

## Bill To Increase Fees Introduced In House

Texas Tech students are faced with the possibility of paying higher tuition fees next semester.

A bill proposing increases in tuition for state-supported colleges and universities was introduced in the Texas House of Representatives Jan. 29.

Sponsored by Reps. Murray Watson Jr., J. C. Day, Jr. and George M. Thurmond, the bill proposes increasing long semester fees from \$25 to \$50 for students who are residents of Texas and from \$150 to \$200 for out-of-state students.

The 12 week summer session fee would be raised to \$40 for resident students and \$135 for non-residents. Persons registered for less than a full load of 14 hours would pay proportionately lower

fees with a minimum of \$15 for a 4 and one-half month semester and \$10 for a 12-week summer session.

### Board Could Reduce Fee

The proposal would allow an institution's board of directors to reduce the fee to 80 per cent for resident students working at least 20 hours a week and carrying a full scholastic load. Members of the armed forces and their families would be allowed to register at resident rates regardless of how long they had lived in the state.

Texas' tuition rate for state-supported schools is the lowest in the union. The fees were set in 1932 and have not since been changed.

The Texas Commission on Higher Education asked the Legisla-

ture to consider the bill. A similar attempt failed two years ago.

### Student Reaction

Most educators feel an increase in tuition would have little effect on enrollment. Some feel, however, that an increase would cause difficulty for needy students desiring to attend college.

Student reaction on the Tech campus varied:

Sylvia Pyland, Fort Worth junior said, "If the object of a state supported school is to make education available to the majority it seems as though raising the tuition would defeat the purpose."

Sammy McWorter, Lubbock freshman, stated, "I think it would discourage students more than it would encourage them, especially out-of-state students."

### Transfers Expected

Non-resident opinion was expressed by Janet Moore, a Portales, N. M. junior. "I feel it will drive away out-of-state students and cause those who are here to transfer out of necessity."

The same feeling was expressed by Barbara Pearce of Lawton, Okla. The senior said, "So far as I'm concerned it won't matter to me because I'm graduating, but I feel sorry for other out-of-state students who want to continue their education at Tech. I think a lot of people will transfer."

On the approving side, senior Dave Denton of Fort Worth expressed the opinion that it was all right if the increase was used for salaries. He thought that would improve the school academic standing and would result in better teaching. Denton foresaw no enrollment decrease.

### Tuition Point

A Lubbock freshman Ray Weir said, "Enrollment would be cut some, but the fees should be raised if needed."

Curtis Tally, Justin junior, declared that tuition is a minor point of going to college and \$25 is very little. The raise would be worthwhile if the money was given back to the college, he added.

Mrs. Sandra Wiley, senior from Idalou said, "I don't think it should be raised, but still it would be cheaper than privately endowed colleges. I don't think it would stop anyone from coming to Tech."

### HE TALKED SCHEDULED

Miss Beth Peterson, home economics for the extension division of E. I. du Pont de Nemours & Co., will address Tech home economics students and county extension agents and leaders Monday.

## Mortar Board To Initiate 14 Coeds In Ceremonies Scheduled Saturday

Fourteen coeds and 68 alumnae will become members of Mortar Board, women's national honorary organization at initiation ceremonies in the Recreation Room of the Citizen's National Bank at 2 p.m. tomorrow.

It will be the first initiation for the organization which was obtained through petition by Forum, Tech senior women's honorary group.

## Varsity Show Staff Slates Cast Tryouts

Tryouts for cast positions and singing and dancing parts in the 1957 Varsity Show "On The Town," will be held Monday and Tuesday nights, according to Director John Gilbert.

Students wishing to try out for any type of part should pick up applications and tryout scripts in the Student Council Office. These should be filled out and taken to the tryouts Monday night.

A schedule has been set up so that dancers should report at 7 p.m. Monday night to the Union Workroom. Students trying out for speaking parts will report at 8:30 p.m. in the workroom.

Tuesday night, dancers again will try out at 7 p.m. in the Union Ballroom, and cast tryouts will begin at 8 p.m. in the ballroom.

There are six main characters and twenty-five minor characters to be cast. Fifteen girl and fifteen boy dancers and singers are needed.

