## Retreat Delegates Will Leave Friday

More than 100 students representing 67 campus organizations will leave Friday to attend the Board of Student Organizations annual retreat at Bishop's Lodge in Santa Fe.

Delegates will board buses at 11:15 a.m. on the east side of Tech Union. Last of the three buses will depart at 12:15 p.m. Each delegate can carry one suitcase, and girls may wear slacks on the trip.

Vicki Pharr, retreat chairman, said its purpose is to give "leaders a chance to meet leaders."

Delegates will break up into groups, she said, to discuss common organization problems.

"The reason we go on a retreat is to get away from the campus so that we can look back on its problems," she said.

Dr. Vincent Luchsinger, associate professor of marketing, will address the delegates at the meet.

The buses will return to the Tech campus sometime Sunday.

## Dr. Einstein To Lecture On Engineering Friday

Dr. Hans Albert Einstein, professor of hydraulic engineering at the University of California, Berkeley, will be on campus Friday as the second of six speakers who will take part in a School of Engineering series of lectures. Auditorium in the Architecture-Computer Bldg., and the 4 p.m. lecture will be in the Civil-Mechanical Engineering Bldg., room 52.

The public is invited to attend both lectures.

Einstein, the son of physicist Albert Einstein, will give two lectures, at 9 a.m. and 4 p.m., on hydraulic engineering.

Dr. Keith Marmion, civil engineering department head, said Einstein is the civil engineering representative in the lecture series.

During the semester, six guest lecturers representing all fields of engineering will visit the campus.

Einstein has distinguished himself in hydraulic engineering over the past 30 years and has served as research engineer at the Swiss Federal Hydraulic Laboratory in Zurich, at the Agricultural Experiment Station at Clemson, S. C., and at Cal Tech at Pasadena, Calif.

As a consultant he has dealt with sediment problems, planning and design for the U.S. Department of Agriculture, the U.S. Army Corps of Engineers and for several foreign governments.

The 9 a.m. lecture, "Some Examples of Hydraulic Engineering Works," will be in the Architecture

DR. HANS EINSTEIN

## Will Tour Campus

# 33 Legislators Due Here Late Today

A delegation of approximately 33 state legislators arrives late this afternoon for a visit to become familiar with Lubbock and with Texas Tech as a leader in higher education.

Guests of Lubbock's Chamber of Commerce and Texas Tech, the party includes members of the House Appropriations Committee, Senate Finance Committee, representatives of the State Board for Hospitals and Special Schools and members of the Lubbock legislative delegation.

Scheduled to arrive at Municipal Airport about 4 p.m., the group will be given the city's "red carpet" welcome.

### Locals Host

Hosts for the legislators' visit will be the Lubbock delegation, including Representatives Delwin Jones, Bill Parsley and Reed Quilham, and Sen. H. J. (Doc) Blanchard. Administration officials and members of the Tech Board of Directors and Chamber board of directors and governmental affairs committee will also host the group.

The visitors will be honored at a dinner tonight at Lubbock Country Club, and, following the dinner, will be guests at the Tech-Texas A&M basketball game in the Municipal Coliseum.

Friday's activities for the legislators will include a tour of the city and Tech campus with chamber and Tech officials.

### Receive Briefing

The group is scheduled to meet with Tech President Dr. R. C. Goodwin and other Tech officials for a briefing on the college. They also will see the site for construction of a new state school for mentally retarded.

Tech officials will host a noon luncheon for the delegates in Tech Union. Following the luncheon the group will travel by bus to the airport where they will depart about 1:30 p.m.

Tentatively scheduled to make the trip, in addition to the Lubbock legislators, are Sen. Andy Rogers, Childress; and Jesse Irwin, executive director of the Board for Special Hospitals and State Schools.

Representatives in the delegation

will be Speaker Ben Barnes, DeLeon; Bob Armstrong, Austin; Don Cavness, Austin; E. M. (Mack) Edwards, Pattonville; Don Garrison, Houston; Jesse T. George, Brownfield; Wayne Gibbens, Breckenridge; David G. Haines, Bryan; Glenn Johnson, Temple; J. E. (Jake) Johnson, Houston; Walter Knapp, Amarillo; Honore Ligarde, Laredo; John Mobley, Kilgore; G. F. (Gus) Mutscher, Brenham; James E. Nugent, Kerrville; R. G. (Randy) Pendleton, Andrews; Ace Perkins, Odessa;

Renal B. Rosson, Snyder; Tommy Shannon, Fort Worth; W. T. (Bill) Satterwhite, Ennis; J. M. (Red) Simpson, Amarillo; Fritz Thompson, Borger; John A. Traeger, Seguin; J. E. Ward, Glen Rose;

Ralph Wayne, Plainview; and Willis J. Whatley, Houston.

