something, for the reason—yes, because it is a tradition. But as yet, fish seem to have grasped only a very few of these age-old, or generation-old, customs.

The class of '49 is attempting to wear its collective slime caps, and more of them every day are speaking to passers-by on the campus. Very well and good, but . . .

Fish are supposed to stay off the sidewalks, all fish all the time. The reason is simple, Tech is proud of its modern improvements and the constant wear and tare of the "multitude of fishes" would soon have our sidewalks below base level. The byways to buildings are usually so crowded between classes that someone must walk in the street, and the fish are the ones to do it. Upperclassmen must not run the risk of being out in the street when a fish drives by. That is dangerous.

Upperclassmen are asked to help show all fish the street when they are found cluttering up the sidewalk. Also, it is against tradition, custom and ethics for fish to sit on the Double T bench. If this minor regulation is not thoroughly understood, it may have to be revised to state that fish may not even look at that holiest of holy parking places.

Surely this carelessness is acclimating oversight or first week jitters, or freshman frivolity, but the day of reckoning is coming. Not much is required of freshmen at Tech, when one considers what some colleges expect. Nevertheless, good sports rise and fall during their first year in college. Do not make your first and lasting impression be one of sportlessness in the eyes of the entire student body or one individual.—BEA.

Research on virus diseases will be initiated at the Wayne University College of Medicine this fall, following acceptance by the Board of Education of a grant of \$2,500 plus equipment from Dr. Hugo Freund and the Children's Fund of Michigan. Dr. Carl E. Duffy, assistant professor of bacteriology and clinical pathology, has been assigned to the project.

Impending trials of Nazi war criminals offer a great opportunity for dramatic, mass re-education of the Germans, according to Dr. E. L. Talbert, associate professor of sociology at the University of Cincinnati, authority on social psychology.

"Germans accustomed to the mob-like shows which Hitler prepared should be treated to something more impressive," Dr. Talbert said. "Why not precede the trials with a stately procession of allied troops in full regalia under many flags, reviewed by commanding officers? Give the ma visible lesson on international power." Full advantage of the German mentality an dits response to propaganda, strikingly dramatized, should be taken in the conduct of the trials, Talbert said.

"The theatrical stunts of Mussolini and Hitler can't be compared with this dramatic scene in propaganda value, and we have to use propaganda in our dealings with the Germans," he added.

## From . . . 1

## 2 . . . Another By COUNT MEOUT

Due to numerous concussions, namely to the skull, the Count was barely able to navigate this week, but we managed to dig up a little dirt.

ANN COX received flowers two days in a row from some FRANK, one dozen roses and chrysanthemums.

Handsome, red headed RUSSELL BIRDWELL and NORMA BARNES stepped out Tuesday night. Who knows, it may be a new romance.

NORMALEE THORNTON seems to be robbing the cradle these days, going with that "little" freshman.

RANDY RUTLEDGE is still seeing a lot of YVONNE SCOTT, "SCOTTY" as she is better known.

MARSHALL RIEGA gives evidence of missing his fiancee JOAN MARSH by phoning her immediately upon arriving in Dallas.

DORIS LOVELACE is still "loopy-goopy", she is engaged, however, so maybe that makes it legal.

Girls, don't take "CISCO" CORDERO seriously—the rumors are that he is engaged to a senorita in Chihuahua.

A number of girls are sitting their eyes for that bashful appearing MARVIN BROWN. He has been absent from the campus three years and is returning to take his degree.

BURTON CROSSEN is back in school after a short "vacation" to win the war in Europe. He is an old College Club member. Until TOM DOUGLAS can find a more "congenial" roommate BURTON is staying at his place.

GLENN BEAVERS is quite the scream over at Casa Linda. Among other peculiarities she proposes to strange boys.

GENE CUPP is living with his folks this year but evidently they are cramping his style for he threatens to move out any time.

