

Dads Association goal is better understanding

By BOB BREWSTER
Sports Editor

"You've come a long way, baby" was the theme for Homecoming this year, but that title may be more appropriate for Saturday's Dads Day activities at Tech.

Dads Day is sponsored by the Dads Association, a group that was organized 13 years ago with the goal of creating a better relationship between students at Tech and their parents, according to James G. Allen, executive director of the Dads Association.

Allen said the idea for having a Dads Association was originated by Mrs. Dorothy Garner, who came to Tech from the University of Oklahoma, which has a Dads Association. Allen has been working with the association since that beginning in 1957.

"We felt the need for contact, family-wise, between Tech and the people of Texas," Allen explained. "I feel that we must establish confidence from outside the university to supplement student and ex-student relationships. This is the only way Tech can move up."

Before the Dads Association was organized there was a day set aside for parents to visit Tech, but the day was not organized and did not bear the same title every year, according to Allen.

"There was nothing definite about a

day for parents before we started the Dads Association," said Allen, who was the first president of the association. "It was an occasion of having parents on campus. The title varied from year to year and it wasn't always on the day of a football game."

Dads Day is always scheduled on the day of a home football game in the fall. This year's opponent on the special day is Texas Christian University and awards will be given to some of the visiting dads at Jones Stadium prior to the kick-off.

Awards will be presented to the dad that travels the farthest distance to attend the activities, the dad who has the most children enrolled at Tech, the Dad of Tech Spirit Award, the Spencer A. Wells Award and two Athletic Hall of Honor inductees.

The Dad of Tech Spirit Award will be presented to Arch Lamb Sr., Lubbock County Land Commissioner. The award is going given to Lamb in honor of his dedication to spirit at Tech.

The \$500 Spencer A. Wells award will be presented to Dr. Paul J. Woods, a history professor. This award goes annually to a faculty member in appreciation of his contributions as a teacher and member of the academic community. The other awards will be kept secret until the pre-game presentation.

Other activities planned for Dads Day weekend are luncheons for dads and moms on Saturday. The dads luncheon will be held in the University Center Ballroom, where Tech President Grover Murray and Deans John Buessler and Richard Amandes will speak on a panel which will discuss new educational programs at Tech. The moms luncheon will include a style show sponsored by Hemphill-Wells.

Student organizations assisting the Dads Association are the Association of Women Students, Junior Council, Chi Rho fraternity, Women's Service organization and Alpha Phi Omega.

AWS provides funds for publicity for Dads Day and assists in all activities connected with the weekend. The AWS member in charge of Dads Day is Denise Westbrook, a sophomore from Lubbock.

Miss Westbrook said that she has enlisted the aid of approximately 75 student volunteers to do odd jobs necessary in preparing for the Dads Day activities.

"We are expecting about 400 dads for the weekend activities," Miss Westbrook said. "There have been 270 moms sign up for the luncheon Saturday."

"I think Dads Day is important because your parents pay for your college education and they deserve to have the opportunity to look around and

see what college life at Tech is like," she continued.

Although Dads Day is the main event on the Dads Association's annual calendar, most of the business of the organization is done in meetings during the year.

"There is so much activity going on during Dads Day weekend that we do not get much done as far as business goes," Allen explained. "We do most of our business at our February and mid-summer meetings."

The Dads Association's third meeting of each year is held the Friday evening before Dads Day.

Allen outlined a plan of progress that the Dads Association has undertaken since its beginning in 1957 to aid in

achievement of the the organization. The first step was the Athletic Hall of Honor, which gives recognition to persons who have brought credit to the athletic program of Tech.

"This is an interesting thing to a wide variety of people," said Allen, "And that is why it is included."

The next step, according to Allen, was the endowment of scholarships to students; which Allen considers the most important of the association's program.

"We started out with two scholarships, and now we have 10," Allen said. "I guess this is good improvement, but we need many more scholarships, because this is a vital ingredient in the improvement of Tech as a great university."

The third and most recent step ac-

complished by the Dads Association was the Spencer A. Wells Award.

Allen explained that a fourth step would, hopefully, be included next fall. This step would be another award to a professor, called the Dads Association Professorship.

"This is not definite yet," Allen said, "But it would go to a professor who shows interest in teaching."

"The achievement of these goals will help our association increase the capacity to communicate between Tech and its constituents," Allen said. "We want to relay information about Tech students to their parents and the people of this state through an elaborate program including as many people as possible."

18-year-old vote favored

By GARY MANGUM
Staff Reporter

The federal law giving the vote to 18-year-olds has been attacked across the nation as frivolous legislation that does violence to the Constitution.

Some legislators argue Congress has exceeded its authority by lowering the minimum voting age to 18 in all states. Others have defended the new law as progressive legislation. A random survey of 40 Tech students taken the beginning of October showed 26 were for the 18-year-old vote and 14 were against. Men were evenly split, while women were decisively for the bill.

In the same type of random survey taken last week among 1000 Tech students, who were asked the same question, it seems Tech students favor the 18-year-old vote. Of those contacted, 661 felt the bill was needed while 339 were against the legislation.

Those surveyed were asked to give their opinions of the 18-year-old vote, and why they were for or against the bill. Those saying no, felt the 18-year-old was too immature and incapable of making an intelligent vote. However, those saying yes, felt the 18-year-olds were most capable of making an intelligent vote, since they had more information at

hand than 18-year-olds of recent years.

Of the 1000 students contacted, 531 were under 21-years. Two hundred and forty three of these were 18. Of these 18-year-olds, 123 were most confident the 18-year-old could cast a responsible vote and therefore felt he should be given the vote. The remaining 120 phoned were not willing to take the responsibility of voting for high ranking government officials or making important decisions concerning legislation.

Leroy Hutchins, Ft. Worth freshman, said he was against the 18-year-old vote. "I don't want to be faced with the great responsibility of making decisions about who should run the government. I don't think I or any other 18-year-old is really informed enough to make a good vote," he said.

The 18-year-olds surveyed were asked if they had applied to register to vote. Of the 243, only 76 had registered. Why had 176 not registered to vote?

