

INTERNATIONAL STUDENT REVIEW — Houshmand Bahi, a sophomore art education major from Iran, will be one of the many foreign students participating in the variety show in the Union Ballroom at 3 p.m. Sunday. Bahi will sing a calypso and Hebrew song. All proceeds will go to help the flood victims of Viet Nam. Admission is 75 cents for Tech students and \$1 for others.

Foreign Students Promote 'Benefit'

War-torn Viet Nam recently added another disaster to its list of woes — the worst flood and typhoon the country has known in many decades.

Approximately 1,000,000 persons were hit by the flood and 6,000 were killed.

To blacken the situation even more, communist guerrillas steal CARE packages flown in to the flood victims, according to Van Nga Pham, sophomore from Viet Nam.

Asks Aid

As a result of the flood disaster, Tran Thien Khiem, Vietnamese ambassador to the U.S., asked Vietnamese students in America to contribute to help the flood victims.

Viet Nam students recently staged a benefit in New York and 2,000 persons attended. Similar benefits have been given throughout the country.

Seven Vietnamese students at Tech wished to share in aiding their countrymen and received permission to have a benefit here. Other international students also volunteered to help; 15 countries will be represented in the benefit here Sunday.

Wide Ranges

Entertainment will range from a karate demonstration to calypso songs to a mock wedding. Several of the students will present a style show of costumes from their native countries.

Techsans Injured In Wreck

Glenn E. Galbraith was listed in critical condition at Methodist Hospital Friday afternoon as the result of a two-car accident Thursday night.

A passenger, Earl Robinett, was listed in fair condition.

Galbraith is a sophomore from San Antonio and resides in Men's No. 9.

Robinett is a freshman from Fort Stockton and resides in Thompson Hall.

Charles Russell, the driver of the other car, and Mike O'Neal of 2314 Main, were admitted for treatment.

The accident occurred at 45th St. and College Ave. at 11 p.m.

John Moeser will emcee the style show; Quynh Hoa Hoang will narrate.

All proceeds from the benefit will be channeled to the flood relief organization in Viet Nam through the Vietnamese embassy in the U.S.

The program is slated for 3 p.m. Sunday in the Tech Union Ballroom. Student tickets are 75 cents; others are \$1.

Showing Slated For 'Contrast'

A special performance of "The Contrast," Royal Tyler's 18th century comedy, will be at 8:15 p.m. today in the University Theater.

"The Contrast" will be presented for members of the Texas Educational Theater Assn. and the public.

Tickets are 50 cents for students and \$1.50 for general admission.

Mass Exodus Continues

Viet Cong Ambushers Routed At Air Field

SAIGON, South Viet Nam (AP) — Defenders of Da Nang air base, the jumping off point for a retaliatory U.S.-South Vietnamese strike Thursday against North Viet Nam, smashed a Viet Cong band found dug in Friday near the sector perimeter.

Vietnamese planes bombed the band and then a Ranger outfit closed in. Five of the Red guerrillas were killed and 10 captured to destroy that threat of a Communist attack against the base.

Top Target

Military intelligence men consider Da Nang, 80 miles south of the border, No. 1 now on the list of potential targets of Viet Cong mortar crewmen, though such a thrust could mean another reprisal raid on their North Vietnamese mentors.

Red crews, operating with American-made mortars captured in battle, took a heavy toll of American lives and aircraft at Bien Hoa Nov. 1 and at Pleiku last Sunday.

It was the attack on Pleiku, where eight Americans died, that led Washington and Saigon to order the first of the retaliatory strikes.

Taylor Visits

U.S. Ambassador Maxwell D. Taylor flew to Nha Trang, on the South China Sea 180 miles north-east of Saigon, to visit some of the American servicemen wounded in that attack and hospitalized in Nha Trang.

He also looked in at Qui Nhon, 100 miles up the coast, on casualties from the Viet Cong terrorist bombing Wednesday night of a U.S. enlisted men's billet in that supply base.

Work details still probed the wreckage of the four-story concrete billet at Qui Nhon.

