Science Fair To Be Held At School Tuesday

The first Science Fair Exhibition of the Santa Anna school system, will be held on Tuesday, April 7. A part of the display will be in the gym and part of it will be in some of the school rooms. Supt. Perry said there was so many entries it was impossible to get them all in the gym. All the exhibits will be on display throughout the day and in the early part of the evening.

A number of schools over the state have been holding the science fairs for the past four or five years, and each year they seem to get larger. This will be the first effort of the local school, and from the interest being shown, this one has all possibilities of growing, also. Students have been urged to make exhibits that they can add to each year. There will be exhibits from each class in school and from all the science departments.

The Parent-Teacher Association will have their regular monthly meeting on Tuesday night next week. The purpose of this is for the presentation of awards won in the science fair. There will be a number of medals presented and each entrant will receive a certificate showing he participated in the fair.

A cordial invitation is extended to everyone to visit the exhibits during the day or at the evening meeting.

Tax Filing Time

Forgot something? That is the question Internal Revenue Service is asking of a quarter of a million North Texans. These 250,000 taxpayers are due a refund on their 1958 taxes but have not filed their tax return. The Internal Revenue Service is anxious to start processing these refund returns.

Incidentally, there are 350,000 other North Texans who have not filed their tax return. These taxpayers owe money. Internal Revenue says, and now is a much better time to file than on April 16 when a penalty is due.

The tax folks sum up their advice to the 600,000 who haven't filed their 1959 tax return with the following:

"FILE NOW."

Representative of Turkey Visits In Booker Watson Home

Orhan Toksoz, Chief of Air Telecommunications at the E-senboga International Airport, Ankara, Turkey, was a visitor in the home of Mr. and Mrs. W. B. Watson the past week.

Mr. Toksoz has been in the United States since last October. His mission is to observe our methods and exchange ideas regarding air telecommunications. He has visited Washington, D. C.; Elkins, West Virginia; New York; Harrisburg, Pa.; and is presently in Fort Worth at the Federal Aviation Agency. From Fort Worth he will go to Kansas City, then to New York before leaving for his native Turkey in May.

Mr. Toksoz likes the United States and of the states visited he likes Texas best. He has found Texas people to be extremely friendly.

He remarked that Turkish customs are a little different from customs in the U. S. He also commented on the fact that the U. S. and Turkey are working together against communism.

Mr. Toksoz expressed disappointment that he saw NO cowboys during his stay in Santa Anna.

Mr. and Mrs. M. C. Switzer visited her mother, Mrs. A. H. McCord of Cross Plains, in an Abilene hospital on Sunday. She suffered a broken hip recently.

Minstrel Tickets Go On Sale

The program will be held in the high school auditorium on Tuesday, April 28. Rehearsals are already underway and this promises to be one of the best shows Santa Anna has had in a number of years. A lot of work is being put into the show, and a lot of new equipment has been purchased for the show.

All the money raised will go to the Band Uniform Fund, with the Lions Club paying all the expenses for other funds.

Make your plans now to see the show. Buy your ticket early.

Safety Inspections Must Be Completed By April 15th

Wednesday, April 15, is the last day of the 1959 Vehicle Inspection Year, and all vehicles must have their inspection sticker on the windshield by that time. This information is released from the Texas Department of Public Safety in Austin.

L. A. Welch, operator of the only State Approved Inspection Station in Santa Anna, says the inspections have been picking up some during the past few days, but there are still plenty who do not have the sticker on their vehicle.

In order to get the inspections completed before the deadline, more are going to have to bring their vehicles in for the annual inspections.

If the inspection stickers are not on your vehicle windshield the morning of April 16, you will be subject to arrest and a fine.

RECENT DISCLOSURE of office pay-roll shenanigans by a few Congressmen has aroused the ire of many people, including most of the members of the Congress.

Out of the new crowd of liberals who were swept into office last fall, some of them put their wives on their staff payrolls the day they were sworn in. Another one put his college student son on at \$11,000 per year (since reduced by half). Still another, a machine tool worker who got elected to Congress from Ohio last November, not only made his wife an office secretary but also rented the enclosed front porch of his Ohio home to the government as his official district office.