The Union Ballroom luncheon will be attended by board members R. Wright Armstrong, Fort Worth; Alvin R. Allison, Levelland; Manuel DeBusk, Dallas; Roy Furr, Lubbock; Harold Hinn, Plainview; Wilmer Smith, Wilson and J. Edd McLaughlin, Ralls.

In addition to President R. C. Goodwin, Tech officials attending will be M. L. Pennington, vice president for business affairs; J. Roy Wells, assistant to the president; Dr. John R. Bradford, dean of the School of Engineering; Dr. George G. Heather, dean of Business Administration; and Dr. S. M. Kennedy, dean of Arts and Sciences.

## SC Group Named To Analyze Rules

The Student Council has set up a standing committee to review and analyze all non-academic rules and regulations affecting students and organizations.

Tom Edwards, chairman of the All-School Regulations Committee, said he will explore the possibility of presenting all rules and regulations affecting students in a booklet, so that students will know what rules they are expected to follow.

He pointed out that the existing situation, in which regulations are issued from the various deans' offices, makes it difficult for students to keep informed on rules.

The committee also will examine existing regulations which seem antiquated or unfair, and will make recommendations to the administration for their improvement, Edwards said.

Edwards said the committee will

not be a sounding board for students who want to take a "stab" at the administration. But students who believe they have been victimized by an unfair rule or by one they did not know existed can present their case at the Student Council office.

"This is an honest attempt by the Student Council to improve the student's surroundings and make his stay at Texas Tech more compatible," he said.

### • Correction

An inadvertent error occurred in a story in Wednesday's Treador. In the story, the Army ROTC Military Ball was described as having a "Calvary" theme, when it should have been a "Cavalry" theme. The Daily Treador regrets the error.

## SW Collection Receives Press

A letterpress has been added to the Southwest Collection at Texas Tech.

The press, donated by Mrs. Maud Hollums, Floyd County pioneer, is on display in the collection's library in the Social Science Bldg.

Mrs. Hollums also donated 24 books printed by the letterpress. Writings in the books date back to 1890.

Material in the books includes transactions of Mrs. Hollums' late father, Arthur B. Duncan, who settled the Floyd County area, serving as county judge, school superintendent and operator of an abstract business.

Pressure applied to two metal plates on the press by a hand-operated wheel and screw presses the plates together to make an impression.

## Committee To Conduct Dorm Food Hearing

The special Student Council committee studying the campus food situation is now accepting names of students who wish to testify at an upcoming committee hearing.

Chairman Tom Edwards said any student with complaints or information about dormitory food, service, preparation or quality may sign a special list in the Student Council office.

When students sign, they should list their name, address and state their complaint in general, Edwards said.

"This will allow the committee members to know approximately how many persons will attend the hearing and what kind of problems are the most pressing," he said.

Date for the hearing has not been set yet, but it will probably be in the next 10 days, Edwards said. The hearing will be closed to the public.

"However, the committee will publish a full report after we have investigated all the complaints and determined their validity," he said.

Committee members have already begun eating in various dorms and inspecting dorm kitchens.

## KAPPA KAPPA GAMMA

A speech by Mrs. Helen Corbitt scheduled Friday has been postponed until April 21. Mrs. Corbitt was being sponsored by Kappa Kappa Gamma alumni and the speech department.

THOMAS A. COX

★ ★ ★

## Cox Receives Commission

Thomas A. Cox, Jr., a January 1965 Tech graduate, recently received a Regular Army commission, according to the reserve components branch, office of the adjutant general at the 4th U.S. Army Headquarters in San Antonio.

A second lieutenant, Cox will be temporarily assigned to the student detachment at the U.S. Army Armor School at Fort Knox, Ky., for the officers' basic course before further assignment in Germany.

A 1960 graduate of Amarillo High School, he received his bachelor's degree here in industrial engineering. He was also a member of Tau Beta Pi and Phi Kappa Phi honorary fraternities.

During the 1963-64 year, he was commanding officer of the Tyrian Rifles Drill Team, commander of the Army ROTC cadet brigade and recognized as a distinguished military graduate.

## 'Chick' Member Unique?

Dr. R. A. Dudek, head of the industrial engineering department, is probably the only charter member of the Order of the Golden Chicken at Tech.

Dudek, however, makes no special claims as to the superiority of those fortunate enough to gain this distinction.

Nevertheless, since he came to Tech six years ago, the industrial engineers have taken their division of the Science and Engineering Show five times. Also, an industrial engineer has won the regional paper contest two of the four years it has been in existence, and the national contest once.

Students of the mechanical engineering department at the University of Nebraska presented the award to Dudek in 1955. The Order of the Golden Chicken Award reads:

"Know ye by these present that Richard Dudek did by his presentation of exhaustive examinations covering minute details and previously unmentioned material allow many of his honor students to achieve the mark of zero.

