

The Eyes Of Texas Are Upon Us

Like all students at Texas Tech and all this school's loyal fans, the Saddle Tramps are still smarting as a result of the recent unwarranted attack on Tech's spirit and sportsmanship. We feel we have been unjustifiably maligned and we take it as a personal affront.

Over much of this country Tech has become known as an institution of tremendous spirit which supports its athletic programs as very few schools do. In this support the entire community plays a vital role and deserves much credit. We honestly feel that we have the greatest fans backing the finest teams in this or any conference. Wherever fans are this numerous and enthusiastic, and feelings are this strong, emotion could easily overrule judgment and Tech's reputation could suffer.

One misguided fan hurling abuse at a coach or official, or one paper cup or chunk of ice thrown on the court will make an honest man of the author of the recent allegations in the press.

The Saddle Tramps are confident that all enthusiasm and spirit can be directed in such a way at Saturday night's game as to throttle on one, but to compel one person to eat enough words to gag himself. Beginning with a red carpet airport welcome and extending through organized cheering at the game, the Saddle Tramps are exerting every possible effort to demonstrate Tech spirit at its finest! It will take the help of every fan in the Coliseum.

THE SADDLE TRAMPS

Mademoiselle Pageant Set Today

Lew Dee and Bill McAlister, local radio personalities, will emcee the 1966 Miss Mademoiselle-Miss Playmate Pageant today at 7:30 p.m. at the Municipal Auditorium. Musical entertainment will be provided by the Sourdough Singers who recorded the "Lonely Nightingale."

Today's presentation, sponsored by Sigma Delta Chi, men's journalism society, and the La Ventana, will feature the 25 finalists of the Miss Mademoiselle contest selected Saturday and the 20 Playmate contestants who have been judged from photographs.

La Ventana Features

From the Mademoiselle finalists will be selected Miss Mademoi-

selle and nine runners-up who will be featured in the Mademoiselle section of La Ventana. Miss Mademoiselle will also be featured on the cover of the Mademoiselle section.

Miss Playmate will be announced at the Pageant after the presentation of the candidates between the swim suit competition and the evening gown competition of the Mademoiselle contest. The Playmate candidates were submitted by men's organizations on campus. Miss Playmate will be featured on a three page color foldout of the Playboy section of the La Ventana.

Tickets for the Pageant are \$1 per person and \$1.50 per couple.

Tech Receives Books For New Law School

A gift of 46 cartons of law books for Tech's new Law School was announced Wednesday by the Tech Ex-Students Association.

The volumes were donated from the law library of American Liberty Oil Company in Dallas. They were designated for the new Law School Library.

Association Executive Director Wayne James said the books could be the start of building a first class law school. He expressed his gratitude to the oil company and the Dallas County

Exes for making the gift possible.

The law books were actually given to the Ex-Students Association's Loyalty Fund for the Law School. The School is scheduled to open in September of 1967.

Those responsible for securing the gift were American Liberty President T. L. Wynne Jr.; Dallas banker Dane Grant, president of the Dallas County Chapter of Exes; firm attorney W. M. Parks, and James.

James said, "The Wynne family is known throughout the Southwest for its support of higher education. It is through the generosity of individuals and firms like the Wynnes and American Liberty Oil that Tech will be able to build a top Law School."

Don Anderson, president of the Tech's Ex-Students Association said he hoped the gift would encourage others to make similar contributions.

Board member Harold Hinn of Dallas and Plainview transported the volumes to Tech.

Anderson Challenges Senators, All Techsans

By PAULINE EDWARDS
Editorial Assistant

Roland Anderson, Student Association president, challenged senators and all Techsans to "meet the future head on" last night in his first "State of the Student Body Government Speech" before the Senate this year.

Anderson's challenge was re-emphasized by Vice President Scott Allen at the end of the meeting when he summarized the Senate's action last summer and called for legislation and improvement for the spring semester.

Mention Meetings

Both officers mentioned a meeting with Dr. William Pearce, academic vice president, to discuss plans for a new committee designed to inaugurate changes to make Tech's registration procedures more efficient. Upon the request of Dr. Pearce, the Senate nominated three senators to serve on this committee. The

three are Chris Hickey, Chuck Burton, and Jerry Pittman.

"Texas Tech has just experienced what may have been one of the most outstanding semesters in its 40 year history," Anderson said. But went on to comment, "there are some very serious flaws in the make-up of our institution; flaws which are not beyond correction, but flaws that are in immediate need of attention."

Among the "flaws" mentioned by Anderson were women dormitory and fraternity and sorority lodge hours, compulsory class attendance, the reference to student assemblies in the Code of Student Affairs, traffic problem, name change, athletic seating problem, A.A.U.P. censure and the lack of a Faculty Senate.

For the complete text of Anderson's "State of Student Body Government Speech," see page 4.

Allen called for the establishment of a committee to plan a Government Information Day for Tech. This committee headed by Bill Beuck, will investigate the possibility of inviting national and state legislators to the campus to talk with students for one day. Also, a committee, headed by Mac Johnson, was established to plan a two or three day Senate retreat before the fall semester begins.