These and other disclosures provide ample reason for changes in the present system, to better cope with the few who abuse their responsibilities.

The present law makes available to each member of the House a limited amount to draw upon for clerk hire each month. The member certifies the employees and their salaries and they are paid by the House Disbursing Office. The amount available but not used is each month automatically turned back to the Treasury.

A good many of us do not always use the full amount provided, and turn back a few thousand dollars each year. It depends upon the tempo of the work load.

Since 1932 all House payroll records have been wide open for public inspection, and properly so. That was true in the Senate until 1948 when secrecy was clamped upon all Senate office payrolls. And such rolls have been closed to public view since that time.

It is presumed that the voters who elect people who abuse their payroll privileges will hold them accountable when the next election comes around. In the meantime, I hope some law can be enacted which will require minimum hours of work by such employees and also require that they work in the member's office, and not on a sort of floating basis as recent disclosures reveal is done in an instance or two in New York City.

It is a matter of trying to better cope with a few bad apples that crop up now and then in the old barrel.

Moore Sr. and Ozro Eubank, both serving their first terms as Aldermen, are seeking re-election. No other names are on the ballot.

About Your HEALTH

A weekly public service feature from HENRY A. HOLLE, M. D., Comptroller of Health

You're 16, and just when you wanted to look your best you break out with a new crop of pimples. Discouraging? Yes, but not a permanent tragedy.

In nine of ten cases acne will disappear without treatment by your mid-20's. But why wait, when you can do something about it now?

The most important thing is to wash your face with soap and warm water at least three times daily. Why? Because at your age oil glands are often over active and tend to clog pores. Result: Pimples and blackheads.

So it's just common sense to wash often to rid your skin of excess oil and dirt and to help remove the plugs. Cosmetic cleansing creams, incidentally, are not nearly as effective as soap and water. In fact, some of them make acne worse by plugging up already clogged pores.

Your trouble might be particular items of food. So unless you are sure they do not cause flare ups, your physician will probably suggest that you watch out for:

Chocolate in any form such as candy, cookies, cake, ice cream sodas, sauces, cola drinks. Instead, stick to vanilla or fruit flavored sodas and soft drinks, white cakes and cookies.

Nuts, especially peanuts and peanut butter, are capable of causing skin eruptions. Sharp cheeses won't help your acne either, but cream or cottage cheeses are usually okay.

Shellfish or salt water fish, and melons can be aggravating to acne.

Woolen clothing next to bare skin might cause your neck or back to break out. If so, the solution is simple — don't wear wool except as an outer garment.

The bromides in cold pills, nerve medicines and sedatives cause skin difficulties for some people. So can iodine in cough syrups and table salt.

Following the rules of good health — getting plenty of exercise and sleep, eating nutritious meals, and drinking plenty of water — will help you get rid of unsightly acne.

Don't expect the blemishes to disappear overnight. If you follow these suggestions for three or four months and your acne hasn't improved, your family physician, or a specialist he will recommend, will probably prescribe internal and external medicines for your particular case.

So between you and your doctor, you have a much better than even chance of having a clean, clear complexion in time for the first big dance of the new school year next fall. It's well worth working for.

State Capitol NEWS

Austin — "After seeing the appropriation bill — and with all the sentiment there is in favor of a teacher pay raise — I don't see how we can pay for it all without passing one of those big tax bills."

Speaking in private conversation was a legislator. He is one of an estimated 80 to 90 House members who told voters flatly last summer they wouldn't vote for a general sales tax.

But the "big tax bills" to which he refers are the Strickland-Roberts bill, Blanchard bill, Oliver bill, etc. All of these are, as someone said, "mighty like a sales tax," in that they would be collected on the basis of the sales of large numbers of items. His predicament is shared by many Texas lawmakers this year. It is: how to finance the things the people of Texas want without voting a tax the people don't want?

EVER BIGGER — House Appropriations Committee is re-

commending a 1960-61 spending bill that is the granddaddy of 'em all.

Altogether, spending from all sources, including federal grants, would total \$2,401,276,388. It is \$240,000,000 higher than the 1959-60 budget.

