No. 48

Tech Groups Urged To Send Telegrams

By PAULINE EDWARDS
Editorial Assistant

The Student Senate last night proclaimed this week as "Beat Arkansas Week."

In connection with the proclamation, Vice President Scott Allen said, "We would like to urge all clubs, dorms, fraternities, sororities and townspeople to send telegrams to support the team. We also urge all organizations and students to attend the pep rally in the coliseum 7 p.m. Thursday and to go to the airport 1 p.m. Friday to give the team one of the largest send-offs ever."

Chi Omega will operate two polls, one at the Student Union and one at Memorial Circle if weather is good or at the Business Administration building if not to give students an opportunity to sign a telegram to the team. Charge for signing the telegram will be 10 cents to be used to pay for having names transcribed on the telegram. Allen also reminded students to pick up signs from the Saddle Tramps around Memorial Circle today, Thursday and Friday for their cars and to boost school spirit since this is "Beat Arkansas Week."

The Senate composed a letter which will be sent to Mac Glover, president of the University of Arkansas Student Association,

and to Arkansas' student newspaper.

The letter reads:

Dear Mac:

Bearing closely in mind the football game this weekend, the Student Senate of Texas Tech has passed the following proclamation:

Whereas there exists but one obstacle to the dominance of the Texas Tech Red Raiders in the Southwest Conference and subsequent participation in the Cotton Bowl;

Whereas this one obstacle is a "High on the Hog" team from Arkansas;

The Student Association of Texas Technological College resolves this to be an intolerable situation and does, this sixteenth day of November, 1965, proclaim that this be "Beat Arkansas" week.

We would certainly appreciate any and all support in realizing the fulfillment of this proclamation.

The Senate also approved two nominees, Jerry Pittman and Max Blakeney, for the intramurals executive committee. These appointments are subject to Pres. R. C. Goodwin's approval. If he approves them, Tech will have a student-faculty organization governing policies and programs in intramurals.

TECHSANS SUPPORT VIET NAM POLICY—Francis Steiger, left, president of Men's Dorm No. 9, shows student president Roland Anderson a copy of the Christmas cards being sent to American servicemen in Viet Nam. Joy Cox, Women's Residence Council, and Johnny Ramirez, Men's Resi-

dence Council, look over petitions backing American policy. The cards and petitions will be presented to military and government officials today in a ceremony in the Men's 9 cafeteria. The presentation is scheduled for 8 p.m.

Famed Mezzo - Sopranoist Will Perform In Concert

By MARGARET EASTMAN
Fine Arts Editor

Jennie Tourel, world famous mezzo-sopranoist, arrived in Lubbock Tuesday from New York. The little woman who has sung in concert halls throughout the world came here for a special appearance as part of Tech Artists Course.

Her performance will be at 8:15 p.m. today in Lubbock Municipal Auditorium.

In an interview with the Daily Tornado, Miss Tourel spoke of her 22-year-old friendship with Leonard Bernstein. She described

him as "contemporary in a good way." The singer said she had introduced Bernstein's third symphony at its premiere in Israel. Miss Tourel said tonight's performance will include songs that Bernstein has dedicated to her.

She will sing songs in French, Russian and English. Miss Tourel's performance will include Rossini's "Elegy on One Note," a song that she premiered.

Miss Tourel made her debut in Paris when she sang "Carmen" at the Opera-Comique. She said she had sung Carmen (a coveted role among opera singers) more

than 300 times. She has also sung "Mignon" around 300 times.

Miss Tourel said she sang with the New York Philharmonic 13 times in one season, which is a record for any one performer. She will sing there five times in December.

Although Miss Tourel has appeared in hundreds of operas, she prefers concert singing. She still sings operatic parts, of course, but she said she would rather tell the opera with her voice than use costumes.

The mezzo-sopranoist is presently a faculty member of the Juilliard School of Music. She said she speaks five languages and sings in ten.

Miss Tourel spoke of the blackout in New York. She said, "Fortunately, I was at home. I was in Paris during the war, and the blackout gave me the same feeling, only it was worse then. The blackouts then were signs that planes were coming."

When Miss Tourel was asked to tell of a funny experience, she said, "There is nothing funny. I am a serious singer, not a comedian. I may tell funny stories from the concert stage when I sing."

This statement, alone, told perhaps a great deal about Jennie Tourel. Perhaps it showed that this woman expressed herself not through words, but through her art. And quite an artist she is! With a range from low G to two octaves above middle C, the mezzo-sopranoist is quite versatile.

Tickets for her performance are available at Tech Union, and at the door. There is no admission charge for students.

Saddle Tramps Begin 'Beat Arkansas' Week

Anyone calling on the Tech campus this week will not hear the familiar word "Hello" this week. Instead, the resounding refrain of "Beat Arkansas" will echo through the receiver.

"Beat Arkansas" is on the mind and lips of every Tech student this week as the Saddle Tramps are promoting spirit on the campus for the Cotton-Bowl deciding tilt between the Texas Tech Red Raiders and the Razorbacks of Arkansas.

Signs and tags proclaiming "Get Those Razorbacks" and "Eat More Pork," red and black streamers flowing from ears and "Bangin' Bertha" ringing out her support of the Raiders are a few of the spirit-promoting devices the Saddle Tramps are using to let the Raiders know the student

body is 100 per cent behind them.