Luncheon Series

This semester the Senate is beginning a series of Senate luncheons. These will be conducted once or twice each month and senators will meet with administrators to discuss campus problems. The first luncheon will be Feb. 23 with Dean James Allen.

Max Blakney read a proposed amendment to the By-laws concerning summer senators. The amendment calls for a summer committee composed of seven senators who are available in Lubbock for the summer, plus a chairman and secretary, all having been elected in the spring elections. Summer senators will be appointed by the vice president.

Mike Jones of the Election Revision Committee read a proposed constitutional change which will be voted on later. The proposal would change Article II, Section 3 from "A Sena-

tor must be registered in the school from which he is elected," to "No senator shall be seated or allowed to continue in his seat unless he is a registered member of the school his seat purports to represent. A candidate for senator need not be a registered member of the school he proposes to represent at the time of the election."

Jerry Pittman was elected president pro tempore for the Senate. His duty will be to serve in the absence of the vice president.

The Senate also approved revisions to the Freshmen Constitution and appointed several committees for the spring semester.

Model UN Will Use Committees

The use of a committee system rather than the bloc system used previously was the major change in the fourth Annual Model United Nations which convened last night.

This year's MUN is the largest to date with more than 100 delegations. The work of the MUN has been broken into three permanent committees with one delegate member from each delegation representing his country on one of these committees. These committees include the Special Political committee, the Political Committee and the Economics and Social Committee.

Each committee will discuss two assigned topics. After discussion and debate on these issues, the committee will pass resolutions which will be presented to the general assembly.

These topics include representation of Red China in the United Nations and non-proliferation of nuclear weapons by the Special Political committee, permanent peace-keeping force and Kashmir by the Political committee and land reform and human rights in Africa by the Economic and Social committee.

The Security Council composed of already elected member countries that are represented in the United Nations will meet in separate sessions this year. Meetings are Feb. 16, Economic and Social committee; Feb. 17, Political committee and Special Political committee; Feb. 23, Economic and Social committee and Feb. 24, Political committee and Special Political committee. March 3 a meeting of all three committees.

Other business included a welcome from Chris Hickey, secretary-general; presentation to delegates of credentials and booklets containing the various delegation members, rules for the MUN and meeting times; presentation of a general outline of the MUN and a resolution passed by the assembly asking for a victory over Texas and a request for the best and purest sportsmanship possible at Saturday's game.

Russia Makes Soft Landing

MOSCOW (AP)—After four failures, the Soviet Union announced a space station dubbed Luna 9 made history's first soft landing on the moon Thursday and started radio contact with the earth.

The feat put the Soviet Union ahead in the race to place a man on the moon. The first U.S. attempt at a soft landing, a key step in putting a man on the moon is not expected before May. A soft landing means bringing an instrument package down on the surface slowly enough so there is no crash and resultant destruction.

They may be purchased in the Union or at the door.

Mademoiselle

Finalists in the Miss Mademoiselle Pageant are: Lynda Rhea Allen, sponsored by Zeta Tau Alpha; Sherry Barton, Kappa Kappa Gamma; Adrienne Black, Gordon Hall; Carolyn Case, Zeta Tau Alpha;

Darlene Curtis, Home Management Residence House; Ann Damron, Chi Omega; Carolyn Fincher, Men's No. 10; Judy Formby, Zeta Tau Alpha; Jan Glenn, Wells Hall;

Kay Hayden, Kappa Alpha Theta; Gail Holmes, Kappa Kappa Gamma; Denise Humphries, Army ROTC; Jane Kelsey, Delta Delta Delta; Susan Logan, Army ROTC; Sue Ann Long, Gamma Phi Beta;

D'Lynn McGinty, Rodeo Association; Pam Munson, Delta Delta Delta; Sandi Parmer, Carpenter Hall; Susan Rapp, Delta Delta Delta; Sherrill Reagan, Gamma Phi Beta; Teresa Joann Reynolds, Army ROTC;

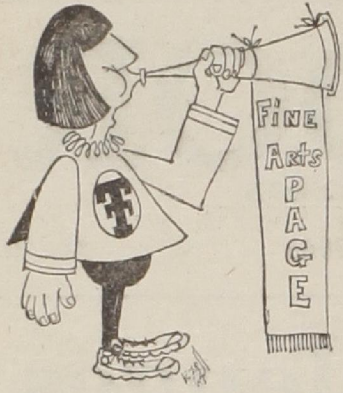

Rita Rische, CorpsDettes; Shirley Stafford, Alpha Phi; Donna Webb, Alpha Delta Pi; and Alice Ann Woolley, Delta Delta Delta.