"Although I'm for the 18-year-old vote," said Houston freshman Ivan Samples, "I don't want to run out and register until I am certain I will be able to vote in next year's elections." This was the popular consensus among all those who had not registered to vote.

Some, however, had not found time to

register or had not been home since the registration period began, Oct. 1. "I plan to register to vote when I return home," said Gerald LeFors, Texarkana sophomore.

To register to vote in Lubbock county, the voter should be a permanent resident of this county. Out-of-county residents must register in their home counties. Out-of-state residents must have lived in this county for six-months and this state for one year. The local tax assessor-collector's office is still holding registration applications for 18-year-olds, until the constitutionality of the legislation is decided by the U.S. Supreme Court. When contacted Monday, they could not give the total number of 18-year-olds who had registered since Oct. 1.

Personnel working in the county tax assessor-collector's office said they could offer no definite number of 18-year-olds who had registered, but the turn out remains "slow."

Of the 469 students phoned in the survey who were over 21, 176 were for the bill. They felt the 18-year-old would eventually get the vote. They felt certain the measure would be held constitutional by the Supreme Court.

There were 121 over the age of 21, who felt the measure was unconstitutional and were against it entirely. Seventy-two students would not comment, but were against the 18-year-old vote.

The law applies to all elections and primaries held on or after next Jan. 1, unless the court declares it invalid. President Nixon recently said he felt Congress had no power to lower the voting age and that a constitutional amendment would be required.

Although the constitutionality of the 18-year-old vote remains to be decided by the U.S. Supreme Court, the opinions of 1000 Tech students concerning the bill show substantial support of the measure.