The Saddle Tramps are playing the Tech fight song from the Ad Building Tower during lunch and in the afternoon. Cotton bolls will be distributed to the team as they board the plane Friday.

All students are encouraged to be at the Raider workouts today and Thursday from 4 to 6 p.m. The practice field is south of the Municipal Auditorium by the track field.

Activities will climax with a gigantic pep rally at 7 p.m. Thursday in the Municipal Coliseum.

Saddle Tramps also announced that telegrams should be sent to the Raiders at the Ward Hotel, Fort Smith, Arkansas.

"Beat Arkansas."

City of Lubbock

Mayor's Official Proclamation

WHEREAS, Texas Technological College and the City of Lubbock are partners in progress for all of West Texas and the Citizens of the City of Lubbock wholeheartedly support athletics at Texas Tech; and

WHEREAS, the 1965 football team at Texas Tech has demonstrated fine sportsmanship and outstanding abilities throughout the 1965 season and the Citizens of the City of Lubbock want to express deep appreciation to the College Administration, Athletic Department, Football Coaches and Players for an outstanding job this season and to the Student Body of Texas Tech for their enthusiastic support; and

WHEREAS, the Southwest Conference championship rests with the outcome of the football game this Saturday with the University of Arkansas;

NOW THEREFORE: I, Max Tidmore, Mayor of Lubbock, in behalf of all the Citizens of the City of Lubbock do hereby proclaim the week beginning Monday, November 15, 1965, as:

RED RAIDER APPRECIATION WEEK

AND

BEAT ARKANSAS WEEK

and urge all Citizens of Lubbock to give fitting recognition and support to the 1965 Red Raiders.

In official recognition whereof, I hereby affix my signature this 15th day of November, 1965.

MAX TIDMORE, Mayor

Club Scarlet To Open

Tech's Most Handsome Man will be selected Friday at 8 p.m. in the Union Ballroom at Club Scarlet, Theta Sigma Phi's mock night club.

This year's theme will be Club Scarlet goes to Bourbon Street. The Esquires will provide music and KSEL's Artie Shaw will be the emcee.

Candidates and their sponsors are: Chris Alford, Hulen Hall; Jerry Bawcom, Gamma Phi Beta and Sigma Chi; Bill Chastain, Delta Gamma; Ken Dart, Gates Hall; Eldon Frost, Kappa Kappa Gamma; Nubbins Hollar, Rodeo Association.

John Ireland, Phi Mu; Gary Knust, Pi Kappa Alpha; Collier Perry, Sigma Kappa; Clark Pfluger, Alpha Chi Omega; Steve Scott, Chi Omega; Dennis Sprad-

ley, Alpha Tau Omega; and Pike Teinert, Tri-Delts.

Tickets may be purchased at the Union Thursday from noon until 1 p.m. and Friday from 9 a.m. to 5 p.m. Admission is \$1 which will entitle the holder to one vote.

Speech Tourney Slated Today

Nineteen campus organizations meet head-on tonight in round one of Tech's Intramural Speech Tournament.

This will be the first of three rounds. Round two will be Feb. 9 and round three March 30. Tonight's session of poetry reading, radio and extemporaneous speaking will begin at 7 p.m. in room 125 of the Ag. Building.

Vatican Council Gives Approval To Three Major Declarations

Stubbs Given Medal For Chemical Work

VATICAN CITY (AP)—Key declarations on birth control, racial discrimination and atheism cleared major hurdles Tuesday at the Vatican Ecumenical Council.

The Council in St. Peters: —Approved a statement on birth control that stresses conjugal love in marriage as an element import-

ant not only for bringing children into the world but as a physical expression of mutual love between husband and wife.

—Accepted a strong declaration against racial discrimination. The declaration rules out gradual approach to the elimination of the problem and insists that discrimi-

nation must be "crushed and removed" as an offense to God.

The part of the birth control statement emphasizing conjugal love has been considerably expanded from an earlier version. Council experts said it incorporates views of Paul Emile Cardinal Leger of Montreal.

Last year and during this council session, the Canadian cardinal spoke out for a new view of marriage to accept the idea that physical love is an essential marital element, by which couples express their love and respect for each other.

Many theologians regard this concept as pointing the way to acceptance in the Church of the idea that sex in itself is a fundamental good in marriage.

DR. MORRIS STUBBS

ALBUQUERQUE — Dr. Morris F. Stubbs, professor of chemistry at Texas Tech, was presented the John Dustin Clark Medal at a meeting of the Central New Mexico Section of the American Chemical Society here Friday.

The award honors Dr. Stubbs, former director of the College Division at New Mexico Institute of Mining and Technology, for meritorious service in the field of chemistry in New Mexico.

Dr. Stubbs was a member of the faculty of the Socorro College from 1946 to 1963, serving in the capacities of professor of chemistry and head of the department before becoming director. He joined the Tech faculty in the fall of 1963.

A native of Sterling, Kansas, Dr. Stubbs earned his bachelor's degree, master's and Ph.D. degrees from the University of Chicago. In 1960 he received an honorary doctorate from Sterling College. For many years he headed the department of chemistry at Carthage College before becoming professor of chemistry and head of the department at Tennessee Polytechnic Institute in 1944.

