

AND ANOTHER AGGIE BITES THE DIRT — An unidentified Texas A&M player slides head first into third base Saturday in the second game of a doubleheader, as Raider third sacker Johnny Owens

waits for the relay. The Aggies swept both games from the Techsans 3-0 and 6-4 before 800 home fans. (Staff photo by Mike Davis.)

Aggies trim hapless Raiders twice in doubleheader 3-0, 6-4

Tech had trouble coordinating its pitching and hitting Saturday as the Raiders became the fourth Southwest Conference team to fall before Texas A&M without gaining a victory.

The Aggies ran their season record to 20-4 and their conference ledger to 11-0 as they downed the Techsans in a doubleheader 3-0 and 6-4 on the Tech diamond.

The A&M series was to have been a three game affair but rain forced the cancellation of one of the contests Friday and caused the delay in the start of the two games Saturday.

IN THE OPENER, as has been the case many times this year, it was pitching that led to the Red Raider downfall as A&M hurler Doug Rau celebrated his 21st birthday by throwing a two-hitter at Tech.

Sophomore Jack Pierce, who started on the mound for the Big Red in the first game,

and Ruben Garcia, who relieved Pierce in the sixth inning, combined to toss a five-hitter at the potent Aggie bats.

It was no avail though as no Tech runner ever made it to second base off the hard throwing Rau.

A&M's scoring came fast as all their runs were acquired in the first three innings.

Aggie second baseman Butch Ghutzman led off the game by reaching first on an infield error; traveled to third on a double to left by outfielder Dave Elmendorf; and scored on a sacrifice fly by catching Billy Hodge.

In the third inning Rau aided his own cause as he lined a single to centerfield to start off the inning. Ghutzman followed with a double putting runners on second and third with no one out.

R. J. Englert hit a sacrifice fly and

Elmendorf powered a single to left and the Aggies had all the runs they needed.

A&M threatened again in the fifth but Raider catcher Max Martin twice rifled throws to second to pick off runners attempting to steal.

TECH THIRD SACKER Johnny Owens, who drilled a single to center in the second inning, and centerfielder Randy Walker, who beat out a bunt in the third stanza, were the only Techsans to reach base.

In the second encounter it was the pitching that failed to materialize for the Raiders as the batting finally broke loose for nine hits.

Again A&M struck fast as they pushed across three of their runs in the first two innings, with two of the scores being unearned.

What should have been an easy inning for Tech starter Gary Washington turned into a two-run lead for the Aggies in the first. Washington, on two grounders back to the box, made wild throws to first which allowed two players to advance to second and third. A sacrifice and two hits later put the Techsans down 2-0.

The Raiders tied it up in their half of the first on a single by second sacker John McGuire, a triple by Cecil Norris and a single by Owens. Tech did not score again until the bottom of the ninth.

A&M SCORED another run in the second and then broke loose for three more in the seventh to ice away the contest.

Righthander Bob Guerin relieved

Student Association wants retail discount

Tech's Student Association is working on a proposal to establish a program of student discounts among Lubbock's business and entertainment establishments.

Sam Stennis, Student Association business manager, said, "the purpose of this program will be to save student's money by a student discount."

Stennis pointed out that over forty campuses in the United States (approximately 175,000 students) are using such a system.

The Student Association is currently

seeking students interested in the proposed program to participate in direct sales campaign to enlist local merchants. The campaign "will be done by a personal confrontation sales approach to merchants..." Stennis said.

"THE BUSINESS WILL set the discount that will be offered to Tech students upon presentation of their ID. In return for this discount, the business will receive free publicity and larger profit from increase of volume of sales," Stennis said.

Students should also benefit from the selling campaign, according to Stennis, both from the experience involved and from the contacts they make in the Lubbock business community.

Students interested in working on the program should contact Stennis at the Student Association office in the Union today through Wednesday.

Officers get certificates from Texas

In a ceremony Friday in the Tech Security Office, Assistant Vice President of Administrative Services Fred Wehmeyer presented 16 Tech Security officers with certificates acknowledging them as "peace officers."

Security Chief Bill Daniels, one of the recipients, said a bill passed last spring by the state legislature requires that after Sept. 1, 1970, all law enforcement officers must have received the certificate within a year of being hired.

DANIELS ALSO said that "There are approximately 32 officers here and before Sept. 1, 1970 we plan for everyone to have received his certificate."

To receive the certificate, 140 hours of classroom work and actual practice is required. In receiving the certificates, Daniels said that the Tech officers worked at "Texas A&M, the Texas Department of Public Safety, the Lubbock Police Department, and with the FBI."