Unwanted pregnancy counsel to be established in Lubbock

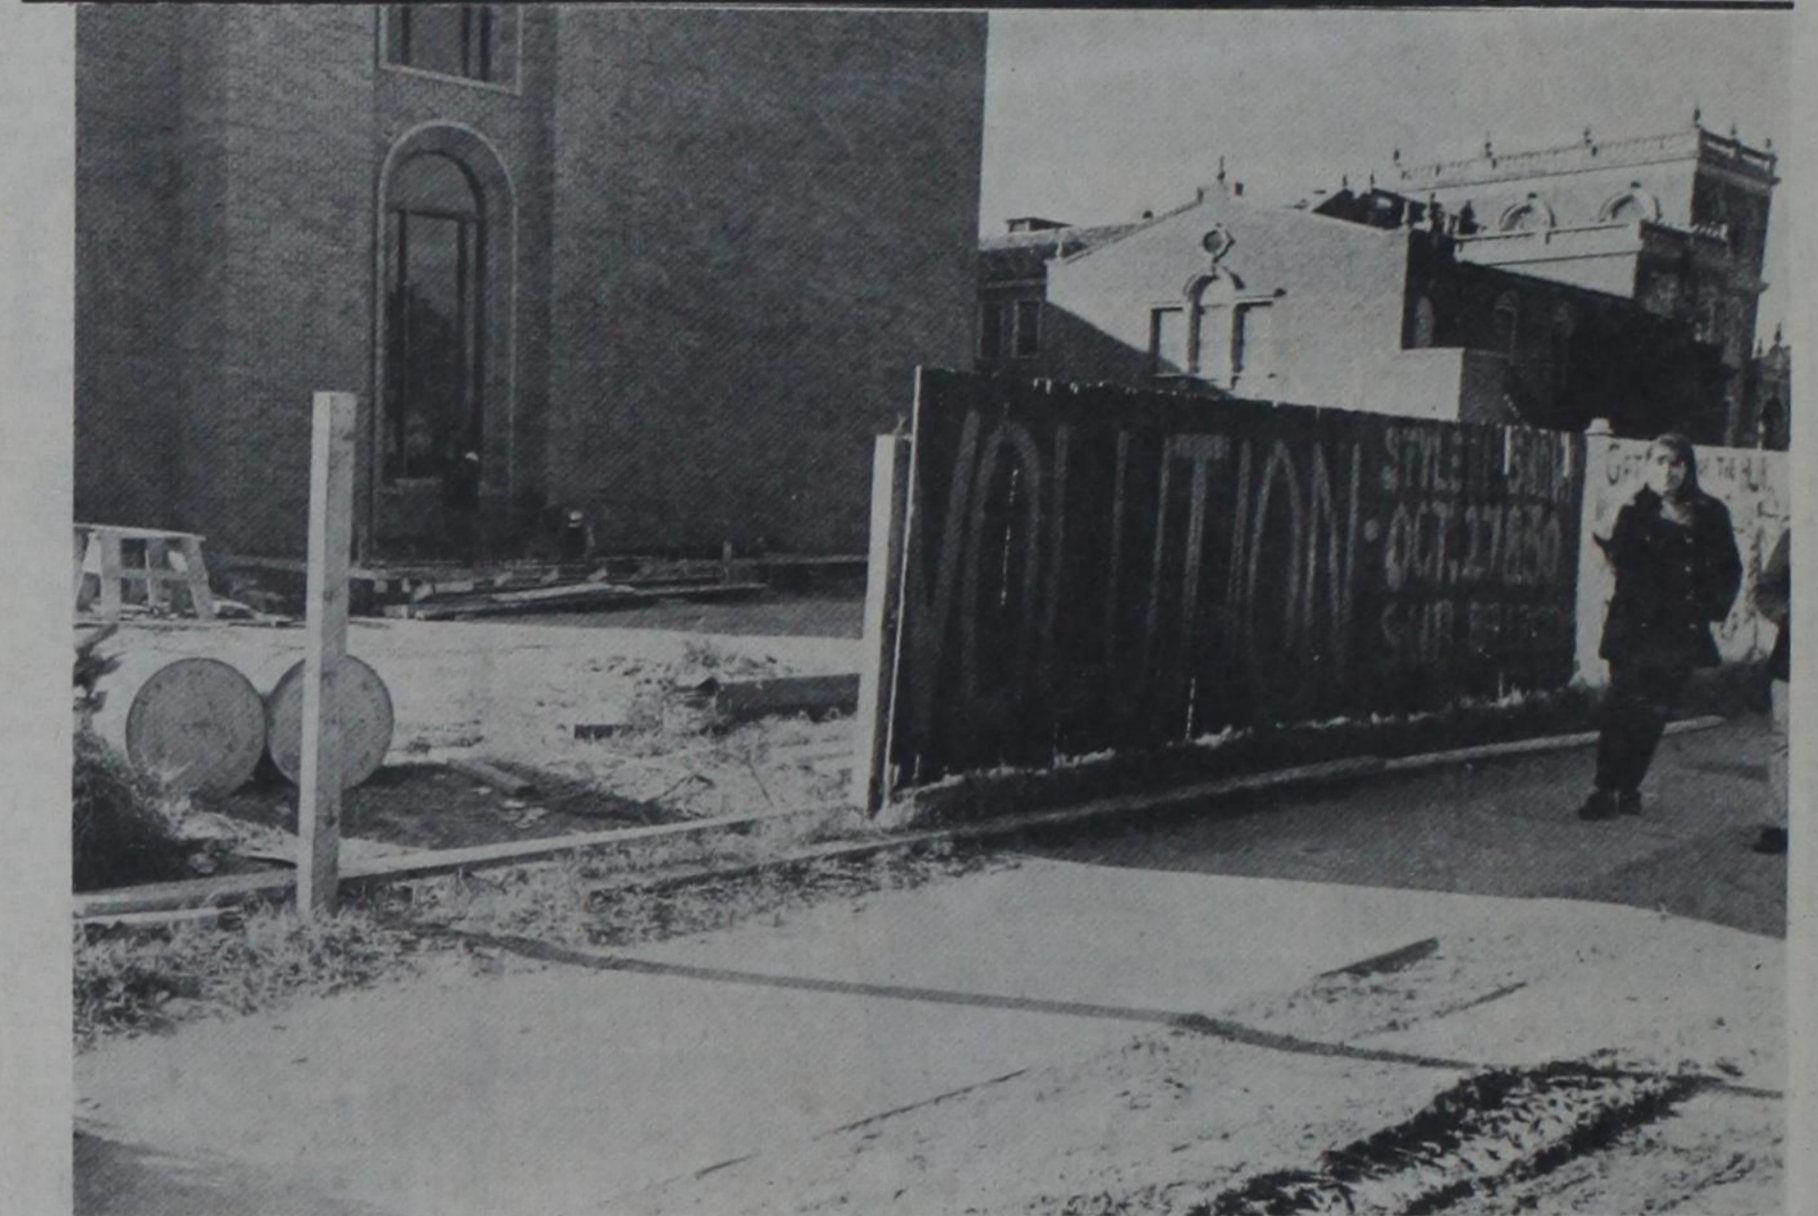

By JULIE McCABE
Special Reporter

Possibly as early as Dec. 1, but no later than Jan. 1, Lubbock and area women can receive counseling on unwanted pregnancies, said Larry G. Boyd, executive director of the Problem Pregnancy Counseling Service of Orange County, Inc. (PPCS).

Boyd was on campus Wednesday and gave two talks in the University Center titled, "Crisis of Pregnancy or Involuntary Motherhood." His stop in Lubbock was part of a Texas tour to investigate the possibilities of establishing PPCS branches in the state. He decided to establish regional branches in Lubbock and Austin. He is also considering starting services in Dallas, Houston and Corpus Christi.

Boyd will return to Lubbock Nov. 21, 22 and 23 for the purpose of training volunteers. PPCS is a non-profit organization supported by donations and staffed by volunteers.

Boyd explained PPCS will be locally controlled but, in order to be affiliated

COMING DOWN — With the disappearance of construction fences on campus some feel the communication will be jeopardized. With the help of the University Communications System,

however, organizational announcements will continue to be circulated. The Graffiti fences are being torn down and stored for future construction jobs. (UD photo by Mike Warden)

Semi-finalists for Miss Texas Tech will compete at pageant Saturday

By HAL BROWN
Special Reporter

Twenty-five semi-finalists in the first annual Miss Texas Tech Pageant (formerly the Miss Madmoiselle contest) have been named following qualifying rounds Saturday.

Semi-finalists are Cindy Kay Potter, Ennis; Lynn Alderson, Lubbock; Melinda Hollingsworth, Fort Worth; Deborah Dee Loran, Levelland; Rhonda Lewis, Littlefield; Rosanne Methuin, Levelland; Kay Rogers, Lubbock; Anchen Schulz, Abilene; Susan Nelson, Houston; Susan Anne Cape, Big Spring; Beverly Willingham, Dallas and Debi Medders, San Benito.

Also named as semi-finalists are Lauren Yvonne Fowlkes, Marfa; Beth Ryan, Fort Worth; Peggy Guttery, Seguin; Stella Ortiz, San Antonio; Margo Thornton, San Antonio; Lanthia Ligon, Fort Stockton; Debbie Houghton, Mineral Wells; Linda Kay Montgomery, Amarillo; Sheila Poulson, Lorenzo; Iwana Smithy, Floydada; Rita Isham, Amarillo; Vicki Ray, Seminole and Carol Kitzmiller, Fort Worth.

Miss Texas Tech will be chosen Saturday night, Nov. 6, at the Miss Texas Tech Pageant.

Tickets to the pageant are on sale at the University Center, Broadway Drug, Furr's Family Center, Montgomery-Ward's, Dunlaps, (Caprock and Town and Country), Sears, the Brittany and Snell Drug. Tickets can also be ordered by mail by sending a check and a self-addressed envelope to the Miss Texas Tech Pageant, P. O. Box 4664, Tech Station.

All organizations are asked to have tickets or money turned in to Sigma

Delta Chi, the sponsoring organization, by 5 p.m. Wednesday. Tickets and money can be turned in to James Boyett, Ticket sales chairman for the pageant, in room 206 of the Journalism Building.