"For this fiendish and uncompromising way in which he graded these examinations, he has been unanimously elected as a charter member of the aforesaid Royal Order."

Dudek explained that he won the award at a year-end banquet providing students and faculty a chance to chide each other. A Royal Order of Junior Golden Chicken was organized to honor students for "obnoxious ways of asking questions."

Dudek said he left Nebraska before he had an opportunity to win his first Eggshell Cluster of the elite society.

## Room Reservations Expansion Started

Guy M. Moore, director of residence halls, said Wednesday the \$33,000 expansion of the Office of Room Reservations building will provide badly needed work space and will consolidate all the staff connected with housing into one building.

The addition will give approxi-

mately 2,500 square feet more floor space for room reservation business, paying room and board, and for filing cabinets and storage.

The present building will be converted into offices, a reception room and a conference room, said Moore.

### Office Facilities

Moore, Jess Parrish, coordinator-director of men's residence halls, Mrs. Dorothy Garner, coordinator-director of women's residence halls and all staff connected with housing will have offices in the building.

The conference room to be constructed will contain an information desk to aid campus visitors.

Moore said floor space will be allowed for a joint office for the Men's and Women's Residence Councils "if they want it."

The MRC and WRC have no office at present.

Moore said the new facilities should be completed in two or three months.

## Tyrian Rifles Will Honor Red Raiders

Tyrian Rifles Drill Team will fire their 75mm pack howitzer 25 times at noon today to honor the Texas Tech Red Raiders who, though disqualified, unofficially won the Southwest Conference basketball championship.

Under the direction of Gordon Smith, squad leader, the group will fire the howitzer from Memorial Circle. Other Tyrians participating are Jim Scott, Dan Brackeen and John Bourne.

THOUGHT FOR TODAY—That amid our highest civilization men faint and die with want is not due to the niggardliness of nature, but to the injustice of man.  
— Henry George

# Sororities And Honoraries Are Part Of Tech Growth

(EDITOR'S NOTE: The following is the third part of an address made by Texas Tech's dean of women before the Board of Directors.)

By FLORENCE L. PHILLIPS

National Panhellenic Conference sororities were approved for admission to the campus in 1952 by the Board of Directors. At that time, Mrs. Marjorie Neely was Dean of Women and she sought the advice and counsel of Mrs. Harry Power, of Austin, Texas.

Mrs. Power was the Chairman of the College Panhellenics Committee of the National Panhellenic Conference, and she was an outstanding and respected leader in the field.

The general plan of organizing sororities on the campus designed by Dean Neely and Mrs. Power is still followed at Texas Tech and it has attracted national recognition.

When sororities were permitted to come on the campus, the five social clubs petitioned national groups. Seven sororities have been affiliated with the college through the process of colonization.

The sororities at Texas Tech have won a number of national awards. For example, last summer one of the chapters received the National Award for Outstanding Chapter in the Nation for the third time. The Texas Tech chapter also attained the distinction of being the first to receive the Perfect Scholarship Award.

In addition, the collegiate who was chosen as the most outstanding member of this sorority was a student at Texas Technological College.

The objectives of National Panhellenic Conference sororities are to develop leadership and character, to encourage scholarship, and to broad-

en the moral and intellectual concepts of living on the campus and in the community.

The College Panhellenic Association is the governing body of the 12 sororities for women. This Association meets regularly to discuss matters of mutual concern, and to plan the activities sponsored by Panhellenic. Its purposes are to promote scholarship, to encourage high standards of conduct, to coordinate sorority activities, and to regulate membership selection.

### Honoraries

Texas Tech's program for women is one of three in Texas which is recognized by Mortar Board, the national honorary fraternity for senior women. Membership in Mortar Board is the highest honor that can be attained by a woman student.

The organization has a maximum of 25 members chosen on the basis of scholarship, leadership, and service. Two of the 15 section directors of Mortar Board in the United States are graduates of Texas Tech and a third was Assistant Dean of Women of the College from 1955 until 1961.

Membership in Junior Council, a local honorary society for junior women, is extended to coeds who have excelled in scholarship, leadership, and service during their freshman and sophomore years of college. Recognition is given by Alpha Lambda Delta, national scholastic honorary for freshman women, to students who have attained a 3.5 grade average during their freshman year.

There are five specialized honorary fraternities which invite only those women to membership who have excelled in a particular field of study. Tau Beta Sigma, the honorary organization for women members of the band, is the only national group on campus which was founded at Texas Tech.

## Welcome The Legislators

THIS AFTERNOON A large delegation of distinguished state representatives and senators will arrive in Lubbock to tour the city and the Texas Tech campus.

Lubbock and Tech are going all out to give the legislators the "red carpet" welcome. Although they will not officially tour the campus until Friday morning, the delegation will attend tonight's game.

Texas Tech plans to extend one of its traditional-extraordinary-special welcomes all included in one package for VIPs.