BESIDES DANIELS, those receiving certificates were Capt. S. O. Boyd, Sgt. W. E. Salars, Sgt. Curtis Leatherwood, Sgt. J. D. Fortner, Sgt. J. T. Bogard, Sgt. R. E. Pollard and Sgt. R. T. Hamilton.

Also, patrolman N. L. Barr, patrolman V. D. Caldwell, patrolman B. G. Fuller, detective J. L. Holzapfel, patrolman L. R. Laberge, Jr., patrolman P. R. Wilbanks and patrolman J. M. Wright.

Phi Kappa Phi slates annual initiation banquet

Approximately 260 Tech students will become members of Phi Kappa Phi, national honorary society, at the annual initiation banquet at 6:30 p.m. Friday in the Union.

The principal speaker will be Dr. L. S. (Bill) Pope, associate dean of agriculture for administrative affairs at Texas A&M University.

Phi Kappa Phi is a national inter-disciplinary honorary fraternity with only two students from all the colleges and schools at Tech selected for membership in the Tech chapter.

Prof. John Baumgardner of the Department of Animal Sciences is president of the Tech chapter, with Dr. Mina Lamb of Foods and Nutrition, president-elect; Prof. Chester Jaynes of the Agronomy Department, treasurer; and Dr. William R. Johnson of the History Department, secretary.

BAUMGARDNER will preside at the banquet meeting and initiation ceremonies.

Two Tech faculty members recently elected into membership into Phi Kappa Phi, Drs. Charles Wade of the College of Business Administration and Don Longworth of Home Economics will be

honored at a coffee from 9 to 10:30 a.m. Tuesday, Baumgardner said.

Pope was named head of the Animal Science Department at Oklahoma State University in 1963, remaining there until joining the Texas A&M faculty in 1968 as associate dean of agriculture for administrative affairs. At Texas A&M one of his primary responsibilities has been to develop and coordinate the functions of the university with agricultural industries.

HE IS A MEMBER of the American Society of Animal Science and Sigma Xi, an honorary scientific research society. In 1968 was elected secretary of the Southern Section of the American Society of Animal Science.

In 1960 Pope spent six weeks in Argentina government in expanding its animal nutrition work, principally in the northern part of the country and was advisor to the Oklahoma State University Ethiopian contract in 1965.

He received his bachelor's degree in animal husbandry from Michigan State in 1947, his master's in animal nutrition from OSU in 1949, and his doctorate from the same institution in animal nutrition in 1952. Dr. Pope also is a member of Phi Kappa Phi.

Greek question bared in recent discussions

By TOM DOWNS
Staff Writer

According to one side of the story, fraternities and sororities are racist, conservative organizations based on elitism and snobbery. On the other side, Greeks argue that the system has no racial barriers any more and is basically progressive.

These issues were raised recently when Greeks and independents met head on in a panel discussion sponsored by the Interfraternity Council (IFC) as part of Greek Week. Although the discussion brought the issues into the open they have been prevalent in less formal discussions around campus for some time.

Is the system really as bad as critics say it is? Or is it as good as the Greeks claim it is? The real Greek system is somewhere

between these two public images.

IN THE PANEL discussion April 6, John Fletcher, Catalyst editor, said Greeks were conservative. He backed his statement up by saying civil rights legislation forbidding segregation has existed since 1954, yet fraternities and sororities took until 1964 to do away with theirs.

Robert Willis, Delta Tau Delta, stood up in the audience to refute Fletcher's claim during a question and answer period. Willis said most fraternity men are liberals. Fletcher was skeptical of this and said a show of hands would prove the audience (which was almost all Greek) to be mostly conservative. There was no show of hands to prove either statement.

In an interview with a University Daily reporter, Brian Harrington, a Greek and Arts and Science senator, said "Membership in a fraternity or sorority doesn't carry a set of political beliefs with it. The alumni membership of my own fraternity includes Barry Goldwater and William Fullbright, men from opposite ends of the political spectrum."

IN THEIR OWN internal organization it would be difficult to make any kind of judgement about Greeks because they are, by their own definition, secret societies. The only aspect of their organization that a non-Greek would hear about are rush rules and requirements for membership.

At Tech both IFC and Panhellenic rush rules have been changed in their mechanical aspects. This means that many of the restrictions placed on rush have been eliminated or revised. IFC rush is now open rush lasting from the beginning of the semester until six weeks before finals begin, rather than three weeks at the beginning of each semester.

