I, Rickey Turner, was born on the 4th day of August, 1950 to Mr. and Mrs. H. C. Turner. Six years later, I enrolled in the Santa Anna grade school and remained there through the first grade. I returned two years later to enroll in the 3rd grade. This time, I remained permanently.

After graduation from grade school, I entered Santa Anna High School and remained for four years. While in high school, I was a member of the Slide Rule Club and Number Sense Club for a year, a member of the Future Teachers of America for two years, a member of the Spanish Club for two years, and a member of the student council for a year. I participated in track for two years and won a second place ribbon for pole vaulting in 1965.

My next stepping stone will be to enter the Automation Machine Training Center in Kansas City, Missouri, this summer. From there I will seek a position in Brownwood or Abilene as a computer technician.

## Miscellaneous

An open letter to the Graduating Seniors of Santa Anna High School, who endeavor to pursue informal education at formal centers of higher education.

It is not without some nostalgia that I attempt to offer you some of the small but important pieces of information that I assembled while being greatly entertained for 7 or 8 years at various places which are complimented by being referred to as COLLEGES, as these places served to mold my mind and body into an absolute state of imperfection. (You too shall soon be able to make short meaningful sentences).

First of all it is of utmost importance to select the right school. You will probably not be allowed to stay here for more than one semester, but remember your old man is keeping time on you, and you must make the most out of what he has saved for your education all of these years. Just follow this complicated outline and you are going to hit a swinging campus.

(1) Be sure the school is co-educational. There are other guide-lines for selecting YOUR school, but they are probably imperfect due to their simplicity.

The next item in order is your time of enrolment. It is far wiser to wait until the fall to start to school. There are more students in the fall and therefore you will be less conspicuous in the many

eyes of your professors. All so there is no need for your education to interfere with your suntan.

Now, you shall of course need a ward-robe. Simply discard all of your blue jeans, and replace with bermuda shorts. If your knees are nobby, or your legs skinny or you have long black hairs on your legs, buy long socks also. You will soon learn that if you lay your trousers across an open desk drawer, they will require less ironing.

As far as making your grades is concerned, you will have nothing to worry about if you learn the use of a few KEY phrases. One of which is, "one of which." Another is "as it were." There are many more of these which when inserted in the correct context will convey the impression of a highly sophisticated individual.

Be sure that you do not schedule any classes before noon, nor any on Saturday. In fact it is a good idea not to schedule any classes.

There are many matters on which I could give you sound advice, such as selecting a highly intelligent roommate, a girl friend who can type well and whose father is rich, but I will and shall give you credit for learning many of these things while attending old Santa Anna High. Remember you can make the world a better place in which to live, especially for yourself.

Joe.

## Class Prophecy

My friends, I wonder if you have heard  
Of Invention's latest great surprise  
A contraption occult and mysterious,  
That gives wonderful power to the eyes?  
In fact, this machine is so up-to-date  
That when you look into it you plainly see  
The things that are going to come to pass  
And what the events of the future will be.

Now, in order to free you from doubt,  
And to prove that my statements are true,  
I'm going to test this machine right here,  
And show you what it's able to do;  
I shall read you the clever foretellings  
Of affairs that will come to pass  
In the future lives of the pupils  
Of this great and illustrious class.

Well! Well! This shows that Bob Rutherford  
Whose pranks used to worry the teacher,  
Has charge of a church in New York,  
Where he is a much-beloved preacher.  
Who'd have thought it?

Now it tells me that wise Paula Copeland  
Who loved lessons and studied with zest  
It to be a nice old-maid school teacher  
In a Girls' Seminary out west,  
That's fine!

What's this? Who would suspect that Lillian Johnson,  
A gay leader in most of our fun,  
Is slated to help run the nation,  
And sit in Congress, in Washington?  
She's telling them things!

The next thing I see is a picture  
Of Dickie Horner whose duty is plain;  
He's to settle right here as a doctor  
And relieve folks of suffering and pain.  
He won't kill off very many!

Now this magic machine show Korky Wise  
On as fine a large farm as you've seen;  
He makes use of up-to-date methods,  
And pairs cows with a milking machine  
And listen! He persuaded Wanelda Blount  
His neat home and his fortunes to share;  
She makes a fine wife and housekeeper,  
And looks after the poultry with care.  
They seem mighty happy!