Playmates

Miss Playmate contestants and their sponsors include: Dana Aston, Sigma Nu; Jeanette Boren, Wells Hall; Connie Curry, Carpenter Hall; Carolyn Fincher, Men's No. 10;

Judy Garrett, Army ROTC; Suzi Grazier, Pi Kappa Alpha; Robin Hardee, Army ROTC; Mary Ann Jones, Sigma Chi; Susan Logan, Bledsoe Hall; Lynn Melton, Army ROTC; Jan Middleton, Gaston Hall;

Nadine Nayfa, Carpenter Hall; Sandi Parmer, Carpenter Hall; Anita Pratt, Carpenter Hall; Buff Rank, Gordon Hall; Joann Reynolds, Army ROTC; Sue Samples, Pi Kappa Alpha; Lynne Shapiro, Sneed Hall; Melodie Shute, Carpenter Hall; and Mary R. Smith, Pi Kappa Alpha.

MACBETH—William Metzger portrays the title role in the National Shakespeare Company's production of Macbeth, coming to Municipal Auditorium Monday night. The presentation is part of the Tech Artists Course.

National Company Presents 'Macbeth'

A record-breaking troupe performing a record-breaking play is the setup when the Tech Artists Course presents The National Shakespeare Company in a performance of "Macbeth" at 8:30 p.m. Monday in the Lubbock Municipal Auditorium.

The troupe, which includes William Metzger, Howland Chamberlain and Pat Starr among its headliners, has become the most widely-traveled Shakespearean Company ever to tour the U.S. since its organization in 1962. Its present tour includes a coast-to-coast junket with appearances in more than thirty states.

Most Widely-Read Play

"Macbeth," one of the most popular plays ever written by Shakespeare, has won distinction through increased translations and usage in educational systems as being most widely-read of his tragedies.

The National Shakespeare Company, founded by producer-director

Philip Meister and actress Elaine Sulka, travels as a self-contained unit with productions fully costumed and performed against settings with full light, sound and musical effects.

Its purpose, according to the founders, is "to bring quality productions of culturally significant dramatic literature to the nation at large."

Company Will Travel

Its motto is "Have Company, Will Travel," and productions have been staged on a variety of levels, including huge auditoriums, community centers and basketball courts.

William Metzger, who will perform Monday in the title role of "Macbeth," is in his second tour with the company. His past credits include two seasons with the Kennebunkport, Maine, summer stock theater and four years at the Green Hills summer stock theater in Reading, Penn.

Howland Chamberlain has been in more than 25 movies and 50 television productions, his movie appearances including academy award winners "The Best Years of Our Lives" and "High Noon."

Pat Starr, also a second year veteran of the company, is a native Texan, and holds degrees in drama from both West Texas State University in Canyon and Trinity University in San Antonio.

Tickets may be obtained for no charge at the Union Program Office. Students must present an ID card for each ticket.

Fourteen Men Join Chi Rho Fraternity

Special ceremonies, conducted Wednesday night, initiated fourteen men as members of Chi Rho Fraternity. Dean of Men, Lewis Jones, speaking at a banquet hosting the initiates, described the Catholic organization as "a unique fraternity."

Initiated into Chi Rho were Doug Barnhart, Merkel sophomore; Larry Colgin, Dallas sophomore; Tom Garza, Dimmitt sophomore; Tim Heffernan, Irving sophomore; Mike Lind, Dallas freshman; Ted Trautner, McAllen freshman; and Pete Lucas, Dallas freshman.

Pino Maurino, Lubbock junior; Greg Obregon, Bogota, Columbia, junior; Kevin Shannon, El Paso junior; John Tallent, Dallas freshman; Abe Lopez, Lamesa junior; Joe Malley, Lubbock freshman, and Jim Terilli, Dallas freshman.

At the initiation banquet Dean Jones, the guest speaker, told the initiates and 30 older members they "should be very proud" of their successful fraternity. Chi Rho was founded at Texas Tech in 1962.

"You should remember that the original fourteen charter members have built Chi Rho through hard work and they are giving you the fruit of their labors," said Dean Jones.

At the banquet new officers were given the oath of office by Don Milberger, outgoing president.

Officers for the spring semester will be Bob Vacker, president; Angel Hernandez, vice president; Bill Tobin, secretary; and James Beseda, treasurer. Joe Mariner was named pledge trainer for the spring semester.

Tim Heffernan received the "Most Outstanding Pledge Award." The Pledge Class Award went to Randy Labac, fall pledge trainer.

One of the six Founding Fathers of Chi Rho, Lt. Bronson Havard, U.S. Army, concluded the banquet program with a "Farewell Ad-

dress." Havard urged the members and initiates to always keep Chi Rho's triple purposes of faith, service, and brotherhood.

Guests at the banquet were German Boer, assistant dean of business administration and Chi Rho faculty sponsor; Father Tito Samut, Chi Rho chaplain; Father Patrick O'Dwyer, Catholic student chaplain; Chris Hernandez, alumnus; and John Martinez, alumnus.

Tech Given Endowment

Texas Tech will receive grants totaling \$25,600 for preparation of professional personnel in special education during the 1966-67 academic year, President R. C. Godwin announced Wednesday.