Two Americans were killed by

the explosions and 19 are missing and feared dead. Twenty-two of the survivors were wounded, five seriously.

Exodus Continues

The exodus of 1,819 American dependents from Viet Nam continued, with next Wednesday the target date for completion of the withdrawal. A total of 398 departed Friday.

U.S. Air Force pilots who took part in the 160-plane attack

Thursday on North Viet Nam said the joint U.S.-Vietnamese action against the Chap Le barracks area was certainly a success.

The Americans streaked in below 1,000 feet to suppress anti-aircraft fire with fragmentation bombs and rockets. Then propeller-driven Vietnamese fighter-bombers, also operating under the clouds, picked out assigned targets of the area, 8½ miles north of the border.

Dr. Bradford Addresses Honor Science Students

HOUSTON (Special)—Dr. John R. Bradford, dean of the School of Engineering, talked of things to come during an address entitled "Modern Uses of Radioactive Materials" at the third annual Atomic Energy Symposium for Honor Science Students here Friday.

The Tech educator introduced his Houston area high school student audience to a cartoon character caller "Mr. Radioisotope" who was used throughout the presentation.

Projects Mentioned

In his talk, Dr. Bradford mentioned several projects by the National Aeronautics and Space Administration (NASA) which involves use of radioactive materials.

"Other future uses may include a bomb detection device for the rapid and reliable detection of a bomb in a suitcase or in hand luggage," he continued. "Radioisotopes may offer the only practical solution."

Another area of importance in the future use of radioactive materials is radiation pasteurization of foods, Dr. Bradford disclosed.

"Such fish as shrimp, clams, haddock and oysters have been preserved almost indefinitely through irradiation," he said. "Potatoes and onions are probably the most successful although much progress has been made in preserving fruit also."

Tech Radio Airs New Live Series

KTXT-FM, Tech radio station, will air controversial campus issues during a new discussion program beginning Feb. 21.

The special program, "Audio One," will be heard from 8-10 p.m. on Sundays.

A live program, "Audio One" will be set up in a question-and-answer style. Radio listeners can call Ext. 2153 and ask questions during the program. These calls will be broadcast.

Nicky Redinger, KTXT station manager, is the moderator for the discussion program. Representatives from KTXT-FM and The Daily Toleador and authorities on campus problems will participate on the program.

The executive staff of the radio station will select persons to appear and explain areas with which they are connected.

Discussion topics will be released at a later date.