Next it shows Ted Ford as a lawyer,  
Winning cases and fame, without doubt;  
Well, we're suprised at his calling not at all  
He always did like to argue and spout.  
I bet he'll charge big fees!

Now I find out that merry Donna Williams  
Became a trained nurse with the trick  
Of conquering malignant diseases,  
And of taking good care of the sick;  
But Roy Joe Harvey, a real estate dealer,  
Cast o'er her his powerful spell,  
So she wed him and spends all her time  
In keeping him fed-up and well.  
Maybe he's live to be ninety!

I see Pat Walton, a stenographer,  
But her office days soon will be past;  
She's engaged to a preacher in Kansas  
And she's filling her hope chest up fast.  
She'll make him stand 'round!

My sakes! Steve Valdez is planning to run  
Next election for the governor of the state;  
Well, our class always had a suspicion  
That like as not he'd do something great.  
I hope he wins!

Here's Sherry Thompson, who didn't like boys,  
And used to say she'd be an old maid,  
With a husband and four sturdy children, and looks very  
contented and staid.  
She married a dentist over here at Trickham.

Larry McIntire I see in Chicago,  
Where he started as clerk in a store  
But now he has bought out the business,  
He married his best-looking clerk  
And lives in style on Michigan's shore.  
He always was lucky!

After graduating from college,  
A career of great service did find,  
She's a teacher over in China,  
Where she's training the soul and the mind.  
Little Pat Cole a missionary?

Davey Beal kissed all the babies;  
Won the election; got to be  
Mayor of our little city.  
He'll be governor; wait and see!

Bless my soul. There's Tommy Blanton  
Cutting capers on Broadway;  
Signing contracts by the dozen,  
He's a star that's come to stay.  
We hope.

Husky Wendell rolls in wealth;  
Teaching course based on health  
Of "wim and wigor" he has a load;  
Step aside, he may explode.

Solemn undertaker Rickey Turner  
Chuckles when you sneeze or cough.  
Hoping some bewhiskered microbe  
Soon will cause to "pop off."  
Be careful!

Hat designer in the city;  
Larry Williams' mind runs riot;  
No one should make hats of spinach—  
But watch our Larry try it!

Fifty miles from the nearest neighbor,  
Tommy Wardlow sits;  
As fire warden in a tower  
People near him give him fits.

Someone should shoot Uncle Jesse,  
Growling on the radio;  
Scaring tots with nightmare horrors,  
As, shivering, off to bed they go  
Bless his heart.

"Mongst files and typing; books and ledgers;  
Carolyn's never at a mental loss;  
Most efficient in an office—  
And she weds that bald-headed lawyer.  
Now she is boss.

Train dispatcher in Brand Central,  
Lin's booming voice is heard,  
Blasts your ear drums; but the catch is,  
You can't understand a word.  
Here he comes.

She can cure your chills and fever—  
That is Doctor Oakes' boast.  
Which is worse, the ill or treatment?  
That's what puzzles us the most.

Chef in a big New York hotel:  
Danny Pierce is doing well;  
He can make hash in just three minutes,  
But Heaven only knows what's in it!

My friends, I hope you have been duly impressed  
With this magic machine and its power,  
That has plainly shown the future fate  
Of the class that's before you this hour.  
And I also trust you'll realize  
Though we're modest and don't put on airs  
That our members are destined to play  
An important part in life's affairs.

## Autobiographies Of Senior Class

**DICKIE HORNER**

I, Dickie Horner, was born on September 29, 1949, in Santa Anna, Texas. My parents are Mr. and Mrs. Richard Horner.

My education began at the age of six when I enrolled in

Santa Anna Elementary. During my first eight years of education I tried to participate in almost every activity. This included such activities as football, basketball, and track.

In 1964, I began my four years of secondary education at Santa Anna High School. During my four years of high school I lettered in basketball 4 years, football 3 years, track 3 years, tennis 1 year and golf 1 year. In the past 4 years I have been a member of the FFA, FTA, Beta Club, Slide Rule Club, and participated in Interscholastic League competition. During my senior year I was chosen most handsome and was a member of the senior play cast.

In the future I plan to enter Texas Tech for the fall semester. I plan to study veterinary medicine.