Miss Texas Tech will work with the Board of Regents to promote the University and will represent the school at orientation programs and area dedications in addition to being featured on several local radio and television programs. She will also aid Coach Carlen in athletic recruiting and the University in scholastic recruiting.

Russian made

Satellite destroyer

By the Associated Press Writer

LONDON (AP) — The Soviet Union has been testing a satellite designed to destroy U.S. military satellites, a British scientist said Monday.

He asserted that tests were carried out within the past two weeks with three Sputniks-Cosmos 373, 374 and 375.

Science experts said interceptor satellites could blow up U.S. military reconnaissance satellites and the navigation satellites depended on by America's ability to retaliate to a nuclear attack would then be made negligible.

The warning by Kenneth Gatland, vice-president of the British Interplanetary Society, added weight to claims made by an American space expert and a British scientist last February.

A U.S. official said then that the Soviet Union had orbited and tested successfully a satellite that destroys other orbiting spacecraft. British space enthusiast Geoffrey Perry said Cosmos 316 was apparently able to intercept and demolish other craft in orbit.

Gatland said in an interview his deductions were supported by studies from the Royal Aircraft Establishment at Farnborough, center of Britain's foremost satellite analysis operations.

He said Cosmos 373, launched in orbit between 300 and 350 miles above the earth, was a target. Cosmos 374 was launched into an orbit farther from earth, but it descended to the same height as 373.

Then Cosmos 374 blew up—apparently deliberately on a signal from the Soviet

Union. Six large fragments from it have been identified, Gatland said.

He contended the aim could have been to destroy 373 by impact with the fragments. Alternatively, it could have been a test of a system to use radiation from a nuclear explosion to put a target out of action.

The Soviet Union is a party to a treaty forbidding the use of nuclear explosions generated from satellites.

Cosmos 375, launched Oct. 30, was a recent test of the same system, Gatland stated.

KTXT-TV has new program

In an attempt to improve campus communication, KTXT-TV Producer-Director Ralph Crosby has initiated a new half-hour program, "Opus I", exploring entertainment, new campus movements and issues, student spokesmen in all fields of interest, and organizational announcements.

The program will be produced in the KTXT-TV studios west of the Law School. Filming for the show is conducted on Wednesdays' beginning at 1 p.m. The program will be televised on Sundays at 6 p.m. on Channel 5.

The first program will be filmed tomorrow.

Interested parties should contact Crosby at the KTXT-TV studios.

"I am trying to find a format so students will become involved," said Crosby.

Liquor by the drink; 'could be possibility'

Liquor by the drink in Lubbock? ... That could be a possibility according to Roger Settler, chairman of the Citizens Committee for Legalized Liquor.

Students interested in promoting liquor by the drink are being asked to go to room 209 of the University Center today. The Citizens Committee for Legalized Liquor has reserved that room to serve as a headquarters for the campaign to promote Amendment 2 (liquor by the drink). Posters and brochures explaining the amendment are available for distribution by student workers and interested persons will be assigned specific voting boxes and times.

"I feel the outcome of the election depends on how heavy a turnout we have at the polls," Settler said. "A straw vote was taken in 1968 and liquor by the drink was defeated, 18,000 votes to 13,000, voting patterns have changed since then, though, and I feel we have a good chance to carry Lubbock in this election."

"What we're basically trying to do in this campaign," Settler said, "is counter the influence of Texans Who Care (a group opposing Amendment 2) and the local churches, who have been quite active in opposing Amendment 2."

"The students I've talked to seem to feel the present club system is hypocritical and that the package store system tends to increase consumption instead of decrease it," Settler said.

Settler said student help would be appreciated in the campaign. Settler feels a heavy turnout is needed in black and chicano neighborhoods to carry the measure in Lubbock, and that student help would influence these areas.

The amendment, if passed, would empower the legislature to pass a law "regulating the sale of mixed alcoholic beverages on a local option election basis." Liquor by the drink, if passed, would be permitted only in wet areas.

Friday pep rally set

Tech football enthusiasts will assemble at Jones Stadium at 7:30 p.m. Friday for a pep rally in anticipation of the Dad's Day contest with TCU.

The gathering of Red Raider rooters will be looking for Jim Carlen's club to knock the Horned Frogs out of Southwest Conference contention. Tech is in third place with a 3-1 record, while TCU is fourth with a 2-1 mark.

The activities will follow the same format as many previous Friday rallies.

The football team, cheerleaders, Saddle Tramps, and the Red Raider will be present. However, the Goin' Band from Raiderland might miss the pep rally.

Dean Killion, band director, said Monday that the Student Allocations Committee cut the band budget by 30 percent this year.

The Spirit Stick and 100 seats to the TCU game will be awarded to the organization showing the most spirit at the pep rally.

Editorial

We offer this small bit as a sequel to our editorial yesterday which denounced the egging of President Nixon in San Jose, California.