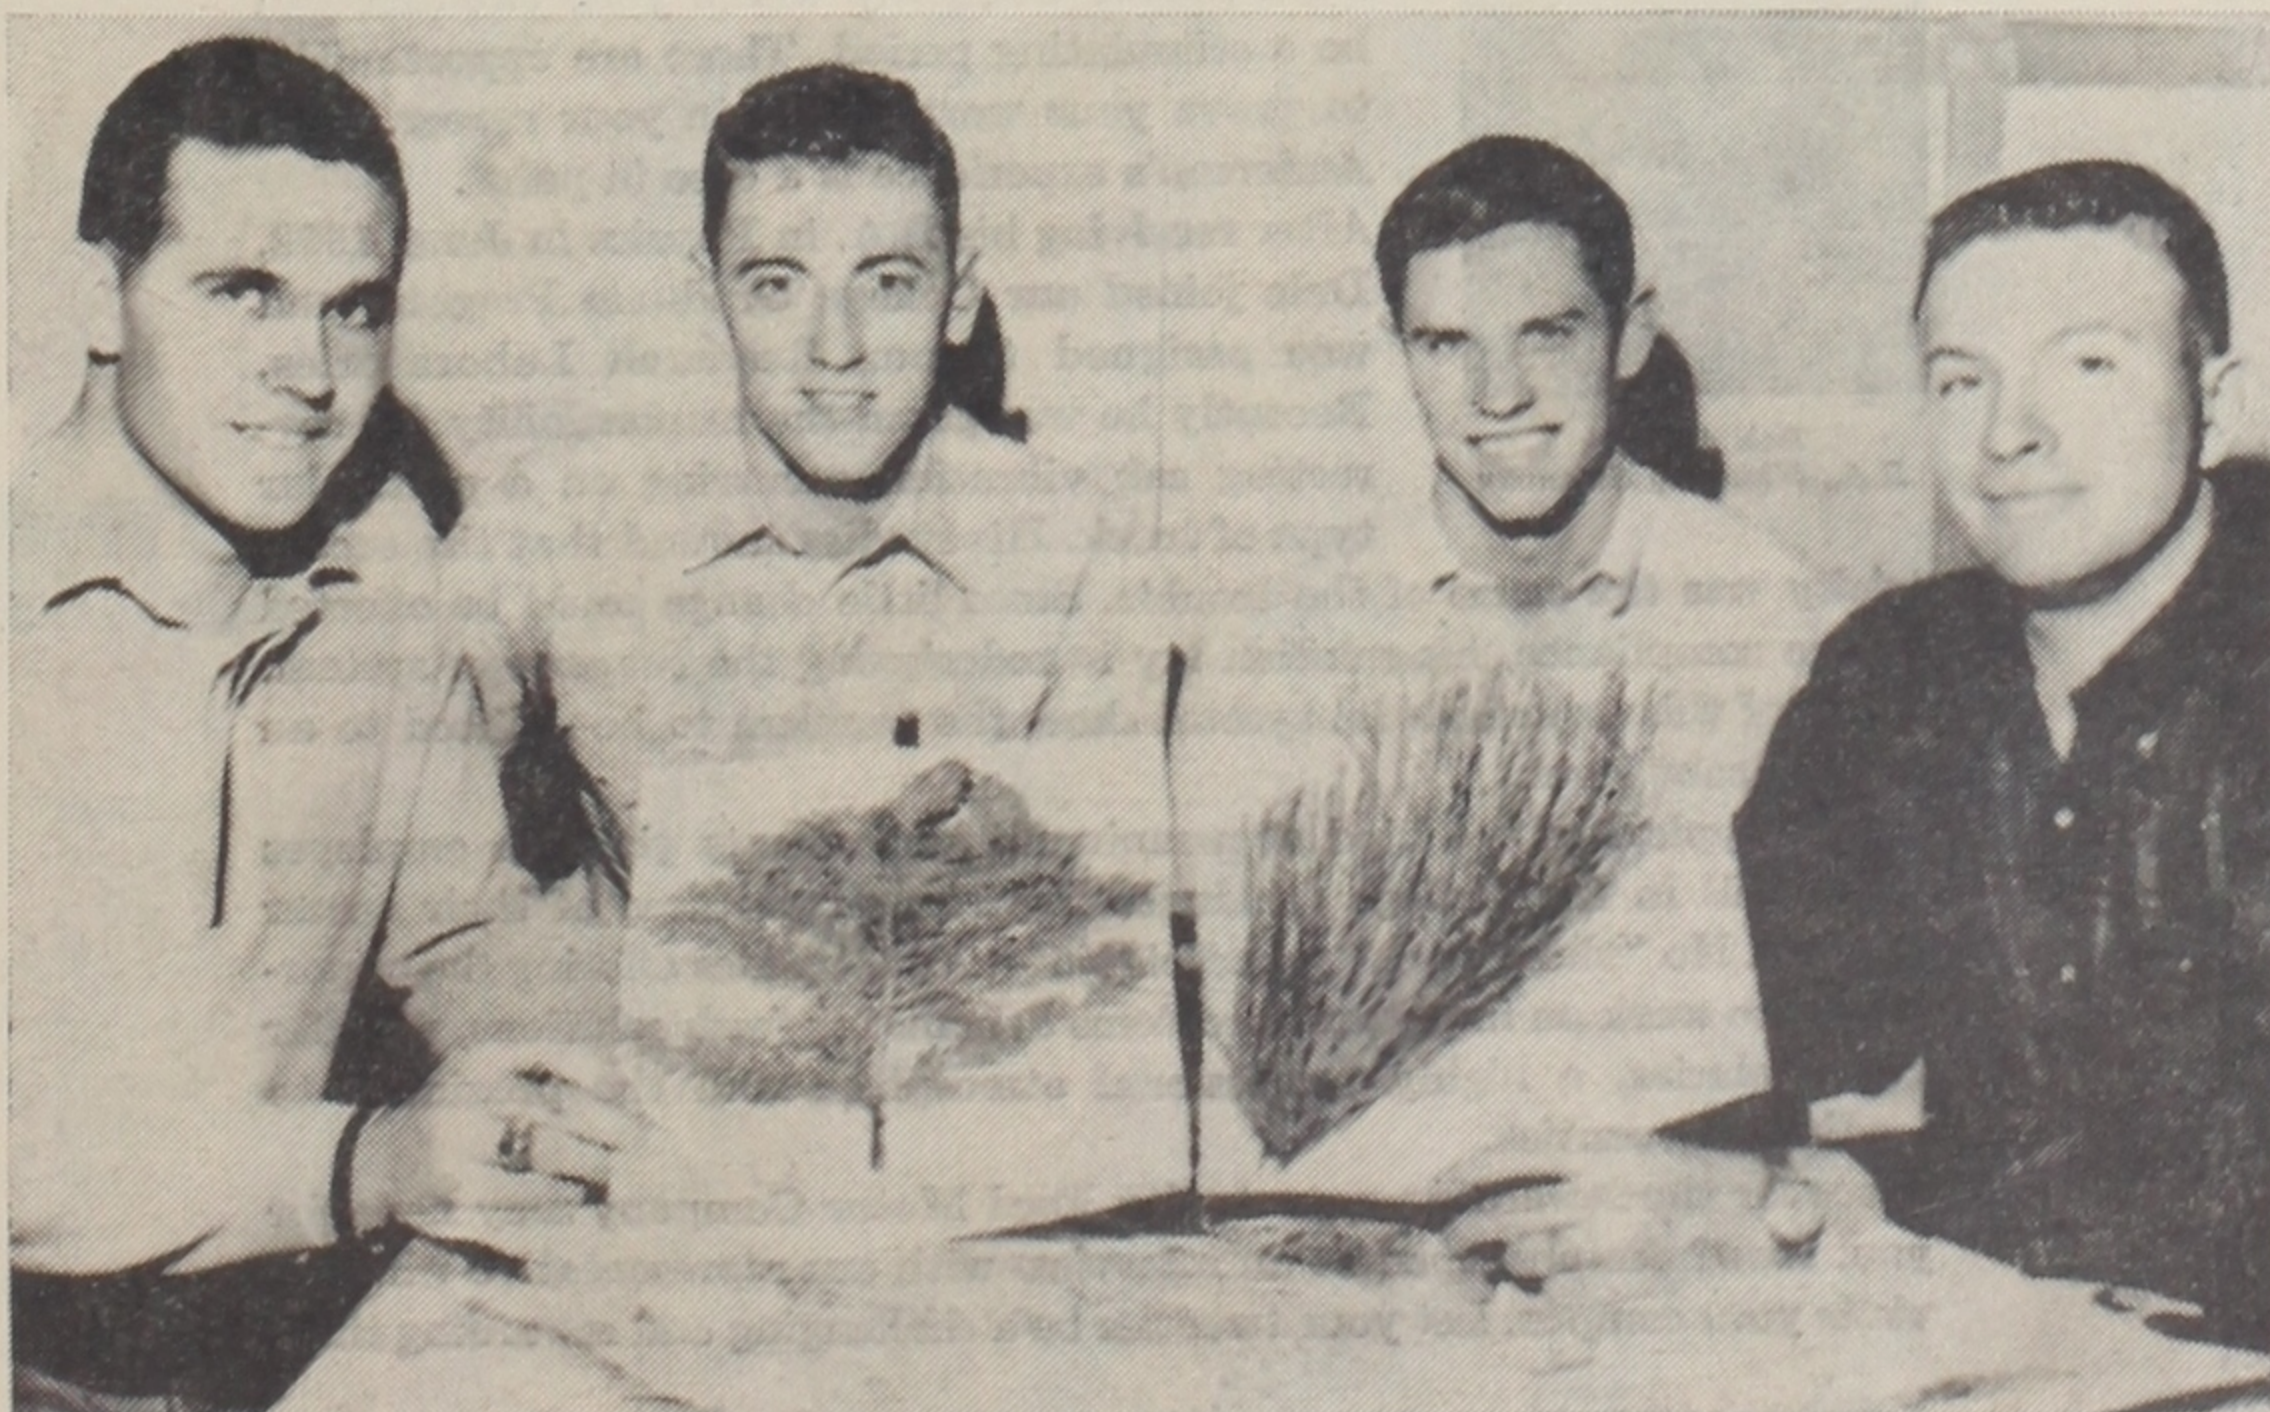

Directors Hear Reports Friday

Tech's Board of Directors in a closed meeting Friday heard reports from campus committees.

The educational television, academic programs, campus and building, finance and the executive committees reported to the board.

The board will meet in President R. C. Goodwin's office at 9:30 a.m. today.

★ New National Champions ★

NATIONAL CHAMPIONS — Texas Tech's range judging team won top honors Friday in national competitions in Las Vegas, Nev., in connection with the meeting of the American Society of Range Management. Team members are, left to right, Tommy Welch, Seagraves senior; Jimmy

Brown, Wellington junior; Gerald Horn, Andrews senior, and Darrell Ueckert, junior from Merkel. Brown placed second in overall individual judging. Seventeen teams were entered, with Utah State University placing second and Colorado University third.

Raider Roundup

FINANCE ASSN.

The Finance Assn. named Tom Craddick, Midland senior, president, recently.

Other new officers are Don Garrett, San Antonio senior, vice president; Ray Walker, Floydada senior, secretary; John Alderfer, Dallas junior, treasurer; and Rick Rogers, Corpus Christi senior, reporter-historian.

The association will meet again Wednesday.