What's the main attraction at home DORIS RAGSDALE and JOAN BRITZEL? SARAH SHAW also finds something to go home for.

Wonder what LUCY BEAR and MARY BROWN were so angry about Tuesday morning.

EARLINE REID has been seen with a couple of ex-Techans and Kemas, BILL ANTHONY and PAUL NAIL.

BILLY? Is home from the Navy and BETTY HARRELL isn't a bit sad about the matter.

A couple of "steadies" are DOROTHY CANTRELL and NELSON BARDWELL, who is an ex-Marine. Dorothy says they must be going steady because she doesn't go with anyone else.

Could it be a new romance between CORRINE PAYNE and CHARLEY SNURE?

FRAN CAMP picks a funny place for her "courting." She'll earn 'em, after going before house senate. Did you ever hear of Aztec Grove, FRAN?

How did DON ZELLACK explain the fact that he was with three girls in the Co-op the other day to JO WILMETH?

We wonder who EMORY PAYNE is trying to impress coming to "lasses" in a suit and tie? Could it be JERRY TAYLOR?

GWEN EDWARDS is looking forward to the Austin trip for a very special reason, it seems a certain person is stationed there.

Another new couple are two freshmen, MARY MAY JOHNSON

## Parsons To Attend Textile Meeting

L. E. Parsons, head of the department of textile engineering for Kent, Conn., and Stockbridge, Mass., to attend a meeting of textile deans and department heads for the ten textile schools in the United States. Mr. Parsons, youngest member of the conference, will represent Texas Tech, the only textile school west of the Mississippi river.

Edward Pickard, secretary of the Textile Foundation, and Dr. Frederick M. Felker, dean of the school of engineering at George Washington University, are in charge of the meeting, and the program is to be devoted to problems of re-conversion in textile engineering and the teaching of textile economics in textile schools.

Attending the meeting for the first time will be Kenneth R. Fox, president of the Lowell Textile Institute, and Herman A. Dickert, from the A. French Textile school of Georgia Tech.

## New HE Faculty Is Entertained

Residents of the Home Management House entertained with a luncheon last Saturday in the division of Home Economics and Miss Margaret Weeks, dean of the division of Home Economics, and Miss Mabel Erwin, head of the department of clothing and textiles.

New members of the faculty in the division of Home Economics are: Miss Grace Durham, assistant professor of Child Development and Family Relations; Miss Irene Hood, assistant professor of clothing and textiles; Miss Martha Buttrick, assistant professor of foods and nutrition, and Miss Opal Wood, assistant professor of foods and nutrition.

## New Child Development Course Being Offered

Parent Education, a new course in the department of child development and family relations has been added, said Miss Sannie Callan, head of the department of child development and family relations. It is being offered as an elective all except child development majors.

Miss Bernice Borgman, former assistant professor of child development and family relations at Tech, is now teaching child development at Michigan State college.

## WRA Sets Goal Of 400 Fish

W.R.A. has set as its membership goal 400 freshman girls for this semester. It was decided last Thursday.

Calendar accepted for the year is as follows:

Oct. 4—Cabaret party from seven until midnight in Gym.

Oct. 18—Regular meeting, Parliamentary law and duties of office.

Nov. 1—Program by W.R.A. members and report from Homecoming committee.

Nov. 15—Regular meeting.

Dec. 13—Initiation of new members.

Jan. 10—Membership drive.

Feb. 7—Program by Freshmen.

Feb. 21—Discussion of tennis tournament.

March 7—Discussion of Play Day and Spring Initiation.

March 21—Spring Initiation.

April 11—Plans made for senior party and banquet.

April 13—Tennis tournament.

May 4—Play Day.

May 9—Banquet.

May 16—Senior party.

Maxine Craddock, 1945 Textile Engineering graduate and '43-'45 president of the Tech student body, is employed by the Research Division of the West Point Manufacturing company, of West Point, Ga. Maxine is doing confidential work on the development of machinery for processing of the different fibers.