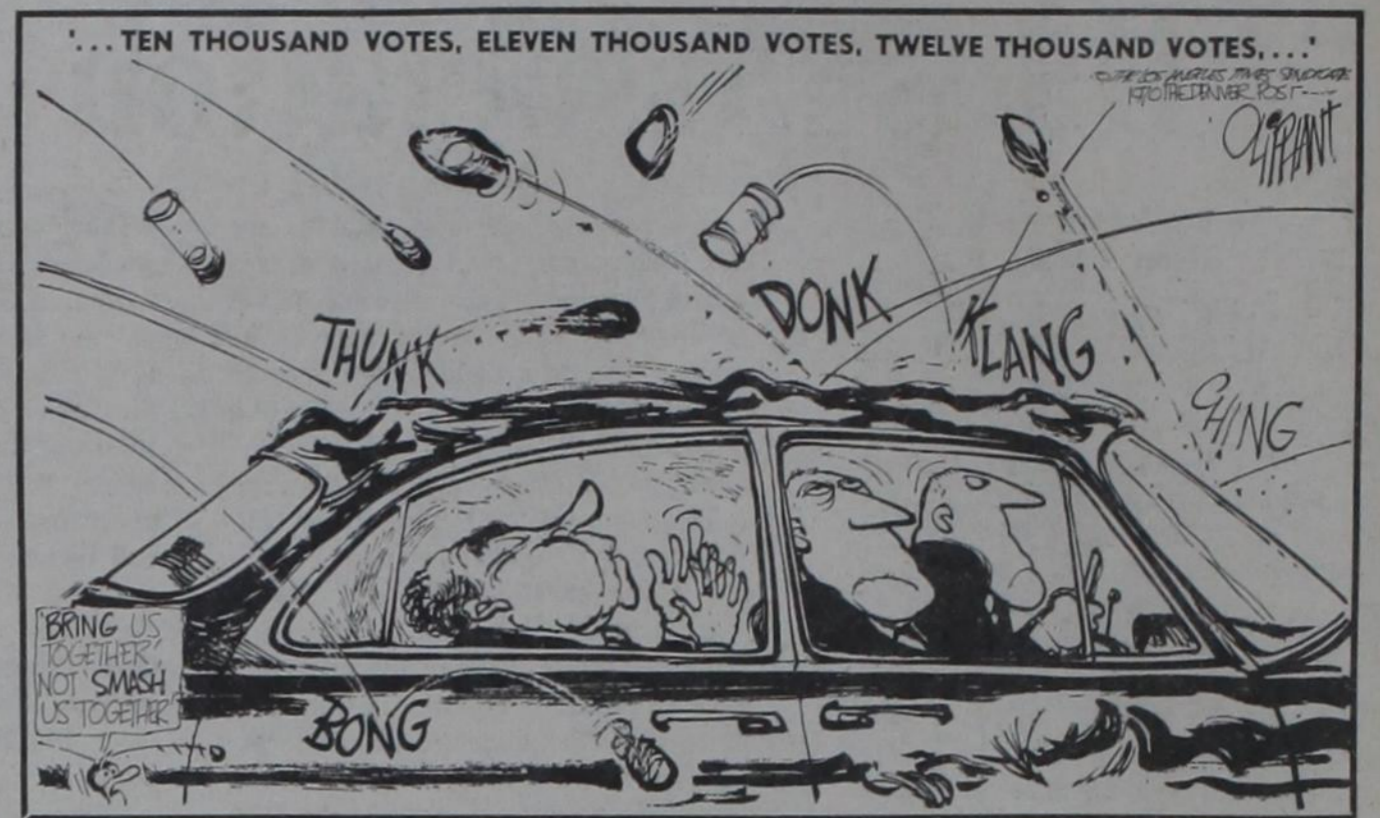

CBS news Sunday said the security agents in charge Nixon's appearances had been instructed to let a few demonstrators into Nixon's audiences. Apparently this was done purely to make Nixon's appeal for "law and order" that much more effective.

In considering Nixon's little tactic, we realized that this Republican campaign of fear, Nixon and Agnew's campaign, has a definite historical precedent.

About a hundred year ago another set of Republicans, these in Congress, used another fear and hatred campaign to maintain their control over American government. They use the fear and hatred left over from the Civil War to smash southern political strength.

These men, for the sake of their political ambitions, left more of a scar on this country than the Civil War itself. They set post war reconciliation back about a hundred years. They set Negro equality back to the point that it is yet to be a fact.

With a little luck and a lot of public opposition Mr. Nixon and Mr. Agnew won't be able to set America back another hundred years.

Urges vote for Bentsen

Tuesday a great decision will be made for the future of Texas. There is a difference in the two men running for the Senate.

Let's compare a few facts:

Lloyd Bentsen began his public service to Texas at the age of twenty-one. He served in the congress for six years where he managed successful passage of over 20 per cent of the bills which he introduced as the sole sponsor.

(A major movement toward flood control for Texas and Mexico), and the Federal Aid to Irrigation Act (the first federal assistance for irrigation in this state).

Compare this with the record of Mr. Bentsen's opponent. The man who opposes Mr. Bentsen was able to pass only two of the 150 bills he introduced as sole sponsor in his four years in Congress. That is a success record of only 1.3 per cent. Why this low percentage? Perhaps because Mr. Bush was absent from voting 37 per cent of the time and this included missing the vote on the eighteen year old voter question! In addition, and

also contrary to Mr. Bentsen, sen, Mr. Bush has sponsored no environmental control legislation.

Who can students support to do more for Texas? Forty of the fifty major newspapers who have endorsed candidates in this race have endorsed Lloyd Bentsen - a man who has both a son and daughter in college. These papers feel as I do-that the Native Texas in this race is the best man to support. I am voting for LLOYD BENTSEN, and I sincerely encourage you to do the same.

Mercury poisoning

Two months ago, our Surgeon General, Dr. Steinfeld, came on a 5:30 news program to announce, "We are not presently faced with widespread, serious human health hazards ... Our concern today is primarily about future generations

Two weeks ago, NET showed us some seals which were behaving strangely--for millions of years the mothers have been guided by instinct and have preserved their

specie, but on that recent Monday evening program, we viewed mother seals bashing their pups to death. The commentator theorized this weird behavior was influenced by insecticides.

NOW, October 30th, we read in the daily newspaper about the exceedingly high content of Mercury found in recently killed seals' livers AND MORE IMPORTANTLY, we can compare the content with that

of seals which were frozen in 1964. Difference? Well, in 1964, the concentration of Mercury in seals' livers was a mere 40-57 parts per million (.5 is considered a safe level) whereas the recently-killed seals were found to have a range of 19-172 parts per million. Wow! The

maximum trebled in a scant six years.

Soon as you find out what those seals consume, let me know. Somebody else can have my share of it.

Something should be done

TV for kids under study

NEW YORK (AP) — Children's television has caused a lot of talk lately and, something may be done to improve it.

Three recent conferences; including one sponsored by the White House; criticized children's programming as inadequate. Dean Burch, chairman of the Federal Communications Commission, told the industry's top leaders last month that he questioned their commitment to this field. The networks and stations are

being given the chance to take the initiative in providing new and better programming. But one group, Action for Children's Television — (ACT) — has petitioned the FCC to force a change.