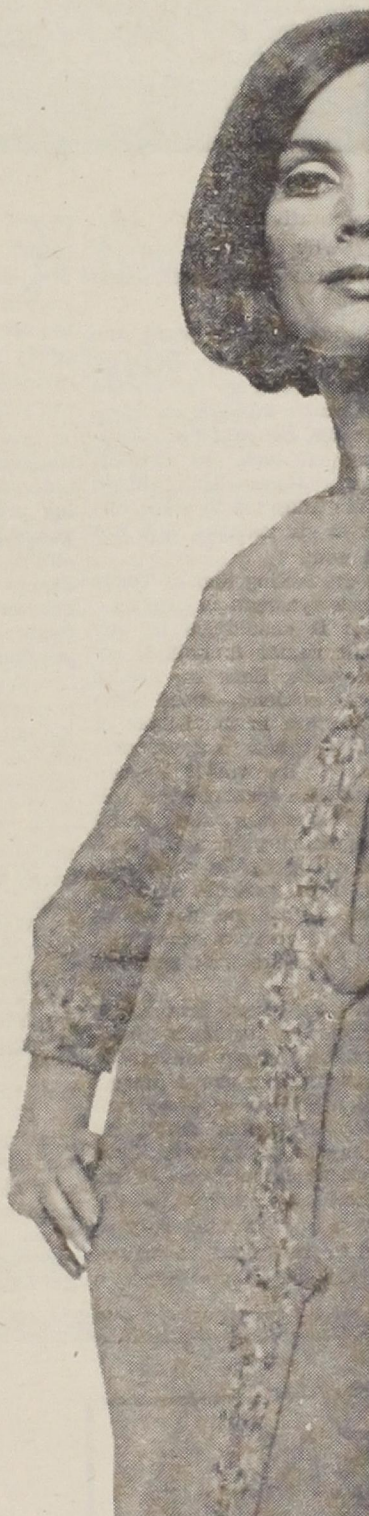

The U.S. Office of Education approved a grant of \$14,400 to provide four senior year traineeships to prepare teachers of mentally retarded children and a fund of \$11,200 to establish three senior level traineeships in Tech's speech and hearing program.

The programs will be under direction of Dr. Bruce D. Mattson, chairman of the Special Education Section of the Department of Education, and Dr. William K. Ickes, director of Tech's Speech and Hearing Clinic.

Purpose of the grants under Public Law 88-164 is to encourage students to prepare for teaching exceptional children, a field which is in short supply at present, said Dr. Morris Wallace, head of Tech's Department of Education.

"These are initial grants in an area which eventually will involve about seven departments of our special education program at Tech," Dr. Wallace said.

ACCOUNTANTS, CHEMISTS, ChE's, ME's, PHYSICISTS (M&E)

You only know the half of it.

Our business no longer hangs by a fiber—cellulosic or otherwise. Far from it. We're researching, producing and marketing a rich range of products—chemicals, plastics, paints and coatings, forest products, petroleum and natural gas products, as well as a full family of man-made fibers—all over the world.

"Celanese' sales growth, its hefty interests in chemicals and its hugely expanded foreign operations have already moved it into a big new class," said a CHEMICAL WEEK* special report.

During the 10 years prior to 1964, sales more than quadrupled, chalking up a growth rate more than six times that of all U. S. manufacturing industries. And the trend is stronger than ever, with corporate sales for 1965 estimated at 23% higher than last year's record of \$701 million.

What does this mean to you?

Since our future expansion depends on our continued ability to develop top-notch people, it is, after all, in our best interest to bring you along as fast as you can take it, and give you all the support you need—in your technical specialty or in management.

LET'S MAKE A DATE. Give our college representative a chance to fill you in on more of the specifics. He will be on your campus within the next week or two—arrange through your Placement Office to see him. If you miss our visit, drop a card indicating your major and work interest to: Supervisor of University Recruitment, Celanese Corporation, 522 Fifth Avenue, New York, N. Y. 10036.

The State Of Texas Tech...

EDITOR'S NOTE: As a public service, the Daily Toreador is printing the entire text of Student Association President Roland Anderson's "State of Texas Tech" address. Every student interested in this school should read his speech and be aware of what is happening on the Texas Tech campus.

Texas Tech has just experienced what may have been one of the most outstanding semesters in its 40 year history: we've had a winning football team which has catapulted us to national prominence; we've been recognized nationally as representing the positive aspects of the campus ferment of our generation by our stands and pronouncements on national issues; our growth rate is unsurpassed. A quick glance to the superficial surface of Texas Tech would most likely lead one to believe that, as far as our campus goes, the old saying applies, "God's in His heaven, and all's well."

But digging below the surface, a surprise of some magnitude is in store. For there are some very serious flaws in the make-up of our institution; flaws which are not beyond correction, but flaws that are in immediate need of attention.

From women's dormitories to fraternity and sorority lodges, we find ourselves burdened with a baby sitting philosophy that far surpasses the strictest curfew hours set by high school parents. And the burden of this philosophy does not end here.