THETA SIGMA PHI

Theta Sigma Phi, women's journalism honorary sorority will host a tea Sunday at 2 p.m. in the Tech Union for all spring semester rushees.

UNION SPEAKER

Dr. Joseph T. McCullen, English professor, will speak on "Science—Philosophy—Compatible?" in the Union Mesa Room at 4 p.m. Thursday.

HONORS COUNCIL

The Honors Council will meet Sunday at 3 p.m. in the Anniversary Room of Tech Union.

CHRISTIAN STUDENT CENTER

The Christian Student Center, 2318 13th St. will present a review of the book, "The Man Who Died," by D. H. Lawrence, Sunday at 7 p.m.

Tech Issues 1,070 Loans Though Students Are Shy

By EUGENE SMITH
Staff Writer

Coeds borrow more money from Texas Tech than male students, but they don't like to be caught doing it.

"The girls may be a little embarrassed about coming in here to ask for money," said Tom Stover, student loan advisor.

Most coeds borrow from the National Defense Education Act program. The applications for these loans may be made by mail, while applicants for all other loans must come to the loan office to be interviewed.

"The girls may prefer the less public NDEA application," Stover said. "Also, the NDEA program favors teachers somewhat, and there are more women aspiring to be teachers than men."

Tech administers four types of loans — NDEA, the Cuban Student Loan Fund, Tech loans which may be repaid following graduation, and Tech loans which must be repaid before graduation. Tech loans are set up by individuals and organizations.

During the 1963-64 school year, Stover and his staff disbursed \$250,284.20 in 1,070 loans to 635 individuals. He expects to equal that amount this year — approximately \$230,000 — in the NDEA program alone. As of Feb. 4, \$257,800 had already been loaned this year in all programs.

'More Sad Than Funny'

Stover calls the student loan business "more sad than funny." Far more applications are received than can be filled, largely because of the lack of funds. Most of the applications list family financial strain as the main reason for requesting a loan.

"But humorous situations occur occasionally," he said. "Once we had a farmer come in here who had just heard of the NDEA 'government money' available to students. He said he had been paying taxes for years and thought he'd come in and get some of this 'government money.'"

He warns students contemplating marriage and married students that the college thinks of marriage and parenthood as "un-

necessary luxuries" when considering applications for loans.