He is a past president of the Southwestern and Rocky Mountain Division of the American Association for the Advancement of Science, and a past chairman of the New Mexico Section of the American Chemical Society. He is also a past chairman of the East Tennessee Section.

Tax Case Due Dec. 1

AUSTIN, Tex. (AP)—A three-judge federal court had before it Friday a mass of statistics and other data which the U.S. Justice Department says proves Texas' poll tax discriminates against Negroes.

U.S. Atty. Gen. Nicholas Katzenbach's office filed a 118-page brief, plus two thick volumes of supporting data, in the government's case to wipe out the poll tax as a Texas voting requirement.

The court will hear the case Dec. 1. Both the government and the state plan to call no witnesses, relying instead on depositions and other documentary evidence.

Named as defendants are the state of Texas, Austin and Travis County officials and election judges and leaders of the Travis County Democratic and Republican parties.

The government's brief contends that the tax was deliberately imposed to deter Negro voting.

Tax collectors, the brief said, have "vast discretionary opportunities for furthering or frustrating the payment of poll taxes. They can make distinctions and grant or withhold conveniences along racial lines. This discretion in the poll tax program, coupled with an environment hostile to Negro assertiveness, served to minimize Negro political participation in Texas."

LA--City Of Smog, Lights, Impressions

EDITOR'S NOTE: The following story was written by a Toreador staff member who recently returned from a convention trip to Los Angeles. The opinions on the city, the people and the smog were made from "first impressions" over a five-day period.
By MIKE FERRELL
Managing Editor

Los Angeles—glamor city of the West—home of the stars, fabulous houses, restaurants and smog.

Los Angeles, a city of lights, of beauty, of ugliness, a city of friendly people and of unfriendly people. Los Angeles—a city.

Flying over Los Angeles at night is like walking through a field of fireflies in the spring. In every direction there are lights—all colors, all shapes, all sizes. As the airplane slowly makes its descent into Los Angeles International Airport, one suddenly becomes aware of becoming engulfed in an ocean of lights—soft lights, harsh lights, blinking lights, monotonous lights.

The beauty of Los Angeles comes from the many modern buildings, homes and parks located within the city. The new civic center located in downtown Los Angeles is one of the most fascinating complexes of auditoriums, theaters and coliseums in the world.

Although the complex is still being built, enough of the buildings have been completed to make a tourist stand with mouth open in awe at the architectural genius and beauty being built for the betterment of the culture of the people of California.

Ugliness in Los Angeles is typified by the smog which burns the eyes and nose and clings to the clothes and skin and is inhaled into the lungs for the greater part of a day. The people of Los Angeles—or so it seems—never see the sun in a clear blue sky but must gaze constantly at a dull yellow ball in a smoke-filled sky.

There are in Los Angeles, as in all cities, the friendly and the unfriendly. The friendly are very friendly and the unfriendly are very unfriendly.

Among the unfriendly in Los Angeles were many of the waiters who seem to think they are doing you a favor to wait on you, especially at the better known restaurants where the plates are gone before you finish and the scowls are enough to make you stop eating.

But then there are also the friendly waiters and waitresses, usually at the small hamburger shops, who almost make you forget the rude treatment at the other establishments. They treat you as if you are a regular customer, although they have never seen you before and probably will never see you again.

The people in general are less friendly than in Texas and a native Texan at times feels lonely for the smiles and "howdies" that he encounters on the streets of the large cities as well as the small. At the end of a trip to LA, the tourist climbs aboard the plane and climbs above the smog and looks down upon a city. Perhaps Los Angeles has a little more smoke and a few more people, but below the plane it is just another city, a city that after the first visit can lose its glamor, but cannot lose its individual ugliness and beauty.

pecially at the better known restaurants where the plates are gone before you finish and the scowls are enough to make you stop eating.

Words ... And Wisdom

"I have never met anybody who wasn't against war. Even Hitler and Mussolini were, according to themselves."
—David Low

"In the choice of a horse and a wife, a man must please himself, ignore the opinion and advice of friends."
—George John Whyte-Melville

"Human history becomes more and more a race between education and catastrophe."
—Herbert George Wells

LITTLE MAN ON CAMPUS

Heading For The Wire

THERE COULDN'T BE a more exciting finish for any novel or movie or "true adventure."

Here, in the final week of the football season for both schools, Texas Tech and the University of Arkansas are heading for one of the most colorful showdowns in the history of the Southwest Conference.

For all practical purposes—and especially for Tech fans—both teams are tied for the Conference lead, since the winner Saturday will pick up all the chips and advance to the Cotton Bowl.

And come Saturday, the eyes of Texas Tech, Lubbock and the entire Southwest will be focusing on that gridiron in Arkansas, either in person or by the marvels of live television.

We are confident of this because of the pride in the Raiders that has been displayed this year. And the number of Tech fans in Fayetteville may surprise even the Hogs at their own Homecoming.

And we are looking for a bigger surprise on the Hogs in the final score.

ONE THING THAT doesn't surprise us about this week's activities and planning though is the work being done by the Saddle Tramps.

As usual, the Tramps have come up with a bagful of projects to boost all kinds of spirit, beginning on the campus and spreading to the hills of Arkansas.