**TED FORD**

I, Ted Ford was born in Brownwood on July 25, 1950 to Mr. and Mrs. James Ford of Santa Anna. At the age of four I moved to Ponca City, Okla., where I received four years of schooling. After moving back to Santa Anna my remaining 4 years of elementary school were very exciting. I played football, basketball, tennis and ran track in grade school as well as holding class offices. After entering high school I became a member of the Beta Club, the FFA and the FTA. I also played football, basketball track and tennis. I was chosen as vice president of my freshman class. My sophomore year followed much like my freshman year. My junior year was a very exciting year for me. I was elected class president and chosen as assistant sport editor of the annual staff. I played football and was awarded honorable mention all district that year.

I was also on the tennis

team once again. My senior year was the best year of all. I was elected co-captain of the football team as well as president of the annual staff.

After graduation I plan to attend Tarleton State College and later A & M University. I wish to take this time to thank my parents, teachers and the many others who have made my education possible.

## Dhia Records Show Progress For Texas Dairymen

The average production for 24,968 dairy cows completing the 1967 testing year under the Texas Dairy Herd Improvement Association was 11,134 pounds of milk, according to a dairy specialist at Texas A&M University.

J. W. Davis, of the Agricultural Extension Service, said the 11,134 pounds of milk tested 3.7 percent and contained 411 pounds of butterfat. This is an increase of 270 lbs. of milk and 7 pounds of butterfat over 1965-66 and a record high for the state.

Davis serves as a state superintendent of all production testing programs including the Standard Plan Dairy Herd Improvement; Dairy Herd Improvement Registry; Owner - Sampler; and Weight - a - Day - A - Month.

Two hundred seventy-eight herds, located in 79 counties of Texas, completed the testing. Davis said DHIA cows produced 3,654 more pounds of milk than the average for Texas and the records also showed \$182 more in milk sales for the cows

**WANELDA BLOUNT**

I, Wanelda Blount, was born in the Treadway Hospital in Brownfield on January 22, 1950 to Mr. and Mrs. Freddie Blount of Tokio, Texas.

I lived at Tokio until I moved to Santa Anna in 1956. I entered elementary school at Santa Anna. I was in the Choral Club and Little Olympia.

I was very happy when I entered high school in 1964. I have been very busy participating in different clubs. I have been in the Pep Squad 4 years, co-president my senior year, FHA 4 years, song leader my sophomore year and parliamentarian my junior year, FTA 3 years, reporter my junior year, and librarian 4 years, parliamentarian my sophomore year and secretary-treasurer my senior year. I was also in the senior play.

After graduation I plan to attend business school in Abilene.

under test.

The high herd in milk production was a Washington County dairy herd owned by John Fuchs. Fuch's herd, consisting of 30 cows, averaged 16,188 pounds of milk and 547 pounds of butterfat.

The high herd in butterfat production was a Randall County herd owned by J. Chester Elliff. Elliff's herd, consisting of 80 cows, averaged 10,730 pounds of milk and 619 pounds of butterfat, according to the dairy specialist.

Production progress of the dairy herds is clearly illustrated by the continued increase in both milk and fat production of cows on DHIA tests during the past 11 yrs. Increased production does not always insure profits, Davis said.

It would appear that increased production was an economic necessity since producer prices have not kept pace with mounting costs of production and marketing. Tighter economic conditions have forced dairymen to improve the efficiency of the dairy operation. The improvement is reflected in high production per cow, Davis said.

### Meal Planning For The Bride

Suddenly a bride faces the awesome task of meal planning. Francis Reasonover, Extension nutrition and foods specialist, has a few tips to add success.

Make good health an important goal in your life. For this, each meal should contain foods from the basic four food groups — milk, meat, vegetable — fruits, and bread — cereal.

Make a file of recipes to use in preparing foods from each of these groups. Thumb through them for ideas to help get variety in meals, suggests the Texas A&M University specialist.

Don't plan to use more than one new recipe in a meal.

Plan for left-overs that can be used for the next meal with a few if any changes, or freeze extra food to use later in the week.

Consider your husband's likes and dislikes. Introduce only one new dish at a meal.

Plan meals that fit the cultural pattern you desire for your new family.

Plan meals that are within your food budget. Remember — some inexpensive foods may be as nutritious as expensive ones and that when the fare prepared well they will taste as good.

Check your meals by the USDA Food for Fitness Guide to see that they meet your nutritional needs, reminds Miss Reasonover.