"A student loan should be a final resort," Stover said. "At times we are able to show students other sources of funds."

"This office probably gets closer to the student than any other on campus," said Joyce Sprawls, Stover's secretary. "We're digging into their hip pockets, and they sometimes end up telling us a lot more than their money troubles."

'Co-Operation A Problem'

"The biggest problem we face is student co-operation," she said. "Sometimes they don't realize that a debt to the college is just like any other financial obligation."

The student borrower is to notify the loan office of any change in address. "Most of them are pretty good about it, but a few can cause a lot of trouble."

Stover lists other problems as a need for more information on non-local sources of student financial aid, and a lessening of the frequency with which the government changes its requirements for the reports on the NDEA program.

He also issued a vote of thanks to Tech faculty.

"Each application must be accompanied by two faculty references, and we couldn't operate without the tremendous co-operation we get from the teachers."

More money is loaned in the fall semester, with freshmen getting the biggest share.

All of the loans which the office approves are not used. The average percentage of approved loans actually used for the fall term is 92.7. This figure drops to 69.2 per cent in the spring.

Grades Cause Drop

"The biggest reason for this drop is grades," Stover said. "A 2.50 over-all grade-point average must be maintained in order to keep the NDEA loan. Most of drop is in NDEA program. In many cases, we loan to a freshman who looks like he can do the work, but he can't."

In the fall of 1963, freshmen made up 28.1 per cent of the borrowers. For the spring semester, the figure dropped to 18.4 per cent.

"More freshmen borrow from the NDEA, because there aren't many Tech loans available to freshmen, and because they know more about it. More seniors borrow from Tech funds, because the great majority of them were set up to aid juniors and seniors," Stover said.

The percentage of juniors and seniors borrowing remains fairly constant from semester to semester, largely because they have accumulated enough hours to keep their grade-point average up.

FINAL WILL READ

LONDON (P) — Sir Winston Churchill bequeathed an estate worth 156,961 pounds — \$439,490.80 — mainly to his wife and three children in a will made public Friday. A far greater sum is thought to have been poured into a trust fund which Sir Winston, the will disclosed, set up for his children and grandchildren in 1946.

Tri-Delts Offer 3 Scholarships

Applications for three local scholarships offered by Delta Delta Delta social sorority are now available in the Dean of Women's Office.

Forms for the scholarships, open to any woman student, must be completed and returned by Feb. 22.

Winners will be announced March 1.

Ford Motor Company is:

challenge

Dale Anderson
B.A., Willenberg University

At many companies the opportunity to work on challenging projects comes after many years of apprenticeship and a few grey hairs. Not so at Ford Motor Company where your twenties can be a stimulating period. There are opportunities to prove your worth early in your career. Dale Anderson's experience is a case in point.

After receiving his B.A. in Physics in June, 1962, Dale joined our College Graduate Program and was assigned to our Research Laboratories. Recently he was given the responsibility for correcting cab vibration occurring on a particular type of truck. His studies showed that tire eccentricity was the cause of the trouble. Since little change could be effected in tire compliance, his solution lay in redesigning the suspension system. Tests of this experimental system show the problem to be reduced to an insignificant level.

That's typical of the kind of meaningful assignments given to employees while still in the College Graduate Program—regardless of their career interest. No "make work" superficial jobs. And, besides offering the opportunity to work on important problems demanding fresh solutions, we offer good salaries, a highly professional atmosphere and the proximity to leading universities.

Discover the rewarding opportunity Ford Motor Company may have for you. How? Simply schedule an interview with our representative when he visits your campus. Let your twenties be a challenging and rewarding time.

THERE'S A FUTURE FOR YOU WITH...  MOTOR COMPANY

Historical Geology — Textbook In Disguise

By **BARBARA WORLEY**
Fine Arts Staff

For the college student, leisure time to read is a rarity; hence the necessity for a really interesting textbook: one which will free the student's mind of the idea that he is reading to learn and make him think that he is actually enjoying his studies.

Geology Book

Such a book is Carl O. Dunbar's Historical Geology, the text read and enjoyed by so many students of Geology 144.