Grade point requirements and minimum hour requirements have been abolished as a prerequisite to pledging. Panhellenic rush has been modified slightly, with emphasis

being placed more on rushing for the sorority system as a whole rather than separate organizations.

But the basic appeal of rush is still the same according to Dr. William H. Duval, advisor to fraternities. "The appeal is still mainly social," he said.

ALTHOUGH NO fraternities or sororities at Tech have any legal barriers against pledging blacks or other members of minority groups, the black ball system is still in effect.

This means that from one to five negative votes may prevent a person from pledging a Greek organization. Some organizations even allow alumnae members to black ball rushees.

Fletcher suggested that fraternities do away with the black ball system and set up minimum requirements for membership instead. "For instance our minimum requirement for the Catalyst is that be able to type," he said.

One sorority member, said "The black ball system is also responsible for the claim that the Greek system is based on snobbery. While it's true that almost all Greek organizations consider what a person looks like and what they dress like when they vote on new pledges, there's been a tendency lately to look at different factors."

"This is mainly due to the fact that some of the most impressive looking people during rush sometimes turn out to be the least impressive pledges. The phrase 'she's a hard worker' used to be a subtle insult for a sorority girl. It implied that she didn't have the looks to get a bid any other way. I think that ability and desire to work will probably be considered more and more by all Greeks," she said.

FLETCHER GENERATED a great deal of animosity that night. He was admittedly anti-Greek and represented what he called the "negative end of the stage."

"You've (referring to the audience and the Greeks on the panel) said that I've offered no positive criticism tonight. Well, if I had been asked to participate in a panel discussion for the Ku Klux Klan I would find it difficult to make any positive suggestions either," he said.

The hostility to Fletcher's remarks was evident when one Greek said, in the question and answer period, "I think you've brought the Greek system closer together tonight, because I don't think there's one Greek in this whole audience tonight that isn't just real mad at you." Applause followed his statement.

WHILE MANY GREEKS may have been angry with Fletcher's comments one member of the audience said after the program, "He brought out one of our basic problems, public relations. We can work all Saturday morning and afternoon on a service project, but if one of the brothers gets arrested for drunken driving that night every thing good we've done is forgotten."

"Many people think only about pass-out parties and Hell Week when they think about fraternities. They don't realize that it just isn't like that at all," he said.

Small organized group discussions at various lodges made up the April 7 Greek Week program. The topics covered almost all phases of Greek life including relations with independents.

One group covered the area of the negative and positive aspects of competition among Greeks. Both sides of the issue were argued, but the majority of the delegates were against cut-throat competition in sports and politics.

The next day, Wednesday, was the last day of cheerleader campaigns. Fraternity and sorority members were seen all over campus campaigning for their Greek brothers and sisters. Among them were many of the delegates to the discussion group who had argued against excessive competition.

THE GREEKS INTERVIEWED and those that participated in the discussion groups all seemed to be aware of one main problem confronting the system: the difference between what Greeks are really like and what most people think they are like.

One of the methods suggested to help eliminate this problem is an all-Greek newspaper, sponsored and written by fraternities and sororities, to give non-Greeks a better idea of what goes on in the Greek community. The newspaper was suggested in a discussion group about relations between Greeks and independents.

An all-Greek newspaper could serve as a possible solution to the problem of communication between Greeks and non-Greeks. It could present a more accurate, if not more favorable, picture of the Greek system to the entire student body.

Washington in the seventh and allowed only one hit in the two innings he pitched.

Owens collected his third single of the day in the last half of the ninth and first baseman Dick Shaw kept Tech hopes alive as he duplicated Owens' shot to center field.

One out later pinch hitter Steve Hurt hit a grounder to third to force Owens out but the relay to first was wild and Shaw and Hurt moved up to second and third base.

GILBERT VASQUEZ, who pitched the last inning for Tech, batted for himself and made Tech Coach Kal Segrist look like a genius as the lefthander hit a two-run single to center to make the score 6-4.

Organization honors members of faculty

Mortar Board, national senior women's honorary, is sponsoring Faculty Recognition Week beginning today through Friday.

Five outstanding faculty members will be recognized. These five were selected on the basis of service to Tech, the excellence of their teaching and dedication to the students of this university.

A book will be donated to the library in honor of each of the five faculty members.

Dr. Nancy S. Boze
Assistant professor
of Secondary education

Dr. Nancy S. Boze, selected as the outstanding faculty member for Monday by Mortar Board, holds a bachelor and masters degree from East Texas State University and her Doctor of Education degree from Tech.

She has 18 years teach experience, 10 of those at Tech.

