THE AMERICAN WAY

THE RIGHT TO KNOW
By Rosalie M. Gordon

Editor's note: Rosalie M. Gordon is editor of All-American Books, All-American Book Digest and America's Future.

One of the most frequently discussed stories in Washington these days concerns attempts by administration officials to kid the American people. It is a tribute to our still free press that some of our newspapers and magazines have broken into print about this — those still conscious of the people's right-to-know. One phase of this subject affects Washington correspondents and reporters, radio & TV newscasters and commentators, columnists, magazine writers and, of course, the publishers and owners of our news media. In the language of the Madison Avenue public-relations fraternity, the present leaders of our government are trying to use all these people to build what is called an "image" of themselves in the public mind. U. S. News & World Report, in its April 9th issue, told how this technique works in a factual article called "The Kennedy 'Image'—How It Is Built."

U. S. News calls the technique the "carrot-and-stick" approach. Newsmen are invited to the White House for private talks with the President, perhaps given an exclusive story or other favors. That's the carrot. If the newsmen does not report the story as the President or his White House staff wishes, then he may come in for a severe going-over by the President himself, or discover that he can no longer get important stories from the White House staff. That's the stick. U. S. News said the White House staff even has suggested the exact language to be used in a story and if it does not appear that way, the reporter is in for telephone calls from the White House. In the case of editors, columnists, publishers and others, there are frequent invitations to luncheon or dinner at the White House, at which they are effectively "battered up." It is expected that they will then spread this butter on the actual activities and moves of the government when they transmit them to their readers.

It is not easy, particularly if you are a working newsmen in Washington, to resist this sort of White House pressure—though, fortunately, some manage to do so. In the case of editors, columnists, publishers and others, it is only human to be flattered and perhaps influenced by this technique of what has been called "feet under the White House table." Then, of course, there is the tremendous power inherent in the threat of government action, if you do not behave, in the form of suits, licenses, tax reprisals and so forth. There is not much use becoming incensed at administration officials for trying to use all the power we have handed them in order to project a certain "image" of themselves in our minds. But the men and women who represent the free press in America are cutting their own throats if they submit to this pressure. Any newsmen who colors his stories to suit White House image — makers should be summarily fired. Any editor, columnist or publisher who cannot resist this technique should either refuse White House invitations or wear blinders and ear plugs when he puts his feet under the White House table.

Another assault on our minds—particularly on the minds of our congressional representatives—goes along with this; and stems from the federal bureaucracy itself. For instance, the president of the American Farm Bureau Federation has charged that part-time employees of the Agricultural Department, paid by the American taxpayers, are used to put pressure on members of Congress for the administration's farm plans. Senator John J. Williams has pointed to the use of civil service employees as government propagandists. It is against the law for federal civil service employees to lobby for or against legislation, but last February the administration made a rule that they could go before so-called "interested public groups" to talk for—not against—administration legislation. Some senators who have not submitted to what are jokingly known on Capitol Hill as "brain-washing sessions" (senators and congressmen get the same White House treatment as newsmen and publishers) have demanded an investigation of this illegal use of federal employees as propagandists. Incidentally, in the last year nearly 80,000 new employees have been added to the federal

SECOND SUNDAY SINGING

The regular Second Sunday Singing will be held at the Assembly of God Church Sunday, May 13, from 2:00 to 4:00 p. m. Everyone is invited to be present.

THE STEEL-PRICE CONTROVERSY, coupled with plans announced by Jimmy Hoffa to weld together an empire of all transport workers in the country, has aroused renewed interest in the need for more effective controls over labor union monopoly activities.

A good example of the present imbalance is the steel industry. If U. S. Steel should decide to close down its plants tomorrow, actions would be taken to prevent it because of competitive and legal reasons. But the Steel Workers Union can shut down 90% of all steel plants at one time, and has done so several times. That is because of the monopoly which that union exercises not only over the workers in U. S. Steel, but over the workers in practically all the other steel plants. The same goes for the Automobile Workers' Union. And scores of other industry-wide union combines. If, by contrast, several steel companies conspire to control any phase of their businesses, they subject themselves to heavy penalties through the vigorous enforcement of the antimonopoly laws. They will be indicted and prosecuted.