This book, attractively bound in a cover of pea-green exemplifies the essence of exciting reading for scholars. It is cleverly elusive especially in the preface, which begins "The history of the Earth is a drama in which the actors are all real and the stage is the whole wide world." Quote, unquote.

Now what student could easily lose interest in a book that so dramatically opens its text?

But this is only the beginning, for in succeeding chapters the author discusses such interesting subjects as records in stone (the Ten Commandments erroneously excluded for some reason); the Permian period, which was such a crisis in the earth's history; or the Physical History of the Cenozoic Era; or Ice Sculptures, to mention but a few.

In a style all his own, Dunbar speaks of Dating by the Lead/Alpha-Particle Ratio, a subject which enthralles the social-minded reader, to say the least.

He then goes on, in an equally distinctive style, to elaborate on such controversial subjects as the

Final Emergence of the Appalachian Geosyncline, the Dunkard (without the r, please) Group of the Appalachian Region, the Coastal Plain's Overlap and, of all things, Elephants and Their Kin.

This last topic, one, which just naturally touches on subjects regrettably unmentionable here, is a must for all rabid fans of pachydermy.

For the drama enthusiasts, Dunbar includes a discussion on the dominant creatures of the Cambrian seas, called "Stars of the Cast."

Marine War

For those readers interested in war tactics and such strategy, there is a division on Marine Triassic of the Far West.

And especially for students of the arts—the Sculpturing of the Appalachians, Early Flint Workers of England and the Old Red Sandstones of Europe, to give an oh-so-brief summation.

There is something for every student, indeed every avid reader, in Historical Geology.

Buy it and have it ready for some dull Saturday night.

It's available at your nearby friendly bookstore.

SHIPMENT STOPPED

BONN, Germany (AP) — Thirty-six hours after Egypt announced it, West Germany confirmed today that it has stopped arms shipments to Israel.

The government spokesman, Karl Guenther von Hase, said Chancellor Ludwig Erhard and his Cabinet decided recently against arms shipments to areas of tension in the future.

WUS Agent Arrives For Spring Activities

Sue Munaker, World University Service representative, arrived on campus Friday to begin this spring's W.U.S. fund raising activities by the Student Council.

The World University Service is a non-profit, non-political, non-sectarian, international organization dedicated to helping students help themselves.

The primary purpose of W.U.S. is to raise money in order to educate students about students in other parts of the world, particularly Asia, Africa and Latin America.

From a practical standpoint, the

W.U.S. engages in four major projects at universities throughout the world: (1) health needs such as dispensaries and drugs, (2) lodging and food services, (3) scholarship aid, (4) educational facilities, equipment, books, and instruments.

W.U.S. stresses self-aid, and will provide no more than 50 per cent of any project financial requirements. The organization prefers projects in which there is an existing need for aid, an absence of aid, and an inherent ability to be self-perpetuating.

David Berry, Student Council

member and Tech W.U.S. committee chairman, said the W.U.S. is the only fund-raising organization officially allowed on campus. Miss Munaker's duties on the Tech campus specifically entail an orientation on the W.U.S., and provision of background material for Berry's fund-raising activities.

Front-Running Raiders Test Ponies In Dallas

By ALAN SEARCY
Sports Editor
The quietest place in Texas this

afternoon won't be at SMU's coliseum, for at 2 p.m. the Red Raiders of Texas Tech and the Mustangs of SMU collide in a contest which could determine the SWC champion.

Heading the conference by one game, the Raiders (6-1) face a team which they beat rather handily in Lubbock, 107-89, earlier in the campaign. However, the Ponies,

with a second place 5-2 league mark, figure on evening the score this afternoon.

SMU Beat Baylor

In their last outing, the Mustangs dropped the Baylor Bears, 76-74. Baylor is the only conference team which has stopped the Raiders. The Bears turned the trick earlier in the season, downing Tech, 77-74, at Lubbock.