Dr. Boze has taught at junior high, high school, junior college and university levels. She has also worked as a consultant in curriculum planning, English and reading.

Dr. Boze was a Delta Kappa Gamma scholarship recipient and has been an officer in the professional organization. She was selected as Tech Faculty Woman of the Year and is a member of Phi Kappa Phi.

Dr. Boze's husband, Dr. Floyd Boze, is dean of admissions at Tech. Their son is a freshman business major at Tech and their daughter Virginia Ann is a sophomore at Monterey High School.

Students in Dr. Boze's classes say her office hours are not confined to the campus. She is available and is never too busy to help her students and follows them long after graduation. A recommendation from Dr. Boze is more than a recommendation — it is a challenge, say her students.

ROTC picks queen of ball

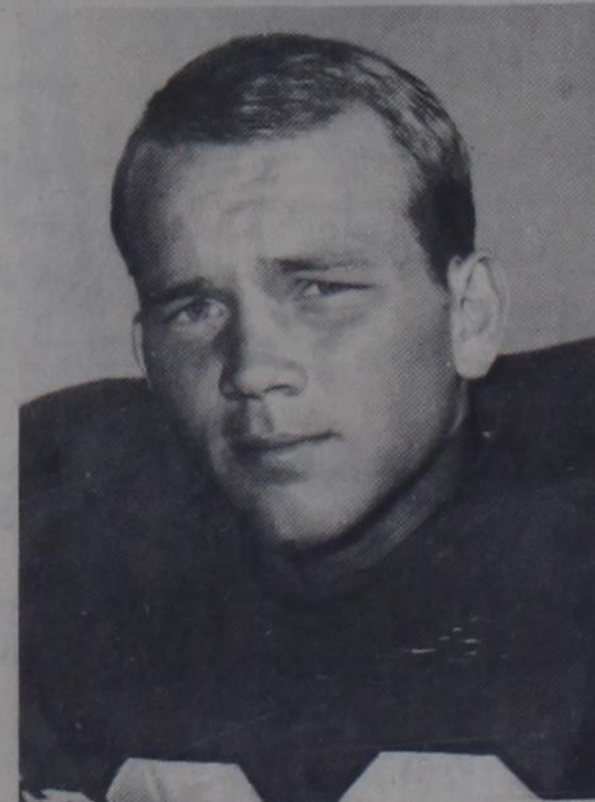

Cathy Anderson, a senior elementary education major from Breckenridge, Tex., was crowned Queen of the 1970 Air Force ROTC Military Ball Saturday night at the Koko Palace.

After the announcement, Miss Anderson was presented with a bouquet of roses by Col. Haynes M. Baumgardner, professor of Aerospace Studies.

Furr misses meeting due to operation

Roy Furr, member of Tech's Board of Regents, missed the April 11 meeting of the Board because he was recovering in a local hospital from surgery.

Furr underwent "potentially dangerous surgery" April 8 to remove a growth from his throat. The growth was determined to be benign. Furr left the hospital last Monday.

KEN KATTNER

Editorial Public too opinionated

Sometimes it seems impossible that society could have advanced as far as it has.

This newspaper incessantly receives tips and notices about some hot news item. In trying to track the matter down, The University Daily constantly gets diametrically opposed accounts.

For instance, there are those who indignantly say that "Dub" Rogers has planned his write-in campaign for mayor ever since that day he first removed himself as a possible candidate from the race.

By the same token, there are those who are equally adamant in their view that Rogers definitely does not desire to run for re-election. If the latter were true, it would seem logical that Rogers would personally and publicly refuse re-election. At present, however, we can only surmise that Rogers would be quite happy to accept a "draft" and that he is at least encouraging his supporters to get him a "genuine draft."

Another incident concerned alleged discourtesy by Student Association Vice-President Larry Meyers when he did not properly handle the program for University Speaker Series guest Willie Morris. To the general public, it may have appeared that Meyers was negligent in not being present at the conclusion of the speech, to end the program.

Having checked into the matter, The University Daily soon learned that Meyers had been contacted at the last minute to introduce Morris and that another person — probably Reed Quilliam — was supposed to have arranged for suitable closing of the program. Obviously, an error was made and Tech did not give Morris the organization he deserved for a smooth program, but at least the fault probably did not belong to Meyers.

The point in bringing up these two simple examples is that too often people are willing to form their opinions without properly questioning the situation. The examples indicate that one should even question what he sees, to determine whether he really has all the facts.