## DO YOU STILL NEED TEXTBOOKS?

We have IN STOCK the following:

Freshman Books: Chemistry, Physics, Algebra, Spanish, Typing, Short-hand, English, Economics, Applied Arts, Botany, Government, Psychology.

## Dr. Blitz Writes Book On Music

There are 1,280 ways students can practice music lessons by new combinations of finger movements, according to Dr. Julien Paul Blitz, head of the music department. Dr. Blitz has written a new book, "Digital Labor in Music Anagrams, 1-280 Five-Finger Exercises, which presents many new combinations of finger movements. Dr. Wm. M. Whyburn, president of the college, proved himself a capable mathematician expert by working out a great deal of the mathematics involved in the book in only a few minutes time. A mathematics expert also assisted in the mathematical terminology used in the book, Maurice Dumesnil of the Michigan State college music department, one of the greatest piano technique experts in the United States has praised the book highly.

## Nursery School Makes Changes

Several changes have been made in the Nursery School, said Miss Sannie Callan, head of the department of child development and family relations. The bathroom has been enlarged, several shelves have been built at the end of the playground and an observation booth has been constructed so that students may observe the children without their knowledge.

There are two freshmen classes in child development. Sixty-nine students are enrolled in the two courses. All Freshmen Home Economics majors are now required to take a child development course, said Miss Callan.

## Journalism Award Given To Tech

Mrs. J. T. Hutchinson, wife of Dr. Hutchinson of Lubbock, sent a check for \$100 to Professor Horne, head of Journalism department this week for the J. T. Hutchinson scholarship.

This scholarship is awarded each year to the student of sophomore or junior standing majoring in journalism, who has the highest scholastic average for the year. Although freshman and sophomore students majoring in journalism are not eligible for this scholarship, Mr. Horne states, they can start working toward this goal.

## Discharged Veteran Takes Calls To Dorm Residents

Men students, soldiers at LAAF and others who call West hall this fall to talk with their best pals and find a man answers the phone haven't the wrong number.

The switchboard operator is a discharged B-17 pilot, R. V. Ball, who served a three-year stretch in uniform and made 35 combat missions over Germany.

Ball, agriculture major during 1941-42 and part of 1942-43, worked in West hall when a student before. So he just went back to the old job.

Glen H. Curtis was issued the first license as an air pilot in America. The date was June 8, 1911.

## Island Handiwork Is Displayed

A collection of South Seas native handiwork, secured by former Navy Lt. Theibert Miller now attending Tech, was loaned to the museum recently. Miller obtained the handiwork from the natives of Apamama in the Gilbert Islands. Included in the collection is a grass skirt, several mats, a basket, headband, and a model of an Apamama fishing boat, along with snapshots of the Islanders, also loaned to the museum a Japanese bicycle.

## Men-In-Red Play Texas U. Longhorns Saturday

### Maximum Crowd Expected To Attend

#### Tech Officials Hopeful For Second Raider Victory

By IVAN TUCKER  
Toreador Sports Writer

The game that promises to be more outstanding than that of Texas A&M will be the game against Texas University this Saturday night at Austin.

This game will take place in the Texas Memorial stadium which has a seating capacity of 40,000 and it is expected to be sold out by tonight. Last week at the Tech and A&M game a record crowd of 22,831 attended.

The Longhorns are expected to be the top notch contenders for the Southwestern title this year, therefore this will be Tech's roughest opponent for the year, but the Raiders are spending every moment preparing for the contest.

The series between Texas and Tech started in 1928 with Texas being the victor of all games. The last time the Raiders faced the Longhorns was in 1937 and lost by a score of 25 to 12. This will be the fourth time the Matadors have handled the pig-skin with the Longhorns and this year hope to turn the tide of defeats to victory.