Leading the SMU attack is Carroll Hooser. The 6-7 center has scored 133 points in conference action this season. Other top players are Bill Ward (6-5), Bob Beger (6-6), Andy Smith (6-3), Charles Beasley (6-4), Denny Holman (6-2), Hank Wendorf (6-3) and Mike Marsh (6-8).

As a team the Ponies are averaging 84.3 points per game through seven conference outings. Tech is averaging 90.3.

With a 30 point performance against the Aggies last Tuesday, Dub Malaise regained the conference scoring lead from Norman Reuther. Malaise has now scored 144 points for a 20.6 average, while Reuther is averaging 19.9 with 139 total points.

Denney Third

Harold Denney is Tech's third leading point maker in conference play. The 6-8 center has tallied

122 points for a 17.4 average.

For the season, Malaise also tops the scoring records. The Odessa junior has 367 points in 16 games. Denney is second with 282 points, and Reuther is third with 263.

In conference action, Denney has grabbed 69 rebounds to lead in that category. Reuther has 58. For the season, Reuther leads with 141 grabs to Denney's 138.

Raider Opponents

The Raiders have allowed opponents 1,290 total points this season for an 80.6 average per game. In conference play, foes have a 77.8 mean with 545 total points. Coach Gibson will rely on his

usual starting five—Malaise, Denney, Reuther, Glen Hallum and Billy Tapp. Hallum is averaging 13.3 points per game in conference action, and Tapp has a 4.4 average.

Good news to local fans — today's game will be televised over Channel 13 beginning at 1:45 p.m.

See Action

All eight conference teams will see action Saturday. Baylor will be host to Texas A&M at Baylor, Texas Christian goes to Fayetteville to play Arkansas and Rice will host Texas at Houston.

Tech returns to the Coliseum next Tuesday night to take on the Texas Longhorns.

Twelve More Are Signed To Letter Commitments

Twelve more schoolboy players were signed to Tech letters of intent late Wednesday afternoon and Thursday. The new signees brought the total of recruits to 24.

Those signing include fullback Gary Tepfer (175, 5-11) from Archer City, end Barney Oliver (190, 6-2) from Archer City, halfback-linebacker Gary Barrier, (190, 6-0) from Wichita Falls Rider, halfback Bob Amann from Austin High and end Keith Mamahan from Austin McCallum.

Others Sign

Others are end Chuck Bulnes (215, 6-3) of Houston Robert E. Lee, quarterback Tom Sawyer (175, 6-2) of Plainview, defensive end Larry Dickerson (200, 6-2) of Plainview, tackle-guard Mike Patterson (220, 6-2) of Winters, safety Ronnie Smith (175, 6-1) of Ballinger, tackle Bubba Atchinson (220, 6-3) of Austin Travis and guard-tackle Bill Doane (215, 6-1) of Amarillo Tascosa.

Tepfer, fullback for Class A state champion Archer City, was selected for the all-state team.

Barrier, although hampered by injuries in his bid for all-state honors, was among the most highly sought after prospects in Texas schoolboy circles.

Sawyer led District 3-4A in passing his sophomore and junior years and was third this past fall as he spent part of the time at halfback. He scored five touchdowns,

passed for 11 more. He rushed for 525 yards and passed for 736 last season.

Raiders Top Stats

BY ASSOCIATED PRESS

The Texas Tech Red Raiders currently pacing the Southwest Conference basketball race, may be heading for not only the title but also another league scoring record.

In seven conference games, the Red Raiders have scored 632 points for a 90.3 average, well ahead of their pace last year when they posted a new loop mark of 1,189 points.

Texas Tech also has the leaders in two of the four statistical categories. Dub Malaise is leading the scorers with 144 points and an average of 20.6 per game.

Texas Christian's Gary Turner is setting the pace in rebounds with an average of 11.7. Arkansas' Ricky Sugg leads the free throw shooters with a 90.6 average.

The Southern Methodist Mustangs have the second highest scoring average of 84.3 points per game. Texas has the best defensive average, giving up only 69.5 points per game.

Texas Tech has the best team field goal percentage, hitting 51.2 per cent of its shots while Arkansas has the best team free throw record, hitting 77 per cent of its attempts.