The Tramps will be kicking off their spirit campaigns today. Just watch for the guys in the red shirts and support them whenever possible.

Northeastern U Dispenses Book About Morals

Boston, Mass.—(I.P.)—Colleges and universities across the country are talking about the morals revolution on the campus, but one university is doing something about it.

Northeastern University recently announced publication of a unique book which discusses both contemporary student views and traditional social attitudes toward such controversial topics as college cheating, dating and sexual behavior, student freedoms and accompanying responsibilities, and challenges to student religious thought.

Distributed to the entering freshman class this year, the book, entitled "Stepping Stones or Stumbling Blocks: Basic Decisions in College Life," is a publication of the Russell B. Stearns Study, a nationwide center for the study of college social and ethical standards.

Emphasizing the wide-spread concern among educators about the nature and problems of today's college students, Northeastern Dean of Students Gilbert G. MacDonald stressed that the publication will be used to implement in-depth discussions of the topics included as well as other related areas.

"Students will be asked to read the book and give us their candid comments and suggestions in order that we may best determine how to approach these problems," Dean MacDonald said. "Based on these student discussions," he continued, "it is planned to revise and enlarge the book to include other topics such as the use of alcohol, vandalism, group responsibilities of fraternities to the non-college community, or such other material as may be deemed significant."

Since its inception in 1961, the Stearns Study, which is headquartered here, has been engaged in research into a number of current social problems in cooperation with several colleges and universities. Dr. Charles W. Havice, dean of Chapel and chairman of the Department of Philosophy at Northeastern serves as Chairman of the Stearns Study.

As author of the chapter, "You and Your Faith," Dr. Havice attacks the popular treatise that education is the enemy of religious belief. Other chapters: "You and University Education," "Freedom and Responsibility," "Sex and the College Student," "A Critical Look at College Cheating."

The first chapter discusses the meaning of a university education and a definition of today's Educated Man. Students are advised to expect and welcome radical changes in their individual development and the opportunity to become exposed to new ideas and new persons of diverse backgrounds.

The freedoms and responsibilities of the college student are discussed in the second chapter with special emphasis being placed on the importance of recognizing the fact that one's own sense of freedom must not impair that of another.

Chapter three is concerned with problems relative to relations between the sexes with student quotes conveying the definite impression that the "new morality" is proving unsatisfactory to many collegians.

Merry Christmas

AND
 Thanks

Men's Dorm No. 9
 TEXAS TECHNOLOGICAL COLLEGE
 LUBBOCK, TEXAS

GREETINGS FROM TEXAS TECH—The above Christmas Card, and more than 20,000 more like it, will wind up in Viet Nam for the Christmas holidays—compliments of the planning by Men's Dorm No. 9. Other campus dorms and individual groups have also joined the Christmas card plan, along with college students across the country. We applaud the work done by No. 9 and everyone else concerned with this project. They may make Christmas a little bit brighter for Americans overseas.

Retailing Field Offers Women 'Equal Rights' To SCMLA Positions

By VICKY PENNINGTON
Staff Writer

Equal rights for women is a cry that has been sounded by the female sex since time immemorial. Although women now have the right to vote and have many job opportunities, their rights in no way equal those of men.

Women may do the same job, but their pay is usually less. Retailing offers women more opportunity for advancement and higher salaries than any other profession.

One coed said the reason she chose to major in retailing is it is the most lucrative field a woman can enter.

She can also go into many areas with this major, such as store manager, department head, buyer, merchandise manager, sales promotion manager and credit manager.

Greatest Opportunities

Irma Morrison, a junior retailing major, gave the reason she chose this field;

"I feel the greatest opportunities for men and women are in the field of business. I started in education, as many girls do, but I felt the field of teaching was becoming so limited there was little need for teachers in the areas I was interested in.

"In the past, business has been a man's world with women having only secretarial jobs. But today more and more are moving up to the executive level. Retailing offers more opportunity for reaching this level than any other field open to women."

Karen Hoffman said concerning the subjects required for this major:

"They are difficult and time-consuming, but extremely interesting. It is a demanding field which can't easily be combined with a family and marriage."

Another student agreed with Miss Hoffman by describing retailing as a profession which requires dedication.

"This is the only disadvantage to such a career," she said, "because to hold a position such as a buyer, a person must often work 60 to 80 hours per week, leaving very little time for household duties."

Possible To Combine

Miss Morrison, however, disagrees.

"Retailing is a demanding field, but I feel that I can combine it with a family without neglecting either. In fact, I plan to," she said.

A background in retailing helps women become better housewives, she said.

"I will be more aware of managing, prices, economics, handling money, purchasing and saving," Miss Morrison said.

"Retailing opens your eyes to things an ordinary housewife wouldn't know. Signs in department stores become more meaningful, and one learns that statistics lie," one coed said.

Offers Versatility

"Another attractive feature," she said, "is that the professions available in this area offer a variety of duties that make any job more interesting. Some people believe a buyer merely goes to market and purchases goods for a store.

"However, there are many more duties such as coordinating fashion shows, planning displays, coordinating each theme and all merchandise with the policy of the store, making certain the store is not over or under-stocked, keeping within a certain budget, and trying to remain in an 'open-to buy' position."