Unfortunately, however, we as humans, continue to live in our own little worlds. We see what we want to see and we read what we want to read. Will we ever rise above such mediocrity and make honest attempts to evaluate tangible and intangible phenomena on anything more than a basis of personal prejudice?

Burket's Comment:

Cops shoot bull

I was down in the pawnshop district taking some pictures of drunks and transients last Friday when one of Lubbock's protectors sauntered over and asked me what I was doing with that camera.

"Taking pictures," I said, complimenting myself on my quick thinking.

The cop, obviously the master of the art of ingenious comebacks, yawned and said "Oh, yea" as he popped a nut in his mouth. "Pictures of anything in particular?"

"Poverty," I replied.

Just then another officer strolled up. The first one, who introduced himself to me as

Smithe (changed name), greeted the newcomer with an old standard. "Working hard?" "Nope. Hardly workin'!" the other quipped. "What are you doing?"

"Nothing! I'm a cop!" Smithe said. I knew right then that I was in the presence of genuises, so I snapped their picture as they did their best to look nonchalant.

Smithe offered to show me some real poverty if I just hung around with him, but I had used up all my film and couldn't find a drugstore in the area that stocked the right type, so I had to decline.

They were apparently more disappointed about it than I was, but they invited me back (nice of

them, considering how hard the police force in general works to be obnoxious to students.) Since I couldn't take any pictures they offered a verbal explanation of poverty for my willing ears.

"Ya know what the cause of all this here poverty is, don't ya?" Smithe asked. "Well, I'll tell ya, it's them Spanish getting the welfare check and spending it on whores."

"Yea, the old man takes it and spends it before Ma and all them little kids ever sees it. They take it down there to ***** (whore house which shall remain anonymous) and give it to them girls," he expounded.

The other cop got his two cents' worth in. "Yea, or else they take the check out to the Line (meaning Strip) and buy booze. Then they go down to the welfare office and say "Give me more money to buy milk for my kids. Where is that Coors Dairy anyway?"

Well, I could see that I wasn't getting to the real root of the problem, so I excused myself and went back to talking to poor people. They may not be the philosophers that Smithe and friend are, but at least maybe they understand the problem better, and until everybody, including Lubbock cops, figures that out there can be no solution.

In comparative literature

Study program to begin

A new interdisciplinary graduate study program in comparative literature will begin next year.

The program is designed to provide opportunities for qualified students to engage in extended study of two or more national literatures and their various interrelationships.

Graduate study in the field will draw on the resources of the departments of English, Classical and Romance languages and Germanic and Slavonic languages.

AT THE MASTER'S level, the program is administered by the Interdepartmental Committee on Comparative Literature, which is composed of faculty members from the three departments.

The degrees offered are the M.A. in English and a program in comparative literature, and an M.A. in French, German or Spanish, with a similar program. Credit is offered on a reciprocal basis for courses taken in these departments.

The Ph.D. is included in the program for the department of English with a major in English and a field of specialization in comparative literature. The Department of Classical and Romance language offers a major in Spanish with a like specialization for a Ph.D.

CANDIDATES for admission to graduate programs in the field should have completed one year of university-level study (or the equivalent) in a classical language and/or two years of study in a modern foreign language in addition to having met the general requirements of the graduate school.

At the master's level, candidates complete 24 hours of course work in the cooperating departments, the greater part of which, including the thesis, will be in the field of comparative literature. A six-hour minor is also required.

AT THE DOCTOR'S level, the program includes approximately two years of course work beyond the master's degree. This program is supervised by a doctoral advisory committee appointed for that purpose.

Students in the program on the graduate level may apply for teaching assistantships carrying a stipend of \$2,600 annually for teaching six hours in English,

Spanish, German or French. The salary increases from \$2,800 to \$3,400 for doctorate candidates in English and Spanish only.

The courses in comparative literature include the following: CL 530. Studies in Medieval Literature. (English 530) CL 533. Comparative literature. (English 531, 532) CL 534. Old English. (English 534)

CL 536. Beowulf. (English 536) CL 532. Studies in Drama. (English 5312) CL 5313. Studies in Modern European Literature. (English 5313)

CL 5314, 5315. Studies in French Language and Literature I, II. (French 5312, 5313) CL 5316, 5317. Studies in German Language and Literature I, II. (German 5312, 5313) CL 5318, 5319. Studies in Spanish and Spanish American Literature. (Spanish 5312, 5313) CL 5325. The German Novelle. (German 5317)

CL 5326, 5327. Seminar in Modern German Literature I, II. (German 5321, 5322) CL 5333. Studies in Literary Criticism. (English 5314)

CL 5341. Studies in Bibliography. (English 5341) CL 731, 732. Research. (English

731, 732) CL 831. Doctor's Dissertation. Enrollment required at least four times. (English 831, Spanish 831)

Students may take with adviser's permission, courses numbered 531, 532, 630, 631, and others in English, French, German, Greek, Italian, Latin, Portuguese, Russian and Spanish, to be applied toward the comparative literature programs.