How can there be free and responsible collective bargaining and any hope for industrial peace in this country so long as that one-sided situation is permitted to exist?

OUR ANTITRUST LAWS specifically exempt labor unions. That was enacted back in 1914 when unions were struggling and insecure. But times and conditions have changed. Today the highly organized unions are in fact big business themselves. They no longer need nor should they expect to be coddled and wet-nursed. They are grown up and they should be made to act accordingly.

I have introduced legislation a number of times to achieve this objective. Recently Senator McClellan has introduced a similar bill. And others have been introduced. But labor legislation is but rarely advanced unless there is a groundswell of public interest and demand on the part of the people.

It will be recalled that when the Taft-Hartley Act was approved, the House version of that law placed unions under antitrust laws. But the Senate struck that provision out, and a compromise Taft-Hartley Act left it out. If the public interest is to be protected, it is highly necessary that something be done about this weakness in our present laws—and promptly.

payroll which now numbers close to 2,500,000—all paid with your tax dollars.

But the critical point is that representative government cannot survive when the people's right-to-know is interfered with and when their representatives act under pressure from a federal bureaucracy rather than in the interests of the people themselves.

Harvey Grocery Burglarized Early Monday

Two Latin-American brothers from Brownwood, ages 22 and 16, have admitted burglarizing the Harvey Grocery Store early Monday morning. Both are in the county jail in Coleman.

Jim Lovelady, local nightwatchman, discovered the burglary about 2:00 a. m. and called Deputy Sheriff M. R. Simmons to help him. The boys had ripped the screen off the back door and kicked the door in. They apparently took two cartons and some loose packages of cigarettes and a carton of root beer.

When Lovelady first discovered the strange car and got the license number, the car apparently left town headed toward Brownwood. Later they returned here and were apprehended by Simmons and Lovelady. After considerable questioning the boys admitted the burglary.

Mr. Harvey said he would like to express his appreciation to both Mr. Simmons and Mr. Lovelady for their quick action in handling the robbery. He said Mr. Lovelady is certainly on the job and he appreciated it very much.

"West To Glory" Receives Two National Honors

Mrs. Ford Barnes received two distinct honors for her latest book, "West To Glory," this past week. She was notified by the Exposition Press of New York that her book had been chosen by the American Booksellers Association to be exhibited in Washington, D. C., among other outstanding books of distinguished authors. The book will also be exhibited at the 81st annual Conference of the American Library Association in Miami Beach, June 17 to 23.

A few days later she received information that her biography is to be included in the International Dictionary of Famous Writers. The Pageant Press had this to say about her latest book, "West To Glory is an unusual book for it is a fictional autobiography written entirely in verse. In accomplishing this unique piece of literature, the author expertly uses a variety of verse forms. Especially noteworthy are the poems in the final part of the book which are written from European cities which she visited after World War II."

Mr. and Mrs. R. B. Gregg and family of San Antonio brought his mother, Mrs. J. J. Gregg, home Friday evening from an extended visit in the Valley.

Mr. and Mrs. Jack Powers of Midland visited a few days last week with her sister, Mrs. Kate Holmes here and another sister, Mrs. Edith Newsum at Winchell.

Patricia Davis spent the week end in Abilene with her brother, Mr. and Mrs. Don Davis.

It's Time For... EYE CARE

Dr. Newton K. Wesley

Approximately 500,000 Americans are slowly losing their vision because of glaucoma... and a great number of these people are unaware of the disease.

The average American has his eyes examined only once in five years—time enough for a serious eye affliction to develop.

One of the main reasons we neglect our eyes is because usually there is no pain associated with eye disorders and, because eyes do not ache like teeth, we assume there is no trouble present.

Yet if we were to have our eyes examined twice a year, most eye afflictions could be discovered and corrected. The high rate of blindness could be cut in half.

Vanity plays a major part in our neglect of our eyes. We feel that we may have to wear old-fashioned glasses that will make us look older. For those who can adapt themselves to them, contact lenses have solved this problem to a large extent. However, reluctance to visit an eye doctor still exists to an alarming degree.

The National Eye Research Foundation estimates that there are 50 million people in this country in need of eye care. Most of these people will neglect their condition either through ignorance of the consequences or an unwillingness to have their vision checked.

