Destruction of Cotton Stalks Urged

VOLUME 43

Boll weevils are now abundant in the cotton fields. New growth or cotton furnishes the best feed for the weevils and favors successful winter hibernation, Fording to Dr. F. L. Thomas, Chief of the Division of Entomology, Texas Agricultural Experiment Station, who urges the earliest possible destruction of cotton stalks in order to reduce cotton stalks in order to reduce will give large space to "Our the number of weevils to go into Century of Progress," and will hibernation.

early in the fall is one of the This church was organized in most important steps in boll Illinois and moved to Texas as weevil control," says the Bureau a unit, crossing the Sabine River of Entomology, U. S. Department in November 1833. of Agriculture, which has been