Because most children spend more time watching television than they spend in school, television should help educate, inform, stimulate and instill in children a sense of values and worth — as well as to entertain and delight.

In short, as Burch said, television must be "a child's window to the world."

The shortcoming of such conferences as those held in Washington, Boston and New York is while everyone agrees something should be done, few concrete suggestions for alternatives are put forth.

One area of general agreement is that something should be done to break the stranglehold of the chase-adventure cartoons, which take up two-thirds of the time devoted to children's shows.

The competitive pressure of commercial television — Saturday morning alone yields more than \$83 million — is largely responsible for the many cartoons aimed at grabbing the attention of 40 million young viewers.

But "Sesame Street" on public television has shown that cartoons can be put to good use and it has effectively demonstrated education need not be dull.

Nevertheless, cartoons are basically fantasy and critics of current fare say children need more exposure to people and situations to which they can relate.

Jean Ganz Cooney, president of the Children's Television Workshop, creators of "Sesame Street," said research done by her organization has shown if given a choice, children prefer shows that are meaningful as well as entertaining — rather than mere entertainment.

Some steps are being taken by the networks. Last winter for the first time they appointed executives to oversee children's programming. NBC's "Hot Dog" and CBS' "In the Know" are steps in the direction of more meaningful programming.

On Thursday ABC will announce details of next season's "Curiosity Shop."

The Workshop is working on a reading program for older children, and its staff is studying the possible creation of a children's network on cable television.

Raider Roundup

BEST DRESSED COED ENTRIES
Best-Dressed Coed entries should be turned in by 3 p.m. Wednesday in room 102 of the Journalism Building.

STUDENT EDUCATION ASSOCIATION
The Student Education Association will meet at 7 p.m. today in the Administration Building in room 321. The program will feature the chaplain from the Lubbock State School.

TECH ACCOUNTING SOCIETY
Tech Accounting Society will meet at 7:15 p.m. today in the Ready Room of Southwestern Public Service in Monterey Center.ANCEL Calloway, Group Supervisor, I.R.S., Field Audit Division, will be guest speaker. All accounting majors are urged to attend. Refreshments will be served.

TECH CITIZEN'S RADIO SOCIETY
Tech Citizen's Society will meet at 8:30 p.m. today in X-11A. All persons interested in 2-way radio are invited.

FASHION BOARD
Fashion Board will meet at 8 p.m. Wednesday in room 358 of the BA Building. Randy Roberts of Texas Karate Institute will speak on women's self defense.

CAMPUS CRUSADE FOR CHRIST
Campus Crusade for Christ will begin a basic Leadership Training Class at 6:30 p.m. today in room 156 of the BA Building.

P.O.W.
All persons interested in prisoners of war are invited to attend a meeting in the Mesa Room of the University Center at 8 p.m. today.

ARMY & AIR FORCE ROTC
All Army and Air Force cadets who wish to participate in a corps sky diving club should attend the Sky Diving Club meeting at 7 p.m. Wednesday in room 22 of the SSC Building.

A.I.C.H.E.
The regular monthly meeting of the student chapter of The American Institute of Chemical Engineers will be at 7:30 p.m. Wednesday in room 101 of the Chemical Engineering Building. Mr. Mario Wheeler of Universal Oil Products will speak on "The Planning Required to Insure an Orderly Process Unit Startup."

INTERNATIONAL INTEREST COMMITTEE
The International Interest Committee will show the Italian film, "6 1/2" with English subtitles, at 8 p.m. Thursday in the Coronado Room of the University Center. The show is free with a student ID.

ACE
The student chapter of the American Society of Civil Engineers will meet at 6:30 p.m. Wednesday in room 52 of the C & ME Building. The program will concern registration as professional engineers and an orientation of freshmen in the civil engineering program.

Today in history

Highlights reflect Vietnam withdrawal

By THE ASSOCIATED PRESS

Today is Tuesday, Nov. 3, the 307th day of 1970. There are 58 days left in the year.

Today's highlight in history: One year ago — President Nixon told the nation in a television and radio address he had a timetable for the withdrawal of all U.S. combat forces from Vietnam.

KTXT-TV Schedule

- 4:30 PLAY SCHOOL - for pre school children
- 5:30 MISTEROGERS - Misterogers plays a small xylophone.
- 6:00 WHAT'S NEW - "Sports and the Professor" - baseball & members of the Chicago White Sox are featured.
- 6:30 DISCOVER FLYING - "Take Off & Landing"
- 7:00 SOUTHERN PERSPECTIVE - TV magazine with a southern accent (1 hr)
- 8:00 THE ADVOCATES (C) - "So They All May More Easily Vote, Should the Federal Government Be Responsible for Registering All Eligible Voters for Presidential Elections?" (1 hr)
- 9:00 SAN FRANCISCO MIX (C) - "Sleeping" (1 hr)

The Boys in the Band

Veteran actors assemble

One of the most experienced casts of veteran actors at Tech has been brought together by director Chuck Kerr for "The Boys in the Band" which will run at the Lab Theatre Nov. 12-16. Kerr stated, "Because of its homosexual milieu, 'The Boys in the Band' is a milestone in American theatre. It brings the newest and most exciting of contemporary theatre to Tech."

Larry Randolph, who received the Best Supporting Actor Award for his portrayal of Sinex in "A Funny Thing Happened on the Way to the Forum" at the Lubbock Theatre Centre declared that "BITB was 'an exciting play; a real actor's vehicle'." Randolph, who plays the role of Michael, has worked in summer stock as associate director of "Unto These Hills" in Cherokee, N.C., and is a Theatre Arts professor at Tech.

Alan is played by Holmes Brannon, a graduate student, who has appeared in "A Man For All Seasons" and "The Prime of Miss Jean Brodie" at Tech. John Bratcher, also a graduate student, will portray Harold. Bratcher remarked that "The Boys in the Band" was "an actor's show and an opportunity to do something different." "Taming of the Shrew", "You Can't Take It With You", and "Who's Afraid of Virginia Woolf" are among Bratcher's many credits.