There are professors at this institution who will determine a student's grade not on his class average, not on evidence of his mastery of the subject, but rather on the ridiculous grounds of his class attendance. Thank goodness, the instances of this are dwindling. It must be recognized that mandatory attendance at a university financed by taxpayers, money is at times justifiable, but it is not justifiable to the extent carried by some of our professors.

The epitome of this philosophy is found in the Code of Student Affairs; I refer specifically to the paragraph defining a student assembly, and forbidding any such assembly not sanctioned by the college. Is not the right to assemble a basic and inalienable right? And is this not a flagrant violation of that right?

We desire no rowdy mob scenes on this campus—but can we not differentiate between an illegal and violent mob, and a peaceful gathering, whose purpose is the open exchange of ideas. You, and you, and I are students at a university; we are on the threshold when the leadership of our society will be thrust in our hands; and it

is not only our prerogative, but our duty, that we ask, why? Why does this aura of distrust, this idea of the baby sitter, hang over our heads.

For the past three or four years, the very health and safety of the Texas Tech student has been threatened by the absurd mismanagement of traffic through our campus streets. We are far, far past the rational stage of pushing our luck any farther. The Traffic Security Commission should immediately take the initiative to solve this dilemma—and not in six months, and not in two years, but now.

One often gets the feeling that at Texas Tech, change, whose synonym is progress, is not fostered, as it should be in any modern society, but rather is halted, coerced, and pushed back. Here we are, a university of 16,000 students—more than 50 per cent of which are in the School of Arts and Sciences—yet how are we presented to the nation, to the world? Regrettably, we are viewed as a technological college, with the connotation of a rather small technical and engineering school, with either non-existent or negligible studies in the fields of liberal arts, business administration, and the like. But, oh no, the critics of name change reply. Everyone knows that Texas Technological College isn't really a technological college.

May I remind you when, scarcely a year ago, the governor of our state misinterpreted the true nature of our university, and placed us in the rather grave danger of being aligned in a college super system under the direction of Texas A&M: In other words, a technological system. If we truly feel deeply about Texas Tech—if we are really attached emotionally to the Double T—then it is our bounded duty to the university, and to the future, to act not emotionally, but rationally, in selecting a

proper name for this university. This institution—or for that fact, any such institution—is not to be manipulated by the influence of local pressure groups, alumni, or townpeople. And the student is most certainly not the low man on the totem pole of college life. The college is created FOR the student, and this should be remembered.

I would like to challenge our Athletic Department, and our Student Service Fee Committee, to closely investigate the growing problem of seating at athletic events. There seems to be two apparent solutions: either find 16,000 seats in the Coliseum and Jones Stadium, so that each student is guaranteed a seat at any event, or else modify the present method of the student's purchasing admission to an athletic event.

But perhaps the greatest deficit apparent at our university today resolves around the nature of the vast number of major decisions by our Board of Directors. Our physical growth is fantastic—and the physical plant of the college has aptly kept up with this phenomenal growth. But what about our standards of educational excellence? What about our standards of scholarship?

We can furnish a student an excellent dormitory room, and ample class space, but do we furnish him with that one thing that is the sole basis of a university? Do we furnish the student with the best possible education? Does Texas Tech offer the student the best available professors, to enrich this educational experience?

Can we find a suitable answer to these questions, when for the past several years, we have been burdened with the censorship of the A.A.U.P.? What difficulties are incurred in the recruiting of new faculty, when we do not offer a basic legislative process for the faculty? I am speaking of the lack at Texas Tech of a Faculty Senate.

The answer is no, we cannot find a suitable answer to these all important questions. It is our fervent hope that the answers will be available, and the situations resolved, before we let more valuable time slip through our fingers.

But in the very midst of these criticisms is one of the most rewarding and fascinating aspects of Texas Tech, especially considering the size of our school. And that is, in 95 per cent of the cases, the willingness of our administration and faculty to work with students, at any time, and on most any subject. This is one of the very things that has led us to our present greatness. This is one of the things that leaves us a great deal of room for hope in resolving our problems.

In conjunction with this, I would like to announce that on Feb. 15, the joint meeting of student representatives, food service representatives, and administration officials, will take place, to discuss and find answers to our dormitory food problems. And this time, something will be done..

So, what is the state of the campus at Texas Tech? Well, it's sort of like someone who has suddenly discovered that overnight he progressed from childhood to manhood. And like such a person, the transition stage is oft times difficult, and the direction to follow sometimes obscured, and hard to determine.

But let us not hesitate: let us have the courage to meet our problems head on, and solve them. For the state of the student government here is good; never has the Student Government, the Student Senate, found itself with more power, more influence and more potential to work with, than at the present. If we will channel our actions in the proper direction, nothing but good, nothing but a greater and greater Texas Tech, can result. For Texas Tech is a great university—in every sense of the word.

It is our duty, and the duty of the students of the future, to foster the growth, and the greatness, of Texas Tech. Let us meet the future head on—not with fear, but with excitement, anticipation, and a sense of fulfillment. Embrace the possible with open arms, and make it probable, and then make it reality. Don't restrict the future. Build it. Shape it. For it is as I've said before, and will probably say again: at Texas Tech, our hopes are boundless, our horizons, unlimited.