All the girls agreed that men are still prejudiced against women in the business field.

"It is still difficult for men to accept the idea that women have any business sense," Miss Morrison said. "Also, men can't stand the

thought of women maintaining positions on their level."

Women Too Emotional

Another student cited a cause of prejudice.

"Men believe that women are too emotional and can't stand pressure. The business world is no world for them."

The consensus among the girls was that prejudice arose primarily from the old theory that men were the chief bread-winners and should not allow their wives to work.

Although more women fill occupations today than ever before and many work to put their husbands through school, these out-dated beliefs are still evident.

Most men allow women to work without giving them proportionate salaries for proportionate work.

The retailing field is offering women the opportunity to secure equal rights as well as an interesting vocation.

Recital Slated

Lise Elson, violinist and Thomas Mastroianni, pianist, will perform in a recital Thursday.

Program selections are "Sonata, Op. 30, No. 2," Beethoven; "Fantaisie, Op. 47," "Schoenberg; and "Sonata, Op. 108," Brahms.

The recital, sponsored by Phi Mu Alpha Sinfonia, men's national professional music fraternity, will be at 8:15 p.m. in the Tech Student Union Ballroom.

Seven professors in Texas Tech's department of foreign languages were named to positions of responsibility at the November meeting of the South Central Modern Language Association and its sister organization, the Texas Chapter of the American Association of Teachers of German.

Alfred B. Strehli, professor of Spanish, was elected executive committee member of SCMLA from the field of Spanish at the New Orleans meeting. Dr. T. Earle Hamilton, professor of Spanish, was re-elected associate editor for Spanish of the organization's "South Central Bulletin" and also will be in charge of the breakfast for the entire Spanish Section at the 1966 annual meeting to be held in Austin.

Dr. Carl Hammer, Jr., professor of German, was elected president

of the Texas Chapter of AATG which meets in conjunction with SCMLA.

T. W. Alexander, associate professor of German, was named chairman of German Section III (Literature since 1832). Dr. Harold L. Simpson, associate professor of French, was elected chairman of the French Section III (Literature after 1850), and Dr. Henry J. Maxwell, associate professor of Portuguese and Spanish, will be chairman of Portuguese-Brazilian Section. Both Dr. Simpson and Dr. Maxwell were secretaries of their respective sections the past year.

W. T. Zyla, assistant professor of Russian and German, was elected secretary of the Slavic and East European Section and was placed in charge of the Slavic breakfast for the 1966 meeting.

If you're looking for a nice comfy place to work after graduation, forget about General Electric.

We don't have any place where you can curl up and snooze away the next forty years of your career. There are no quiet little nooks in any of General Electric's 130 operating businesses in 19 countries round the world.

But if you're the wide-awake type, G.E. can provide the excitement to keep you that way. Your first assignment may be helping us find applications for a whole new family of plastics recently developed by G.E. Or you may be working at Cape Kennedy on the Apollo moon program. Or you may be working on the marketing team for a new home appliance.

One thing is certain: You'll be working. You'll have plenty of responsibility. What you won't have is a chance to doze off in the prime years of your career.

Talk to the man from G.E. when he visits campus. Come to General Electric, where the young men are important men.

Philosophy Challenges Logic Of Convictions

By JAN WELSH
Staff Writer

"You're taking philosophy? Aren't you afraid they'll make an atheist of you?"

That's a common misconception often dealt with in the field of philosophy, according to Dr. Zuholi Foruki, Tech philosophy professor.

His answer: "Philosophy never destroys faith; it only forces a person to think. Those who cannot think fear this. You are pulling out the carpet from under their traditional beliefs and they cannot find a logical answer to support them. Those who lose their faith are stupid."

There are two methods open to teaching a course in philosophy, according to Dr. Foruki. The external approach reduces it to a course in facts where students memorize philosophers and their ideas and repeat them on examinations.

Dr. Foruki follows an internal approach. The facts are available, but the student is asked to reason, to think logically and to arrive at some sort of identity.

Classes under Dr. Foruki study modern Western thinkers and attempt to analyze their logic, find the flaws, if any, in each man's

thinking and grasp the idea of logical thinking. Philosophy, more than any other course, forces a student to think for himself. He must support his traditional beliefs with sound logic. Philosophy does not attempt to outmode or tear down anyone's beliefs, but rather to question them from the angle of why the belief is valid and what are the reasons and logic behind the belief.

"If I can enlighten a few minds . . . I am satisfied," Dr. Foruki said.

In philosophy, the main purpose is to examine man's life and its meaning. Giving the student the chance to develop his own ideas on this and on other topics lets him develop a genuine self-respect. Dr. Foruki never aims to ridicule, but challenges the student's ideas and reasoning.

Dr. Foruki received his doctorate from Indiana University. He taught there and at the University of New Mexico before coming to Tech a few years ago. He was a chemist with the Chrysler Corp. before he began work toward his Ph.D.

"I was not satisfied with chemistry," he said. "In teaching, especially the kind of teaching I do, there is more satisfaction."

Faculty Members Participate In Show

Thirteen members of the Tech Applied Arts and Allied Arts faculties are participating in the annual Artists-Craftsmen show at the Lubbock Municipal Garden-Arts Center.