Miss Daisy Parker of Florida State University, expansion director of Mortar Board, will conduct the ceremony. Miss Parker arrived this morning and conferred with Dr. E. N. Jones, Tech President; Dr. Ernest Giesecke, vice president and other administration officials.

She also has scheduled meetings with Lubbock Mortar Board alumnae and will attend a dinner tonight with the college chapter of Forum and sponsors.

Representatives of two Texas Mortar Board chapters, Southern Methodist and University of Texas, will attend the initiation. Sixty-eight former members have announced plans to attend.

Following the initiation will be a meeting of all new and former members. A reception will be held honoring Miss Parker 7 to 8:30 p.m., Saturday at Lubbock Women's Club. An alumnae meeting will follow.

Mortar board members must be a senior with a 2-point average and have qualities of leadership and services.

Students to be initiated include Mary Randal, Forum president; Joanne Holmes, vice president; Kay Robinson, secretary; Lua Anne McNeil, treasurer; Francis Allison, Sandra Castevens; Nita Haseloff Keisling, Edwina Schovastja; Barbara Smith, Kathryn Veazey; Alice Wells; Marian Joe Wilson; Mariana Wilson; Beverly Wood.

Sponsors are Miss Jacqueline Sterner, Miss Sue Rainey, and Mrs. James B. Whitehead.

## New Fraternity Receives Approval

A new men's social fraternity, Tau Delta Tau, was approved by the Committee of Student Organizations, yesterday according to James G. Allen, dean of Student Life.

The temporary officers of the organization are: Joe Dale Bryan, president; Bill Morrow, vice-president; Charlie Smith, secretary; Frank Tate, treasurer; and Jerry Fenley, parliamentarian.

Dean Allen disclosed that both he and James B. Whitehead, assistant dean of Student Life, had been working with the group for

about three months before it was officially organized.

Several officials of the national fraternity Tau Delta Tau intend to petition already have visited the campus.

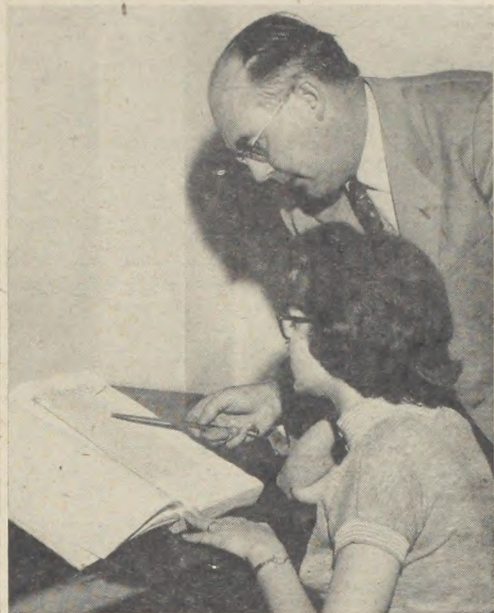

Rush Chairman Bill Morrow stated that the first social function, a Circus Sport Dance, has been set for tonight.

The 22 charter members of the fraternity are Kenneth Bass, Joe Dale Bryan, Gerald Dabbs, Gerald Fenley, Charles Gafford, Norris Green, Donald Griffin, Don Grimes, Pat Groves, Gary Hall,

Don Hunter, Tony Huskerson, Jerry Martin, Bill Morrow, Paul Scragland, Morris Scales, John Scarbrough, David Shoemaker, Charlie Smith, Frank Tate, James Thurston, and Jerry Wood.

Dean Allen stressed the new fraternity will be competing on an equal basis with all the older fraternities now on the Tech campus. This includes participation in rush and pledging intramural sports, inter-fraternity singsong, and a sent on the Inter - fraternity Council.

Plans to petition the national organization are now being materialized, said President Bryan.

IN THE BEGINNING—Tech Librarian Ray Janeway and circulation clerk Laura Buchanan look at the opening words of Volume I of the rare Doves Press Bible recently acquired by the college. The Bible was printed in Great Britain at the turn of the century.

## Tech Library Acquires Rare Bible With Funds Donated By Alpha Chi

A rare Doves Press Bible has been acquired by Texas Tech's library. It was printed in Great Britain at the turn of the Century in five volumes and was purchased from a Chicago bookstore by Ray Janeway, Tech Librarian.