Editorial Page

david snyder

A.M.E.N.

(assistant managing editor's notes)

CONFIDENTIAL NOTE to whom it may concern: Most students of Texas Technological College (sic), as well as many faculty and administration members, are notorious drinkers. But before you go jumping to conclusions, realize that we are talking about soft drinks, in terms of the amount of money spent in vending machines at Tech. And in addition to drinks, the campus consumes tremendous amounts of candy, cigarettes, milk and sandwiches.

Based on the amount of money guaranteed the college by vendors last year, Techsans plunked something like \$265,000 into vending machines between September, 1964, and August, 1965. If our slide rule has not erred, this amounts to about \$14.40 per year for every student, faculty member, custodian, etc. who spends eight hours or more a day here.

The breakdown on this goes something like \$135,000 for soft drinks, \$87,000 for candy, \$20,000 for milk, \$12,000 for sandwiches and \$11,000 for cigarettes.

And carrying this statistical binge a little further, this amounts to 73.3 bottles per person per year. However, this is only one every 2.46 days of class, assuming 180 days of class.

It would seem that a word of caution is necessary concerning the accuracy of these figures, for it has been said that "figures will lie and liars will figure." And certainly any statistics professor would cringe at the methods by which we arrived at these gross approximations, but they are somewhere in the neighborhood of correctness.

Probably by this time readers are thinking, "Why those vendors are making a killing," but this is not necessarily so. Most contracts, which are signed between the vendors and the Tech business office, guarantee the college 15 per cent of gross sales or a straight figure, whichever is larger. Any businessman knows this whacks away a major portion of profits. In addition, there are drivers to pay

and machines to maintain (more than one have come in for abuse from disgruntled students who have lost a dime). Their profits must come from volume sales.

Since there is plenty of volume, there is no doubt but what the vendors are making money, but it is far from a "get rich quick" venture.

★ ★ ★

THE COLLEGE last year received \$64,903 from vending machine contracts, is guaranteed \$84,508 this year and will receive a minimum of \$98,394 next year. This money is divided according to receipts from dorms or academic buildings. Most of the academic receipts for intramurals, and this fund keeps fairly well depleted.

However, the dormitory fund contains "quite a sizeable figure," according to one official, who said it would serve no purpose to give the exact figure. It is being reserved for "special emergencies" since the dormitory system is "not doing too well financially." Some of it has been used for telephone switchboards, lighting around women's dorms, and other miscellaneous items. It will be used for installation cost of the new Centrex phone system, although the operating costs will come from room and board monies.

The various contracts specify sizes—and prices of products (such as 10 oz. or 6 oz. soft drinks) and minimum number of machines (150 soft drink machines). One interesting clause reads, "The Vendor shall service the machine as many times per day as necessary to keep the vending machine properly supplied with soft drinks and in good working order." Sometimes to put it mildly, this one is neglected.

But our favorite is in the contract with the cigarette vendor, which reads, "exclusively for sales in men's residence halls." Obviously, this is because smoking coeds need their exercise and as a result must walk to College Avenue to buy their cigarettes.

Come Saturday Night..

THE UNIVERSITY OF TEXAS Longhorn basketball squad is coming to town Saturday night, but the attention of the Southwest Conference—and possibly the rest of the nation—will not be centered totally on the hardwood floor.

In view of recent windy quotes from the 'Horns' head coach, one Harold Bradley, everyone will be watching him and the Texas Tech home crowd with extra interest.

And what these interested spectators from hundreds of miles away will be seeing will depend totally on those same Texas Tech fans.

Coach Bradley is wrong in his denunciations of Red Raider fans. Their most serious crime is having too much spirit and enthusiasm for their team (if such a thing is possible).

However, it is up to every student and every Lubbock fan to show him just how wrong he is. How do we do this? Simple.

The word is out that the Saddle Tramps have a special plan that will be put into effect during the game. The plan itself is still under wraps, but it promises to be effective.

If even one paper cup is thrown on the floor Saturday night by an angry fan, Coach Bradley will become the most truthful man in the conference. We all know he isn't though, and the Tramp plan will prove it.

Letters To The Editor

All commentary letters for publication should be addressed to "Editor, The Daily Toreador, Campus."

Letters on any topic are welcomed and encouraged, but will be rejected for publication if they are libelous or too long for practical use. All letters will be edited for spelling, grammar and minor mistakes.

Letters mailed through the intra-campus mailing service require no postage.

Banks Addresses Water Conference

The West Texas Water Conference conducted by The West Texas Water Institute opens at Texas Tech today.

Harvey O. Banks, nationally known water resources specialist will head an impressive group of speakers at the fourth annual conference.

Another highlight of the conference is the release of a summary by the Institute's research committee of all active research projects relating to West Texas water resources. The Texas Water Development Board will distribute information relating to the state-wide water plan.

Banks will address the noon luncheon of the conference. The conference is to be held in the upstairs ballroom of the Student Union Building.