Sponsored by the Lubbock Art Association, the show will run until Nov. 29.

The purpose of the show is to establish a link between the artist and the art public by providing a place for the exhibition and sale of the artist's work.

Members of the Applied Arts faculty in the show are Jack Davis,

Foster Marlow, John Queen, Mickey Story, Stan Madeja, Ethel Jane Beitler, Bill Lockhart, Franz Kriwanck, and Jaclyn Harland.

Allied Arts faculty members are Hugh Gibbons, Rod Parkinson, Paul Hanna, and Lonnie Edwards. Meda Johnston, a former Tech instructor, is also in the show.

Many types of arts work are on display. Among them are sculptures from wood and metal, stone-ware articles, stitchery, jewelry collections, weaving, ceramics, and silk screen fabrics.

Social Parasites Burden Russia's Government

MOSCOW (AP)—The system for turning shirkers into workers is not working, the Soviet youth paper said Tuesday.

In fact, the whole system is backfiring, claimed the News-papers Kumsomolskaya Pravda.

Under Soviet law, anyone not holding a job without a good reason is considered an idler or a social parasite. He can be moved from a city and forced to work on a farm or in some remote area where he can be taught the virtues of the laboring life.

In practice, the paper said, this is what has been happening: Farmers and rural residents don't want the idlers any more than the cities, and complain their work is being disrupted.

"Take them away or take us away from them," one farm official

was quoted as saying. "It is impossible to work." Idlers have been sent on jobs without the skill to do them. Those sent as fur hunters for example, are not able to shoot the animals between the eyes—a must in order to save the pelts. Besides, the paper said, no one has provided the idlers with the rifles needed for the job.

So many idlers have been sent to some regions that they equal the resident population which is supposed to inspire them by good example. Instead of improving the idlers, the crime rates in these areas is rising.

In some cases the ill are sent to jobs of physical labor such as wood cutting. The paper said these people need medical help, not labor.

Phi Gamma Nu Lists Pledges

Sixteen pledges of Phi Gamma Nu, professional women's honorary, recently received pledge pins.

The honorary attempts to promote standards of high scholarship and further interest in professional and civic enterprises.

Pledge class officers are Karolyn O'Brien, president; Gail Holmes, vice-president; Marcia Mitchell, secretary; Billie Dee White, reporter.

Other pledges are Cheryl Blackstock, Billene Cannon, Kitty Chapman, Sandra Damron, Hilda Harrod, Lynda Heck, Peggy Jones, Carol Jo Le Masters, Gay Moore, Jane Morse, Mary Carol Weiser, and Ada Zilker.

15 Vacancies Left In Residence Halls

11 vacancies are scattered throughout the men's residence halls and four vacancies in the women's halls.

H. L. Burgess, co-ordinator of room reservations, said that students waiting to get a room on campus should check with the Office of Room Reservations as soon as possible. Rooms in the residence halls will be assigned on a first come, first serve basis.

Texas Tech Research

Acid Research Shows Wilt, Diabetes Similar

By KAYE RUDICIL
Staff Writer

Diabetes and the feeding of fatty acids to fungi may seem unrelated to the average person. So may diabetes and cotton wilt seem disassociated.

However, to Texas Tech bacteriological researchers, these three have a unique relationship.

The average person probably doesn't know that diabetes is one of the eight leading causes of death and is the third leading cause of blindness. Nor is he aware that cotton wilt can destroy as much as 95 per cent of a crop, especially in Asia and Africa. Losses of 10 to 15 per cent are not uncommon in the United States.

A common factor in all three is being studied by Tech researchers. The factor is a substance called ketone.

The researchers place fatty acid in a container with fungi cells. When the acid is oxidized, respiration in the fungi is inhibited and the cells function only partially, if at all. When respiration is blocked, the acid acting in the fungi produces a substance known as ketone.

In Humans, Too

Ketone is also found in the diabetic human. Research and experimentation point to the conclusion that diabetes is caused by

too much fatty acid or fatty substance in the blood stream. The liver cannot take care of the excess fat, and it produces ketone.

Research with human livers to the reaction of too much fatty substances is impractical on a large scale; not enough human livers are available for observation, and the organism might not react in the same way out of its natural surroundings. To circumvent this problem, Tech researchers employ a fungus which reacts in much the same way as liver cells.

Fungi Has Advantages

The use of fungi has two main advantages over actual liver cells. First, millions of fungi can be produced overnight in the laboratory. Second, because the fungi are in their natural habitat, they respond normally. Actual liver cells would not necessarily function naturally in artificial laboratory conditions.

The amount of fatty acid fed to the fungi directly affects the amount of ketone produced. By controlling the amounts of fatty acids fed the microorganisms, researchers can also control accurately the amount of ketone to be produced.

In human diabetes, there is a direct relationship between the amount of fat present and the amount of ketone manufactured.

The aim of Tech microbiology researchers, as explained by Dr. Harold Lewis, instructor of bacteriology and researcher, is to study and determine "the way by which fatty acids inhibit the respiration of cells and the relationship . . . to ketone production."

Once the way is known and the relationship is defined, medical men should have a clearer picture of diabetes, which afflicts seven million persons in the world today.