Britt Newton, a Tech junior, will play the role of Cowboy. Appearing in his first Tech role, Newton has had experience in

Policy committee rejects oil quotas

DALLAS (AP) - A policy committee representing the nation's independent oil operators rejected Monday a suggestion oil producers, large and small, be granted oil import quotas.

Current quotas are geared only to refinery runs and some independents had argued producer participation would provide additional capital to revitalize explorations for new domestic oil and gas reserves.

high school in "Six Who Pass While the Lintals Boil" and "The Bishop's Candlesticks".

Walter Marlin, who has been seen in "A Taste of Honey", and who was music conductor for "Haunted House", will take charge of the role of Bernard, the black in the play.

Jay Brown, will play the effeminate Emory. Brown has appeared in "Tobacco Road", "Thurber Carnival", "Dark of the Moon", "Taming of the Shrew", and "The Prime of Miss Jean Brodie". "Boys in

the Band" is a challenging part of my acting experience," Brown remarked.

Hank will be played by Michael Martin. Martin has appeared in "No Exit" and "Lysistrata" at Tech and has done summer stock in Danville, Ky.

The boxoffice for "The Boys in the Band" opens Nov. 5, and will be open from 9 to 5 daily. Tickets are \$1 each and may be purchased at the Lab Theatre in the Speech Building. There are no reservations.

Mark Compere of Abilene, Tech agricultural sciences major, took top honors in milk

Computer firm discloses cutback

DALLAS (AP) — Scientific Control Corp. (SCC) a Dallas-based manufacturer of computers and data communication terminals, disclosed a substantial reduction in its work force.

As a result of the reduction, all operations of SCC have been severely curtailed and consolidated at its offices and plant in Carrollton, Tex. The decision to reduce the work force was prompted by a lack of working capital, a spokesman for the firm said in a prepared statement.

judging in intercollegiate dairy judging contests conducted Saturday in Dallas.

He also placed third in ice cream judging.

Tech's team placed third in milk judging and butter judging. Other members of the team are Paul Drager of Littlefield, Billy Freeland of Crosbyton, and alternate Leslie Hoggard of Lubbock.

They were accompanied to Dallas by Team Coach J.J. Willingham, chairman of the Food Technology Department at Tech. The Tech team placed fifth in overall judging and competed in national contests held in Astorhall in Houston, Monday, at the National Dairy and Food Exposition. Results of the Houston contests were not immediately available.

If you know a girl considering an ABORTION

this message might even save her life!

It is no longer necessary for unfortunate girls to be ruthlessly exploited for profit by quacks and inept butchers. Now they can have perfectly legal abortions under strict hospital care. The new California Therapeutic Abortion Act provides that all services be performed by physicians in accredited hospitals.

Last year it is estimated some 700,000 illegal abortions were performed in the United States. Almost without exception exorbitant prices were charged, hospital facilities were not available and a complete medical staff was not present to cope with emergencies.

Some of those girls died unnecessarily. Others suffered severe infections. Still others will never again be able to bear a child due to incompetent treatment.

The National Abortion Council for Therapeutic Abortions and Family Planning wants to make sure that all girls receive humane and sanitary treatment. YOU CAN HELP.

If you know of a pregnant girl who is considering sneaking off to have her abortion in a germ-infected apartment or office tell her to call us. Our counseling service is free.

We recommend only: the most reputable physicians; doctors offering fair and reasonable prices; services which will be completely within the law; services performed at accredited hospitals.

Introducing the fastest ladies' shaver in the whole wide world.

You know those timid little ladylike shavers? Well, forget them. Because the big, all-new Lady Norelco 20L is here. And it's the world's fastest ladies' shaver.

It has the biggest shaving head of all the ladies' shavers. The largest active cutting area. And an extra-thin shaving head to shave extra close and smooth. Which means you can shave your legs and underarms 40 to 50% faster than with any other ladies' shaver in the world.

The new Lady Norelco is a beautiful poppy red, and it comes in a shiny black case. And that makes it the fastest, prettiest ladies' shaver in the whole wide world.

The new Lady Norelco

Sideline Comments

Gripes, nay; pep rally, yea

by Bob Brewster

If there are any grumblings around campus about the effectiveness of Jim Carlen in his maiden voyage at the helm of the Red Raiders football team, forget it. You don't have a leg to stand on.

The Raiders are 6-2 for the season with basically the same personnel that went 5-5 last year. Some criticism has heard by these ears when Mississippi State beat Tech, but that was expected. What wasn't expected were derogatory comments about the way Tech beat Rice.

It is bad enough for a campus community to criticize its football team when they lose, but when Tech students gripe about the manner in which their team wins, something is wrong.

Take it from Carlen, who spoke to the Red Raider Club Monday about the matter:

"When the season is over, they don't count how you won a game, but how many you won," Carlen prophesized. "It's like

J.T. (King) said to me on the golf course, "It doesn't matter how the putt gets in the hole as long as it gets there."

The Raiders have undergone a long, hard season and the key to overwhelming success this year lies in the next three weeks. As Carlen said in reply to a question after Saturday's game in Houston, the Raider players are beaten up a little, but all the other teams are, too.

Several of the players are playing with nagging injuries and a few other starters are out of action completely. But Carlen is not a man to cry about injuries and he doesn't.

The game with TCU this week is going to be no picnic. That may sound like familiar talk, but, as Carlen says, his players are tired and the Frogs are one of the most improved teams in the league.

TCU and Tech both carry one loss into the Dads Day battle in Jones Stadium, so one team will be eliminated from Southwest

Conference competition when the game is over.

The Raiders moved the ball well in the middle of the field on a tough Rice defense Saturday night, but they couldn't get across the goal line. Carlen said that he will spend time-a-plenty working on his short-yardage offense this week in an attempt to remedy the situation, but the guess here is that it will not be a big problem against the Frogs.