First item on the program is registration and a coffee from 8-9 a.m. Gerald W. Thomas, dean of the School of Agriculture at Texas Tech, will open the conference

with introductions and announcements at 9 a.m. followed by a welcome address by George McClesky, president of the Lubbock Chamber of Commerce.

Other speakers will include Joe G. Moore Jr., director of the Texas Water Development Board; Herbert W. Grubb, assistant professor of agricultural economics at Tech; O. F. Dent, commissioner of the Texas Water Rights Commission; Dr. Clark Harvey, Tech Agronomy professor.

Panel discussions are planned from 2-3:15 p.m. J. T. Musick, research agricultural engineer with the U. S. Department of Agriculture will lead the panel followed by W. C. Johnson of the USDA at Bushland, Tex.; Crosby County farmer Don Anderson; and O. R. Stark, executive vice president of the Quitaque First National Bank.

Final item on the program will be a talk by P. M. Price, state engineer with the Soil Conservation Service in Temple, Tex.

Conference moderators will include Russell Bean of Lubbock;

Bill Parsley, vice president for development at Tech; Victor Hauser, USDA research agriculture engineer from Bushland; and Dr. Earl Collister, director of the High Plains Research Foundation at Halfway.

Diaz Joins Tech Staff

Fabri Diaz has joined the Texas Tech Foreign Languages Department as instructor in Spanish. A native of Colombia, Diaz earned his B.A. degree from Javerana University in 1959 and completed requirements for a master's degree at the end of the fall semester at Kansas State University, Manhattan, Kans. He spent last summer in Lubbock as a member of Tech's Peace Corps language training staff.

Prof Gives Papers

Dr. Milton Lester Peebles, associate professor of Dairy Industry in Tech's School of Agriculture will present two papers at the annual meeting of the Association of Southern Agriculture Workers Feb. 7-9 in Jackson, Miss.

His papers are "Some of the Forced Convection Heat Transfer Characteristics of Ice Cream Mix" and "An Evaluation of the CVT Test for Predicting Shelf Life of

Selected Dairy Products."

Dr. Peebles also will serve on an awards committee to select and recognize outstanding contributions to Southern agriculture, and as an evaluator to choose the outstanding presentation by graduate students.

Dr. Peebles joined the Tech faculty in 1951. He earned his doctorate from Ohio State University in 1960.

Say I Love You With Valentine Candy

Hawaii Summer Session

Earn university credits while enjoying your summer in beautiful Hawaii with the nationally popular Howard Tour—a 57-day program for only \$549, plus \$10 tax—the program in which you "live in" and enjoy Hawaii—not just see it; the tour in which you participate in the very best of Island living, not just hear about it. The tour price above includes roundtrip United Air Lines jet travel between the West Coast and Hawaii, residence and accommodations, and the most diversified itinerary of the highest quality and largest number of dinners parties, shows, cruises, sightseeing events, beach activities, cultural functions, and other tour services. Waikiki apartments with daily maid service, steamship passage, and travel to Neighbor Islands are available at adjusted tour rates. Complete details are available on this campus through HOWARD TOUR.

Four years and 88 million dollars later...

In the last four years you've been studying, Collins' total sales rose from \$190 million to over \$278 million — up 88 million dollars.

The number of people working at Collins climbed to 16,662 — up 2,000.

In the past four years, we've invested over 52 million dollars in new plants and equipment as part of our continuing expansion program.

Our products are used by governments, business and industry throughout the free world.

This brief picture of company growth means something very special to you. Opportunity.

We are working on basic research designing new equipment and systems, and producing products in every area of communication, computation and control.

It's a broad field. And an exciting one. One where a young man like yourself can carve out a financially rewarding and professionally satisfying career.

Collins is one of the few companies offering you such a diversity of opportunity because Collins is one of the few companies so totally committed to the broad spectrum of the communication, computation and control concept.

We'd like to tell you more about our company, about our growth, about the opportunities we can offer you. For complete information contact the Collins representative on campus. Your placement office has the time of his visit.

Health Association Meet Scheduled For Weekend

Approximately 75 representatives from colleges in a five-state area are expected to attend the annual meeting of the Southwestern College Health Association Friday and Saturday on the Texas Tech campus.

Friday's luncheon speaker will be Dr. Donald Cooper, a director of Student Health Service at Oklahoma State University whose topic will be "National Level of the American College Health Association."

Purposes and administration of college health services will be evaluated at afternoon panel discussions. Moderators will be Dr. Kenneth Young, director of Student Health Services at the University of New Mexico, and Dr. Roger Lyons, director of Texas A&M's health service. Speakers will include Tech Dean of Student Life James G. Allen, Dean S. M. Kennedy of the Tech School of Arts and Sciences, Dr. Don Robinson, of the University of Oklahoma, Louisiana State University Hospital Administrator Odell Hanchey, Dr. Charles Nester of West Texas State, and Margaret Jarrett, of Midwestern University's health staff.