Student Association President Ronnie Botkin has asked every Techsan to welcome the legislators.

Tech does not very often get the opportunity to have legislators from other parts of Texas as visitors to our campus.

We should take advantage of their visit to show our pride in the school.

Let's give the legislators the best welcome we have ever extended. For example, a standing ovation at tonight's game will show we are very proud of Texas Tech and honored by a visit from the representatives and senators.

Bronson Havard  
Editor

## Tune In To 'Audio One'

IT'S A SHAME MORE Tech students don't have FM radios.

If they did, a whole new vista of opinions and ideas would be available—especially on Sunday nights.

Between the hours of 8-10 p.m. each Sunday, Tech's own KTXT-FM features "Audio One," an adventure in learning centered around the complexity of this place called Texas Technological College.

Still in its infant stage, the program is already making giant strides toward becoming the best place on or off the dial to hear current issues batted around by some of the best student, faculty and administration thinkers on campus.

Top panelists are the "stars" in each weekly roundtable discussion, but listeners can also get in on the act and make their opinions known in the oft-heated debates.

Already, such topics as a students' right to know, Tech laws and campus dorm food have come under close scrutiny—and some criticism and praise.

Upcoming programs will run the gamut from academic freedom to the traffic problem and will eventually cover everything in between before the semester is completed.

Nicky Redinger, KTXT-FM station manager, and his staff deserve a round of applause for carefully working out the show and getting it on its feet. We feel such a continuous public forum for exchange of ideas and information has been needed for a long time.

Still, even the greatest show on earth needs an audience before it is considered a 100 per cent success.

Maybe some store will have a sale on FM radios soon.

## Your Texas Senators ...

As a public service, the Daily Toreador prints the following list of Texas senators and the area which they serve in the state legislature.

Students, as voters now and as

voters of the future, are urged to write their congressmen and make their feelings known on any matters that the legislature can work with.

The senators include the following:

A. M. Aikin, Jr., of Paris; Jim Bates, Edinburg; H. J. (Doc) Blanchard, Lubbock; Galloway Calhoun, Jr., Tyler; Criss Cole, Houston; Neveille H. Colson, Navasota; Tom Creighton, Mineral Wells; Louis Crump, San Saba; Martin Dies, Jr., Lufkin; Ralph M. Hall, Rockwall; Dorsey B. Hardeman, San Angelo; D. Roy Harrington, Port Arthur;

Grady Hazelwood, Amarillo; Charles Herring, Austin; Jack Hightower, Vernon; Abraham Kazen, Jr., Laredo; Don Kennard, Fort Worth; Culp Kruger, El Campo; William T. Moore, Bryan; George Parkhouse, Dallas; William N. Patman, Ganado; David Ratliff, Stamford; Bruce A. Reagan, Corpus Christi; Walter H. Richter, Gonzales;

Andy Rogers, Childress; A. R. Schwartz, Galveston; W. E. (Pete) Snelson, Midland; Franklin S. Spears, San Antonio; Jack Strong, Longview; Murray Watson, Jr., Mart; and J. P. Word, Meridian.

## A Review For Answers

NOW THAT THE SHOCK has worn off about Tech's withdrawal from competition for the Southwest Conference basketball crown, we must seek answers to the question, "How could it have happened?"

The complete answers are not now known. But we must, as has been suggested, have a thorough review of the entire system and methods of checking player's eligibility.

There undoubtedly are weaknesses in the present system. This is where the fault lies. If a SWC official can detect an error of this magnitude and we cannot, then our system needs changing.

Another mistake which compounded the situation was a failure to call a full formal meeting of the Athletic Council before public announcement of Tech's withdrawal from crown competition.

Even though the steps that had to be taken were obvious, the Council should have been convened as a matter of courtesy to all members and as proper procedure.

We hope a thorough review will not only find complete answers to the question in everyone's mind, but will result in needed improvements in the checking system.

The finding of a review committee should also be made public.

# Slithery Snakes, Frogs, Salamanders Don't Scare Two Texas A&M Coeds

## Park Group Sets Dance

COLLEGE STATION (P) — Slithery snakes, croaking frogs and speedy salamanders hold no special fears for two coeds at Texas A&M University.

Misses Nan Brown and Judith Davis, the first women ever to enroll for a course in herpetology (reptiles) at A&M, are beginning to feel like veterans in wildlife management after several weeks of instruction by Dr. Richard Baldauf.

Women are generally thought to be about as afraid of snakes as they are thought to be of mice.

### Not Afraid

Miss Brown, a post graduate student from Dunmore, Pa., put it like this:

"I'm not afraid of snakes. They feel better than earthworms."

And Miss Davis, a graduate student from Scotch Plains, N.J., said:

"I don't like 'em, but I've held them before — during my undergraduate days in invertebrate zoology at Cornell and while I was a nature counselor at a summer camp."