### Alpha Chi Contribution

The book was purchased with funds contributed by Alpha Chi, Tech honorary scholastic fraternity which has been replaced with a charter of the national honor society Phi Kappa Phi.

"Alpha Chi gave us the donation with instructions to buy a rare book, preferably a Bible," Janeway said.

"We settled on the Doves Press Bible because of the fine typography and simple beauty of the book," he said. "A Doves Press Bible is considered to be one of the most nearly perfect examples of typographical art."

The Doves Press Bible can be classified as "scarce rather than rare," Janeway pointed out. The Chicago bookstore clerk said this was the first Doves Bible they had had for sale in three years, Janeway related.

### Names Given

The Bible was printed by hand in large readable type especially designed by T. J. Cobden-Sanders, owner of the now extinct English Doves Press and one of the early practitioners of the modern school of bookbinding.

Covers of the five volumes are of white vellum, calf skin prepared as parchment and are gold embossed. Decorative red capital letters have been placed at the beginning of each book of the Bible.

The Bibles were printed at the small Doves Press on a subscription basis over a period of several years. The names of those who printed these books and others who contributed to the work as proofreaders and compositors are given.

The Tech Library has the volumes on exhibition in a case on the first floor, where they will re-

main for the next few weeks. They will be available for use in the library soon thereafter.

The Alpha Chi donation was one of the last official acts of that organization before disbanding. Money for the Bible came from the balance of the Alpha Chi treasury.

Alpha Chi officers when the donation was made were Richard Ridgway, president; Sandra Castevens, secretary, both of Brownfield; and Mrs. Nita Kiesling of Lubbock, treasurer.

## World Colleges Will Have Same Day For Prayer

Christians on Tech campus and campuses in 57 countries will observe Universal Day of Prayer for Students Sunday, Feb. 17. "When you pray say 'Our Father,'" is the theme for the event sponsored by World's Student Christian Federation.

The organization works to unite the work of all student Christian movements in their efforts to serve Christ.

Local observance will be at 7 p.m. in St. Paul's Episcopal Church, 16th St. and Ave. X. All Tech students and faculty interested in joining together in the prayer movement are invited to attend. Following the formal worship, different groups present will have an informal fellowship period.

Campus Christian groups will come directly from their regular Sunday evening supper to the service.

The committee organized to plan the observance at Tech is composed of students in the Student Religious Council who are interested in the project. Don Elliott is chairman. Speakers for the service will be announced soon.

**TECHSANS TALK BACK**

After seeing our Speech department's two recent productions, William Saroyan's "Subway Circus," and "William Shakespeare's "Merchant of Venice," it seems shameful that our building funds could not include a speech building. The cast and backstage personnel worked wonders with the facilities provided them. The auditorium we have in our Speech building is certainly inadequate. For instance, someone who occupied the chair just next to mine decided it urgent that she tiptoe out during the presentation. She tiptoed, out, but her tiptoeing reminded me of a German train two minutes behind schedule, or the Metro in Paris at a five o'clock rush.

Our chickens have modern chicken houses; our hogs have modern shelter, and plenty of space to root; our speech department has one or two classrooms . . .

Each year we lose many prospective speech and speech therapy majors largely because of poor facilities in our present system. Many of our Texas high schools have far better facilities including a fully equipped and modern auditorium.

I am for a better Texas Tech, and microscopically an improved Speech building with all the trimmings.

*Respectfully,  
Dub Holt*

**Five Days Remain To File Petitions In Favorites And Council Election**

Five days remain for students interested in drawing petitions for Mr. and Miss Texas Tech and vacant Student Council posts.

To date, six petitions have been drawn, two each in the Mr. and Miss Texas Tech race and two for empty Council positions.

Glynn McGee and Wallace Wilson in the Mr. Tech category; Shirley DuPriest and Edwina Schovajsa in the Miss Tech division; Raiford Stainback in engineering and Richard Riojas in arts and science are those who have petitions already drawn.

Election date is Feb 20, but petitions must be filed in the Student Council office by 5 p.m. Wednesday. Class favorites also will be selected in the voting.