Diseased Cotton

Ketone is also found in the cotton plants suffering from wilt. Fungi invade the plant and are exposed to fatty acid in the form of cotton seed oil.

Ketone produces drastic changes in the conductive or transporting cells of the plant. The cell walls soon collapse and are no longer capable of transporting water to the different parts of the plant.

The cotton plant's growth is stunted: the amount and quality of the cotton is reduced, or the plant simply dies.

Again the pertinent questions are how the ketone destroys the plant cells and its relationship to the invading fungus. When these questions can be answered, cotton production might be increased.

Diabetes, cotton wilt, and the feeding of fatty acids to fungi cells are inseparably linked by ketone—a substance with strange and vexing properties. Texas Tech microbiology researchers are trying to better understand this substance.

Arkansas Tilt To Feature Cuzzo Leads Colts To 41-21 NFL Win

SWC Statistical Leaders

DALLAS—Leaders of eight of the nine Southwest Conference individual statistics categories will be featured in the Fayetteville game Saturday that will determine the league's representative in the 1966 Cotton Bowl Classic.

The Texas Tech Red Raiders that will be battling for a share of the Conference crown with Arkansas outnumbers the Razorbacks in leaders, five to three. All-America Donny Anderson leads three categories: Pass receiving, scoring and kickoff returns, and he is runner-up in ball carrying. Teammate Tom Wilson is the strongest leader of all, ranking far ahead of all rivals in passing and total offense.

While Anderson, Wilson, Jon Brittenum, Bobby Burnett and teammates are performing before television cameras, the league's best punters will be resting in preparation for their duel on Thanksgiving Day. A&M's Phil Scoggin averaged 47.1 on eight kicks against Rice and gained a little on Texas' David Conway, who leads his 44.3 to 43.5 for the season.

The Fayetteville fray matches the leagues' best ground-gaining team (Arkansas) against one of the most efficient passing teams ever developed in the Conference. Tech has averaged 200 yards per game in the air and the 17 touchdown passes by Wilson is the best achieved by any SWC team since 1938, when Davey O'Brien passed TCU to the national championship.

The directors of two diverse attacks Saturday are the men who rank one-two in total offense for the season: Wilson of the Raiders and Brittenum of the Razor-

backs. Brittenum rushed for 47 yards and passed for 119 in leading Arkansas to its 21st. straight victory.

Meantime, Burnett surpassed the 100-mark again and increased his lead in rushing. Teammate Harry Jones carried only one time against SMU, however, and lost the runner-up spot to Anderson, last year's champion.

Anderson also increased his lead in the scoring derby over Burnett, his touchdown total of 15 being

the most scored by any SWC player since Jim Swink counted 20 in 1955.

New SWC records were achieved Saturday by Ronny South of Arkansas, Bruce Alford of TCU and David Conway of Texas. South ran his conversions from placement to 36 to better the old record of 34. Alford became the first SWC player to kick four field goals in a game, while Conway ran his career total to 15, bettering the old mark of 14.

NEW YORK (AP) — Gary Cuzzo. Who else? There can be no serious argument about the Associated Press' offensive Player of the Week in the National Football League.

Stepping out of the shadows because Johnny Unitas was out of action due to a bad back, the Phi Beta Kappa from Virginia threw five touchdowns passes Sunday in Baltimore's 41-21 victory over the Minnesota Vikings.

Patient is the word for the 24-year-old dental student at the Uni-

versity of Tennessee. Passed over in the college draft after the 1962 season, Cuzzo was signed by the Colts as a free agent on the urging of Bill Elias, then the Virginia coach but now at Navy.

Don Shula, Baltimore coach, told everybody he had supreme confidence in Cuzzo's ability to do the job if anything ever happened to Unitas. But No. 1 seldom had to call for help and Cuzzo never started a regular season game until last Sunday.

Past Present

The Company's first engine, the Wasp, took to the air on May 5, 1926. Within a year the Wasp set its first world record and went on to smash existing records and set standards for both land and seaplanes for years to come, carrying airframes and pilots higher, farther, and faster than they had ever gone before.

In recent years, planes powered by Pratt & Whitney Aircraft have gone on to set new standards of performance in much the same way as the Wasp had done in the 1920's. The 727 and DC-9 are indicative of the new family of short-to-medium range jetliners which are powered by the highly successful JT8D turbofan. Examples of current military utilizations are the J58-powered Mach 3 YF-12A which recently established four world aviation records and the advanced TF30-powered F-111 variable-geometry fighter aircraft.

Your and the Future

Take a look at the above chart; then a good long look at Pratt & Whitney Aircraft—where technical careers offer exciting growth, continuing challenge, and lasting stability—where engineers and scientists are recognized as the major reason for the Company's continued success.

Engineers and scientists at Pratt & Whitney Aircraft are today exploring the ever-broadening avenues of energy conversion for every environment... all opening up new avenues of exploration in every field of aerospace, marine and industrial power application. The technical staff working on these programs, backed by Management's determination to provide the best and most advanced facilities and scientific apparatus, has already given the Company a firm foothold in the current land, sea, air and space programs so vital to our country's future. The list of achievements amassed by our technical staff is a veritable list of firsts in the development of compact power plants, dating back to the first Wasp engine which lifted the United States to a position of world leadership in aviation. These engineering and scientific achievements have enabled the Company to obtain its current position of leader-

ship in fields such as gas turbines, liquid hydrogen technology and fuel cells.