A friendly bull snake appeared to enjoy special attention and wrapped itself around her left arm.

### Holds Degrees

Miss Brown, a high school science teacher for 12 years, holds a masters degree in secondary education and psychology from Seton Hall and a bachelors degree in science and French from Marywood College.

She is attending A&M on the Academic Year Institute plan sponsored by the National Science Foundation.

"I decided a change would do me good and that I would be able to go back to teaching with renewed vigor. Besides, it never hurts to have more education. I studied a brochure telling about A&M and I looked no further," Miss Brown said.

Miss Davis is working toward a masters degree in wildlife management, for which herpetology is a required course. She hopes eventually to do field work for a large

museum or some kind of state conservation work.

Both women will have plenty of opportunity to get first-hand information on snakes, frogs, toads, crocodiles, lizards, turtles and smaller reptiles.

Dr. Baldauf, professor of wildlife management, has set up field trips to Normangee Lake north of Bryan, the Navasota bottoms south and east of College Station, and

the Edwards Plateau in the San Marcos area of Central Texas.

Miss Brown hinted that she prefers her collection of rocks and fossils to snakes because her primary interests are in the earth sciences.

In the same vein, Miss Davis favors her dog, hamster and several fish as pets. An amateur photographer, she likes to shoot pictures of all types of wildlife.

The Park Administration Women's Auxiliary will sponsor a western dance Saturday for Tech students.

The dance will be at the K. N. Klapp Party House, 4500 Ave. U, at 8 p.m.

Tickets are \$1 per couple and may be purchased from Carl Toland, Tommy Dickerson or in the Plant Science Bldg., room 150B, or by calling SW5-2747 or PO3-3368.

## TV's Oldest Shows Have Variety, Fun

HOLYWOOD (P) — What's the secret for longevity of a television show? It helps if the series offers variety, quizzes or family fun.

That's the conclusion that can be drawn from Variety's compilation of "TV's Graveyard" from 1950 to 1965. The show biz bible listed every nighttime network series—763 in all—and showed how long they survived. More than half succumbed after one season. Only 35 per cent managed three years on the air; 13 per cent made the golden mark of five years.

It's interesting to browse through the list and see the shows that succeeded. None of the NBC and ABC shows of the 1950-51 season are still on the air, but CBS boasts two—"What's My Line" and "The Ed Sullivan Show," then called "Toast of the Town."

The 1951-52 season brought the first of "I Love Lucy's" seven years; after a lapse, Lucille Ball came back to television, though without her original co-star. The only newcomer of that season to maintain uninterrupted tenure was Red Skelton.

Survivors of the 1952-53 season are Ozzie and Harriet Nelson et al, "Meet the Press" and "I've Got a Secret." Still riding the air waves from the following season is indestructible Jack Benny—but it's reported this will be his last year with a weekly show.

Lawrence Welk made his debut in 1955-56, also "Gunsmoke," and Alfred Hitchcock. None of the new shows of the following season remain and only "Wagon Train," "Perry Mason" and "To Tell the Truth" from 1957-58. The former two are expected to fade with this season.

Donna Reed is the lone survivor from the 1958-59 season. Two hardy Westerns started the following year—"Bonanza" and "Rawhide." Among the 5-year-olds are "My Three Sons," "The Flintstones," "Andy Griffith," "Candid Camera" and Bell Telephone.

### FOUND GUILTY

LUBBOCK (P) — A verdict of two years in Lubbock county jail was returned against Airman 3.C. Richard A. Helmus, 19, Wednesday. He was found guilty of aggravated assault in the death of his 17-month-old son June 16 at Reese Air Force Base hospital here.

# Major in action!

## Minor in price!

Olds Jetstar 88 really cuts it, come exam-time. Test it out on action first. This baby can put down 315 horses, eager to go anywhere. Now score it on ride: whip-cream smooth, thanks to four coil springs and other goodies. Now room: stretch yourself in interiors that say Olds is out to win the space race. Now price: Jetstar 88 prices start below 30 models with "low-price" names. Actually, these tests are hardly fair to the other thirty . . . Olds is in a class by itself!

# Vietnamese Need Peace Workers, Not Bombs

By PAULINE EDWARDS  
Assistant Managing Editor

"Americans unconsciously present an air of being superior, which creates hostile feelings among the Vietnamese people,"

says Hoang Thi Quynh-hoa, Tech graduate student from Saigon.

In Viet Nam, the family name is always written first, followed by the given name, which accounts for the unfamiliar arrangement of Quynh's name.

"It is not more planes and more bombs that Americans need to send to South Viet Nam, but peace representatives who will work and associate with the Vietnamese people and show them that Amer-

icans are concerned about their welfare," Quynh said.