No campaigning will be allowed in the Mr. and Miss Tech and favorite races. Campaign expenses for Council representatives have been lowered from \$20 to \$15.

Petitions must contain 300 names in the Mr. and Miss Tech

race while 100 names are required on the representatives' petitions.

Just prior to election a complete list of candidates for all positions will appear in the Toreador.

**TOREADOR**

The Toreador, student newspaper of Texas Technological College is regularly published each Tuesday, Thursday and Friday on the campus at Lubbock by the associated students of the College, and is financed by student activity fees, advertising and subscriptions.

**HERE ARE THE FIRST TWO TIE-BREAKERS IN**

**OLD GOLD'S  
TANGLE  
SCHOOLS  
PUZZLES**

If your answers to the first 24 puzzles conformed to the correct list of answers published at the end of the past semester, you can and must submit answers to eight tie-breaking puzzles, in order to compete for the prizes in the tie.

Remember—first prize is a tour for two around the world, and there are 85 other valuable prizes.

The first two of the eight tie-breakers are published herein, according to rule 2(b) of the official Tangle Schools rules:

2(b) In case more than one person solves correctly the same number of puzzles, the prize tied for and as many

subsequent prizes as there are persons tied will be reserved and those so tying will be required to solve a set of tie-breaking puzzles to determine the order in which the reserved prizes will be awarded.

Each of the tie-breaking puzzles will contain scrambled letters forming the names of either one, two or three American colleges or universities.

Do not mail these tie-breakers now! Save them until you have completed all eight tie-breaking puzzles. Details on when and where to mail the tie-breakers will be published with the eighth puzzle.

# Motor Board Officer Honored by Initiates

Fourteen new Mortar Board initiates and their alumnae associates are going all-out to provide one of the most impressive receptions of the year to honor Miss Daisy Parker, who comes to install Forum as the 97th Mortar Board chapter. Guests will meet Miss Parker from 7 to 8:30 tomorrow night in the Lubbock Women's Club.

A receiving line including the administrative and faculty heads of Tech will greet those gathering to honor the Florida State political science professor, who serves as National Expansion Director of Mortar Board. Visitors from the University of Texas and SMU Mortar Board chapters will add their support to the affair, if weather conditions permit their attendance.

Heading the receiving line will be Mary Randal, president of the new chapter, presenting guests to Miss Parker. Those attending will then be introduced to Joan Holmes, vice president, Dr. and Mrs. E. N. Jones; Dean of Women Florence Phillips and her assistant, Miss Jacquelyn Sterner; Mrs. James Whitehead, Mrs. Turner Kimmel, president of Lubbock Forum alumnae and Miss Sue Rainey, organization sponsor.

On display in the large club room will be the initiation book

of the new chapter. Filled with the names of all new members, the book is the permanent possession of the chapter for future members names.

Elsewhere will be shown telegrams and good-will messages from other chapters in the nation, and from local and state friends of the organizations.

Miss Mabel Erwin, retired Tech professor of Home Economics and former head of the clothing department, planned all decorations to carry out the group colors, gold and silver.

# Delta Sig Rose To Be Revealed

The "Rose of Delta Sigma Pi" will be revealed at a formal dance tomorrow at 8:30 p.m. in the Union Ballroom.

The Rose Dance is an annual affair of the honorary fraternity to name the Rose Girl for the chapter.

Nominees for Rose Girl are Margo Thrush, business administration sophomore from Plainview; Sharrine Strickland, business administration junior from Plainview; and Virginia Willis, home economics freshman from Fort Worth.

# Former SMU Prof Speaks on Suez

Former professor of economics at SMU, Dr. Sidney A. Williams, Arlington, is featured speaker at the initial meeting of Tech's Economics Club at 7 tonight in Room 382 of the Administration Building.

All persons interested in economics are invited to hear Williams talk on "The Economic Implications of the Suez Canal Crisis."

# Kingsmen Combo Play For Ball

A floor show and dancing to music by the Kingsmen Combo are featured in tonight's Gold Digger's Ball at 8:30 in the Union Ballroom.

Girls take the initiative in inviting dates to the dance, following the familiar "Twirp Season" pattern.

The affair is part of the regular Friday night dance program of the Union.