D. X. Bible, head coach of the Longhorns, feels that his team is far more superior to that of Tech and that victory is sure, but it isn't that way on this side of Austin. The Raiders may be outclassed in many ways to that of the Longhorns but the battle isn't over; so they aren't planning on celebrating a defeat at the hands of the Longhorns.

The Longhorns boast of seven returning lettermen which are Hubert Bechtol, end; Maxie Bell, back; Jack Halfpenny, back; Jim Plyker, tackle; Charles Hatom, end; and Harlan Wetz, tackle. Also stars, Jack Sachs, center, and Robert Layne, back. They also have one All-American, Hubert Bechtol, who is a strong starter for the Longhorn eleven.

The big advantage the Longhorns have over the Raiders is the military program. From this program the Longhorns have received six of their starters. They are Phil Bolin, guard, Roger Evens, back, Henry Hook, tackle or guard, Robert Layne, All-conference back, Kenneth Merritt, guard, and Jimmy Watson, end.

Hubert Bechtol was a backfield man for the Raiders in 1943, but after playing and lettering one year, was called to the service and returned to Texas U. This will be the Longhorns third game this season, and as yet they are undefeated. Their first game was against Bergstrom which they defeated 13 to 7. Last week the Longhorns defeated Southwestern by a score of 54 to 0. This will also be Tech's third game. They first played Southwestern and defeated them by a score of 7 to 0.

### Costa Ricans To Organize Soccer

A soccer team will be organized in the name of the Raiders by Joaquin Bonilla and Guido Rodriguez from Costa Rica. Both boys were members of the best teams to compete in that country. Practice sessions will be Monday, Tuesday, Wednesday and Thursday of each week at five o'clock in the gym. If within two months a skilled team is brought forth, games will be matched. The opponents have not been established as yet.

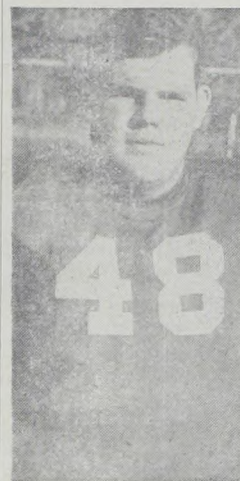

Morley Jennings will act as coach for the eleven-man team, and he feels sure that under the direction of Joaquin and Guido a team of merit will be born.

Soccer is South American football and is also a leading sport in Central America and Europe. The object of the game is to act as a team with no outstanding single star as in football. The ball is moved from one place to another by kicking, dribbling, and playing it with any part of the body except the arms and hands, toward the opponents goal posts and kicking it between them for a goal. One of the chief differences between soccer and American football is that in soccer the players are not allowed to touch the ball with the hands, nor are they permitted to place hands on the opponents. This eliminates personal contact such as blocking, holding, and tackling. The "goalie" is an exception to this rule. He may use his hands at all times.

A football field can be used for this game. It is considered the minimum size for a Soccer field. The field can be as much as 120 yards long and 75 yards wide. Goals should be 16 feet in width and 8 feet in height.

The team is made up of eleven players, one goalie, two defense, three forwards, and five linemen. The line-up is as follows: Goal keeper, right fullback, left fullback, right halfback, center halfback, left halfback, outside right, inside right, center forward, inside left, and the outside left.

### They Will Play Against Texas University

**JOE SNODGRASS**  
Brownfield Sophomore  
Bruising 276-pound Tackle

**GENE HARDEY**  
Hugoton, Kan., Sophomore  
Passer and Attack Planner

**CECIL NORRIS**  
Beaumont Sophomore  
Best Gainer Against Aggies

### From The Bench

The Texas Aggies, paced by Preston Smith behind excellent blocking, rolled over the Red Raiders last week. Tech could never get started in the first half, while the Shaggyoppers ran wild, taking a 14-0 lead.