According to Quynh, 80 per cent of the people live in the countryside and are concerned chiefly "about their daily lives, not about freedom, democracy, or communism. The majority of the Vietnamese people don't want to fight the North because their relatives and friends live there." The Communists take advantage of this fact and use propaganda to fight

against the American image in Viet Nam, she said.

"Before the American troops came to South Viet Nam," said Quynh, "the Vietnamese thought Americans were very rich. A common saying in our country was 'Spend money like Americans.' However, some of our people were surprised and, in some cases, a little disappointed to learn that not all Americans were rich," she added.

"One lesson Americans need to learn," said Quynh, "is that they cannot apply their own principles, beliefs and what they think is right in Viet Nam, because the backgrounds of the two are different. Besides, what the Vietnamese need now is help, not promises of freedom."

When asked her impression of the constant power turn-over in Viet Nam, Quynh said, "It is all too confusing. It is hard to understand or keep up with what is going on."

One reason for the instability in government, according to Quynh, is because there are too many who want to be leaders but no one who is popular enough to gain and retain majority support.

This year marks Quynh's second to study at Tech. Instead of returning home during the summer, she attended school in Indiana. Therefore, Quynh has not been home since the revolution began.

Quynh, a graduate English major, is not the only Techsan from Viet Nam. Six other Vietnamese students are enrolled in the undergraduate schools. Quynh, a Fulbright Scholar, is studying in America on a grant from the United States government.

To receive the grant, which is awarded on a competitive basis, Quynh took a written and an oral exam and appeared before a committee composed of Vietnamese and American officials. Quynh will graduate in May and return to Saigon to teach English.

There are many notable differences in the educational systems in Viet Nam and America, according to Quynh, who received her teaching certificate (equivalent to bachelor of arts) in Saigon and then taught English for two years at Gia Long High School.

Vietnamese grades are numbered backwards compared to American grades. In Viet Nam, elementary school consists of five grades beginning with the fifth grade which is equivalent to the first grade in America and working up to the first grade which would be the American fifth grade. This same principle works for junior high and high school.

"In some ways, Vietnamese schools are more advanced than American schools," she said. "Some students who graduate from high school and then come to America to study in college are immediately classified as juniors. However, students on scholarships or government grants must attend all four years here."

# Red Raiders Meet A&M In Finale Tonight

Texas Tech will meet the Texas A&M Aggies tonight at 8 p.m. in Municipal Coliseum in their last game of the season.

The Raiders, who lead the conference by two full games, boast an 11-2 conference mark and a 16-6 season record. With Tech ineligible for the championship however, SMU and Texas are now tied for first place with identical 9-4 records.

Texas A&M enters tonight's game fresh from a 94-81 win over

SMU Tuesday night. Last year's conference champs are 7-6 in league action and 14-9 for the season. The Aggies lost to the Raiders 82-76 in overtime earlier in the season.

### Beasley Top Scorer

John Beasley leads A&M and the conference in scoring. He has scored 592 points this season for an average of 25.9, while in conference play alone he has hit 368 points for a 28.3 average. He hit 38 against SMU.

The Kildare junior brought his scoring record for conference games to 368, breaking the old record of 362 set by Dick O'Neal of Texas Christian in 1955. He also broke the school record for scoring in a season with 592, which bettered the 568 set by Bennie Lennox in 1963.

He also scored the most points an Aggie ever got in a conference season. Lennox had 352.

Beasley has scored 227 points in the last six Aggie outings and that's 34.5 points each contest. Prior to that, he was held to 13 points by Tech's Glen Hallum.

Other Aggie starters will likely be Dick Rector (6-1), Paul Timmins (6-0), Bill Gasway (6-6) and Ken Norman (6-6).

Tech, who has not had much rest since Tuesday's 87-80 win over Arkansas, didn't arrive back in Lubbock until Wednesday afternoon.

### Malaise Tops Tech

Dub Malaise, who hit 30 points against Arkansas, is second in conference scoring behind Beasley. Malaise is averaging 23.9 for the season and 23.0 in conference action. He hit 30 against A&M in the last meeting.

Malaise was named as honorable mention in the 1965 basketball All-America announced Tuesday by the Associated Press. He was the only SWC player to be listed.

Harold Denney is second in scoring for the Raiders with a 17.3 season average and a 17.0 mean in conference play. He also leads the

team in rebounds with 195 grabs.

As a team the Raiders are averaging 88.0 points per game in conference play while allowing opponents 78.0. The Aggies are scoring an average of 83.0 points per game and their opponents have a 79.8 average.

### Other SWC Games

In other Southwest Conference games tonight, Arkansas plays SMU at Dallas, Texas meets Baylor at Waco and Rice takes on TCU at Fort Worth.

The SWC representative to the NCAA playoffs could be determined tonight if one of the two teams tied for the lead (Texas and SMU)

loses and the other team wins. However if they both win or both lose the race will end in a tie and a playoff game would result.