LILLIAN JOHNSON

I, Lillian Johnson, was born on November 3, 1949 in Fredericksburg, Virginia. My parents are Mr. and Mrs. Theodore Johnson of Santa Anna.

I began my first year of school at Calverton Elementary School in Goldvein, Virginia, in the fall of 1956. During the summer of 1960, my family moved to Carlsbad, New Mexico. I attended the Roosevelt Elementary School in New Mexico for 2 years. In 1962 my family moved to Santa Anna where I enrolled in the seventh grade.

I was a member of the Choral Club for two years, received a special Reading Certificate, and received a basketball letter for being on the Jr. High basketball team. In the 1963 Science Fair I received a ribbon for entering an exhibit. I was a member of the Jr. High Band for two years. I graduated from Jr. High School to High School in 1964.

In Santa Anna High School, I was a member of the Librarians Club for four years. The first year I received a Certificate and the last three years I received a Librarians Club Pin each year.

I was a Clarinet player in the Senior Band for one and one half years. I also played basketball for half a year.

## Treat Cattle For Grubs, Advises Specialist

Treatment now for cattle grubs can mean extra money in your pocket on sale day, Weldon H. Newton, Extension entomologist with Texas A&M University, says.

In most areas of the state heel fly activity has ceased and this is a sign of the start of the cattle grub cycle, the specialist says.

It is best to apply systemics in this critical time before the young grubs can do their damage to meat and hide of slaughter animals. Various formulations of "Ruelene," "Co-Ral," and "Neguvon" can be applied as either dips, sprays, or back-line pour-ons. Ronnel can be administered as free choice block or granular mineral mix to range animal. "Rid-Ezy" granules and "Trolene-FM" feed mix can be mixed into animals' rations. Some of these materials will also control horn flies, lice, and ticks when used properly, Newton continues.

Not only do grubs damage the meat and hide, but they compete with the animal for vital nutrients. Adult flies can cause cattle fleeing from the bothersome pest to lose energy and weight.

The cattle grub is the larval stage of the bee-like heel fly which annoys cattle during late winter and early spring each year. The flies live only a few days after emerging from their tough pupal case to deposit eggs on the hair of cattle.

About seven or eight months after the larva have hatched, they work their way into the back area where they will cut holes in the hide and form "warbles" before falling to the ground to complete their life cycle.

The costs of grubs in cattle are high. Warbles must be trimmed from the meat, and thus grubby slaughter animals are frequently docked. Holes downgrade the value of hides for leather use, Newton adds.

## Chance Of A Life Time For Texas 4 - H Members

A "Teen Caravan" to Peru and four other Central and South American countries is described as the chance of a lifetime for Texas 4-H Club Members. Edward F. Schlutt, associate state 4-H leader, said the June 24 to August 22 tour gives the participating 4-H members an opportunity to live and learn much about international relations.

The tour, he continued, has been planned by the National 4-H Foundation and is a project of the Texas Partners of the Alliance with Peru.

Its purpose, Schlutt said, is to provide Texas' young people with an opportunity to develop a sense of world citizenship and an understanding of another culture.

**PATRICIA WALTON**

On February 16, 1950, in the Ranger General Hospital, a baby girl was born to Mr. and Mrs. Bob Walton. They called her Patricia Ann.

In September, 1956 she began school at Ranger. She remained there until 1958.

They will learn to communicate in another language and also about agricultural and manufacturing industries; foods and their preparation; music, songs, dances, games, sports and other arts and crafts, he said. But perhaps most important, they will learn what living is like in another country.

The Texas Agricultural Extension specialist added that some of the young people will have an opportunity to work with Peace Corps volunteers and local Extension Service people in conducting youth education programs in the high Andes country of Peru. It is hoped, he said, that many of the visitors will actually live with host families.

The experience is expected to give the young Texans, between 17 and 19 years of age, a new prospective of their own problems. The trip will give them an opportunity to use the knowledge gained in school and apply it to a real - life situation, Schlutt said. Too, it should aid them in developing an ability to understand, accept and appreciate people who have problems and ideas different from their own.

There is a deadline for making an application for the trip, May 20 and a fee is involved, Schlutt said. A visit to the local county Extension office will give interested 4-H members detailed information.

## Autobiographies Of Senior Class

**PAULA COPELAND**

I, Paula Copeland, was born to Mr. and Mrs. Glen Copeland the 29th day of November, 1949.