The third quarter, however, was a different story. It found Walter Schlinkman doing everything except leading the cheering section. Cecil Norris also played a very good game, both on offense and defense. Don Davis ripped off several good gains, while Arthur Shahan rocked the Aggie ball carriers with some bone-crushing tackles.

Bouncing Preston Smith was the Farmer's big-gun. He ran like a scared jackrabbit. Tom Daniels, the Aggie quarterback, tossed some good passes for some very good ends who made maculocous catches on numerous occasions.

There is no peace in the Red Raider camp this week. Coach Morgan has taken heed of the Texas U. 46-0 track meet victory over the Southwestern Pirates. Morgan sent the team through stiff workouts Monday, Tuesday and Wednesday.

The T.U. game will be Tech's first test against a team running off a wing formation, as the steers work mostly off the single wing, whereas Southwestern and A&M both operate off the "T". The Longhorns have plenty of beef in their line, featuring 280 and 240 pound tackles. On the left end will be Hubert Bechtol, former Raider who made All-American with D. X. Bible's team last year. You can bet your boots that "Beck" will be playing for all he is worth against his former teammates.

Tech's line should stop the Steer's running game, as the T. U. boys work off a slower formation than Texas A&M. Tech should also be able to stop the passing attack, as the Raiders defense in that department is improving. The Men-in-Red will score two touchdowns and their defense will limit the Steers to two touchdowns. Schlinkman's kick of both extra points will provide Tech's winning margin. It's Tech 14-13 over the Tea-Sippers.

### Tech Reunion To Be Held Before Texas U Game

Techians who plan to celebrate October 6 by attending the Red Raider-Longhorn game in Austin have opportunity to further highlight the weekend. A Tech reunion is being planned by the alumni in Austin.

There will be a luncheon held at the Driscoll Hotel at 12:30 on Saturday October 6. All students making plans to be in Austin and wishing to attend the reunion may make reservations with Miss Anna Baker, 2512 Whittis, Austin, Texas.

### Know Your Grid Stars

By IVAN TUCKER  
Toreador Sports Writer

Born in 1925 on the 25th of December in Beaumont, and just as rugged as the hills the town is built on, was Cecil Norris.

About all Cecil knew before he started to high school was "truck farming" and baseball, and it was all he cared to know, but when entering South Park High he began to spread out in his activities and became quite the favorite when he entered his senior year and was voted so in the school yearbook.

When Cecil became a second year man in high school he dropped baseball like a "hot spud" and began his more than famous football career. He was voted captain and carried South Park to more than one victory during his two year career of high school football. He also lettered two years in basketball and one in track being the captain on both teams.

"Football got under my skin and I wanted to do something about it so I came to Tech and more foot-

ball" And Cecil did do something about it. He lettered his first year and is more than on his way to a second letter. He is at the position of halfback and wouldn't change if he could. He says "I like the bounces a man gets in that position."

As to Cecil's personal life he likes to duck hunt and flirt with pretty women if he gets up enough courage. "I'm available to all girls. My address is Sneed Hall, and my phone number is 9338. Just give me a ring anytime," is what he says to the above statement of his private life.

Even though Cecil is a C. E. major, what he would really like to make is a good football player and then when graduating become a high school coach for some team of merit. Well as for the first part it has already come true and the rest will have to wait, because Cecil is "A" with your Uncle and mine, and it may not be too long before Uncle Sam gives him the position he has applied for. About all Cecil says about it is, "I may be called today and then again it may be several months. I just hope I can finish out the remaining year with Tech and her football opponents. If I do get drafted, which is almost sure, I would like to get into the Engineers, because I like math very much."

As to more of Cecil's personal life he says, "I would tell you more, but it wouldn't be a secret if I told you, would it?"

### Tech Has Hidden Power In Two Giant Raiders

Tech grid officials must have hope a couple of candidates will grow. Anyway, they're keeping two 140-pounders on the squad. Bennie Tidwell, five foot, seven inches tall, is from Sunset, Texas. Coach Dell Morgan promises he'll play him before the season is over in competition.

