THE **AMERICAN** WAY

THREE FACTS ABOUT COMMUNISM

- By Rosalie M. Gordon

(Editor's note: Rosalie M. Gordon is editor of All-American Books, All-American Book Digest and America's Future.)

It is an amazing thing how we in America have fallen for the technique of the Big Lie — the technique used so effectively by Hitler and perfected by the communists of repeating a false statement over and over until people begin to believe it. Unfortunately, we see Americans who are not communists swallowing and propagating such statements, often without real-izing what they are doing. They themselves are sincere—and therefore effective in spreading the falsehood — because they have convinced themselves it is

A current example of this sort of thing is the off-repeated statement that there is little or no internal threat from communism in the United States because the number of hard-core North Fort Polk, La. (2d BG photo), communists — that is members conspiracy.

Power Rampant

In peacetime, the economic life of the nation would very soon be brought to a standsill if transportation is disrupted. In case of war, a modern industrial nation could be defeated through a failure of its transportation system. It is the informed opinion of Senator McClellan that power to create these conditions does in fact now belong, without restraint, to a few leaders of labor unions operating in the nation's transportation industry.

In fact, the Senator believes that no such power as that possessed by James Hoffa of the Teamesters and Harry Bridges of the Longshöremen has ever been held by any business or combination of business. A \$5 BILLION Foreign Aid Bill was approved by the House last week with 10 Texans voteing for it and 12 voting against. This must be followed by an appropriation which may vary a bit from the \$5 billion figure. A similar bill was previously approved by the Senate. A conference committee will now iron out the differences.

This runs the total of foreign aid to well over \$90 billion.

During debate the House adoped several amendments, in cluding one to forbid use of any of this money for loans, grants or purchase of bonds of the UN Congo and Gaza Strip expenses.

Another amendment prohibits any aid to countries that expropriate U.S. property without adequate compensation.

Employment Tax Return Due

Area employers were reminded today that July 31, 1962, is an important federal tax date. Virgil W. Newman, administrative officer, Internal Revenue Service, Brownwood, said that the date is the deadline for reporting and paying income and social security taxes withheld for the calender quarter ended June 30, 1962.

The IRS representative said employers should use Form 941 to report their liability for that period and mail it, along with depositary receipts and full payment of due taxes to, "District Director, IRS, 2101 Pacific Dallas 1, Texas."

Employers needing copies of Circular E, "Employers Tax Guide," may get it from any IRS office. This publication explains employment taxes, together with tables and percentage methods for figuring such taxes.

The federal law provides that taxpayers making timely deposits in local authorized banks, or Federal Reserve Banks, of the taxes due, have an additional ten days, or until August 10, 1962, to file their returns. Depositary receipts must be submitted with the return, he added

At fifteen, would you walk into to go steady. I am a very normal the office of an airline company boy, well mannered, and I dress well. Please give me some adpassenger ships"? Of course not. You know full well you are not qualified. It takes training and experience to qualify as an air-

"training" before going steady. Actually, you put the cart before the horse when you want to learn about going steady even before you begin to date. The fact that you see so many teenagers going steady does not mean that it is the thing to do—or that you cannot date without going steady.

Our advice is to stay away from the dating routine for a while yet and definitely not go steady at fifteen. This does not mean you must be a stick-in-the-mud. Get together with friends-both boys and girls-plan parties, picnics, etc. Get your parents to supervise. You will have plenty of fun and, we think, will discover that it is not necessary to go steady to have a good time.

The time to go steady is when you are "looking over" a possible marriage partner. You shouldn't be looking for one at fifteen.

If you have a teenage problem you want to discuss, or an observation to make, address your letter to FOR AND ABOUT TEENAGERS, NATIONAL WEEKLY NEWSPAPER SERVICE, FRANKFORT, KY.

Large Number of Korean Vets Still Eligible for Benefits

Projections prepared by the Veterans Administration indicate that there are 150,000 to 200,000 Korean Conflict veterans still eligible to take advantage of the educational provisions of the Korean GI Bill, P. J. Mims, manager of the VA regional

office in Waco, said today.

However, they have only about two-and-a-half years in which to complete their training or education.

The law provides that all education and training of nondisabled Korean veterans, will end by January 31, 1965.

Since the Korean GI Bill program started, more than 2,372,-000 Korean Conflict veterans have either gone to college or taken below-college-level training or on-the-job or on-thefarm courses.

There are about 100,000 Korean veterans still in training these programs now. However, surveys of those eligible and interested have indicated that as many as 200,000 additional veterans may enter the program before it comes to an

An "escape route" for thous-ans of fish which risk death daily in a shallow pool off Padre Island is planned by the State Game and Fish Commission, which estimates that tons of game fish have died in a ninemile hole north of Port Mansfield over the last 10 years.

Howard Lee, the commission's director of field operations, said red fish and trout swim into the shallow pool in the course of their morth-to-south migration, "and don't recognize the fact that there is only one way out."

As the temperature increases in late spring and summer, the water level drops. Fish then are caught in a dry water pool created by drifting sands and are trapped there until death releases them as food for birds and

CROOKED-HOLE DRILLERS CUT OFF

Texas Railroad Commission has severed pipeline connections and set zero allowables for all wells on leases in the East Texas Field on which deviation or inclination surveys have shown

a crooked-hole oil well.
Chairman William J. Murray of the Commission says that the order covers 62 leases

Attorney General Will Wilson advises that when a deviated well is found on a leasé, the whole lease is to be questioned until próven otherwise.

Before the wells involved can be restored to production, operators must have inclination surveys made on each one, and must have production tests to determine each well's actual ability to produce. Wilson said Austin to ask the Texas Commis- ager of Odessa's \$3,900,000 junior production tests were required