Don't take chances with your most precious possession—your vision. Make an appointment for an eye examination soon.

THE WHITE HOUSE

Statement of the President on the Freedom Bond Drive

Twenty-one years ago, the first Series E Saving Bonds were sold to the American people. Many of these bonds are still being held, still drawing interest. They are part of the record \$45 billion outstanding in Series E and H Savings Bonds today. This tremendous amount of savings in the hands of the individual Americans is a vast reservoir of future purchasing power that will eventually be spent in communities throughout the country to build homes, send children to college, supplement retirement income.

During May and June, the Treasury Department is conducting a special drive to sell more United States Savings Bonds. The campaign is called the Freedom Bond Drive. The word freedom is singularly appropriate. Freedom in America involves a profound respect for individual liberty, a strong determination to maintain that liberty, and to bring ourselves and others to a better life within its framework.

Many Americans today are sincerely wondering what they can do to defend and preserve our freedom. They wish to contribute to our defense efforts, to our adventures in space, and to strengthen our free institutions and our traditions of liberty. The success of our effort is based upon a strong and expanding economy. By investing part of his savings in United States Saving Bonds, an individual citizen can contribute to all of these objectives. At the same time, he helps to provide a financially secure future for himself and his family.

The thousands of Savings Bonds volunteers in communities in every State who will carry on the Freedom Bond Drive, and the patriotic citizens who will respond to their appeal, are a constructive partnership. Their efforts will help bind us closer together as a free nation, and thus strengthen our homes, our communities, and our country.

The objectives of the Freedom Bond Drive are to encourage every American to buy one extra Saving Bond, and to purchase Savings Bonds regularly, either through the automatic payroll savings plan, or at banks and other financial institutions.

I would like to take this opportunity — on the twenty-first anniversary of the Savings Bonds program — to invite every American to purchase an extra share in freedom by purchasing an extra Savings Bond during the Freedom Bond Drive.

MOTHER'S DAY

WE DO not know why 13 should be regarded as an unlucky number. Certainly it is not such this year, as it marks both the Sabbath and Mother's Day. Thus the number now brings to the mind the best influences of the Church and the Home.

As these lines are necessarily written in advance of the 13th, I now express the hope that Mother's Day, as in the Sailor Boy's Dream, may in memory restore every rose and carefully secrete every thorn. Do you remember how Mother took her time to make the paste for your kite or

There is no limit to the amount of human sacrifice that is possible—and is often endured—because of a mother's love for her children.

to make a wee dress for your doll? And does memory now make you to feel the marvelous touch of Mother's hand upon the fevered brow?

Wear your flower today to church in honor or in memory of Mother. But we are sure that Mother does not wish this day to be only one of sweet sentiments indulged and nothing more. Good mothers desire their children to walk in the way their own feet have made plain.

O mothers of today, daughters of the mothers of yesterday, may your steps lead toward the blessed place where all is love and light, that grateful children may arise and call you blessed.

Marriage Plans Announced for Webb Golston Saturday

A color scheme of pink was used in decorations and refreshments when Mrs. Rex Golston entertained with a reception at her home last Saturday evening.

Mrs. Golston's son, Webb, of El Paso, and his fiancée, Miss Diana Miter, were honorees at the party. The wedding date has been set by the couple for June 16, at the St. Clement's Episcopal Church in El Paso, home of the bride-elect.

At the door was Paul James, son-in-law of the hostess. In the receiving line with the hostess and honorees were Maj. and Mrs. John Karr of El Paso.

Pink hydrangeas and iris were in the living room. The dining table held a long arrangement of pink mums, delphinium and gladiolas in a crystal bowl, and a similar arrangement was on the buffet, flanked by twisted pink candles in crystal holders. In the den were spring flowers in shades of pink in brass and crystal holders.

Pink punch, assorted cookies, mints and nuts were served from crystal appointments by Mrs. Ford Barnes and Mrs. Jesse Kimbrough of Houston, sister of the hostess. Assisting in the dining room were Mrs. Blanche Grantham, Mrs. D. R. Hill, Miss Louise Billings of Houston, sister of the hostess, and Mrs. George Naylor of Temple, a niece.

form decorated with a large American flag surrounded by modes of travel employed by Mrs. Barnes on her globe-circling safari such as jets, boats, camels, elephants and rickshaws.