I entered grade school with the class of '68, a year that seemed a long way off at that time. While in grade school I was Halloween representative three times, in the choral club, pep squad, an 8th grade twirler and Olympic Queen. I entered the sen-

ior band in the 7th grade. My four years of High School have been very happy. I have been in the senior band for five years and FHA three years. My freshman year I was chosen as class favorite. I was a waitress at the junior-Senior Banquet my sophomore year, and was elected as cheerleader for the 1966-67 school year. During my junior year I was chosen as queen of the Halloween Carnival, basketball manager, and class favorite. I was elected head cheerleader, first runner up for most beautiful, an dMiss S.A.H.S. and was Miss Spirit of Christmas my senior year.

After graduation I plan to attend beauty school in Brownwood.

"Any fishing around here?" "Some," answered the lad. "What do you catch?" "You said 'fishin' not 'ket-chin'." answered the youngster.

I returned to Santa Anna and graduated from the 8th grade after participating in football 3 years and basketball and track for 2 years.

During my four years in high school I was in football for 4 years, basketball for 2, track for 3, student council for 2, FFA for 4 years, serving as vice-president my senior year.

## Soil Stewardship Week Important To All Citizens

Recognizing the importance of our natural resources of Soil and water, Governor John Connally has designated the week of May 19-26 as Soil Stewardship Week.

In many Texas' 184 Soil Conservation Districts, observances will be held in cooperation with local churches to recognize the duty man has toward preserving the life giving land.

Soil Stewardship Week gives each individual an opportunity to stop and evaluate his duty to the land, said Clarence Carter, Extension soil and water conservation specialist.

"The citizens of Texas recognize the Earth is the Lord's and we are His servants charged with caring for it and developing it to the best of our ability," Governor Connally said in his proclamation.

Connally went on to say that the countryside is a wealth of values and uses with benefits and responsibilities for all Americans. It provides food and outdoor recreation, wood and water, and it is the bast of agriculture, he said.

"The Bible says that God created the heavens and the Earth as well as everything in them. Man was God's crowning creation and was made in the image of God and given dominion over God's creation; a steward," I. B. Ray, a member of the Soil Stewardship Committee, said recently.

**THOMAS LIN WRISTEN**

I, Thomas Lin Wristen, was born August 1, 1949 to Mr. and Mrs. Thomas Wristen.

At the age of six, I entered the first grade. During my elementary years, I was an escort in the Halloween Carnival. I also participated in Little Olympics.

Reaching Junior High, I found a world of excitement. While in Jr. High I played football, basketball and track.

In September of 1964, I entered High School. While in High School, I was in the Future Teachers of America for 2 years. I served as treasurer of my Sophomore class, Vice-President of the Junior Class and this year I was elected President of the Senior Class. During my high school years I played and lettered in Football 4 years, lettered in track 3 years, basketball 2 years, golf one year and tennis one year. My junior year I was Honorable Mention all-district in football, and on the regional qualifying 440 relay team in track. This football season I was an All-District tackle, an honorable mention All-Area tackle, and a second team all West Texas Tackle. I was also on the regional qualifying golf team.

After graduation, I plan to attend North Texas State University in Denton where I will major in Pre-Law or Business Administration.

and sermons will be centered around this year's Soil Stewardship Week theme—"A Time for Initiative."

"This initiative can take many forms," Secretary of Agriculture Orville Freeman said recently.

He called for steps to conserve clean water, soil, and air. He also urged renewing cities to make them model garden communities.

"We can enhance the natural beauty of the countryside and provide parklands and wilderness areas to meet the recreation needs of our people," the Secretary said.

"Surprise!" shouts the clown, Jimmy Williams, from inside the litter barrel to the astonished and amused children.

Each day Jimmy, who's circus name is Happy the Clown, entertains hundreds of children with his antics at the Circus World Museum in Baraboo, Wisconsin. Jimmy not only entertains children during the circus performances, but shakes hands with them, tells them stories, has his picture taken with them, talks about a clown's life and in general becomes a modern day Pied Piper.

And, the children love it.

Most folks don't like to think about their income tax problems after April 15. In spite of the pain, frustration

and bad memories that you may have, there is one little point to remember — you wouldn't have near as much trouble if you had kept good records like you should have.