Faculty and specializations in comparative literature include the following:

Theodor Alexander, contemporary German drama; Dr. Norwood Andrews, 18th century Spanish and Brazilian; Dr. John Bodoh, classics; Peter Bubreska, contemporary French literature and Yugoslav literature; Dr. Peder Christiansen, classics;

Dr. Alfred Cismaru, 18th century French; Dr. Robert G. Collmer, Anglo-Dutch and Anglo-Hispanic Literature; Dr. James Culp, medieval and renaissance drama; Dr. Floyd Eddleman, epic, drama and novel; Dr. Margarete Freitas, 20th century German literature;

Dr. William Gillis, Anglo-Teutonic, Old English and Middle English; Dr. T. Earle Hamilton, Golden Age of Spanish literature; Dr. Carl Hammer, classical and

19th century German; Dr. Patricia Mary Hopkins, contemporary French; Dr. Henry Maxwell, modern Spanish and Portuguese;

Dr. Joseph Mogan, medieval English; Dr. Harley D. Oberhelman, modern and contemporary Spanish American; Dr. Scotti Mae Tucker, 18th century and contemporary Spanish; and Dr. W. T. Zyla, Russian and Ukrainian literature of the second half of the 19th century.

Inquiries about the master's program in comparative literature should be addressed to the Chairman of the Interdepartmental Committee on Comparative Literature.

Those interested in the doctoral program should address the Chairman of English or the Chairman of Classical and Romance languages.

Tells secret

You want to know a SECRET? In case you haven't access to the grapevine which I rely heavily upon—thought you should be informed of a "SPONTANEOUS" write-in campaign for a certain city official who has vowed he wants no more public service.

The well-funded, well-oiled machine planning this "last-minute persuasion" is said to be headed up by a well-known news media official. Lucky Lubbock!

Lillian C. Rountree
4503 W. 18th

If you think you're getting a great shave with a razor blade, feel your face.

Feel your chin
A razor blade can give you a good, close shave on the easy parts of your face.

Like your cheeks. Because your cheeks are almost flat, like a razor blade.

But what about the hard-to-shave parts of your face?

Feel your neck

Feel how your beard grows down on part of your neck? And up on another part? (Some beards even grow sideways.)

To give you a close, comfortable shave on your neck, we designed the Norelco Tripleheader with 18 self-sharpening rotary blades that shave in every direction.

Feel your chin
The Norelco Tripleheader has 3 Microgroove™ shaving heads that float to follow the curves of your chin.

The heads go in where your chin goes in, and out where your chin goes out. To give you a really close shave, without irritating your skin.

(In independent tests, the Tripleheader shaved as close or closer than a stainless steel blade in 2 out of 3 shaves.)

Feel your upper lip

The hard thing about shaving your upper lip with a razor blade is shaving close enough.

Again, the unique Norelco design lets you maneuver around your nose and mouth, to shave your beard in every direction.

Feel your sideburns
The biggest problem with shaving sideburns is to get them straight, and even on both sides.

The Norelco Tripleheader has a pop-up trimmer that lets you see exactly what you're trimming. So it's a lot harder to make a mistake.

Now, run your hand over your whole face.

If your beard feels uneven, maybe you should be shaving with a Norelco Tripleheader.

It comes in two models. The Cord Model Tripleheader (with easy flip-top cleaning). And the new Rechargeable Tripleheader (the shaver that gives you up to twice as many shaves per charge as any other rechargeable). Either one will give your face a whole new feel.

Norelco
you can't get any closer

The Techsan

Comment by Steve Eames

Talking to a wife of one of our staff members, I came up with an interesting detail that might be of interest to the male UD readers. She tells me when a girl "makes out", her hair will do one of three things: go straight, kink or fuzz. If her hair is hers only on a contractual basis, it may tend to fall off.

So friends, next time you watch everyone bringing in their dates, watch the other guy's girl's hair. It could tell you who to date next.

And don't doubt the reliability of the source of this information. She relieved her husband of his freedom without his knowledge.

She and her family swear the two are married, but the husband just can't remember. In fact, he can't remember the reception. His father can. He had to carry the husband in.