Milton Butler of Lubbock is a half inch shorter. He's a speedster in the open. John Lehley, director of the Texas Cotton Research committee, was on the Tech campus Wednesday, Sept. 26 on an inspection tour of the Tech cotton spinning research project.

The Aluminum company of America has made a grant of \$200,000 to the endowment fund of Carnegie Institute of Technology to establish a professorship of light metals in the Department of Metallurgical Engineering.

Learn your football players by name and be able to slap him on the back and say the words he would rather hear than anything else. That is, "you played a swell game."

Don't forget win, lose, or draw your part of that team. Every time that ball goes down the field you're heart and prayers go right with it; and your team doesn't get all the glory, you take it right along with them. Get behind your team and break the Texas line so those Victory Bells may ring out.

### 1945 Graduate Employed In Boston

Carlos Rios, 1945 graduate of the Textile Engineering department is employed by the Saco-Lowell Shops in Boston, Mass. Carlos is familiarizing himself with the sales service and engineering practices of the company in order to represent the company in Mexico.

**Fine Arts Group To Hold Meeting**

The Fine Arts group of the American Association of University Women will have its first meeting of the year at 7:30 Tuesday evening at the home of Mrs. Lattimore Ewing, 2509 twenty-fifth street.

**Mary Findley Is Elected Dramatic Club President**

Sock and Buskin, dramatic club, met Tuesday night in the campus playhouse and the following officers were elected: Mary Findley, president; Eddie Arvayn, vice-president; Imogene Bagwell, secretary-treasurer; Bea Green, reporter; and Dell McComb, sergeant-at-arms.

**Alpha Psi Omega Elects Jodie Wofford President**

Alpha Psi Omega fraternity met Tuesday night in the campus playhouse and elected the following officers: Jodie Wofford, president; Maxine Hennerdorf, vice-president; and Louise Ince, secretary-treasurer.

**Prsident Announces Student Office Hours**

President Whyburn announced that he will see students without appointment between the hours of 3:30 and 5 p. m. on Thursdays. Students are welcome at other times by appointment.

**Religious Council Holds First Meet**

Student Religious Council held its first meeting Thursday at 6:00 p. m. at the Methodist student center to appoint various committees to work out plans for Religious Emphasis Week, which will be held from December 3 to 7.

Norma Cleavinger, president of the council stated that the purpose of the Student Religious Council is to promote religious interest on the campus. The membership consists of students chosen from Tech groups in the churches.

The officers of the council are Norma Cleavinger, president; John Beakley, vice president; Maxine Ford, secretary.

**Freshman Class Elects Officers Last Week**

The Freshman class held a meeting last week completing the election of class officers. Jack Hinson was elected president at a previous meeting.

The other officers include Athol Craver, vice-president; Davee Ratliff, secretary and treasurer; Joan Nislar, reporter; Mr. Clark Schooley, assistant professor of journalism, is the class sponsor.

**Publications Committee Approved 1946 Budgets**

The Publications committee met Tuesday to appoint the staff members and to approve the budgets and financial statements of La Ventana and the Toreador.

Ea Green was appointed associate editor of La Ventana.

**Life With The Exes . . .**

O. P. (Sleepy) Harlin Jr., who recently completed Midshipman's school at Cornell University, Ithaca, New York, was commissioned an Ensign in the Navy and is home on leave. He will go to the Pacific coast for future assignment.

Robert Kent, who was commissioned at the same time, was ordered to report immediately to New Orleans.

E. L. Mader, assistant professor of agronomy of the plant industry department will attend the Range Improvement Field Day at Woodward, Oklahoma, Saturday.

Mr. Mader will be among representatives from several states who will attend this event. The field day has replaced a tour of several states that formerly took place before the war. Since the war representatives meet in Woodward, where a number of experiments are being carried out, and discuss the conditions and problems of their respective areas.