Austin — Annual payments of corporation franchise taxes helped knock down the enormous deficit in the state's General Revenue Fund in just 12 days.

On April 24, State Treasurer Jesse James reported a deficit of \$30,341,045. Twelve days later, the overdraft was down to \$23,053,885.

James noted that the deficit was markedly lower than the \$98,000,000 peak reached a little more than a month ago. But he did not state when the next big payment will be made out of the revenue fund — which might make the deficiency soar again.

Howe, State Comptroller Robert S. Calver said the state will spend more than \$34,000,000 to public schools early in the summer.

STATE WINS ESCHEAT SUIT

Texas' General Revenue Fund will reap \$3,665 as a result of the state winning its first judgment under the new escheat law.

Although the judgment by the 53rd District Court at Travis County was for \$103,665, the State General Revenue Fund benefits by only \$3,665. Reason is that the first \$50,000 escheated must be kept in the treasury in case owners are located. Another \$50,000 annually must be

allocated to pay for the cost of administering the program.

Funds were placed in the treasury under an old law which had no provision for disposition. But the escheat law passed in 1961 paved the way for use of the money.

Attorney General Will Wilson immediately started seeking more escheat money. He asked the U. S. Supreme Court to determine whether Texas, Pennsylvania or New Jersey has the right to escheat \$37,853 that Sun Oil Company owes to more than 1,800 people whose whereabouts are unknown.

Texas claims the money because the transactions were made here. New Jersey filed suit because Sun Oil was chartered there. Pennsylvania wants to attach it because the company headquartered in that state.

IMPORTED STEEL TO BE BANNED

District Judge Herman Jones of Austin has given notice to both sides of the case of the Texas Association of Steel Importers, Inc., versus the State Highway Department that he will uphold the Highway Commission's authority to order a ban against imported steel in constructing state highways.

Steel importers challenged this authority when they brought suit in January. A five-day trial in March ended in a hung jury.

Highway Commissioner Herb Petry, Jr., testified that some imported steel was found to be "inferior", and stated that it wasn't "worth the risk."

Judge Jones concluded that the importers had failed to show the invalidity of the highway department's order. He is expected to enter judgment for the state next week.

COMMISSION ADOPTS TEACHER SERVICE

Texas Employment Commission has undertaken a new statewide program to answer the problem of placing teachers for the state's 2,500,000 school children.

TEC Administrator R. L. Coffman announced that the commission will run a placement service as a clearing house for applications from teachers. Also they will list vacancies.

New plan is expected to afford teachers a wider selection of teaching opportunities and provide school administrators with a choice of instructors from all over the state.

Local offices of the employment commission are stocking application forms, which also may be secured from the Austin office.

UT LEASES UP FOR SALE

Some 35,000 acres of oil and gas leases owned by the University of Texas will be offered for sale at a public auction in the Commodore Perry Hotel in Austin on June 26.

All of the 101 leases on West Texas parcels, ranging from 82 to 343 acres, will be sold for a term of five years, or as long as the oil or gas on the lands is produced in paying quantities.

Big difference in this 45th public auction is that the royalty from gross production has been raised from the one-eighth charged previously to one-sixth. Land Commissioner Jerry Sadler insisted on the change since state public school lands long have been sold on a one-sixth basis.

SHORT SNORTS

The New York Stock Exchange made a survey of security transactions in Texas and reported that the number of stockholders

in the state zoomed from 160,000 in 1955 to 375,000 in 1959, with one Texan in every 26 a shareholder.

State Highway Department is arranging with Civil Defense officials to make departmental buildings available as public fallout shelters in the event of enemy attack.

Twenty-one inspection stations were closed by the Department of Public Safety as it began a crackdown on stations suspected of improper inspection of motor vehicles.

Albert B. Fay of Houston, Republican national committeeman, asked Gov. Price Daniel to proclaim May 26 "Republican Day" in Texas.

Governor Daniel saluted the

176 livestock markets in the state and designated the week of May 7-12 "Livestock Market Week."