In their previous meetings this year, SMU beat Texas 73-70 but dropped the second game to the 'Horns 89-79.

In the preliminary game tonight the Picadors meet the West Texas State freshmen.

## Playoff Tickets Now Are Ready For Sale

Tickets to the NCAA regional playoffs here March 8 will go on sale late Thursday or Friday morning according to Mrs. Mildred Wright, Texas Tech ticket manager.

Tickets will be sold at the Athletic Office in Jones Stadium on 6th Street.

Prices are \$3 for tickets below the concourse, \$2.50 for seats above the concourse and \$1.50 for seven sections in the north and south ends. Since the playoffs are an NCAA championship event, no student admissions are available.

Colorado State University and Oklahoma City University clash at 7 p.m. Monday, Notre Dame and the University of Houston at 9 p.m.

Winner of the first game will play San Francisco in the West Regionals at Provo, Utah, March 12, while the survivor of the Notre Dame-Houston contest meets Oklahoma State at Manhattan, Kansas in the Mid-West Regionals.

Notre Dame basketballers are undefeated in Texas play. The Irish downed Southern Methodist 58-45 Dec. 30, 1948, at Dallas, and defeated University of Houston 110-

80 in Houston last December. The Cougars, who meet Notre Dame Monday, rebounded from that loss to win their next nine straight games.

## New Coach Named

Don Sparks, Texas Tech trainer, has been re-assigned track coaching duties until Vernon Hilliard is able to return to duty, Athletic Director Polk Robison said Wednesday.

Hilliard is recovering from a heart attack suffered Feb. 19 and is expected to be out for six weeks.

Sparks, trainer and track coach here since 1958, last summer relinquished coaching in order to devote full time to his training duties. The University of Texas graduate formerly coached at Little Rock, Ark., Central High School and University of Tulsa before coming to Texas Tech.

Texas Tech's first outdoor competition will be the Southwestern Recreation Meet at Fort Worth Saturday.

## Golf, Tennis Teams Launch 1965 Slates

Texas Tech's golf and tennis teams launch their 1965 schedules this weekend.

Danny Mason has entered the Red Raider golfers in the Southwestern Recreation Meet at Fort Worth Friday and Saturday. George Philbrick's netmen entertain Hardin-Simmons Saturday.

**Golf Schedule**  
March 11-13 — Border Olympics at Laredo, March 30 — Rice at Houston, March 31, April 1-3 — All-American Intercollegiate at Houston.

April 5 — Texas A&M at College Station, April 9 — University of Texas at Lubbock, April 12 — Texas Christian at Lubbock, April 23 — Southern Methodist at Lubbock, April 28 — University of Arkansas at Fayetteville, April 30 — Baylor at Lubbock.

May 6-8 — Southwest Conference Meet at College Station.

**Tennis Schedule**  
March 13 — Hardin-Simmons at Abilene, Abilene Christian at Abilene, March 25-27 — Rice Intercollegiate at Houston, March 30 — University of Corpus Christi at Corpus Christi, March 31 — Pan American at Edinburg.

April 1 — Trinity at San Antonio, April 10 — Baylor at Lubbock, April 12 — University of Texas at Austin, April 20 — Texas A&M at Lubbock, April 23 — Southern Methodist at Dallas, April 24 — Texas Christian at Fort Worth.

May 1 — Rice at Lubbock, May 6-8 — Southwest Conference Meet at College Station.

Your clothes will "look better" & "feel better" when you bring them to 'Ole' McDONALD CLEANERS & LAUNDRY.

We give them the special care that garments require.

Located for your convenience—across College from Bledsoe Hall.

# Eligibility Rule Passed By Pros

**Associated Press Sports Feature**  
The professional football leagues have passed a rule, with teeth in it, barring the signing of college players until they have completed their eligibility, including bowl games. But they have left the sign-

ing of redshirts—the five-year-man—partially open.  
Now if a redshirt starts his final year he will not be bothered. But the pros have decided that if a redshirt drops out of school on his own for personal reasons and does

not register for his fifth year, he may be signed.

### Finishes Eligibility

In other words, the pros could talk the redshirts into not taking the final year. But if he does take his final year the pros won't sign him until he finishes his eligibility—there will be no signing during the season, secret or otherwise, and the redshirt can play in a bowl game before his eligibility is declared at an end.

There is considerable opposition to the redshirt program, accentuated by the recent controversy over George Sauer, the Texas end who quit college with plans of signing a pro contract.

It now appears that the action taken by the pros might have more effect on getting rid of this program than the opposition among the college people.

### College View

The colleges may take the view that it would be senseless to have a redshirt program since the pro clubs might talk the five-year men into signing before they decided to take their last season.

There are strong arguments on both sides regarding the redshirts.

Whether the good overbalances the bad is what is causing all the talk.