Even so, it is \$7,500,000 less than recommended by Gov. Price Daniel. Committee's bill calls for general revenue spending of \$322,461,196; the governor's for \$329,952,992.

Financing the committee's recommendations will require about \$157,000,000 in new tax money for general fund. This results from adding together (1) the expected \$65,000,000 deficit from 1958-59, (2) the \$42,000,000 increase in spending for the coming biennium over this one and (3) an expected \$50,000,000 gap between expected revenue and present spending levels.

If the proposed public school teacher pay raise and any other part of the Hale-Aikin recommendations for school improvement are adopted, the new money needs would soar to between \$200,000,000 and \$300,000,000.

Principal beneficiaries of the \$42,000,000 increase proposed by the Appropriations Committee would be higher education, up \$23,804,432; state employees, up \$3,400,000; state hospitals and special schools, up \$10,321,186; prison system, up \$6,000,000.

TAX FRONT — Meanwhile, the House Taxation Committee, beset by the prodding of the governor on one hand and the objections of various citizens on the other, toils on in its search for new money.

Recent actions include:

Showing temporary disapproval, 12-6, of the governor's plan for the state to take over abandoned property and dormant bank accounts.

Hearing the pros and cons of a raft of "broad-based" taxes. These include:

1. A nine-part omnibus tax measure by Reps. Bob Strickland of San Antonio and Wesley

Liberty Community Meeting Sat. Night

The Liberty Community will have their monthly Community meeting Saturday night, April 4. Games of dominoes and forty-two will be played. Refreshments will be served.

All the Liberty Community is urged to be present and the public has a cordial invitation to be present.

The first motion picture theater has been opened in Los Angeles, Calif.

Roberts of Lamesa which would include a gross receipts levy on retail establishments. It would raise an estimated \$200,000,000 to \$300,000,000.

2. A 1 1/2 percent gross receipts tax on all business activity (with certain exemptions for farm supplies, charitable institutions, professional services, etc.) by Rep. H. J. Blanchard of Lubbock. It would bring in about \$300,000,000 to \$400,000,000.

3. A tax on "the first sale or use of any finished product" by Rep. W. T. Oliver of Port Neches.

4. A tax on "net profits and receipts" by Rep. Alonzo W. Jamison Jr. of Denton.

5. A "cure all" tax on manufactured goods by Rep. Jerry Sadler of Perilla, to bring in about a half-billion dollars per biennium.

It all led one House member to complain of a "million-dollar headache."

PLAN TO TAX BOATS — Boat owners may be in for a shock if the "Water Safety Act" becomes law. Representatives have tackled on a few taxes.

Although designed to promote safety, the measure as it now stands calls for the purchase of a \$2 Certificate of Number every two years, plus payment of a fee of from \$5 to \$12.50 per boat per biennium. About the only boats exempted are canoes and "sea-planes."

The measure passed the House but still must meet Senate approval.

ECONOMY BILL MAKING HEADWAY — There's at least one fellow who believes that his type of job is useless, outmoded and unnecessary.

He is George Corse Jr. of Gram. Texas. Corse feels that school money is being wasted by keeping the job of County School Superintendent alive. He wants to dispense with the office and contends that it will save the State a minimum of \$400,000 annually.

To prove they were economy-minded too, the House passed his bill, HB No. 101 by Rep. Geo. Wilson of Newcastle, and sent it on to the Senate with their blessings.

HB No. 101 would permit the people of a county, by petition of 10 percent of the eligible voters, to vote on discontinuance of the office of County Superintendent of Schools.

Corse is county superintendent of Young County.

TOO CITIFIED? — Texans may have a chance to vote in the next general election on a constitutional amendment to decide, in effect, whether the Legislature shall "go urban."

House passed a resolution by Rep. Will Ehrle of Childress to limit representation from the big city counties. As amended, it would provide one representative for each 100,000 population up to 900,000 and one for each 400,000 thereafter.

Primary target was Harris County, whose sprawling industrialism might entitle it to as many as 13 representatives after the 1960 census, under present rules. Rural legislators fear the city delegations will develop a virtual veto over rural interests. Also, conservatives are skittish about the strong liberal forces that come from Harris County.

But Houstonites, and other city folks, argue that tax-paying citizens are entitled to equal representation, no matter where they live.