General Session
M. L. Pennington, Tech's vice president for business affairs, will welcome the participants at the 10:30 a.m. general session. Mary Gilmore, R.N., from Oklahoma College for Women will be moderator of a panel discussion on "Nurses and Para-Medical Personnel in Student Health Services." Speakers will include Lillian McCavick of the University of Texas, Edith Butler of Oklahoma State University, Jane Rosin of Eastern New Mexico University, Louise Mitchell of West Texas State and Iris Norman and Shelba Flenniken of Texas Tech.

Visitor Tour
Visitors will be taken on a tour of the campus Saturday morning under direction of Elo J. Urbanovsky, head of the Department of Park Administration, and Joe B. Holmes, manager of Tech's Central Food Facilities.

Dr. Wallace Hess, Tech athletic department physician, will conduct a discussion on "Intramurals and Athletics on Campus." Speakers will be Don Sparks, head athletic trainer at Tech, Edsel Buchanan, director of intramural sports, and Dr. Cooper.
Saturday's luncheon speaker will be Berl Huffman, coach of freshman football and varsity baseball at Tech.
The conference will close with a business meeting at 2 p.m. Saturday.

Raider Roundup

TGIF DANCE

The Nite Owls will play at today's TGIF dance at 4:30 p.m. in the snack bar of the Union. This is the first of this semester's series of non-admission TGIF dances.

MARKETING ASSOCIATION

The marketing association will meet at noon Tuesday in the Tech Union. Reservations are to be made by Friday in Dr. Rayne's office.

FILM SERIES

"Hud," first in the Popular Film Series to be presented at the Union, will begin its run today at 8 p.m. in the Coronado Room. It will also show Sunday at 3 and 7 p.m. The film stars Paul Newman and Patricia Neal.

UNION DANCE

There will be a dance in the Union Saturday from 12 noon until 2 p.m. featuring the Velvetens. There is no charge.

Karate Choppers Give Exhibition

By **GEORGE CHAFFEE**
Assistant Sports Editor

James Geren looks like any other Tech student you might see. His physique probably wouldn't cause anyone to gasp with amazement and the friendly air about him makes him just an average guy, right? Wrong.

Every evening, Geren puts on a white oriental uniform, wraps a brown belt around it, and, using karate, proceeds to kick through three-inch boards.

Geren, along with several black, brown and blue belts will demonstrate karate techniques in Municipal Auditorium at 2 p.m. Sunday.

As experienced as Geren is, he won't exactly be the star of the show. Allen Steen, a black belt and 1963 world's champion runner-up, will perform several feats including kicking through a five-inch board, busting a concrete block with a karate blow, and fighting three attackers at the same time. In addition, he will demonstrate self-defense techniques for 30 minutes.

John Daring, a judo black belt who trains the Lubbock police department, will give an hour program on judo throws and self-defense.

Geren, karate instructor at the YMCA, will perform a few feats including a leap over five chairs into a three-inch board. He hopes to break it.

A junior architecture major, Geren teaches a class of 42 students the art of karate. Although the class is composed mostly of men, there are several Tech girls enrolled. Girls take karate to keep in shape, coordinate their bodies, and for self-defense, Geren said.

The class meets Wednesday evenings and Saturday afternoons for about two hours. Each session lasts three to four months and at the competition of each course, the student is usually ready to take his belt examination.

There are five belts in karate ranging from white (the lowest) to black. It usually takes about four months to get each belt with the exception of the white one. Everybody from Charles Atlas to Phyllis Dillar is a white belt. The black belt is pretty difficult to get. It takes a good student three to four years to get his black belt. Geren has six brown belt students in his class working toward their black belts.

Several members of his class will perform in the exhibition Sunday afternoon. Tickets for the Wayne's i-TsETAOINN show are sold at the Union, Wayne's Record Shop, and at the door of the auditorium.

"MISS ADVERTISING" CONTEST

Gamma Alpha Chi and Alpha Delta Sigma, professional advertising fraternities, will sponsor a contest to select a "Miss Advertising" to reign over Advertising Recognition Week in February. She will also serve as the official hostess at all functions involving the advertising program at Tech.

To be eligible a girl must be a member of Gamma Alpha Chi or be a sophomore or above with a two point average and a major in advertising, advertising arts or related fields in journalism and home economics. For further information call Dr. Billy Ross.

Lost: Amarillo high school (1961) senior ring. Initials GRS. Gold with red stone. Call 3232.

Found: Man's dark trench coat left at Cotton Bowl. Call Student Council Office.

RED AND BLACK JUMPIN' JACKS—These three big men show why Tech consistently wins the battle for the backboards. Bob Glover, (right) Dallas sophomore, leads the team in rebounds. He pulled down nine in Tuesday's win over TCU. He was joined by Norman Reuther, (center) who also got

nine and Vernon Paul (left) who grabbed off eight missed baskets. Reuther is a Fort Worth senior all-SWC pick and Paul is an Oklahoma sophomore. The Raiders, with these three controlling the boards, take on the Texas Longhorns Saturday night in Municipal Coliseum.