William M. Buford, student of Texas Tech who entered the services in 1941, has been discharged from the Army Air Forces and will be associated with L. D. Thomas Motor company in Lubbock. He had been assisting the firm prior to going into service.

Buford was with the Fifteenth Air Force as a B-24 bombardier, on duty in the Italian area. He received the Air Medal with five Oak Leaf clusters, the Theater ribbon with four stars, and the Unit Citation.

Returning to the states, he was on duty in the personal affairs office of the Lubbock Army Air field until his discharge last week with the rank of first lieutenant.

Ens. Charles A. (Pete) Wiley, on board the USS Guadalupe, somewhere between Okinawa and Korea, picked up a radio broadcast from Nanking, China. The program consisted of selected recordings, and among those played was a record made in 1923 by his father, Prof. D. O. Wiley, and the Hardin-

Simmons Cowboy band.

Lt. Elmond C. St. Clair, Tech graduate of 1940 was recently commissioned a bombardier. He received his wings at Deming, New Mexico, and was then transferred to Langley Field, Virginia, for radar training. Lt. St. Clair and his wife plan to attend Tech when he is discharged.

Lt. Col. Wilson A. Chapman, '40, Petroleum engineering, recently visited friends on the campus. Col. Chapman was on active duty in the Pacific theater in January after Pearl Harbor and has also participated in action in the European theater. He holds the pre-Pearl Harbor ribbon, Purple Heart, Silver Star, Air Medal with four clusters, Presidential Unit Citation with two clusters, Asiatic Theater ribbon with two Bronze Stars, and the European Theater ribbon with seven Bronze Stars.

Flight Officer Allan McArthur, who was a glider pilot in England and France has returned to Texas Tech where he is a student in the department of dairy manufacture.

Captain George Wilson, '40, was released from active service and recently visited friends on the campus. He has been stationed at Big Spring Army Air field for the past three years as an instructor.

Lt. Peyton Tucker, '43, was released from active duty and has visited on the campus this past week. He was a transport pilot.

Lt. Don Smith, former Tech student, is a member of the 7th Marines, 1st Marine Division and landed with the occupation troops in China. He left Tech in 1944 when he was a senior.

Lt. Howard Strawn, '41 dairy manufacture graduate, visited on the campus this week. He served in the South Pacific area with the force. He has recently been released from the hospital at San Antonio and is now stationed at Del Rio.

**Time Changes Everything—Except Perhaps The Confusion Of Time**

By BEA GREEN

Toreador Staff Writer. As I spoke to the press, it is your reporter's pleasure to state that no one at Tech seemed to show concern over the change of time. Whewee for us!

It was simple enough to figure out what happened, because the radio and newspapers stipulated just what the individual should do, like turning back clocks and watches an hour.

If you had to be "in" at twelve Sunday evening, it would have been brighter for you to turn your clock back at that hour—thus having two hours from 11 to 12.

Almost everyone got to Monday classes on time, sun time, except those who went to San Antonio. They say they lost a whole night (of sleep) on that trip; must be a variation caused by Lubbock's elevation.

Those individuals who live on the line of time change, i. e. New Mexico, reported the most trouble. It was possible to have three hours from 11 to 12. One person was in a restaurant when the clock chimed 12 bells. The proprietor closed at that time. The individual went to his competitor across the street who had already turned his clock back. One hour later, as this time-piece chimed 12, he decided to go home across the line. After visiting with his folks, getting ready for bed, and turning in, in the dim distance he heard the church clock ringing out the time—yes, twelve o'clock. Best he wasn't catching a train at 12:00.

Do you realize that if you went round the world, east to west, with sun time, 15 degrees per hour, and there was no International Date Line, you would get back a day after the calendar in your home would say? Of course, if you went in the other direction, west to east, you would get back a day early.