That's one way to conquer the approach-avoidance conflict psychologists say is prevalent to an approaching marriage.

The husband does remember part of the ceremony. For example he remembers saying, "I do thee endure..."

The wife was laughing too hard to repeat her part of the ceremony.

The preacher declared them man and wife. However, their marriage license burned in a fire in their home six weeks after the ceremony.

Asked if the ceremony was legal, the wife replied, "Even if it's not legal, it's a lot of fun."

Last Wednesday, an editorial appeared in the UD under a headline of "Viewed as a joke." In it, the writer, Tech student Robin Cash, said women must earn their equal rights.

The self-proclaimed feminist said in one portion of that letter the feminist should accept responsibility from trivialities as opening doors to fighting in the war or working to end it.

As a public service to Miss Cash and other feminists who agree with her, I called the Army recruiter to check on her opportunities.

For Joy! For Joy! You lucky girls can spend three years at a minimum in the Army instead of the two enjoyed by males. Just think of that!

And talk of equality. You're enlistment will have the same ground rules as any male serving in the Army. (There is an exception — if you are under 21 you can't serve overseas without parental consent.)

In addition, you have what the recruiter calls, "preference of assignment." He explained this saying a woman could pretty well locate herself anywhere in the United States she pleases.

I don't view the feminist movement as a joke, rather more as a silly, unimportant movement in a world of important happenings. More good "letter to the editor" material. Right, Miss Cash?

I certainly hope all you feminists who are off to fight the war will enjoy your enlistment. And think what you'll be proving.

Peace Corps wants agriculture students

A Peace Corp Information Week is beginning today and three members of the corp are on campus to meet with students.

Dr. P.K. Nambiar from India, Fred Weller and Charles Traver will be stationed in the Ag

Intern program

Additional applications for the George Bush intern program are now available at the campus placement office.

Bush, candidate for the U. S. Senate, announced recently that he was sponsoring a summer internship for six weeks beginning July 6. Thirty Texas university and college students will be selected.

The internship will take place in Houston at the state campaign headquarters.

Applications may also be obtained by writing Eloise Brackenridge, "Bush for U.S. Senate," Box 1970, Houston, Texas 77001.

Engineering Building and the Ag Building through Friday to talk with interested students about the Peace Corp as well as meeting with classes.

"We were on campus last semester and the response was very good," Nambiar said. "We are especially interested in students who are agriculturally oriented such as in ag education or range management or ag engineering."

Nambiar emphasized that people in other areas were also needed. "Seventy percent of our workers are from areas such as accounting and business."

A special program allowing families to join the corp is presently being tried on an experimental basis. Presently 200 families are involved in the program. "Some of them have up to four children," Nambiar said.

"We will talk to classes and individual. We also have several films which are available to show for anyone interested."

Local orchestra presents program

The Lubbock Symphony Orchestra will present the annual Pop Night program, last in its 69-70 season, next Monday at 8:15 p.m. in Municipal Auditorium, under the direction of William A. Harrod.

Guest Soloists will all be from Tech, and include, Richard Campbell, John Handy, Kathy Kilgore Horsman, Jerre and Jo Ann Joiner and Susan Ledbetter.

Music will include selections from "Paint Your Wagon," "Oliver" and "Mame," as well as a medley of Burt Bacharach tunes.

The traditional high school youth chorus will be directed by Rex Webster and Ron Williams.

Tickets are now on sale for the program at the Symphony Office, 1416 Ave. Q., from 9 a.m.-5 p.m. daily, except for the noon hour.

The Auditorium box office opens Sunday, 1-5 p.m. and next Monday from 9 a.m. until curtain time.

Ticket reservations may be made by calling the Symphony Office, 762-4707, or by writing to the office at the above address. Prices are \$5, \$3.50, \$2 and \$1.

Raider Roundup

ALPHA PHI OMEGA
Alpha Phi Omega is sponsoring a road rally and car show April 25. The car show begins at 11 p.m. and rally registration begins at noon on the Coliseum parking lot. Entry fee is \$2.50 per car.

Two new Chevelles at two new lower prices.

Chevelle 4-Door Sedan
\$148* less
than our previous lowest priced 4-door.

Chevelle Sport Coupe
\$147* less
than our previous lowest priced hardtop.
Now it's America's lowest priced mid-size hardtop.