# Barbeque, Dance Entertain Rushees

Rushees of Phi Gamma Delta and Phi Kappa Psi fraternities will be entertained tomorrow in two parties.

A stag barbeque, given by the Phi Delt's begins at 2 p.m. at the 7-8 ranch. A program is planned by members, followed by group singing.

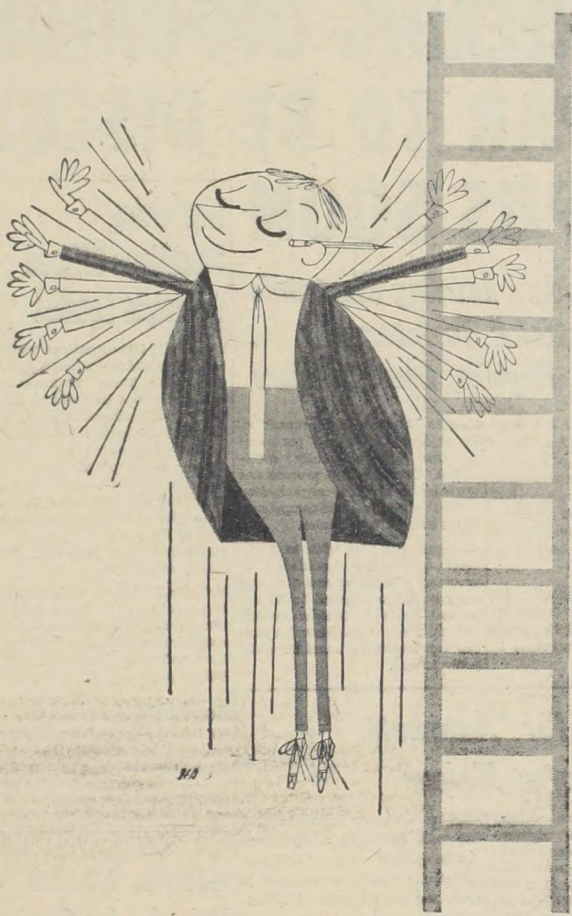

The Phi Psi lodge, 1321 College, is the scene of a sport dance for rushees at 8 p.m. A Valentine theme will be carried out in decorations.

# FOSH SET CLASS DANCE FOR FEB. 23

"Fish Festival," the annual freshman class dance, is planned for Saturday, Feb. 23, according to Bill Dean, freshman class president.

Co-chairmen Carolyn Porter and Hub Heffington have arranged for the Kingsmen Combo to play at the sport dance, which will be held in the Union Ballroom. The event is free to freshmen and their dates.

Students are asked to bring their Identification cards, which will be checked at the door.

**ENGINEERS**

and

**SCIENTISTS**

*we'll be on the campus*

FEB. 12 and 13

*to discuss your future at Boeing*

*...where you can rise to the top*

Right now you're in the process of making one of the most important decisions of your life.

Your decision is important to us, too, because we are interested in engineers and scientists who want to get ahead. We're coming to the campus to give you the facts you need to judge whether Boeing can help you reach the goal you have in mind.

The fact that Boeing is an "engineers' company" is important to your success. At Boeing, you'd work with, and for, engineers—men who talk your language, understand and appreciate your work.

Boeing encourages graduate study, reimbursing full tuition and fees, plus an additional amount for incidentals. Every six months, each Boeing engineer is given a merit review—a personal opportunity for recognition and ad-

vancement. The company's steady, rapid growth assures plenty of opportunities to move ahead. At Boeing, engineers hold positions right to the top.

Another advantage: Boeing assignments are *interesting*. You'll work on such famous projects as the 707, America's first jet transport; the intercontinental B-52, the nation's principal long-range jet bomber; the supersonic BOMARC guided missile, and top-secret programs that probe beyond the frontiers of the known. At Boeing, you'll be in a young, expanding industry, one with its major growth still ahead.

So whether you plan a career in civil, mechanical, electrical, aeronautical or industrial engineering, physics or mathematics (or related fields), drop in for a person-to-person discussion about your future at Boeing.