Traveling does not only save your tires, but your disposition. There is a course on the campus designed to keep you at home. Its name is Geography 131. You spend half of your time figuring out at what time you would send a telegram from Manila in order for it to get to Lubbock at 12:00 noon.

If folks who travel have such major worries, anyone can see it would be kinder to yourself to stay home, go to shows and see Travel-talks.

There is one point for the traveling question, however. If you want to live a long time, keep on the go towards the west, ignore the Date

Language Club Elects Officers

Liederkrantz, (Song Circle) the German language club met Tuesday night and elected officers for the forthcoming year. They were: June Cox, president; Wanda Hahn, vice president; Neil Artman, treasurer; Farris Vaughan, program manager and pianist, and Jim Henninger, reporter.

**WRA Is Holding Weekly Dances**

WRA, all-college dance is held in the Gym Wednesday nights from 7:00-8:15 o'clock. A Paul Jones dance usually sets the pace as a good mixer. The price of admission is only nine cents.

Music is furnished a-la juke-box and a number of the latest recordings are used, one of which is brought each month enabling dancers to swing the latest steps to modern music, from waltzes to jitterbug.

**E. F. Fuller To Assist Veterans October 18-19**

E. F. Fuller, Training Officer of Veterans Administration, will be in room 110 of the Administration building on October 17th and 18th. His purpose will be to interview and assist all veteran students in affairs pertaining to Veterans Administration under the Education bill.

Those veterans with problems are urged to attend.

**Pfeiffenberger Returned Tuesday From Tennessee**

George W. Pfeiffenberger, head of the cotton spinning research project for the Chicopee Mfg. Co., at Texas Tech, returned Tuesday, Oct. 2, from Memphis, Tenn., and a tour of the Mississippi delta.

Mr. Pfeiffenberger states that the cotton crops in the regions visited were extremely poor and that in one day's inspection only one of twenty cotton gins was found to be in operation.

**Books Written By McKay And Wallace Are Reviewed**

The United States, "1865-1900," survey of current literature with abstracts of unpublished dissertations, have reviewed Prof. S. S. McKay's "Seven Decades of the Texas Constitution of 1876" and Dr. Earnest Wallace's "Charles De Morse: Pioneer Editor and Statesman."

Las Vivarachas hold formal initiation services Sunday.

Vivarachas held formal initiation for the new members and pledges Sunday evening at 7 o'clock in the Aztec room at the Hilton hotel.

After the initiation services, a dinner was given for the pledges in the Mezzanine Lounge of the hotel.

The new members include June Stein, Rose Marie Roberts, Barbara Brannen, Claynell Fowler.

**Weather**

Continued from Page 1

cannot be jumped, but has to be swam through. Who then could have a ready smile and kind word for the first person who crosses his muddy path? Spirit of Tech, wherefore art thou on such days?

So we swim about the best we can, making light of rain and the trials and tribulations it brings. Rain is fine, but only if kept in its proper sphere, such as England or similar places. But can you imagine what would be the result if we never had to wade to class? So just remember—which would you prefer: A rainy day, or one filled with stinging gusts of sand? Take your choice! Both occur here in good ole unpredictable West Texas.

**Officers Elected By Vivarachas**

The Las Vivarachas club at their meeting last Wednesday elected the following officers for the year: Tincy Johnson, vice-president; Jean Halbert, secretary; La Vera Rilly, treasurer; Pat Hillger, A. W. S. representative; Maxine Poe, pledge trainer; and Maureen Smith, reporter. The president, Jodie Wofford, was elected at the close of last year.

**Opera Star To Appear On Artist Course Program**

Nino Martini, Metropolitan Opera tenor, who will appear on Artist course program December 3, will sing on the Firestone hour Monday night at 7:30 o'clock. He will also appear on the same program October 22 and November 19. These broadcast engagements will give Tech students an opportunity to hear Martini sing before his appearance on the Artist Course, Prof. R. A. Mills, director says.