Today's MEDITATION from The World's Most Widely Used Devotional Guide

The Upper Room

© THE UPPER ROOM, NASHVILLE, TENNESSEE

Read John 10:7-14.

I came that they may have life, and have it abundantly. (John 10:10.)

Several years ago one of my brothers was seemingly very ill. He went from doctor to doctor, but none could find anything wrong. I suppose in sheer desperation he turned to the Lord of Life, and became converted.

He had been reared by our parents to go to church and Sunday school, but I do not think he ever had a deep spiritual experience before. He became a changed person with great faith.

Part of one of his letters one year was the answer to my prayers for him since he was just a lad. He wrote: "We have our devotional guide at our church. So I have a copy at home. I helped with the communion service for the first time last Sunday. I like it very much, and I am happier than ever before in my life."

"If we could only make others see what a difference Christ can make in their lives; it seems so simple, yet so difficult to get across to the other fellow. I guess a person must have to go through some experience of his own before he really understands."

PRAYER

O Lord God, we come to Thee because we are creatures of recurring need, and Christ has for us the words of eternal life. Grant us the water of life issuing from the deep spring of Thy bountiful supply. In our Redeemer's name, Amen.

THOUGHT FOR THE DAY

Christ being the Lord of my life, I pray that I may be a mirror to reflect His love and glory.

TAX-MAN SAM SEZ:

Texas taxpayers may be entitled to an extra tax deduction on page 3 of their tax return if they have received dividends from a corporation. This is due to Texas being a community property state where both the husband and wife own the stock. Ordinarily, it doesn't matter in Texas whether the stock is in the husband's name or the wife's name. Both own the stock. Since both husband and wife own the stock they both get an exclusion of \$50 each. Don't miss taking the extra \$50 exclusion if you had more than \$100 dividend and are entitled to the exclusion.

Income TAX FAX

Questions and Answers About Your Individual Income Tax Report for 1958, as Presented By The Texas Press Association.

Casualty losses are deductible.

The loss of your property by reason of flood, fire, storm, shipwreck and other casualty, or by theft, is deductible.

If the property was used in your business, the deduction is taken on separate Schedule C.

If the property was personal the deduction is taken on page two of the tax return form.

This deduction is lost if you file short form 1040 or 1040-A, or take the standard deduction.

In the case of a residence, the damage to the residence, ornamental fixtures, trees, shrubbery, lawns, tools, fences, equipment, or any property you owned is deductible. Of course, it is important to be able to prove you owned the property, and the amount of the loss.

Where the loss consists only of damage, then ordinarily the cost of repairs would be the amount of your loss. In other cases the loss is the difference between the fair market value of the property before the loss and the fair market value of the property after the loss.

Any insurance recovery must be deducted from the amount of the loss before you make the deduction on your tax return.

Also, the loss can never exceed the cost or other basis of the property regardless of the fair market value at the time of loss.

If the loss is any amount greater than your income for 1958, then you would carry the excess back to 1956 and apply it against 1956 income and file a claim for refund of the income tax paid for 1956. If the amount of the loss was such that your 1956 income did not absorb the excess, then any unused loss could be carried forward to 1957

in the same way, and if the 1957 income did not absorb all the loss, then any excess could be carried forward for the next five years and applied against the income of those years.

In other words, if you sustain a very large casualty loss you would apply it first against 1958 income, then against 1956 and 1957 income, and then carry forward any unused excess for the next five succeeding years, or until the loss was fully covered by income, but not longer than five years.

It is important to get all your bills, pictures, and other information together at the time of filing your tax return and keep them with your copy of your tax return so that you can prove your loss if necessary.

**Eye Exercise
No Cure-All**

QUESTION: Why won't eye exercises correct ALL eye conditions requiring the use of glasses?

Much has been written the past few years about orthoptic training — also called visual training or eye exercises. This is as it should be because it is now a generally accepted fact that seeing is a learned process, just as his walking, talking, or playing the piano. Thus it follows that if visual skills are learned they can be taught, and this is the basis on which modern orthoptic training rests.