What will be a problem is getting the players to their highest emotional peak for TCU and the two games after that, Baylor and Arkansas. The Raiders are always high for any game, but when a team has to get up every week for a game, it makes it tougher for Carlen and his staff to have them at their highest.

This is where the students come in. The Raiders are winners, whether you like the way they win or not, so support them the rest of the season in a manner they deserve: the best.

IM semifinal play begins; ATO tourney starts today

By MILLER BONNER
Asst. Sports Editor

All but four teams were eliminated from competition this past weekend as the intramural touchfootball playoffs begin semi-final battles.

All but four teams were eliminated from competition this past weekend as the intramural touchfootball playoffs begin semi-final battles.

The semifinals will begin tomorrow at 5:00 p.m. on field five (located between the Men's gym and University Avenue).

Two greek squads, an independent team and the resident halls will be represented. The Phi Delta Theta frat will meet the Hookers while Phi Epsilon Kappa goes after Gaston Hall.

The Phi Deltas gained semifinal status by whipping the Sigma Alpha Epsilon "A" team 6-0 while the other SAE representative was also shutout, 13-0, by the Hookers. PEK slipped past the Baptist

Student Union, 2-0 and Gaston beat Murdough "B" on penetrations after tying 7-7 at the conclusion of regular play.

As the football playoffs come to a screaming halt, basketball is quickly becoming a more favorite pastime in student competition.

Alpha Tau Omega is sponsoring its eighth annual invitational basketball tournament with the 13 Greek fraternities invited plus the Moonrakers, Double T Association and Gordon Hall. Play begins tomorrow afternoon at 5:00 p.m. in the Men's gym and will continue through Friday.

All proceeds of the tourney will go to the Inter-Fraternal Council's scholarship fund according to director Bob Cutshall as first, second, and consolation trophies will be awarded. A Tournament queen will be announced Friday night along with ten man All-Tournament team.

Two games will commence this afternoon at 5:00 p.m. in the intramural and Men's gyms. Gordon Hall meets the Moonrakers and the SAE's play the Double T Association.

At 6:30 p.m. Sigma Chi and Kappa Sigma duel while the Phi Psi's meet the Phi Deltas.

The host team, ATO's, and the Pikes begin play at 8:00 p.m. as do the Fiji's and KA's.

The final matches of the night feature the defending champions, Delta Tau Delta, battling the Sigma Nu's as the SAE's and Beta Theta Psi's also play beginning at 9:30 p.m.

The annual affair serves not only as a "practice" round before the regular intramural basketball leagues begin but also lets the teams involved scout opposition.

The affair has a history in its eight years of existence of being the largest single contributor on the IFC scholarship fund according to Cutshall.

Carlen closes doors for Frog practices

By BREWSTER
Sports Editor

Tech head coach Jim Carlen and his chief scout, Tom Wilson, told Red Raider Club members that TCU is the most improved team in the Southwest Conference, and Carlen announced closed practices in preparation for Saturday's game with the Frogs at the weekly banquet at Pioneer Hotel Monday.

Wilson said that the Frogs have jelled into a contender in the last two weeks after their

two wins over Texas A&M and Baylor.

"TCU started the season with young personnel and lost some games, but they have come on strong and are in the same spot we are in conference play, with one loss," Wilson said. The Frogs are 2-1 in SWC action, Tech is 3-1.

Wilson praised TCU quarterback Steve Judy in his scouting report, calling Judy the best all-round quarterback he has seen this year.

"I know I've told you this

before," Wilson said to the group of downtown businessmen. "But I've always shot straight with you and this is my honest opinion: he's got to be the best quarterback we've played."

Carlen echoed Wilson's opinion of TCU's improvement this year and said that the Raiders would work behind closed doors this week, "Because we're leg weary and are going to work on some new things."

"We're not going to work long and hard this week," Carlen explained. "Our kids are tired. We've played every game this year with only 24-26 players, and they need rest."

Carlen announced that he would shift sophomore linebacker Quintin Robinson to middle guard for the TCU game to bolster that position in the absence of injured Jim Dyer.

Game captains for the battle with the Frogs are Larry Hargrave and Lane Wade.

TODAY YOU CAN LEARN TO READ 50-100% FASTER, FREE!

(IN TIME FOR FINALS.)

Sample the Only Reading Course taught at the **WHITE HOUSE**, and to **CONGRESSMEN, SENATORS, and KEY EXECUTIVES**

Techniques taught **ONLY** at Evelyn Wood **READING DYNAMICS INSTITUTES.**

Over 500,000 People have learned to read 3-10 times faster

You learn comprehension, recall, concentration and how to read 4, 5, even 6 times faster through exciting, new techniques discovered by Evelyn Wood and taught only in her Institutes. You'll learn more in one lesson than most "reading" courses teach in a semester. And follow-up studies have shown Reading Dynamics graduates relate their skill... and most become even faster, better readers. Because it's the natural way to read faster.

Locally, hundreds of students, executives, and housewives have learned to read "Dynamically." They're part of more than 500,000 who've taken the Evelyn Wood course and learned to read all they need to read, quickly and thoroughly. If they can learn to read 3 to 10 times faster in only 8 weeks, you can too!

Over 150 Institutes located throughout the world.

Teaching over 100,000 people a year makes Evelyn Wood Reading Dynamics the world's largest school of reading. And each person who enrolls has free lifetime privileges they may exercise at any of 150 Institutes throughout the world - from Australia to New York, Hawaii to Germany. The reason for the world-wide success of Evelyn Wood Reading Dynamics? Because it works! And it will work for you!

Read faster, understand more, in less time!

No machines, No gimmicks. Reading Dynamics WORKS!

If you don't understand and remember what you read, you've wasted your time. Unique techniques taught only at Reading Dynamics enable you to read and understand material at least 3 times faster (it's guaranteed!)... or your tuition is refunded. The average comprehension increases 12 per cent, speed jumps 470 per cent. Learn to read in 12 minutes what before took an hour. Even homework and technical material!

COME TO A FREE SPEED-READING LESSON TODAY!

SEATING IS LIMITED!

4:30 PM or 7:30 PM