Should you join us, you'll be assigned early responsibility. You'll find the spread of Pratt & Whitney Aircraft's programs requires virtually every technical talent. You'll find opportunities for professional growth further enhanced by our Corporation-financed Graduate Education Program. Your degree can be a BS, MS or PhD in MECHANICAL • AERONAUTICAL • ELECTRICAL • CHEMICAL ENGINEERING • PHYSICS • CHEMISTRY • METALLURGY • CERAMICS • MATHEMATICS • ENGINEERING SCIENCE OR APPLIED MECHANICS.

For further information concerning a career with Pratt & Whitney Aircraft, consult your college placement officer—or write Mr. William L. Stoner, Engineering Department, Pratt & Whitney Aircraft, East Hartford, Connecticut 06108.

Red Raiders Prepare To Bring Home Bacon

Getting ready for their most important game of the current season, the Red Raiders took the practice field yesterday in what head coach J T King called "as good a Tuesday workout as we've had this year."

"I thought the offensive line did a particularly good job," King commented. "They were blocking and reacting real well."

According to King the offensive backfield also had a good day with quarterbacks Tom Wilson and John Scovell, throwing well.

Preparing for the tough Arkan-

sas offensive attack, Tech defensive linemen John Porter, Marc Bryant, James Henkel, and Mickey Merritt were impressive in yesterday's workout.

It was Porter who came up with the big fumble recovery that marked the turning point of last week's game with Baylor, while Henkel and Merritt drew praise from Baylor coach John Bridgers for their outstanding play.

"Number one this week," King said, "We're worried about getting things perfected and avoiding any more injuries."

A MISSILE MARKED "SCORE"—All-American Donny Anderson flies through the Baylor line like he was shot from a gun. The result? Six more points for the Raiders. The Heisman trophy candidate rushed for 82 yards and caught five passes for

83 more Saturday as Tech mauled the Bears 34-22. He will take leads in three SWC statistical departments into the Cotton Bowl showdown with Arkansas this weekend.

Royal Praises Jones, Eyes Upcoming Talent

When Darrell Royal was told recently that Harry Jones of Arkansas had been injured in a game and taken to a hospital for X-rays, the Texas coach lamented: "That's too bad. He's a fine football player."

Jim (Star-Telegram) Trinkle reports that Dutch Meyer, "who has recollections of the state's finest schoolboy prospects, calls Bill Bradley (the Texas freshman quarterback) the best triple-threatener of all." That's quite a compliment from a gentleman who has observed the state's best for more than a half century.

TAME IT'S NOT

This is Jaguar for men. After-shave and cologne combined. Women like it. Because it doesn't smell like the stuff they wear. Men like it. Because it comes on stronger. Stays on longer. Jaguar is lusty. Powerful. Potent. It's bottled in a stark, strong, smoky-glass cylinder. It's only for the man who gets a bang out of living, a charge out of leading—who plays to win, whatever the game. After-shave/cologne, \$3.50. Soap on a rope, \$2.50. Gift soap, box of 3, \$3.00. **Jaguar from Yardley.**

Meet The Red Raider Hogcallers

COTTON BOWL BOUND?—These three Tech stalwarts will be playing their last regular season game as Red Raiders Saturday when they meet the Arkansas Razorbacks in a showdown duel for a berth in the Cotton Bowl and the SWC co-championship. At left is co-captain John Porter, who shuttled from a starting offensive tackle position to defensive tackle and has been a tremendous leader throughout the

season. Center, is co-captain Chester Howard, who's done a bit of shuffling himself. He started the year at guard then moved out one position to tackle. At right is Kenneth Gill, whose season was ended prematurely when he suffered a leg injury against Rice. In addition to starting at a linebacker spot, Gill was also the Raiders' highly accurate field goal kicker. (Staff Photo)

AP Names Juday Week's Top Back

NEW YORK (AP)—Steve Juday, the Michigan State quarterback with the big passing punch, was named Back of the Week by the Associated Press Wednesday while the Spartans continued preparations for Saturday's important football game against Notre Dame.

Juday, who remembers last year's game with the Irish because of the physical beating he took, probably will remember last week's game against Indiana longer.

With the Big Ten title, a trip to the Rose Bowl, an undefeated record and the No. 1 spot among the nation's major college football teams hanging in the balance, the 172-pound Juday brought the Spartans from behind in the fourth quarter for a 27-13 victory.

Juday hit Gene Washington with

a 27-yard touchdown pass in the second period, building Michigan State's lead to 10-0, but Indiana battled back and went into the fourth quarter with a 13-10 lead. Then Juday took over again.

He arched a 43-yard scoring pass to Washington that put Michigan State ahead, engineered another drive that resulted in Dick Kenney's 27-yard field goal and finished off his day's efforts with a four-yard touchdown flip to Washington.

Juday's selection as Back of the Week came while he is looking forward to the chance to settle the score with fourth-ranked Notre Dame over last year's 34-7 loss. Juday still remembers the beating he absorbed.

"When I got to the locker room after that game, I hurt all over," he said.