We had better stop a moment to stress the fact that the term "eye exercises" is a very inaccurate tag for orthoptic training. The uninitiated could get the idea, from this name that the only thing involved is rolling the eyeballs in different directions at different speeds, and nothing could be farther from the truth. What is actually taking place is BRAIN exercise — orthoptic training is a MENTAL process more than anything else.

Learning to see begins at birth and just as the hand waving, kicking, and noise making activities of the young baby are very uncoordinated, so are the eye movements at the same time. Much of the baby's learning to see is a matter of experiment. Show him an orange for the first time and it means nothing to him. But give him the orange and he of course will put it in his mouth and he finds out by

golly that this "ball" tastes just like the good stuff his Mommy often gives him from a bottle — and by the way, it's the same color. Some kind of connection here. Eventually, by experiment, he finds out what the connection is. Now you can show him the orange colored "ball" and he knows JUST BY LOOKING what the connection is. Or blindfold him and give him a taste of orange juice and at once he can picture the other two objects mentioned.

But experience and training can go only so far before natural ability and physical development must take over if there is to be further improvement. You can't make a champion boxer out of a fellow who has a glass jaw; you can't make a four minute miler out of a person with a club foot; you can't make a concert musician out of a person who is deaf; the physical ability just isn't there. These are called FUNCTIONAL defects. By far, the great majority of visual weaknesses are functional in nature. They are not disease (pathological) processes and cannot be cured by pills or surgery.

Orthoptic training cannot eliminate the focusing deformity causing nearsightedness, farsightedness, etc. But glasses will re-focus the light for malformed eyes just as a brace will restore a normal gait to the club footed, or a hearing aid restores the world of sound to the deaf.

five months ago she had a baby... five years ago she had cancer!

Would you ever guess that there are 800,000 Americans enjoying healthy life today who once had cancer?

Your dollars to fight cancer have gone a long way in slowing down the trend of this dread disease. Your dollars have supported the American Cancer Society's dynamic research, education and service programs — programs whose aim is to save lives. Progress is being made on many fronts, with the dramatic results that the cancer cure rate has jumped from 1 in 4 to 1 in 3 in the last ten years.

But the fight is far from over. Many, many more thousands of cancer victims might be leading healthy lives today if their cancers had been detected early and treated promptly. Guard yourself and your family with health checkups every year. Help guard others with a generous check to your Unit of the American Cancer Society. Guard your family — fight cancer with a checkup and a check!

The story of

WILLIAM ALLEN WHITE and The Church Bell

"I don't need to advertise," an established merchant in Kansas once told William Allen White, renowned publisher of The Emporia Gazette. "Everybody knows me and knows what I sell."

"In that event," replied the thoughtful publisher, "we can dispense with the oldest advertising medium for the oldest institution in the world. See that church down the street," continued Mr. White, pointing to one of Emporia's oldest and most beautiful structures, "That church has been established here for many years. Everyone knows what it is and what it does. In the tower of the church is a bell and every Sunday it rings out to remind folks to come to church."

"Shoppers go where they are invited and stay where they are well treated," concluded the publisher.

"Regardless of how well established a firm may be, newspaper advertising is a repeated invitation and a reminder to come and do business with that store."

ONE OUT OF FIVE MOTORISTS LACKS VISUAL SKILLS FOR SAFE DRIVING

Figures of 3000 drivers in 25 states were obtained in a pilot survey which American Optometric Association will extend to 100,000 drivers in co-operation with state and local organizations. The national survey, being launched during SAVE YOUR VISION WEEK, March 1-7, aims at accident prevention by cautioning the motorist to respect his individual limits in eyesight, remembering that "DRIVING TAKES SEEING!"

PROTECT window panes when painting the frames by coating each pane with a thick soap suds and water paste. Afterwards, wipe off paint spatters easily with the soap.

To make your own dustless duster, soak a cloth in hot suds to which a few drops of turpentine have been added. Wring and dry. This will hold dust, not scatter it.

Every home needs at least three mops: a soft mop for polished floors, a string or cellulose mop for kitchen floors, and a detachable lamb's wool applicator on a long stick for polishing wax. Launder them often and dry in sunshine to keep fresh.

Do not use cleaning fluid on electric blankets, as it may damage insulating material. Avoid