We took America's best selling mid-size car. Then, added two new lower priced models, including a Sport Coupe that's priced less than any other mid-size hardtop you can buy. Still, they both have Chevelle's smart new grille for 1970. And Chevelle's newly styled Body by Fisher. And Chevelle's Full Coil suspension with custom fitted springs at each wheel. And Chevelle's wide-stance chassis design, side-guard beams in the doors, cargo-guard luggage compartment, bias belted ply tires. Lower priced they are, by as much as \$148. But lower priced looking and feeling they aren't. Which will get us no love notes from the competition. But maybe it will from you. **Putting you first, keeps us first.**

CHEVROLET
*Based on manufacturer's suggested retail prices, including federal excise tax and suggested dealer new car preparation charges.

You own the sun

P.S./For a totally different sun experience try new Coppertone Tanning Butter (cocoa butter and coconut oil). Wild!

Sports Comments by Tommy Love

This column is about Tech's greatest rival in sports. No, it's not about the University of Texas, the Aggies or Arkansas; believe it or not it's about the weather.

The weather has caused more havoc with Raider athletic teams than a rival school could ever do. To start off this year the Big Red grid team nearly had to spend as much time practicing in the Men's Gym and at Mackenzie Park, to try to avoid the water and cold, as they did on the regular practice field.

Athletic Director J.T. King, then head football coach, said that his team never got into good physical shape during the fall workouts before the season started because the cold, damp weather shortened the time they could practice. Thus later on in the season, when most squads had light contact

drills and went on, King had to work his team harder just to keep from losing more ground.

From August 5 to October 29, right after the SMU game, over 28 inches of rain fell in Lubbock. From Sept. 1 to the end of October the Raiders were forced to seek higher or dryer ground 12 times.

During the season King said that wet weather practice facilities were a must if the Raiders were to have winning ball clubs in the future.

King cited examples such as Texas and Arkansas that have provisions for wet weather workouts such as AstroTurf and indoor facilities.

No one can say Tech would have won more ball games this past season if the weather had been good all the time but it is a credit to the squad that they won as many as they did under the weather conditions.

With the acquisition of AstroTurf for the upcoming grid year, all of football's problems with the weather have been solved except for the cold. All the

varsity football workouts will be held in Jones Stadium, where the synthetic grass is presently being laid.

Baseball, track, golf and tennis have also had major difficulties in getting in enough time practicing between the wet spells that have drenched the campus this semester.

The lousy weather conditions have undoubtedly been the major factor in the Raiders poor showing at the bat so far this year in baseball.

Kal Segrist, head baseball coach, said "We didn't have two days in a row in March where we could effectively practice without being hampered by the snow, rain or cold winds. You just can't get your batting eye when it's impossible to swing the bat two days in a row."

At the time of this writing the Raiders, who lost only two of their starting players off last year's third place conference

team, had an anemic .216 team batting average.

Tennis players have been forced into the Men's Gym on some occasions due to the wet courts but sometimes the gym is already in use and workouts have to be called off.

Golf and track members are in a fix when the weather causes trouble, which is frequent.

It is impossible to practice long drives to the fairway or chip shots to the green unless you have special facilities, which Tech doesn't have. The same holds true for track. Except for some running events it is impossible to get ready for a meet unless you can work outdoors.

Basketball is the only sport that can claim exemption from the elements but it still shares a big problem with all other sports on campus — recruiting.

DEMONSTRATION WORKOUT — Tech coaches directed the Raiders in exhibition drills for the Texas Tech Coaches Clinic yesterday. (Photo, Bruce Ott).

A good cry cleanses the soul

After all is shed and done, your soul may be saved, but your contacts need help. They need Lense. Lense is the one contact lens solution for complete contact care — preparing, cleansing, and soaking.

There was a time when you needed two or more different lens solutions to properly prepare and maintain your contacts. No more. Lense, from The Murine Company, makes caring for contact lenses as convenient as wearing them.

Just a drop or two of Lense coats and lubricates your lens. This allows the lens to float more freely in the eye, reducing tearful irritation. Why? Because Lense

is a compatible, "isotonic" solution, very much like your eye's natural fluids.

Cleaning your contacts with Lense retards the build-up of foreign deposits on the lenses. And soaking your contacts in Lense between wearing periods assures you of proper lens hygiene. You get a free soaking-storage case with individual lens compartments on the bottom of every bottle of Lense.

It has been demonstrated the improper storage between wear-

ings permits the growth of bacteria on the lenses. This is a sure cause of eye irritation and in some cases can endanger your vision. Bacteria cannot grow in Lense because it's sterile, self-sanitizing, and antiseptic.

Lense... the solution for complete contact lens care. Made by the Murine Company, Inc.

not your contacts