# Raiders Surprised By H-SU 'Pokes; West SMU Here Saturday

By BILLY ELLIS  
Friday Sports Editor

The Hardin-Simmons Cowboys, hotter than a five-dollar pistol, connected for a torrid 60 per cent of their field goals shots, and breezed past the cold-shooting Red Raiders, 78-60 last night before 4,090 fans in Municipal Coliseum.

Led by the fabulous shooting of center Bob Tremaine, who hit an amazing 11 of 12 field attempts, the Cowboys of Coach Bill Scott were never behind in the game, leading at half-time by 40-36.

The hot-handed Tremaine hit five of five attempts during the first half, then "cooled off" to connect on six of seven shots during the final 20 minutes. Tremaine hit six of seven free throws to easily capture game scoring honors with 28 points.

The Cowboys jumped off to a

2-0 lead in the first minute, and were never headed, although the Raiders missed chances to take the lead at the free throw line. Largest lead of the first half was eight points, at 26-18 and 28-20 just past the midway point of the half.

The Raiders rallied at this point, and tied the game at 30-30, mostly on the shooting of center Podd Hill. The 6-6 post-man hit two quick jump shots to pull Tech up, and tied the count with a pair of charity tosses, with just over six minutes left in the half.

But the Raiders could not keep pace, and Hardin-Simmons took a four-point at the intermission. Tech seemed to have something

going at the start of the second half, as they tied the count at 40-40 after less than a minute of play. But Tremaine took charge at this point, and four goals by the Cowboy center gave his team a six - point lead, 58-52, midway through the final half, and from there the visitors from Abilene began to pull steadily away.

Cummings led Tech scoring with 13 points. Hill and Underwood were next with 12 each. King of Simmons had 20 to ably back up Tremaine in the scoring column.

The Tech freshmen had gotten the evening off to a fast start by roaring to a 99-76 win over the H-SU Buttons. Although ahead

by only four points, 52-48, at the half, the Picadors, led by the magnificent play of Roberts Echols,

who had 33 points, took a large lead at the start of the last half and coasted in.

### Raiders Meet SMU In Saturday Tilt

Texas Tech will be trying to get back on the victory trail tomorrow night—and the team they'll be trying to beat is ranked fourth in the nation.

Southern Methodist University, rated fourth nationally this week by Associated and United Press, will bring probably the most talented team to Lubbock this season to do battle with Coach Polk Robison's Red Raiders.

Coach Doc Hayes' Mustangs have a 16-2 season record, and are currently topping the Southwest Conference with a 6-1 mark. Rated above SMU nationally are North Carolina State (16-0), Kansas (13-1) and Kentucky (13-3).

Leading the Mustangs is their 6-8 center, magnificent Jim Krebs. Krebs, tabbed the "best tall man in SWC history," is the Southwest's leading scorer. "Big Jim" has scored a total of 427 points in 24 games, an average of 23.7, and has 158 points in seven conference games, a 22.6 figure.

Tomorrow's game will be the last meeting of a Southwest Conference team for Tech this year. So far, Tech, who will compete for the conference crown next year, has a 1-2 record with Conference members. Besides the earlier meeting with SMU, Tech lost to TCU 73-65, and beat Baylor last week 68-65.

The Mustangs beat Baylor 83-76 in their last outing, at Waco Tuesday. Doc Hayes' crew hit on 35 of 39 free throw attempts to take the game, an important one in SMU's march to the SWC crown.

# ENGINEERING OPPORTUNITIES AT MELPAR TO BE DISCUSSED ON CAMPUS SOON

## One Of Nation's Leading Electronic R & D Companies To Interview Engineering, Physics, Math Majors

Unusual opportunities for rapid professional growth and advancement at Melpar, Inc., one of the Nation's leading electronic research and development organizations, will be detailed to interested engineering, math and physics majors in a series of interviews to be held on campus soon.

A subsidiary of Westinghouse Air Brake Company, Melpar is now engaged in a program of expansion involving substantial increases in staff and facilities.

Despite Melpar's rapid expansion, the highest standards of personnel selection are constantly maintained. This selective process has produced a vigorous organization of great experience and competence in all fields of electronics.

Younger men who wish to apply their engineering knowledge to problems of a varied and challenging nature are required to fill important posts in Melpar project groups. Plan to interview the Melpar representative when he visits your campus.