The Southwest Conference has had a redshirt program for at least 30 years. It was inaugurated with some very worthwhile objectives.

It was designed to help the boy who might be injured and lost a season, give the boy who ran into scholastic difficulties a chance to make it up and still have his four years of college competition, aid the boy who might have to stay out of school for personal reasons and to help the junior college transfer.

### Years Guaranteed

The boy who came from a junior college was guaranteed four years of college competition. The one-year junior college boy got four years at a senior college to get in three (he had to stay out his first year just like the regular freshman). The junior college graduate's eligibility started as soon as he reached senior college and he had three years to obtain two varsity seasons.

But the rule has been used in other ways. The coaches would hold a boy out his sophomore sea-

son if he seemed to need development or if the team was well-stocked with players at his position. In some instances the boys were held out in their junior seasons.

This, said some, was in conflict with the educational processes—a boy should get through college in the regulation time and not be held over a year just to play football. Also, it allowed a boy to actually get in five years of football since he would be with the squad and work out like the others even in his redshirt years.

### Sign More

Also, some said, it provided the larger and richer schools with an advantage — they could sign up more boys than they needed and hold out players that the other schools might use if they had them.

But, in favor of the rule, came the observation that many students needed five years to get through college, especially if they took difficult courses like law, medicine and engineering. Also, the athlete, who was playing for his school and thus putting money into the athletic treasury, didn't have as much time to study as the non-athlete.

And there was still another point cited by the lovers of sport: the redshirt program made better football. This, however, wasn't a strong point since it seemed to emphasize sports over education.

### Prominent 'Shirts

Prominent redshirts in the Southwest Conference the past few years have included Don Trull, the great passer at Baylor; Fred Marshall, star of Arkansas' undefeated, untied team that claimed the national title when it won the Cotton Bowl; Donny Anderson, Texas Tech's All-American halfback; Eddie McKaughan, ace quarterback of Texas A&M; Steve Garmon, TCU's all-conference guard; Marvin Kristynik, Texas quarterback; John Hughes, SMU's great guard.

However, Anderson couldn't be considered a true redshirt but a five-year man. Anderson was scholastically ineligible his sophomore year.

## Why Can't You Remember

A noted publisher in Chicago reports there is a simple technique for acquiring a powerful memory which can pay you real dividends in both business and social advancement and works like magic to give you added poise, necessary self-confidence and greater popularity.

According to this publisher, many people do not realize how much they could influence others simply by remembering accurately everything they see, hear, or read. Whether in business, at social functions or even in casual conversations with new acquaintances, there are ways in which you can dominate each situation by your ability to remember.

To acquaint the readers of this paper with the easy-to-follow rules for developing skill in remembering anything you choose to remember, the publishers have printed full details of their self-training method in a new book, "Adventures in Memory," which will be mailed free to anyone who requests it. No obligation. Simply send your request to: Memory Studies, 835 Diversey Parkway, Dept. 9963, Chicago, Ill. 60614. A postcard will do. Please include your Zip Code.

A message of importance to sophomore men

## If you've got what it takes to be an Army Officer, you may qualify for this new on-campus training program

A new Army ROTC program starts this coming Summer for sophomore men who apply prior to May 1—only 3,000 applicants to be accepted

If you're a sophomore now attending one of the 247 colleges and universities that offer Army Officer training—or you plan to transfer to one of these schools next Fall—you may qualify for the new two-year Army ROTC program.

This new program—designed especially for college men who have not taken Army ROTC during their first two years—will commence with six weeks of field training this coming Summer, beginning June 14. Then you'll have on-campus training during your junior year . . . six additional weeks at camp during the following Summer . . . and more on-campus training during your senior year. Even flight training is offered at some schools.

ROTC training is really a process of learning to organize and direct others—to be a leader. Consider how important this ability can be to you throughout life; yet, to acquire it you will spend relatively little time in the ROTC classroom. You'll obtain valuable junior management experience . . . a fuller and richer campus life . . . extra spending money (\$40 per month during your junior and senior school years, and even more during Summer training) . . . and, when you graduate, an Army Officer's commission as Second Lieutenant. Then you'll normally spend two interesting years on active duty, often abroad with opportunities for travel.

Talk to the Professor of Military Science on your campus about this opportunity. Ask him to describe this new short program in detail.

Or send in the coupon below for complete information. There's no obligation involved, and you'll not be subjected to any "hard sell" recruiting effort. The kind of men the Army wants can decide for themselves if this new opportunity is right for them.

**If you're good enough to be an Army Officer, don't settle for less. Sign up now for Army ROTC.**

Send in this coupon for more information on this new two-year on-campus Army Officer training program.

**U.S. Army ROTC**, Post Office Box 1040, Westbury, New York 11591

Please send me complete information on the new two-year Army ROTC program. I understand there is no obligation involved.