## No Waiting For "Automatic" Advancement at Melpar

At Melpar there is no waiting period for "automatic" advancement. Instead, an engineer, regardless of his age or tenure, may move ahead as rapidly as his skill and performance dictate. Each engineer's achievement is reviewed at

least twice a year. In this manner engineers deserving advancement can be quickly "spotted" and promoted. As soon as an engineer is ready for more complex responsibilities they are given him.

## Melpar Gives Financial Assistance For Advanced Study

The list of universities located near Melpar laboratories that offer graduate and undergraduate courses in engineering subjects includes: Georgetown University, George Washington University, American University, Catholic University, University of Maryland, University of Virginia, Harvard, Massachusetts Institute of Technology, Northeastern University, and Boston University. Melpar offers financial assistance for study at these distinguished schools.

### Many Extra Benefits

Melpar's personnel policies and salary structure compare most favorably with those of the industry as a whole. The Company maintains a liberal program of benefits too extensive to detail in this space.

## Choose Assignments From Varied Fields

Engineers who join Melpar may choose their assignments from one or more of these challenging fields:

- Flight Simulators • Radar and Countermeasures • Network Theory • Systems Evaluation • Microwave Techniques • Analog & Digital Computers • Magnetic Tape Handling • UHF, VHF, or SHF Receivers • Packaging Electronic Equipment • Pulse Circuitry • Microwave Filters • Servo-mechanisms • Subminiaturization • Electro-Mechanical Design • Small Mechanisms • Quality Control & Test Engineering

## Fine Living Conditions Offered By Melpar Locales

Melpar's R & D operations are centered near and in Washington, D. C. and Boston, Mass. Both are rich in cultural and educational facilities. The Northern Virginia area in which Melpar's headquarters laboratory is located is within easy driving range of beaches, lakes, mountains, as well as other recreational and scenic points. The climate allows outdoor recreation 215 days of the year. Fine homes and apartments in all price ranges are readily available.

Melpar's Boston area plants allow engineers to enjoy the pleasant tempo of New England living coupled with Boston's splendid cultural and educational advantages. Melpar pays re-location expenses.

### Booklets Available

An attractive, fully-illustrated booklet describing living conditions prevailing in the Washington, D. C. area can be obtained from your campus Placement Officer.

## Grads Go To Work At Once

The college or university graduate who joins Melpar is not required to undergo a formal training program. Instead, he immediately becomes a member of a project group and is assigned to work with an experienced engineer whose guidance and assistance enable him to advance rapidly. Members of Melpar project groups gain experience in all phases of engineering problems by free and frequent interchange of ideas during group meetings. Such experience is valuable in leading to eventual managerial responsibility.

## Melpar Experiences Sure & Steady Growth

Founded in 1945, Melpar has doubled in size every 18 months for the past 11 years. Recently it completed erection of a complete new headquarters laboratory near the Nation's Capital, and is presently making substantial additions to its Watertown, Mass. laboratory (6 miles west of Boston), and to its research department in Boston.

Located on a 44-acre landscaped tract in Fairfax County, Virginia, only 10 miles from Washington, D. C., Melpar's main laboratories encompass over 265,000 square feet under a single roof. Fully air-conditioned, they are equipped with every facility. In addition to the new, ultra-modern headquarters plant, Melpar maintains additional facilities in Arlington, Virginia, Boston and Watertown, Massachusetts, for a total of 460,000 square feet.

## University Courses Offered at Melpar

Melpar staff members, both holders and non-holders of degrees, may take advantage of the many fully-accredited courses in engineering subjects which are offered at Melpar's headquarters laboratory.

## Qualified Graduates Offered Paid Inspection Trips

After a personal interview on their campus, qualified candidates may be invited to visit Melpar's headquarters laboratory at Company expense. Information on opportunities available for graduates together with details on living conditions in Northern Virginia is available by simply writing: Mr. William Schaub, Melpar, Inc., 3000 Arlington Blvd., Falls Church, Virginia.

## Make Appointment Now For Melpar Interview Feb. 15th.

To secure an appointment with the Melpar representative when he visits your campus, contact your Placement Officer today. At the same time ask him for booklets on Melpar and the Northern Virginia area. We believe you will find them of unusual interest.
